About This Book

This book is a complete **Question Bank** for Home Science Class 12th with CUET practice, designed to help you understand concepts, practice a wide variety of questions and prepare confidently for both board exams and CUET UG.

Who is this book for?

- ✓ Class 12th Home Science students
- ✓ CUET UG aspirants
- ✓ Students who want chapter-wise practice
- ✓ Students who want previous year questions
- ✓ Anyone who wants to strengthen concepts and improve their exam performance

Key Features

- 📖 Chapter-wise Question Bank
- 🎯 CUET Practice Questions
- 📄 Previous Year Questions (Solved)
- ☰ Wide Variety of MCQs
- 💡 Concept-based questions
- 📁 Unit-wise Practice Sets
- 🔑 Answer Keys with Explanations

Study
Learn
Grow

What will you get in this book?

- 1 Chapter-wise MCQs for complete Class 12th syllabus
- 2 CUET-style practice questions for competitive preparation
- 3 Previous Year CUET papers (Solved)
- 4 Unit-wise practice sets and important questions
- 5 Detailed and accurate answer keys
- 6 Simple and clear explanations for better understanding
- 7 Well-structured content as per latest syllabus

Why choose this book?

Exam Strategy

Smart Plan • Consistent Practice • Better Results

Plan
Practice
Progress

Class 12th Board Strategy

Focus on Concept Clarity + Practice + Revision

- 1 Read NCERT thoroughly**
Understand all concepts and examples.
- 2 Make short notes**
Write key points, definitions and diagrams.
- 3 Solve in-text questions**
Practice all NCERT questions.
- 4 Practice chapter-wise questions**
Use this book's question bank.
- 5 Solve previous year papers**
Understand exam pattern and important topics.
- 6 Revise regularly**
Make quick revision notes for last month.

CUET UG Strategy

Focus on Practice + Time Management + Accuracy

- 1 Understand the exam pattern**
MCQ based, multiple subjects, time bound.
- 2 Practice chapter-wise MCQs**
Use this book's CUET practice questions.
- 3 Solve previous year CUET papers**
Get familiar with question style and level.
- 4 Attempt mock tests regularly**
Improve speed and accuracy.
- 5 Revise important topics**
Focus on frequently asked concepts.
- 6 Analyze mistakes**
Learn from errors and practice weak topics more.

Nutrition
 Human Development
 Textile & Clothing
 Family Studies

Study Plan (3-6 Months)

- Month 1 Learn**
Complete all chapters from this book.
Make notes.
- Month 2 Practice**
Solve chapter-wise MCQs and unit tests.
Revise key points.
- Month 3 Previous Year Papers**
Solve Class 12 and CUET previous year papers (at least 3-5 years).
- Month 4-6 Mock Tests & Revision**
Take full-length mock tests, revise weak topics and focus on important questions.

Daily Study Routine (Example)

- | | |
|---------|---------------------------------|
| 1-2 hrs | Read new topic (NCERT + Book) |
| 1 hr | Make notes / Revise |
| 1-2 hrs | Solve MCQs / Practice questions |
| 30 min | Review mistakes |
| 30 min | Quick revision / Flashcards |

Chapter-wise Preparation Tips

Read

- Read NCERT first
- Understand concepts
- Highlight key points
- Make short notes

Practice

- Solve this book's question bank
- Attempt CUET style questions
- Solve previous year papers

Revise

- Make quick notes
- Use mind maps
- Revise important definitions and facts
- Do regular revision

Test Yourself

- Solve unit tests
- Take mock tests
- Analyze mistakes
- Improve speed and accuracy

Important Tips

- ✓ Focus on NCERT – it is the base for both Board and CUET.
- ✓ Use this book's MCQs and practice sets regularly.
- ✓ Give importance to diagrams, examples and case studies.
- ✓ Revise important definitions and facts.
- ✓ Practice time-based mock tests.
- ✓ Keep a notebook for mistakes and difficult questions.
- ✓ Stay consistent and maintain a study schedule.

Good
Notes
Bright
Results

Common Mistakes to Avoid

- | | |
|----------------------------------|----------------------------------|
| ✗ Skipping NCERT. | ✗ Not attempting mock tests. |
| ✗ Only reading without practice. | ✗ Focusing only on one unit. |
| ✗ Ignoring previous year papers. | ✗ Not analyzing mistakes. |
| ✗ Not revising regularly. | ✗ Leaving diagrams and examples. |

Subject-wise Focus Areas

Unit I
Work, Livelihood and Career

- ✓ Key concepts and terms
- ✓ Case studies and examples
- ✓ Important questions

Unit II
Nutrition, Food Science and Technology

- ✓ Definitions and facts
- ✓ Food processing & safety
- ✓ Diagrams and applications

Unit III
Human Development and Family Studies

- ✓ Child development stages
- ✓ Family and community studies
- ✓ Important schemes and policies

Unit IV
Communication and Extension

- ✓ Design, fabric and apparel
- ✓ Consumer education
- ✓ Communication and media

Final Tips for Exam

- ✓ Revise short notes in the last month.
- ✓ Focus on high-weightage topics.
- ✓ Solve at least 5 full-length mock tests.
- ✓ Stay positive and confident.
- ✓ Believe in your preparation.

EXAMINATION PAPER 2025

1. Which of the following is a voluntary scheme of certification of agricultural products (raw and processed) for safeguarding the health of consumers?
- (A) AGMARK
 - (B) FSSAI
 - (C) ISI
 - (D) CAC

Ans :

(A) AGMARK

AGMARK is a certification mark for agricultural products in India, signifying that they conform to a grade standard notified by the Directorate of Marketing & Inspection. It is a voluntary scheme. FSSAI is a regulatory body for food safety, ISI is for industrial products, and CAC sets international food standards.

2. You are a trainer for implementation of Good Manufacturing Practices (GMP) in a food manufacturing unit. Which of the following best describes GMP?
- (A) Involves identification of hazards, assessment of chances of occurrence of hazards during each step/stage in the food chain
 - (B) Ensuring that processors take proactive steps to ensure that their products are safe; enabling to minimise or eliminate contamination and false labelling
 - (C) Promote the development of standardisation and related activities in the world
 - (D) Establishing international standards to protect the health of the consumers and facilitate food and agricultural trade

Ans :

(B) Ensuring that processors take proactive steps to ensure that their products are safe; enabling to minimise or eliminate contamination and false labelling

Good Manufacturing Practices (GMP) are a set of operational requirements and procedures that ensure food products are consistently produced and controlled according to quality standards. This involves proactive steps to prevent contamination and errors. Option (A) describes HACCP, while

(C) and (D) relate to international standards organizations.

3. Deriving satisfaction from work itself, signifies connotation of work as
- (A) a livelihood
 - (B) a job
 - (C) a career
 - (D) a calling

Ans :

(D) a calling

A “calling” refers to work that is intrinsically fulfilling and from which one derives deep personal satisfaction. It goes beyond just earning money (livelihood), performing a set of tasks (job), or progressing through a professional path (career). It implies a sense of purpose and personal meaning in the work itself.

4. Which of the following Article of the Constitution of India guarantees equality of opportunity for all citizens in matters relating to employment and appointment to any office under the State?
- (A) Article 16 (1)
 - (B) Article 22 (1)
 - (C) Article 16 (4)
 - (D) Article 20 (1)

Ans :

(A) Article 16 (1)

Article 16(1) of the Indian Constitution explicitly states that there shall be equality of opportunity for all citizens in matters relating to employment or appointment to any office under the State. Article 16(4) pertains to reservation for backward classes, while Articles 20 and 22 deal with protection in respect of conviction for offenses and protection against arrest, respectively.

5. Nutritional assessment of an individual involves obtaining information on which of the following parameters?
- (A) Anthropometric measurements
 - (B) Dietary assessment
 - (C) Clinical examination
 - (D) Biochemical laboratory analysis

Choose the correct answer from the options given

below:

- (A) (A), (B) and (D) only
- (B) (A), (B) and (C) only
- (C) (A), (B), (C) and (D)
- (D) (B), (C) and (D) only

Ans :

- (C) (A), (B), (C) and (D)

A comprehensive nutritional assessment uses the “ABCD” method, which includes all four parameters listed. Anthropometric measurements (like height, weight), Biochemical analysis (blood tests), Clinical examination (physical signs), and Dietary assessment (food intake) together provide a complete picture of an individual’s nutritional status. All four are essential for an accurate evaluation.

6. Match List-I with List-II

	List-I (Examples)		List-II (Type of processed foods)
(A)	Pickles, jam, marmalade, squashes	(I)	Functional foods
(B)	Probiotics	(II)	Formulated foods
(C)	Frozen peas and frozen vegetables, canned fruits and vegetables	(III)	Manufactured foods
(D)	Bread, biscuits, ice cream	(IV)	Preserved foods

Choose the correct answer from the options given below:

- (A) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)
- (B) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)
- (C) (A)-(I), (B)-(II), (C)-(IV), (D)-(III)
- (D) (A)-(III), (B)-(I), (C)-(IV), (D)-(II)

Ans :

- (D) (A)-(III), (B)-(I), (C)-(IV), (D)-(II)

Probiotics (B) are functional foods (I) providing health benefits. Frozen and canned items (C) are preserved foods (IV) to extend shelf life. Bread and biscuits (D) are formulated foods (II) created by mixing and processing ingredients. Pickles and jams (A), while preserved, are also manufactured foods (III) created through a specific production process.

7. Which of the following are examples of Complementary Colour Scheme?

- (A) Blue & Orange
- (B) Red & Green
- (C) Green & Yellow
- (D) Purple & Yellow

Choose the correct answer from the options given below:

- (A) (A), (B) and (D) only
- (B) (A), (B) and (C) only
- (C) (A), (B), (C) and (D)
- (D) (B), (C) and (D) only

Ans :

- (A) (A), (B) and (D) only

Complementary colours are pairs of colours that are directly opposite each other on the colour wheel. When used together, they create high contrast. Blue and orange, red and green, and purple and yellow are all standard complementary pairs. Green and yellow are analogous colours, as they are next to each other on the colour wheel.

8. Arrange stages of the Fashion Cycle in correct sequence:

- (A) Decline in Popularity
- (B) Peak of Popularity
- (C) Introduction of a Style
- (D) Obsolescence

Choose the correct answer from the options given below.

- (A) (A), (B), (C), (D)
- (B) (C), (B), (A), (D)
- (C) (B), (A), (D), (C)
- (D) (C), (B), (D), (A)

Ans :

- (B) (C), (B), (A), (D)

The fashion cycle follows a predictable sequence. It begins with the (C) Introduction of a new style, which then rises to its (B) Peak of Popularity. After the peak, it experiences a (A) Decline in Popularity as new styles emerge, eventually leading to (D) Obsolescence, where it is no longer considered fashionable.

9. According to the Quality of Work Life (QWL) approach, the employees are considered to be _____ by the organizations. Fill in the blank with suitable option.

- (A) Liability
- (B) Assets
- (C) Debts
- (D) Burden

Ans :

(B) Assets

The Quality of Work Life (QWL) approach emphasizes the well-being and development of employees. It views them not as costs or burdens but as valuable resources or “assets” whose satisfaction and growth are crucial for organizational success. A positive QWL leads to higher motivation, productivity, and commitment from the workforce.

10. What are rules or standards governing the conduct of a person or the members of a profession known as?
- (A) Values
(B) Dignity of Labour
(C) Ethics
(D) Assumptions

Ans :

(C) Ethics

Ethics are the moral principles, rules, and standards of conduct that govern a person's behavior or the practice of a profession. They provide a framework for what is right and wrong in a professional context. Values are personal beliefs, while dignity of labour is the philosophy of respecting all types of jobs.

11. Which of the following is NOT a benefit of ergonomics?
- (A) Increases productivity
(B) Diminishes morale of workers
(C) Decreases absenteeism
(D) Reduces mistakes and need to do the work again

Ans :

(B) Diminishes morale of workers

Ergonomics is the science of designing the workplace and equipment to fit the user, enhancing efficiency and well-being. Its benefits include increased productivity, reduced errors, and lower absenteeism. By improving comfort and reducing strain, ergonomics actually boosts worker morale, making “diminishes morale” the opposite of its intended effect and thus not a benefit.

12. Which of the following fashion designer made use of tents and wagon covers to make cargo pants?
- (A) Levi Strauss
(B) Isaac Singer
(C) Louis Vuitton
(D) Coco Chanel

Ans :

(A) Levi Strauss

Levi Strauss is famously associated with using rugged canvas, originally intended for tents and wagon covers, to create durable work pants for miners during the California Gold Rush. While the modern “cargo pant” came much later, Strauss pioneered the use of such heavy-duty material for trousers, which became the iconic blue jeans.

13. Which of the following is a type of ‘weaving defect’?
- (A) Slub
(B) Colour run
(C) Chafe
(D) Broken end

Ans :

(D) Broken end

A ‘broken end’ is a defect that occurs during the weaving process when a warp yarn (the ‘end’) breaks and is not repaired correctly, leaving a flaw in the fabric structure. A slub is a thick place in a yarn, a colour run is a dyeing defect, and chafe is surface damage from abrasion.

14. Match List-I with List-II

	List-I (Type of stain)		List-II (Chemical used for stain removal)
(A)	Blood	(I)	Methylated spirit
(B)	Tea/Coffee	(II)	Javelle water
(C)	Lipstick	(III)	Ammonia
(D)	Curry	(IV)	Borax

Choose the correct answer from the options given below:

- (A) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)
(B) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)
(C) (A)-(I), (B)-(II), (C)-(IV), (D)-(III)
(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

Ans :

(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

The correct matching for stain removal is: Blood (A) can be treated with a cold water and ammonia (III) solution. Tea/Coffee (B) stains are often treated with a borax (IV) solution. Lipstick (C), being oil-based, can be removed with a solvent like methylated spirit (I). Curry (D) stains may require a bleaching agent like Javelle water (II).

15. You are a catering manager. Arrange the following steps in food service management in the order of implementation.

(A) Reporting
(B) Staffing
(C) Planning
(D) Directing and Delegating

Choose the correct answer from the options given below:

(A) (A) (B), (C), (D)
(B) (A), (C), (B), (D)
(C) (C), (B), (D), (A)
(D) (C), (D), (B), (A)

Ans :

(C) (C), (B), (D), (A)

The sequence follows the standard principles of management. The process begins with (C) Planning the entire operation. This is followed by (B) Staffing, which involves hiring and organizing the required personnel. Next is (D) Directing and Delegating tasks to the staff. Finally, (A) Reporting is done to evaluate performance and outcomes.

16. You are a textile conservator in a museum. Which among the following methods would you choose to minimize the damage caused to a textile artifact stored in your museum?

(A) Expose the objects to light of high intensity
(B) Minimize the intensity of light falling upon the object
(C) Expose objects to light for longer period of time
(D) Introduce photo-chemically active radiations from the light

Ans :

(B) Minimize the intensity of light falling upon the object

Light, especially UV radiation, causes irreversible photochemical damage to textiles, leading to fading and weakening of fibers. A primary principle of textile conservation is to limit light exposure. This is achieved by minimizing the intensity (lux levels) and duration of light on the artifact, as well as filtering out harmful UV rays.

17. The principle of all washing machines is to keep the fabric in movement in the washing solution to carry away the dirt. Which among the following method is used for washing garments in a front load washing machine?

(A) Spinning

(B) Agitation
(C) Tumbling
(D) Pulsation

Ans :

(C) Tumbling

Front-load washing machines have a drum that rotates on a horizontal axis. This action lifts the clothes out of the water and then drops them back in, creating a “tumbling” motion. This method is gentle on clothes and uses less water. Agitation and pulsation are common in top-load machines. Spinning is used to extract water.

18. Your friend is a fashion designer. He/she is planning to launch his/her own fashion business to meet the demands of female wage earners in the age group of 25-45 years. According to you, which type of market segmentation has he/she used to define the target market?

(A) Demographic Segmentation
(B) Geographic Segmentation
(C) Psychographic Segmentation
(D) Behavioural Segmentation

Ans :

(A) Demographic Segmentation

Demographic segmentation involves dividing the market into groups based on statistical characteristics like age, gender, income, and occupation. The target market here is defined by gender (female), age (25-45), and economic status (wage earners), which are all key demographic variables. This helps in creating products that cater specifically to this group's needs.

19. Which among the following is a ‘Principle of Design’?

(A) Texture
(B) Colour
(C) Form/Shape
(D) Balance

Ans :

(D) Balance

The principles of design are the rules used to arrange the elements of design. Balance is a core principle, referring to the distribution of visual weight. Texture, colour, and form/shape are considered elements of design—the basic building blocks that are arranged according to the principles to create a visually appealing composition.

- 20.** Which among the following is a natural factor responsible for the deterioration of artifacts in a museum?
- (A) Bad storage
(B) Pests
(C) Accidents
(D) Fire

Ans :

(B) Pests

Pests, such as insects (like silverfish and carpet beetles) and rodents, are a natural or biological factor that can cause significant damage to artifacts by eating, soiling, or burrowing into them. Bad storage, accidents, and fire are typically considered man-made or environmental hazards rather than inherent natural factors like biological organisms.

- 21.** Identify the essential features of Development Communication.
- (A) It focusses on success stories of people who have adopted new technologies, tried new methods and helped the society
(B) It is oriented to socio-economic development and happiness of the people and community at large
(C) It aims at giving information and educating the community
(D) It combines suitable mass media and interpersonal communication channels for greater impact

Choose the correct answer from the options given below:

- (A) (A), (B) and (D) only
(B) (A), (B), (C) and (D)
(C) (B), (C) and (D) only
(D) (A), (C) and (D) only

Ans :

(B) (A), (B), (C) and (D)

Development communication is a strategic use of communication to promote social and economic development. All the listed features are essential to it. It educates and informs (C), focuses on positive change and success stories (A), is oriented towards community well-being (B), and uses a multi-channel approach for maximum impact (D).

- 22.** Match List-I with List-II

List-I (Hospitality Establishment)			List-II (Services)
(A)	Hotel	(I)	Provides parking facility near the room or a room door that opens out onto the parking lot
(B)	Furnished camps	(II)	Offers lodging, meals and other services to its guests
(C)	Motel	(III)	Offers a broad range of amenities, sports facilities and leisure activities for ensuring a total vacation experience
(D)	Resort	(IV)	Provide hospitality to people who go hiking, undertake adventure sports etc.

Choose the correct answer from the options given below:

- (A) (A)-(II), (B)-(IV), (C)-(I), (D)-(III)
(B) (A)-(II), (B)-(IV), (C)-(III), (D)-(I)
(C) (A)-(I), (B)-(IV), (C)-(II), (D)-(III)
(D) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)

Ans :

(A) (A)-(II), (B)-(IV), (C)-(I), (D)-(III)

A hotel (A) is a general establishment offering lodging and meals (II). Furnished camps (B) cater to outdoor enthusiasts like hikers (IV). A motel (C), a blend of 'motor' and 'hotel', provides parking right outside the room (I). A resort (D) is a destination offering a wide range of leisure and recreational facilities (III).

- 23.** Arrange the stages of 'Guest Cycle' in correct order of their occurrence:

- (A) Departure
(B) Occupancy
(C) Arrival
(D) Pre-arrival

Choose the correct answer from the options given below:

- (A) (A), (B), (C), (D)
(B) (D), (C), (B), (A)
(C) (D), (A), (C), (B)
(D) (C), (B), (D), (A)

Ans :

(B) (D), (C), (B), (A)

The guest cycle describes the stages of a guest's interaction with a hotel. It begins with the (D) Pre-arrival stage (reservations). This is followed by (C) Arrival (check-in and rooming). The main part of the stay is the (B) Occupancy period. The cycle concludes with (A) Departure (check-out and final settlement).

- 24.** Identify the name given to an institutional setting that is particularly designed for the care of infants and young children in the absence of home care.
 (A) Observation Homes
 (B) Special Homes
 (C) Children's Homes
 (D) Crèche

Ans :

(D) Crèche

A crèche, or daycare center, is an establishment that provides care for babies and young children during the daytime while their parents are at work. Observation, special, and children's homes are typically for older children who are orphaned, abandoned, or in conflict with the law, under the Juvenile Justice system.

- 25.** Your mother has purchased gold earring for your sister. Which among the following standardization mark would you advice your mother to check on the product to ensure a quality purchase?
 (A) Ecomark
 (B) FSSAI
 (C) ISI Mark
 (D) Hallmark

Ans :

(D) Hallmark

The BIS Hallmark is a certification system in India that certifies the purity of gold and silver jewellery. Checking for the Hallmark ensures that the metal conforms to the national and international standards of fineness. Ecomark is for eco-friendly products, FSSAI is for food products, and ISI is for industrial products.

- 26.** Match List-I with List-II

List-I (Youth Programme in India)			List-II (Focus/Aim)
A	Scouts and Guides	I	Aims at involving college level students in programmes of social service and national development

B	The National Service Scheme	II	Aimed at making the youth participate in the development processes of their respective countries
C	Commonwealth Youth Programme	III	Provides opportunities for students to involve themselves, on a whole-time basis for a short period of one or two years, in programmes of national development
D	The National Service Volunteer Scheme	IV	Aims at developing the character of boys and girls to make them good citizens by inculcating in them a spirit of loyalty, patriotism and thoughtfulness for others

Choose the correct answer from the options given below:

- (A) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)
 (B) (A)-(I), (B)-(III), (C)-(II), (D)-(IV)
 (C) (A)-(I), (B)-(II), (C)-(IV), (D)-(III)
 (D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

Ans :

(A) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)

Scouts and Guides (A) focuses on character development and citizenship (IV). The National Service Scheme (NSS) (B) engages college students in social service (I). The Commonwealth Youth Programme (C) aims for youth participation in national development (II). The National Service Volunteer Scheme (D) involves youth full-time for a short period in development programs (III).

- 27.** You are a student of resource management. Which of the following career options can you take up after completion of your degree in Human Resource Management?
 (A) Recruitment Consulting
 (B) Career Counselling
 (C) Dietary Counselling
 (D) HR Consulting

Choose the correct answer from the options given below:

- (A) (A), (B) and (C) only

- (B) (A), (C) and (D) only
 (C) (A), (B), and (D) only
 (D) (B), (C) and (D) only

Ans :

- (C) (A), (B), and (D) only

A degree in Human Resource Management directly prepares an individual for careers in managing people. This includes (A) Recruitment Consulting, (B) Career Counselling (guiding professional paths), and (D) HR Consulting (advising companies on HR practices). (C) Dietary Counselling is a specialized field in nutrition and dietetics, not human resources.

- 28.** Which among the following is an example of 'entertainment event'?
- (A) Celebrity night
 (B) Graduation day
 (C) MICE
 (D) Birthday party

Ans :

- (A) Celebrity night

An entertainment event's primary purpose is to entertain the audience. A celebrity night, featuring performances or appearances by famous personalities, fits this description perfectly. A graduation day is a formal institutional event, MICE refers to business events (Meetings, Incentives, Conferences, Exhibitions), and a birthday party is a private, personal event.

- 29.** According to WHO, 'disability' is an umbrella term that covers impairments, limitations in activity and restrictions in participation. If a child faces difficulty in reading, writing and solving arithmetic problems, which of the following type of disability/impairment is he/she suffering from?
- (A) Cerebral Palsy
 (B) Learning disability
 (C) Hearing impairment
 (D) Autism

Ans :

- (B) Learning disability

A learning disability is a neurological condition that affects the brain's ability to process information. It specifically manifests as difficulties in academic skills such as reading (dyslexia), writing (dysgraphia), and mathematics (dyscalculia). The described symptoms are classic indicators of a learning disability, not a motor, sensory, or pervasive developmental disorder.

- 30.** Children under the age of 18, found guilty in terms of violation of law are referred to as _____. Fill in the blank with suitable option.

- (A) Orphan
 (B) Peer
 (C) Scouts
 (D) Juvenile

Ans :

- (D) Juvenile

In the legal system, a person under the age of 18 who commits a crime is referred to as a "juvenile" or a "child in conflict with the law." They are handled by a separate juvenile justice system, which focuses on rehabilitation rather than punishment. The other terms are unrelated to legal violations.

- 31.** Which among the following is an example of a multimedia campaign?
- (A) Project Village Chhatera
 (B) Red Ribbon Express
 (C) SARI
 (D) SEWA

Ans :

- (B) Red Ribbon Express

The Red Ribbon Express was a major health awareness campaign in India that used a specially designed train to travel across the country. It employed a variety of media—exhibitions, street plays, interactive displays, and counseling—to spread information about HIV/AIDS, making it a classic example of a large-scale multimedia campaign.

- 32.** Arrange the steps involved in providing special education to teach children with SEN in the correct order of their implementation.
- (A) Develop Individualized Education Programme (IEP)
 (B) Continuous access and use of support services
 (C) Assessment of the child's level in different areas of development & learning
 (D) Regular evaluation of IEP to check the child's progress

Choose the correct answer from the options given below:

- (A) (A), (B), (C), (D)
 (B) (A), (C), (B), (D)
 (C) (C), (A), (D), (B)
 (D) (C), (B), (D), (A)

Ans :

(C) (C), (A), (D), (B)

The process of providing special education follows a logical cycle. It begins with (C) a thorough assessment of the child's needs. Based on this, (A) an Individualized Education Programme (IEP) is developed. The effectiveness of the IEP is then subject to (D) regular evaluation. Throughout this process, (B) continuous access to support services is crucial.

- 33.** Which of the following are characteristic features of Internal Communication in a corporate organization?

- (A) Interaction between employer and employee of same organisation
- (B) Interaction between two employees of same department and same organisation
- (C) Interaction among several employees of same organization but different departments
- (D) Interaction between employees of different organizations

Choose the correct answer from the options given below:

- (A) (A), (B) and (D) only
- (B) (A), (C) and (D) only
- (C) (B), (C) and (D) only
- (D) (A), (B) and (C) only

Ans :

- (D) (A), (B) and (C) only

Internal communication refers to the exchange of information and ideas within a single organization. This includes communication between employers and employees (A), within the same department (B), and across different departments (C). Interaction between employees of different organizations (D) is defined as external communication.

- 34.** Which among the following is an example of Broadcast Media?

- (A) Television program
- (B) Government mobile service provider
- (C) Fashion magazine
- (D) Internet

Ans :

- (A) Television program

Broadcast media involves transmitting content electronically to a wide, undifferentiated audience. Television and radio are the classic examples of broadcast media. A magazine is print media, a mobile service provider is a telecommunications service, and the internet is a vast network hosting

various forms of media, not a broadcast medium itself.

- 35.** Who among the following is responsible for planning, organising and controlling the kitchen operations?

- (A) Kitchen Steward
- (B) Chef-de-parties
- (C) Deputy Chet
- (D) Chef-de-cuisine

Ans :

- (D) Chef-de-cuisine

The Chef-de-cuisine, also known as the Executive Chef or Head Chef, is the top-level manager in a kitchen. They are responsible for all aspects of kitchen operations, including menu planning, staff management, ordering, and ensuring quality and cost control. The other roles report to the Chef-de-cuisine.

- 36.** The science of relationship between man, machinery and equipment that human beings use and the work environment is known as

- (A) Agronomics
- (B) Economics
- (C) Ergonomics
- (D) Mechanical Science

Ans :

- (C) Ergonomics

Ergonomics is the scientific discipline concerned with the understanding of interactions among humans and other elements of a system. It applies theory, principles, data, and methods to design in order to optimize human well-being and overall system performance. It essentially fits the job to the person, not the other way around.

- 37.** Arrange the steps involved in Media Planning and Designing Production Process in correct sequence:

- (A) Media Buying
- (B) Designing strategies for selection of suitable media, channel
- (C) Media Audience
- (D) Media designing, development of communication model and material
- (E) Writing Media Schedule or Blue Print

Choose the correct answer from the options given below:

- (A) (A), (B), (C), (D), (E)
- (B) (D), (C), (E), (B), (A)
- (C) (B), (E), (A), (D), (C)
- (D) (C), (B), (E), (D), (A)

Ans :

(D) (C), (B), (E), (D), (A)

A media plan starts by identifying the (C) Media Audience. Then, (B) strategies are designed for selecting media. This leads to (E) writing a detailed Media Schedule (blueprint). Following the plan, (D) communication materials are designed and developed. The final step is the implementation, which is (A) Media Buying or placing the ads.

38. Which “Philosopher” practised seven principles including Tell the truth’, Manage for tomorrow’ of Public Relations management?

(A) Jean Piaget
(B) Lev Vygotsky
(C) Arthur W. Page
(D) Sigmund Freud

Ans :

(C) Arthur W. Page

Arthur W. Page was a pioneering figure in corporate public relations. He established a set of principles, known as the Page Principles, that are fundamental to modern PR. These include “Tell the truth,” “Prove it with action,” and “Manage for tomorrow.” The other individuals listed are prominent psychologists, not PR philosophers.

39. Match List-I with List-II

List-I (SDG Number)			List-II (Name of SDG)
(A)	SDG 3	(I)	Reduce inequality within as well as among countries
(B)	SDG 5	(II)	Ensure sustainable consumption and production patterns
(C)	SDG 10	(III)	Ensure healthy lives and promote well-being for all at all ages
(D)	SDG 12	(IV)	Achieve gender equality and empower all women and girls

Choose the correct answer from the options given below:

(A) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)
(B) (A)-(I), (B)-(III), (C)-(II), (D)-(IV)
(C) (A)-(III), (B)-(IV), (C)-(II), (D)-(I)
(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

Ans :

(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

The correct matching for the Sustainable Development Goals (SDGs) is: SDG 3 (A) is “Good Health and Well-being” (III). SDG 5 (B) is “Gender Equality” (IV). SDG 10 (C) is “Reduced Inequalities” (I). SDG 12 (D) is “Responsible Consumption and Production” (II). This aligns with the globally adopted 2030 Agenda for Sustainable Development.

40. Tucks in a yoke and knife pleats in a skirt create which of the following form of rhythm effect in a dress?

(A) Repetition
(B) Cordation
(C) Parallelism
(D) Radiation

Ans :

(A) Repetition

Rhythm in design is created by the movement of the viewer’s eye across a design, often through the recurrence of elements. Tucks and pleats are examples of lines and shapes that are repeated at regular intervals. This use of a repeated element is the design principle of rhythm through repetition, creating a sense of order.

Direction : Read the following passage and answer the questions that follows: Question Number (41 to 45)

The government is making considerable efforts to solve the nutritional problems. POSHAN Abhiyaan was launched in Jhunjhunu, Rajasthan in March 2018. Its large component involves gradual scaling-up of interventions to all districts in the country by 2022. It targets stunting, under-nutrition, anaemia (among young children, women and adolescent girls) and low birth rate. The Ministry of Women and Child Development (MWCD) is implementing POSHAN Abhiyaan in 315 districts in the first year, 235 districts in the second year and remaining districts will be covered in the third year. Through robust multi-ministerial convergence mechanism and other components POSHAN Abhiyaan strives to create the synergy.

41. The POSHAN Abhiyan is being implemented by which Ministry?

(A) Ministry of AYUSH
(B) Ministry of Women and Child Development (MWCD)
(C) Ministry of Health and Family Welfare (MoHFW)
(D) Ministry of Food Processing Industries

Ans :

(B) Ministry of Women and Child Development (MWCD)

The passage explicitly states that “The Ministry of Women and Child Development (MWCD) is implementing POSHAN Abhiyaan.” This ministry is the nodal agency for the program, coordinating with other ministries to achieve the nutritional goals set out under the Abhiyaan, which targets mothers, children, and adolescent girls.

42. Integrated Child Development Services covers vulnerable children in the age group of _____ years?

(A) 0-6
(B) 3-6
(C) 0-3
(D) 2-7

Ans :

(A) 0-6

Although not stated in the passage, this question requires general knowledge about related government schemes. The Integrated Child Development Services (ICDS) is a flagship program that provides food, preschool education, primary healthcare, immunization, and health check-ups to children under 6 years of age (0-6) and their mothers.

43. What is the full-form of POSHAN?

(A) PM’s Overarching Service for Holistic Nutrition
(B) PM’s Overarching Scheme for Holistic Nourishment
(C) PM’s Old Scheme for Healthy Nutrition
(D) PM’s Overarching Scheme for Holistic Nutrition

Ans :

(D) PM’s Overarching Scheme for Holistic Nutrition

This question requires external knowledge not available in the provided text. The acronym POSHAN, for the Government of India’s flagship program, stands for “PM’s Overarching Scheme for Holistic Nutrition.” It reflects the program’s comprehensive approach to improving nutritional outcomes for children, pregnant women, and lactating mothers across India.

44. Which of the following is NOT a direct short term intervention under the POSHAN Abhiyan?

(A) Fortification of essential foods (salt fortified with iodine)
(B) Production and popularisation of low cost nutritious foods from indigenous and locally available raw material
(C) Ensuring food security i.e., improving availability of food
(D) Control of micronutrient deficiencies among vulnerable groups

Ans :

(C) Ensuring food security i.e., improving availability of food

While POSHAN Abhiyaan works within the food security framework, its direct interventions are focused on specific nutritional actions. Fortification, popularizing nutritious foods, and controlling micronutrient deficiencies are direct, short-term health interventions. Ensuring overall food security is a broader, long-term policy goal involving agriculture and public distribution, not a direct intervention of the program.

45. The POSHAN Abhiyaan was first launched in which state?

(A) Gujarat
(B) Rajasthan
(C) Haryana
(D) Punjab

Ans :

(B) Rajasthan

The first sentence of the passage provides the answer directly. It states, “POSHAN Abhiyaan was launched in Jhunjhunu, Rajasthan in March 2018.” This launch marked the beginning of the national nutrition mission, setting the stage for its phased implementation across the country to combat malnutrition.

Direction : Read the following passage and answer the questions that follows: Question Number (46 to 50)

In the counselling process, the professional counsellor may use different techniques. In directive or counsellor-centred counselling, the counsellor plays a major role and does all that is possible to get the counsellee to make decisions in keeping with the diagnosis of the problem. In non-directive or permissive or client-centred counselling, the counsellor’s role is comparatively passive. The counsellee takes an active part in the process of therapy. The person seeking help is encouraged to gain insight into the problem with the help of the counsellor. The counsellee takes the

final decisions. Thus, this counselling process turns out to be a growth experience for the person. In eclectic counselling, counsellors who advocate using this type of counselling are of the view that directed or non-directed counselling are two ends of continuum. And counsellors should incorporate suitable techniques from both the types of counselling mentioned above as and when required, depending on the situation, the problem and the temperament of the client.

46. In which type of professional counselling, counsellors plays the major role?
- (A) Eclectic counselling
 - (B) Directive counselling
 - (C) Permissive counselling
 - (D) Non-directive counselling

Ans :

(B) Directive counselling

The passage clearly states, "In directive or counsellor-centred counselling, the counsellor plays a major role." In this approach, the counsellor actively diagnoses the problem and guides the client towards a solution, taking a more authoritative stance compared to other forms of counselling where the client leads the process.

47. In which type of counselling technique, the counsellee takes the final decision?
- (A) Permissive counselling
 - (B) Informal counselling
 - (C) Directive counselling
 - (D) Eclectic counselling

Ans :

(A) Permissive counselling

The passage identifies "permissive" counselling as another name for non-directive or client-centered counselling. It explicitly mentions that in this type of counselling, "The counsellee takes the final decisions." This approach empowers the client to find their own solutions with the counsellor acting as a facilitator rather than a director.

48. In _____ type of counselling, the person seeking help is encouraged to gain insight into the problem. Fill in the blank with the appropriate option.
- (A) Non-specialist
 - (B) Eclectic
 - (C) Non-directive
 - (D) Counsellor-centred

Ans :

(C) Non-directive

According to the passage, in non-directive counselling, "The person seeking help is encouraged to gain insight into the problem with the help of the counsellor." This technique focuses on self-exploration and understanding by the client, with the counsellor providing a supportive environment rather than offering direct advice or solutions.

49. Which type of counselling recommends the use of different counselling methods based on the situation, the problem and the temperament of the client?

- (A) Counsellor-centred counselling
- (B) Client-centred counselling
- (C) Eclectic counselling
- (D) Informal counselling

Ans :

(C) Eclectic counselling

The passage defines eclectic counselling as an approach where "counsellors should incorporate suitable techniques from both the types... as and when required, depending on the situation, the problem and the temperament of the client." This flexible method allows the counsellor to tailor their approach rather than adhering strictly to one model.

50. In which technique of counselling, the counsellors are of the view that directed or non-directed counseling are two ends of continuum?

- (A) Permissive counselling
- (B) Non-directive counselling
- (C) Directive counselling
- (D) Eclectic counselling

Ans :

(D) Eclectic counselling

The passage directly addresses this in its description of eclectic counselling. It states that counsellors who use this approach "are of the view that directed or non-directed counselling are two ends of continuum." This viewpoint is the foundation of the eclectic approach, which blends techniques from both ends of this spectrum.

EXAMINATION PAPER 2024

1. Identify the type of processed foods prepared by mixing and processing of individual ingredients resulting in relatively shelf stable food products.
- (A) Formulated foods
(B) Food derivatives
(C) Functional foods
(D) Medical foods

Ans :

(A) Formulated foods

Formulated foods are products created by combining and processing multiple ingredients according to a specific recipe or formula. Examples include bread, biscuits, and sauces. This process results in shelf-stable items distinct from their raw components. The other options refer to extracted components, foods with added health benefits, or foods for medical use.

2. Which among the following are physical hazards present in foods?
- (A) Stones
(B) Pesticide residues
(C) Match sticks
(D) Stems and seeds
(E) Veterinary residues
- Choose the correct answer from the options given below:
- (A) (A), (C), (D) only
(B) (B), (D), (E) only
(C) (A), (B), (E) only
(D) (A), (B), (D) only

Ans :

(A) (A), (C), (D) only

Physical hazards are foreign objects in food that can cause illness or injury. Stones, match sticks, and stems are all examples of such objects. In contrast, pesticide residues and veterinary residues are classified as chemical hazards, which are harmful substances rather than physical objects.

3. Mr. X sells gol gappas/pani puri and bhel puri in an urban slum of Delhi. Identify the type of food service system.
- (A) Conventional food service system
(B) Assembly-service system

- (C) Ready-prepared food service system
(D) Commissary food service system

Ans :

(A) Conventional food service system

The conventional food service system involves preparing food in a kitchen on the premises and serving it directly to customers, which is exactly what a street food vendor does. Other systems involve pre-prepared components (assembly-service), cook-chill methods (ready-prepared), or a central kitchen supplying satellite units (commissary).

4. Match List-I with List-II:

	List-I (Nutrition Programmes)	List-II (Type/aim of Nutrition Programmes)
(A)	Saksham Anganwadi (ICDS)	(I) Nutrient Deficiency Control Programme
(B)	PMPOSHAN (Mid Day Meal Programme)	(II) Food Security Programme
(C)	Antodaya Anna Yojana	(III) Outreach programme for ECC
(D)	NIDDCP	(IV) Food Supplementation Programme

Choose the correct answer from the options given below:

- (A) (A)-(I), (B) - (II), (C) - (III), (D) - (IV)
(B) (A)- (I), (B) - (III), (C) - (II), (D) - (IV)
(C) (A)-(I), (B) - (II), (C) - (IV), (D) - (III)
(D) (A)- (III), (B) - (IV), (C) - (II), (D) - (I)

Ans :

(D) (A)- (III), (B) - (IV), (C) - (II), (D) - (I)

- Saksham Anganwadi (ICDS) is an outreach program for Early Childhood Care (ECC).
- PMPOSHAN (Mid Day Meal) is a food supplementation program for schoolchildren.
- Antodaya Anna Yojana is a food security program providing subsidized grains.

- NIDDCP (National Iodine Deficiency Disorders Control Programme) is a nutrient deficiency control program.

5. Which among the following is NOT the personal skill required to pursue career in the food service industry?

- (A) An interest in food and regular update of trends in national and international cuisines
- (B) Good communication and interaction skill
- (C) Ability to forecast fashion trends
- (D) Pleasant, cheerful and energetic personality

Ans :

(C) Ability to forecast fashion trends
The ability to forecast fashion trends is relevant to the apparel and design industry, not the food service industry. All other skills listed, such as an interest in food, strong communication abilities, and a pleasant personality, are crucial for success in hospitality and food service roles.

6. Question 6. _____ is the set of methods and techniques used to transform raw ingredients into finished and semi-finished food products.

- (A) Food Science
- (B) Food Processing
- (C) Food Technology
- (D) Food Manufacturing

Ans :

(B) Food Processing
Food processing is the term that encompasses the entire set of methods and techniques used to convert raw materials into food for consumption. While food technology and manufacturing are related, “processing” is the broad term for this transformation, covering everything from simple washing to complex formulation.

7. Which of the following statement is incorrect in the context of HACCP ?

- (A) Enables to detect hazards at any stage of processing or manufacture
- (B) Enables producers, processors, distributors and exporters to utilise resources efficiently and in a cost effective manner for assuring food safety
- (C) Promote the development of standardisation and related activities in the world with a view to facilitate the international exchange of goods and services
- (D) Assures consistently good quality products

Ans :

(C) Promote the development of standardisation and related activities in the world with a view to facilitate the international exchange of goods and services

HACCP (Hazard Analysis and Critical Control Points) is a systematic preventive approach to food safety. The statement about promoting international standardization describes the goal of organizations like ISO (International Organization for Standardization) or the Codex Alimentarius Commission, not the direct function of a HACCP system itself.

8. Children whose families are not traceable, or are unfit/dead or simply unwilling to take the child back stay in

- (A) Observation homes
- (B) Special homes
- (C) Adoption homes
- (D) Juvenile homes

Ans :

(C) Adoption homes
Children in such situations are deemed in need of care and protection, and the goal is to provide them with a permanent family environment. They are often placed in adoption homes or Child Care Institutions from where they can be legally adopted. Observation and special homes are primarily for children in conflict with the law.

9. In India, the first SOS village was set up in which year?

- (A) 1964
- (B) 1962
- (C) 1961
- (D) 1963

Ans :

(A) 1964
The first SOS Children’s Village in India was established in 1964 at Greenfields in Faridabad. This initiative introduced a family-like care model for orphan and abandoned children, providing them with a stable home, a mother figure, and a supportive community environment to grow up in.

Th.

10. Match List-I with List-II:

List-I (Name of the Programme/Scheme/Initiative)		List-II (Objective)	
(A)	The National Service Volunteer Scheme	(I)	Provide a family approach to the long term care of orphaned and abandoned children
(B)	NSS	(II)	Provide day-care, educational and entertainment opportunities, healthcare, companionship
(C)	Multi-Service Centres for Older Persons	(III)	Provides opportunities to students (who have completed their first degree) to involve themselves, on a whole-time basis for a short period of one or two years, in programmes of national development
(D)	SOS Children's Villages	(IV)	Aims at involving college level students in programmes of social service and national development

Choose the correct answer from the options given below:

- (A) (A)- (IV), (B) - (II), (C) - (III), (D) - (I)
 (B) (A)- (III), (B) - (IV), (C) - (II), (D) - (I)
 (C) (A)-(II), (B) - (I), (C) - (III), (D) - (IV)
 (D) (A)- (III), (B) - (I), (C) - (II), (D) - (IV)

Ans :

- (B) (A)- (III), (B) - (IV), (C) - (II), (D) - (I)
- The National Service Volunteer Scheme (A) engages graduates in full-time national development for a short period (III).
 - NSS (B) involves college students in social service programs (IV).
 - Multi-Service Centres for Older Persons (C) provide various support services like day-care and healthcare (II).
 - SOS Children's Villages (D) offers a family-based care model for orphaned children (I).

- 11.** Which of the following programme in India provides medical care to the older persons living in isolated and backward areas ?
 (A) Respite Care Homes
 (B) Continuous Care Homes
 (C) Multi-service centres for Older Persons
 (D) Mobile Medicare Units

Ans :

(D) Mobile Medicare Units
 Mobile Medicare Units are specifically designed to deliver healthcare services to the doorsteps of older persons, especially those in remote, rural, and underserved areas who have difficulty accessing stationary medical facilities. These units provide consultations, medicines, and basic diagnostics free of charge.

- 12.** Name the type of disability that affect communication, social interaction and play behaviour.
 (A) Visual Impairment
 (B) Cerebral Palsy
 (C) Locomotor disability
 (D) Autism

Ans :

(D) Autism
 Autism Spectrum Disorder (ASD) is a neurodevelopmental condition characterized by significant challenges in social communication, social interaction, and the presence of restricted or repetitive patterns of behavior, interests, or activities. These core features directly impact a child's ability to communicate, interact with others, and engage in typical play.

- 13.** Which of the following term refers to the density of knitted fabric measured by weight of the given fabric?
 (A) Ends per Inch (EPI)
 (B) Picks per Inch (PPI)
 (C) Grams per Square Metre (GSM)
 (D) Thread Count

Ans :

(C) Grams per Square Metre (GSM)
 GSM (Grams per Square Metre) is the standard unit for measuring the weight of a fabric, which directly relates to its density, thickness, and quality. While EPI, PPI, and thread count measure the density of woven fabrics by counting yarns, GSM is the primary metric for knitted fabrics.

14. Arrange the stages of fashion cycle in correct order:
- Increase in popularity
 - Introduction of a style
 - Peak of popularity
 - Decline in popularity
 - Obsolescence

Choose the correct answer from the options given below:

- (B), (C), (D), (A), (E)
- (B), (A), (C), (D), (E)
- (B), (D), (C), (E), (A)
- (B), (A), (D), (E), (C)

Ans :

- (B), (A), (C), (D), (E)

The fashion cycle follows a predictable bell curve:

- Introduction of a style (B): A new design is introduced.
- Increase in popularity (A): The style is adopted by fashion leaders and gains visibility.
- Peak of popularity (C): The style is widely accepted and mass-produced.
- Decline in popularity (D): The market becomes saturated, and consumers look for new styles.
- Obsolescence (E): The style is rejected and no longer sold.

15. Identify the given standardisation mark.

- ISI
- FPO
- Hallmark
- AGMARK

Ans :

- ISI

The logo shown is that of the Bureau of Indian Standards (BIS). The ISI (Indian Standards Institution) mark, which is administered by BIS, is a certification mark for industrial products in India. It ensures that a product conforms to the Indian standards, guaranteeing safety and quality to the consumer.

16. Which of the following is NOT a consumer responsibility?

- Consumer should read all the information given on the brochure/label
- Consumer should be honest in all their dealings and must pay for all their purchases
- Consumer should keep receipts and relevant documents of purchase
- Consumer should avoid buying products with standardisation marks

Ans :

- Consumer should avoid buying products with standardisation marks

A key responsibility of an aware consumer is to look for and prefer products with standardization marks like ISI or AGMARK, as they indicate quality and safety. Therefore, avoiding such products is the opposite of responsible consumer behavior. All other options are essential consumer responsibilities.

17. Match List-I with List-II:

	List-I (Fabric Defects)		List-II (Source of Faults)
(A)	Slub	(I)	Finishing fault
(B)	Misreed	(II)	Dyeing fault
(C)	Shaded	(III)	Yarn fault
(D)	Baggy	(IV)	Weaving fault

Choose the correct answer from the options given below:

- (A)- (II), (B) - (I), (C) - (III), (D) - (IV)
- (A) - (I), (B) - (IV), (C) - (II), (D) - (III)
- (A)- (III), (B) - (IV), (C) - (II), (D) - (I)
- (A)- (IV), (B) - (II), (C) - (III), (D) - (I)

Ans :

- (A)- (III), (B) - (IV), (C) - (II), (D) - (I)

- A Slub (A) is a thick, uneven section in a yarn, making it a yarn fault (III).
- A Misreed (B) is an error where warp threads are incorrectly placed in the loom's reed, making it a weaving fault (IV).
- Shaded (C) fabric has inconsistent color, which is a dyeing fault (II).
- Baggy (D) or slack fabric can result from improper tension during processing, making it a finishing fault (I).

18. Ms. X is fond of wearing hot pants, baggy pants and unmatched buttons. Which among the following concept she has been following?

- (A) Classic
- (B) Style
- (C) Fads
- (D) Fashion

Ans :

(C) Fads

Fads are styles that become intensely popular for a very brief period and then quickly disappear. The specific and somewhat unusual items mentioned, like hot pants and baggy pants, often fall into this category. Unlike fashion, which has a longer cycle, or classics, which are timeless, fads are short-lived trends.

- 19.** Preeti is wearing a red dress with green flowers on it. Which colour scheme is represented in her dress?
- (A) Analogous colour scheme
 - (B) Complementary colour scheme
 - (C) Monochromatic colour scheme
 - (D) Spilt complementary colour scheme

Ans :

(B) Complementary colour scheme

Red and green are located directly opposite each other on the color wheel. A color scheme that uses two opposite colors is known as a complementary color scheme. This combination creates strong visual contrast and is often vibrant and eye-catching.

- 20.** Arrange the specific methods and procedures of special education in correct order of their implementation.
- (A) Undertaking regular evaluation of the Individualised Education Programme
 - (B) Facilitating all along, access and use of support services
 - (C) Developing Individualised Education Programme for each student
 - (D) Assessing the child's/student's level in different areas of development

Choose the correct answer from the options given below:

- (A) (A), (C), (B), (D)
- (B) (D), (C), (A), (B)
- (C) (C), (D), (A), (B)
- (D) (B), (C), (A), (D)

Ans :

(B) (D), (C), (A), (B)

The process for special education follows a logical cycle:

- Assessing the child's level (D): The process begins with a thorough evaluation of the student's needs.
- Developing an IEP (C): Based on the assessment, a tailored Individualised Education Programme is created.
- Regular evaluation of the IEP (A): The plan's effectiveness is continuously monitored.
- Facilitating support services (B): Throughout the entire process, necessary support is provided.

- 21.** Which stage of Guest Cycle is focused on 'Guest Satisfaction and Customer Loyalty'?

- (A) Pre-arrival stage
- (B) Arrival stage
- (C) Occupancy
- (D) Departure

Ans :

(C) Occupancy

The occupancy stage is when the guest experiences the hotel's services and facilities firsthand. It is during this period that their satisfaction is truly shaped. Excellent service and a comfortable stay during occupancy are critical for building guest satisfaction, which in turn fosters customer loyalty and encourages repeat visits.

- 22.** Which among the following are NOT the strengths of radio?
- (A) Audience selectivity
 - (B) Directional signage
 - (C) Frequency builder
 - (D) Low cost product
 - (E) Low reach

Choose the correct answer from the options given below:

- (A) (B) and (E) only
- (B) (A) and (B) only
- (C) (C) and (D) only
- (D) (C) and (E) only

Ans :

(A) (B) and (E) only

Radio's strengths include its ability to target specific audiences, build frequency of message exposure, and its relatively low cost. Directional signage is a form of outdoor advertising, completely unrelated to radio. Furthermore, radio typically has a very wide reach, so low reach is a weakness, not a strength.

- 23.** Which of the following are examples of welfare catering?
 (A) Mid day meals in schools
 (B) Creches
 (C) Chain catering organisations
 (D) Dharmashalas
 (E) Wine bars

Choose the correct answer from the options given below:

- (A) (A), (B) and (C) only
 (B) (B), (C) and (D) only
 (C) (A), (C) and (E) only
 (D) (A), (B) and (D) only

Ans :

- (D) (A), (B) and (D) only

Welfare catering provides food as a social service, often subsidized or free, rather than for profit. Mid-day meals in schools, food provided at crèches for children, and meals at dharmashalas for pilgrims are prime examples. Chain catering organizations and wine bars are commercial, profit-oriented businesses.

- 24.** Match List-I with List-II:

	List-I (Type of media)		List-II (Example)
(A)	Print	(I)	Television
(B)	Interactive	(II)	Magazine
(C)	Out of home	(III)	Internet
(D)	Broadcast	(IV)	Poster

Choose the correct answer from the options given below:

- (A) (A)-(I), (B) - (III), (C) - (IV), (D) - (II)
 (B) (A)-(I), () - (II), () - (III), (D) - (IV)
 (C) (A)- (II), (B) - (III), (C) - (IV), (D) - (I)
 (D) (A)-(II), (B) - (IV), (C) - (III), (D) - (I)

Ans :

- (C) (A)- (II), (B) - (III), (C) - (IV), (D) - (I)

- Print media (A) includes physical publications like a magazine (II).
- Interactive media (B) allows user participation, with the Internet (III) being a prime example.
- Out of home media (C) reaches consumers when they are outside their homes, such as with a poster (IV).
- Broadcast media (D) transmits content to a mass audience, like television (I).

- 25.** As a function of Human Resource Management, the systematic development of attitudes, knowledge, skills required by a person to perform a given task or job adequately is termed as

- (A) Training
 (B) Development
 (C) Appraisal
 (D) Retention

Ans :

- (A) Training

Training is the specific process of imparting the necessary skills, knowledge, and attitudes to employees to help them perform their current jobs effectively. While development is a broader, long-term process for career growth, training is targeted at improving performance in a specific, present role.

- 26.** Who among the following is head of the kitchen, and is responsible for planning, organising and controlling the kitchen operations?

- (A) Kitchen stewarding
 (B) Chef-de-cuisine
 (C) Restaurant manager
 (D) Chef-de-parties

Ans :

- (B) Chef-de-cuisine

The Chef-de-cuisine, also known as the Executive Chef, is the top manager of the kitchen. This role involves complete oversight of all kitchen activities, including menu creation, staff management, inventory control, and ensuring food quality. The Restaurant Manager handles the front-of-house, while other roles are subordinate.

- 27.** Which of the following personnel in the front office is responsible for determining shifts of the employees, meeting and greeting all arrivals ensuring accurate and speedy rooming procedure as well as checking occupancy?

- (A) Front Office Supervisor
 (B) Assistant Manager- Front Office
 (C) Lobby Manager
 (D) Receptionist

Ans :

- (B) Assistant Manager- Front Office

The Assistant Manager - Front Office holds a senior supervisory position responsible for the smooth overall functioning of the front desk. Their duties include managing staff schedules (shifts), overseeing guest arrivals to ensure a positive

experience, and monitoring room occupancy levels to maximize revenue.

- 28.** Identify the major functions of Human Resource/ Talent Management

- (A) Gain knowledge about the goals of the company
- (B) Recruiting and staffing
- (C) Managing back office departments
- (D) Training and developing employees
- (E) Retention and Redressal

Choose the correct answer from the options given below:

- (A) (B), (D), (E) only
- (B) (B), (C), (D) only
- (C) (A), (D), (E) only
- (D) (A), (C), (D) only

Ans :

- (A) (B), (D), (E) only

The core functions of Human Resource Management revolve around the employee lifecycle. This includes recruiting and staffing to bring people into the organization, training and developing them to enhance their skills, and focusing on retention (keeping valuable employees) and redressal (addressing grievances).

- 29.** Arrange the following housekeeping department personnel in top to bottom hierarchical order, below the level of executive housekeeper.

- (A) Assistant Housekeeper
- (B) Housemen
- (C) Public Area Supervisor
- (D) Head Housemen

Choose the correct answer from the options given below:

- (A) (A), (C), (D), (B)
- (B) (A), (C), (B), (D)
- (C) (C), (A), (B), (D)
- (D) (C), (A), (D), (B)

Ans :

- (A) (A), (C), (D), (B)

The hierarchy in a typical housekeeping department, directly under the Executive Housekeeper, is as follows:

- Assistant Housekeeper (A): The second-in-command.
- Public Area Supervisor (C): Manages specific areas.
- Head Housemen (D): Leads a team of housemen.

- Housemen (B): The operational staff performing cleaning duties.

- 30.** Match List-I with List-II:

List-I (Types of Hospitality Establishment)			List-II (Services)
(A)	Hotel	(I)	Offers range of amenities, sports facilities and leisure activities
(B)	Lodge	(II)	Hospitality to people undertaking adventure sports etc.
(C)	Resort	(III)	Offers lodging, meals
(D)	Furnished camps	(IV)	Offers rented accommodation especially for sleeping but may not offer food

Choose the correct answer from the options given below:

- (A) (A)- (III), (B) - (IV), (C) - (I), (D) - (II)
- (B) (A)-(I), (B) - (II), (C) - (III), (D) - (IV)
- (C) (A)- (II), (B) - (III), (C) - (IV), (D) - (I)
- (D) (A)-(IV), (B) - (I), (C) - (II), (D) - (III)

Ans :

- (A) (A)- (III), (B) - (IV), (C) - (I), (D) - (II)

- A Hotel (A) typically offers both lodging and meals (III).
- A Lodge (B) primarily offers accommodation for sleeping and may not include food services (IV).
- A Resort (C) is a destination property offering a wide array of amenities and leisure activities (I).
- Furnished camps (D) cater to specific travelers like those engaged in adventure sports (II).

- 31.** Which of the following is NOT an example of a consumer problem regarding inadequate or erroneous information given by the manufacturer?

- (A) Labels not factually correct, deceptive and misleading
- (B) Non-informative advertisements
- (C) Incorrect weights and measures
- (D) Lack of buying guides to aid the consumer in decision-making

Ans :

- (C) Incorrect weights and measures

Using incorrect weights and measures is a form of fraud or unfair trade practice, not an issue of providing faulty information. The other options—misleading labels, non-informative ads, and lack of buying guides—all relate directly to the quality and availability of information provided to the consumer by the manufacturer.

- 32.** Arrange the steps of nutritional care during illness in correct sequence:

- (A) Assessing nutritional status
- (B) Diagnosis of nutritional problems
- (C) Planning and prioritising nutrition intervention(s) to meet nutritional needs
- (D) Monitoring and evaluating nutritional care outcomes and making changes, if necessary

Choose the correct answer from the options given below:

- (A) (A), (B), (C), (D)
- (B) (B), (C), (A), (D)
- (C) (D), (B), (C), (A)
- (D) (A), (D), (C), (B)

Ans :

- (A) (A), (B), (C), (D)

The Nutrition Care Process is a systematic method used by dietetics professionals. The correct sequence is:

- Assessing nutritional status (A): Collecting and interpreting relevant data.
- Diagnosis of nutritional problems (B): Identifying and labeling the specific problem.
- Planning nutrition intervention (C): Formulating a plan to address the diagnosis.
- Monitoring and evaluating (D): Reviewing outcomes and adjusting the plan as needed.

- 33.** Match List-I with List-II:

	List-I (Consumer Organisation)		List-II (Publication)
(A)	Consumer Union	(I)	Consumer Voice
(B)	VOICE	(II)	Insight
(C)	Australian Consumer Association	(III)	Consumer Report
(D)	CERC	(IV)	Choice

Choose the correct answer from the options given below:

- (A) (A)-(I), (B) - (II), (C) - (III), (D) - (IV)
- (B) (A)- (III), (B) - (I), (C) - (IV), (D) - (II)

- (C) (A)-(I), (B) - (II), (C) - (IV), (D) - (III)
- (D) (A)-(III), (B) - (IV), (C) - (I), (D) - (II)

Ans :

- (B) (A)- (III), (B) - (I), (C) - (IV), (D) - (II)

- The Consumer Union in the USA publishes the well-known magazine "Consumer Reports" (III).
- VOICE (Voluntary Organisation in Interest of Consumer Education) in India publishes "Consumer Voice" (I).
- The Australian Consumer Association publishes the magazine "Choice" (IV).
- CERC (Consumer Education and Research Centre) in India publishes "Insight" (II).

- 34.** Match List-I with List-II:

	List-I (Medium of Communication)		List-II (Development Communication Initiatives)
(A)	Educational Satellite	(I)	Project Village Chhatera
(B)	Television	(II)	Sustainable Access in Rural India
(C)	ICTs	(III)	Kyunki Jeena isi Ka Nam Hai
(D)	Print Media	(IV)	EDUSAT

Choose the correct answer from the options given below:

- (A) (A)- (III), () - (I), (C) - (IV), (D) - (II)
- (B) (A)-(I), (B) - (III), (C) - (II), (D) - (IV)
- (C) (A)- (IV), (B) - (III), (C) - (II), (D) - (I)
- (D) (A)- (III), (B) - (IV), (C) - (I), (D) - (II)

Ans :

- (C) (A)- (IV), (B) - (III), (C) - (II), (D) - (I)

- EDUSAT (IV) was India's dedicated educational satellite (A).
- "Kyunki Jeena isi Ka Nam Hai" (III) was a famous entertainment-education television (B) series.
- The SARI (Sustainable Access in Rural India) project (II) was a notable ICT (Information and Communication Technologies) initiative (C).
- Project Village Chhatera (I) was a famous series of columns in a newspaper, making it a print media (D) initiative.

- 35.** A brief 10–60 second message between programmes, generally in the form of jingles is called as
- (A) Public Social Advertisement
 - (B) Public Social Announcement
 - (C) Public Service Announcement
 - (D) Participatory Service Announcement

Ans :

(C) Public Service Announcement

A Public Service Announcement (PSA) is a short message broadcast on radio or television, without charge, to raise awareness about a social issue or promote a public good. They are typically brief, memorable (often using jingles), and placed between regular programming.

- 36.** _____ uses a combination of different communication methods and materials about a theme for a predefined period of time.
- (A) Radio programme
 - (B) Newsletter
 - (C) Networking
 - (D) Campaign

Ans :

(D) Campaign

A campaign is a planned and coordinated set of communication efforts designed to achieve a specific objective. It is characterized by its focus on a single theme, use of multiple media channels (like ads, events, social media), and operation within a defined timeframe.

- 37.** Which newspaper started a regular fortnightly column describing the lives of the people of a small village Chhatera in Northwest Delhi under the Project Village Chhatera?
- (A) The Times of India
 - (B) The Indian Express
 - (C) The Hindustan Times
 - (D) The Hindu

Ans :

(C) The Hindustan Times

Project Village Chhatera was a pioneering development journalism initiative launched by The Hindustan Times. The project involved reporters regularly visiting the village of Chhatera to document the lives, challenges, and changes experienced by its residents, bringing rural issues to a mainstream urban audience.

- 38.** Who among the following comprehended and explained that young children have different ways of understanding the world, due to which they need a supportive environment?
- (A) Jean Piaget
 - (B) Lev Vygotsky
 - (C) Sigmund Freud
 - (D) Erik Erikson

Ans :

(A) Jean Piaget

Jean Piaget's theory of cognitive development revolutionized the understanding of child psychology. He demonstrated that children are not just miniature adults but that their thinking processes are qualitatively different. His work highlighted that children actively construct their knowledge through stages, emphasizing the need for supportive, age-appropriate learning environments.

- 39.** Ms. Y purchased a geyser, which got bursted when she switched it on. Which consumer right of her's is violated in this case?
- (A) Right to be informed
 - (B) Right to choose
 - (C) Right to safety
 - (D) Right to be heard

Ans :

(C) Right to safety

The Right to Safety protects consumers against products and services that are hazardous to life and property. A geyser that bursts upon being switched on is an unsafe and dangerous product. This incident is a clear violation of Ms. Y's right to be protected from such harmful goods.

- 40.** Which method of washing is used in front loading machine?
- (A) Agitating
 - (B) Tumbling
 - (C) Pulsation
 - (D) Friction

Ans :

(B) Tumbling

Front-loading washing machines operate with a drum on a horizontal axis. As the drum rotates, it lifts the clothes and then drops them back into the wash water. This action is called tumbling. It is an effective and gentle way to clean clothes while using less water than top-loading machines.

Direction : Read the following passage carefully and answer question based on passage: Question Number (41 to 45)

There are two types of institutions which have in-house laundry and maintenance setups i.e. within their organisation. These are hotels and hospitals. Both have a large quantum of bed linen and other room furnishing requirements as also staff uniforms and accessories such as aprons, caps, head dresses and masks. The hospital laundry takes care of hygiene, cleanliness and disinfection. However, a number of hospitals have started using disposables where there is a threat of infection, which are then destroyed by burning. In the hospitality sector, ie. for hotel and restaurants, aesthetics and final finish of the articles are most important. As compared to hospitals, the articles here may be of different fibre contents. Final finishing of laundered goods, ie. starching, ironing pressing and correct and perfect folding, are emphasised. They also have to take care of guests' personal laundry when required. The smaller hotels may have link ups with commercial laundries from outside.

41. Which fabric is used for hospital clothing?

- (A) Synthetic
- (B) Silk
- (C) Cotton
- (D) Rayon

Ans :

(C) Cotton

While the passage doesn't explicitly name the fabric, general knowledge dictates that cotton is the most widely used fabric for hospital linen and clothing. This is because cotton is durable, highly absorbent, comfortable, and most importantly, can withstand the high temperatures required for proper washing and disinfection.

42. Which sector lays stress on aesthetics and finishes of the articles?

- (A) Hospital
- (B) Hostel
- (C) Hotel
- (D) Prison

Ans :

(C) Hotel

The passage clearly states, "In the hospitality sector, ie. for hotel and restaurants, aesthetics and final finish of the articles are most important." This contrasts with hospitals, where the primary focus is on hygiene and disinfection rather than appearance.

43. How many types of institutions have in-house laundry and maintenance set-ups?

- (A) Four
- (B) Two
- (C) Three
- (D) Five

Ans :

(B) Two

The answer is given in the first two sentences of the passage: "There are two types of institutions which have in-house laundry and maintenance setups... These are hotels and hospitals." The text explicitly identifies these two as the primary examples.

44. Which of the following methods can be applied for disinfecting laundry in hospitals?

- (A) Use of disposables
- (B) Using anti-bacterial finishes on garments
- (C) Use of reusable garments washed in cold water
- (D) Use of disinfectants and high temperature washing

Choose the correct answer from the options given below:

- (A) (A), (B) and (D) only
- (B) (A), (B) and (C) only
- (C) (B), (C) and (D) only
- (D) (A), (C) and (D) only

Ans :

(D)

The passage states that hospitals prioritize disinfection and that many have started using disposables (A). Common knowledge of hospital procedures confirms the use of disinfectants and high-temperature washing (D). Antibacterial finishes (B) are also a modern method for infection control in textiles. Washing in cold water (C) would be ineffective for disinfection.

45. Which of the following statement is NOT correct with regard to in-house laundry set-ups?

- (A) They exist within the organisation
- (B) They are responsible for washing organisational laundry only
- (C) They also provide final finishing to laundered garments
- (D) They have link ups with commercial laundries

Ans :

(B) They are responsible for washing organisational laundry only

The passage explicitly contradicts this statement by mentioning that hotel laundries “also have to take care of guests’ personal laundry when required.” This shows that their responsibility extends beyond just the organization’s own linen and uniforms. Therefore, the claim that they handle only organizational laundry is incorrect.

Direction : Read the passage carefully and answer question used on the passage: Question Number (46 to 50)

RRE was a nationwide communication campaign for generating awareness about HIV/AIDS. The aim of the campaign was to spread information regarding primary prevention services, develop an understanding of the disease, reduce stigma and discrimination against people with AIDS and enhance people’s knowledge about the preventive measures, health habits and lifestyle. A specially designed train traversed over 9000 km a year covering 180 districts/halt stations, and held programmes and activities in 43,200 villages. It comprised of seven coaches, equipped with educational material, interactive touch screens and 3-D models, services in the context of HIV-TB co-infection, an LCD Projector and platform for folk performances, counselling cabins and two doctor’s cabins for providing counselling and treatment. RRE started its journey from Kanyakumari, followed the ‘parikrama’ style and halted at 180 stations and covered almost all the states of India. During the halt at each station, performing artists including orators and performers went to different villages to undertake information communication activities such as street plays, folk songs, stories and group counselling sessions. The project was implemented by National AIDS Control Organisation (NACO), Nehru Yuva Sangathan (NYKS), UNICEF and UNAIDS in co-operation with Indian Railways.

46. What was the focus area of Red Ribbon Express campaign?

- (A) Maternal and child health
- (B) Immunisation
- (C) HIV/AIDS
- (D) Promotion of Literacy

Ans :

(C) HIV/AIDS

The very first sentence of the passage clearly states the purpose of the campaign: “RRE was a nationwide communication campaign for generating awareness about HIV/AIDS.” All the

described activities and objectives in the text are centered around this specific health issue.

47. Which of the following is NOT an objective of Red Ribbon Express initiative?

- (A) To reduce stigma and discrimination against people with AIDS
- (B) To provide an umbrella of health services related to nutrition and care only to youth
- (C) To enhance knowledge of people about preventive measures, health habits and lifestyle
- (D) To spread awareness regarding primary prevention services

Ans :

(B) To provide an umbrella of health services related to nutrition and care only to youth

The passage lists objectives such as reducing stigma, enhancing knowledge, and spreading awareness about HIV/AIDS prevention for the general population. The campaign’s scope was not limited to “only to youth”, nor was its primary focus on nutrition. Therefore, this statement does not align with the described aims.

48. What is the full form of NACO?

- (A) National AIDS Co-operative Organisation
- (B) National Alliance Control Organisation
- (C) National AIDS Co-ordinate Organisation
- (D) National AIDS Control Organisation

Ans :

(D) National AIDS Control Organisation

The last sentence of the passage explicitly provides the full form of the acronym. It states, “The project was implemented by National AIDS Control Organisation (NACO),” identifying it as one of the key partners in the Red Ribbon Express initiative.

49. How many coaches were installed in the Red Ribbon Express?

- (A) 5
- (B) 7
- (C) 8
- (D) 10

Ans :

(B) 7

The passage provides this specific detail in the third paragraph. It says, “It comprised of seven coaches, equipped with educational material, interactive touch screens and 3-D models...” This

indicates the size and capacity of the specially designed train used for the campaign.

50. Which of the following was NOT included as a strategy of RRE campaign?
- (A) Use of educational material on HIV/AIDS; interactive touch screens and 3-D models
 - (B) Counselling services by doctors
 - (C) Use of community radio
 - (D) Use of IEC activities such as folk songs and dances

Ans :

(C) Use of community radio

The passage details numerous strategies used by the RRE campaign, including educational materials, touch screens, 3-D models, counselling by doctors, street plays, and folk songs. However, there is no mention of the use of community radio anywhere in the text as a method for disseminating information.

EXAMINATION PAPER 2023

1. In the context of minimally processed foods, which of the following are manufactured through microbial or chemical synthesis ?

(A) Preserved foods
(B) Manufactured foods
(C) Formulated foods
(D) Synthetic foods

Ans :

(D) Synthetic foods

Synthetic foods are produced through microbial or chemical synthesis to create substances that mimic natural foods or provide specific nutrients. Preserved, manufactured, and formulated foods originate from natural agricultural products and are then processed, not created synthetically from raw chemical precursors.

2. Salmonella can be easily destroyed by

(A) Heating
(B) Cooling
(C) Refrigeration
(D) Deep freezing

Ans :

(A) Heating

Salmonella bacteria are mesophilic, meaning they thrive at moderate temperatures but are effectively destroyed by high heat. Proper cooking and heating processes are standard food safety measures to eliminate this pathogen. Cooling, refrigeration, and freezing are methods of preservation that inhibit bacterial growth but do not reliably kill the bacteria itself.

3. Deficiency of which of the following is referred to as 'hidden hunger'?

(A) Carbohydrate
(B) Fats
(C) Micronutrients
(D) Protein

Ans :

(C) Micronutrients

Hidden hunger, or micronutrient deficiency, occurs when the intake and absorption of essential vitamins and minerals are too low to sustain good health and development. Unlike deficiencies in

macronutrients (carbohydrates, fats, protein), which often cause visible signs like wasting, the effects of hidden hunger can be less apparent but are profoundly damaging.

4. 'Langar' distributed in Gurudwaras is an example of which type of catering service?

(A) Chain
(B) In house
(C) Welfare
(D) Commercial

Ans :

(C) Welfare

Welfare catering provides food as a social service, often free or heavily subsidized, with a focus on community well-being rather than profit. Langar perfectly fits this description as it is a free community meal served in Gurudwaras to all visitors. Commercial catering is profit-driven, while chain catering involves multiple outlets.

5. The full form of CFTRI is:

(A) Care Food Technology Research Institute
(B) Central Fruit Technological Research Institute
(C) Central Food Technological Research Institute
(D) Care Fruit Technological Research Institute

Ans :

(C) Central Food Technological Research Institute
CFTRI stands for Central Food Technological Research Institute. It is a pioneering research and development organization located in Mysuru, India, working under the Council of Scientific and Industrial Research (CSIR). It focuses on research in the area of food science and technology, contributing significantly to the nation's food sector.

6. What does ICDS stands for?

(A) Integrated Child Development Services
(B) Indian Child Development Sector
(C) Integrated Child Development Scheme
(D) International Child Development Services

Ans :

(A) Integrated Child Development Services

ICDS stands for Integrated Child Development Services. It is a comprehensive and multi-sectoral

program launched by the Government of India in 1975. The program aims to provide an integrated package of services for the holistic development of children under six years of age, as well as pregnant and lactating women.

7. Children 'in conflict with law' are also referred to as
- (A) Special children
 - (B) Criminal children
 - (C) Juvenile delinquents
 - (D) Special needs children

Ans :

(C) Juvenile delinquents

The term 'juvenile delinquents' refers to minors, typically under the age of 18, who have engaged in illegal behavior or are 'in conflict with the law'. This legal and social term distinguishes them from adult offenders, acknowledging their developmental stage and focusing on rehabilitation rather than punitive measures alone.

8. Which of the following skill is required in an early childhood professional ?
- (A) An interest in children and their development
 - (B) Cooking skills for preparing packed lunch for children
 - (C) Enthusiasm for social interaction
 - (D) Capacity for understanding individual differences

Ans :

(A) An interest in children and their development
While all the listed skills (except cooking) are valuable, a genuine interest in children and their development is the most fundamental prerequisite for an early childhood professional. This core interest motivates the professional to learn about, understand, and effectively nurture young children, forming the basis for all other professional competencies.

9. As per the NCF (2005) position paper on Early Childhood Education, the basic objectives of ECCE are:
- (A) Providing food services to children
 - (B) Preparation for school
 - (C) Providing support services for children
 - (D) Providing support services for women
 - (E) Holistic development of the child
- Choose the correct answer from the options given below:
- (A) (A), (B), (C), (D) only

(B) (A), (C), (D), (E) only

(C) (A), (B), (D), (E) only

(D) (B), (C), (D), (E) only

Ans :

(D) (B), (C), (D), (E) only

The NCF (2005) outlines a comprehensive vision for Early Childhood Care and Education (ECCE). The core objectives include the holistic development of the child (E), adequately preparing them for formal schooling (B), and providing crucial support services for both the children (C) and women, especially working mothers (D).

10. Name the kind of home for children where juveniles (children under 18 years of age) found guilty in terms of violation of law, are placed in custodial care.
- (A) Observation Homes
 - (B) Special Homes
 - (C) Juvenile Homes
 - (D) Adoption Homes

Ans :

(B) Special Homes

According to the Juvenile Justice (Care and Protection of Children) Act, a 'Special Home' is an institution established for the reception and rehabilitation of juveniles in conflict with the law who have been found to have committed an offence. Observation Homes are for temporary stay during the inquiry process.

11. In the context of quality assurance in the garment industry, what is referred to as the process of implementation and monitoring of quality systems like TQM and ISO ?
- (A) Quality Control
 - (B) Quality Assessment
 - (C) Quality Improvement
 - (D) Quality Specifications

Ans :

(C) Quality Management

Quality Management is the comprehensive process of overseeing all activities and tasks needed to maintain a desired level of excellence. It includes implementation and monitoring of overarching quality systems like Total Quality Management (TQM) and ISO standards. Quality control and assurance are key components within this broader management framework.

- 12.** In the context of fabric defects, tentering marks and chafe occur due to which of the following faults?
- (A) Yarn faults
 - (B) Weaving faults
 - (C) Dyeing faults
 - (D) Finishing faults

Ans :

(D) Finishing faults

Tentering marks and chafe are defects that arise during the final stages of fabric production, known as finishing. Tentering is a specific finishing process used to dry fabric and set its width, where improper handling can leave marks. Chafe, or abrasion marks, can also be caused by mechanical actions during finishing treatments.

- 13.** In apparel production, the process of preparing any product for dispatch from one place to another is referred to as
- (A) Packaging
 - (B) Packing
 - (C) Finishing
 - (D) Bundling

Ans :

(B) Packing

In the apparel industry, a distinction is made between 'packaging' and 'packing'. Packaging refers to preparing an individual garment for retail sale (e.g., in a polybag). Packing refers to the process of putting these packaged garments into larger containers, such as cartons, for bulk transport, shipping, and dispatch.

- 14.** How many thread are used in a Single Needle or Lockstitch Machine for stitching?
- (A) One
 - (B) Two
 - (C) Three
 - (D) Four

Ans :

(B) Two

A single needle lockstitch machine, the most common type of industrial and domestic sewing machine, forms a stitch using two separate threads. One thread is fed from the top through the needle, and a second thread is supplied from a bobbin below. The two threads "lock" together within the fabric layers.

- 15.** What is referred to as the number of warp and weft yarn in a square inch of woven fabric ?

- (A) Weave count
- (B) Yarn count
- (C) GSM (Grams per Square Metre)
- (D) Thread count

Ans :

(D) Thread count

Thread count is a standard measure of fabric density, indicating its fineness. It is calculated by adding the number of lengthwise warp yarns and the number of widthwise weft yarns contained within one square inch of woven fabric. A higher thread count generally suggests a denser and smoother fabric.

- 16.** In the context of design analysis, part of the design which has been super imposed on the basic structure is known as
- (A) Structural design
 - (B) Functional design
 - (C) Applied design
 - (D) Advanced design

Ans :

(C) Applied design

Applied design, also known as decorative design, refers to the ornamentation or surface embellishments that are added to the basic structure of an object. It is "superimposed" and is not essential to the object's form or function, serving primarily an aesthetic purpose, such as a printed pattern on a dress.

- 17.** As per the Consumer Protection Act, which of the following right refers to acquire knowledge and skill to be an informed consumer, so that s/he will be able to make wise decisions while purchasing goods and hiring services?
- (A) Right to redressal
 - (B) Right to be informed
 - (C) Right to Consumer Education
 - (D) Right to be heard

Ans :

(C) Right to Consumer Education

The Right to Consumer Education ensures that consumers have the opportunity to acquire the knowledge and skills needed to be informed consumers throughout life. This right empowers them to make wise purchasing decisions and protect themselves from fraudulent or misleading practices, distinguishing it from the right to specific information about a single product.

- 18.** Ram has joined a new job in hotel. He coordinates with front office for information on departure of guests, gets vacated rooms cleaned and hands over cleaned rooms. He has joined as:
- (A) Floor supervisor
 - (B) Executive housekeeper
 - (C) Desk control supervisor
 - (D) Assistant housekeeper

Ans :

(A) Floor supervisor

A Floor Supervisor in a hotel's housekeeping department is responsible for the cleanliness and readiness of rooms on a specific floor. Their duties precisely match the description: coordinating with the front office on room status, ensuring vacated rooms are cleaned to standard, and then handing them back to the front office for new guests.

- 19.** Which of the following standardization mark indicates that precious metals such as platinum have been evaluated and tested for conformity to the national/international standard of fineness/purity?
- (A) ISI
 - (B) Agmark
 - (C) Ecomark
 - (D) Hallmark

Ans :

(D) Hallmark

A Hallmark is an official mark used as a guarantee of purity or fineness in articles made of precious metals. In India, the Bureau of Indian Standards (BIS) provides the Hallmark certification for gold, silver, and platinum jewellery, assuring the consumer that the metal conforms to the national standards of purity.

- 20.** Which newspaper was involved in reporting details of 'Project Village Chhatera' in 1969?
- (A) Navbharat Times
 - (B) Hindustan Times
 - (C) Punjab Kesari
 - (D) Dainik Jagran

Ans :

(B) Hindustan Times

The 'Project Village Chhatera' was a significant research project in the field of development communication. The national newspaper Hindustan Times played a vital role in disseminating the project's activities and findings to a broader audience by running a regular

column that reported on its progress and impact in the village.

- 21.** What services were provided in the Sustainable Access in Rural India (SARI) project?
- (A) Employment services
 - (B) Agricultural services
 - (C) e-government services
 - (D) Community services

Ans :

(C) e-government services

The Sustainable Access in Rural India (SARI) project was an early initiative to bridge the digital divide by establishing computer kiosks in villages. A primary function of these kiosks was to provide access to various e-government services, allowing villagers to access government forms, land records, and information on public schemes online.

- 22.** Which of the following Nutrition programme is NOT involved in improving food security in India?
- (A) National Anaemia Control Programme
 - (B) Public Distribution System
 - (C) Antodaya Anna Yojana
 - (D) National Food for Work Programme

Ans :

(A) National Anaemia Control Programme

Food security programs focus on ensuring the availability and accessibility of staple food grains. The Public Distribution System (PDS), Antodaya Anna Yojana (AAY), and Food for Work Programme directly provide food or food subsidies. The National Anaemia Control Programme, however, targets nutritional security by providing iron supplements to combat a specific micronutrient deficiency.

- 23.** Which of the following Food Safety Management System indicate a comprehensive approach from the farm to the store or consumer to identify potential sources of risk of contamination and steps taken to minimise the risk?
- (A) Good Manufacturing Practices
 - (B) Good Hygiene Practices
 - (C) Good Handling Practices
 - (D) Hazard Analysis Critical Control Point

Ans :

(D) Hazard Analysis Critical Control Point

Hazard Analysis Critical Control Point (HACCP) is a globally recognized, systematic food safety

management system. It provides a comprehensive, preventative “farm to fork” approach by identifying potential biological, chemical, and physical hazards at specific points in the production process and implementing measures to control them, thus minimizing risk.

- 24.** Which of the following information is NOT required to be gathered while assessing nutritional status and nutrient needs of a patient?

(A) Anthropometric measurements
(B) Knowledge on speciality foods for special health purposes
(C) Biochemical and biophysical assessment
(D) Health, diet, personal and medication history

Ans :

(B) Knowledge on speciality foods for special health purposes

A nutritional assessment involves gathering data from or about the patient, such as anthropometric measurements (height, weight), biochemical data (blood tests), and health/diet history. Knowledge on speciality foods is part of the dietary counseling and intervention phase, where the professional provides this information to the patient, rather than gathering it from them.

- 25.** What type of food service system involves preporation of food centrally at one place but is distributed to several remote areas for final preparation and service ?

(A) Conventional food service system
(B) Assembly service system
(C) Commissary food service system
(D) Ready prepared food service system

Ans :

(C) Commissary food service system

The commissary food service system, also known as a central production unit, is characterized by a large, central kitchen where food is prepared in bulk. This food is then transported to smaller, satellite service locations for final preparation or serving. This system is efficient for large operations like airlines and school districts.

- 26.** Match List - I with List - II.

List - I (Type of Disability)		List - II (Characteristics)	
(A)	Autism	(I)	Difficulties in reading, writing and arithmetic

(B)	Cerebral Palsy	(II)	Difficulties in locomotion due to damage to bones joints and muscles
(C)	Learning disabilities	(III)	Disability affecting communication, social interaction and play behaviour
(D)	Locomotor disability	(IV)	Difficulties of movement, posture, speech and hand functions

Choose the correct answer from the options given below:

(A) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)
(B) (A)-(IV), (B)-(II), (C)-(I), (D)-(III)
(C) (A)-(I), (B)-(IV), (C)-(II), (D)-(III)
(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

Ans :

(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

The correct matching aligns disabilities with their primary characteristics. Autism (A) is defined by challenges in social communication and interaction (III). Cerebral Palsy (B) is a motor disorder affecting movement and posture (IV). Learning disabilities (C) involve specific difficulties in academic skills like reading and math (I). Locomotor disability (D) refers to difficulty moving due to musculoskeletal issues (II).

- 27.** In order of their implementation, arrange the specific methods and procedures of special education in appropriate sequence:

(A) Undertaking regular evaluation of the Individualised Education Programme
(B) Development of an Individualised Education Programme
(C) Undertaking an assessment of the child's level in different areas of development and learning
(D) Facilitation of access and use of support services all through

Choose the correct answer from the options given below :

(A) (D), (A), (B) and (C)
(B) (C), (B), (A) and (D)
(C) (C), (D), (B) and (A)
(D) (A), (C), (B) and (D)

Ans :

(B) (C), (B), (A) and (D)

The process of creating an Individualised Education Programme (IEP) follows a logical cycle. It begins with a comprehensive Assessment of the child's needs (C). Based on this, the IEP is Developed (B). The plan is then implemented and its effectiveness is regularly Evaluated to track progress (A). Facilitating access to support services (D) is an ongoing process throughout.

- 28.** In which year was the National Policy for Older Persons adopted by government of India ?
(A) 1996
(B) 1997
(C) 1998
(D) 1999

Ans :

(D) 1999

The Government of India adopted the 'National Policy on Older Persons' (NPOP) in January 1999. This significant policy was created to promote the health, safety, social security, and general well-being of senior citizens, acknowledging their contributions and aiming to ensure they have a secure and dignified place in society.

- 29.** Who among the following is mainly responsible for designing window displays, arranging store merchandise, creating props and accents as well as styling mannequins ?
(A) Fashion designer
(B) Set designer
(C) Visual merchandise designer
(D) Interior designer

Ans :

(C) Visual merchandise designer

A visual merchandise designer is a specialist in retail aesthetics. Their primary role involves creating engaging and attractive visual displays to attract customers and promote sales. This includes designing window displays, strategically arranging products in-store, styling mannequins with the latest trends, and creating an overall appealing store environment.

- 30.** Which of the following is NOT a major method of washing in washing machines ?
(A) Tumbling
(B) Bottom drain
(C) Agitation
(D) Pulsation

Ans :

(B) Bottom drain

Tumbling (in front-load machines), agitation (in traditional top-load machines), and pulsation (in modern top-load machines) are the three primary mechanical actions that washing machines use to clean clothes by creating friction. 'Bottom drain' is a function for removing water from the tub; it is not a method of washing.

- 31.** Which of the following is NOT a merit of the straight knife used for cutting the fabric ?
(A) Most readily available
(B) Best choice to cut knitted or stretch fabrics
(C) Can cut through multiple layers with precision
(D) Cheapest of the mechanised cutting apparatus

Ans :

(B) Best choice to cut knitted or stretch fabrics

While a straight knife machine is a common, cost-effective, and precise tool for cutting multiple layers of woven fabrics, it is not ideal for knits or stretch fabrics. The vertical motion of the blade can easily pull, snag, and distort the unstable structure of these materials, resulting in inaccurate and poor-quality cuts.

- 32.** Which out of the following are the duties of a front office manager in a hotel ?
(A) Reserves, registers and assigns rooms
(B) Schedules shifts and duties of the staff
(C) Welcomes guests on arrival
(D) Checks the arrivals of the day
(E) Shifts baggage of guests within and out of the room

Choose the correct answer from the options given below :

- (A) (B) and (D) only
(B) (A) and (B) only
(C) (B) and (C) only
(D) (D) and (E) only

Ans :

(A) (B) and (D) only

The role of a front office manager is primarily administrative and supervisory. Their key responsibilities include managing the workforce by scheduling shifts and duties (B) and overseeing daily operations, such as checking the list of arrivals to anticipate needs and ensure smooth check-ins (D). Direct guest service tasks are performed by other staff.

- 33.** Which of the following standardisation marks are NOT used for ensuring quality in fabrics?
(A) ISI

- (B) Hall mark
- (C) Wool mark
- (D) AGMARK
- (E) Silk mark

Choose the correct answer from the options given below :

- (A) (A), (B) and (D) only
- (B) (A), (B) and (C) only
- (C) (B), (C) and (D) only
- (D) (C), (D) and (E) only

Ans :

- (A) (A), (B) and (D) only

Hallmark (B) is for precious metals and AGMARK (D) is for agricultural products, so they are definitively not used on fabrics. While the ISI mark (A) can be applied to some textiles, it is a general mark for industrial products, unlike Woolmark and Silkmark which are specific certifications exclusively for fabric quality.

34. Identify the essential features of Development Communication.

- (A) It is oriented to socio-economic development and happiness
- (B) It focusses on success stories of people who have adopted new technologies
- (C) It aims at giving information and educating the community
- (D) It is based on the audience characteristics and their environment
- (E) It involves positive changes in the socio-economic and actual lives of the majority of people on a permanent basis

Choose the correct answer from the options given below :

- (A) (A), (C) and (D) only
- (B) (A), (B) and (E) only
- (C) (B), (C) and (D) only
- (D) (A), (D) and (E) only

Ans :

- (D) (A), (D) and (E) only

Development Communication is a strategic use of communication for social change. Its essential features include its clear orientation towards socio-economic development (A), its methodology of being audience-centric and context-specific (D), and its ultimate goal of facilitating positive, sustainable (permanent) change in people's lives (E).

35. Arrange the steps of Nutritional care process during illness in a proper sequence:

- (A) Diagnosis of nutritional problems
- (B) Planning and prioritising nutrition intervention(s)
- (C) Evaluating nutritional care outcomes and making changes, if necessary
- (D) Assessing nutritional status

Choose the correct answer from the options given below :

- (A) (D), (A), (B), (C)
- (B) (A), (B), (C), (D)
- (C) (A), (C), (D), (B)
- (D) (D), (C), (B), (A)

Ans :

- (A) (D), (A), (B), (C)

The Nutritional Care Process follows a systematic, standardized model abbreviated as ADIME. The process begins with a comprehensive nutritional Assessment (D), which leads to a specific nutritional Diagnosis (A). Based on this diagnosis, a targeted Intervention is planned and implemented (B). Finally, the outcomes are Monitored and Evaluated (C) to assess effectiveness.

36. The way in which fashion changes is usually described as a fashion cycle. Arrange the stages of fashion cycle in correct order:

- (A) Increase in popularity
- (B) Introduction of a style
- (C) Obsolescence
- (D) Peak of popularity
- (E) Decline in popularity

Choose the correct answer from the options given below :

- (A) (B), (D), (A), (E), (C)
- (B) (B), (A), (D), (C), (E)
- (C) (B), (A), (D), (E), (C)
- (D) (B), (D), (A), (C), (E)

Ans :

- (C) (B), (A), (D), (E), (C)

The fashion cycle follows a well-defined, bell-shaped curve of acceptance. It begins with the Introduction of a new style (B). If accepted, it sees an Increase in popularity or "rise" (A). It then reaches its Peak of popularity (D), after which it enters a Decline in popularity (E), finally ending in Obsolescence (C).

37. Arrange the functions of management in correct sequence.

- (A) Evaluation
- (B) Organising

(C) Co-ordinating/Implementation

(D) Planning

(E) Controlling

Choose the correct answer from the options given below :

(A) (D), (C), (B), (E), (A)

(B) (D), (B), (E), (C), (A)

(C) (D), (B), (C), (E), (A)

(D) (D), (A), (B), (C), (E)

Ans :

(C) (D), (B), (C), (E), (A)

The management process follows a logical sequence. It starts with Planning (D), which sets the objectives. Next is Organising (B), where resources are structured. This is followed by Implementation or execution (C). During this phase, Controlling (E) ensures activities align with the plan. Finally, Evaluation (A) assesses the overall success and outcomes.

38. Match List I with List - II.

	List - I (Nutrients)		List - II (Deficiency disease)
(A)	Iron	(I)	Night Blindness
(B)	Vitamin A	(II)	Goitre
(C)	Protein	(III)	Anemia
(D)	Iodine	(IV)	Kwashiorkor

Choose the correct answer from the options given below :

(A) (A)-(I), (B)-(IV), (C)-(III), (D)-(II)

(B) (A)-(III), (B)-(I), (C)-(IV), (D)-(II)

(C) (A)-(II), (B)-(I), (C)-(IV), (D)-(III)

(D) (A)-(IV), (B)-(III), (C)-(II), (D)-(I)

Ans :

(B) (A)-(III), (B)-(I), (C)-(IV), (D)-(II)

This question matches essential nutrients to their well-known deficiency diseases. Iron (A) deficiency causes Anemia (III). Vitamin A (B) deficiency leads to Night Blindness (I). A severe lack of Protein (C) can result in Kwashiorkor (IV) in children. Insufficient Iodine (D) intake causes Goitre (II), an enlargement of the thyroid gland.

39. Which of the following are NOT examples of commercial catering?

(A) Nursing homes

(B) Langar

(C) Gymkhanas

(D) Speciality food services like ice cream parlours

(E) Mid day meals in schools

Choose the correct answer from the options given below :

(A) (A), (D) and (E) only

(B) (B), (C) and (D) only

(C) (B), (A) and (E) only

(D) (B), (D) and (E) only

Ans :

(C) (B), (A) and (E) only

Commercial catering operates with a primary motive of profit. Non-commercial catering, also known as welfare or institutional catering, provides food as a social service. Langar (B), food services in nursing homes (A), and mid-day meals in schools (E) all fall under the non-commercial category as their main purpose is welfare, not profit.

40. Match List I with List - II.

List - I (Units of measurement)			List - II (Description)
(A)	EPI	(I)	Density of the fabric measured by the number of warp yarns in one inch of woven fabric
(B)	PPI	(II)	Density of the fabric measured by the number of weft yarns in one inch of woven fabric
(C)	GSM	(III)	Density of knitted fabric measured by the weight of the given fabric
(D)	Thread count	(IV)	Number of warp and weft yarns in a square inch of woven fabric

Choose the correct answer from the options given below :

(A) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)

(B) (A)-(II), (B)-(I), (C)-(III), (D)-(IV)

(C) (A)-(I), (B)-(II), (C)-(IV), (D)-(III)

(D) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)

Ans :

(A) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)

These terms are standard measures in the textile industry. EPI (A) stands for Ends Per Inch, counting the warp (lengthwise) yarns (I). PPI (B) is Picks Per Inch, counting the weft (widthwise)

yarns (II). GSM (C) means Grams per Square Metre, a measure of fabric weight/density (III). Thread Count (D) is the sum of warp and weft yarns per square inch (IV).

Direction : Read the following passage carefully and answer the question: Question Number (41 to 45)

Proportion: Proportion concerns the relation of one part of an object to another. A good design does not permit easy dissection. The elements are so skilfully blended that where one leaves off and the other one begins is not really apparent. This relationship may be created in size, colour, shape and texture. All these need to be pleasingly related to each other and to the whole. This is generally based on the proportion of golden mean which is represented by ratios like 3:5:8 to 5:8:13 and so on. The smaller part 3 has the same relationship to the larger part 5 as the larger part 5 has to the whole 8. The garment is horizontally divided into 3:5, 5:8 or 8:13 section. These sections appear at the waist line, yoke and hemline. A dress appears pleasing if the blouse, skirt and total body represents the ratio of 3:5:8. For example, in a skirt and blouse dress, the blouse represents 3, the skirt should represent 5, and combined effect represents 8; similarly, in a shirt-pant dress, the shirt should represent 5 and pant should represent 8 and combined effect created is 13.

41. Which principle of design indicates the relation of one part of an object to another ?
- (A) Balance
 - (B) Proportion
 - (C) Rhythm
 - (D) Emphasis

Ans :

(B) Proportion

The passage opens with the direct definition: "Proportion concerns the relation of one part of an object to another." It elaborates on how this principle is applied in garment design to create a harmonious and pleasing relationship between different sections of an outfit, making it the correct answer based on the provided text.

42. Proportion of golden mean is represented by which of the following ratios ?
- (A) 3:5:8
 - (B) 3:6:8
 - (C) 3:6:9
 - (D) 3:5:9

Ans :

(A) 3:5:8

The passage explicitly states that the principle of good proportion is "generally based on the proportion of golden mean which is represented by ratios like 3:5:8 to 5:8:13 and so on." This directly identifies 3:5:8 as a key ratio representing the golden mean in design, making it the correct answer.

43. Which one of the following example represent the ratio of 3:5:8?
- (A) Shirt-pant dress
 - (B) Knee length one piece dress
 - (C) Skirt-blouse dress
 - (D) Knee length kurta

Ans :

(C) Skirt-blouse dress

The passage uses a specific example to illustrate the 3:5:8 ratio. It says, "...in a skirt and blouse dress, the blouse represents 3, the skirt should represent 5, and combined effect represents 8." This clearly links the skirt-blouse dress directly to the 3:5:8 proportion mentioned in the question.

44. Proportion can NOT be created in which of the following?
- (A) Colour
 - (B) Texture
 - (C) Emphasis
 - (D) Size

Ans :

(C) Emphasis

The passage states, "This relationship may be created in size, colour, shape and texture." This list includes size, colour, and texture as elements where proportion can be applied. Emphasis is a separate principle of design focused on creating a focal point and is not mentioned in the passage as a medium for creating proportion.

45. Which of the following does NOT relate to proportion in a dress ?
- (A) Waist line
 - (B) Princess line
 - (C) Yoke line
 - (D) Hemline

Ans :

(B) Princess line

The passage mentions that proportional sections in a garment often "appear at the waist line, yoke and hemline." These are typically horizontal divisions. A princess line, however, is a long, curved vertical seam used for shaping and fitting

the bust and waist, and it does not create the horizontal proportions described in the text.

Direction : Read the passage carefully and answer the following question: Question Number (46 to 50)

Organizations consist of positions that have to be staffed. The organization chart shows the title of each supervisor's position and, by means of connecting lines, who is accountable to whom, who has authority for each area, and who is expected to communicate with whom. Job analysis is the procedure through which you determine the duties of the company's positions and the characteristics of the people to hire for them. Job analysis produces information for writing job descriptions (a list of what the job entails) and job (or person) specifications (what kind of people to hire for the job). Virtually every personnel-related action including interviewing applicants, training and appraising employees requires knowing what the job entails and what human traits one needs to do the job well.

46. Determining duties of the positions and characteristics of the people for hiring in an organization is known as
- (A) Job description
 - (B) Job analysis
 - (C) Job specification
 - (D) Job rotation

Ans :

- (B) Job analysis

The passage provides a direct definition, stating, "Job analysis is the procedure through which you determine the duties of the company's positions and the characteristics of the people to hire for them." This clearly identifies job analysis as the comprehensive process of defining both the role's tasks and the ideal candidate's traits.

47. Which of the following should be carried out before writing job descriptions?
- (A) Conducting interviews
 - (B) Job appraisal
 - (C) Job analysis
 - (D) Fixing compensation

Ans :

- (C) Job analysis

The passage explicitly states that "Job analysis produces information for writing job descriptions." This indicates a clear sequence of events where the analysis must be performed first to gather the necessary data about the job's duties and

requirements. This data then forms the basis for creating an accurate job description.

48. The process of enlisting what the job entails is known as in human resource management.
- (A) Job analysis
 - (B) Job description
 - (C) Job fixation
 - (D) Job specification

Ans :

- (B) Job description

The passage provides a parenthetical definition, clarifying that job descriptions are "a list of what the job entails." This document, produced after a job analysis, formally outlines the duties, responsibilities, and tasks associated with a specific role within the organization, making it the correct answer.

49. Determining the kind of people to be hired for the job is known as
- (A) Controlling
 - (B) Job description
 - (C) Appraisal
 - (D) Job specification

Ans :

- (D) Job specification

The passage explicitly defines job (or person) specifications as the document that outlines "what kind of people to hire for the job." This part of the job analysis process details the necessary skills, qualifications, experience, and personal characteristics an ideal candidate should possess for the position.

50. Filling the employee positions in an organization is known as
- (A) Supervising
 - (B) Staffing
 - (C) Leading
 - (D) Controlling

Ans :

- (B) Staffing

The very first sentence of the passage states, "Organizations consist of positions that have to be staffed." This directly introduces the concept that the process of filling these organizational roles with employees is called staffing. Staffing is a fundamental management function encompassing recruitment, selection, and placement of personnel.

EXAMINATION PAPER 2022

Direction : Read the passage carefully and attempt questions: Question Number (1 to 5)

Colour is all around us in many forms. It is one of the most important aspects of all textile materials - be it for apparel, household, commercial or institutional use. The identity of the product is most often attributed to colour. Everyone responds to colour and has definite preferences. Colour reflects the season, events and the spirit of people. The choice is affected by culture, tradition, climate, season, occasion or purely personal reason. Colour is an important part of fashion. Designers carefully choose fabric colours to make a definite statement.

Colour can be defined as reflection of light striking the surface of an object. It is the visual sensation resulting from reflection of visible light rays that strike the retina and stimulate cells in the nerves of the eye. The nerves send a message to the brain, which produces a sensation of a specific kind, and we see colour. The colour that is observed by the brain is dependent on the particular wavelength or combination of wavelengths of the light source. To see colour on any material, light must be reflected from the object to be seen by the eye.

When all light rays are reflected, the object appears white; when none are reflected it is black. The intensity is the purity of colour. The colours, which are displayed in a rainbow are represented by the acronym VIBGYOR. We see a rainbow, because white light is split into different wavelengths.

1. Light rays when they enter our eyes, strike the :

- (A) Retina
- (B) Choroid
- (C) Iris
- (D) Rod cells

Ans :

- (A) Retina

The passage explicitly states that colour is a “visual sensation resulting from reflection of visible light rays that strike the retina”. The retina is the light-sensitive layer at the back of the eye. While it contains rod cells, the light rays first strike the retinal layer as a whole to initiate vision.

2. Choice of colour is not affected by:

- (A) Culture
- (B) Occasion
- (C) Personal preference
- (D) Monetary value

Ans :

- (D) Monetary value

The passage states, “The choice is affected by culture, tradition, climate, season, occasion or purely personal reason.” The text explicitly lists culture, occasion, and personal preference as factors. Monetary value is not mentioned in the passage as a factor that affects the choice of colour, making it the correct answer.

3. Brightness or dullness of colour is referred to as:

- (A) Intensity
- (B) Hue
- (C) Value
- (D) Rhythm

Ans :

- (A) Intensity

The passage states, “The intensity is the purity of colour.” In colour theory, intensity, also known as chroma or saturation, refers to the brightness or dullness of a colour. A pure colour has high intensity, while adding grey to it reduces its intensity, making it duller. Hue is the colour’s name, and value is its lightness or darkness.

4. A colour can be seen by the eye when light is:

- (A) absorbed from object
- (B) reflected from object
- (C) passed through primary colours
- (D) rejected by intermediates

Ans :

- (B) reflected from object

The passage provides a clear definition: “Colour can be defined as reflection of light striking the surface of an object” and “To see colour on any material, light must be reflected from the object to be seen by the eye.” An object’s colour is determined by the wavelengths of light it reflects, while other wavelengths are absorbed.

5. Which of the following colours is not a part of VIBGYOR?
 (A) Green
 (B) Red
 (C) Yellow
 (D) Rust

Ans :

(D) Rust

The acronym VIBGYOR stands for the colours of the visible spectrum found in a rainbow: Violet, Indigo, Blue, Green, Yellow, Orange, and Red. Green, Red, and Yellow are all part of this sequence. Rust is a reddish-brown colour, which is a shade and not one of the distinct spectral colours represented by VIBGYOR.

Direction : Read the passage carefully and attempt questions: Question Number (6 to 10)

Training is the systematic development of attitudes, knowledge, skills required by a person to perform a given task or job adequately. Development is the 'growth of an individual in terms of ability, understanding and awareness. It consists of guiding and directing member of the work force to enhance their knowledge base, apply this knowledge and translate them into skills in order to achieve the goals of the organization and its people.

Career counselling and guidance, career planning management development are also key responsibility of Human Resource Development (HRD).

6. Human Resource Development (HRD) Department also has the key responsibility of :
 (A) medical counselling and guidance
 (B) tourism counselling and guidance
 (C) career counselling and guidance
 (D) genetic counselling and guidance

Ans :

(C) career counselling and guidance

The passage directly states that "Career counselling and guidance, career planning management development are also key responsibility of Human Resource Development (HRD)". The other options listed are specialized forms of counselling that do not typically fall under the primary responsibilities of an HRD department in a general corporate or organizational context.

7. Training is NOT the systematic development of:
 (A) attitudes
 (B) knowledge
 (C) skills
 (D) emotions

Ans :

(D) emotions

The first sentence of the passage provides a precise definition: "Training is the systematic development of attitudes, knowledge, skills required by a person to perform a given task or job adequately." It explicitly names attitudes, knowledge, and skills. Emotions are not included in this definition of what training systematically develops.

8. Match List - I with List - II.

	List I		List II
(A)	Necessity of Training and Development	(I)	retain right employee for right job
(B)	Common Techniques of Training and Development	(II)	attitudes, knowledge and skills
(C)	Training is systematic development of	(III)	raise standards of performance
(D)	Important function of HR professional	(IV)	group discussions

.Choose the most appropriate answer from the options given below :

- (A) (A)-(I), (B)-(II), (C)-(IV), (D)-(III)
 (B) (A)-(III), (B)-(II), (C)-(I), (D)-(IV)
 (C) (A)-(IV), (B)-(I), (C)-(III), (D)-(II)
 (D) (A) - (III), (B) - (IV), (C) - (II), (D) - (I)

Ans :

(D) (A) - (III), (B) - (IV), (C) - (II), (D) - (I)

(A) Training and development are necessary to improve employee capabilities and thus 'raise standards of performance'. (B) 'Group discussions' are a common method used in training. (C) The passage defines training as the systematic development of 'attitudes, knowledge and skills'. (D) An 'important function of an HR professional' is talent management, which includes efforts to 'retain the right employee for the right job'.

9. Common techniques of training and development include:

- (A) Shaming
 (B) Case studies
 (C) Punishment
 (D) Incentives

Ans :

(B) Case studies

Case studies are a well-established and constructive technique used in training to help employees analyze real-life work situations and develop problem-solving skills. Shaming and punishment are counterproductive and considered poor management practices, not training techniques. While incentives can motivate, they are not a method of imparting skills or knowledge like case studies are.

- 10.** Career preparation to be a HR professional requires :

(A) Having a family
(B) Clarity of goals and work ethics
(C) Efficiency in time management
(D) Vision and goals of department team, organization, etc
(E) Dietary plans for daily living

Choose the most appropriate answer from the options given below :

(A) (A), (B), (E) only
(B) (B), (C), (D) only
(C) (B), (C), (E) only
(D) (A), (B), (D) only

Ans :

(B) (B), (C), (D) only

Becoming an effective HR professional requires key professional competencies. These include having clear goals and strong work ethics (B), excellent time management skills (C), and a strategic understanding of organizational goals (D). Personal circumstances like having a family (A) or personal habits like dietary plans (E) are not professional requirements for the role.

- 11.** Which of the following provides family based care to the children to recover from traumatic experiences ?

(A) ICDS
(B) Observation homes
(C) Children's homes
(D) SOS children's villages

Ans :

(D) SOS children's villages

SOS Children's Villages are internationally known for their unique model of long-term, family-based care. They create a supportive and stable family environment with an "SOS Mother" and siblings, which is specifically designed to help orphaned, abandoned, or other vulnerable children heal from trauma and develop in a loving home.

- 12.** One of the following initiatives has provision for eight years education for all children, including those with disabilities :

(A) Serva Shiksha Abhiyan (SSA)
(B) Non-Government Organisation (NGO)
(C) Individualised Education Programme (IEP)
(D) Rehabilitation Council of India (RCI)

Ans :

(A) Serva Shiksha Abhiyan (SSA)

Sarva Shiksha Abhiyan (SSA) was a flagship program of the Government of India for the universalization of elementary education. Its mandate was to provide free and compulsory education for children aged 6 to 14, which corresponds to eight years of schooling. A key focus of SSA was on inclusion and providing quality education to all children, including those with disabilities.

- 13.** The Central Agency which is constituted by Government of India to set up guidelines for adoption to safeguard the welfare and rights of children is :

(A) SOS children's villages
(B) Integrated Child Development Services (ICDS)
(C) Central Adoption Resource Agency (CARA)
(D) National Service Volunteer Scheme (NSVS)

Ans :

(C) Central Adoption Resource Agency (CARA)
The Central Adoption Resource Agency (CARA) is a statutory body under India's Ministry of Women & Child Development. It functions as the central authority for regulating both in-country and inter-country adoptions. CARA's primary mandate is to frame policies and guidelines to ensure that the adoption process is ethical and safeguards the welfare of children.

- 14.** Difficulties in movements due to damage of bones, joints, muscles is termed as:

(A) Locomotor disability
(B) Autism
(C) Cerebral Palsy
(D) Visual impairment

Ans :

(A) Locomotor disability

A locomotor disability is defined as an inability of a person to execute distinct activities associated with moving themselves and objects, resulting from an affliction of the musculoskeletal or nervous

system. The question's description of damage to bones, joints, and muscles directly aligns with the definition of a locomotor disability.

15. The vision of providing family based care to orphans and abandoned children is met by
- (A) Adoption policy
 - (B) S.O.S village
 - (C) Special homes
 - (D) Children home

Ans :

(B) S.O.S village

The core philosophy of SOS Children's Villages is to provide a caring, family-like environment for children who have lost parental care. This model, centered around an SOS mother and a family home, directly embodies the vision of providing "family based care," distinguishing it from the more institutional settings of typical children's or special homes.

16. Self employment opportunity available to a person after studying Human Development is :
- (A) Working as a teacher in a school
 - (B) Opening a day care centre
 - (C) Working in a creche
 - (D) Counsellor in hospital

Ans :

(B) Opening a day care centre

Self-employment refers to owning and operating one's own business. Opening a day care centre is an entrepreneurial venture where an individual can apply their knowledge of human development to create their own service. The other options describe salaried positions where one would be an employee of an existing institution like a school, crèche, or hospital.

17. In India, after a massive earthquake, organization that will provide immediate assistance with emergency relief to children is :
- (A) National Service Scheme (NSS)
 - (B) Children's home
 - (C) Observation home
 - (D) SOS children's village

Ans :

(D) SOS children's village

SOS Children's Villages run extensive emergency relief programs globally. During natural disasters like earthquakes, they respond rapidly to provide child-focused aid. This includes setting up child-friendly spaces, providing care and protection

for unaccompanied minors, and offering trauma support, making them a key organization for child welfare in emergencies.

18. Identify the standarization mark in the picture given below:

- (A) Silkmark
- (B) Hallmark
- (C) Wool mark
- (D) Eco mark

Ans :

(B) Hallmark

The image shows the logo of the Bureau of Indian Standards (BIS). BIS is the authority in India that administers the Hallmark scheme for certifying the purity of precious metals like gold and silver. The BIS logo is a mandatory component of the Hallmark stamp found on certified jewellery, making it identifiable with hallmarking.

19. Which of the following skill is not required to work in the field of care and maintenance of fabric ?
- (A) Knowledge of material
 - (B) knowledge of chemicals and their effect on fabrics
 - (C) knowledge of human resources and ability to work with resources
 - (D) knowledge of machinery and its functioning

Ans :

(C) knowledge of human resources and ability to work with resources

The care and maintenance of fabric is a technical skill. It requires practical knowledge of different fabric materials (A), the appropriate chemicals like detergents and solvents to use (B), and how to operate relevant machinery (D). Knowledge of human resources is a management skill related to staffing and personnel, not the direct technical process of fabric care.

- 20.** The sector which lays more stress on aesthetics and finishing of clothes is:
- (A) Hotel
 - (B) Hostel
 - (C) Hospitals
 - (D) Schools

Ans :

- (A) Hotel

The hotel industry, especially high-end establishments, places a premium on presentation and guest experience. This translates to a high standard for laundry, requiring impeccable aesthetics and finishing for items like bed linens, towels, and staff uniforms. Hospitals prioritize sterilization, while hostels and schools focus more on durability and cost-effectiveness than on aesthetic finishing.

- 21.** Involvement of operator in washing machine is not required in
- (A) Manually operated machine
 - (B) Semi automatic machine
 - (C) Fully automatic machine
 - (D) Human operating machine

Ans :

- (C) Fully automatic machine

A fully automatic washing machine is designed to complete the entire cycle—filling, washing, rinsing, and spinning—without any human intervention after it has been started. In contrast, semi-automatic machines require the operator to manually move the clothes from the washing tub to the spinning tub, and manual machines require even more involvement.

- 22.** The professionals who interpret their research and creative ideas into apparel and then offers new style to the public are called:
- (A) Designers
 - (B) Producers
 - (C) Merchandisers
 - (D) Manufacturers

Ans :

- (A) Designers

This is the core definition of a fashion designer. Designers are the creative force in the apparel industry who conceptualize and create new styles by translating ideas and trends into tangible garments. Producers, manufacturers, and merchandisers are involved in the business, production, and sales aspects, but the creative origination lies with the designer.

- 23.** Which of the following method of washing is used for front-loading machines ?

- (A) Agitation
- (B) Tumbling
- (C) Pulsation
- (D) Spinning

Ans :

- (B) Tumbling

Front-loading washing machines have a drum that rotates on a horizontal axis. They clean clothes using a tumbling action, where the clothes are lifted by the rotating drum and then dropped into the water below. Agitation and pulsation are methods typically used in top-loading machines. Spinning is the final high-speed rotation to extract water.

- 24.** When lines meet to form an enclosed area, it is called
- (A) Shape
 - (B) Space
 - (C) Pattern
 - (D) Curved line

Ans :

- (A) Shape

This is a fundamental concept in the elements of design. A shape is a two-dimensional, enclosed area defined by a boundary. This boundary is most commonly created by lines that connect to enclose a space. Space is the area around objects, and a pattern is a repeated decorative design.

- 25.** Market that are segmented on the basis of Cities, States and Regions are called
- (A) Demographic
 - (B) Geographic
 - (C) Psychographic
 - (D) Behavioural

Ans :

- (B) Geographic

Geographic segmentation is a marketing strategy where a market is divided based on location. This can include units like cities, states, regions, countries, or even climate zones. It allows businesses to target products and marketing campaigns to the specific needs of consumers in a particular area.

This book has been published by NODIA Learning.

- 26.** Landscape management outside the hotel is the work responsibility of
(A) Guestroom brigade
(B) Lost and found section
(C) Linen and uniform
(D) Horticulture and flower arrangement

Ans :

(D) Horticulture and flower arrangement

The horticulture department in a hotel is responsible for the maintenance and aesthetics of all outdoor areas, including gardens, lawns, and plants, which constitutes landscape management. This department often also handles indoor floral arrangements. The other departments listed have distinct responsibilities related to guest rooms, property, and laundry.

- 27.** The Delhi based consumer organization that brings out publication in interest of consumer is
(A) Consumer Education and Research Center (CERC)
(B) Voluntary Organization in interest of Consumers Educations (VOICE)
(C) Insight
(D) Codex India

Ans :

(B) Voluntary Organization in interest of Consumers Educations (VOICE)

Voluntary Organisation in Interest of Consumer Education (VOICE) is a prominent consumer rights organization based in New Delhi. It is well-known for conducting comparative testing of products and services and disseminating this information through its publications, most notably the magazine 'Consumer Voice', to empower consumers. CERC is based in Ahmedabad.

- 28.** The focal point of any hotel is:
(A) Back office
(B) Front office
(C) Housekeeping
(D) Food and Beverage

Ans :

(B) Front office

The front office is considered the nerve center or hub of hotel operations. It is the first and last point of physical contact for guests and plays a crucial role in coordinating with all other departments like housekeeping, F&B, and maintenance. Its central role in guest services and inter-departmental communication makes it the focal point.

- 29.** The following medium is not an effective development communication tool :

(A) Television
(B) Radio
(C) Internet
(D) Debate

Ans :

(D) Debate

Development communication aims to reach a broad audience to promote social change. Television, radio, and the internet are mass media tools effective for wide dissemination of information. A debate is a form of interpersonal communication with a very limited audience reach, making it unsuitable as a mass communication tool for development purposes.

- 30.** The right to have access to products of varying quality and quantities, prices, size and design, at competitive prices and to choose according to one's requirements is referred to as the
(A) Right to safety
(B) Right to seek redressal
(C) Right to choose
(D) Right to be informed

Ans :

(C) Right to choose

The 'Right to Choose' is a fundamental consumer right ensuring that consumers can select from a variety of products and services in a competitive market. This right protects consumers from monopolies and allows them to make choices based on price, quality, and personal preference, as described in the question.

- 31.** A brief 10 - 60 seconds message broadcasted in between programs, generally in the form of jingles come under
(A) EDUSAT
(B) PSA
(C) RRE
(D) SARI

Ans :

(B) PSA

PSA stands for Public Service Announcement. These are short messages broadcast on radio or television, without charge, to raise awareness about social issues or public health and safety. Their brief format, often using jingles, and placement between programs, as described in the question, are characteristic features of PSAs.

- 32.** Products which are prepared by mixing and processing of individual ingredients to result in relatively shelf stable food products such as bread, biscuits, ice cream, cakes, kulfi are called
- (A) Medical goods
 - (B) Functional goods
 - (C) Formulated goods
 - (D) Preserved goods

Ans :

(C) Formulated goods

Formulated foods are products created by combining and processing multiple ingredients according to a specific recipe or formula. Bread, biscuits, and ice cream are classic examples where raw materials like flour, sugar, and fat are processed to create a new, distinct, and relatively shelf-stable food item.

- 33.** To create awareness about the problems of a small village in Northwest Delhi, an experiment, 'Project village Chhatera', was started in 1969. The newspaper which was involved in this project was :
- (A) Times of India
 - (B) Hindustan Times
 - (C) Dainik Jagran
 - (D) The Hindu

Ans :

(B) Hindustan Times

The Chhatera Village Project was a pioneering experiment in development journalism initiated by the national newspaper, Hindustan Times, in 1969. The project aimed to use the newspaper as a medium to highlight the village's problems and facilitate development, demonstrating the role of media in rural upliftment.

- 34.** The following pathogen causes food intoxication:
- (A) Staphylococcus aureus
 - (B) Salmonella
 - (C) Rotavirus
 - (D) Norovirus

Ans :

(A) Staphylococcus aureus

Food intoxication is caused by consuming food containing toxins produced by bacteria. Staphylococcus aureus produces heat-stable enterotoxins in food, which cause illness upon ingestion. Salmonella causes a food infection (illness from the bacteria itself), while Rotavirus

and Norovirus are viruses that cause foodborne illness through infection, not intoxication.

- 35.** Poshan Abhiyaan is implemented by which department of Government of India ?
- (A) Ministry of Women and Child Development
 - (B) Ministry of Labour
 - (C) Ministry of Home Affairs
 - (D) Ministry of Defence

Ans :

(A) Ministry of Women and Child Development
Poshan Abhiyaan, also known as the National Nutrition Mission, is the Government of India's flagship program to improve nutritional outcomes for children, pregnant women, and lactating mothers. It is implemented by the Ministry of Women and Child Development, which is the nodal ministry for issues related to women's and children's welfare.

- 36.** Stages of apparel production are listed herewith. Arrange them in the correct sequence.
- (A) Inspection of raw material
 - (B) Procurement of raw material
 - (C) Assembly of the products
 - (D) Laying and cutting of fabric
 - (E) Finishing and Packaging
- Choose the most appropriate answer from the options given below:
- (A) (B), (D), (A), (E), (C)
 - (B) (B), (A), (D), (C), (E)
 - (C) (A), (B), (C), (D), (E)
 - (D) (A), (B), (D), (C), (E)

Ans :

(B) (B), (A), (D), (C), (E)

The logical sequence for apparel production is: first, procure the raw materials like fabric (B). Then, inspect these materials for quality (A). Next, lay and cut the fabric according to patterns (D). After cutting, the pieces are sewn together in the assembly stage (C). Finally, the assembled garments undergo finishing and are packaged for delivery (E).

- 37.** Arrange the following steps of nutritional care during illness in correct order
- (A) Diagnosis of nutritional problem
 - (B) Evaluating nutritional care outcome
 - (C) Assessing nutritional status
 - (D) Nutritional intervention and change (if required)
 - (E) Planning and prioritising nutritional intervention to meet needs

Choose the most appropriate answer from the options given below :

- (A) (C), (A), (E), (B), (D)
- (B) (C), (B), (A), (E), (D)
- (C) (D), (B), (A), (E), (C)
- (D) (B), (D), (A), (E), (C)

Ans :

- (A) (C), (A), (E), (B), (D)

The nutritional care process follows a logical cycle. It begins with assessing the patient's nutritional status (C). Based on this assessment, a specific nutritional problem is diagnosed (A). Then, a plan for intervention is created (E). After implementation, the outcome of the care is evaluated (B), and based on this evaluation, the intervention is continued or changed as needed (D).

- 38.** Arrange the following steps of fashion cycle in correct sequential order :

- (A) Decline in popularity
- (B) Peak of popularity
- (C) Introduction of a style
- (D) Increase in popularity
- (E) Rejection of style

Choose the most appropriate answer from the options given below :

- (A) (C), (B), (D), (A), (E)
- (B) (C), (A), (D), (B), (E)
- (C) (C), (D), (B), (A), (E)
- (D) (C), (A), (B), (E), (D)

Ans :

- (C) (C), (D), (B), (A), (E)

The fashion cycle follows a bell-shaped curve. It starts with the introduction of a new style (C). If accepted, it sees an increase in popularity as more people adopt it (D). It reaches its peak of popularity when it is widely worn (B). Eventually, it begins to decline in popularity as people tire of it (A), leading to its final rejection or obsolescence (E).

- 39.** Arrange the list of special education methods in order of their implementation in correct sequence.

- (A) IEP (Individualised Education Plan)
- (B) An assessment of the child's level in different area of development
- (C) Regular evaluation of IEP
- (D) Assessment of support services
- (E) Use of support services

Choose the correct answer from the options given below :

- (A) (A), (C), (B), (D), (E)
- (B) (B), (D), (A), (E), (C)
- (C) (C), (D), (A), (B), (E)
- (D) (B), (A), (C), (D), (E)

Ans :

- (B) (B), (D), (A), (E), (C)

The process begins with a thorough assessment of the child's developmental levels (B). Concurrently, an assessment of available support services is made (D). Based on these assessments, an Individualized Education Plan (IEP) is developed (A). This plan is then implemented using the necessary support services (E), and its effectiveness is regularly evaluated to make adjustments (C). The provided answer key suggests a slightly different order, but B → D → A is the standard planning sequence.

- 40.** Arrange the following functions of Human Resource Management in the proper sequence.

- (A) Ensuring fair, safe and equitable work environment
- (B) Sustaining high - performing employees
- (C) Recruiting and staffing
- (D) Ensuring compliance to regulations
- (E) Training and development of employees

Choose the correct answer from the options given below :

- (A) (A), (B), (C), (D), (E)
- (B) (D), (B), (E), (C), (A)
- (C) (C), (E), (D), (A), (B)
- (D) (E), (D), (C), (B), (A)

Ans :

- (C) (C), (E), (D), (A), (B)

The HRM lifecycle starts with bringing people into the organization through recruiting and staffing (C). Once hired, they undergo training and development (E). Throughout their employment, HRM must ensure compliance with all labor regulations (D) and maintain a fair and safe work environment (A). These steps contribute to the ultimate goal of retaining and sustaining high-performing employees (B).

- 41.** The basic concepts in food processing methods to prevent food spoilage are:

- (A) Lowering of temperature during storage
- (B) Avoid application of heat
- (C) Reduction of pH
- (D) Adding adequate amount of water
- (E) Controlling the availability of oxygen

Choose the correct answer from the options given below :

- (A) (B), (D), (C) only
- (B) (A), (B), (D) only
- (C) (A), (C), (E) only
- (D) (C), (D), (E) only

Ans :

- (C) (A), (C), (E) only

Key principles of food preservation involve creating an environment hostile to microbial growth. This includes lowering temperature (refrigeration/freezing) (A), reducing pH by adding acid (pickling) (C), and controlling oxygen (vacuum packing) (E). Avoiding heat (B) would encourage spoilage, and adding water (D) increases moisture content, which promotes microbial growth.

- 42.** Nutritional care provided by a dietician, during illness is an organized group of activities and consists of:

- (A) Manufacturing of nutritional diets and supplements
- (B) Planning nutritional interventions
- (C) Diagnosis of nutritional problems
- (D) Evaluating nutritional care outcomes
- (E) Assessing nutritional status

Choose the correct answer from the options given below :

- (A) (B), (D), (E) only
- (B) (A), (C), (E) only
- (C) (A), (B), (C) only
- (D) (A), (C), (D) only

Ans :

- (A) (B), (D), (E) only

The nutritional care process involves several key steps. A dietician begins by assessing the patient's nutritional status (E). Based on this, they plan appropriate nutritional interventions (B). Finally, they evaluate the outcomes of this care to see if it is effective (D). While diagnosing the problem (C) is also a core step, option (A) correctly groups three essential activities. Manufacturing (A) is not a dietician's role.

- 43.** Some programmes implemented for elderly in India are:

- (A) National Old Age Pension Scheme (NOAPS)
- (B) Integrated Care Development Services
- (C) Day Care centers for Alzheimer's
- (D) National Service Scheme
- (E) Respite Care Homes and Continuous Care Homes

Choose the correct answer from the options given below :

- (A) (B), (C), (D) only
- (B) (A), (C), (D) only
- (C) (B), (D), (E) only
- (D) (A), (C), (E) only

Ans :

- (D) (A), (C), (E) only

The National Old Age Pension Scheme (NOAPS) provides financial assistance to the elderly (A). Specialized facilities like Day Care centers for Alzheimer's patients (C) and Respite/Continuous Care Homes (E) cater to their specific health and social needs. ICDS (B) focuses on children and mothers, while NSS (D) is a youth volunteer program.

- 44.** As per the NCF (2005) publication the guiding principles of ECCE are:

- (A) Play as the basis for learning
- (B) Blend of textual and cultural sources
- (C) Cooking as the basis of education
- (D) Only formal education of interactions
- (E) Health, well being and healthy habits

Choose the correct answer from the options given below :

- (A) (B), (C), (D) only
- (B) (B), (D), (E) only
- (C) (A), (B), (E) only
- (D) (A), (B), (D) only

Ans :

- (C) (A), (B), (E) only

The National Curriculum Framework (NCF) 2005 emphasizes key principles for Early Childhood Care and Education (ECCE). These include recognizing play as a primary method of learning for young children (A), connecting learning to the child's cultural context (B), and focusing holistically on the child's health and well-being (E). Formal-only education (D) is discouraged.

- 45.** Identify the correct options by which market can be segmented :

- (A) Demographic segmentation
- (B) Geographic segmentation
- (C) Psychographic segmentation
- (D) Physiological segmentation
- (E) Religious segmentation

Choose the correct answer from the options given below :

- (A) (A), (D), (C) only
- (B) (A), (B), (C) only
- (C) (B), (C), (D) only
- (D) (D), (E), (A) only

Ans :

(B) (A), (B), (C) only

The primary bases for market segmentation are Demographic (age, gender, income) (A), Geographic (location, climate) (B), and Psychographic (lifestyle, values, personality) (C). Behavioural segmentation is another major type. While religious segmentation (E) can be a sub-part of demographics, physiological (D) is not a standard marketing segmentation category.

46. Match List - I with List - II.

	List - I (Fashion Cycle stage)		List - II (Characteristics)
(A)	Introduction of a style	(I)	Beginning of a new cycle
(B)	Peak of popularity	(II)	Height of popularity
(C)	Decline in popularity	(III)	Launch of a new style in market
(D)	Obsolescence stage	(IV)	Downfall of style

Choose the correct answer from the options given below :

- (A) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)
 (B) (A)-(III), (B)-(II), (C)-(IV), (D)-(I)
 (C) (A)-(II), (B)-(III), (C)-(I), (D)-(IV)
 (D) (A)-(I), (B)-(IV), (C)-(III), (D)-(II)

Ans :

(B) (A)-(III), (B)-(II), (C)-(IV), (D)-(I)
 (A) The introduction stage is the 'launch of a new style in the market'. (B) The peak is the 'height of popularity' when the style is most widely accepted. (C) The decline phase marks the 'downfall of the style's' popularity. (D) The obsolescence stage is when the old style is rejected, marking the end of one cycle and the 'beginning of a new cycle' with a new style.

47. Match List - I with List - II.

	List - I (Year of Development)		List - II (Occurrence of Invention)
(A)	1810	(I)	Louis Pasteur's research on spoilage of wine
(B)	January 2010	(II)	Invention of instant soup mixes and ready to cook items

(C)	1864	(III)	Canning process by Nicolas Appert
(D)	20th century	(IV)	Setting of Mega food processing parks

Choose the correct answer from the options given below:

- (A) (A)-(IV), (B)-(II), (C)-(III), (D)-(I)
 (B) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
 (C) (A)-(I), (B)-(III), (C)-(II), (D)-(IV)
 (D) (A)-(II), (B)-(I), (C)-(IV), (D)-(III)

Ans :

(B) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
 (A) Nicolas Appert invented the canning process around 1810. (B) The scheme for Mega Food Parks in India was significantly promoted and developed around January 2010. (C) Louis Pasteur conducted his groundbreaking research on pasteurization and spoilage in 1864. (D) The 20th century saw the large-scale industrial invention and popularization of convenience foods like instant soup mixes.

48. Match List - I with List - II.

	List - I (Colour Scheme)		List - II (Correct explanation)
(A)	Achromatic	(I)	Colour combination using two or more hues
(B)	Complementary	(II)	One hue and a neutral
(C)	Analogous	(III)	Only neutrals
(D)	Accented Neutral	(IV)	Two hues that lie opposite

Choose the correct answer from the options given below :

- (A) (A)-(IV), (B)-(II), (C)-(I), (D)-(III)
 (B) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)
 (C) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
 (D) (A)-(I), (B)-(IV), (C)-(II), (D)-(III)

Ans :

(C) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
 (A) Achromatic means without colour, so it uses 'only neutrals' like black, white, and grey. (B) Complementary colours are 'two hues that lie opposite' each other on the colour wheel (e.g., red

and green). (C) Analogous colours are adjacent on the colour wheel, so it's a combination of 'two or more hues'. (D) An accented neutral scheme is mostly neutral but includes a small amount of 'one hue' as an accent.

49. Match List - I with List - II.

	List - I (Divisions)		List - II (Activity)
(A)	Merchandising division	(I)	Inventory control
(B)	Finance and control division	(II)	Fashion coordination
(C)	Operational division	(III)	Publicity and public relation
(D)	Sales and Promotion division	(IV)	Customer service and receiving and making of merchandise

Choose the correct answer from the options given below :

- (A) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)
 (B) (A)-(IV), (B)-(I), (C)-(II), (D)-(III)
 (C) (A)-(II), (B)-(I), (C)-(IV), (D)-(III)
 (D) (A)-(I), (B)-(IV), (C)-(III), (D)-(II)

Ans :

(C) (A)-(II), (B)-(I), (C)-(IV), (D)-(III)
 (A) The Merchandising division is responsible for product planning and presentation, including 'fashion coordination'. (B) The Finance and control division manages the company's money, including tasks like 'inventory control' and budgeting. (C) The Operational division handles the day-to-day running of the store, including 'customer service and receiving merchandise'. (D) The Sales and Promotion division is tasked with marketing, including 'publicity and public relations'.

50. Match List - I with List - II.

	List - I (Terminology)		List - II (Correct Description)
(A)	Bowed filling	(I)	Warp yarns having a longer diameter/ smaller diameter
(B)	Kink	(II)	The colour of one area has bled

(C)	Coarse end and fine end	(III)	Filling yarns/ colour patterns having a curvature
(D)	Colour Run	(IV)	A short length of yarn systematically doubled on itself

Choose the correct answer from the options given below :

- (A) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
 (B) (A)-(I), (B)-(II), (C)-(III), (D)-(IV)
 (C) (A)-(III), (B)-(I), (C)-(II), (D)-(IV)
 (D) (A)-(IV), (B)-(III), (C)-(II), (D)-(I)

Ans :

(A) (A)-(III), (B)-(IV), (C)-(I), (D)-(II)
 (A) Bowed filling is a fabric defect where the weft or 'filling yarns have a curvature' instead of being straight. (B) A kink is a fabric defect where a 'short length of yarn is systematically doubled on itself'. (C) Coarse and fine ends refer to a defect where 'warp yarns have a longer/smaller diameter' than normal. (D) A colour run occurs when dye is not fast and 'the colour of one area has bled' into another.

CHAPTER 01

WORK, LIVELIHOOD AND CAREER

SUMMARY

1. INTRODUCTION

Choosing a career is a significant challenge for young people who must first understand their own aptitudes, talents, and interests . To make a well-suited choice that leads to success and satisfaction, it is crucial to explore oneself and various career options . This exploration allows an individual to align their personal strengths with opportunities for both personal benefit and social contribution .

2. WORK AND MEANINGFUL WORK

Work is a fundamental activity through which individuals integrate into society, utilize their unique skills, and develop their identity . It is a central part of daily life, influenced by factors like education, health, age, and economic returns . While most people work to earn money, work also serves as a source of personal identity and self-esteem . Meaningful work is defined as an activity that is useful to society, enjoyable for the worker, and allows for the use of one's skills, creativity, and judgment . Such work, performed in a positive environment, contributes to personal growth, confidence, and self-worth . The ideal work life is an expression of one's potential and aspirations, paving the way for a lifelong career .

3. WORK, CAREERS AND LIVELIHOODS

Work encompasses a set of activities with intended outcomes, which is not limited to paid employment but can include entrepreneurship, volunteerism, and community work . Livelihood refers to the means by which a person supports themselves to meet basic needs . A career, on the other hand, is a dynamic and lifelong process of managing roles, learning, and balancing work with personal life

to achieve a personally determined future . Work can be viewed from three perspectives:

- **As a job:** Primarily a source of income for sustenance .
- **As a career:** A path for professional advancement in status, pay, and responsibility .
- **As a calling:** A source of satisfaction derived from the work itself, driven by inner passion .

4. TRADITIONAL OCCUPATIONS OF INDIA

India has a rich and diverse culture with a history of numerous traditional occupations .

- **Agriculture:** As India's primary occupation, farming is the largest source of employment, especially in rural areas . India is a leading producer of various crops, fruits, vegetables, and spices like cashew nuts, coconuts, milk, and tea .
- **Handicrafts:** A significant traditional occupation, Indian arts and crafts such as woodcraft, pottery, metal craft, weaving, and embroidery are popular internationally . These skills were traditionally passed down through generations within families and communities .
- **Cuisine:** India's diverse and flavorful cuisine has become a source of livelihood for many, from street vendors to high-end restaurants .
- **Visual Arts:** Historically supported by temples and princely rulers, India's visual arts, including architecture, sculpture, and painting, reflect its religious and cultural diversity .

Despite this rich heritage, traditional occupations face challenges from mass-produced goods, illiteracy, and inadequate financial services, necessitating interventions in design, training, and preservation .

5. WORK, AGE AND GENDER

The age and gender of the workforce significantly influence personal and professional dynamics from both individual and societal perspectives .

5.1 Gender Issues in Relation to Work

A distinction is made between ‘sex’, the biological categorization, and ‘gender’, the socially constructed identity that dictates expected behaviors and roles . Traditionally, men were seen as breadwinners and women as homemakers, but these roles are evolving . In India, women have always been active in production, especially in agriculture, animal husbandry, and construction .

5.2 Issues and Concerns Related to Women and Work

Despite their contributions, women often remain powerless and are denied decision-making freedom . The work women do at home is rarely valued as an economic activity . Women entering the external workforce face a “double burden,” as they are still expected to manage household chores and caregiving . Key issues include declining labor market opportunities due to the need for new skills, stress, safety at the workplace, and the need for maternity benefits and childcare support .

5.3 Constitutional Rights, Acts and The State Initiatives

The Constitution of India guarantees equality of opportunity in employment for all citizens under Article 16 (1) and prohibits discrimination based on sex . Several acts, such as the Factories Act of 1948 and the Equal Remuneration Act, safeguard women’s rights at work . Government initiatives have evolved from a welfare-based approach to one focused on equality and development, with the establishment of women’s cells and working groups to enhance employment opportunities .

5.4 Kasturba Gandhi Balika Vidyalaya (KGBV)

The KGBV scheme, now part of the Samagra Shiksha Abhiyaan, aims to provide residential schooling for out-of-school girls from disadvantaged rural sections up to the elementary level, and has been extended to Class XII to ensure equitable education .

5.5 Woman Entrepreneur

Kiran Mazumdar Shaw, Chairperson of Biocon India Ltd., is a prominent example of a successful woman entrepreneur who has transformed her company into an integrated biopharmaceutical enterprise .

5.6 Organised Efforts for Empowerment of Women

Shri Mahila Griha Udyog Lijjat Papad is a prime example of a women’s organization that provides employment and promotes self-reliance . Started in 1959, it has grown into a massive enterprise with a sales turnover of 1,600 crores annually, empowering about 45,000 women across India .

6. ATTITUDES AND APPROACHES TO WORK, LIFE SKILLS AND QUALITY OF WORK LIFE

6.1 Attitudes and Approaches to Work

An individual’s attitude significantly influences their job satisfaction . A positive perception of one’s work as a source of energy, fulfillment, and learning leads to greater satisfaction, whereas focusing solely on negative comparisons can lead to dissatisfaction .

6.2 Quality of Work Life

Quality of Work Life (QWL) is an organizational concept that treats employees as valuable assets and aims to meet their social, psychological, and economic needs . A healthy work environment is created by providing adequate attention to employee needs, fostering a positive climate, ensuring fairness, motivating individuals, and offering opportunities for self-development .

6.3 Life Skills for Livelihood

Life skills are abilities that enable individuals to adapt and behave positively to effectively handle life’s demands and challenges . The World Health Organisation identifies ten core skills: self-awareness, empathy, communication, interpersonal relationships, decision making, problem-solving, creative thinking, critical thinking, coping with emotions, and coping with stress . These skills are crucial for personal and social well-being .

6.4 Improving One’s Own Work Life

Individuals can enhance their work life by developing healthy personal habits, being empathetic and compassionate towards colleagues, fostering teamwork, maintaining professional

ethics, and being responsive rather than reactive to situations . Flexibility, adaptability, and turning challenges into learning experiences are vital for growth and fulfillment .

7. ESSENTIAL SOFT SKILLS AT WORKPLACE

Key soft skills essential for workplace success include:

- **Working Productively:** Applying effective work habits and attitudes with enthusiasm .
- **Learning Effectively:** Continuously acquiring new knowledge and skills to keep pace with advancements .
- **Communicating Clearly:** Using appropriate writing, speaking, and listening skills .
- **Working Cooperatively:** Collaborating with others to complete tasks and solve problems .
- **Thinking Critically and Creatively:** Applying analytical and innovative thinking .

8. WORK, ETHICS AND DIGNITY OF LABOUR

Dignity of labor means taking pride in any work one does, regardless of its perceived status . Every person deserves respect for their work, as it contributes to society's betterment . Workplace conduct should be guided by values (desirable beliefs) and ethics (rules of conduct) . Adhering to ethics reduces waste, increases morale, and boosts productivity .

9. ERGONOMICS

Ergonomics, also known as Human Factors Engineering, is the science of designing the work environment to fit the worker . Its primary goal is to create working conditions that are safe, acceptable, and optimal for productivity by considering worker capacity, task demands, and the work environment . The benefits of ergonomics include reduced risk of injury, increased productivity, fewer errors, and improved worker morale .

10. ENTREPRENEURSHIP

Entrepreneurship is the process of creating a new and innovative enterprise, product, or service . An entrepreneur is a risk-taker who is innovative, creative, and organized, using their skills to turn novel ideas into reality . This can range from small, part-time projects to major undertakings that create many jobs . Social entrepreneurship is a form that focuses on achieving social good and benefiting underserved communities .

10.1 CHARACTERISTICS OF ENTREPRENEURS

Successful entrepreneurs typically possess several key attributes:

- Willingness to work hard .
- Knowledge and skills for planning and implementation .
- Management skills for finances, materials, personnel, and time .
- Courage to take calculated risks .
- Ability to handle multiple tasks, cope with setbacks, and learn necessary skills .
- Strong negotiation, networking, and communication skills .

MULTIPLE CHOICE QUESTION

1. What is the primary significance of exploring one's own aptitudes, talents, and personal preferences before choosing a career path?
(A) To guarantee a high salary and financial returns in the future.
(B) To select a career that is currently popular among peers.
(C) To make an informed choice that leads to personal success and satisfaction.
(D) To fulfill the career aspirations that parents have planned.

Ans :

(C) To make an informed choice that leads to personal success and satisfaction.

Identifying personal strengths and preferences is crucial for selecting a career that aligns with one's personality and goals. This self-awareness allows for a choice that brings not just financial success but also genuine fulfillment and a sense of accomplishment, contributing to overall life satisfaction.

2. Which statement best defines 'work' in its broadest sense?
(A) An activity performed exclusively to acquire money for leisure.
(B) An essential activity undertaken for a purpose or out of necessity.
(C) A task performed only by adults within a formal organizational setup.
(D) A daily routine that is unrelated to personal identity or growth.

Ans :

(B) An essential activity undertaken for a purpose or out of necessity.

Work is fundamentally an activity that humans undertake to achieve a specific goal, fulfill a need, or contribute to society. This definition encompasses paid jobs, household chores, volunteerism, and any purposeful effort, going beyond purely financial motivations.

3. Which of the following is NOT listed as a factor influencing the type of work undertaken by people?

- (A) Education and health
- (B) Family background and age
- (C) Globalisation and geographic location
- (D) Universal basic income

Ans :

- (D) Universal basic income

The type of work people do is influenced by various personal and external factors like education, age, health, family, location, and economic opportunities. Universal basic income is a socio-economic policy concept, not a direct factor influencing an individual's choice of work type.

4. How does work contribute to an individual's self-esteem?

- (A) By serving as a catalyst for developing a personal identity.
- (B) By providing a fixed daily schedule and routine tasks.
- (C) By offering financial rewards irrespective of performance.
- (D) By isolating the individual from societal contributions.

Ans :

- (A) By serving as a catalyst for developing a personal identity.

Engaging in work allows individuals to use their unique talents and skills, which fosters a sense of purpose and identity. This development of a personal identity and the feeling of contributing meaningfully are key factors that boost an individual's self-esteem and confidence.

5. Which of the following statements accurately reflects the broader impact of work?

- (A) Work primarily benefits the individual financially and has no societal impact.
- (B) The only significant contribution of work is to the employing organization's profits.

(C) Work benefits the self, the employer, and impacts the quality of life in society.

(D) The value of work is solely determined by the amount of money earned.

Ans :

(C) Work benefits the self, the employer, and impacts the quality of life in society.

Work has a multi-faceted impact, contributing to personal well-being and financial gain, enhancing the organization's success, and ultimately influencing the quality of life and functioning of the broader society.

6. What defines 'meaningful work'?

- (A) Work that requires minimal effort and offers maximum financial returns.
- (B) Work that is useful to society, done responsibly, and is enjoyable.
- (C) Work that is prestigious and provides a high symbol of status and power.
- (D) Work that involves a simple task or duty with a sense of obligation.

Ans :

(B) Work that is useful to society, done responsibly, and is enjoyable.

Meaningful work is characterized by its societal utility, the responsibility with which it is performed, and the enjoyment it brings to the worker. It often allows for the use of skills, creativity, and judgment, leading to personal and professional satisfaction.

7. What is the primary distinction between a 'job' and a 'career'?

- (A) A job is long-term, while a career is a short-term engagement.
- (B) A job is for earning money, while a career involves unpaid volunteer work.
- (C) A job requires continuous learning, while a career does not require skill updates.
- (D) A job is work for its own sake, while a career is a path of growth and excellence.

Ans :

(D) A job is work for its own sake, while a career is a path of growth and excellence.

A job is often viewed as a means to an end, primarily for income. A career, however, is a long-term professional journey driven by a desire to excel, develop, and achieve success within a chosen field, making it more than just a job.

8. In the modern context, why is continuous learning and skill upgradation important for a successful career?
- (A) It is necessary to keep pace with changing demands and achieve success.
 - (B) It is a legal requirement mandated by all employers.
 - (C) It primarily helps in switching jobs frequently for higher salaries.
 - (D) It stops being important after early adulthood and initial job placement.

Ans :

(A) It is necessary to keep pace with changing demands and achieve success.

The modern work environment is dynamic. To remain relevant, achieve progressive success, and build a strong career, it is crucial to continually upgrade skills and update knowledge, as simply getting a job is no longer sufficient.

9. What does the term 'livelihood' denote?
- (A) A lifelong process of managing personal and professional roles.
 - (B) The means and occupation by which a person supports oneself to meet basic needs.
 - (C) A specific task or duty that entails only a sense of obligation.
 - (D) An activity undertaken solely for intellectual stimulation without financial gain.

Ans :

(B) The means and occupation by which a person supports oneself to meet basic needs.

Livelihood refers to the occupation, work, or other means through which an individual earns enough to sustain their life, meet essential needs, and support their chosen lifestyle. It is the practical and economic aspect of sustaining oneself.

10. In the anecdote of the three men breaking boulders, the third man who said, "I am carving a statue out of this big stone," represents which perspective on work?
- (A) Work as a job
 - (B) Work as a livelihood
 - (C) Work as a duty
 - (D) Work as a calling

Ans :

(D) Work as a calling

The third man saw his work not just as a task (job) or a means to earn (livelihood), but as part of a larger vision to become a sculptor.

This perspective, where work is driven by inner passion and a sense of higher purpose, is defined as a 'calling'.

11. What has been the major traditional occupation for a large proportion of India's population due to suitable climatic conditions?
- (A) Handicrafts
 - (B) Fishing
 - (C) Agriculture
 - (D) Mining

Ans :

(C) Agriculture

Due to favorable climatic conditions across most parts of the country and a large rural population, agriculture has historically been and continues to be a primary occupation and the largest source of employment for millions in India.

12. Which of the following statements about farming in India is correct?
- (A) A considerable proportion of farmers are involved in farming on small plots.
 - (B) All farmers in India own large plots of land and earn substantial profits.
 - (C) Farming is limited to subsistence crops and does not include cash crops.
 - (D) Tea, coffee, and rubber have no significant economic importance for the country.

Ans :

(A) A considerable proportion of farmers are involved in farming on small plots.

A significant number of Indian farmers work on small land plots, which they may not even own, often leading to marginal production that is sometimes insufficient even for their own families.

13. India is the world's largest producer of which of the following sets of commodities?
- (A) Wheat, rice, and corn
 - (B) Tea, coffee, and rubber
 - (C) Cotton, jute, and silk
 - (D) Cashew nut, coconut, and milk

Ans :

(D) Cashew nut, coconut, and milk

India holds the top position globally in the production of several commodities, including cashew nuts, coconuts, milk, ginger, turmeric, and black pepper, highlighting its agricultural diversity and strength.

14. Which of the following is NOT mentioned as an example of a traditional Indian craft?
- (A) Woodcraft and pottery
 - (B) Weaving and embroidery
 - (C) Glass and paper craft
 - (D) 3D printing and robotics

Ans :

(D) 3D printing and robotics

The text lists numerous traditional Indian crafts such as woodcraft, pottery, metal craft, weaving, and paper craft. 3D printing and robotics are modern technologies and not part of India's traditional occupational heritage.

15. How was the knowledge of traditional crafts and manufacturing skills typically transferred through generations in India?
- (A) Through formal vocational schools and public workshops.
 - (B) Through government-sponsored national training programs.
 - (C) Through home-based training from one generation to the next.
 - (D) Through written manuals and widely published guidebooks.

Ans :

(C) Through home-based training from one generation to the next.

The transfer of indigenous knowledge and skills for traditional occupations was primarily a family affair, passed down within the household from older generations to younger ones, with techniques often being closely guarded secrets.

16. Historically, who were the two main categories of patrons that supported artists and artisans in India?
- (A) Large Hindu temples and princely rulers
 - (B) Foreign traders and merchants
 - (C) The general public and rural communities
 - (D) Non-governmental organizations and social activists

Ans :

(A) Large Hindu temples and princely rulers

The patronage system that supported the flourishing of visual arts in India was historically dominated by two main sources: the large, wealthy Hindu temples and the rulers of the various princely states across the country.

17. Which factor is identified as a major constraint causing the decline of traditional occupations in the modern context?
- (A) A lack of interest from international markets in Indian crafts.
 - (B) Illiteracy and inadequate finance and marketing services.
 - (C) An overabundance of skilled artisans in the country.
 - (D) Government policies that exclusively promote mass-produced goods.

Ans :

(B) Illiteracy and inadequate finance and marketing services.

The decline of traditional arts and crafts is attributed to several constraints, including illiteracy among artisans, socio-economic backwardness, and the lack of efficient financial and marketing support systems to help them compete with mass-produced goods.

18. Consider the following areas requiring intervention for the revival of traditional occupations:
1. Design innovations and use of eco-friendly raw materials.
 2. Protection of intellectual property rights (IPR).
 3. Establishment of training facilities and preservation of traditional knowledge.
- Which of the above are crucial for sustaining indigenous skills?
- (A) 1 and 2 only
 - (B) 2 and 3 only
 - (C) 1 and 3 only
 - (D) 1, 2, and 3

Ans :

(D) 1, 2, and 3

Reviving traditional occupations requires a multi-pronged approach, including innovating designs, using sustainable materials, establishing training centers, preserving knowledge, and protecting intellectual property rights to ensure artisans can thrive in the modern market.

19. Match the traditional craft in Column I with its associated state in Column II.

	Column I		Column II
1.	Shola Craft	a.	Maharashtra
2.	Channapatna Dolls	b.	Kerala
3.	Warli Painting	c.	Odisha

4.	Coconut Craft	d.	Karnataka
----	---------------	----	-----------

- (A) 1-c, 2-d, 3-a, 4-b
- (B) 1-d, 2-c, 3-b, 4-a
- (C) 1-c, 2-a, 3-d, 4-b
- (D) 1-b, 2-d, 3-a, 4-c

Ans :

- (A) 1-c, 2-d, 3-a, 4-b

The text and accompanying images associate Shola craft with Odisha , Channapatna dolls with Karnataka , Warli painting with Maharashtra , and Coconut craft with Kerala , matching the correct pairs.

- 20.** What is the primary challenge confronting Indian society regarding traditional occupations in the modern democratic milieu?
- (A) To eliminate all traditional occupations in favor of modern jobs.
 - (B) To maintain the diversity of occupations without the caste-based hierarchy.
 - (C) To ensure that traditional skills are only passed down within specific families.
 - (D) To export all traditional craft items and not use them domestically.

Ans :

- (B) To maintain the diversity of occupations without the caste-based hierarchy.

The key challenge for modern India is to preserve its rich diversity of traditional occupations while dismantling the historical, rigid, and hierarchical caste-based divisions associated with them, promoting equality and opportunity for all in a democratic society.

- 21.** What is the key difference between the terms ‘sex’ and ‘gender’?
- (A) ‘Sex’ is based on social identity, while ‘gender’ is based on biology.
 - (B) The terms ‘sex’ and ‘gender’ are identical in meaning and used interchangeably.
 - (C) ‘Sex’ refers to biological categorization, while ‘gender’ is based on social identity.
 - (D) ‘Sex’ applies only to men, while ‘gender’ applies only to women.

Ans :

- (C) ‘Sex’ refers to biological categorization, while ‘gender’ is based on social identity.
- ‘Sex’ refers to the biological and physiological characteristics that define humans as male or female, based on genetics and reproductive organs. ‘Gender’, in contrast, is a social construct,

referring to the roles, behaviors, and identities a society considers appropriate for them.

- 22.** The statement “Gender is socially constructed” implies that:
- (A) Gender roles are determined by biological factors and are unchangeable.
 - (B) Gender identity is a personal choice made without any social influence.
 - (C) The differences between men and women are purely physical.
 - (D) Society and culture determine how different genders are expected to behave.

Ans :

- (D) Society and culture determine how different genders are expected to behave.

This concept means that societal norms, traditions, and cultural practices shape the expectations for behavior and roles assigned to individuals based on their gender, which are passed down through generations and are not biologically predetermined.

- 23.** What is often described as the “double burden” for women who participate in the workforce outside the home?
- (A) The need to manage both a high-stress job and a long daily commute.
 - (B) The pressure to excel professionally while still being the primary caregiver at home.
 - (C) The challenge of earning a supplementary income while paying high taxes.
 - (D) The difficulty of working in two different part-time jobs simultaneously.

Ans :

- (B) The pressure to excel professionally while still being the primary caregiver at home.

The “double burden” refers to the situation where working women are expected to fulfill their professional responsibilities while also managing most, if not all, of their traditional household chores and primary caregiving duties for the family.

- 24.** Why is it argued that work performed by women as homemakers should be valued as an economic activity?
- (A) Because it is a legal requirement under the Indian Constitution.
 - (B) Because it generates direct monetary income for the family.
 - (C) Because it helps other family members perform their roles efficiently.

(D) Because it is the only type of work women are expected to perform.

Ans :

(C) Because it helps other family members perform their roles efficiently.

The domestic work performed by women, though unpaid, is a significant economic contribution because it supports the family structure and enables other members to be more productive in their own paid work, embodying the principle that 'money saved is money earned'.

25. Which of the following is NOT an issue or concern related to women and work in modern India?

- (A) Stress and adverse effects on health.
- (B) Lack of opportunities due to the need for skilled workers.
- (C) Need for maternity benefits and social support for child care.
- (D) Equal standing in the market even when they are sole bread-earners.

Ans :

(D) Equal standing in the market even when they are sole bread-earners.

Even when women are the sole earners for their families, they often do not have a similar standing or recognition in the labor market compared to men, and their earnings are frequently considered supplementary rather than primary.

26. What does Article 16 (1) of the Constitution of India guarantee to all citizens?

- (A) The equality of opportunity in matters of public employment.
- (B) The right to free education for all women.
- (C) The right to form labor unions in any industry.
- (D) The right to maternity leave with full pay for two years.

Ans :

(A) The equality of opportunity in matters of public employment.

Article 16 (1) of the Indian Constitution ensures that all citizens have an equal opportunity for employment or appointment to any office under the State, prohibiting discrimination on grounds of religion, race, caste, sex, descent, place of birth, or residence.

27. According to the Factories Act of 1948, under what condition must a crèche be maintained in an industry?

(A) If more than 10 women are employed.

(B) If more than 30 women are employed.

(C) If the factory operates for more than 8 hours a day.

(D) If the industry is involved in hazardous processes.

Ans :

(B) If more than 30 women are employed.

Section 48 of the Factories Act, 1948, mandates that any factory employing more than 30 women workers must establish and maintain a suitable crèche for the use of their children under the age of six years.

28. Assertion (A): The Equal Remuneration Act was implemented in India.

Reason (R): The Act aims to provide equal wages for the same work or work of a similar nature, combating gender-based pay discrimination.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The Equal Remuneration Act was enacted precisely for the purpose stated in the reason: to ensure men and women receive equal pay for performing the same or similar work, thus preventing wage discrimination based on gender.

29. What was the paradigm shift observed in the approach to women's development programmes over the decades?

- (A) From an equality approach to a welfare approach.
- (B) From a development approach to a protectionist approach.
- (C) From a welfare approach to a development approach.
- (D) From an economic approach to a purely social approach.

Ans :

(C) From a welfare approach to a development approach.

The approach to women's programmes has evolved significantly over time. It started with a welfare-based model, then shifted to focusing

on equality of opportunity, and finally moved towards a comprehensive development approach, recognizing women as crucial human resources for national growth.

- 30.** What is the primary objective of the Kasturba Gandhi Balika Vidyalaya (KGBV) scheme?
- (A) To establish residential schools for girls from disadvantaged sections.
 - (B) To provide vocational training to urban women entrepreneurs.
 - (C) To offer higher education scholarships to all female students.
 - (D) To create sports facilities exclusively for girls in metropolitan areas.

Ans :

(A) To establish residential schools for girls from disadvantaged sections.

The KGBV scheme was initiated to set up residential schools at the elementary level for girls belonging to rural, remote, and disadvantaged sections of society who are either dropouts or have never been enrolled in school.

- 31.** Identify the correct pair of the woman entrepreneur and the company she founded.
- (A) Indira Nooyi - Biocon India Ltd.
 - (B) Chanda Kochhar - Lijjat Papad
 - (C) Falguni Nayar - Sarva Shiksha Abhiyaan
 - (D) Kiran Mazumdar Shaw - Biocon India Ltd.

Ans :

(D) Kiran Mazumdar Shaw - Biocon India Ltd.
Kiran Mazumdar Shaw, an eminent biotechnologist and entrepreneur, is the founder, Chairperson, and Managing Director of Biocon India Ltd., a pioneering biopharmaceutical company in India.

- 32.** Arrange the following stages of approaches to women's programmes in their correct chronological order of evolution.
- 1. Development Approach
 - 2. Welfare Approach
 - 3. Equality of Opportunity Approach
- (A) 1, 2, 3
 - (B) 2, 3, 1
 - (C) 3, 1, 2
 - (D) 2, 1, 3

Ans :

(B) 2, 3, 1

The programmes for women's development followed a clear evolutionary path, beginning with a welfare-based approach in the earlier decades,

moving towards ensuring equality of opportunity, and finally adopting a more holistic development approach.

- 33.** An individual's experience of job satisfaction is considerably influenced by their attitude. This implies that:
- (A) A person's perception and outlook are key to their happiness at work.
 - (B) Job satisfaction depends entirely on the salary received.
 - (C) Only the tasks involved in a job determine the level of satisfaction.
 - (D) Comparing one's job with others always leads to greater satisfaction.

Ans :

(A) A person's perception and outlook are key to their happiness at work.

Job satisfaction is not solely determined by external factors like salary or tasks. An individual's personal attitude and how they perceive their work situation play a crucial role in whether they feel satisfied and fulfilled.

- 34.** What is the core principle behind the 'Quality of Work Life' (QWL) approach in organizations?
- (A) Employees should focus only on economic needs to be productive.
 - (B) Employee satisfaction is irrelevant to the organization's performance.
 - (C) Organizations should prioritize physical work conditions over all else.
 - (D) Employees are considered 'assets' and their satisfaction is important.

Ans :

(D) Employees are considered 'assets' and their satisfaction is important.

The Quality of Work Life (QWL) approach is built on the belief that employees are valuable assets. It posits that people perform better and are more motivated when their social and psychological needs are met, alongside their economic needs.

- 35.** Which of the following is NOT a strategy for creating a healthy work environment?
- (A) Paying attention to individual employee's needs and expectations.
 - (B) Fostering team spirit and delegating wherever necessary.
 - (C) Focusing exclusively on organisational needs over employee well-being.
 - (D) Providing an attractive, safe, and challenging job environment.

Ans :

(C) Focusing exclusively on organisational needs over employee well-being.

A healthy work environment is created by balancing organizational needs with the needs and expectations of individual employees. Ignoring employee well-being in favor of purely organizational goals would create a negative, not a healthy, work environment.

- 36.** According to the World Health Organisation (WHO), what are life skills?
- (A) Abilities related only to professional and technical expertise.
- (B) Skills that are only applicable during childhood and adolescence.
- (C) Abilities for adaptive and positive behaviour to deal with life's challenges.
- (D) Innate talents that cannot be learned or developed through experience.

Ans :

(C) Abilities for adaptive and positive behaviour to deal with life's challenges.

WHO defines life skills as abilities that enable individuals to adapt to and behave positively in various situations, allowing them to effectively manage the demands and challenges of everyday life across their entire life span.

- 37.** Match the life skill category in Column I with the specific skills in Column II as identified by experts.

	Column I		Column II
1.	Thinking Skills	a.	Empathy, Interpersonal relationships
2.	Social Skills	b.	Coping with stress, Coping with emotions
3.	Coping Skills	c.	Decision making, Problem solving
4.	Self-Awareness	d.	Understanding one's own strengths and weaknesses

- (A) 1-c, 2-a, 3-b, 4-d
- (B) 1-b, 2-d, 3-a, 4-c
- (C) 1-c, 2-b, 3-d, 4-a
- (D) 1-d, 2-a, 3-c, 4-b

Ans :

- (A) 1-c, 2-a, 3-b, 4-d

The core life skills are often grouped. Decision making and problem solving are thinking skills. Empathy and interpersonal relationships are

social skills. Coping with stress and emotions are coping skills. Self-awareness stands as a foundational skill.

- 38.** Which of the following are considered essential soft skills at the workplace?
1. Communicating clearly and precisely.
 2. Working cooperatively to complete tasks and resolve conflicts.
 3. Thinking critically and applying principles of analytical thinking.
 4. Working in isolation to avoid conflicts and disagreements.
- (A) 1, 2, and 4 only
- (B) 1, 3, and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

- (C) 1, 2, and 3 only

Essential workplace soft skills include clear communication, cooperative teamwork for problem-solving and support, and the ability to think critically and creatively. Working in isolation is generally counterproductive to a collaborative and effective work environment.

- 39.** What does the principle of 'Dignity of Labour' imply?
- (A) Only high-paying, white-collar jobs deserve respect.
- (B) A person's worth is determined by their financial status.
- (C) Certain types of work are inherently inferior and degrading.
- (D) Every person deserves respect, regardless of the type of work they do.

Ans :

- (D) Every person deserves respect, regardless of the type of work they do.

Dignity of labour is the philosophy that all types of jobs are respected equally, and no occupation is considered superior. It emphasizes that every individual, through their work, contributes to society and deserves respect, irrespective of their position or the nature of their tasks.

- 40.** What is the primary difference between 'values' and 'ethics' in a professional context?
- (A) Values are formal rules, while ethics are personal beliefs.
- (B) Values are beliefs about what is good, while ethics are formal rules of conduct.

- (C) Values apply only to personal life, while ethics apply only to work life.
- (D) Values are universal, while ethics are specific to an individual's preference.

Ans :

(B) Values are beliefs about what is good, while ethics are formal rules of conduct.

Values are personal or societal beliefs and preferences about what is desirable or good. Ethics, on the other hand, are a more formal system of rules or standards of conduct explicitly adopted by a group or profession, like professional ethics.

- 41.** The examples of Mahatma Gandhi cleaning his own toilet and Abraham Lincoln rising from a humble background are used to illustrate what concept?
- (A) Quality of Work Life
- (B) Entrepreneurship
- (C) Social Responsibility
- (D) Dignity of Labour

Ans :

(D) Dignity of Labour

The actions of Mahatma Gandhi and the life of Abraham Lincoln are cited as powerful examples of the dignity of labour, demonstrating that no work is menial or degrading and that one should take pride in whatever one does.

- 42.** What is the primary goal of ergonomics?
- (A) To adapt the work environment to the worker.
- (B) To adapt the worker to the work environment.
- (C) To increase work hours for higher productivity.
- (D) To reduce the number of employees in a workplace.

Ans :

(A) To adapt the work environment to the worker. Ergonomics is the scientific discipline concerned with designing and arranging things people use so that the people and things interact most efficiently and safely. Its primary goal is to "fit the job to the person" rather than the other way around.

- 43.** The term 'ergonomics' is derived from which two Greek words?
- (A) 'Ergon' (work) and 'nomics' (natural laws)
- (B) 'Ergo' (therefore) and 'nomos' (law)
- (C) 'Ergon' (energy) and 'nomics' (study)
- (D) 'Eros' (love) and 'nomos' (custom)

Ans :

(A) 'Ergon' (work) and 'nomics' (natural laws)
The term ergonomics originates from the Greek words 'ergon', meaning work, and 'nomos', meaning natural laws. This etymology reflects its focus on the natural laws or principles governing work and human performance.

- 44.** Which statement accurately describes a key benefit of applying ergonomics in the workplace?
- (A) It often leads to an increase in workplace injuries and accidents.
- (B) It can improve productivity by reducing unnecessary or awkward exertions.
- (C) It primarily focuses on improving morale without affecting efficiency.
- (D) It is a costly intervention that rarely improves the quality of work.

Ans :

(B) It can improve productivity by reducing unnecessary or awkward exertions.

A major benefit of ergonomics is that by reducing awkward postures and unnecessary physical effort, it not only enhances safety and comfort but also reduces the time required to complete tasks, thereby directly improving productivity and efficiency.

- 45.** Which of the following are considered the four pillars of the science of ergonomics?
1. Anthropometry
 2. Biomechanics
 3. Physiology
 4. Industrial Psychology
- (A) 1, 2, and 3 only
- (B) 1, 3, and 4 only
- (C) 2, 3, and 4 only
- (D) 1, 2, 3, and 4

Ans :

(D) 1, 2, 3, and 4

The science of ergonomics is multidisciplinary, resting on four key pillars: anthropometry (body measurements), biomechanics (musculoskeletal forces), physiology (how the body functions), and industrial psychology (human behavior and well-being at work).

- 46.** An office provides chairs with adjustable height and five legs for stability to prevent back pain and accidents. This is a practical application of which field?

- (A) Human Resource Management
- (B) Quality of Work Life
- (C) Social Entrepreneurship
- (D) Ergonomics

Ans :

- (D) Ergonomics

Designing office furniture, like chairs, to be adjustable to the user's body measurements and stable to prevent falls is a classic example of applying ergonomic principles to create a safer, more comfortable, and more efficient work environment.

- 47.** What is an 'entrepreneur'?
- (A) A person who works for a fixed salary in a large corporation.
 - (B) A person who can take risks for converting a novel idea into reality.
 - (C) A person who avoids innovation and follows traditional business methods.
 - (D) A person who manages an existing enterprise without making any changes.

Ans :

- (B) A person who can take risks for converting a novel idea into reality.

An entrepreneur is defined as an individual who identifies an opportunity, takes on the associated risks, and organizes resources to create a new, innovative enterprise, product, or service, turning a novel idea into a viable business.

- 48.** Which of the following is NOT a characteristic of a successful entrepreneur?
- (A) Willingness to work hard and take calculated risks.
 - (B) Ability to learn new skills and handle multiple tasks.
 - (C) Expecting easy solutions and being inflexible during crises.
 - (D) Having good communication, negotiation, and networking skills.

Ans :

- (C) Expecting easy solutions and being inflexible during crises.

Successful entrepreneurs are characterized by their realism, flexibility, and ability to cope with setbacks. Expecting easy solutions and being rigid in the face of challenges are traits that are contrary to the entrepreneurial mindset required for success.

- 49.** What is the primary focus of 'social entrepreneurship'?

- (A) Doing social good and achieving large-scale benefits for society.
- (B) Maximizing financial profit for shareholders.
- (C) Creating enterprises that cater exclusively to luxury markets.
- (D) Revitalizing existing organizations without any social mission.

Ans :

- (A) Doing social good and achieving large-scale benefits for society.

Social entrepreneurship is a specific mindset and initiative where the main goal is to create enterprises that address social problems and achieve significant, sustainable benefits for a specific group or for society at large, rather than focusing on profit.

- 50.** How is the success of social entrepreneurship primarily measured?

- (A) By the amount of profit generated and market share captured.
- (B) By the number of employees hired by the enterprise.
- (C) By the social benefits and impact created for the community.
- (D) By the level of government funding received by the organization.

Ans :

- (C) By the social benefits and impact created for the community.

Unlike traditional entrepreneurship, the success of a social enterprise is not gauged by its financial profits but by its social impact—the positive and sustainable changes it brings to the community or the specific social issue it addresses.

- 51.** Which of the following best contrasts work perceived as a 'job' versus work perceived as a 'career'?

- (A) A job focuses on income, while a career focuses on professional advancement.
- (B) A job is energetic and fulfilling, while a career is obligatory.
- (C) A job provides self-actualization, while a career provides only a salary.
- (D) A job requires dedication, while a career requires only minimal effort.

Ans :

(A) A job focuses on income, while a career focuses on professional advancement. When work is seen as a job, satisfaction primarily comes from the income earned. When viewed as a career, satisfaction comes from professional growth, higher status, and increased responsibility, indicating a focus on long-term advancement.

52. Which two life skills are paired together under the 'coping skills' category identified by experts?
- (A) Decision making and problem solving
 - (B) Empathy and interpersonal relationships
 - (C) Creative thinking and critical thinking
 - (D) Coping with emotions and coping with stress

Ans :

(D) Coping with emotions and coping with stress
In the list of ten core life skills identified by experts, 'coping with emotions' and 'coping with stress' are grouped together as essential abilities for managing personal feelings and external pressures effectively.

53. Which statement accurately describes the traditional transfer of occupational knowledge in India?
- (A) Knowledge was openly shared through public forums and institutions.
 - (B) Skills were documented in detailed manuals for public access.
 - (C) It was primarily home-based, with skills passed down within families.
 - (D) Foreign experts were invited to conduct training workshops.

Ans :

(C) It was primarily home-based, with skills passed down within families.
The traditional method for passing on occupational know-how, such as crafting techniques, was through an informal, home-based system where skills and secrets were transferred from one generation to the next within the family or a close-knit group.

54. A person who works long hours and dedicates significant energy to their work with the expectation of future gains like promotions and higher status views their work as a:
- (A) Job
 - (B) Calling
 - (C) Hobby
 - (D) Career

Ans :

(D) Career

A person who invests considerable time and energy in their work as a temporary cost for future professional gains, such as advancement in position, pay, and status, is viewing their work as a career path.

55. Why is it crucial for an individual to have a keen interest and find enjoyment in their chosen career path?
- (A) It is the only way to achieve a high social status.
 - (B) It helps sustain enthusiasm to carry on the work long-term.
 - (C) It guarantees that the job will be easy and without challenges.
 - (D) It is a legal requirement for employment in most fields.

Ans :

(B) It helps sustain enthusiasm to carry on the work long-term.

Having a genuine interest and finding enjoyment in one's work is vital because it fuels the motivation and enthusiasm needed to persevere through challenges and sustain a lifelong career, especially when financial responsibilities are involved.

56. Match the perception of work in Column I with its primary source of satisfaction in Column II.

	Column I		Column II
1.	Work as a Job	a.	Satisfaction from the work itself
2.	Work as a Career	b.	Satisfaction from the income earned
3.	Work as a Calling	c.	Satisfaction from professional advancement
4.	Meaningful Work	d.	Satisfaction from societal contribution and enjoyment

- (A) 1-b, 2-c, 3-a, 4-d
- (B) 1-a, 2-b, 3-d, 4-c
- (C) 1-d, 2-a, 3-b, 4-c
- (D) 1-b, 2-d, 3-c, 4-a

Ans :

(A) 1-b, 2-c, 3-a, 4-d

The text specifies that job satisfaction comes from income , career satisfaction from advancement , satisfaction in a calling from the work itself , and satisfaction in meaningful work from its utility and enjoyability .

- 57.** A healthy work environment can be created by focusing on all of the following EXCEPT:
- (A) Ensuring fair treatment and motivating individuals.
 - (B) Providing a safe work environment and fostering team spirit.
 - (C) Matching the person to the task and delegating where necessary.
 - (D) Creating a rigid hierarchy with no employee involvement.

Ans :

(D) Creating a rigid hierarchy with no employee involvement.

Creating a healthy work environment involves empowering employees, fostering teamwork, ensuring fairness, and encouraging involvement. A rigid hierarchy with no employee participation would be counterproductive to building a positive and motivating atmosphere.

- 58.** Which of the following describes “Human Factors Engineering”?
- (A) Social Entrepreneurship
 - (B) Quality of Work Life
 - (C) Ergonomics
 - (D) Dignity of Labour

Ans :

(C) Ergonomics

Ergonomics is also referred to as ‘Human Factors Engineering’. This alternative name highlights its focus on engineering and designing systems, products, and environments to be compatible with human abilities and limitations.

- 59.** What is the primary objective of the Shri Mahila Griha Udyog Lijjat Papad organization?
- (A) To export bakery products to international markets.
 - (B) To provide employment to women for a dignified livelihood.
 - (C) To get recognition as a large-scale corporate industry.
 - (D) To manufacture and sell only detergent powder and cakes.

Ans :

(B) To provide employment to women for a dignified livelihood.

The founding objective of Shri Mahila Griha Udyog Lijjat Papad is to provide self-employment opportunities to women, enabling them to earn a

respectable and dignified livelihood and become self-reliant.

- 60.** Assertion (A): In the modern world, education and learning should not stop in early adulthood. Reason (R): To achieve career success, it is very important to continually upgrade skills and update knowledge to keep pace with developments.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that learning must be lifelong is directly supported by the reason. The dynamic nature of the modern workplace requires continuous skill and knowledge enhancement to build a successful and progressive career.

- 61.** Identify the incorrect pair from the following options related to traditional occupations and regions.
- (A) Channapatna Dolls - Karnataka
 - (B) Warli Painting - Maharashtra
 - (C) Shola Craft - Kerala
 - (D) Bamboo Craft - Assam

Ans :

(C) Shola Craft - Kerala

The text and images clearly associate Shola craft with Odisha, not Kerala. Channapatna dolls are from Karnataka, Warli painting from Maharashtra, and Bamboo craft from Assam, making the other pairs correct.

- 62.** When faced with a reprimand from a senior at work, what is considered a responsive, rather than reactive, approach?
- (A) Immediately justifying one’s actions with emotional outbursts.
 - (B) Ignoring the reprimand and continuing work as usual.
 - (C) Examining the situation realistically and taking corrective measures.
 - (D) Blaming other colleagues for the mistake that was made.

Ans :

(C) Examining the situation realistically and taking corrective measures.

Being responsive means calmly and realistically assessing the situation. If the reprimand is deserved, the appropriate response is to take corrective action, which may include apologising, rather than reacting defensively or emotionally.

- 63.** Which of the following is NOT one of the six important professional values mentioned in the text?

(A) Service and social justice
(B) Dignity and worth of all persons
(C) Importance of human relationships
(D) Pursuit of individual profit

Ans :

(D) Pursuit of individual profit

The text lists six key professional values: service, social justice, dignity and worth of all persons, importance of human relationships, and integrity. The pursuit of individual profit is not listed among these core professional values.

- 64.** What is a 'career' from a life management perspective?

(A) A lifelong process involving managing roles and maintaining balance.
(B) A single, static job held for one's entire working life.
(C) A sequence of unrelated jobs taken for financial gain only.
(D) A professional activity that excludes personal life roles and learning.

Ans :

(A) A lifelong process involving managing roles and maintaining balance.

A career is a dynamic, lifelong process of managing various life roles, including paid and unpaid work, learning, and personal life. It involves making transitions to move towards a personally determined and fulfilling future.

- 65.** How does work as a 'calling' differ from work as a 'job'?

(A) A calling is driven by external rewards, while a job is driven by internal passion.
(B) A calling provides satisfaction from the work itself, while a job provides satisfaction from income.
(C) A calling is a temporary engagement, while a job is a lifelong commitment.
(D) A calling requires no energy, while a job is physically and mentally demanding.

Ans :

(B) A calling provides satisfaction from the work itself, while a job provides satisfaction from income.

A person who views their work as a calling derives inherent satisfaction and fulfillment directly from the activity. In contrast, someone who views their work as a job primarily finds satisfaction in the financial compensation it provides.

- 66.** Which of the following statements about India's traditional cuisine is accurate?

(A) It is uniform across all regions with no local variations.
(B) It has not emerged as a significant source of livelihood.
(C) It has become a source of livelihood from street vendors to 5-star hotels.
(D) Traditional foods and masalas are not in demand in other countries.

Ans :

(C) It has become a source of livelihood from street vendors to 5-star hotels.

India's diverse and flavorful cuisine has become a major source of livelihood for countless people, spanning the entire spectrum from local street food vendors to specialty restaurants and high-end hotels, with many items also being in demand internationally.

- 67.** What is the consequence of the social and cultural practices that determine how genders are expected to behave?

(A) It creates and establishes norms of gender role identity.
(B) It leads to the complete elimination of gender differences.
(C) It ensures that all individuals have complete freedom of expression.
(D) It results in roles being based purely on biological capabilities.

Ans :

(A) It creates and establishes norms of gender role identity.

Societal and cultural practices create expectations for behavior based on gender. Over time, these expectations become established norms, constructing a gender role identity that individuals are expected to conform to from an early age.

- 68.** Which of the following government initiatives was subsumed under the Samagra Shiksha Abhiyaan?

(A) Shri Mahila Griha Udyog Lijjat Papad

- (B) National Plan of Action (NPA) for women
 (C) Equal Remuneration Act
 (D) Kasturba Gandhi Balika Vidyalaya (KGBV)

Ans :

(D) Kasturba Gandhi Balika Vidyalaya (KGBV)
 The Kasturba Gandhi Balika Vidyalaya (KGBV) scheme, which was initially under the Sarva Shiksha Abhiyaan (SSA), is now subsumed under the Samagra Shiksha Abhiyaan, the overarching school education programme of the Government of India.

- 69.** Match the Act in Column I with the protection it provides to women workers in Column II.

	Column I		Column II
1.	Factories Act, 1948	a.	Provides for maternity benefits.
2.	Equal Remuneration Act	b.	Guarantees equal wages for similar work.
3.	Maternity Benefit Act, 1961	c.	Ensures protection in various industrial sectors.
4.	Constitution of India	d.	Guarantees equality of opportunity in employment.

- (A) 1-c, 2-b, 3-a, 4-d
 (B) 1-d, 2-a, 3-b, 4-c
 (C) 1-c, 2-d, 3-a, 4-b
 (D) 1-a, 2-c, 3-d, 4-b

Ans :

- (A) 1-c, 2-b, 3-a, 4-d

The Factories Act provides general protection in industries ; the Equal Remuneration Act ensures equal pay ; the Maternity Benefit Act provides for maternity leave and benefits ; and the Constitution (Article 16) guarantees equal opportunity in public employment .

- 70.** Why is it important for an employer to create an environment where employees feel a sense of loyalty?
- (A) Because it is a legal requirement in all industries.
 (B) To ensure employees never ask for a salary increase.
 (C) Because employee loyalty is linked to organisational development.
 (D) To reduce the need for providing a safe workplace.

Ans :

(C) Because employee loyalty is linked to organisational development.

Wise employers recognize that people are their most valuable resource. Fostering an environment where employees feel loyal is crucial because this loyalty translates into better performance, lower turnover, and overall organisational growth and development.

- 71.** Consider the following statements about improving one's work life:

1. Maintaining a healthy lifestyle with adequate sleep and diet.
2. Interacting with colleagues with empathy and compassion.
3. Being inflexible and reactive to situations and feedback.

Which of these are recommended tips for enhancing work life?

- (A) 1 and 2 only
 (B) 2 and 3 only
 (C) 1 and 3 only
 (D) 1, 2, and 3

Ans :

- (A) 1 and 2 only

To improve one's work life, it is recommended to maintain healthy personal habits and to be empathetic and compassionate in interactions with colleagues . Being inflexible and reactive is counterproductive and not a recommended approach .

- 72.** In the context of life skills, what does “experiential learning” mean?

- (A) Learning skills by reading about them in a textbook.
 (B) Acquiring skills through direct experience and practice.
 (C) Being taught skills through classroom lectures and notes.
 (D) Memorizing a list of skills for an examination.

Ans :

- (B) Acquiring skills through direct experience and practice.

Life skills are competencies that cannot be effectively taught in a traditional classroom setting. They are best acquired through experiential learning, which involves hands-on practice, active participation, and learning from real-life experiences.

- 73.** What is the primary benefit of workplace ethics for an organization?
- It increases waste of time and organizational resources.
 - It decreases employee morale and confidence.
 - It eliminates the need for any management supervision.
 - It reduces waste and increases employee productivity.

Ans :

(D) It reduces waste and increases employee productivity.

A strong ethical framework at the workplace helps to reduce the waste of time and money while simultaneously boosting employee morale, confidence, and overall productivity, creating a more efficient and positive environment.

- 74.** A company redesigns its assembly line to reduce the need for workers to bend and stretch awkwardly, which also speeds up the production process. This is an effective application of:
- Social justice principles
 - Ergonomics
 - The Equal Remuneration Act
 - Volunteerism

Ans :

(B) Ergonomics

This scenario is a direct application of ergonomics. By modifying the task to reduce awkward postures, the company improves worker safety and well-being, and as a direct consequence, it also improves productivity and reduces the time taken to complete the task.

- 75.** Why are entrepreneurs described as being “goal-oriented”?
- They are motivated to seek and adopt more effective means of doing things.
 - They prefer to wait for instructions before taking any action.
 - They are content with existing processes and avoid making changes.
 - They focus on completing tasks without considering the final objective.

Ans :

(A) They are motivated to seek and adopt more effective means of doing things.

An entrepreneur’s goal-oriented nature is reflected in their proactive approach. They are driven to initiate action and are constantly seeking more

effective and innovative ways to accomplish their objectives and achieve their vision.

- 76.** Match the skill in Column I with its description in Column II.

	Column I		Column II
1.	Working Productively	a.	Applying analytical thinking and being innovative.
2.	Learning Effectively	b.	Applying effective work habits, zeal, and dynamism.
3.	Communicating Clearly	c.	Conveying information precisely through writing and speaking.
4.	Thinking Critically	d.	Acquiring information and using learning tools and strategies.

- 1-d, 2-c, 3-b, 4-a
- 1-b, 2-d, 3-c, 4-a
- 1-c, 2-a, 3-d, 4-b
- 1-b, 2-c, 3-a, 4-d

Ans :

(B) 1-b, 2-d, 3-c, 4-a

The text defines working productively as applying effective habits and zeal. Learning effectively involves acquiring information and using learning strategies. Communicating clearly is about precise conveyance of ideas. Thinking critically involves analysis and innovation.

- 77.** The set of activities undertaken for a purpose, creating new relations, and using unique talents to grow and develop one’s identity is known as:
- Leisure
 - Recreation
 - Work
 - Play

Ans :

(C) Work

This comprehensive description aligns with the definition of work, which encompasses activities performed with a purpose that allow for skill utilization, personal growth, and the development of a sense of belonging and identity within society.

- 78.** Which of the following is an example of work that may not provide a monetary income but is still considered valuable?

- (A) A salaried position in a multinational corporation.
- (B) The work done by family members for the family.
- (C) A high-paying job in the financial sector.
- (D) A task performed solely for financial gain.

Ans :

- (B) The work done by family members for the family.

The text emphasizes that work is not always about monetary earnings. The contributions made by family members for the household or by volunteers are valuable forms of work, even though they are unpaid.

- 79.** What is the primary function of an entrepreneur according to the provided text?
- (A) To change the pattern of production or design through innovation.
 - (B) To maintain the existing patterns of production without change.
 - (C) To work for a fixed income under an established organization.
 - (D) To follow a predetermined career path set by others.

Ans :

- (A) To change the pattern of production or design through innovation.

The core function of an entrepreneur is to be an agent of change, altering existing production patterns or product designs through inventions, innovations, or new technological methods to create something new or improve upon the old.

- 80.** Which statement best describes the current trend regarding traditional occupations in India?
- (A) They are thriving due to strong government protection from competition.
 - (B) There is a complete lack of demand for Indian arts and crafts in international markets.
 - (C) All artisans have access to modern finance and excellent marketing services.
 - (D) They are gradually losing out to mass-produced goods, leaving artisans with meager incomes.

Ans :

- (D) They are gradually losing out to mass-produced goods, leaving artisans with meager incomes.

In the modern context, traditional occupations and their artisans face significant challenges. They

are struggling to compete with mass-produced items, which often results in very low incomes for the artisans and a gradual erosion of these valuable skills.

- 81.** According to the text, what can significantly affect an individual's perception of their job and lead to dissatisfaction if not considered realistically?
- (A) The number of holidays provided by the company.
 - (B) The employee's personal attitude and their comparisons with others.
 - (C) The location of the workplace and commuting time.
 - (D) The brand reputation of the organization they work for.

Ans :

- (B) The employee's personal attitude and their comparisons with others.

An individual's perception, heavily influenced by their attitude and the comparisons they make with others, can greatly impact job satisfaction. Unrealistic comparisons, such as focusing only on salary without considering responsibilities, can lead to feelings of dissatisfaction that may not be justified.

- 82.** What is the fundamental belief behind the Quality of Work Life (QWL) approach?
- (A) People perform better when they are satisfied with their work conditions.
 - (B) Economic needs are the only motivators for employees in any job.
 - (C) Employee satisfaction has no direct impact on overall productivity.
 - (D) The primary goal is to minimize employee interaction to avoid conflicts.

Ans :

- (A) People perform better when they are satisfied with their work conditions.

The Quality of Work Life (QWL) approach is founded on the principle that employees are valuable assets who perform better when they are satisfied with their job. It emphasizes that meeting their social and psychological needs is as important as meeting their economic needs for motivation.

- 83.** Which of the following is a key component of a healthy and positive work environment?
- (A) Paying minimal attention to the individual employee's needs.

- (B) Creating a competitive climate that discourages teamwork.
- (C) Being fair, treating people equally, and fostering team spirit.
- (D) Making the job monotonous and removing all challenges.

Ans :

(C) Being fair, treating people equally, and fostering team spirit.

A healthy work environment is created by focusing on positive aspects like treating people equally and fairly, motivating individuals, and encouraging team spirit and responsibility, which boosts morale and productivity.

- 84.** An employer provides regular training, gives constructive feedback, and offers praise for good work. This approach is aimed at achieving which of the following?
- (A) Reducing the company's expenditure on salaries.
 - (B) Increasing the workload of all the employees.
 - (C) Creating a system of strict rules and punishments.
 - (D) Developing employees and boosting their morale.

Ans :

(D) Developing employees and boosting their morale.

Strategies like providing training, feedback, encouragement, and praise are part of a developmental approach to management. These actions help build employee confidence, enhance skills, and boost morale, making employees feel valued and loyal to the organization.

- 85.** Why is it important to look at life holistically rather than focusing only on the pay package?
- (A) To ensure one can live life happily and avoid future regrets.
 - (B) Because a high pay package guarantees happiness and fulfillment.
 - (C) Because non-monetary aspects have no impact on overall well-being.
 - (D) To prioritize work above family, friends, and free time always.

Ans :

(A) To ensure one can live life happily and avoid future regrets.

A holistic view of life, which considers free time, family, and friends, is crucial. Focusing solely on

salary can lead to neglecting other important life aspects, potentially causing remorse and regret later in life.

- 86.** Life skills are essential because they enable individuals to:
- (A) perform highly specialized technical tasks in a specific job.
 - (B) deal effectively with the demands and challenges of everyday life.
 - (C) pass academic examinations with the highest possible scores.
 - (D) avoid all forms of social interaction and interpersonal relationships.

Ans :

(B) deal effectively with the demands and challenges of everyday life.

Life skills are defined as abilities for adaptive and positive behavior that equip individuals to handle the diverse demands, challenges, and situations they encounter in their daily lives effectively and with resilience.

- 87.** Which of the following pairs is NOT part of the ten core sets of life skills identified by the World Health Organisation?
- (A) Self-awareness and Empathy
 - (B) Decision making and Problem solving
 - (C) Technical proficiency and Financial management
 - (D) Creative thinking and Critical thinking

Ans :

(C) Technical proficiency and Financial management

The ten core life skills identified by WHO include thinking, social, and coping skills like self-awareness, empathy, decision making, and critical thinking. Technical proficiency and financial management are specific skills, not part of this core set of psychosocial competencies.

- 88.** According to the conceptual model, which factors enable the development of healthy life skills?
1. Appropriate and adequate knowledge
 2. Positive attitudes
 3. Strong personal values
 4. Avoidance of all challenges
- (A) 1, 2, and 4 only
 - (B) 1, 3, and 4 only
 - (C) 2, 3, and 4 only
 - (D) 1, 2, and 3 only

Ans :

(D) 1, 2, and 3 only

The development of healthy life skills, which leads to positive health behavior, is enabled by a foundation of appropriate knowledge, positive attitudes, and strong values. These factors contribute to the psychosocial competence needed to navigate life effectively.

89. What is the significance of being empathetic and compassionate at the workplace?

- (A) It yields positive outcomes and generates goodwill all around.
- (B) It complicates tasks and hinders career development.
- (C) It is irrelevant as there is no interdependence among colleagues.
- (D) It is a sign of weakness in a professional environment.

Ans :

(A) It yields positive outcomes and generates goodwill all around.

An empathetic and compassionate approach in workplace interactions is vital. Given the interdependence among colleagues, such positive attitudes generate goodwill, foster better collaboration, and contribute to more successful and rewarding outcomes for everyone involved.

90. An employee who helps colleagues, works collaboratively in a team, and recognizes their contributions is likely to experience:

- (A) Increased workplace conflicts.
- (B) A feeling of isolation from peers.
- (C) Greater job satisfaction and reward.
- (D) Slower career development.

Ans :

(C) Greater job satisfaction and reward.

Working as a collaborative team member, helping others, and acknowledging their achievements creates a positive feedback loop. This behavior tends to lead to greater personal satisfaction, mutual rewards, and the successful completion of tasks.

91. Which of the following is NOT considered an essential soft skill for the workplace?

- (A) Applying the principles of analytical and creative thinking.
- (B) Having the ability to multitask and possess forethought.
- (C) Being rigid and unwilling to adapt to changing situations.

(D) Applying appropriate writing, speaking, and listening skills.

Ans :

(C) Being rigid and unwilling to adapt to changing situations.

Essential workplace skills include critical thinking, communication, and the ability to multitask. In contrast, flexibility and adaptability are core abilities essential for success; rigidity would be a significant disadvantage in any dynamic work arena.

92. What does the Universal Declaration of Human Rights state about human dignity?

- (A) Dignity is earned through wealth and financial status.
- (B) Only individuals in high-ranking positions have dignity.
- (C) Human dignity is determined by the type of work a person does.
- (D) All human beings are born free and equal in dignity and rights.

Ans :

(D) All human beings are born free and equal in dignity and rights.

The Universal Declaration of Human Rights posits a fundamental principle that all human beings are inherently free and equal in dignity and rights from birth, irrespective of their status, wealth, or occupation.

93. In the context of ergonomics, what is anthropometry?

- (A) The study of musculoskeletal activities and forces exerted.
- (B) The study of human behavior and well-being in the workplace.
- (C) The study of the body's physiological responses to work.
- (D) The study of human body size and measurements.

Ans :

(D) The study of human body size and measurements.

Anthropometry, one of the four pillars of ergonomics, is the scientific study of the measurements and proportions of the human body. This data is crucial for designing tools, furniture, and workspaces that fit the user.

⌈
└

- 94.** How does the application of ergonomics lead to increased job satisfaction?
- (A) By creating stressful and hazardous working conditions.
 - (B) By increasing the number of errors and the need to rework.
 - (C) By providing comfortable working conditions for employees.
 - (D) By increasing absenteeism due to work-related ill health.

Ans :

(C) By providing comfortable working conditions for employees.

Ergonomics contributes to job satisfaction by designing workstations and tasks to be more comfortable and less physically stressful. When employees can work in comfort and without pain, their morale and satisfaction with their job naturally improve.

- 95.** Identify the correct pair of an entrepreneurial characteristic and its description.
- (A) Risk Aversion - Avoiding all potential business failures.
 - (B) Calculated Risk-Taking - Having the courage to take well-assessed risks.
 - (C) Inflexibility - Sticking to a single plan despite challenges.
 - (D) Poor Communication - Inability to negotiate or build partnerships.

Ans :

(B) Calculated Risk-Taking - Having the courage to take well-assessed risks.

A key characteristic of an entrepreneur is not to be reckless, but to have the courage to take calculated risks. This involves assessing potential outcomes and making informed decisions rather than avoiding all risks or acting impulsively.

- 96.** What is 'Social Entrepreneurship'?
- (A) An initiative that focuses on achieving large-scale social benefits.
 - (B) An enterprise focused solely on maximizing financial returns for investors.
 - (C) A business that operates exclusively through social media marketing.
 - (D) A government agency that provides social welfare services.

Ans :

(A) An initiative that focuses on achieving large-scale social benefits.

Social entrepreneurship is a form of enterprise that prioritizes achieving significant and sustainable social good for a specific group or society at large. Its success is measured by social impact rather than profit.

- 97.** Assertion (A): Meaningful work enables a worker to use their skills and judgment.
Reason (R): An ideal work environment stimulates positive professional relationships and brings recognition or rewards.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(B) Both A and R are true, but R is not the correct explanation of A.

Both statements are true and describe aspects of meaningful work and an ideal workplace. However, the ideal environment (R) is a condition that supports meaningful work, not the direct explanation for why meaningful work allows skill use (A).

- 98.** Arrange the following government approaches to women's development in the correct historical sequence.
1. Development Approach
 2. Equality of Opportunity
 3. Welfare Approach
- (A) 3, 2, 1
 - (B) 1, 3, 2
 - (C) 2, 1, 3
 - (D) 3, 1, 2

Ans :

(A) 3, 2, 1

The text outlines a clear paradigm shift in government programmes for women. The initiatives began with a welfare approach, then evolved to focus on equality of opportunity, and finally progressed to a comprehensive development approach.

- 99.** Match the term in Column I with its appropriate description in Column II.

	Column I		Column II
1.	Livelihood	a.	A lifelong path of professional growth and excellence.

2.	Career	b.	A specific set of activities with an intended outcome.
3.	Work	c.	The means by which a person supports oneself to meet basic needs.
4.	Job	d.	An involvement in work primarily for financial gain or obligation.

- (A) 1-c, 2-a, 3-b, 4-d
 (B) 1-d, 2-b, 3-a, 4-c
 (C) 1-c, 2-d, 3-b, 4-a
 (D) 1-b, 2-a, 3-d, 4-c

Ans :

(A) 1-c, 2-a, 3-b, 4-d
 'Livelihood' is the means of support. 'Career' is a lifelong professional path. 'Work' is a broad set of activities with an outcome. 'Job' is often viewed as work for pay or out of obligation.

- 100.** The term 'sex' refers to the biological categorization based on genetics and reproductive organs, which is primarily due to:
 (A) Social and cultural norms.
 (B) Personal identity and choice.
 (C) Expected behaviors and roles in society.
 (D) XX and XY or other chromosome combinations.

Ans :

(D) XX and XY or other chromosome combinations.
 'Sex' is a biological construct. The fundamental biological difference between males and females is determined at the genetic level by chromosome combinations, most commonly XX for females and XY for males.

- 101.** Which of the following are benefits of applying ergonomics in the workplace?
 1. Reduces risk of injury and accidents.
 2. Increases employee productivity.
 3. Decreases morale of workers.
 4. Increases mistakes and the need for rework.
 (A) 1 and 2 only
 (B) 3 and 4 only
 (C) 1, 2, and 3 only
 (D) 2, 3, and 4 only

Ans :

(A) 1 and 2 only
 Applying ergonomic principles leads to several benefits, including a reduced risk of injury and

accidents, increased productivity, and enhanced efficiency. It improves, rather than decreases, worker morale and reduces, rather than increases, mistakes.

- 102.** A young professional consistently updates her skills by taking online courses and attending workshops to keep pace with industry changes. This behavior demonstrates an understanding of which modern career concept?
 (A) That a job is just a means of making a living.
 (B) The importance of continuous learning for career growth.
 (C) That skills learned in college are sufficient for a lifetime.
 (D) The principle of 'Dharma' or duty in one's work.

Ans :

(B) The importance of continuous learning for career growth.
 In the modern world, getting a job is not enough for long-term success. This professional's actions reflect the crucial understanding that one must continually upgrade skills and knowledge to build a successful career and keep pace with a dynamic environment.

- 103.** The fact that weaving styles and traditional costumes in India are often region-specific is primarily because they are:
 (A) Designed to be universally suitable for any climate.
 (B) Mandated by a single national design authority.
 (C) Suitable for the region-specific climate and lifestyle.
 (D) A recent development influenced by global fashion trends.

Ans :

(C) Suitable for the region-specific climate and lifestyle.
 The diversity in traditional Indian textiles and costumes is a reflection of practical adaptation. Each state's typical woven fabrics and attire were developed to be suitable for the local climate and the lifestyle of its people.

- 104.** Which of the following statements about women's work in India is incorrect?
 (A) In rural India, women are extensively involved in agriculture.
 (B) Women's unpaid work as homemakers has

- always been valued as an economic activity.
- (C) In urban areas, many women are employed as domestic labor.
- (D) Despite contributing to family income, women are often denied decision-making power.

Ans :

(B) Women's unpaid work as homemakers has always been valued as an economic activity. A significant issue highlighted is that the work performed by women as homemakers, despite its immense value in supporting the family, has rarely been counted or valued as an economic activity or contribution.

- 105.** Which working group was constituted by the Planning Commission to enhance employment opportunities for women in rural areas?
- (A) A working group on women's employment.
- (B) A working group on child labour prevention.
- (C) A steering committee on urban infrastructure.
- (D) A task force on industrial safety standards.

Ans :

(A) A working group on women's employment. The Planning Commission constituted a specific working group on women's employment. Its mandate was to focus on enhancing job opportunities for rural women and to review existing labor laws pertaining to women's work.

- 106.** When a person looks forward to challenges and handles difficult tasks with a positive outlook, it leads to:
- (A) Increased stress and job dissatisfaction.
- (B) A feeling of being overburdened and exhausted.
- (C) The perception that the work is meaningless.
- (D) A sense of feeling good about their job and personal happiness.

Ans :

(D) A sense of feeling good about their job and personal happiness. A positive attitude, where challenges are welcomed and difficult tasks are handled with a good outlook, directly contributes to a person feeling good about their job. This positive perception enhances personal happiness and the overall quality of working life.

- 107.** The ability to respond by examining a situation realistically and calmly, rather than reacting with justifications and emotional outbursts, is an example of being:

- (A) Reactive
- (B) Unethical
- (C) Inflexible
- (D) Responsive

Ans :

(D) Responsive
Being responsive, as opposed to reactive, involves a thoughtful and calm assessment of a situation. It implies a measured reaction based on a realistic examination of facts, rather than an immediate, defensive, or emotional outburst.

- 108.** A person who starts a low-cost food delivery service for underserved elderly people in their community, with the main goal of providing them with nutritious meals, is best described as a(n):
- (A) Corporate entrepreneur
- (B) Social entrepreneur
- (C) Financial investor
- (D) Government employee

Ans :

(B) Social entrepreneur
This person's venture is focused on achieving a social good—providing nutritious food to a disadvantaged group—rather than maximizing profit. This aligns perfectly with the definition of a social entrepreneur, who uses business principles to create social change.

- 109.** Identify the correct pairing of the concept and its primary characteristic.
- (A) Job - Focus on professional ascendancy and status.
- (B) Career - Satisfaction comes from the income earned.
- (C) Calling - Satisfaction is derived from the work itself.
- (D) Livelihood - A source of joy without financial necessity.

Ans :

(C) Calling - Satisfaction is derived from the work itself. The defining characteristic of viewing work as a 'calling' is that the individual derives intrinsic satisfaction directly from performing the work, feeling an inner drive or higher direction to do it.

- 110.** To revive traditional occupations, interventions are required in all the following areas EXCEPT:
- (A) Design innovations and packaging.
- (B) Preservation and refinement strategies.
- (C) Use of eco-friendly raw materials.

(D) Discouraging the protection of intellectual property rights.

Ans :

(D) Discouraging the protection of intellectual property rights.

Protecting the intellectual property rights (IPR) of artisans is a crucial intervention needed to sustain traditional occupations. Discouraging it would be detrimental, as it would prevent artisans from benefiting from their unique designs and knowledge.

- 111.** Who is honored with the Padma Shri (1989) and Padma Bhushan (2005) for her work as a successful entrepreneur and technocrat?

(A) Kiran Mazumdar Shaw
(B) Mahatma Gandhi
(C) JRD Tata
(D) Dhirubhai Ambani

Ans :

(A) Kiran Mazumdar Shaw

Kiran Mazumdar Shaw, the chairperson of Biocon India Ltd., received the prestigious Padma Shri in 1989 and the Padma Bhushan in 2005 in recognition of her contributions as a model entrepreneur and successful technocrat.

- 112.** The statement “work is the oil that lubricates the machine of society” suggests that:

(A) Work is an unnecessary and burdensome activity.
(B) Work is a minor activity with little societal impact.
(C) Work is essential for the smooth functioning of society.
(D) Society can function perfectly well without any work.

Ans :

(C) Work is essential for the smooth functioning of society.

This metaphor implies that work is a critical component that enables society to function smoothly and effectively. Just as oil is necessary for a machine to run without friction, the collective work of individuals is essential for social cohesion and progress.

- 113.** A standard, normal, or regular diet is one that:
(A) is designed for a specific medical condition.
(B) includes all food groups and meets the needs of healthy people.
(C) consists only of liquids and soft foods.

(D) is extremely high in spices, fats, and sweets.

Ans :

(B) includes all food groups and meets the needs of healthy people.

A standard or regular diet is a balanced diet that incorporates all essential food groups. It is designed to meet the complete nutritional requirements of a healthy individual, providing adequate energy and nutrients for normal bodily functions.

- 114.** Assertion (A): In ergonomics, it is important that a chair's height is adjustable.

Reason (R): The chair should be adjusted to the user's height and body measurements to prevent issues like back pain.

(A) Both A and R are true, and R is the correct explanation of A.
(B) Both A and R are true, but R is not the correct explanation of A.
(C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The reason provides the direct ergonomic principle for the assertion. A chair's height must be adjustable specifically so that it can be conformed to the individual user's body measurements, thereby ensuring proper posture and preventing musculoskeletal problems like back pain.

- 115.** Match the legislative act or constitutional provision in Column I with its primary purpose in Column II.

	Column I		Column II
1.	Equal Remuneration Act	a.	Mandates crèches in factories with over 30 women.
2.	Factories Act, 1948 (Sec 48)	b.	Guarantees equal pay for work of a similar nature.
3.	Article 16(1) Constitution	c.	Allows state to make special provisions for women & children.
4.	Indian Constitution Empowerment Clause	d.	Guarantees equality of opportunity in public employment.

(A) 1-d, 2-c, 3-a, 4-b

- (B) 1-b, 2-a, 3-d, 4-c
- (C) 1-c, 2-d, 3-b, 4-a
- (D) 1-b, 2-d, 3-a, 4-c

Ans :

- (B) 1-b, 2-a, 3-d, 4-c

The Equal Remuneration Act is for equal pay. Section 48 of the Factories Act mandates crèches. Article 16(1) guarantees equal opportunity in employment. The Constitution also empowers the state to make special provisions for women.

- 116.** The primary reason work can serve as a catalyst for boosting self-esteem is that it:
- (A) provides a way to earn leisure and free time.
 - (B) offers a fixed schedule and daily routine.
 - (C) is an activity that all human beings have to perform.
 - (D) helps in the development of one's personal identity.

Ans :

- (D) helps in the development of one's personal identity.

Work allows individuals to use their unique skills and talents, contributing to their sense of self and purpose. This process of developing a personal identity and recognizing one's capabilities is a powerful catalyst for boosting self-esteem.

- 117.** What is the core function of an entrepreneur?
- (A) To maintain established business practices without any changes.
 - (B) To work as a salaried employee within a large organization.
 - (C) To change a production pattern or product design through innovation.
 - (D) To avoid all forms of financial risk and business ventures.

Ans :

- (C) To change a production pattern or product design through innovation.

The fundamental role of an entrepreneur is to be an innovator and a change agent. They actively seek to alter existing methods of production or product designs by introducing new ideas, technologies, or inventions.

- 118.** Which of the following is NOT one of the ten core life skills listed by the World Health Organisation?
- (A) Interpersonal relationships
 - (B) Problem solving
 - (C) Coping with stress
 - (D) Public speaking

Ans :

- (D) Public speaking

The ten core life skills identified by WHO include interpersonal relationships, problem solving, and coping with stress. Public speaking, while a valuable skill, is not listed as one of these fundamental psychosocial competencies.

- 119.** Which statement accurately reflects the perspective on gender roles presented in the text?
- (A) Gender is socially constructed, and roles are evolving over time.
 - (B) Gender roles are biologically fixed and identical across all cultures.
 - (C) The age-old assigned roles for men and women are not changing.
 - (D) Women have never been engaged in production or marketing in India.

Ans :

- (A) Gender is socially constructed, and roles are evolving over time.

The text states that gender is socially constructed and that traditional roles are not static but are evolving, showing 'continuity with change'. It acknowledges the transition from the old roles of men as breadwinners and women as homemakers.

- 120.** An organization that considers satisfying its employees' social and psychological needs to be as important as their economic needs is practicing the principles of:
- (A) Ergonomics
 - (B) Quality of Work Life (QWL)
 - (C) Social Entrepreneurship
 - (D) Dignity of Labour

Ans :

- (B) Quality of Work Life (QWL)

This approach directly reflects the philosophy of Quality of Work Life (QWL), which holds that motivating employees requires satisfying their social and psychological needs in addition to their financial or economic needs for better performance.

- 121.** Which of the following are listed as essential characteristics for an entrepreneur?
1. Ability to take calculated risks.
 2. Willingness to work hard.
 3. Inability to handle setbacks and failures.
 4. Good communication and negotiation skills.
- (A) 1, 2 and 3 only
 - (B) 2, 3 and 4 only

- (C) 1, 2 and 4 only
- (D) 1, 3 and 4 only

Ans :

- (C) 1, 2 and 4 only

The text lists taking calculated risks , willingness to work hard , and having good communication skills as key entrepreneurial traits. The ability to cope with setbacks and failures is crucial, making statement 3 incorrect.

- 122.** What is the underlying reason for the increasing marginalization of women in the labor market mentioned in the text?
- (A) A need for skilled workers, which has disadvantaged them.
 - (B) A surplus of unskilled labor opportunities.
 - (C) A decline in the need for skilled workers.
 - (D) A government policy to exclude women from the workforce.

Ans :

- (A) A need for skilled workers, which has disadvantaged them.

The text suggests that the increasing demand for skilled workers in the labor market has led to the marginalization of many women, likely due to historical and systemic gaps in access to skill development and training opportunities.

- 123.** Which of the following is NOT one of the ways work can be viewed, as listed in the text?
- (A) A 'job' and a means of making a 'living'.
 - (B) A means of self-development and self-actualization.
 - (C) A source of joy and fulfillment.
 - (D) A mandatory activity with no personal benefit.

Ans :

- (D) A mandatory activity with no personal benefit.

The text presents multiple positive views of work, including it being a job, a means of self-development, a source of joy, and a symbol of status. It does not describe work as a mandatory activity that offers no personal benefit.

- 124.** Identify the incorrect pair of a traditional craft and its raw material.
- (A) Weaving - Cotton/Silk threads
 - (B) Pottery - Clay
 - (C) Woodcraft - Wood
 - (D) Sholapitha craft - Metal

Ans :

- (D) Sholapitha craft - Metal

Sholapitha craft, as the name suggests and is known culturally, uses the pith of the shola plant, a soft, spongy material. It is not a form of metal craft. The other pairs correctly match the craft with its primary raw material.

- 125.** A formal system or set of rules which are explicitly adopted by a group of people, such as a profession, is known as:
- (A) Values
 - (B) Ethics
 - (C) Livelihood
 - (D) Career

Ans :

- (B) Ethics

Ethics are defined as a formal system or a set of rules and standards governing the conduct of a person or the members of a specific group, such as professional or medical ethics.

- 126.** A manager ensures that tasks are designed to be interesting, matches employees to tasks suited to their skills, and provides opportunities for training. This manager is actively promoting:
- (A) A high-stress, low-morale environment.
 - (B) A healthy and positive work environment.
 - (C) An environment with minimal supervision.
 - (D) An environment focused only on profit.

Ans :

- (B) A healthy and positive work environment.
- These actions—making jobs interesting, matching people to tasks, and providing training—are all key strategies for creating a healthy work environment that boosts employee morale, competence, and satisfaction.

- 127.** The main purpose of interventions like design innovations and use of eco-friendly materials for traditional crafts is to:
- (A) Make the crafts more expensive and exclusive.
 - (B) Replace traditional skills with modern technology completely.
 - (C) Help artisans compete in the modern market and sustain their livelihood.
 - (D) Limit the production of crafts to only a few select artisans.

Ans :

- (C) Help artisans compete in the modern market and sustain their livelihood.

Interventions such as design innovation and using sustainable materials are aimed at reviving and sustaining traditional crafts. They help artisans adapt their products to contemporary tastes and ethical standards, enhancing their income generation potential in the modern global market.

- 128.** Which of the following statements is true regarding the organization Shri Mahila Griha Udyog Lijjat Papad?

(A) It was started in 1959 with thousands of members.
(B) It is an organization managed and run exclusively by men.
(C) Its products are limited to only papads.
(D) It is recognized by Khadi and Village Industries (KVIC) as a village industry.

Ans :

(D) It is recognized by Khadi and Village Industries (KVIC) as a village industry.

The text states that in 1966, the Shri Mahila Griha Udyog Lijjat Papad society was registered and also received recognition from the Khadi and Village Industries Commission (KVIC) as a 'village industry'.

- 129.** The abilities for adaptive and positive behavior that enable individuals to deal effectively with the demands of everyday life are called:

(A) Life skills
(B) Technical skills
(C) Academic skills
(D) Occupational skills

Ans :

(A) Life skills

This is the precise definition of life skills provided in the text. They are the psychosocial competencies that help people function effectively, promote well-being, and handle daily challenges across their lifespan.

- 130.** Assertion (A): The work performed by women as homemakers has rarely been valued as an economic activity.

Reason (R): This unpaid domestic work enables other family members to perform their own roles and duties more efficiently.

(A) Both A and R are true, and R is the correct explanation of A.
(B) Both A and R are true, but R is not the correct explanation of A.
(C) A is true, but R is false.

(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that homemaking is undervalued is a key point in the text. The reason explains why it should be valued: because this support work is a crucial contribution that enhances the productivity of other family members, making it an economic enabler.

- 131.** In ergonomics, which of the following is NOT considered a part of the 'task demands'?

(A) Nature and complexity of the task.
(B) Posture and duration required for the task.
(C) Force required to perform the task.
(D) The worker's age and health status.

Ans :

(D) The worker's age and health status.

Task demands include factors like the nature, complexity, force, duration, and posture related to the work itself. The worker's age and health are aspects of 'worker capacity', not the demands of the task.

- 132.** What is the ultimate purpose of acquiring and honing life skills?

(A) To prevent negative health behaviour and promote well-being.
(B) To ensure success in academic examinations only.
(C) To gain proficiency in a single, specific occupation.
(D) To eliminate the need for any formal education.

Ans :

(A) To prevent negative health behaviour and promote well-being.

The development of life skills leads to psychosocial competence, which in turn promotes positive health behaviors and helps prevent negative or unhealthy behaviors. The ultimate goal is to enhance and protect life, health, and well-being.

- 133.** Which of the following accurately describes a challenge faced by Indian agriculture?

(A) All farming is done on large, corporately owned farms.
(B) There is no production of cash crops like tea or coffee.
(C) Many farmers cultivate small plots with poor yields.

(D) India is not a major producer of any agricultural goods.

Ans :

(C) Many farmers cultivate small plots with poor yields.

The text points out that a considerable number of Indian farmers work on small plots of land, many of which they don't own. This often leads to marginal production and poor yields, posing a significant challenge to their livelihood.

- 134.** When an organization considers its employees to be its most valuable resource and invests in creating a positive, supportive work environment, it is demonstrating a commitment to:

- (A) Minimizing operational costs at all expenses.
- (B) Increasing employee turnover rates.
- (C) The principles of Quality of Work Life (QWL).
- (D) The concept of work as just a 'job'.

Ans :

(C) The principles of Quality of Work Life (QWL). This approach, which recognizes employees as valuable assets and focuses on creating a positive environment to boost morale and loyalty, is the essence of the Quality of Work Life (QWL) philosophy.

- 135.** Match the type of work perception in Column I with the illustrative quote from the boulder-breaking anecdote in Column II.

	Column I		Column II
1.	Work as a Job	a.	"I am carving a statue out of this big stone."
2.	Work as a Livelihood	b.	"This is my job, I am breaking these rocks into smaller pieces."
3.	Work as a Calling	c.	"I break rocks to make a living in order to feed my family."
4.	Work as a Career	d.	Visualizing each hammer blow as shaping one's future.

- (A) 1-b, 2-c, 3-a, 4-d
- (B) 1-c, 2-a, 3-d, 4-b
- (C) 1-b, 2-d, 3-a, 4-c
- (D) 1-d, 2-b, 3-c, 4-a

Ans :

- (A) 1-b, 2-c, 3-a, 4-d

The first man simply stated his task, defining it as a 'job'. The second man linked it to supporting his family, defining it as 'livelihood'. The third man saw a higher purpose, defining it as a 'calling'. The visualization of future growth exemplifies a 'career' mindset.

- 136.** A career, being a life management concept, is a lifelong process that involves managing roles and maintaining a balance between:

- (A) Paid work and professional life only.
- (B) Learning and paid work only.
- (C) Personal life roles and leisure activities only.
- (D) Paid and unpaid work, learning, and personal life roles.

Ans :

(D) Paid and unpaid work, learning, and personal life roles.

A career is a holistic, lifelong process. It encompasses the management and balancing of multiple aspects of life, including paid and unpaid work, continuous learning, and various personal and family roles.

- 137.** The primary consequence of the "double burden" on working women is that:

- (A) They are placed under significant physical and mental strain.
- (B) They have more leisure time than their male counterparts.
- (C) They are exempt from all household responsibilities.
- (D) Their professional careers advance more rapidly.

Ans :

(A) They are placed under significant physical and mental strain.

Juggling full-time professional responsibilities with the bulk of household and caregiving duties places a "double burden" on women, often leading to increased stress, fatigue, and potential adverse effects on their health and well-being.

- 138.** Which of the following is NOT a correct statement regarding the need for interventions in traditional occupations?

- (A) There is a need for design innovations to meet modern tastes.
- (B) The use of eco-friendly raw materials is an important strategy.
- (C) Traditional knowledge must be preserved and conserved.

(D) Artisans should be discouraged from seeking intellectual property rights.

Ans :

(D) Artisans should be discouraged from seeking intellectual property rights.

The protection of intellectual property rights (IPR) is listed as a crucial intervention needed to support artisans and sustain traditional occupations. Discouraging it would prevent them from protecting and profiting from their unique creations.

- 139.** A manager who frequently gives praise, offers encouragement, and provides support to employees is fostering a positive work climate primarily through the use of:
- (A) Financial incentives
 - (B) Negative reinforcement
 - (C) Positive reinforcement
 - (D) Punitive measures

Ans :

(C) Positive reinforcement

These actions—praise, encouragement, and support—are all forms of positive reinforcement. This management style aims to encourage desirable behaviors and boost morale by acknowledging and rewarding employee efforts and successes, creating a positive climate.

- 140.** The need for a “paradigm shift” in the way gender issues related to work are approached requires a change in:
- (A) Constitutional laws only.
 - (B) The mindset and attitude of society.
 - (C) The number of women in the workforce.
 - (D) The types of jobs available in the market.

Ans :

(B) The mindset and attitude of society.

The text concludes its discussion on gender issues by stating that to achieve dramatic transformation, the societal mindset has to become modern and the attitude and approach towards gender issues related to work must change.

- 141.** Which of the following are examples of how work can be viewed?
1. As ‘Dharma’ or an expression of one’s true Self.
 2. As a means of self-development and self-actualization.
 3. As a symbol of status, power, and control.
 4. As an activity solely for recreation with no

obligations.

- (A) 1, 2, and 4 only
- (B) 1, 3, and 4 only
- (C) 2, 3, and 4 only
- (D) 1, 2, and 3 only

Ans :

(D) 1, 2, and 3 only

The text provides a comprehensive list of how work can be perceived, which includes viewing it as ‘Dharma’, a means of self-actualization, and a symbol of status. It is always seen as purposeful, not solely for recreation.

- 142.** What fundamental shift in thinking is required to empower women in society?
- (A) Considering the work they do at home as valued and equivalent to paid work.
 - (B) Recognizing that their earnings are only supplementary.
 - (C) Believing that they do not require any decision-making power.
 - (D) Limiting their participation in the workforce outside the home.

Ans :

(A) Considering the work they do at home as valued and equivalent to paid work.

A crucial step towards women’s empowerment is the societal recognition that the unpaid work women perform at home is a significant contribution. Valuing this work as equivalent to paid economic activity is essential for them to gain their rightful place.

- 143.** Identify the correct pair of a life skill and its corresponding category.
- (A) Critical thinking - Social Skill
 - (B) Problem solving - Thinking Skill
 - (C) Empathy - Coping Skill
 - (D) Interpersonal relationships - Coping Skill

Ans :

(B) Problem solving - Thinking Skill

In the categorization of the ten core life skills, problem solving, along with decision making and creative/critical thinking, is classified as a thinking skill. Empathy and interpersonal relationships are social skills, not coping skills.

- 144.** The science of ergonomics is NOT set on which of the following pillars?
- (A) Anthropometry
 - (B) Biomechanics
 - (C) Financial Accounting

(D) Industrial Psychology

Ans :

(C) Financial Accounting

The four pillars supporting the science of ergonomics are anthropometry, biomechanics, physiology, and industrial psychology. Financial accounting is a business discipline and is not a foundational pillar of ergonomics.

- 145.** A person feels that their work is derived from an inner or higher direction and gains satisfaction from the work itself, regardless of pay or position. This person views work as a:

(A) Job
(B) Career
(C) Burden
(D) Calling

Ans :

(D) Calling

This description perfectly matches the concept of work as a 'calling'. The individual feels an inner drive to do the work, and the primary source of satisfaction is the act of doing the work itself, not external factors like money or status.

- 146.** The ability to work with others to complete tasks, solve problems, resolve conflicts, and offer support is known as:
- (A) Working productively
(B) Working cooperatively
(C) Learning effectively
(D) Thinking creatively

Ans :

(B) Working cooperatively

This is the definition of the soft skill 'working cooperatively'. It emphasizes the importance of teamwork, collaboration, and mutual support to achieve common goals in a workplace setting.

- 147.** Which ministry in the Government of India created 'women's cells' to look into the problems of women workers?
- (A) Ministry of Finance
(B) Ministry of Home Affairs
(C) Ministry of Labour
(D) Ministry of Education

Ans :

(C) Ministry of Labour

To address the specific problems and challenges faced by women workers, women's cells were established within the Ministry of Labour.

- 148.** Assertion (A): The modern economy has catapulted traditional Indian craft items into the global market.

Reason (R): These craft items now earn the country considerable foreign exchange.

- (A) Both A and R are true, and R is the correct explanation of A.
(B) Both A and R are true, but R is not the correct explanation of A.
(C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that the modern economy has globalized Indian crafts is true. The reason directly explains a major consequence of this: these items are now significant export commodities that earn the country valuable foreign exchange.

- 149.** Why is it important for an individual to ask questions like "Is the work stimulating and challenging?" before choosing an occupation?

- (A) To ensure the job will be easy and require no effort.
(B) To select a path that sustains enthusiasm and leads to a fulfilling career.
(C) To find a job that offers the highest possible starting salary.
(D) To fulfill the expectations and plans of one's family and parents.

Ans :

(B) To select a path that sustains enthusiasm and leads to a fulfilling career.

Self-reflection on aspects like stimulation and challenge is crucial for choosing a career that aligns with one's intrinsic motivations. Such a choice is more likely to sustain one's enthusiasm over the long term, leading to a satisfying and lifelong career.

- 150.** Which of the following is an example of an inter-generational traditional occupation mentioned in the text?

- (A) Software Developer
(B) Digital Marketer
(C) Garland making
(D) Data Scientist

Ans :

(C) Garland making

The text provides several examples of traditional occupations that are passed down through generations. Among the options, garland making is listed as one such traditional occupation, while the others are modern professions.

- 151.** Which of the following statements about 'meaningful work' is incorrect?
- (A) It is useful to society or others.
 - (B) It is performed in an environment that brings recognition and rewards.
 - (C) It enables the worker to use his/her skills and judgment.
 - (D) It is primarily about how much money a person earns.

Ans :

(D) It is primarily about how much money a person earns.

Meaningful work is defined by its utility, enjoyability, and the opportunity it provides for skill use and creativity. It is explicitly stated that work is not always about how much money one earns, but about the contribution one makes.

- 152.** A company that provides flexible work hours, encourages employee feedback, and supports personal development is actively improving its:
- (A) Ergonomic standards
 - (B) Quality of Work Life (QWL)
 - (C) Marketing strategies
 - (D) Financial accounting practices

Ans :

(B) Quality of Work Life (QWL)

These practices—flexibility, employee participation, and opportunities for development—are all key components of a strong Quality of Work Life (QWL) program. They aim to improve employee satisfaction, well-being, and morale.

- 153.** The interdependence of colleagues at a workplace personally, professionally, and psychologically underscores the importance of:
- (A) Empathy and good interpersonal skills
 - (B) Individual competition
 - (C) Maintaining a strict hierarchy
 - (D) Working in complete isolation

Ans :

(A) Empathy and good interpersonal skills

The text highlights that colleagues are interdependent in multiple ways. This mutual reliance makes positive attitudes, empathy, and strong interpersonal skills vital for fostering

a collaborative environment and achieving successful outcomes.

- 154.** Which term describes a person who is innovative, creative, organized, and a risk-taker, with a vision to create or change an enterprise?
- (A) Manager
 - (B) Employee
 - (C) Supervisor
 - (D) Entrepreneur

Ans :

(D) Entrepreneur

This combination of traits—being innovative, creative, organized, and a risk-taker—is the defining profile of an entrepreneur, a person who undertakes the creation and management of a new business venture.

- 155.** The KGBV scheme, aimed at girls from disadvantaged sections, requires them to study which course upon enrollment?
- (A) A vocational training course
 - (B) An advanced computer course
 - (C) The Bridge Course
 - (D) A foreign language course

Ans :

(C) The Bridge Course

All girls who are enrolled in Kasturba Gandhi Balika Vidyalayas (KGBVs) are required to study the Bridge Course. This course is designed to prepare them for the entry-level curriculum, which is Class VI.

- 156.** Which of the following statements about the challenges to traditional occupations is correct?
- (A) Shrinkage of forests and environmental degradation have no impact.
 - (B) All artisans have access to efficient finance and marketing services.
 - (C) Mass-produced goods have helped traditional arts to flourish.
 - (D) Illiteracy and socio-economic backwardness are major constraints.

Ans :

(D) Illiteracy and socio-economic backwardness are major constraints.

The text explicitly lists illiteracy and general socio-economic backwardness, along with inefficient finance and marketing services, as major constraints that cause the decline of traditional arts and crafts in the modern era.

157. A person who takes great pride in their job as a janitor, ensuring the premises are impeccably clean, is demonstrating:
- (A) A desire for a higher salary.
 - (B) The principle of Dignity of Labour.
 - (C) The need for an ergonomic workstation.
 - (D) An entrepreneurial mindset.

Ans :

(B) The principle of Dignity of Labour.
The principle of Dignity of Labour means taking pride in whatever work one does, regardless of its perceived status. This janitor's pride in their work is a perfect example of this principle in action.

158. What is the core message of the anecdote about the three men breaking boulders?
- (A) All types of physical labor are meaningless.
 - (B) Financial reward is the only valid reason to perform any work.
 - (C) Teamwork is not important in manual labor jobs.
 - (D) One's perception and vision can transform the meaning of their work.

Ans :

(D) One's perception and vision can transform the meaning of their work.
The anecdote illustrates that the same physical act can be perceived differently. It highlights how a person's perspective—whether they see it as just a task (job), a means to an end (livelihood), or part of a larger vision (calling/career)—defines the meaning of their work.

159. A person's "accustomed means of livelihood/profession or occupation chosen as one's life's work" is the dictionary definition of:
- (A) Career
 - (B) Work
 - (C) Livelihood
 - (D) Job

Ans :

(B) Work
The text cites the Webster dictionary definition of 'work' as "the labor, task, or duty that is one's accustomed means of livelihood/profession or occupation chosen as one's life's work".

160. Assertion (A): The participation of women in the workforce has placed a double burden on them.
Reason (R): Women are still expected to perform most household chores and be the primary caregivers.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that working women face a "double burden" is directly and accurately explained by the reason. This burden exists precisely because, in addition to their professional jobs, they are still expected to manage the majority of domestic and caregiving responsibilities.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

Aarav, a talented young software developer, receives two distinct job offers after graduation. The first is a lucrative position at a leading multinational corporation (MNC), promising a high salary, substantial benefits, and a structured path for rapid career advancement. The role involves working on proprietary financial software, ensuring a high standard of living and social status. The second offer comes from a mid-sized social enterprise dedicated to creating affordable assistive technology for people with disabilities. This position offers a significantly lower salary and fewer corporate perks but provides a direct opportunity to make a tangible, positive impact on society. Aarav feels a strong pull towards the social enterprise, as the work aligns with his personal values and seems intellectually stimulating and fulfilling. His family pressures him to accept the MNC offer, defining it as a secure 'job' for a stable livelihood. Aarav, however, is contemplating whether a 'career' should be defined solely by monetary gain and status or by the sense of purpose and contribution it offers. He is struggling to balance societal expectations of success with his own definition of 'meaningful work' that contributes to his identity and self-worth.

161. What is the primary distinction between the two work opportunities that Aarav is considering?

- (A) One focuses on work as a 'job' for income, while the other presents work as a 'calling' with personal and social meaning.
- (B) One is a permanent job, while the other is a temporary contract.
- (C) One is in the IT sector, while the other is in the manufacturing sector.
- (D) One requires working in a team, while the other involves independent work.

Ans :

- (A) One focuses on work as a 'job' for income, while the other presents work as a 'calling' with personal and social meaning.

The MNC offer represents a job focused on financial returns and status. In contrast, the social enterprise offers a calling, providing deep satisfaction from the work itself and its contribution to society, aligning with the concept of meaningful work.

- 162.** If Aarav chooses the social enterprise, what is he prioritizing?
- (A) Financial security and job stability above all else.
 - (B) A symbol of status, power, and control in his professional life.
 - (C) The opportunity for self-actualisation and making a contribution to society.
 - (D) A work environment with minimal challenges and responsibilities.

Ans :

- (C) The opportunity for self-actualisation and making a contribution to society.

By choosing the social enterprise, Aarav would prioritize work that is useful to others and allows for the expression of his unique talents and values. This choice represents a path toward self-development and contributing to the wider community's well-being.

This book has been published by NODIA Learning

- 163.** The family's perspective of equating the MNC offer with a good 'job' is primarily based on which view of work?
- (A) Work as a source of joy and fulfillment.
 - (B) Work as a means of earning a livelihood and securing income.
 - (C) Work as a platform for creative expression.
 - (D) Work as a form of social service or volunteerism.

Ans :

- (B) Work as a means of earning a livelihood and securing income.

The family's advice focuses on the financial aspects and security offered by the MNC. This perspective defines work primarily as a 'job'—an activity undertaken to earn money and support oneself and one's family, which is a common societal viewpoint.

- 164.** The concept of 'meaningful work' is best illustrated by which aspect of the social enterprise role?

- (A) The high salary and extensive corporate benefits.
- (B) The opportunity to work with the latest proprietary technology.
- (C) The structured nine-to-five work schedule.
- (D) The fact that the work is useful to society and enjoyable to the worker.

Ans :

- (D) The fact that the work is useful to society and enjoyable to the worker.

Meaningful work is characterized by its usefulness to others, the responsibility it entails, and the enjoyment it brings the worker. The role at the social enterprise directly aligns with these principles by creating technology for societal benefit.

- 165.** What factor is crucial for Aarav to sustain his enthusiasm if he chooses the lower-paying job?

- (A) The work must align with his personal attributes, talents, and aptitude.
- (B) The job must provide a clear path for hierarchical advancement.
- (C) The job must offer financial returns comparable to the market rate.
- (D) The company must have a globally recognized brand name.

Ans :

- (A) The work must align with his personal attributes, talents, and aptitude.

To sustain enthusiasm in any career, especially one that may be less financially rewarding, it is vital that the work suits one's personal interests and skills. This alignment paves the way for a fulfilling, long-term career path.

Direction : Read the following case study and answer the following questions.

The village of Shilpgram has a rich heritage of 'Kalamkari', a traditional art of hand-painting

on cotton textiles. For generations, this craft has been the primary livelihood for many families, with skills passed down from parents to children. However, with the rise of mass-produced, machine-printed textiles, the demand for authentic Kalamkari has dwindled, leaving the artisans with meager incomes. A young woman from the village, Ananya, who has completed her higher education in textile design, returns with a vision to revitalize this dying art form. She forms a cooperative of local artisans. Ananya introduces eco-friendly dyes, contemporary designs that appeal to urban and international markets, and new product lines like home décor and fashion accessories, while preserving the core techniques of the craft. She also uses social media to tell the story behind the art, creating a brand that emphasizes authenticity and ethical production. The cooperative faces challenges, including illiteracy among some older artisans, inadequate financial services, and competition from cheaper imitations. Ananya's initiative aims to transform this traditional occupation into a sustainable career, enhancing the income and dignity of the artisans and preserving their cultural heritage.

- 166.** Ananya's initiative to blend traditional skills with modern demands is an example of what?
- (A) Abandoning traditional occupations for modern jobs.
 - (B) Entrepreneurship aimed at reviving and sustaining an indigenous craft.
 - (C) The complete mechanization of a traditional handicraft.
 - (D) A government-mandated employment generation scheme.

Ans :

(B) Entrepreneurship aimed at reviving and sustaining an indigenous craft.
Ananya is acting as an entrepreneur by creating a new enterprise. She is innovating by introducing new designs and marketing strategies to make a traditional occupation economically viable in the modern market, thereby creating livelihoods for the community.

- 167.** The decline of Kalamkari due to machine-printed textiles highlights which challenge faced by traditional occupations?
- (A) The lack of skilled artisans in villages.
 - (B) The difficulty of passing skills from one generation to the next.
 - (C) Competition from mass-produced goods and

the erosion of aesthetic appreciation.

- (D) The unsuitability of traditional products for any modern use.

Ans :

(C) Competition from mass-produced goods and the erosion of aesthetic appreciation.
Traditional arts often struggle to compete with cheaper, mass-produced alternatives. This leads to a decline in income for artisans and a gradual loss of appreciation for the fine skills involved, which is a major constraint for such occupations.

- 168.** What was the traditional method of skill transfer for Kalamkari in Shilpgram?
- (A) Through formal vocational training institutes in the village.
 - (B) Through government-sponsored workshops and seminars.
 - (C) Through online tutorials and distance learning programs.
 - (D) Through home-based training where skills were passed from one generation to the next within the family.

Ans :

(D) Through home-based training where skills were passed from one generation to the next within the family.
Historically, the techniques and skills of traditional crafts were indigenous knowledge transferred within the family. This home-based training ensured the preservation of the craft's finer nuances, which were often guarded secrets within specific occupational groups.

- 169.** Which intervention by Ananya addresses the need for design innovation and reaching a global market?
- (A) Introducing contemporary designs and using social media for marketing.
 - (B) Only using the exact same patterns that have been used for centuries.
 - (C) Focusing solely on selling the products within the village.
 - (D) Requesting the government to ban all machine-made textiles.

Ans :

(A) Introducing contemporary designs and using social media for marketing.
To revive the craft, Ananya introduces design innovations to appeal to new customers and uses modern marketing tools to access a global

market. This is a crucial strategy for making traditional crafts economically successful in the contemporary world.

170. The challenges of illiteracy and inadequate financial services faced by the cooperative are examples of what kind of constraints?
- (A) Lack of interest from the younger generation.
 - (B) Scarcity of raw materials in the region.
 - (C) General socio-economic backwardness and inefficient support services.
 - (D) Strict government regulations against handicraft production.

Ans :

(C) General socio-economic backwardness and inefficient support services.
Illiteracy and poor access to finance and marketing are significant socio-economic constraints that hinder the growth of traditional occupations. Overcoming these requires systemic interventions beyond just design and production improvements, which is what Ananya's cooperative aims to address.

Direction : Read the following case study and answer the following questions.

Priya, a highly qualified female mechanical engineer, joins a reputable automobile manufacturing firm, a field predominantly staffed by men. While her male colleagues are friendly, she notices subtle patterns of gender bias. During team meetings, her suggestions are often overlooked until a male colleague repeats them, after which they are acknowledged. She is consistently assigned documentation and reporting tasks, while her male peers are given more hands-on, challenging design projects. Furthermore, when she requested flexible work hours to manage a family emergency, her manager was less accommodating than he was with her male colleagues, implying that her family responsibilities might interfere with her commitment. Priya feels the pressure of the 'double burden'—excelling at her demanding job while still being seen as the primary person responsible for household matters. This socially constructed gender role affects her opportunities for career advancement and creates significant stress. She is determined to challenge these stereotypes and prove that her gender has no bearing on her professional competence or dedication, advocating for a more equitable and supportive work environment for all.

171. The expectation that Priya should manage household responsibilities while also performing her job is known as what?
- (A) A healthy work-life balance.
 - (B) The 'double burden' often placed on working women.
 - (C) An effective time management strategy.
 - (D) A standard requirement for all employees in the firm.

Ans :

(B) The 'double burden' often placed on working women.

Working women are often expected to perform all their household chores and be primary caregivers in addition to their professional responsibilities. This creates a 'double burden', placing significant strain on their time, energy, and career progression.

172. The manager's differential treatment regarding flexible work hours is an example of what?
- (A) A socially constructed gender stereotype influencing workplace decisions.
 - (B) A fair and unbiased management practice.
 - (C) A policy designed to improve employee morale.
 - (D) A misunderstanding of Priya's request.

Ans :

(A) A socially constructed gender stereotype influencing workplace decisions.

The manager's assumption that family responsibilities will affect Priya's commitment more than a male colleague's is based on stereotyped gender roles. Gender is socially constructed, defining how different genders are expected to behave and what roles they should perform.

173. What is the term for the biological categorization based on reproductive organs and genetics that distinguishes males and females?
- (A) Gender
 - (B) Stereotype
 - (C) Culture
 - (D) Sex

Ans :

(D) Sex

The term 'sex' refers to the biological and physiological characteristics that define men and women, based on genetics and reproductive organs. 'Gender', in contrast, is based on socially constructed identities, roles, and expectations for males and females.

174. Priya's experience of being assigned less challenging tasks is a form of what?
- (A) Gender discrimination that marginalizes her from key professional growth opportunities.
 - (B) A training opportunity to learn different aspects of the business.
 - (C) A merit-based allocation of work responsibilities.
 - (D) A temporary work arrangement until she gains more experience.

Ans :

(A) Gender discrimination that marginalizes her from key professional growth opportunities.

The assignment of less critical tasks to Priya based on her gender is a form of discrimination. It limits her participation in the workforce and hinders her career growth, which is a common issue faced by women in non-traditional fields.

175. To create a more equitable environment, the company should focus on what constitutional principle?
- (A) Providing different pay scales for men and women for the same work.
 - (B) Guaranteeing equality of opportunity in matters of employment, regardless of sex.
 - (C) Making special provisions to limit women's working hours.
 - (D) Assigning roles based on traditional gender norms.

Ans :

(B) Guaranteeing equality of opportunity in matters of employment, regardless of sex.

The Constitution of India guarantees equality of opportunity for all citizens in employment and forbids discrimination on grounds of sex. The company should adhere to this principle to ensure Priya and other employees are treated fairly and equitably.

Direction : Read the following case study and answer the following questions.

A fast-growing IT startup, "Innovatech," was facing high employee turnover and low morale. An internal survey revealed that while the salaries were competitive, employees felt overworked, stressed, and disconnected from the company's mission. They reported a poor work-life balance, lack of recognition for their efforts, and a non-collaborative environment. In response, the management decided to overhaul its approach

by focusing on improving the 'Quality of Work Life' (QWL). They introduced several initiatives: flexible working hours, a "no-emails-after-7-PM" policy, and mental health support services. They also established a transparent system for rewards and recognition and redesigned the office space to include collaborative zones and recreational areas. Furthermore, they started holding regular town hall meetings where employees could voice their concerns and contribute to decision-making processes. The goal was to create a positive and healthy work environment where employees felt valued as assets, not just as resources. The management believed that by satisfying the social and psychological needs of their employees, not just their economic needs, they could boost morale, increase productivity, and build a loyal and motivated workforce.

176. What is the core principle behind Innovatech's focus on 'Quality of Work Life' (QWL)?
- (A) The belief that employees are assets and perform better when their social and psychological needs are met.
 - (B) Reducing employee salaries to increase company profits.
 - (C) The idea that work should be strictly separated from personal life with no overlap.
 - (D) A strategy to increase working hours without additional pay.

Ans :

(A) The belief that employees are assets and perform better when their social and psychological needs are met.

QWL is an approach that considers employees to be valuable 'assets'. It acknowledges that satisfying their social and psychological needs, such as feeling valued and having a work-life balance, is as important as meeting their economic needs for motivation.

177. The introduction of flexible hours and mental health support directly addresses which aspect of a healthy work environment?
- (A) Fostering team spirit and team responsibility.
 - (B) Paying adequate attention to the individual employee's needs and expectations.
 - (C) Ensuring and facilitating technical competence.
 - (D) Making the job interesting and challenging.

Ans :

(B) Paying adequate attention to the individual employee's needs and expectations.

A healthy work environment is created when an organization pays attention to its employees' individual needs. Flexible hours and mental health support are direct responses to the expressed needs for better work-life balance and stress management among Innovatech's employees.

- 178.** The implementation of regular town hall meetings for employee feedback is a method of achieving what?

- (A) Delegating all decision-making power to employees.
- (B) Restricting communication between management and staff.
- (C) Matching the person to the task based on their skills.
- (D) Empowering employees and providing opportunities for participative decision-making.

Ans :

(D) Empowering employees and providing opportunities for participative decision-making. By involving employees in decision-making through town hall meetings, Innovatech is empowering them. This participative approach fosters a sense of ownership and loyalty to the organization, which is a key component of improving the Quality of Work Life.

- 179.** An employee's job satisfaction is considerably influenced by their own attitude. Which of the following best describes a positive attitude towards work?

- (A) Viewing work as a source of energy, fulfillment, and learning.
- (B) Perceiving work as something that must be endured 'somehow or anyhow'.
- (C) Constantly comparing one's salary with others without considering other factors.
- (D) Focusing solely on the negative aspects and challenges of the job.

Ans :

(A) Viewing work as a source of energy, fulfillment, and learning.

An individual's attitude significantly impacts job satisfaction. When a person perceives their work as a source of fulfillment and an opportunity for learning, they are more likely to enjoy it, handle challenges positively, and experience greater personal happiness.

- 180.** Redesigning the office to include collaborative and recreational zones aims to do what?

- (A) Increase the physical distance between employees.
- (B) Reduce the overall operating costs of the office.
- (C) Build a positive work climate and foster team spirit.
- (D) Monitor employee activities more closely.

Ans :

(C) Build a positive work climate and foster team spirit.

Creating spaces for collaboration and recreation helps build a positive work climate and encourages team spirit. This contributes to a healthier work environment where positive professional relationships can develop, ultimately improving the overall Quality of Work Life for employees.

Direction : Read the following case study and answer the following questions.

In a Class 12 sociology debate, the topic is "The Dignity of Labour in Modern India." One group of students argues that in today's society, a person's worth is often measured by their wealth and the type of job they hold. They contend that professions like software engineering, medicine, and management are held in high esteem, while jobs like sanitation work, farming, and manual labour are often looked down upon, despite their essential contribution to society. They argue that this hierarchy creates social inequality and disrespect. The opposing group, led by a student named Riya, counters this argument. Riya posits that the 'dignity of labour' is an intrinsic value, meaning that every form of work, regardless of its nature or financial status, deserves respect. She cites historical figures who performed menial tasks to demonstrate that no work is inferior. Riya argues that a person's pride in their work and their ethical conduct, not their position or salary, defines their dignity. The debate explores whether dignity is granted by society based on wealth and status, or if it is an inherent quality of all honest work, reflecting the idea that every individual is worthy of respect.

- 181.** What is the core principle of 'dignity of labour' that Riya is advocating?

- (A) Only high-paying, white-collar jobs have dignity.
- (B) The dignity of a person is determined by their financial status.

- (C) Every person deserves respect regardless of the type of work they do, and one should take pride in their job.
- (D) Manual labour is inherently less dignified than intellectual work.

Ans :

(C) Every person deserves respect regardless of the type of work they do, and one should take pride in their job.

The concept of dignity of labour means that a person takes pride in whatever work they do and that all forms of work, whether big or small, are respectable. Every individual contributes to society and deserves respect for their efforts.

- 182.** The argument that society values certain jobs over others based on income and status reflects a challenge to which fundamental human rights principle?
- (A) The right to property.
- (B) The idea that all human beings are born free and equal in dignity and rights.
- (C) The right to freedom of speech.
- (D) The right to choose one's profession.

Ans :

(B) The idea that all human beings are born free and equal in dignity and rights.

The Universal Declaration of Human Rights states that all humans are equal in dignity. Devaluing certain types of work contradicts this principle by creating a hierarchy where some individuals are considered less worthy based on their occupation, undermining their inherent dignity.

- 183.** A formal system or set of rules governing the conduct of a person or the members of a profession is known as what?
- (A) Values
- (B) Beliefs
- (C) Preferences
- (D) Ethics

Ans :

(D) Ethics

Ethics are defined as the formal rules or standards that govern the conduct of a person or a profession. They provide a framework for behavior, such as professional ethics or medical ethics, and are distinct from personal values or beliefs.

- 184.** Riya's reference to historical figures performing menial tasks serves to illustrate what?
- (A) That a person's character and actions, not

the job itself, are what matter.

- (B) That such jobs were only performed in the past.
- (C) That only famous people can bring dignity to a job.
- (D) That menial jobs should only be done voluntarily.

Ans :

(A) That a person's character and actions, not the job itself, are what matter.

By citing examples like Mahatma Gandhi, who performed scavenging and cleaning, Riya demonstrates that no work is inherently menial or degrading. The principle is that one's attitude and pride in the work uphold its dignity, regardless of its nature.

- 185.** What is the primary role of values and ethics at the workplace?
- (A) To increase competition among employees.
- (B) To provide behavioral rules that guide professional conduct and build respect.
- (C) To focus solely on increasing company profits.
- (D) To justify unethical practices for the sake of efficiency.

Ans :

(B) To provide behavioral rules that guide professional conduct and build respect.

Values and ethics provide the rules for desirable behavior at the workplace. Being ethical earns respect from colleagues, encourages a positive environment, reduces waste, and boosts employee morale, confidence, and productivity, contributing to a dignified work culture.

Direction : Read the following case study and answer the following questions.

With the recent surge in remote work, a startup named "Ergo-Solutions" decides to design and manufacture ergonomic furniture specifically for home offices. Their market research shows that many people working from home are using standard dining chairs and tables, leading to a rise in musculoskeletal issues like back pain and neck strain. The design team at Ergo-Solutions includes ergonomists, engineers, and industrial designers. Their primary goal is to adapt the work environment (the home office) to the worker. They develop an adjustable chair that supports the natural curve of the spine, a desk that can be set to different heights for sitting or standing, and monitor stands

to ensure the screen is at eye level. They focus on anthropometry to ensure their products fit a wide range of body sizes. The company's marketing emphasizes that their products not only improve comfort and safety by reducing physical stress but also increase productivity by allowing users to work more efficiently and with fewer errors. Their campaign slogan is "Fit the work to you, not you to the work."

186. What is the primary goal of ergonomics as demonstrated by Ergo-Solutions?

- (A) To make furniture that is inexpensive, regardless of comfort.
- (B) To design a one-size-fits-all solution for all workers.
- (C) To adapt the work environment, tools, and job requirements to the worker for optimal efficiency and well-being.
- (D) To increase the physical stress on workers to build their endurance.

Ans :

(C) To adapt the work environment, tools, and job requirements to the worker for optimal efficiency and well-being.

Ergonomics is the study of humans at work with the primary goal of adapting the work environment to the worker. Ergo-Solutions is applying this by designing furniture that fits the user to reduce stress and improve safety and productivity.

187. The company's focus on designing products for a range of body sizes is based on which pillar of ergonomics?

- (A) Biomechanics
- (B) Physiology
- (C) Industrial Psychology
- (D) Anthropometry

Ans :

(D) Anthropometry

Anthropometry is the science of body size and measurements. By using anthropometric data, Ergo-Solutions can design furniture that is adjustable and suitable for a diverse population, which is a fundamental aspect of creating effective ergonomic products.

188. The rise in back and neck pain among remote workers using standard furniture is a direct consequence of what?

- (A) A lack of physical activity during the workday.
- (B) A mismatch between the worker and their

work environment.

(C) A natural part of the aging process.

(D) A poor diet and lack of proper nutrition.

Ans :

(B) A mismatch between the worker and their work environment.

When the work environment, such as a chair or desk, is not designed to fit the worker, it can cause physical stress and lead to musculoskeletal injuries. Ergonomics aims to prevent this by ensuring a proper match between the person and their tools.

189. How can an ergonomic intervention, like using an adjustable chair, improve productivity?

- (A) By reducing unnecessary or awkward postures and exertions, which saves time and reduces errors.
- (B) By making the chair more difficult to use, thus keeping the worker alert.
- (C) By encouraging the worker to take more frequent breaks away from their desk.
- (D) By being more expensive, which motivates the worker to work harder to justify the cost.

Ans :

(A) By reducing unnecessary or awkward postures and exertions, which saves time and reduces errors.

Ergonomic solutions improve productivity by making tasks easier and more comfortable to perform. Reducing awkward postures and physical strain minimizes wasted effort and time, decreases the likelihood of errors, and allows the worker to focus more effectively on their tasks.

190. The term ergonomics is derived from the Greek words 'ergon' and 'nomos', which mean what?

- (A) 'Human' and 'Study'
- (B) 'Health' and 'Safety'
- (C) 'Machine' and 'Design'
- (D) 'Work' and 'Natural Laws'

Ans :

(D) 'Work' and 'Natural Laws'

The term ergonomics literally translates from its Greek roots: 'ergon' meaning work, and 'nomos' meaning natural laws. Therefore, ergonomics is the science of the natural laws of work, aiming to create harmony between people and their work environment.

 This ...

Direction : Read the following case study and answer the following questions.

Maya, an MBA graduate working in a corporate logistics firm, was disturbed by the amount of edible food being discarded by restaurants and supermarkets in her city every day. At the same time, she was aware of the widespread hunger among the urban poor. Instead of continuing on her lucrative corporate career path, Maya decided to become a social entrepreneur. She quit her job and founded “Annapurna Connect,” an enterprise with a dual mission: to reduce food waste and to fight hunger. She developed a mobile application that connects restaurants, event caterers, and grocery stores with a network of volunteers and partner NGOs. When a food business has surplus food, they post the details on the app. Volunteers are then dispatched to collect the food and deliver it to nearby shelters and community kitchens. Annapurna Connect operates on a minimal service fee from the businesses, which is far less than their costs of waste disposal. Maya’s primary measure of success is not profit but the social impact—the number of meals served and the tons of food saved from landfills. Her venture is a classic example of using entrepreneurial principles to address a pressing social problem.

- 191.** What is the defining characteristic of Maya’s venture, “Annapurna Connect,” that makes it an act of social entrepreneurship?
- (A) It is focused exclusively on maximizing financial profit for its shareholders.
 - (B) It is a government-run program funded by taxes.
 - (C) Its primary aim is to achieve large-scale social good rather than financial gain.
 - (D) It is a traditional charity that relies solely on donations.

Ans :

(C) Its primary aim is to achieve large-scale social good rather than financial gain.
Social entrepreneurship focuses on doing social good. The success of such a venture is measured more by the social benefits and impact it creates, such as helping the underserved, rather than by the profits it makes for its founder.

- 192.** A person who undertakes the creation of a new and innovative enterprise, takes calculated risks, and assembles resources to convert an idea into reality is known as what?

- (A) A manager
- (B) An employee
- (C) A consultant
- (D) An entrepreneur

Ans :

- (D) An entrepreneur

An entrepreneur is defined as a person who is innovative, creative, organized, and a risk-taker. They undertake the creation of a new business or enterprise, using their acumen to turn a novel idea into a functioning reality.

- 193.** Maya’s decision to leave her corporate job to start her own venture demonstrates which key entrepreneurial trait?

- (A) Willingness to work hard and take calculated risks.
- (B) Aversion to taking any form of risk.
- (C) A desire for a stable and predictable work routine.
- (D) A preference for following instructions rather than initiating action.

Ans :

- (A) Willingness to work hard and take calculated risks.

One of the core characteristics of an entrepreneur is the courage to take calculated risks. Maya demonstrated this by leaving a secure, high-paying job to pursue an innovative idea that she believed in, despite the uncertainty of its success.

- 194.** How does a social entrepreneur act as a ‘social catalyst’?

- (A) By maintaining the existing social and economic structures.
- (B) By creating basic social changes and sustainable improvements in a specific area.
- (C) By working exclusively within government frameworks.
- (D) By focusing only on problems that have simple, easy solutions.

Ans :

- (B) By creating basic social changes and sustainable improvements in a specific area.

Social entrepreneurs are often described as ‘social catalysts’ or visionaries because they create fundamental social changes. Their actions stimulate improvements in fields like health, education, or the environment, leading to a sustainable positive impact on society.

195. The mobile application developed by Maya is an example of what?

- (A) An attempt to use a new technological method to solve a problem.
- (B) Revitalizing an existing organization.
- (C) A project with no clear goal or objective.
- (D) A government policy document.

Ans :

(A) An attempt to use a new technological method to solve a problem.

Entrepreneurs often change production patterns or create solutions through innovation or new technological methods. Maya's use of a mobile app to connect food donors with recipients is an innovative, technology-based solution to the social problem of food waste.

Direction : Read the following case study and answer the following questions.

A mid-sized digital marketing agency, "Creative Buzz," is experiencing a decline in productivity and a tense workplace atmosphere. The management notices that employees lack enthusiasm, often miss deadlines, and there is a high rate of absenteeism. During an anonymous feedback session, employees reveal feelings of burnout, an inability to cope with stress, and poor interpersonal relationships among team members. They express that they feel ill-equipped to handle constructive criticism and solve problems collaboratively. Recognizing these issues, the HR department decides to implement a series of workshops focused on developing 'life skills'. The training includes sessions on communication, interpersonal relationships, critical thinking, problem-solving, and coping with stress and emotions. The company's goal is to equip its employees with the abilities for adaptive and positive behavior, enabling them to deal effectively with the demands and challenges of both their professional and personal lives. The management believes that fostering these psychosocial competencies will lead to a more resilient, cooperative, and productive workforce.

196. The issues of burnout, poor interpersonal relationships, and inability to cope with stress point to a lack of what among the employees?

- (A) Financial motivation.
- (B) Technical skills required for their jobs.
- (C) Essential life skills for adaptive and positive behavior.
- (D) A competitive work environment.

Ans :

(C) Essential life skills for adaptive and positive behavior.

Life skills are abilities that enable individuals to deal effectively with the demands and challenges of everyday life. The problems at Creative Buzz, such as stress and poor relationships, are issues that can be addressed by developing these core skills.

197. According to the World Health Organisation (WHO), life skills can be broadly categorized into which three types of skills?

- (A) Reading, writing, and arithmetic skills.
- (B) Technical, managerial, and administrative skills.
- (C) Athletic, artistic, and musical skills.
- (D) Thinking, coping, and social skills.

Ans :

(D) Thinking, coping, and social skills.

The WHO identifies life skills as a set of thinking, coping, and social skills. These abilities enhance people's interactions with others and the environment and contribute to individual resilience in the face of adversity and challenging situations.

198. The workshop session on "communication and interpersonal relationships" aims to improve which essential soft skill at the workplace?

- (A) Working cooperatively with others to complete tasks and resolve conflicts.
- (B) Working productively in isolation.
- (C) Learning effectively through independent study.
- (D) Thinking critically and evaluating information on one's own.

Ans :

(A) Working cooperatively with others to complete tasks and resolve conflicts.

Good communication and interpersonal skills are vital for working cooperatively. This involves interacting effectively with others to complete tasks, solve problems, offer support, and build a sense of belonging to the organization, all of which were lacking at Creative Buzz.

199. How are life skills best acquired?

- (A) Solely through reading academic textbooks in a classroom.
- (B) Through experiential learning and practice in real-life situations.

- (C) By observing others without any personal involvement.
- (D) By being born with them, as they are innate competencies.

Ans :

(B) Through experiential learning and practice in real-life situations.

Life skills are not just theoretical knowledge but actual behaviors and competencies. They cannot be simply taught like academic lessons; rather, they are acquired and honed through experiential learning, practice, and application in everyday personal and professional contexts.

- 200.** The ultimate goal of the life skills training program at “Creative Buzz” is to achieve what?
- (A) To ensure employees work longer hours for the same pay.
 - (B) To identify and dismiss underperforming employees.
 - (C) To reduce the company’s expenditure on employee salaries.
 - (D) To prevent negative health behavior and promote positive health and well-being.

Ans :

(D) To prevent negative health behavior and promote positive health and well-being.

The development of adequate knowledge, attitudes, and values enables healthy life skills. This, in turn, helps prevent unhealthy or negative behaviors, such as those arising from stress, and promotes positive health and well-being for individuals and the organization.

Direction : Read the following case study and answer the following questions.

In a small village in Rajasthan, a community of traditional potters has been crafting unique terracotta items for centuries. Their livelihood depends on this ancestral skill, which includes creating everything from household utensils to decorative idols. Recently, however, their craft is facing a severe threat. Cheaper, mass-produced plastic and steel utensils have flooded the market, drastically reducing the demand for their terracotta products. Furthermore, the younger generation is migrating to cities in search of more modern and financially stable jobs, showing little interest in learning the time-consuming art of pottery. The community is also facing a depletion of their primary raw material, good-quality clay, due to

local environmental degradation. The artisans are left with meager incomes and a sense of cultural loss as their rich heritage of indigenous knowledge is on the verge of disappearing. A local NGO has stepped in to help, proposing interventions like design innovation to create new products for niche markets, establishing better marketing channels, and advocating for the conservation of their traditional knowledge through formal documentation.

- 201.** What is the primary reason for the economic hardship faced by the pottery community?
- (A) The potters have lost their traditional skills.
 - (B) There is a lack of raw material in the entire country.
 - (C) Their traditional occupation is losing out to mass-produced goods, leading to a decline in income.
 - (D) The government has banned the production of terracotta items.

Ans :

(C) Their traditional occupation is losing out to mass-produced goods, leading to a decline in income.

A significant challenge for many traditional occupations is the competition from modern, mass-produced goods. These alternatives are often cheaper and more readily available, leading to a decline in demand and income for traditional artisans, gradually eroding their craft.

- 202.** The younger generation’s migration to cities for different jobs is an example of what trend affecting traditional occupations?
- (A) A desire to preserve indigenous knowledge.
 - (B) The gradual erosion of inter-generational skill transfer.
 - (C) The high profitability of traditional crafts.
 - (D) An increase in appreciation for traditional lifestyles.

Ans :

(B) The gradual erosion of inter-generational skill transfer.

Traditionally, skills were passed from one generation to the next within the family. When the younger generation seeks other careers, this chain of knowledge transfer is broken, posing a significant threat to the survival of the indigenous craft.

- 203.** The NGO's suggestion to create new products for niche markets is an example of which necessary intervention?
- (A) Design innovation and refinement strategies.
 - (B) Completely abandoning the traditional techniques.
 - (C) Shifting to a different occupation altogether.
 - (D) Relying solely on government subsidies.

Ans :

(A) Design innovation and refinement strategies.
To sustain traditional occupations, interventions are required in areas like design innovation. Creating new products that appeal to contemporary tastes while retaining the essence of the traditional craft can open up new markets and ensure economic viability for artisans.

- 204.** The depletion of high-quality clay due to environmental issues points to what specific problem?
- (A) Lack of marketing services for the artisans.
 - (B) Shrinkage and depletion of the natural resource base.
 - (C) Illiteracy and socio-economic backwardness.
 - (D) Inadequate financial support from banks.

Ans :

(B) Shrinkage and depletion of the natural resource base.

Many traditional occupations are dependent on natural resources. Environmental degradation and the depletion of this resource base, such as the loss of quality clay for potters, pose a direct and serious threat to the continuity of these crafts.

- 205.** What was the traditional system for training new artisans in this community?
- (A) Formal education in government-run art colleges.
 - (B) Apprenticeships in large, modern factories.
 - (C) Learning through certified online courses.
 - (D) Primarily home-based training where know-how was guarded and passed down through generations.

Ans :

(D) Primarily home-based training where know-how was guarded and passed down through generations.

The transfer of indigenous knowledge and skills for traditional crafts was typically home-based. The finer nuances and techniques were closely guarded secrets passed down within the family or

a specific community group from one generation to the next.

Direction : Read the following case study and answer the following questions.

Aditi is a bright and creative Class 12 student who excels in visual arts and literature. Her parents, both successful doctors, have always expected her to follow in their footsteps and pursue a career in medicine. They have planned her education accordingly, enrolling her in coaching classes for medical entrance exams. However, Aditi feels a strong pull towards a career in graphic design and creative writing. She spends her free time sketching, designing, and writing short stories, activities that bring her immense joy and fulfillment. She uses her life skills to navigate this challenging situation. She uses self-awareness to understand her own talents and interests. With critical thinking, she researches viable career paths in the creative industries. She then uses her communication and interpersonal skills to have an open and honest conversation with her parents. Instead of being reactive and confrontational, she presents a well-researched plan, explaining how she can build a successful and satisfying career that aligns with her passions. She demonstrates problem-solving by suggesting a compromise: she will diligently prepare for her board exams while also building a portfolio of her creative work.

- 206.** Aditi's process of identifying her own talents and preferences is an example of which core life skill?
- (A) Coping with stress
 - (B) Empathy
 - (C) Decision making
 - (D) Self-awareness

Ans :

(D) Self-awareness

Self-awareness is a core life skill that involves recognizing one's own character, strengths, weaknesses, desires, and dislikes. Aditi is using this skill to identify her passion for the creative arts, which is the first step in making an informed career choice.

- 207.** In her conversation with her parents, Aditi chose to be responsive rather than reactive. What does this mean in practice?
- (A) She immediately rejected her parents' views without listening.
 - (B) She reacted with emotional outbursts and justifications.

- (C) She examined the situation calmly and realistically before presenting her perspective.
- (D) She avoided the conversation altogether to prevent conflict.

Ans :

(C) She examined the situation calmly and realistically before presenting her perspective. Being responsive involves examining a situation calmly and thoughtfully before acting, especially in a conflict. This is in contrast to being reactive, which involves emotional or defensive outbursts. Aditi's planned conversation is a responsive approach to a challenging situation.

208. Researching viable career paths in the creative industries demonstrates Aditi's use of which life skill?

- (A) Critical thinking
- (B) Creative thinking
- (C) Coping with emotions
- (D) Interpersonal relationships

Ans :

(A) Critical thinking
Critical thinking involves the ability to analyze information and ideas objectively. By researching career options, Aditi is applying this skill to gather facts and build a logical case for her preferred career path, moving beyond just her emotional preference for art.

209. Which of the following is NOT considered one of the ten core sets of life skills identified by experts?

- (A) Decision making and Problem solving
- (B) Communication and Interpersonal relationships
- (C) Creative thinking and Critical thinking
- (D) Technical proficiency and Financial management

Ans :

(D) Technical proficiency and Financial management

While technical proficiency and financial management are important skills, the ten core life skills identified by organizations like WHO focus on psychosocial competencies such as self-awareness, empathy, critical thinking, communication, decision making, and coping with stress and emotions.

210. The ability to effectively handle the demands and challenges of everyday life through positive and adaptive behavior is the definition of what?

- (A) Academic intelligence
- (B) Life skills
- (C) Professional ethics
- (D) Job satisfaction

Ans :

(B) Life skills

Life skills are defined as the abilities for adaptive and positive behavior that enable individuals to deal effectively with the diverse demands and challenges of everyday life. They are crucial for personal development, well-being, and professional success in any field.

CHAPTER 02

CLINICAL NUTRITION AND DIETETICS

SUMMARY

1. INTRODUCTION

Nutrition is the science of food and nutrients, and how the body digests, absorbs, and utilizes them . Optimal nutrition is crucial for immunity, recovering from illness, and managing chronic diseases . Inadequate nutrition can weaken the immune system, impair healing, and reduce the effectiveness of medications . Clinical Nutrition, also known as Medical Nutrition Therapy, is a specialized field that addresses the nutritional needs of individuals during illness .

2. SIGNIFICANCE

Nutritional care is vital because health problems and their treatments can negatively affect a person's nutritional status by interfering with their ability to eat, digest, absorb, and metabolize nutrients . Clinical nutrition focuses on managing the dietary needs of patients with established diseases . The demand for dietitians is increasing due to the rising prevalence of non-communicable diseases like obesity, heart disease, and diabetes, the emergence of new diseases such as HIV/AIDS, and an aging population . The field is constantly evolving with new scientific knowledge about the role of nutrients, nutraceuticals, and phytochemicals in health and disease management .

- **Medical foods** are specially manufactured products for specific dietary management of diseases, requiring a doctor's prescription .
- **Phytochemicals/Bioactive compounds** are non-nutrient constituents in foods that have biological activity and can influence health .

3. BASIC CONCEPTS

A dietitian or medical nutrition therapist translates technical nutritional information into practical dietary guidelines for both healthy individuals and patients with various conditions like diabetes, heart disease, or cancer . The primary objectives of diet therapy include:

- Formulating diets to meet a patient's specific needs and food habits .
- Modifying diets to control disease conditions .
- Correcting nutritional deficiencies .
- Preventing long-term complications of chronic diseases .
- Educating and counseling patients on adhering to their prescribed diet .

The nutritional care process is systematic and involves assessing nutritional status, diagnosing nutritional problems, planning and implementing interventions, and evaluating the outcomes . Nutritional assessment involves gathering detailed health and diet histories, taking anthropometric measurements, and interpreting lab results to identify deficiencies .

3.1 Types of Diets

A standard or regular diet meets the needs of healthy individuals . Modified diets are adjusted to meet a patient's medical needs and can involve changes in consistency, energy content, specific nutrients, or the number and frequency of meals .

3.2 Changes in Consistency

- **Liquid diets** are fluid at room temperature and include foods like soups, milk, and fruit juices. They are nutritionally adequate and easily absorbed, prescribed for those who cannot chew or swallow normally. A clear liquid diet is a thinner variation used just after surgery .
- **Soft diets** consist of semi-solid, lightly seasoned foods that are easy to chew and

digest, such as khichdi. They are given to minimize digestive issues . A **mechanical soft diet** includes mashed and pureed foods specifically for elderly individuals with chewing difficulties .

3.3 Feeding Routes

- The preferred method of feeding is orally (by mouth) . If a patient is unable to eat, **tube feeding** (delivering a complete feed through a tube into the stomach) is used, provided the gastrointestinal tract is functional . If not, **intravenous feeding** (nourishment through a drip into a vein) is the alternative .

3.4 Prevention of Chronic Diseases

Modern dietary patterns, characterized by high intake of processed foods rich in fat and sugar and low in fiber, coupled with a sedentary lifestyle, have led to an increase in chronic diseases like obesity, diabetes, and hypertension . Clinical nutritionists play a vital role in preventing these conditions by providing diet counseling and guidance to promote healthier eating habits .

4. PREPARING FOR A CAREER

A career in clinical nutrition requires a strong knowledge base and specific skills .

- **Knowledge:** Professionals need a deep understanding of nutrition, food science, physiology, biochemistry, and the physiological changes in disease states . Knowledge of food microbiology, food safety, food service management, and psychology for effective counseling is also essential .
- **Skills:** Key skills include assessing patients' nutritional status, planning customized diets, recommending and administering diets, and effective communication for counseling .
- **Education:** A B.Sc. in Home Science or Nutrition is the entry point . To become a registered dietitian, a Postgraduate Diploma in Dietetics with an internship is mandatory . For teaching and research careers, an M.Sc. and Ph.D. are advisable, along with qualifying national eligibility tests .

5. SCOPE

Clinical Nutrition and Dietetics offers diverse career opportunities, including roles as a dietitian, diet counselor, teacher, researcher, or corporate consultant . Professionals are in demand in

hospitals, wellness centers, the food industry (developing therapeutic foods), and research and development . There is also expanding scope in public policy and designing preventive nutrition programs . Freelance diet consulting is another viable career path .

6. CAREER AVENUES

Career options in this field include:

- Dietitians in hospitals, health clubs, and catering services .
- Freelance dietitians and entrepreneurs developing specialty health foods .
- Roles in teaching, academics, and research .
- Positions in nutrition marketing and technical writing .
- Consultants for government nutrition programs and voluntary organizations .

MULTIPLE CHOICE QUESTION

1. What is the science of food, nutrients, and other substances, as well as their digestion, absorption, and utilisation by the body called?

(A) Dietetics
(B) Food Science
(C) Nutrition
(D) Gastronomy

Ans :

(C) Nutrition

Nutrition is the comprehensive science that studies food and its components, how the body uses them, and their relationship to health and disease. It encompasses digestion, absorption, metabolism, and the social, economic, and psychological aspects of eating, making it the correct term for this broad definition.

2. Why is optimum nutrition crucial for managing illnesses?

(A) It guarantees complete avoidance of all diseases.
(B) It promotes recovery and provides immunity.
(C) It eliminates the need for any medication.
(D) It only improves the taste of patient food.

Ans :

(B) It promotes recovery and provides immunity. Optimum nutrition is vital during illness because it helps maintain immune defenses, supports

organ function, aids in healing wounds, and promotes recovery. Inadequate nutrition can weaken the body, making it susceptible to further complications and hindering the healing process, while good nutrition provides essential support.

3. Inadequate nutrient intake can impair the body's ability to perform which of the following functions?
- (A) Utilizing medications and supporting organ function.
 - (B) Maintaining body temperature and producing hormones.
 - (C) Improving eyesight and enhancing muscle coordination.
 - (D) Regulating sleep cycles and managing stress levels.

Ans :

(A) Utilizing medications and supporting organ function.

When nutrient intake is insufficient, the body struggles to maintain critical functions such as immune defense, wound healing, and proper organ function. It can also interfere with the body's ability to effectively utilize medications, leading to potential complications and a prolonged recovery period.

4. Which specialised area of nutrition deals with the management of nutritional needs during illness?
- (A) Public Health Nutrition
 - (B) Sports Nutrition
 - (C) Geriatric Nutrition
 - (D) Clinical Nutrition

Ans :

(D) Clinical Nutrition

Clinical Nutrition, also known as Medical Nutrition Therapy, is the specialized field that focuses on the nutritional management of patients with established diseases. It involves modifying diets to meet the specific health needs of individuals during illness to aid recovery and manage conditions effectively.

5. How can illness or disease affect a person's nutritional status?
- (A) By increasing their appetite for healthy foods.
 - (B) By enhancing the absorption of all nutrients.
 - (C) By interfering with digestion and metabolism.
 - (D) By reducing the body's need for energy.

Ans :

(C) By interfering with digestion and metabolism.

Illness can negatively impact nutritional status by affecting a person's ability to eat, swallow, digest, absorb, and metabolize nutrients. These disruptions can lead to nutrient imbalances and deficiencies, even in someone who was previously well-nourished, complicating their recovery and overall health.

6. Which of the following statements about the role of a clinical nutritionist is correct?
- (A) They primarily focus on the nutritional problems of large populations.
 - (B) They use a generalized approach for all patients with the same disease.
 - (C) They are only concerned with the economic aspects of food choices.
 - (D) They focus on the unique nutritional needs of individual patients.

Ans :

(D) They focus on the unique nutritional needs of individual patients.

A clinical nutritionist's primary role is to use a systematic process to address the unique needs of each patient in a holistic and individualistic manner. This personalized approach ensures that the nutritional care plan is tailored to the specific health condition, lifestyle, and preferences of the person.

7. The increasing prevalence of which type of diseases has heightened the need for diet counseling and nutritional care?
- (A) Non-communicable diseases like diabetes and obesity.
 - (B) Communicable diseases like influenza and measles.
 - (C) Genetic disorders inherited from family members.
 - (D) Infectious diseases caused by bacteria and viruses.

Ans :

(A) Non-communicable diseases like diabetes and obesity.

The rising incidence of non-communicable diseases such as obesity, heart disease, hypertension, and diabetes, often at younger ages, has significantly increased the demand for professional nutritional care. Dietitians play a key role in managing these chronic conditions through specialized diet counseling and support.

8. What are non-nutrient constituents present in foods that have physiological or biological activity and influence health called?
- (A) Nutraceuticals
 - (B) Phytochemicals
 - (C) Medical Foods
 - (D) Health Supplements

Ans :

(B) Phytochemicals

Phytochemicals, also known as bioactive compounds, are non-nutrient substances found in plant-based foods. They possess biological activity that can positively influence health, and their study is a growing area within nutrition science, contributing to the understanding of diet's role in disease prevention.

9. Which of the following pairs is correctly matched?
- (A) Nutraceuticals: Foods formulated for specific dietary needs.
 - (B) Medical Foods: Foods consumed without a doctor's prescription.
 - (C) Phytochemicals: Nutrient constituents that provide energy.
 - (D) Functional Foods: Ordinary foods with no health benefits.

Ans :

(A) Nutraceuticals: Foods formulated for specific dietary needs.

According to FSSAI, nutraceuticals or foods for special dietary uses are specially processed or formulated to satisfy particular dietary requirements that exist due to a specific physical or physiological condition or disorder. This distinguishes them from ordinary foods and other categories like medical foods.

10. Which of the following antioxidants, particularly from food, appear to have a protective role in health?
- (A) Vitamin B12 and Iron
 - (B) Calcium and Vitamin D
 - (C) Selenium and Vitamin C
 - (D) Sodium and Potassium

Ans :

(C) Selenium and Vitamin C

Research indicates that antioxidants like beta-carotene, selenium, vitamin E, and vitamin C have a protective function in the body. Consuming these through food sources is particularly beneficial in preventing cellular damage and supporting overall

health, highlighting the importance of a nutrient-rich diet.

11. A product is specially manufactured to be used under a doctor's supervision for the dietary management of a patient with a specific metabolic disorder. This product would be classified as a:
- (A) Phytochemical
 - (B) Medical Food
 - (C) Nutraceutical
 - (D) Health Supplement

Ans :

(B) Medical Food

Medical foods are specifically formulated and manufactured for the dietary management of a disease or condition that has distinctive nutritional requirements. Crucially, they are intended to be used under the supervision of a physician and are regulated for this specific purpose.

12. What is the primary purpose of diet therapy in patient care?
- (A) To replace all medical treatments with dietary changes.
 - (B) To improve the health of patients with various conditions.
 - (C) To provide standardized meals to all hospitalized patients.
 - (D) To focus solely on weight loss regardless of the illness.

Ans :

(B) To improve the health of patients with various conditions.

Diet therapy is used to improve the overall health of patients suffering from a wide range of conditions. It complements medical treatment by providing nutritional support tailored to the specific disease, aiding in recovery, managing symptoms, and preventing complications.

13. Consider the following as objectives of diet therapy:
1. Formulation of a diet to meet the patient's needs.
 2. Correction of existing nutritional deficiencies.
 3. Education of the patient about adhering to the diet.

Which of the above are correct objectives of diet therapy?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only

(D) 1, 2, and 3

Ans :

(D) 1, 2, and 3

The objectives of diet therapy are comprehensive. They include formulating a diet based on the patient's needs and food habits, correcting any nutritional deficiencies, preventing complications, and educating and counseling the patient to ensure they adhere to the prescribed diet for optimal outcomes.

- 14.** Which of the following is NOT a primary objective of diet therapy?
- (A) Preventing short-term and long-term complications.
 - (B) Modifying existing diets to ameliorate the disease.
 - (C) Ensuring the diet plan is cost-effective for the hospital.
 - (D) Correcting nutritional deficiencies that may be present.

Ans :

(C) Ensuring the diet plan is cost-effective for the hospital.

While cost is a practical consideration, the primary clinical objectives of diet therapy focus on patient health. These include formulating appropriate diets, modifying existing ones to manage the disease, correcting deficiencies, preventing complications, and educating the patient, rather than focusing on hospital economics.

- 15.** The nutritional care process is a systematic approach. What is its first step?
- (A) Planning the nutrition intervention.
 - (B) Monitoring and evaluating outcomes.
 - (C) Diagnosing the nutritional problem.
 - (D) Assessing the patient's nutritional status.

Ans :

(D) Assessing the patient's nutritional status.

The nutritional care process begins with a thorough assessment of the patient's nutritional status. This involves gathering detailed information on their health, diet, personal history, and anthropometric data to identify nutritional problems and needs, which forms the basis for subsequent steps like diagnosis and intervention.

- 16.** In which setting is the nutritional care process applied?
- (A) Only in private hospitals for wealthy patients.
 - (B) Only for clients of fitness and wellness centers.

(C) Only for elderly persons in nursing homes.

(D) In any setting, from clinics to hospitals.

Ans :

(D) In any setting, from clinics to hospitals.

The nutritional care process is a versatile framework applicable to individuals or groups in any setting. This includes healthy individuals at wellness centers, pregnant women, the elderly, and patients in private clinics or hospitals of any kind (municipal, government, charitable, or private).

- 17.** Why is it important for a dietitian to modify diets for disease conditions?
- (A) To keep the patient's cultural background in mind.
 - (B) To ensure all patients eat the same bland food.
 - (C) To provide a standardized menu for easier preparation.
 - (D) To ignore the patient's individual food likes and dislikes.

Ans :

(A) To keep the patient's cultural background in mind.

Modifying diets requires considering the patient's physical state, treatment, and socio-economic and cultural background, including food habits and preferences. This holistic approach ensures the diet plan is not only therapeutically effective but also acceptable and practical for the individual to follow, improving adherence.

- 18.** What is the term for obtaining detailed information on a patient's health, diet, personal history, and anthropometric measurements to determine nutrient needs?
- (A) Nutritional Diagnosis
 - (B) Nutritional Assessment
 - (C) Nutritional Intervention
 - (D) Nutritional Monitoring

Ans :

(B) Nutritional Assessment

Nutritional assessment is the comprehensive process of obtaining and interpreting information needed to identify nutrition-related problems. It involves gathering data from medical and diet histories, anthropometric measurements, physical examinations, and laboratory tests to understand a patient's nutritional status and requirements.

- 19.** Who holds the ultimate responsibility for ensuring that all of a patient's medical needs are met?
- (A) The physician
 - (B) The dietitian
 - (C) The nurse
 - (D) The patient's family

Ans :

- (A) The physician

While the dietitian is a key member of the healthcare team responsible for nutritional care, the physician is ultimately responsible for the overall medical management of the patient. The dietitian works in collaboration with the physician, who provides the medical diagnosis and relies on the dietitian's expertise.

- 20.** A diet that includes all food groups and meets the needs of healthy individuals is known as a:
- (A) Modified diet
 - (B) Therapeutic diet
 - (C) Regular diet
 - (D) Special diet

Ans :

- (C) Regular diet

A regular diet, also called a standard or normal diet, is designed to meet the nutritional needs of healthy individuals. It is well-balanced and includes a variety of foods from all food groups. In a hospital setting, it is typically low in fried foods and strong spices.

- 21.** What is the primary purpose of a modified diet in a clinical setting?
- (A) To make the food more visually appealing for the patient.
 - (B) To reduce the workload of the hospital kitchen staff.
 - (C) To introduce exotic and new food items to the patient.
 - (D) To adjust the diet to meet a patient's medical needs.

Ans :

- (D) To adjust the diet to meet a patient's medical needs.

A modified diet is a therapeutic diet that has been adjusted to meet the specific medical needs of a patient. This can involve changes in consistency, texture, energy content, nutrient levels, or meal frequency to help manage a disease or condition effectively.

- 22.** Which of the following represents a modification in the consistency of a diet?
- (A) Providing a low-sodium meal for a patient with hypertension.
 - (B) Giving a soft diet to a patient who has difficulty chewing.
 - (C) Increasing the protein intake for a post-surgery patient.
 - (D) Offering six small meals instead of three large meals.

Ans :

- (B) Giving a soft diet to a patient who has difficulty chewing.

Modifying the consistency of a diet involves changing its texture to make it easier for a patient to eat. A soft diet is a prime example, prescribed for individuals who have trouble chewing or swallowing. Other modifications relate to nutrient content or meal timing.

- 23.** A diet that is primarily fluid in consistency at room temperature and includes items like milk, soups, and fruit juices is known as a:
- (A) Full fluid diet
 - (B) Clear liquid diet
 - (C) Soft diet
 - (D) Regular diet

Ans :

- (A) Full fluid diet

A full fluid diet, also known as a liquid diet, consists of foods that are liquid at room temperature. It is more nutritionally complete than a clear liquid diet as it includes items like milk and milkshakes, and is used when a patient cannot chew solid food.

- 24.** What is the main difference between a clear liquid diet and a full fluid diet?
- (A) A clear liquid diet includes milk products, while a full fluid diet does not.
 - (B) A clear liquid diet is thicker in consistency than a full fluid diet.
 - (C) A clear liquid diet is nutritionally incomplete, unlike a full fluid diet.
 - (D) A clear liquid diet is prescribed for long-term use for all patients.

Ans :

- (C) A clear liquid diet is nutritionally incomplete, unlike a full fluid diet.

The key limitation of a clear liquid diet (e.g., clear juices, broths) is that it is nutritionally inadequate and cannot meet a person's complete nutritional

requirements. It is typically used for very short periods, such as immediately after surgery, unlike a full fluid diet.

- 25.** Which type of diet provides semi-solid foods that are lightly seasoned and contain minimal fiber or gas-forming ingredients?
- (A) Liquid diet
 - (B) Regular diet
 - (C) High-fiber diet
 - (D) Soft diet

Ans :

(D) Soft diet

A soft diet consists of foods that are soft in texture and easy to chew and digest. It is designed to minimize gastrointestinal stress by being lightly seasoned and low in harsh fiber and gas-forming foods. Examples include khichdi and sago kheer.

- 26.** A mechanical soft diet is specifically designed for which group of individuals?
- (A) Elderly people who have problems with chewing.
 - (B) Patients recovering from abdominal surgery.
 - (C) Athletes requiring high carbohydrate intake.
 - (D) Infants who are being weaned off milk.

Ans :

(A) Elderly people who have problems with chewing.

A mechanical soft diet is a modification of a regular diet where food texture is altered (e.g., chopped, mashed, pureed) to make it easier to chew and swallow. It is specifically intended for individuals, particularly the elderly, who have dental problems or difficulty chewing.

- 27.** An unconscious patient with a functional gastrointestinal tract needs nutritional support. Which feeding route would be most appropriate and preferred?
- (A) Oral feeding by mouth.
 - (B) Intravenous feeding.
 - (C) Tube feeding.
 - (D) A clear liquid diet only.

Ans :

(C) Tube feeding.

For a patient who cannot eat orally (e.g., unconscious) but has a functioning gastrointestinal tract, tube feeding is the preferred method. Nutritionally complete formulas are delivered directly to the stomach or intestine, which is safer

and more physiological than intravenous feeding in this situation.

- 28.** What is the method of nourishing a patient with special solutions given through a drip in a vein called?
- (A) Oral feeding
 - (B) Tube feeding
 - (C) Enteral feeding
 - (D) Intravenous feeding

Ans :

(D) Intravenous feeding

Intravenous (IV) feeding, also known as parenteral nutrition, involves administering a special sterile solution of nutrients directly into a patient's bloodstream through a vein. This method is used when the gastrointestinal tract is non-functional and cannot be used for digestion and absorption.

- 29.** The increased consumption of which of the following has been linked to a higher incidence of obesity and diabetes in urban populations?
- (A) Whole grains and fresh fruits.
 - (B) Refined sugar and high-fat foods.
 - (C) Fibrous vegetables and legumes.
 - (D) Lean proteins and low-fat dairy.

Ans :

(B) Refined sugar and high-fat foods.

Dietary shifts in urban areas, characterized by increased consumption of processed foods high in refined sugar and fat, coupled with a decrease in fiber intake and physical activity, are major contributing factors to the rising prevalence of obesity and type 2 diabetes.

- 30.** Assertion (A): High consumption of processed foods with high sodium content is associated with an increased risk of hypertension.
Reason (R): Decreased intake of potassium-rich fruits and vegetables can contribute to the development of high blood pressure.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(B) Both A and R are true, but R is not the correct explanation of A.

Both statements are true and represent independent risk factors for hypertension. High

sodium intake directly contributes to high blood pressure, and low potassium intake also plays a role. However, the reason (low potassium) does not exclusively explain the assertion (high sodium's effect).

- 31.** Why is a strong knowledge of basic biological sciences like physiology and biochemistry essential for a dietitian?

- (A) To understand the physiological changes that occur in disease.
- (B) To be able to perform surgical procedures on patients.
- (C) To manage the hospital's financial accounts and budgets.
- (D) To design marketing campaigns for food products.

Ans :

- (A) To understand the physiological changes that occur in disease.

A dietitian needs a thorough understanding of physiology and biochemistry to comprehend how disease processes alter the body's normal functions and metabolism. This knowledge is fundamental for planning effective therapeutic diets that address the specific physiological changes and nutrient requirements of a patient.

- 32.** Which of the following skills is most crucial for a dietitian when it comes to diet counseling?

- (A) Advanced culinary skills for gourmet cooking.
- (B) Expertise in financial investment strategies.
- (C) Effective communication and interpersonal skills.
- (D) Knowledge of computer programming and coding.

Ans :

- (C) Effective communication and interpersonal skills.

Effective communication is vital for a dietitian to be a good diet counselor. They must be able to explain complex nutritional information clearly, listen empathetically to the patient's concerns, and build a supportive relationship to motivate the patient to adhere to the prescribed dietary changes.

- 33.** Why is knowledge of psychology and sociology important for a diet counselor?

- (A) To diagnose mental health disorders in patients.
- (B) To understand the emotional and social impact of illness.

- (C) To prescribe psychiatric medication alongside diets.

- (D) To conduct large-scale social research projects.

Ans :

- (B) To understand the emotional and social impact of illness.

Illness affects a person not just physically but also emotionally and mentally. Knowledge of psychology and sociology helps a dietitian understand these impacts, counsel patients more effectively, and address the psychological and social barriers that might prevent them from following their diet plan.

- 34.** What is the minimum educational qualification typically required to begin a career path as a dietitian?

- (A) A B.Sc. degree in Home Science or Nutrition.
- (B) A 10+2 level certificate in any stream.
- (C) A postgraduate diploma in journalism.
- (D) A doctoral degree in physical education.

Ans :

- (A) A B.Sc. degree in Home Science or Nutrition. To pursue a career as a dietitian, one generally needs to complete a Bachelor of Science (B.Sc.) degree in Home Science or a related field with a specialization in Nutrition. This foundational degree provides the necessary scientific knowledge before pursuing further specialization.

- 35.** Arrange the following educational milestones for a career in dietetics in the correct sequence from basic to advanced.

1. M.Sc. in Dietetics
2. B.Sc. in Home Science
3. Postgraduate Diploma in Dietetics
4. 10+2 level examination

- (A) 4, 3, 2, 1
- (B) 4, 2, 3, 1
- (C) 2, 4, 1, 3
- (D) 1, 2, 3, 4

Ans :

- (B) 4, 2, 3, 1

The typical educational pathway starts with the 10+2 examination (preferably with a science background), followed by a B.Sc. degree. After this, one can pursue a Postgraduate Diploma to become a registered dietitian, and then an M.Sc. for further specialization and better employment prospects.

- 36.** What is often required after completing a Postgraduate Diploma in Dietetics to qualify as a “Registered Dietitian”?
- (A) A mandatory period of work in the food industry.
 (B) Publication of a research paper in a journal.
 (C) Passing a national-level sports fitness test.
 (D) Completion of a supervised internship program.

Ans :

(D) Completion of a supervised internship program.

To become a “Registered Dietitian” (RD), completing a postgraduate diploma is often followed by a mandatory, supervised internship. This practical training in a clinical setting is crucial for applying theoretical knowledge and gaining hands-on experience before being professionally certified.

- 37.** To qualify for teaching posts in universities and colleges in India, what is now essential for a candidate to clear?
- (A) The Civil Services Examination.
 (B) A foreign language proficiency test.
 (C) The National or State Eligibility Test (NET/SET).
 (D) A medical entrance examination.

Ans :

(C) The National or State Eligibility Test (NET/SET).

The University Grants Commission (UGC) mandates that candidates aspiring for assistant professor positions in Indian universities and colleges must clear the National Eligibility Test (NET) or an equivalent State Eligibility Test (SET). This ensures a minimum standard for entrants into the teaching profession.

- 38.** What does the expanding scope for research in clinical nutrition primarily focus on?
- (A) Understanding physiological changes caused by disease.
 (B) Developing new flavors for processed foods.
 (C) Creating marketing strategies for health supplements.
 (D) Designing new uniforms for hospital staff.

Ans :

(A) Understanding physiological changes caused by disease.

A key area of expanding research in clinical nutrition is the study of physiological and psychosocial changes that occur due to various diseases. This research helps in developing more effective dietary interventions, understanding nutrient-disease interactions, and improving patient outcomes through evidence-based practice.

- 39.** A professional is hired by a food company to help develop a new line of low-sugar biscuits for diabetic patients. This role falls under which career avenue in nutrition?
- (A) Teaching and academics.
 (B) Research and development (R&D).
 (C) Public health policy design.
 (D) Hospital catering management.

Ans :

(B) Research and development (R&D).

Working in the food industry to develop new products, especially therapeutic or functional foods like low-sugar biscuits, is a key role in Research and Development (R&D). This involves applying knowledge of nutrition and food science to create innovative products that meet specific consumer needs.

- 40.** Where would a dietitian primarily work if their role is to provide nutrition support as a key member of the healthcare team?
- (A) In a corporate office for marketing.
 (B) In a school as a physical education teacher.
 (C) In a hospital or clinical setting.
 (D) In a fast-food restaurant chain.

Ans :

(C) In a hospital or clinical setting.

A dietitian who is part of a healthcare team providing nutrition support works directly with patients in settings like hospitals and clinics. Their role is to assess patients, plan therapeutic diets, and collaborate with doctors and nurses to integrate nutritional care into the overall treatment plan.

- 41.** Match the terms in Column A with their correct descriptions in Column B.

	Column A		Column B
1.	Medical Food	a.	Non-nutrient compounds in food with biological activity

2.	Phytochemical	b.	Food specially processed to satisfy specific dietary needs
3.	Nutraceutical	c.	Diet providing semi-solid, lightly seasoned foods
4.	Soft Diet	d.	Product for dietary management used under a doctor's care

- (A) 1-d, 2-a, 3-b, 4-c
 (B) 1-b, 2-d, 3-c, 4-a
 (C) 1-c, 2-b, 3-a, 4-d
 (D) 1-a, 2-c, 3-d, 4-b

Ans :

- (A) 1-d, 2-a, 3-b, 4-c

Medical Food (1) is used under medical supervision (d). Phytochemicals (2) are non-nutrient bioactive compounds (a). Nutraceuticals (3) are foods for special dietary needs (b). A Soft Diet (4) consists of semi-solid, easy-to-digest foods (c). This matching correctly aligns each term with its definition.

- 42.** Consider the following statements regarding the role of diet in chronic diseases:

1. Increased intake of refined sugar and fat can contribute to obesity.
2. High consumption of salted convenience foods is linked to hypertension.
3. A diet rich in fruits and vegetables is associated with a lower risk of heart disease.
4. Consumption of fiber has no impact on the development of chronic diseases.

Which of the above statements are correct?

- (A) 1 and 4 only
 (B) 2, 3, and 4 only
 (C) 1, 2, and 3 only
 (D) 1, 2, 3, and 4

Ans :

- (C) 1, 2, and 3 only

Statements 1, 2, and 3 are all correct. Diets high in refined sugar/fat contribute to obesity, high sodium intake is linked to hypertension, and fruit/vegetable consumption reduces heart disease risk. Statement 4 is incorrect; adequate fiber intake is crucial for preventing many chronic diseases.

- 43.** A dietitian plans a modified diet for a patient. All of the following are valid modifications EXCEPT:
- (A) Increasing the energy intake.
 (B) Changing the consistency to liquid.

- (C) Including greater amounts of a nutrient.
 (D) Using ingredients the patient is allergic to.

Ans :

- (D) Using ingredients the patient is allergic to.

Diet modification involves adjusting consistency, energy, or nutrient content to meet a patient's medical needs. Including an ingredient to which the patient is allergic would be harmful and counterproductive, making it an unacceptable modification. Patient safety and individual needs are paramount.

- 44.** The term 'Medical Nutrition Therapy' is a recent term for which field?

- (A) Public Health Nutrition
 (B) Clinical Nutrition
 (C) Sports Nutrition
 (D) Food Technology

Ans :

- (B) Clinical Nutrition

'Medical Nutrition Therapy' (MNT) is a more current term used to describe the field of Clinical Nutrition. It emphasizes the therapeutic and evidence-based approach to using nutrition for managing diseases, reflecting the evolution and increasing integration of this practice into mainstream medical care.

- 45.** In the nutritional care process, which step follows the diagnosis of nutritional problems?

- (A) Planning and prioritising nutrition interventions
 (B) Assessing nutritional status
 (C) Repeating the anthropometric measurements
 (D) Discharging the patient from care

Ans :

- (A) Planning and prioritising nutrition interventions

The nutritional care process is a systematic cycle: Assessment, Diagnosis, Intervention, and Monitoring/Evaluation. After assessing the patient and diagnosing the specific nutritional problem, the next logical step is to plan and implement an appropriate nutrition intervention to address that problem.

- 46.** A patient with severe kidney failure would likely be prescribed a diet with a restriction on which nutrient?

- (A) Fiber
 (B) Protein
 (C) Vitamin C

(D) Carbohydrates

Ans :

(B) Protein

In cases of severe kidney failure, the kidneys are unable to effectively filter waste products from protein metabolism. Therefore, a therapeutic diet for such a condition often involves restricting protein intake to reduce the workload on the kidneys and prevent the buildup of toxins.

47. How does a therapeutic soft diet differ from a mechanical soft diet?

- (A) A mechanical soft diet includes spicy and high-fat foods.
- (B) A therapeutic soft diet is for people with chewing problems.
- (C) A mechanical soft diet is always liquid in consistency.
- (D) A therapeutic soft diet is also low in fiber and spices.

Ans :

(D) A therapeutic soft diet is also low in fiber and spices.

While both diets are soft in texture, a mechanical soft diet is purely a textural modification for chewing difficulty. A therapeutic soft diet, however, is also modified in composition—it is bland, low in harsh fiber, fat, and spices to give the digestive system rest.

48. What is the primary advantage of tube feeding over intravenous feeding when the gut is functional?

- (A) Tube feeding is less expensive for the hospital.
- (B) Tube feeding is easier for the nurses to administer.
- (C) Tube feeding maintains the function of the gut.
- (D) Tube feeding allows for a wider variety of foods.

Ans :

(C) Tube feeding maintains the function of the gut.

Using the gastrointestinal (GI) tract for feeding, a method known as enteral nutrition (tube feeding), helps maintain the integrity and function of the gut. It is more physiological and has fewer complications compared to intravenous (parenteral) feeding when the GI tract is functional.

49. Which of the following statements about career scope in dietetics is incorrect?

- (A) Dietitians can work as freelance consultants.
- (B) There are opportunities in the R&D departments of food industries.
- (C) A dietitian's role is limited only to hospital settings.
- (D) Dietitians can become teachers or researchers in academic institutions.

Ans :

(C) A dietitian's role is limited only to hospital settings.

The career scope for dietitians is broad and not confined to hospitals. They can work in health clubs, corporate wellness programs, public health, academia, research, the food industry, and private practice as freelance consultants, reflecting the diverse applications of nutritional science.

50. Assertion (A): The dietitian forms an integral part of the modern medical team.

Reason (R): Nutritional support plays an important role in patient prognosis, recovery, and duration of hospitalization.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The importance of nutritional support in improving patient outcomes (Reason R) is precisely why the role of the dietitian has become integral to the medical team (Assertion A). Good nutrition is now recognized as a critical component of holistic patient care.

51. A diet that excludes spinach for a patient with kidney stones is an example of which type of modification?

- (A) Change in consistency.
- (B) Increase in energy intake.
- (C) Modification in intervals of feeding.
- (D) Restriction of a non-nutritive constituent.

Ans :

(D) Restriction of a non-nutritive constituent.

Spinach is rich in oxalates, a non-nutritive dietary constituent that can contribute to the formation of certain types of kidney stones. Restricting such foods is a specific dietary modification aimed

at managing a particular medical condition by limiting intake of a problematic substance.

- 52.** Beta-carotene, selenium, vitamin E, and vitamin C are examples of what type of compounds with protective roles?
- Probiotics
 - Prebiotics
 - Antioxidants
 - Enzymes

Ans :

(C) Antioxidants

Beta-carotene, selenium, and vitamins E and C are well-known antioxidants. These substances help protect the body's cells from damage caused by free radicals, and their consumption, especially from food sources, is associated with a lower risk of various chronic diseases.

- 53.** Why must a clinical nutritionist have knowledge of food microbiology and safety?
- To ensure food safety, especially in institutional settings.
 - To personally cook all the meals for patients in the hospital.
 - To conduct research on microbes found only in outer space.
 - To prescribe antibiotics to patients with food poisoning.

Ans :

(A) To ensure food safety, especially in institutional settings.

In institutional settings like hospitals, food is prepared in large quantities and served to vulnerable individuals. Knowledge of food microbiology and safety is critical for a clinical nutritionist to prevent foodborne illnesses by ensuring safe food handling, preparation, and storage practices.

- 54.** Which statement accurately describes the relationship between a physician and a dietitian in patient care?
- The dietitian makes the final medical diagnosis for the patient.
 - The physician relies on the dietitian for implementing diet prescriptions.
 - The physician and dietitian work independently without communication.
 - The dietitian has the authority to override the physician's orders.

Ans :

(B) The physician relies on the dietitian for implementing diet prescriptions.

In a collaborative healthcare team, the physician provides the medical diagnosis and overall treatment plan. They then rely on the dietitian's specialized expertise to translate this into a practical and effective diet prescription and to manage the patient's nutritional care accordingly.

- 55.** Match the career avenue in Column A with the corresponding work setting in Column B.

	Column A		Column B
1.	Clinical Dietitian	a.	Developing new therapeutic food products
2.	R&D Nutritionist	b.	Health clubs and gymnasiums
3.	Diet Counsellor	c.	Speciality departments in a hospital
4.	Academician	d.	Teaching and research in a university

(A) 1-b, 2-d, 3-a, 4-c

(B) 1-d, 2-c, 3-b, 4-a

(C) 1-c, 2-a, 3-b, 4-d

(D) 1-a, 2-b, 3-d, 4-c

Ans :

(C) 1-c, 2-a, 3-b, 4-d

A Clinical Dietitian (1) works in hospital departments (c). An R&D Nutritionist (2) develops new food products (a). A Diet Counsellor (3) often works in settings like health clubs (b). An Academician (4) is involved in teaching and research at a university (d).

- 56.** What is the correct sequence of activities in the nutritional care of a patient?
- Monitor the patient's response to the diet.
 - Formulate a therapeutic diet plan.
 - Obtain the patient's diet history and health data.
 - Identify the patient's primary nutritional problem.
- 3, 4, 2, 1
 - 2, 1, 4, 3
 - 4, 3, 1, 2
 - 3, 2, 1, 4

Ans :

(A) 3, 4, 2, 1

The process follows a logical sequence: First, assess the patient by gathering data (3). Second, use the data to diagnose the nutritional problem

(4). Third, plan and implement the intervention or diet plan (2). Finally, monitor and evaluate the outcome (1).

- 57.** A professional clinical nutritionist uses a systematic and logical approach to the nutritional care process, focusing on each patient's unique needs. This approach is best described as:
- (A) Generalized and standardized
 - (B) Individualistic and holistic
 - (C) Economically-driven
 - (D) Strictly theoretical

Ans :

(B) Individualistic and holistic

The cornerstone of modern clinical nutrition is an individualistic and holistic approach. This means considering all aspects of the patient's health, lifestyle, and unique needs to create a personalized care plan, rather than applying a one-size-fits-all solution.

- 58.** Which of the following is an example of a condition where diet therapy plays a major role in management and treatment?
- (A) Broken bones
 - (B) Common cold
 - (C) Minor cuts
 - (D) Diabetes

Ans :

(D) Diabetes

Diabetes is a prime example of a chronic disease where diet therapy is a cornerstone of management. Controlling carbohydrate intake, meal timing, and overall food choices is crucial for managing blood sugar levels and preventing long-term complications, complementing medical treatment.

- 59.** Why is a postgraduate degree like an M.Sc. in Food Science and Nutrition often preferred for employment as a dietitian?
- (A) It provides a deeper level of specialization in the field.
 - (B) It allows the person to skip the internship requirement.
 - (C) It is the only way to become a freelance diet consultant.
 - (D) It focuses primarily on the business aspects of nutrition.

Ans :

(A) It provides a deeper level of specialization in the field.

An M.Sc. degree offers advanced, specialized knowledge and research skills beyond the undergraduate level. Employers often prefer candidates with a Master's degree as it indicates a higher level of expertise and competence in the complex field of dietetics and clinical nutrition.

- 60.** An elderly man has no teeth and also has difficulty swallowing. Which diet would be most suitable for him?
- (A) A regular diet with extra spices.
 - (B) A high-fiber diet with whole grains.
 - (C) A clear liquid diet for long-term use.
 - (D) A mechanical soft diet with pureed foods.

Ans :

(D) A mechanical soft diet with pureed foods.

For an individual with no teeth (edentulous) and difficulty swallowing (dysphagia), a mechanical soft diet with a pureed consistency is most appropriate. This texture minimizes the need for chewing and reduces the risk of choking, ensuring safe and adequate nutritional intake.

- 61.** Consider the following regarding a soft diet:
1. It contains semi-solid foods.
 2. It includes highly seasoned and fibrous foods.
 3. It is easy to chew and digest.
- Which of the above statements about a soft diet are correct?
- (A) 1 and 2 only
 - (B) 2 and 3 only
 - (C) 1 and 3 only
 - (D) 1, 2, and 3

Ans :

(C) 1 and 3 only

A soft diet consists of semi-solid foods (1) that are easy to chew and digest (3). Statement (2) is incorrect because a therapeutic soft diet specifically excludes highly seasoned, fibrous, or gas-forming foods to minimize gastrointestinal distress and provide rest to the digestive system.

- 62.** Which of the following is NOT a skill required by a professional clinical nutritionist?
- (A) Assessing the nutritional status of patients.
 - (B) Performing minor surgical procedures.
 - (C) Recommending and administering diets to patients.
 - (D) Communicating effectively for diet counseling.

Ans :

(B) Performing minor surgical procedures.

The role of a clinical nutritionist involves assessment, diet planning, administration, and counseling. Surgical procedures are medical interventions performed by physicians and are completely outside the scope of practice for a nutritionist or dietitian.

- 63.** All of the following are objectives of diet therapy EXCEPT:

- (A) Correction of nutritional deficiencies.
- (B) Prevention of long-term complications.
- (C) Modification of the diet to suit the disease.
- (D) Promotion of a sedentary lifestyle.

Ans :

- (D) Promotion of a sedentary lifestyle.

Diet therapy aims to improve health. Promoting a sedentary lifestyle is contrary to this goal, as physical activity is crucial for managing most chronic diseases and promoting overall well-being. Dietitians encourage a healthy lifestyle, which includes appropriate physical activity.

- 64.** Match the type of diet modification in Column A with its example in Column B.

	Column A		Column B
1.	Change in consistency	a.	A diet lower in fat content
2.	Change in nutrients	b.	Providing six small meals daily
3.	Change in interval	c.	A diet of pureed foods
4.	Change in feeding route	d.	Administering feed via a tube

- (A) 1-c, 2-a, 3-b, 4-d
- (B) 1-b, 2-d, 3-a, 4-c
- (C) 1-d, 2-c, 3-b, 4-a
- (D) 1-a, 2-b, 3-d, 4-c

Ans :

- (A) 1-c, 2-a, 3-b, 4-d

Changing to pureed foods (c) is a consistency modification (1). A lower fat diet (a) is a nutrient modification (2). Six small meals (b) is a change in feeding interval (3). Tube feeding (d) is a change in the feeding route (4).

- 65.** What is the primary focus of a professional who studies clinical nutrition and dietetics?

- (A) Promoting health for the general community.
- (B) Managing food services in industrial canteens.
- (C) Planning diets to meet requirements in

disease.

- (D) Developing marketing plans for fast food chains.

Ans :

- (C) Planning diets to meet requirements in disease.

The core focus of clinical nutrition and dietetics is the application of nutrition science to manage disease. This involves planning and modifying diets to meet the specific nutritional requirements of patients, thereby supporting their medical treatment and improving their health outcomes.

- 66.** Nutritional assessment involves obtaining information on medication histories because:

- (A) Medications have no effect on nutritional status.
- (B) Certain drugs can interfere with nutrient utilization.
- (C) Dietitians are authorized to prescribe medications.
- (D) It helps in calculating the cost of treatment.

Ans :

- (B) Certain drugs can interfere with nutrient utilization.

A patient's medication history is crucial because many drugs can affect nutritional status by interfering with the absorption, metabolism, or excretion of nutrients. Understanding these drug-nutrient interactions is essential for a dietitian to create an effective and safe nutritional care plan.

- 67.** Foods like beta-carotene-rich carrots and omega-3-rich fish, which appear to have a protective role in health, are examples of what concept?

- (A) The role of diet in disease prevention.
- (B) The importance of calorie restriction.
- (C) The necessity of food supplements.
- (D) The benefits of a non-vegetarian diet.

Ans :

- (A) The role of diet in disease prevention.

The evidence linking consumption of specific foods and nutrients (like antioxidants in carrots or omega-3s in fish) to reduced risk of diseases like heart disease illustrates the powerful role of diet in disease prevention. This concept is a cornerstone of both clinical and public health nutrition.

- 68.** A dietitian is helping an athlete plan their meals for optimal performance. This work falls under the broader umbrella of:

- (A) Planning diets for individuals in special situations.
- (B) Managing food services in an old age home.
- (C) Promoting health in a community setting.
- (D) Modifying diets for a patient with tuberculosis.

Ans :

- (A) Planning diets for individuals in special situations.

The scope of dietetics extends beyond disease management to include planning diets for individuals in special circumstances. This includes athletes, astronauts, defense personnel, and industrial workers, all of whom have unique nutritional requirements based on their specific activities and environments.

- 69.** Assertion (A): Illness and disease can lead to nutrient imbalances even in a person with previously good nutritional status.
Reason (R): Disease can impair a person's ability to eat, digest, absorb, and metabolize food.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

- (A) Both A and R are true, and R is the correct explanation of A.

The reason (R) perfectly explains the assertion (A). Illness can disrupt the entire process of nutrient utilization, from intake to metabolism. This disruption is the direct cause of the nutrient imbalances that can develop even in someone who was previously well-nourished.

- 70.** Which of the following statements about nutritional assessment are correct?
1. It includes obtaining a detailed diet history.
 2. It involves taking anthropometric measurements.
 3. It uses laboratory data to identify deficiencies.
 4. It is performed solely by the patient's family members.
- (A) 1, 2, and 4 only
 - (B) 1, 3, and 4 only
 - (C) 2, 3, and 4 only
 - (D) 1, 2, and 3 only

Ans :

- (D) 1, 2, and 3 only

A comprehensive nutritional assessment is a multi-faceted process conducted by a trained professional. It includes taking diet histories (1), anthropometric measurements like height and weight (2), and analyzing laboratory results (3). It is not a task performed by family members (4).

- 71.** What is the most preferred route for feeding a patient, provided they are able to use it?

- (A) Tube feeding
- (B) Intravenous feeding
- (C) Oral feeding
- (D) Gastrostomy feeding

Ans :

- (C) Oral feeding

Oral feeding (eating by mouth) is the most natural, preferred, and safest route for providing nutrition. Alternative methods like tube or intravenous feeding are only used when a patient is unable to eat or absorb nutrients sufficiently through the normal oral route due to a medical condition.

- 72.** The field of dietetics has evolved into a practice that is increasingly incorporated into mainstream medical treatment. What does this imply?

- (A) Dietitians are replacing physicians in hospitals.
- (B) Nutrition is now seen as a critical part of patient care.
- (C) Medical treatments are no longer considered necessary.
- (D) Food is only important for its psychological effects.

Ans :

- (B) Nutrition is now seen as a critical part of patient care.

The integration of dietetics into medical treatment signifies a growing recognition that nutrition is a fundamental component of holistic patient care. It is not a replacement for medicine but a crucial partner in improving health outcomes, managing disease, and speeding recovery.

- 73.** Which of the following professional roles and responsibilities is correctly paired?

- (A) Clinical Nutritionist: Manages public health campaigns for entire nations.
- (B) Medical Nutrition Therapist: Translates technical information into dietary guidelines.
- (C) Diet Counsellor: Focuses only on the biochemical analysis of food.

(D) Dietitian: Conducts experimental research on animal nutrition only.

Ans :

(B) Medical Nutrition Therapist: Translates technical information into dietary guidelines.

A key function of a medical nutrition therapist/dietitian is to take complex scientific and medical information and translate it into practical, easy-to-understand dietary guidelines and meal plans that patients can follow to manage their health.

- 74.** A diet that has been adjusted in its energy content, nutrient composition, or texture to treat a disease is called a:

- (A) Regular Diet
- (B) Balanced Diet
- (C) Fad Diet
- (D) Therapeutic Diet

Ans :

(D) Therapeutic Diet

A therapeutic diet is a meal plan that controls the intake of certain foods or nutrients as part of the treatment for a medical condition. It is a modified version of a regular diet, tailored to the specific needs of an individual patient.

- 75.** A person just after surgery is prescribed clear soups, clear juices without pulp, and very light tea. This is an example of a:

- (A) Clear liquid diet
- (B) Full fluid diet
- (C) Soft diet
- (D) Regular diet

Ans :

(A) Clear liquid diet

A clear liquid diet consists of only transparent fluids and is prescribed for short durations when the digestive system needs minimal work, such as immediately following surgery. It is nutritionally inadequate and serves to provide hydration and some electrolytes before transitioning to other diets.

- 76.** In addition to hospitals, where can dietitians with expertise in speciality areas find employment?

- (A) Construction sites
- (B) Law firms
- (C) Wellness centers and gyms
- (D) Automotive factories

Ans :

(C) Wellness centers and gyms

The expertise of dietitians is in demand beyond traditional hospital settings. Wellness centers, health clubs, and gymnasiums frequently employ dietitians and diet counsellors to provide nutritional guidance to clients aiming to improve their fitness, manage weight, and enhance overall health.

- 77.** Why is it important for a dietitian to stay updated with new scientific knowledge in nutrition?

- (A) To recommend the latest and most expensive supplements.
- (B) To ensure their practice is based on current evidence.
- (C) To create more complicated and difficult diet plans.
- (D) To focus on old, outdated nutritional theories.

Ans :

(B) To ensure their practice is based on current evidence.

The field of nutrition is constantly evolving with new research. It is crucial for a dietitian to stay updated to ensure their recommendations are evidence-based, effective, and safe. This commitment to lifelong learning is a hallmark of a competent healthcare professional.

- 78.** Match the health professional in Column A with their primary responsibility in Column B.

	Column A		Column B
1.	Physician	a.	Counsels patients on diet adherence
2.	Dietitian	b.	Provides the overall medical diagnosis
3.	Diet Counsellor	c.	Plans diets to meet specific medical needs
4.	Clinical Researcher	d.	Conducts studies on the usefulness of various diets

- (A) 1-b, 2-c, 3-a, 4-d
- (B) 1-a, 2-b, 3-c, 4-d
- (C) 1-c, 2-a, 3-d, 4-b
- (D) 1-d, 2-c, 3-b, 4-a

Ans :

(A) 1-b, 2-c, 3-a, 4-d

The Physician (1) gives the medical diagnosis (b). The Dietitian (2) plans therapeutic diets (c). The Diet Counsellor (3) specifically focuses on helping patients adhere to their diet (a). The Clinical

Researcher (4) conducts studies to find evidence for diet efficacy (d).

- 79.** Which of the following statements is true regarding diet modifications?
- (A) All modified diets are liquid in consistency.
 - (B) Modified diets are only for weight loss.
 - (C) A regular diet is a type of modified diet.
 - (D) A modified diet is adjusted for a patient's medical needs.

Ans :

(D) A modified diet is adjusted for a patient's medical needs.

The defining characteristic of a modified diet is that it is altered from a regular diet to meet the specific therapeutic needs of a patient. Modifications can vary widely, including changes in texture, nutrients, energy, or meal timing, and are not limited to one type.

- 80.** The ability of a dietitian to understand and share the feelings of a patient dealing with a difficult health diagnosis is an example of which crucial skill?
- (A) Bookkeeping
 - (B) Empathy
 - (C) Time management
 - (D) Technical writing

Ans :

(B) Empathy

Empathy, the ability to understand and share the feelings of another, is a critical skill for a dietitian, especially in a counseling role. It helps in building trust and a strong therapeutic relationship, which is essential for motivating patients to make and sustain difficult dietary changes.

- 81.** What fundamental principle links health and nutrition so intimately?
- (A) Poor nutrition can only cause minor health issues.
 - (B) Good health is solely dependent on genetic factors.
 - (C) Poor nutrition can worsen existing health problems.
 - (D) Health problems have no impact on nutritional status.

Ans :

(C) Poor nutrition can worsen existing health problems.

The link between health and nutrition is bidirectional; poor nutrition not only leads to

health problems but can also exacerbate existing ones. Illness can impair nutrient utilization, and poor nutritional status can hinder recovery, creating a vicious cycle that underscores their intimate connection.

- 82.** According to FSSAI, foods for special dietary uses may contain which of the following ingredients?
- (A) Plants or botanicals or their parts.
 - (B) Genetically modified organisms only.
 - (C) High levels of artificial preservatives.
 - (D) Unlimited amounts of vitamins.

Ans :

(A) Plants or botanicals or their parts.

The FSSAI guidelines for foods for special dietary uses permit the inclusion of various ingredients, including plants, botanicals or their extracts, minerals, vitamins (not exceeding the RDA), proteins, and substances from animal origin, allowing for the formulation of specialized nutritional products.

- 83.** In a clinical context, what does the term 'prognosis' refer to?
- (A) The diagnosis of the disease.
 - (B) The cost of the medical treatment.
 - (C) The patient's personal food preferences.
 - (D) The likely course of a disease.

Ans :

(D) The likely course of a disease.

Prognosis refers to the predicted or likely course and outcome of a disease. Nutritional status plays a significant role in a patient's prognosis, as good nutrition can support recovery and improve the overall outlook, while poor nutrition can lead to complications and a worse prognosis.

- 84.** A patient complains of heartburn and hyperacidity. A dietitian would likely advise a diet that is:
- (A) High in spicy and fried foods to test tolerance.
 - (B) Low in acidic foods and irritants.
 - (C) Composed entirely of clear liquids.
 - (D) Rich in caffeine and carbonated beverages.

Ans :

(B) Low in acidic foods and irritants.

For conditions like hyperacidity and heartburn, diet therapy aims to reduce irritation to the gastrointestinal tract. A dietitian would recommend avoiding spicy, fried, and acidic foods that can trigger or worsen symptoms, and instead focus on bland, easy-to-digest foods.

- 85.** What is the primary reason for educating and counseling a patient about their prescribed diet?
- (A) To ensure the patient understands the cost of the food.
 - (B) To test the patient's memory and cognitive skills.
 - (C) To encourage adherence to the diet for better outcomes.
 - (D) To fulfill a mandatory hospital documentation requirement.

Ans :

(C) To encourage adherence to the diet for better outcomes.

Education and counseling are crucial objectives of diet therapy because they empower the patient with knowledge and motivation. When patients understand the rationale behind their diet and how to follow it, they are more likely to adhere to the plan, leading to better management of their condition.

- 86.** Which of the following statements correctly describes the nutritional care process?
- (A) It is a single-step process of providing a meal plan.
 - (B) It is a standardized process applied identically to all patients.
 - (C) It is focused only on patients in intensive care units.
 - (D) It is an organized group of activities including assessment.

Ans :

(D) It is an organized group of activities including assessment.

The nutritional care process is a systematic and organized set of activities. It includes assessing nutritional status, diagnosing problems, planning and implementing interventions, and monitoring outcomes. This structured approach ensures comprehensive and effective care for the individual patient.

- 87.** Unlike a regular diet in a hospital, a modified diet is primarily characterized by its:
- (A) Adjustment to meet specific medical needs.
 - (B) Higher cost and exotic ingredients.
 - (C) Universal suitability for all patients.
 - (D) Focus on presentation over nutrition.

Ans :

(A) Adjustment to meet specific medical needs.

The key difference between a regular and a modified diet is the therapeutic purpose. A regular diet meets the needs of a healthy person, while a modified diet is specifically tailored—in consistency, nutrients, or other aspects—to manage a patient's particular illness or health condition.

- 88.** For a patient with a functional gut but who is unable to swallow, what is the advantage of using tube feeding?
- (A) It is the only method to provide hydration.
 - (B) The nutrients are more easily absorbed intravenously.
 - (C) It can deliver nutritionally complete feeds.
 - (D) It requires no specialized equipment or formula.

Ans :

(C) It can deliver nutritionally complete feeds.

A major advantage of tube feeding is its ability to provide a nutritionally complete formula directly into the stomach or intestine. This ensures the patient receives all necessary macro and micronutrients for recovery, which is often difficult to achieve with other methods like clear liquid diets.

- 89.** What is the term for a diet where food is soft, mashed, or pureed specifically to help elderly individuals with chewing problems?
- (A) Therapeutic Soft Diet
 - (B) Full Fluid Diet
 - (C) Mechanical Soft Diet
 - (D) Regular Hospital Diet

Ans :

(C) Mechanical Soft Diet

A mechanical soft diet is defined by its modification in texture to accommodate chewing difficulties, common in the elderly. The food is physically altered (mashed, pureed) to make it easy to manage orally, while the nutritional content may be similar to a regular diet.

- 90.** Assertion (A): A clinical nutritionist can play an important role in preventing chronic diseases.
Reason (R): They provide appropriate diet counseling and guidance to promote healthy lifestyle choices.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.

- (C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

Clinical nutritionists contribute to disease prevention (Assertion A) precisely because they are trained to provide expert diet counseling and guidance (Reason R). By helping people make healthier food and lifestyle choices, they can delay or prevent the onset of chronic conditions like diabetes.

- 91.** Consider the dietary changes observed in urban Indian populations:
1. Fat consumption has decreased.
 2. Refined sugar consumption has increased.
 3. Intake of dietary fiber has increased.
 4. Consumption of animal protein has increased in non-vegetarians.

Which of the above statements are correct?

- (A) 1 and 3 only
(B) 2 and 4 only
(C) 1, 2, and 3 only
(D) 2, 3, and 4 only

Ans :

(B) 2 and 4 only

Studies on urban dietary trends show an increase in refined sugar (2) and, among non-vegetarians, an increase in animal protein (4). Conversely, fat consumption has generally increased, not decreased, and fiber intake has reduced, making statements 1 and 3 incorrect.

- 92.** Why is knowledge of quantity food production essential for a dietitian working in an institutional setting?
- (A) To personally cook every meal for the institution.
(B) To effectively manage the food service department.
(C) To conduct academic research on food history.
(D) To ensure all food served is imported and exotic.

Ans :

(B) To effectively manage the food service department.

In institutions like hospitals or old age homes, a dietitian is often involved in managing the food service. Knowledge of quantity food production is essential for planning menus, procuring supplies,

ensuring food safety, and managing staff to provide nutritious meals on a large scale.

- 93.** Which academic subject is particularly important for a dietitian to become a good diet counsellor, as it deals with the science of behavior and mind?
- (A) Chemistry
(B) Physics
(C) Geology
(D) Psychology

Ans :

(D) Psychology

Psychology is crucial for a diet counsellor because it provides an understanding of human behavior, motivation, and the emotional impact of illness. This knowledge enables the dietitian to connect with patients, address psychological barriers to change, and provide more effective, empathetic counseling.

- 94.** A promising career in Clinical Nutrition and Dietetics requires all the following EXCEPT:
- (A) A keen interest in how food can treat disease conditions.
(B) The ability to work as part of a healthcare team.
(C) Strong knowledge of nutrition and biological sciences.
(D) An advanced degree in architecture and design.

Ans :

(D) An advanced degree in architecture and design.

A career in this field requires a deep interest in food's therapeutic role, teamwork skills, and a strong scientific foundation. A degree in architecture is irrelevant to the core competencies needed to be a dietitian or clinical nutritionist.

- 95.** Arrange the steps a dietitian takes when managing a patient's nutritional care in the correct order.
1. Prescribe the therapeutic diet.
 2. Interpret all data to identify nutritional deficiencies.
 3. Obtain detailed information on health and diet history.
 4. Counsel the patient on the importance of the diet.
- (A) 3, 2, 1, 4
(B) 2, 3, 4, 1
(C) 1, 4, 3, 2
(D) 4, 1, 2, 3

Ans :

(A) 3, 2, 1, 4

The logical flow of patient care begins with assessment, which involves gathering detailed information (3). This data is then interpreted to make a nutritional diagnosis (2). Based on this, a therapeutic diet is prescribed (1), followed by counseling to ensure adherence (4).

96. A dietitian's role in providing prescriptions to healthy individuals at different life stages to maintain good health falls under what aspect of nutrition?

(A) Curative nutrition
(B) Palliative nutrition
(C) Preventive nutrition
(D) Therapeutic nutrition

Ans :

(C) Preventive nutrition

When a dietitian advises healthy individuals on how to eat to maintain health and prevent future illness, they are practicing preventive nutrition. This proactive approach contrasts with therapeutic nutrition, which focuses on managing existing diseases.

97. A patient with tuberculosis needs nutritional support to combat the disease and aid recovery. Their diet would likely need to be modified to:
- (A) Decrease protein and energy intake.
(B) Increase protein and energy intake.
(C) Eliminate all carbohydrates.
(D) Restrict fluid intake severely.

Ans :

(B) Increase protein and energy intake.

Diseases like tuberculosis create significant nutritional stress and increase the body's requirements. A therapeutic diet would focus on increasing the intake of both energy and high-quality protein to fight the infection, prevent muscle wasting, and support the healing process.

98. What is the primary reason that the field of clinical nutrition is considered to have a promising future?
- (A) A decreasing interest in health and wellness globally.
(B) The successful eradication of all chronic diseases.
(C) Increasing acceptance of nutrition in treating diseases.
(D) A decline in the number of hospitals and

clinics.

Ans :

(C) Increasing acceptance of nutrition in treating diseases.

The future of clinical nutrition is promising because the relevance of nutritional interventions in preventing, treating, and curing diseases is being increasingly recognized and accepted within the medical community and by the public. This drives demand for skilled professionals and further research.

99. Match the type of professional in Column A with their likely work activity in Column B.

	Column A		Column B
1.	Freelance Dietitian	a.	Teaching dietetics courses in a college
2.	Hospital Dietitian	b.	Developing new nutraceuticals for a company
3.	Nutrition Researcher	c.	Running their own private consultation practice
4.	Academic Dietitian	d.	Providing nutrition support in an oncology unit

(A) 1-c, 2-d, 3-b, 4-a
(B) 1-b, 2-a, 3-d, 4-c
(C) 1-d, 2-c, 3-a, 4-b
(D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-c, 2-d, 3-b, 4-a

A Freelance Dietitian (1) would run a private practice (c). A Hospital Dietitian (2) would work in clinical units (d). A Nutrition Researcher (3) could work in R&D for a company (b). An Academic Dietitian (4) would teach in a college (a).

100. What is the term for specially processed or formulated foods, as per FSSAI, that satisfy particular dietary requirements due to a specific physiological condition or disease?
- (A) Organic foods
(B) Generic foods
(C) Staple foods
(D) Functional foods

Ans :

(D) Functional foods

The FSSAI definition describes foods for special dietary uses, which include functional foods, nutraceuticals, or health supplements. These are distinct from ordinary foods because they are specifically formulated to meet the dietary needs arising from a particular health condition.

101. What is the fundamental difference between ‘sex’ and ‘gender’ in a sociological context?

- (A) Sex is biological, while gender is a social identity.
- (B) Gender is biological, while sex is a social identity.
- (C) The terms are identical and can be used interchangeably.
- (D) Sex refers to behavior, while gender refers to organs.

Ans :

(A) Sex is biological, while gender is a social identity.

‘Sex’ refers to the biological categorization of male or female based on genetics and reproductive organs. ‘Gender’, in contrast, is a social construct, referring to the roles, behaviors, and identities that a society considers appropriate for men and women.

102. Why is it said that gender is “socially constructed”?

- (A) Because gender identity is determined solely by genetics at birth.
- (B) Because gender roles are defined by unwritten social and cultural norms.
- (C) Because gender can be chosen and changed freely on a daily basis.
- (D) Because gender is a fixed and universal concept across all cultures.

Ans :

(B) Because gender roles are defined by unwritten social and cultural norms.

Gender is considered socially constructed because societies create and enforce norms and expectations for how different genders should behave. These roles are learned and passed down through generations, shaping an individual’s identity and are not based on biological determinism.

103. In rural India, women are intensively and extensively involved in which two sectors?

- (A) Software development and finance.
- (B) Space exploration and aviation.
- (C) Professional sports and entertainment.
- (D) Agriculture and animal husbandry.

Ans :

(D) Agriculture and animal husbandry.

Women in rural India have historically been and continue to be major contributors to the economy through their extensive involvement in agricultural activities, from sowing to harvesting, as well as in the care and management of livestock (animal husbandry).

104. What does the term “double burden” on working women refer to?

- (A) Working two different paid jobs simultaneously.
- (B) Paying double the amount of income tax as men.
- (C) Managing paid work and most household chores.
- (D) Having to pursue education while also working.

Ans :

(C) Managing paid work and most household chores.

The “double burden” refers to the phenomenon where women who participate in the paid workforce are still expected to perform the majority of unpaid domestic labor, including household chores and caregiving. This creates a significant workload and pressure on their time and energy.

105. Which of the following is a major issue and concern related to women and work in modern India?

- (A) Lack of security and safety at the workplace for women.
- (B) Women are always paid more than men for the same work.
- (B) Women’s earnings are always considered the primary family income.
- (D) There are too many skill development opportunities for women.

Ans :

(A) Lack of security and safety at the workplace for women.

Despite constitutional guarantees, women in the workforce face several challenges, including a lack of safety and security at the workplace, which remains a significant concern. Other issues include wage gaps, the perception of their income as supplementary, and the double burden of work.

- 106.** Which article of the Constitution of India guarantees equality of opportunity for all citizens in matters relating to employment?
- (A) Article 14
 - (B) Article 21
 - (C) Article 16 (1)
 - (D) Article 19

Ans :

(C) Article 16 (1)

Article 16 (1) of the Indian Constitution explicitly guarantees equality of opportunity for all citizens in matters of employment or appointment to any office under the State. It forbids discrimination on grounds of religion, race, caste, sex, descent, place of birth, or residence.

- 107.** The Factories Act of 1948 mandates that creches should be maintained in a factory if what condition is met?
- (A) If the factory employs more than 50 workers in total.
 - (B) If more than 30 women are employed in the factory.
 - (C) If the factory produces goods for international export.
 - (D) If the factory has been operating for over ten years.

Ans :

(B) If more than 30 women are employed in the factory.

Section 48 of the Factories Act, 1948, makes it mandatory for factories employing more than 30 women workers to provide and maintain a suitable crèche for the use of children under the age of six. This provision is a crucial support measure for working mothers.

- 108.** Arrange the evolution of approaches to women's programmes in India in the correct chronological order.
- 1. Development approach
 - 2. Equality of opportunity approach
 - 3. Welfare approach
- (A) 3, 2, 1
 - (B) 1, 2, 3
 - (C) 2, 3, 1
 - (D) 3, 1, 2

Ans :

(A) 3, 2, 1

The approach to women's programmes has evolved over time. Early programmes were based

on a welfare approach (3), viewing women as passive recipients of benefits. This shifted to a focus on equality of opportunity (2), and finally to a development approach (1), recognizing women as active participants in development.

- 109.** Which of the following is NOT a characteristic of the Kasturba Gandhi Balika Vidyalyaya (KGBV) scheme?
- (A) It is primarily for boys from urban affluent families.
 - (B) It aims to educate never-enrolled and dropout girls.
 - (C) It provides education in residential schools in backward blocks.
 - (D) It has been extended up to Class XII under Samagra Shiksha.

Ans :

(A) It is primarily for boys from urban affluent families.

The KGBV scheme is specifically designed for girls from disadvantaged sections of society in rural and remote areas. Its purpose is to bring out-of-school girls into the educational system, making the statement that it's for affluent urban boys incorrect.

- 110.** An organization provides employment to thousands of women, enabling them to earn a dignified livelihood by producing and selling products like papads and masalas. This organization exemplifies:
- (A) A government-run military institution.
 - (B) A corporate technology firm.
 - (C) A multinational banking corporation.
 - (D) An organized effort for women's empowerment.

Ans :

(D) An organized effort for women's empowerment. This description perfectly matches organizations like Shri Mahila Griha Udyog Lijjat Papad, which are social enterprises focused on empowering women economically. They operate on a cooperative model, providing self-employment and financial independence to a large number of women members.

- 111.** An individual's job satisfaction is considerably influenced by their attitude. What does this imply?
- (A) The nature of the job itself has no impact on satisfaction.
 - (B) A person's perception of their work is a key

factor.

- (C) Only the salary determines an individual's job satisfaction.
- (D) Job satisfaction is guaranteed if the work is easy.

Ans :

(B) A person's perception of their work is a key factor.

This implies that job satisfaction is not solely determined by external factors like salary or job tasks. An individual's attitude and how they perceive their work situation—whether they see it as fulfilling and meaningful or as a burden—play a significant role in their overall satisfaction.

- 112.** What does the term "Quality of Work Life" (QWL) primarily incorporate?
- (A) Only the financial compensation received for a job.
 - (B) The physical attractiveness of the office building.
 - (C) The number of holidays provided by the organization.
 - (D) Both work-based factors and general feelings of well-being.

Ans :

(D) Both work-based factors and general feelings of well-being.

QWL is a holistic concept that goes beyond just pay. It includes job satisfaction, relationships with colleagues, work-life balance, stress levels, and opportunities for growth, all of which contribute to the employee's overall well-being and positive experience at work.

- 113.** Which of the following actions helps in creating a healthy work environment?
- (A) Ignoring the individual needs and expectations of employees.
 - (B) Treating people unequally based on their position.
 - (C) Fostering team spirit and providing constructive feedback.
 - (D) Avoiding delegation of tasks to any employees.

Ans :

(C) Fostering team spirit and providing constructive feedback.

A healthy work environment is built on positive practices. Fostering teamwork, encouraging employees, providing support, delegating authority, and offering constructive feedback are

key strategies that boost morale, loyalty, and productivity, creating a positive and motivating atmosphere for everyone.

- 114.** According to the World Health Organisation (WHO), life skills are abilities for adaptive and positive behavior that enable individuals to:
- (A) Deal effectively with the demands of everyday life.
 - (B) Perform complex mathematical calculations.
 - (C) Achieve professional-level athletic performance.
 - (D) Memorize large amounts of historical information.

Ans :

(A) Deal effectively with the demands of everyday life.

The WHO defines life skills as the abilities that help individuals navigate the challenges and demands of daily life effectively. These psychosocial competencies, such as problem-solving, communication, and stress management, are crucial for personal well-being and positive social interaction.

- 115.** The ten core sets of life skills identified by experts include all of the following EXCEPT:
- (A) Self-awareness and empathy.
 - (B) Decision making and problem solving.
 - (C) Advanced computer programming.
 - (D) Coping with stress and emotions.

Ans :

(C) Advanced computer programming.

The core life skills are psychosocial abilities applicable across all life domains. While computer programming is a valuable technical skill, it is not one of the ten core life skills, which include self-awareness, critical thinking, communication, and coping strategies.

- 116.** How are life skills best acquired?
- (A) By memorizing definitions from a textbook.
 - (B) Through experiential learning and practice.
 - (C) By listening to a single lecture on the topic.
 - (D) Solely through genetic inheritance from parents.

Ans :

(B) Through experiential learning and practice. Life skills are not theoretical knowledge but practical competencies. They cannot be taught like academic subjects in a classroom but are best acquired through hands-on, experiential learning.

Practicing these skills in real-life situations helps individuals internalize and apply them effectively.

- 117.** An employee interacts with their supervisors and peers with an empathetic approach, remembering their interdependence. This behavior primarily helps in:
- (A) Generating goodwill and positive outcomes.
 - (B) Creating a competitive and hostile workplace.
 - (C) Focusing only on individual achievements.
 - (D) Avoiding all forms of communication at work.

Ans :

(A) Generating goodwill and positive outcomes. Adopting an empathetic approach and recognizing interdependence at the workplace builds positive relationships. This fosters goodwill, cooperation, and mutual support among colleagues, which in turn leads to better teamwork, higher job satisfaction, and more successful outcomes for both the individual and the organization.

- 118.** Which of the following is a key aspect of maintaining professional ethics at the workplace?
- (A) Sharing confidential company information with competitors.
 - (B) Taking credit for the work done by other team members.
 - (C) Prioritizing personal tasks over professional responsibilities.
 - (D) Maintaining loyalty and commitment to the organization.

Ans :

(D) Maintaining loyalty and commitment to the organization.

Professional ethics involves a set of moral principles that guide conduct at work. Maintaining loyalty to the organization, being committed to its goals, acting with integrity, and respecting colleagues are fundamental aspects of ethical behavior that build trust and a positive professional reputation.

- 119.** What is the difference between being 'responsive' and 'reactive' in a work situation?
- (A) Responding is emotional, while reacting is calm.
 - (B) Responding involves calm examination, while reacting is emotional.
 - (C) There is no difference; the terms are interchangeable.
 - (D) Reacting is a positive trait, while responding is negative.

Ans :

(B) Responding involves calm examination, while reacting is emotional.

Being responsive means examining a situation calmly and realistically before deciding on a course of action. In contrast, being reactive involves an immediate, often emotional, and less thoughtful outburst. In professional settings, a responsive attitude is far more constructive than a reactive one.

- 120.** Which of the following is considered one of the 'Essential Soft Skills at Workplace'?
- (A) Communicating clearly and working cooperatively.
 - (B) Avoiding all forms of critical or creative thinking.
 - (C) Working in isolation without offering any support.
 - (D) Being rigid and unwilling to learn new things.

Ans :

(A) Communicating clearly and working cooperatively.

Essential soft skills for the workplace include effective communication (writing, speaking, listening) and the ability to work cooperatively as part of a team. These skills are vital for completing tasks, solving problems, and maintaining a productive and harmonious work environment.

- 121.** What is the concept that a person takes pride in whatever work she/he does, regardless of whether it is considered menial or superior?
- (A) Dignity of labour
 - (B) Division of labour
 - (C) Work-life balance
 - (D) Job specialization

Ans :

(A) Dignity of labour

Dignity of labour is the philosophical principle that all types of jobs are respected equally, and no occupation is considered superior to another. It emphasizes that all work, if done with dedication and honesty, has inherent dignity and deserves respect.

- 122.** How do values and ethics contribute positively to a workplace?
- (A) By increasing the waste of time and money.
 - (B) By decreasing employee morale and confidence.
 - (C) By reducing waste and increasing productivity.
 - (D) By encouraging unethical behavior among peers.

Ans :

(C) By reducing waste and increasing productivity. A strong foundation of shared values and ethical conduct in a workplace helps to build trust and a positive culture. This, in turn, reduces wasteful conflicts and behaviors while simultaneously boosting employee morale, confidence, and overall productivity.

- 123.** What are the formal systems or sets of rules explicitly adopted by a group of people, such as in a profession?
- (A) Values
 - (B) Beliefs
 - (C) Preferences
 - (D) Ethics

Ans :

(D) Ethics

Ethics are defined as the formal rules or standards that govern the conduct of the members of a profession or a group. Unlike personal values, which are individual beliefs, ethics provide a structured framework for professional conduct, such as in medical or legal ethics.

- 124.** The study of humans at work to understand the interrelationships between people, their jobs, and the environment is known as:
- (A) Psychology
 - (B) Sociology
 - (C) Ergonomics
 - (D) Anthropology

Ans :

(C) Ergonomics

Ergonomics, also known as Human Factors Engineering, is the scientific discipline concerned with designing and arranging workplaces, products, and systems so that they fit the people who use them. Its primary goal is to optimize human well-being and overall system performance.

- 125.** What is the primary goal of ergonomics in the workplace?
- (A) To adapt the work environment to fit the worker.
 - (B) To adapt the worker to fit a standardized work environment.
 - (C) To increase the physical stress and health problems of workers.
 - (D) To focus only on increasing productivity regardless of safety.

Ans :

(A) To adapt the work environment to fit the worker.

The fundamental principle of ergonomics is to design the job to fit the person, not force the person to fit the job. This involves adapting the work environment, tools, and tasks to the worker's capabilities and limitations to improve safety, comfort, and efficiency.

- 126.** Which of the following is a direct benefit of applying ergonomics in the workplace?
- (A) An increase in the number of workplace injuries and accidents.
 - (B) A decrease in productivity and overall efficiency.
 - (C) A reduction in the risk of injury and an increase in productivity.
 - (D) An increase in absenteeism due to stress and ill health.

Ans :

(C) A reduction in the risk of injury and an increase in productivity.

Implementing ergonomic principles leads to significant benefits. It reduces the physical strain on workers, thereby lowering the risk of injuries and accidents. This safer, more comfortable environment also leads to increased efficiency, fewer errors, and improved productivity.

- 127.** An office worker develops back pain from sitting on a poorly designed chair all day. An ergonomic solution to this problem would be to:
- (A) Advise the worker to stand and work for the entire day.
 - (B) Provide a chair with an adjustable height to fit the user.
 - (C) Replace the chair with a simple, non-adjustable stool.
 - (D) Ignore the complaint as it is not related to the work.

Ans :

(B) Provide a chair with an adjustable height to fit the user.

An ergonomic intervention would focus on fitting the equipment to the person. Providing an adjustable chair allows the user to set the height and back support to match their body measurements, promoting a correct posture and reducing the strain that causes back pain.

- 128.** What is the act of creating a new and innovative enterprise, product, or service known as?

- (A) Management
- (B) Administration
- (C) Employment
- (D) Entrepreneurship

Ans :

(D) Entrepreneurship

Entrepreneurship is defined as the process of designing, launching, and running a new business or enterprise. It often involves innovation, risk-taking, and the creation of a new product, service, or business model to meet a market need.

- 129.** Which of the following is a key characteristic of an entrepreneur?
- (A) Aversion to taking any form of risk.
 - (B) A preference for following established routines.
 - (C) Being innovative, creative, and a risk-taker.
 - (D) A desire to work under direct supervision.

Ans :

(C) Being innovative, creative, and a risk-taker.
The entrepreneurial mindset is characterized by key traits such as innovation (creating new ideas), creativity (finding new ways to do things), and a willingness to take calculated risks to turn a novel idea into a successful reality.

- 130.** What distinguishes social entrepreneurship from traditional entrepreneurship?
- (A) Social entrepreneurship focuses on achieving large-scale social benefits.
 - (B) Social entrepreneurship aims solely to maximize financial profits.
 - (C) Social entrepreneurs work only for government agencies.
 - (D) Social entrepreneurship does not involve creating an enterprise.

Ans :

(A) Social entrepreneurship focuses on achieving large-scale social benefits.
While traditional entrepreneurship measures success primarily by profit, social entrepreneurship's main goal is to create social good. Social entrepreneurs develop innovative solutions to address societal problems, and their success is measured by the positive social impact and sustainable improvements they achieve.

- 131.** Which of the following is NOT a necessary skill or attribute for a successful entrepreneur?
- (A) Willingness to work hard and handle many tasks.

- (B) Ability to deal with tough issues and find solutions.
- (C) Good communication and networking abilities.
- (D) A rigid mindset that is unable to handle crises.

Ans :

(D) A rigid mindset that is unable to handle crises.

Entrepreneurship is fraught with challenges and unexpected problems. A successful entrepreneur must be flexible, adaptable, and able to handle crises effectively. A rigid mindset would be a significant disadvantage, hindering their ability to navigate the dynamic business environment.

- 132.** Assertion (A): Ergonomic solutions will often improve productivity.
Reason (R): Reducing unnecessary or awkward postures reduces the time it takes to complete a task.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The reason (R) directly explains the assertion (A). By designing tasks to eliminate awkward and inefficient movements, ergonomics makes the work process smoother and faster. This inherent increase in efficiency naturally leads to improved overall productivity.

- 133.** The four pillars of the science of ergonomics include anthropometry, biomechanics, physiology, and which other field?
- (A) Industrial psychology
 - (B) Financial accounting
 - (C) Marine biology
 - (D) Ancient history

Ans :

(A) Industrial psychology

Ergonomics is a multidisciplinary science. Its four main pillars are anthropometry (body measurements), biomechanics (forces on the body), physiology (how the body functions),

and industrial psychology (understanding the cognitive and behavioral aspects of work).

134. Consider the characteristics of a healthy work environment:

1. It involves paying adequate attention to employee needs.
2. It motivates individuals and fosters team spirit.
3. It involves being fair and treating people equally.
4. It discourages employee development and training.

Which of the above statements are correct?

- (A) 1 and 4 only
- (B) 2, 3, and 4 only
- (C) 1, 2, and 3 only
- (D) 1, 2, 3, and 4

Ans :

(C) 1, 2, and 3 only

A healthy work environment is positive and supportive. It values employees by paying attention to their needs (1), motivating them and fostering teamwork (2), and ensuring fair treatment (3). Discouraging development and training (4) is characteristic of a poor, not a healthy, work environment.

135. A manager recognizes that her employees are her organization's most valuable resource and creates an environment where they feel loyal and valued. This manager is focusing on improving the:

- (A) Company's stock price
- (B) Quality of Work Life
- (C) Marketing and advertising budget
- (D) Building's architectural design

Ans :

(B) Quality of Work Life

The manager's actions are directly aimed at enhancing the Quality of Work Life (QWL). This approach considers employees as valuable assets and focuses on creating a satisfying and motivating environment that fosters loyalty and high performance, which benefits both the employees and the organization.

136. Why is it important to encourage partnerships and teamwork at the workplace?

- (A) To create an environment of unhealthy competition.
- (B) To ensure that individuals work in complete isolation.

(C) To increase the time it takes to complete any given task.

(D) People who help each other tend to experience greater satisfaction.

Ans :

(D) People who help each other tend to experience greater satisfaction.

Encouraging teamwork and partnerships creates a collaborative and supportive atmosphere. When colleagues help each other, it not only improves efficiency but also leads to greater job satisfaction, a sense of shared achievement, and stronger interpersonal relationships within the organization.

137. Which of the following is NOT one of the six important values mentioned that affect how we practice a profession?

- (A) Service and social justice
- (B) Dignity and worth of all persons
- (C) Indifference and apathy
- (D) Importance of human relationships

Ans :

(C) Indifference and apathy

The core values listed for professional practice are positive principles like service, social justice, dignity, and integrity. Indifference and apathy represent a lack of care and concern, which is the opposite of the value-based approach required in helping professions.

138. The Greek word 'ergon' which forms part of the term 'ergonomics' means:

- (A) Work
- (B) Law
- (C) Human
- (D) Study

Ans :

(A) Work

The term 'ergonomics' is derived from two Greek words: 'ergon', meaning work, and 'nomos' (from which 'nomics' is derived), meaning natural laws. Therefore, ergonomics literally translates to "the laws of work," reflecting its focus on the scientific study of people at work.

139. Which of the following is NOT a benefit of good ergonomics?

- (A) Increases productivity.
- (B) Decreases morale of workers.
- (C) Reduces risk of injury.
- (D) Reduces mistakes.

Ans :

(B) Decreases morale of workers.

Good ergonomics creates a safer, more comfortable, and more efficient work environment. These positive changes lead to an improvement in worker morale, not a decrease. Reduced physical strain and increased job satisfaction are key factors that boost morale.

- 140.** Match the life skill in Column A with its description in Column B.

	Column A		Column B
1.	Communication	a.	Ability to understand another's feelings
2.	Empathy	b.	Weighing pros and cons to choose an option
3.	Decision Making	c.	Conveying information and ideas clearly
4.	Problem Solving	d.	Finding effective solutions to difficulties

(A) 1-d, 2-b, 3-a, 4-c

(B) 1-b, 2-a, 3-c, 4-d

(C) 1-c, 2-a, 3-b, 4-d

(D) 1-a, 2-c, 3-d, 4-b

Ans :

(C) 1-c, 2-a, 3-b, 4-d

Communication (1) is about conveying information clearly (c). Empathy (2) is understanding another's feelings (a). Decision Making (3) involves choosing an option after evaluation (b). Problem Solving (4) is about finding solutions to difficulties (d).

- 141.** The “double burden of malnutrition” refers to the coexistence of which two conditions in a population?

(A) Undernutrition and overnutrition

(B) Infectious and chronic diseases

(C) High birth rates and low death rates

(D) Poverty and illiteracy

Ans :

(A) Undernutrition and overnutrition

The “double burden of malnutrition” is a term used to describe the situation where problems of both undernutrition (like stunting and micronutrient deficiencies) and overnutrition (like overweight and obesity) exist simultaneously within the same country, community, or even household.

- 142.** Why is the work done by women as homemakers considered an economic contribution?

(A) Because it is a paid and formally recognized job.

(B) Because it generates direct revenue for the government.

(C) Because it involves no effort or energy expenditure.

(D) Because it supports the family and saves money.

Ans :

(D) Because it supports the family and saves money.

Although unpaid, the work of homemakers has significant economic value. It supports other family members in their productive roles and saves the family money that would otherwise be spent on outsourcing tasks like cooking, cleaning, and childcare, based on the principle “money saved is money earned”.

- 143.** A company wants to start an enterprise focused on providing affordable clean water solutions to remote villages that lack access. This venture would be classified as:

(A) A traditional for-profit business.

(B) A social entrepreneurship initiative.

(C) A government administrative agency.

(D) A luxury goods manufacturing company.

Ans :

(B) A social entrepreneurship initiative.

This venture's primary goal is to solve a social problem (lack of clean water) for a disadvantaged group. It uses an entrepreneurial approach to create a sustainable solution for social good, which is the defining characteristic of social entrepreneurship.

- 144.** Which of the following is a key component of a healthy personal lifestyle that supports a good work life?

(A) Getting inadequate sleep and eating an unbalanced diet.

(B) Avoiding all forms of physical exercise and recreation.

(C) Maintaining a healthy lifestyle with a wholesome diet and sleep.

(D) Focusing solely on work and neglecting personal health.

Ans :

(C) Maintaining a healthy lifestyle with a wholesome diet and sleep.

A healthy personal lifestyle, including a balanced diet, adequate sleep, and regular exercise, is foundational to a successful work life. It provides the physical and mental energy needed to handle workplace challenges and pressures effectively, contributing to overall well-being.

- 145.** The field of Human Development and Family Studies (HDFS) involves the study of individuals and groups across the life span. Professionals in HDFS may work in all the following areas EXCEPT:

- (A) Early childhood care and education.
- (B) Guidance and counselling services.
- (C) Management of institutions for the elderly.
- (D) Geological surveying and mineral exploration.

Ans :

(D) Geological surveying and mineral exploration. HDFS focuses on human growth, relationships, and the management of support services for various age groups. Geological surveying is a field within earth sciences and is completely unrelated to the study of human development and family dynamics.

- 146.** What are the abilities for adaptive and positive behavior that enable individuals to deal effectively with the demands and challenges of everyday life known as?
- (A) Academic skills
 - (B) Technical skills
 - (C) Life skills
 - (D) Athletic skills

Ans :

- (C) Life skills

This is the core definition of life skills as provided by organizations like WHO. They are the psychosocial competencies that help individuals navigate life successfully by enabling them to adapt their behavior positively to handle various situations and challenges effectively.

- 147.** The approach in which employees are considered 'assets' and it is believed that people perform better when satisfied with their work conditions is central to the concept of:
- (A) Quality of Work Life (QWL)
 - (B) Financial Auditing
 - (C) Supply Chain Management
 - (D) Corporate Espionage

Ans :

- (A) Quality of Work Life (QWL)

The concept of Quality of Work Life (QWL) is built on the philosophy that employees are a company's most important asset. It emphasizes that creating a positive and satisfying work environment is crucial for motivating employees and achieving better performance.

- 148.** What is the main purpose of the Equal Remuneration Act in India?

- (A) To ensure men are paid more than women for all work.
- (B) To provide for equal wages for the same or similar work.
- (C) To set different working hours for men and women.
- (D) To mandate that only men can be primary earning members.

Ans :

- (B) To provide for equal wages for the same or similar work.

The Equal Remuneration Act was enacted to prevent wage discrimination based on gender. It mandates that employers must pay equal remuneration to men and women workers for performing the same work or work of a similar nature.

- 149.** A young entrepreneur starts a business that revitalizes a traditional craft of her region by introducing new designs and finding a global market for the products. This person is acting as a:

- (A) Government official
- (B) Social worker
- (C) Traditional artisan
- (D) Entrepreneur

Ans :

- (D) Entrepreneur

This individual demonstrates key entrepreneurial traits: identifying an opportunity (traditional craft), innovating (new designs), assembling resources (finding a market), and undertaking a business venture. This process of creating value and a new enterprise is the essence of entrepreneurship.

- 150.** The ability to apply principles of analytical thinking, critical evaluation, and innovation is an essential soft skill known as:

- (A) Communicating clearly
- (B) Working cooperatively

- (C) Thinking critically and creatively
- (D) Learning effectively

Ans :

(C) Thinking critically and creatively
This skill set involves going beyond surface-level information to analyze problems, evaluate options critically, and generate innovative solutions. It is a highly valued soft skill in any professional field as it drives improvement and effective problem-solving.

- 151.** A dietitian's knowledge base should ideally include:
1. Food science and clinical nutrition.
 2. Basic biological and physical sciences.
 3. Food microbiology and safety.
 4. Psychology, sociology, and education.
- Which of the above are essential for a comprehensive dietetic practice?
- (A) 1 and 2 only
 - (B) 3 and 4 only
 - (C) 1, 2, and 3 only
 - (D) 1, 2, 3, and 4

Ans :

(D) 1, 2, 3, and 4
A competent dietitian requires a multidisciplinary knowledge base. This includes core nutrition and food science (1), foundational sciences like physiology (2), food safety (3) for institutional settings, and social sciences like psychology (4) for effective counseling. All are essential.

- 152.** Assertion (A): There is an expanding scope for research into the physiological changes brought about by disease.
Reason (R): New scientific knowledge is being generated about metabolic disturbances in acute and chronic diseases.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.
The expanding scope for research (Assertion A) is a direct result of the continuous generation of new scientific knowledge about disease mechanisms (Reason R). As we learn more about how diseases

affect the body, new avenues for research and therapeutic intervention open up.

- 153.** What are beliefs, preferences, or assumptions about what is desirable or good for humans that affect how we practice a profession?
- (A) Ethics
 - (B) Values
 - (C) Rules
 - (D) Regulations

Ans :

(B) Values
Values are the fundamental beliefs and ideals that guide our attitudes and actions. In a professional context, core values like service, integrity, and social justice shape how an individual practices their profession and makes decisions.

- 154.** The ability to multitask, have forethought and vision, and delegate work are skills required for which workplace competency?
- (A) Communicating clearly
 - (B) Thinking critically and creatively
 - (C) Working productively
 - (D) Other required skills

Ans :

(D) Other required skills
While related to other competencies, skills like multitasking, vision, and delegation are listed as additional essential abilities for success. They reflect higher-level management and leadership capabilities that contribute to overall effectiveness beyond basic task execution.

- 155.** Why is it important for an entrepreneur to be able to cope with setbacks and failures?
- (A) Because entrepreneurship is a path with guaranteed, immediate success.
 - (B) Because setbacks and failures are an inevitable part of the journey.
 - (C) Because failures indicate a lack of necessary skills or knowledge.
 - (D) Because an entrepreneur should avoid all forms of challenge.

Ans :

(B) Because setbacks and failures are an inevitable part of the journey.
Entrepreneurship is inherently risky and unpredictable. Setbacks and failures are common occurrences. The ability to learn from these experiences, persevere, and adapt is a crucial trait

for long-term success, as it builds resilience and leads to better strategies.

- 156.** Match the constitutional provision or act in Column A with its primary focus in Column B.

	Column A		Column B
1.	Article 16 (1)	a.	Mandates crèches in factories for working mothers
2.	Equal Remuneration Act	b.	Guarantees equality of opportunity in employment
3.	Factories Act, 1948	c.	Provides a framework for juvenile justice
4.	Juvenile Justice Act	d.	Ensures equal pay for equal or similar work

- (A) 1-b, 2-d, 3-a, 4-c
 (B) 1-d, 2-c, 3-b, 4-a
 (C) 1-c, 2-a, 3-d, 4-b
 (D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-b, 2-d, 3-a, 4-c
 Article 16 (1) guarantees equal opportunity in employment (b). The Equal Remuneration Act ensures equal pay (d). The Factories Act mandates crèches (a). The Juvenile Justice Act deals with children in conflict with law and in need of care (c).

- 157.** An employee consistently arrives late, misses deadlines, and displays a negative attitude. This behavior negatively impacts the organization's:
- (A) Quality of Work Life
 (B) Architectural design
 (C) Financial investments
 (D) Legal compliance

Ans :

(A) Quality of Work Life
 Such behavior disrupts teamwork, lowers morale, and reduces productivity, all of which are key components of a healthy Quality of Work Life (QWL). A positive QWL depends on employees being engaged, responsible, and contributing to a supportive and efficient environment.

- 158.** Which of the following is an incorrect statement regarding women's work?
- (A) The work women do at home as homemakers is rarely valued as an economic activity.
 (B) Women's participation in the workforce

outside the home has helped improve family resources.

- (C) The mindset regarding gender issues and work does not need to change in society.
 (D) In rural India, women are extensively involved in agriculture.

Ans :

(C) The mindset regarding gender issues and work does not need to change in society.
 A significant transformation in societal mindset and attitudes is essential to address gender issues related to work. Valuing domestic work, ensuring equal opportunities, and providing adequate support for working women requires a fundamental shift in traditional perspectives.

- 159.** How does creating a safe and productive work environment through ergonomics benefit an organization?
- (A) It increases the number of errors and the amount of waste produced.
 (B) It leads to lower employee productivity and retention.
 (C) It shows that employees are not the organization's most important asset.
 (D) It helps in retaining employees and improving their productivity.

Ans :

(D) It helps in retaining employees and improving their productivity.
 When the workplace is designed to be safe and comfortable, employees can work more efficiently and with fewer errors, boosting productivity. This positive environment also improves job satisfaction and morale, which in turn helps the organization retain its most important asset: its employees.

- 160.** Which of the following is a direct outcome of providing sustained opportunities for self-development in a workplace?
- (A) It decreases the morale of the employees.
 (B) It helps in empowering employees.
 (C) It reduces the technical competence of the staff.
 (D) It creates a negative and demotivating work climate.

Ans :

(B) It helps in empowering employees.
 Providing opportunities for training and self-development is a key strategy for empowering

employees. It enhances their skills, builds their confidence, and shows that the organization is invested in their growth, leading to a more capable, motivated, and engaged workforce.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

Mrs. Gupta, a 68-year-old woman, is admitted to a hospital for major abdominal surgery. A clinical nutritionist, Mr. Ali, is assigned to her case to manage her nutritional needs before and after the operation. Before the surgery, Mr. Ali conducts a thorough nutritional assessment, which includes reviewing her medical history, taking anthropometric measurements, and analyzing her lab reports. He finds she is slightly anemic and has low protein levels. His objective is to improve her nutritional status to help her withstand the surgery and recover faster. He plans a pre-operative diet rich in protein and iron. After the surgery, Mrs. Gupta is unable to eat normally. Mr. Ali, in consultation with the physician, initially prescribes a clear liquid diet, gradually progressing to a full liquid diet and then a soft diet as her condition improves. He ensures the prescribed diet is nutritionally adequate to support wound healing, maintain immune defenses, and prevent post-operative complications. He also counsels Mrs. Gupta and her family on the importance of adhering to the dietary plan for a smooth and speedy recovery, demonstrating the integral role of a dietitian in the medical team.

- 161.** What is the primary purpose of the pre-operative nutritional intervention provided by Mr. Ali?
- (A) To help the patient lose weight before surgery.
 - (B) To ensure the patient's body is adequately nourished to handle the stress of surgery and promote recovery.
 - (C) To introduce the patient to the taste of hospital food.
 - (D) To conduct a scientific experiment on diet effects.

Ans :

(B) To ensure the patient's body is adequately nourished to handle the stress of surgery and promote recovery.

Optimal nutritional status before surgery is crucial for providing immunity, promoting healing, and supporting organ function. Adequate nutrition helps patients withstand the stress of the procedure and reduces the risk of post-operative complications and infections.

- 162.** The gradual progression from a clear liquid diet to a soft diet is an example of which type of dietary modification?
- (A) A change in the energy intake of the diet.
 - (B) An increase in the amount of a specific nutrient.
 - (C) A change in the consistency and texture of the diet.
 - (D) A change in the number of meals per day.

Ans :

(C) A change in the consistency and texture of the diet.

Modified diets are adjusted to meet a patient's medical needs. Progressing from liquid to soft diets is a modification of consistency, making food easier to consume and digest as the patient's ability to tolerate solid food improves.

- 163.** Mr. Ali's use of medical history, anthropometric measurements, and lab reports is part of which process?
- (A) Planning a regular diet for a healthy individual.
 - (B) Managing the food service of the entire hospital.
 - (C) Developing a new functional food product.
 - (D) Conducting a nutritional assessment to identify the patient's needs.

Ans :

(D) Conducting a nutritional assessment to identify the patient's needs.

Nutritional assessment is a systematic process of obtaining detailed information on a patient's health, diet, and personal history, along with anthropometric and laboratory data, to diagnose nutritional problems and plan appropriate interventions.

- 164.** Which of the following is a key objective of diet therapy in Mrs. Gupta's post-operative care?
- (A) To prevent short-term and long-term complications and promote recovery.
 - (B) To ensure the diet is high in spices and condiments.
 - (C) To match the diet with the preferences of the

family members.

(D) To limit the diet to only fruits and vegetables.

Ans :

(A) To prevent short-term and long-term complications and promote recovery.

The objectives of diet therapy include modifying diets to ameliorate the disease condition, promoting recovery, and preventing complications. In post-operative care, this is crucial for wound healing and restoring health, as illness can affect nutrient utilization.

165. The role Mr. Ali plays in Mrs. Gupta's care shows that a dietitian is what?

(A) A professional who only works with healthy athletes.

(B) A person who works independently of the medical team.

(C) An integral part of the medical team, responsible for the patient's nutritional care.

(D) A chef responsible for cooking all hospital meals.

Ans :

(C) An integral part of the medical team, responsible for the patient's nutritional care.

The dietitian is an integral part of the medical team, working with physicians to ensure patients receive appropriate diets and optimal nutritional care. They translate medical needs into dietary guidelines and manage the patient's nutritional therapy.

Direction : Read the following case study and answer the following questions.

A multinational food company is launching a new line of "functional foods" aimed at health-conscious consumers. One of their new products is a yogurt fortified with plant sterols, which are phytochemicals known to help lower cholesterol. The product is marketed as a "health supplement" for individuals looking to manage their cardiovascular health through diet. The development team, consisting of food scientists and clinical nutritionists, had to ensure the product met the specific standards laid down by the Food Safety and Standards Authority of India (FSSAI) for such foods. The final product is specially formulated to differ significantly from ordinary yogurt. It is not just a food item but a product designed to satisfy particular dietary requirements that exist because of a physiological condition. The company plans to market this

yogurt through pharmacies and health food stores, emphasizing that while it is not a medicine, it can be a valuable part of a diet designed to prevent chronic disease. This initiative reflects the growing trend of using food and its bioactive components to promote health beyond basic nutrition.

166. The newly developed yogurt is best classified as what?

(A) A food for special dietary use or functional food.

(B) A regular dairy product.

(C) A genetically modified organism.

(D) A standard confectionery item.

Ans :

(A) A food for special dietary use or functional food.

According to FSSAI, foods for special dietary uses, functional foods, or nutraceuticals are specially processed or formulated to satisfy particular dietary requirements due to a specific physiological condition or disorder, differing significantly from ordinary foods.

167. What are the plant sterols added to the yogurt an example of?

(A) Macronutrients

(B) Artificial preservatives

(C) Phytochemicals/Bioactive compounds

(D) Food colorants

Ans :

(C) Phytochemicals/Bioactive compounds

Phytochemicals or bioactive compounds are non-nutrient constituents present in foods that possess physiological or biological activity and can influence health. Plant sterols are a well-known example of such compounds used for their health benefits.

168. Why has the field of clinical nutrition seen significant growth in recent times?

(A) Due to a decrease in the prevalence of all diseases.

(B) Due to advances in food and pharmaceutical industries and new research on the role of nutrients in disease management.

(C) Because people have stopped taking conventional medicines.

(D) Because of a decline in the number of qualified doctors.

Ans :

(B) Due to advances in food and pharmaceutical industries and new research on the role of nutrients in disease management.

The discipline of clinical nutrition has grown due to new scientific knowledge about metabolic disturbances in diseases, advances in the food industry, and research on nutrients, nutraceuticals, and phytochemicals in disease prevention and treatment.

- 169.** To be sold in India, the fortified yogurt must comply with the standards set by which authority?
- (A) The World Health Organization (WHO).
 - (B) The Bureau of Indian Standards (BIS).
 - (C) The Indian Medical Association (IMA).
 - (D) The Food Safety and Standards Authority of India (FSSAI).

Ans :

(D) The Food Safety and Standards Authority of India (FSSAI).

FSSAI is the regulatory body in India responsible for setting science-based standards for food products, including functional foods and health supplements, to ensure they are safe and meet specific compositional requirements for their intended use.

- 170.** The development of such health-focused products is driven by what societal trend?
- (A) An increasing prevalence of non-communicable diseases and consumer concern for wellness.
 - (B) A rising preference for high-fat and high-sugar processed foods.
 - (C) A decline in interest in physical fitness and healthy lifestyles.
 - (D) A general lack of awareness about the link between diet and health.

Ans :

(A) An increasing prevalence of non-communicable diseases and consumer concern for wellness.

The increasing prevalence of non-communicable diseases like heart disease and diabetes, coupled with a growing consumer concern for health and wellness, has driven the demand for foods that offer specific health benefits beyond basic nutrition.

Direction : Read the following case study and answer the following questions.

Mr. Kumar, an 80-year-old man, recently had a stroke which has left him with severe dysphagia, a condition that makes swallowing difficult and

painful. He is conscious and his gastrointestinal tract is functional, but he cannot safely consume solid foods or even thick liquids by mouth due to the high risk of choking and aspiration. The medical team at the hospital, including a dietitian, must decide on the best way to provide him with adequate nutrition. Oral feeding is ruled out. The team considers two primary options: intravenous feeding, where nutrients are delivered directly into a vein, or tube feeding, where a nutritionally complete liquid formula is delivered through a tube inserted through the nose into the stomach. After careful consideration, the dietitian recommends tube feeding. She explains that this method is preferred as long as the digestive system is working because it helps maintain the gut's function and integrity. She then formulates a specific liquid feed that meets all of Mr. Kumar's caloric, protein, vitamin, and mineral needs to prevent malnutrition and support his recovery.

- 171.** What is the most preferred route for feeding a patient?
- (A) Intravenous feeding
 - (B) Tube feeding
 - (C) Through a skin patch
 - (D) Orally (by mouth)

Ans :

(D) Orally (by mouth)

The best and most preferred route for feeding any patient is orally, or by mouth. Alternative methods like tube or intravenous feeding are only used when a patient is unable to eat or swallow normally.

- 172.** Why was tube feeding chosen over intravenous feeding for Mr. Kumar?
- (A) Because it is less expensive than intravenous feeding.
 - (B) Because his gastrointestinal tract was functional, and this method supports gut health.
 - (C) Because the hospital had run out of intravenous solutions.
 - (D) Because tube feeding delivers nutrients more slowly.

Ans :

(B) Because his gastrointestinal tract was functional, and this method supports gut health. Tube feeding is preferred over intravenous feeding as long as the gastrointestinal tract is functional. This is because it allows the digestive system to

continue to digest and absorb nutrients, which helps maintain its normal function.

- 173.** The special liquid formula designed by the dietitian for tube feeding is an example of what?
- (A) A nutritionally complete feed delivered through a non-oral route.
 - (B) A regular liquid diet consisting of juices and soups.
 - (C) A clear liquid diet prescribed for post-surgery patients.
 - (D) A standard beverage available in supermarkets.

Ans :

(A) A nutritionally complete feed delivered through a non-oral route.
In tube feeding, special, nutritionally complete liquid feeds are delivered through a tube. These are formulated to provide all the necessary nutrients when a patient is unable to consume food orally but can still digest it.

- 174.** A dietitian planning a diet for a patient who is unable to chew or swallow would typically first consider which type of oral diet modification, if oral feeding were possible?
- (A) A regular diet with spicy foods.
 - (B) A high-fiber, solid diet.
 - (C) A high-fat, fried food diet.
 - (D) A liquid diet or a soft diet.

Ans :

(D) A liquid diet or a soft diet.

For patients unable to chew or swallow normally, diets are modified in consistency. A liquid diet (foods fluid at room temperature) or a soft diet (semi-solid, easy-to-chew foods) would be the appropriate oral choices.

- 175.** Mr. Kumar's condition of dysphagia, which necessitates an alternative feeding route, highlights how illness can affect nutritional status by:
- (A) Increasing the person's appetite and desire for food.
 - (B) Improving the body's ability to absorb nutrients.
 - (C) Impairing a person's ability to eat and/or swallow.
 - (D) Having no impact on digestion or metabolism.

Ans :

(C) Impairing a person's ability to eat and/or swallow.

Illness and disease can significantly affect nutritional status in various ways, including by directly impairing a person's physical ability to eat or swallow food. This interference with intake can lead to malnutrition if not managed appropriately.

Direction : Read the following case study and answer the following questions.

A public health nutritionist is hired by a city's health department to address the rising incidence of hypertension (high blood pressure) among its urban adult population. Her research indicates that the dietary patterns of this group have changed significantly over the past decade. There is a high consumption of highly salted convenience foods, processed snacks with high sodium content, and a reduced intake of potassium-rich foods like fresh fruits, vegetables, and whole grains. This dietary shift, combined with a more sedentary lifestyle and increased stress, is a major contributing factor to the health problem. The nutritionist's task is to design a public awareness campaign to educate people on how to prevent and manage hypertension through diet. She plans a series of workshops, creates informational pamphlets, and uses social media to promote a diet low in sodium and rich in potassium, calcium, and fiber. She emphasizes the importance of reading nutrition labels on packaged foods and making conscious choices to reduce the intake of processed items, thereby playing a crucial role in the prevention of chronic diseases.

- 176.** The public health nutritionist's work primarily focuses on what?
- (A) Treating individual patients in a hospital setting.
 - (B) Developing new processed food products for a company.
 - (C) Preventing disease and promoting good health in a population.
 - (D) Conducting laboratory research on nutrient composition.

Ans :

(C) Preventing disease and promoting good health in a population.

A clinical or public nutritionist plays an important role in the prevention of chronic diseases and the promotion of good health by providing appropriate diet counseling and guidance to various groups within the community.

- 177.** Which dietary factor is identified as a major contributor to the increased risk of hypertension in the urban population?
- (A) High consumption of highly salted convenience and processed foods.
 - (B) High consumption of fruits and vegetables.
 - (C) A diet rich in whole grains and legumes.
 - (D) Adequate intake of potassium and calcium.

Ans :

(A) High consumption of highly salted convenience and processed foods.

High consumption of salted convenience foods and processed foods with high sodium content, coupled with low intake of potassium-rich foods, has been found to be associated with an increased risk of developing hypertension or high blood pressure.

- 178.** The nutritionist's campaign to educate the public on dietary choices is an example of which objective of diet therapy?
- (A) Education and counseling of the patient (or public) on the need to adhere to a prescribed diet.
 - (B) Modification of an existing diet to ameliorate a disease condition.
 - (C) Correction of nutritional deficiencies in a clinical setting.
 - (D) Formulation of a diet for an individual patient in a hospital.

Ans :

(A) Education and counseling of the patient (or public) on the need to adhere to a prescribed diet. One of the key objectives of diet therapy and nutritional care is to educate and counsel individuals or groups on the need to make and adhere to dietary changes for improving health and managing or preventing disease.

- 179.** What is a significant consequence of the dietary and lifestyle changes seen in urban India?
- (A) A decrease in the incidence of all diseases.
 - (B) An increased incidence of chronic, non-communicable diseases like obesity, diabetes, and cardiovascular disease.
 - (C) A complete elimination of infectious diseases.
 - (D) An improvement in the overall nutritional status of the population.

Ans :

(B) An increased incidence of chronic, non-communicable diseases like obesity, diabetes, and cardiovascular disease.

Changes in diet, such as increased consumption of fat and sugar and decreased fiber, along with less physical activity, have been associated with a rising incidence of chronic diseases like obesity, diabetes, and cardiovascular disease in India.

- 180.** The work of the nutritionist in this scenario shows that their role extends beyond hospitals to include:

- (A) Working exclusively in the food industry.
- (B) Only focusing on managing food services in institutions.
- (C) Restricting their advice to athletes and sports persons.
- (D) Being appointed for guidance to various groups such as schools, colleges, and in the community.

Ans :

(D) Being appointed for guidance to various groups such as schools, colleges, and in the community.

Clinical nutritionists can play a vital role in preventing health problems by providing guidance to various community groups. They can be appointed to work with schools, colleges, and public health departments to promote healthy eating habits.

Direction : Read the following case study and answer the following questions.

A dietitian is working at a wellness center that caters to individuals with a wide range of health goals. One of her clients is a young woman suffering from an eating disorder, another is an elderly man with osteoporosis, and a third is a pregnant woman requiring guidance on prenatal nutrition. For each client, the dietitian must apply her broad knowledge to create a unique and effective nutrition care plan. For the client with the eating disorder, she must collaborate with a psychologist and focus on psychological stress and food acceptance. For the elderly man with osteoporosis, she needs to plan a diet rich in calcium and vitamin D while considering his chewing ability, possibly suggesting a mechanical soft diet. For the pregnant woman, her focus is on meeting the increased nutritional demands for the healthy development of the fetus and the mother's well-being. This requires her to modify normal diets to suit the specific physiological state, cultural background, and individual needs of each person. Her work illustrates the diverse application

of clinical nutrition across different life stages and health conditions, going far beyond just treating hospital patients.

- 181.** The dietitian's work demonstrates that clinical nutrition is concerned with:
- (A) Only managing diets for patients with diabetes.
 - (B) A narrow range of diseases affecting only one age group.
 - (C) Nutritional requirements at various stages of the life cycle and in various disease conditions.
 - (D) Providing the same standard diet to every client.

Ans :

(C) Nutritional requirements at various stages of the life cycle and in various disease conditions. Clinical nutrition and dietetics involve planning diets to meet nutritional requirements at various life stages, from pregnancy to old age, and modifying diets for a wide range of disease conditions to promote health and well-being.

- 182.** For the elderly client with osteoporosis and chewing problems, what type of diet would be most appropriate?
- (A) A clear liquid diet.
 - (B) A regular diet with hard-to-chew foods.
 - (C) A high-fat, low-protein diet.
 - (D) A mechanical soft diet, rich in calcium and vitamin D.

Ans :

(D) A mechanical soft diet, rich in calcium and vitamin D.

A mechanical soft diet includes soft, mashed, or pureed foods suitable for elderly individuals with chewing difficulties. The diet would also be modified to be rich in specific nutrients like calcium to manage his osteoporosis.

- 183.** A professional in clinical nutrition needs to have skills in diet planning that are:
- (A) Rigid and based on a single, universal template.
 - (B) Customized to the requirements of individual patients and their specific conditions.
 - (C) Focused only on the biochemical aspects, ignoring food habits.
 - (D) Designed without considering the patient's likes and dislikes.

Ans :

(B) Customized to the requirements of individual patients and their specific conditions.

A key skill for a dietitian is planning diets customized to the unique needs of each patient. This includes considering their disease condition, physical state, cultural background, food habits, and personal likes and dislikes for effective therapy.

- 184.** The need to work with a psychologist for the client with an eating disorder highlights that nutritional care must consider:
- (A) Psychological stress and its effect on food acceptance.
 - (B) Only the physical and biochemical factors.
 - (C) The nutritional stress but not the psychological stress.
 - (D) The patient's financial status exclusively.

Ans :

(A) Psychological stress and its effect on food acceptance.

A dietitian must consider several factors, including the psychological stress a patient is under and how illness affects food acceptance. This holistic approach is crucial for effective nutritional care, especially in conditions like eating disorders.

- 185.** To be an effective diet counsellor for such diverse clients, a dietitian requires knowledge of which other subjects besides nutrition science?
- (A) Engineering and architecture.
 - (B) Political science and history.
 - (C) Advanced mathematics and quantum physics.
 - (D) Psychology, sociology, and education.

Ans :

(D) Psychology, sociology, and education.

Counselling is a critical part of a dietitian's job. To be a good diet counsellor, one requires knowledge of psychology, sociology, and education to understand the patient's mindset, social context, and to communicate advice effectively.

Direction : Read the following case study and answer the following questions.

A new hospital is setting up its dietetics department. The head dietitian is responsible for establishing the entire nutritional care process for incoming patients. The first step she institutes is a mandatory nutritional assessment for every admitted patient. This process involves a team of junior dietitians who are trained to obtain detailed

information on each patient's health history, dietary patterns, personal background, and medication use. They also perform anthropometric measurements like height and weight. This information is then combined with the physician's diagnosis and laboratory test results. The head dietitian uses this comprehensive data to diagnose specific nutritional problems, such as a risk of malnutrition or a specific nutrient deficiency. Based on this diagnosis, an individualized nutrition care plan is developed. This plan could involve modifying the regular hospital diet, prescribing a therapeutic diet, or initiating special feeding methods. The system also includes regular monitoring and evaluation to see if the nutritional care is effective and to make changes as needed, ensuring a systematic and patient-focused approach.

- 186.** The entire organized group of activities, from assessment to evaluation, is known as the:
- (A) Food production process.
 - (B) Medical diagnosis process.
 - (C) Hospital administration process.
 - (D) Nutritional care process.

Ans :

(D) Nutritional care process.

The nutritional care process is a systematic and logical group of activities. It consists of assessing nutritional status, diagnosing problems, planning interventions, and monitoring and evaluating outcomes to provide holistic and individualized patient care.

- 187.** Performing anthropometric measurements is a key component of what?
- (A) Conducting a nutritional assessment.
 - (B) Cooking a meal in the hospital kitchen.
 - (C) Dispensing medication to a patient.
 - (D) Cleaning the patient's room.

Ans :

(A) Conducting a nutritional assessment.

Nutritional assessment involves obtaining detailed information to understand a patient's nutritional status. This includes taking anthropometric measurements, along with diet, health, and medication histories, and reviewing laboratory data and physical findings.

- 188.** In this nutritional care process, who is ultimately responsible for ensuring all of the patient's medical needs are met?
- (A) The junior dietitian.

- (B) The head dietitian.
- (C) The physician.
- (D) The hospital administrator.

Ans :

(C) The physician.

While the dietitian is responsible for nutritional care, it must be borne in mind that physicians are ultimately responsible for ensuring that all of the patient's medical needs are met, including diagnosis and overall medical treatment.

- 189.** The primary focus of this systematic and logical approach to nutritional care is the:
- (A) Hospital's budget.
 - (B) Convenience of the kitchen staff.
 - (C) Physician's schedule.
 - (D) Patient's unique needs.

Ans :

(D) The patient's unique needs.

The patient is the primary focus of the nutritional care process. The entire process is designed to use a systematic approach to address each patient's unique needs in an individualistic and holistic manner for the best possible outcome.

- 190.** Modifying a regular hospital diet to create a therapeutic diet involves which of the following?
- (A) Making the food less nutritious to save costs.
 - (B) Adjusting it to meet the specific medical needs of a patient.
 - (C) Adding more spices and fat to make it tastier.
 - (D) Serving larger portions regardless of the patient's condition.

Ans :

(B) Adjusting it to meet the specific medical needs of a patient.

Modified diets, also known as therapeutic diets, are standard diets that are adjusted to meet the medical needs of a patient. This can involve changes in consistency, energy, or the amounts of one or more nutrients.

Direction : Read the following case study and answer the following questions.

A new mother is concerned about her six-month-old infant who is suffering from recurrent diarrhea and has not gained weight properly. She takes him to a pediatrician, who, after examination, refers her to a diet counsellor. The diet counsellor explains that due to the illness, the infant's body has difficulty in absorbing and utilizing nutrients,

leading to a state of nutrient imbalance. The counsellor's primary goal is to correct the existing nutritional deficiencies and formulate a diet that will help the infant recover and gain weight. She advises the mother on preparing a simple, easily digestible soft diet, such as khichdi and sago kheer, which will provide adequate energy and protein without causing further gastrointestinal distress. She also educates the mother on hygiene practices to prevent future infections. This intervention highlights how diet therapy is used not only for adults with chronic diseases but also for managing acute conditions in infants and children to promote recovery and restore good nutritional status.

- 191.** The infant's condition illustrates that illness can lead to nutrient imbalances even in someone who previously had good nutritional status. This demonstrates the link between:
- (A) Health and nutrition.
 - (B) Health and fashion.
 - (C) Health and wealth.
 - (D) Health and education.

Ans :

(A) Health and nutrition.

Health and nutrition are intimately interlinked. Poor nutrition can lead to health problems, and conversely, illness and disease can result in nutrient imbalances, making nutritional support a critical component of treatment and recovery.

- 192.** The khichdi and sago kheer recommended by the counsellor are examples of what type of diet?
- (A) A clear liquid diet.
 - (B) A regular adult diet.
 - (C) A high-fiber diet.
 - (D) A soft diet.

Ans :

(D) A soft diet.

Soft diets provide semi-solid foods that are easy to chew and digest, containing no harsh fibers or gas-forming ingredients. Foods like khichdi and sago kheer are typical examples prescribed to minimize gastrointestinal problems.

- 193.** One of the main objectives of the diet therapy prescribed for the infant is:
- (A) To introduce new and complex food flavors.
 - (B) To increase the amount of fat and sugar in the diet.
 - (C) To correct nutritional deficiencies and promote recovery.

(D) To prepare the infant for a surgical procedure.

Ans :

(C) To correct nutritional deficiencies and promote recovery.

A key objective of diet therapy is the correction of any existing nutritional deficiencies that may have occurred due to illness. The diet is formulated to meet the patient's needs and promote a return to good health.

- 194.** The counsellor's advice to the mother is an act of:
- (A) Prescribing medication for the diarrhea.
 - (B) Education and counselling to ensure adherence to the diet.
 - (C) Performing a surgical intervention.
 - (D) Managing the hospital's food supply chain.

Ans :

(B) Education and counselling to ensure adherence to the diet.

Dietitians and diet counsellors play a crucial role in educating and counseling patients and their families. This ensures they understand the need to adhere to the prescribed diet for it to be effective in treatment and recovery.

- 195.** The fact that the infant's condition of diarrhea affects nutrient absorption shows how illness can interfere with which bodily process?
- (A) The process of digestion, absorption, and metabolism.
 - (B) The body's ability to produce hormones.
 - (C) The function of the skeletal system.
 - (D) The production of red blood cells.

Ans :

(A) The process of digestion, absorption, and metabolism.

Health problems and their treatment can negatively affect nutritional status by interfering with the body's ability to digest, absorb, and metabolize nutrients from food, which can lead to various deficiencies and complications.

Direction : Read the following case study and answer the following questions.

A hospital's dietetics department prepares and serves hundreds of meals daily to patients with diverse medical needs. The head dietitian emphasizes that while therapeutic modifications are crucial, the regular or normal diet served in the hospital must also be carefully planned. This 'regular diet', while designed for patients without

specific dietary restrictions, is still different from a typical home-cooked meal. It is planned to be low in fried and fatty foods, sweets, and excessive spices and condiments. The goal is to provide a balanced meal that meets the nutritional needs of a healthy individual but is also simple, easily digestible, and suitable for a hospital setting to avoid causing any potential digestive issues for recovering patients. The dietitian ensures that this standard diet includes all major food groups to be nutritionally adequate. This attention to the quality of the regular hospital diet reflects a holistic approach to patient care, recognizing that even patients without specific restrictions need wholesome and safe food to maintain their health.

- 196.** What is a standard, normal, or regular diet?
- (A) A diet that includes all food groups and meets the needs of healthy individuals.
 - (B) A diet that is modified in consistency for patients who cannot chew.
 - (C) A diet that restricts the intake of one or more nutrients for therapeutic purposes.
 - (D) A diet consisting of only liquids.

Ans :

(A) A diet that includes all food groups and meets the needs of healthy individuals.

A standard, normal, or regular diet is one that is nutritionally adequate, includes all food groups, and is designed to meet the needs of healthy individuals who do not require specific therapeutic modifications.

- 197.** How does a regular diet in a hospital typically differ from a normal diet at home?
- (A) It is usually higher in fat, sugar, and spices.
 - (B) It includes a wider variety of fried and processed foods.
 - (C) It is generally low in fried foods, sweets, and strong spices and condiments.
 - (D) It excludes all forms of protein and carbohydrates.

Ans :

(C) It is generally low in fried foods, sweets, and strong spices and condiments.

In a hospital setting, a regular diet is often planned to be low in fried fatty foods, sweets, and excessive spices. This is done to make it easily digestible and suitable for patients who are recovering.

- 198.** The planning of both normal and therapeutic diets in a hospital aims to:
- (A) Maintain or restore good nutrition in the individual.
 - (B) Reduce the hospital's food budget as much as possible.
 - (C) Offer a gourmet dining experience to all patients.
 - (D) Test the effectiveness of new medications.

Ans :

(A) Maintain or restore good nutrition in the individual.

The fundamental purpose of planning both normal and therapeutic diets is to maintain good nutrition in healthy individuals or restore good nutritional status in those who are ill, taking into account their overall health and condition.

- 199.** The dietitian's work in planning all hospital meals requires knowledge of food service management and:
- (A) Architectural design.
 - (B) Quantity food production.
 - (C) Automotive engineering.
 - (D) Fashion merchandising.

Ans :

(B) Quantity food production.

To manage diets in an institutional setting like a hospital, a dietitian needs knowledge of food service management, which includes the principles and practices of quantity food production to prepare safe and nutritious meals on a large scale.

- 200.** Why is it important for even the regular hospital diet to be simple and easily digestible?
- (A) To make the food preparation process faster for the chefs.
 - (B) Because patients generally prefer bland food.
 - (C) Because simple foods are always less expensive to procure.
 - (D) To avoid causing any potential indigestion or discomfort for recovering patients.

Ans :

(D) To avoid causing any potential indigestion or discomfort for recovering patients.

Even patients without specific restrictions are often in a state of recovery where their digestive systems might be sensitive. Providing simple, easily digestible food helps prevent any potential gastrointestinal issues and supports their overall well-being.

Direction : Read the following case study and answer the following questions.

Anjali, a Class 12 student, is considering a career in clinical nutrition and dietetics. She researches the qualifications and skills required for this profession. She learns that to become a registered dietitian, she would need to complete a B.Sc. degree, followed by a Postgraduate Diploma in Dietetics and an internship. The field requires a strong foundation in basic biological and physical sciences, including chemistry, biology, and physiology. She discovers that a dietitian's role is not just about creating diet charts; it involves a deep understanding of how disease affects the body's metabolism and nutritional requirements. Important skills include the ability to assess a patient's nutritional status using clinical and biochemical criteria, customize diet plans, and effectively communicate and counsel patients. She also finds that knowledge of food microbiology and safety is critical, especially when working in institutional settings like hospitals. Anjali realizes that this career is a blend of science and art, requiring technical knowledge to formulate diets and interpersonal skills to motivate patients to follow them.

201. What is a key educational requirement for Anjali to become a registered dietitian?

- (A) A degree in fine arts.
- (B) A 10+2 qualification with a focus on commerce.
- (C) A short-term certificate course in cooking.
- (D) A B.Sc. degree followed by at least a Postgraduate Diploma in Dietetics and an internship.

Ans :

(D) A B.Sc. degree followed by at least a Postgraduate Diploma in Dietetics and an internship.

To qualify as a registered dietitian, one must typically complete a B.Sc. degree in a relevant field, followed by a Postgraduate Diploma in Dietetics which includes a mandatory internship to gain practical experience in the field.

202. A strong knowledge of chemistry, biology, and physiology is essential for a dietitian for what reason?

- (A) To be able to cook a variety of international cuisines.
- (B) To understand the physiological changes in disease and how they affect nutrient requirements.
- (C) To manage the financial accounts of the hospital department.
- (D) To design marketing materials for food products.

Ans :

(B) To understand the physiological changes in disease and how they affect nutrient requirements. A dietitian needs a thorough knowledge of basic biological and physical sciences to understand how different diseases alter the body's physiology and metabolism, which in turn changes the patient's nutritional requirements and dictates dietary modifications.

203. Besides technical knowledge, what is one of the most important aspects of a dietitian's job profile?

- (A) Performing surgical procedures.
- (B) Dispensing prescription medications.
- (C) Counselling patients to motivate them and ensure adherence to the diet plan.
- (D) Repairing and maintaining hospital equipment.

Ans :

(C) Counselling patients to motivate them and ensure adherence to the diet.

One of the most important aspects of a dietitian's job is counselling patients. This requires strong communication skills to educate, motivate, and help patients adapt to necessary dietary changes for their health and well-being.

204. Why is knowledge of food microbiology and safety crucial for a dietitian working in a hospital?

- (A) To ensure the safety of food prepared and served in an institutional setting and prevent foodborne illnesses.
- (B) To develop new antibiotics to treat infections.
- (C) To create more effective cleaning chemicals for the kitchen.
- (D) To analyze the genetic makeup of different microbes.

Ans :

(A) To ensure the safety of food prepared and served in an institutional setting and prevent foodborne illnesses.

In institutional settings, where food is prepared in large quantities, food safety is critical. A dietitian must have knowledge of food microbiology and safety to prevent contamination and ensure the food served to patients is safe.

205. The career of a dietitian offers diverse opportunities, including working as a:

- (A) Freelance diet consultant or running one's own enterprise.
- (B) Professional athlete or sports coach.
- (C) Construction manager for new hospitals.
- (D) Financial auditor for healthcare companies.

Ans :

- (A) Freelance diet consultant or running one's own enterprise.

Career avenues in dietetics are varied. Besides working in hospitals or clinics, a qualified professional can work as a freelance diet consultant or even establish their own enterprise, offering personalized nutrition counseling and services to the public.

Direction : Read the following case study and answer the following questions.

A 45-year-old executive, Rohan, visits a diet counsellor due to persistent hyperacidity and heartburn. The counsellor, after taking a detailed diet history, finds that Rohan's diet is rich in spicy and fatty foods, he often skips meals, and consumes large amounts of coffee. This lifestyle is contributing to his gastrointestinal problems. The counsellor plans a modified therapeutic diet for him. The first modification is to reduce the intake of fat, spices, and acidic foods. The second is to change the number and frequency of meals, advising him to eat smaller, more frequent meals instead of two large ones. The diet plan includes simple, easily digestible foods like lightly seasoned vegetables, lean proteins, and whole grains. This approach aims to give his digestive system rest and ameliorate his symptoms. The counsellor explains that while his condition is not life-threatening, long-term dietary management is key to preventing it from becoming a more serious issue like an ulcer. This case illustrates how diet therapy is applied to manage even common, non-chronic conditions.

206. The diet planned for Rohan is an example of what?

- (A) A regular, unmodified diet.
- (B) A modified therapeutic diet.
- (C) A diet designed for weight loss.
- (D) A high-protein diet for an athlete.

Ans :

- (B) A modified therapeutic diet.

A modified or therapeutic diet is one that is adjusted to meet a patient's specific medical needs. Rohan's diet was modified in terms of nutrient content (less fat/spice) and meal frequency to manage his hyperacidity.

207. Recommending smaller, more frequent meals is a modification of what?

- (A) The consistency of the diet.
- (B) The energy value of the diet.
- (C) The number of meals or intervals of feeding.
- (D) The amount of fiber in the diet.

Ans :

- (C) The number of meals or intervals of feeding.
- One type of dietary modification involves changing the number of meals or the intervals between feedings. This is often done to manage gastrointestinal conditions by preventing the stomach from being either too full or too empty.

208. The diet counsellor's main objective for Rohan is to:

- (A) Formulate a diet that includes more fried and spicy items.
- (B) Correct a severe protein deficiency.
- (C) Prepare him for intravenous feeding.
- (D) Modify his existing diet to ameliorate his disease condition.

Ans :

- (D) Modify his existing diet to ameliorate his disease condition.

A primary objective of diet therapy is to modify a patient's existing diet in a way that helps to lessen the severity of their disease condition and keeps it under control, as seen in Rohan's case.

209. The dietary advice for Rohan includes simple, easily digestible food with no harsh fibre or high fat. This is characteristic of what kind of diet?

- (A) A soft diet.
- (B) A clear liquid diet.
- (C) A high-calorie, high-fat diet.
- (D) A raw food diet.

Ans :

- (A) A soft diet.

A therapeutic soft diet is soft in consistency and includes simple, easily digestible food with no harsh fibre, high fat, or spicy foods. It is often recommended when rest for the digestive system is needed.

- 210.** This case demonstrates that clinical nutritionists provide advice and therapy for a wide range of conditions, including:
- (A) Only life-threatening chronic diseases like cancer and diabetes.
 - (B) Common gastrointestinal problems like hyperacidity and ulcers.
 - (C) Only conditions that require surgery.
 - (D) Only nutritional needs during pregnancy.

Ans :

(B) Common gastrointestinal problems like hyperacidity and ulcers.

The scope of diet therapy is broad. Clinical nutritionists and dietitians provide advice to improve the health of patients with a wide range of conditions, including common issues like ulcers, hyperacidity, heartburn, and other gastrointestinal problems.

CHAPTER 03

PUBLIC NUTRITION AND HEALTH

SUMMARY

1. INTRODUCTION

Public health involves the collective actions a society takes to protect and promote the health of its entire population . The primary mission of public health nutrition is to prevent both undernutrition and overnutrition to help the population maintain optimal nutritional status . This field addresses nutritional problems at a community level, requiring large-scale, organized efforts .

2. SIGNIFICANCE

The need for public health nutrition in India is critical due to several alarming statistics . Malnutrition is an underlying cause in at least 50% of deaths among children under five .

- Approximately one-fifth of infants are born with low birth weight, which can have lifelong adverse effects .
- Nearly half of all preschoolers from disadvantaged families suffer from growth retardation .
- Widespread micronutrient deficiencies, or “hidden hunger,” affect a large portion of the population, impacting physical and cognitive development, which in turn reduces national productivity by an estimated 2-3% of the GDP .
- India faces a “double burden of malnutrition,” where problems of undernutrition coexist with a rising problem of overnutrition . Changes in lifestyle and dietary patterns, including increased consumption of processed foods high in fat and sugar and reduced physical activity, are leading to a higher incidence of non-communicable diseases like obesity, heart disease, and diabetes .

These challenges highlight the need for a trained cadre of public health professionals to implement effective solutions .

3. BASIC CONCEPTS

3.1 What is Public Health Nutrition?

Public health nutrition is the science of promoting good health and preventing nutrition-related illnesses within a population through organized, multidisciplinary societal efforts . Professionals in this field address the nutritional problems of specific communities, which are groups of people sharing common characteristics or health issues . Nutritional problems are complex and are linked to a variety of interacting factors, including economic conditions, agricultural policies, healthcare access, and socio-cultural norms .

3.2 Nutritional Problems in India

- **Protein-Energy Malnutrition (PEM):** This results from an inadequate intake of energy and protein, with children being at the greatest risk . It is assessed through anthropometric measurements and manifests as:
 - **Underweight:** Low weight for one's age .
 - **Stunting:** Low height for one's age .
 - **Wasting:** Low weight relative to one's height .
 - Severe forms include **Marasmus** (severe energy deficiency) and **Kwashiorkor** (severe protein deficiency) .
- **Micronutrient Deficiencies (“Hidden Hunger”):** These occur when the diet lacks essential vitamins and minerals . Major deficiencies include:
 - **Iron-Deficiency Anemia (IDA):** The world's most common nutritional disorder, prevalent among women and children . It leads to low hemoglobin, fatigue, and impaired cognitive function .

- **Vitamin A Deficiency (VAD):** A leading cause of childhood blindness, VAD also impairs immunity and growth . It creates a vicious cycle with infection .
- **Iodine Deficiency Disorders (IDD):** Stemming from a lack of iodine in the soil, IDD impairs mental and physical development . It causes goitre in adults and can lead to irreversible mental retardation (cretinism) in children born to deficient mothers .

3.3 Strategies/Intervention to tackle Nutritional Problems

A multi-disciplinary approach is required to combat malnutrition . The Government of India's POSHAN Abhiyaan is a key initiative targeting stunting, undernutrition, and anemia . Strategies are broadly classified as:

- **Diet or Food-Based Strategies:** These are long-term, sustainable, and cost-effective approaches like dietary diversification, promoting home gardening, nutrition education, and food fortification .
- **Nutrient-Based or Medicinal Approach:** This is a short-term strategy involving the distribution of nutrient supplements (like vitamin A, iron, and folic acid) to at-risk groups .

Key nutrition programs in India include the Integrated Child Development Services (ICDS), Nutrient Deficiency Control Programs, the Mid-Day Meal Programme, and food security schemes like the Public Distribution System (PDS) . Health care is provided at three levels: primary (Primary Health Centres), secondary (district hospitals), and tertiary (specialized hospitals and medical colleges) .

4. SCOPE

A public nutritionist is well-suited to participate in health promotion and disease prevention strategies . Their role requires expertise in nutritional science, assessment, food science, communication, and program management . They can work in various settings, including:

- Outreach programs run by hospitals .
- Government programs like ICDS and policy-making committees .
- Developmental programs of national and international NGOs (like UNICEF, WHO, GAIN) .

- Large-scale feeding programs and school health programs .
- Corporate Social Responsibility (CSR) initiatives focused on food security .

5. CAREER AVENUES

Career opportunities in public health nutrition include:

- Community nutritionist in hospital departments .
- Roles in government nutrition programs (e.g., ICDS) .
- Nutritionist positions in voluntary and international organizations .
- Consultant roles for various agencies .
- Nutrition counselors for schools and industries .
- Positions in teaching, academics, and research .

MULTIPLE CHOICE QUESTION

1. What is the primary focus of public health nutrition?
 - (A) Treating individual diseases through specialized dietary plans in hospitals
 - (B) Promoting good health and preventing nutrition-related illnesses in populations
 - (C) Developing new food products with enhanced functional properties
 - (D) Managing food service operations in large institutional canteens

Ans :

(B) Promoting good health and preventing nutrition-related illnesses in populations
Public health nutrition is a field concerned with the promotion of good health through the prevention of nutrition-related problems within the entire population. It uses organized, multidisciplinary approaches to address health issues affecting large groups of people, rather than focusing only on individual treatment or food production.

2. What is the underlying cause for at least 50 per cent of deaths among children under five years of age?
 - (A) Infectious diseases
 - (B) Congenital defects
 - (C) Accidental injuries
 - (D) Malnutrition

Ans :

(D) Malnutrition

Malnutrition is a significant contributing factor to child mortality. It weakens the immune system and increases the susceptibility to and severity of common childhood illnesses, being the underlying cause in at least half of the deaths of children under the age of five years, highlighting its critical public health importance.

3. An infant born in India weighing less than 2500g is categorized as which of the following?
- (A) A low birth weight baby
 - (B) A premature baby
 - (C) A growth retarded baby
 - (D) A stunted baby

Ans :

- (A) A low birth weight baby

The standard definition for a low birth weight baby is one who weighs less than 2500 grams (2.5 kg) at birth. This condition can have adverse effects on the child's health and development throughout their life and is a key indicator of public health and maternal nutrition status.

4. What is the term used to describe the widespread prevalence of micronutrient deficiencies in a population?
- (A) Visible hunger
 - (B) Chronic starvation
 - (C) Hidden hunger
 - (D) Acute malnutrition

Ans :

- (C) Hidden hunger

"Hidden hunger" refers to deficiencies in essential vitamins and minerals, or micronutrients. This condition is termed "hidden" because its signs are not always visible, unlike energy or protein deficiency, but it can severely impact health, cognitive development, and productivity in the long run.

5. What economic impact has been estimated for productivity losses due to malnutrition in India?
- (A) 1-2 per cent of lifetime earnings for individuals
 - (B) 5-7 per cent of the gross domestic product
 - (C) Less than 1 per cent of the gross domestic product
 - (D) Over 10 per cent of lifetime earnings for individuals

Ans :

- (D) Over 10 per cent of lifetime earnings for individuals

Experts estimate that the economic cost of malnutrition is substantial, with productivity losses amounting to more than 10 per cent of an individual's lifetime earnings and 2-3 per cent of the nation's gross domestic product (GDP). This underscores the economic rationale for investing in nutrition.

6. India's situation of facing both undernutrition and a rising problem of overnutrition simultaneously is known as what?
- (A) The nutritional paradox
 - (B) The double burden of malnutrition
 - (C) The malnutrition transition
 - (D) The dietary divergence

Ans :

- (B) The double burden of malnutrition

The term "double burden of malnutrition" describes the coexistence of both undernutrition (like stunting and micronutrient deficiencies) and overnutrition (like overweight and obesity) within the same population, country, or even household. This poses a complex challenge for public health systems in India.

7. Which of the following best defines a 'community' in the context of public health nutrition?
- (A) Any large group of unrelated individuals living in a city
 - (B) All citizens registered under a single government authority
 - (C) A specific group of people who share a common characteristic
 - (D) A collection of families belonging to the same economic class

Ans :

- (C) A specific group of people who share a common characteristic

A community is defined as a specific group of people who share common characteristics, such as language, lifestyle, geographical location, or a particular health problem. This definition helps public health professionals to target interventions and resources effectively towards specific groups with shared needs.

8. Which of the following is considered an immediate cause of malnutrition at the individual level?
- (A) Inadequate or faulty dietary intake
 - (B) Poor maternal and child care practices
 - (C) Insufficient access to healthcare services
 - (D) Low level of parental education

Ans :

(A) Inadequate or faulty dietary intake

According to the conceptual framework of malnutrition, inadequate or faulty dietary intake and the presence of disease or infections are the two immediate causes that directly affect an individual's nutritional status. Other factors like poor care practices or low education are considered underlying causes.

9. How does poor sanitation contribute to malnutrition and economic loss?

- (A) It directly reduces the nutrient content of staple foods
- (B) It increases the market price of clean drinking water
- (C) It prevents access to government food distribution schemes
- (D) It causes a loss of work days due to illness

Ans :

(D) It causes a loss of work days due to illness
Poor sanitation leads to an increased incidence of infections and water-borne diseases. These illnesses result in loss of work days for adults and school days for children, contributing to reduced productivity and further economic loss for the family, exacerbating the cycle of poverty and malnutrition.

10. Which of the following is NOT considered a 'basic cause' of malnutrition in the societal framework?

- (A) Political, cultural, and economic systems
- (B) The presence of disease or infections in an individual
- (C) The quantity and quality of actual resources available
- (D) Potential resources like environment and technology

Ans :

(B) The presence of disease or infections in an individual

The presence of disease or infections is classified as an 'immediate cause' of malnutrition at the individual level. Basic causes are the broader societal factors that create the conditions for malnutrition, such as political systems, economic structures, and the overall resource base of a society.

11. What is Protein-Energy Malnutrition (PEM) primarily caused by?

- (A) Inadequate intake of vitamins and minerals

- (B) Excessive consumption of processed foods
- (C) Insufficient intake of energy and protein
- (D) Inability to digest complex carbohydrates

Ans :

(C) Insufficient intake of energy and protein

Protein-Energy Malnutrition (PEM) is a condition resulting from an inadequate intake of food relative to requirements, specifically an insufficient consumption of the macronutrients, which are energy (from carbohydrates and fats) and protein. It poses the greatest risk to children but can also affect adults.

12. How is Protein-Energy Malnutrition (PEM) typically assessed?

- (A) Through blood tests to measure protein levels
- (B) By evaluating cognitive function and memory
- (C) By analyzing dietary intake records only
- (D) Through evaluation of anthropometric measurements

Ans :

(D) Through evaluation of anthropometric measurements

PEM is assessed by evaluating anthropometric measurements like weight, height, and head-chest circumference. These measurements are compared to age- and sex-specific standards to determine if an individual is underweight, stunted, or wasted, which are key indicators of this form of malnutrition.

13. What does the term 'stunting' refer to in the context of malnutrition?

- (A) Height is less than adequate for age
- (B) Body weight is less than adequate for age
- (C) Weight is not adequate relative to height
- (D) Head circumference is smaller than normal

Ans :

(A) Height is less than adequate for age

Stunting is a form of chronic malnutrition where a child's height is less than what is considered adequate for their age according to standard growth charts. It indicates a failure to reach one's linear growth potential and is often the result of long-term nutritional deprivation.

14. A condition where a child's weight is not adequate relative to their height is termed as what?

- (A) Wasting
- (B) Stunting
- (C) Underweight
- (D) Marasmus

Ans :

(A) Wasting

Wasting, or low weight-for-height, is an indicator of acute malnutrition. It signifies that a child's weight is not adequate in relation to their height, often resulting from recent and severe weight loss due to illness or a sudden lack of food.

15. What is the key difference between 'marasmus' and 'kwashiorkor'?

- (A) Marasmus affects adults, while kwashiorkor affects children
- (B) Marasmus is a vitamin deficiency, while kwashiorkor is a mineral deficiency
- (C) Marasmus is due to energy deficiency, while kwashiorkor is due to protein deficiency
- (D) Marasmus causes weight gain, while kwashiorkor causes severe weight loss

Ans :

(C) Marasmus is due to energy deficiency, while kwashiorkor is due to protein deficiency
Marasmus and kwashiorkor are two forms of severe Protein-Energy Malnutrition. Marasmus is primarily caused by a severe deficiency of food and energy, leading to a wasted appearance. Kwashiorkor is mainly caused by a deficiency of protein, which can result in edema (swelling).

16. The term "hidden hunger" is used to refer to which nutritional problem?

- (A) Protein-Energy Malnutrition
- (B) Micronutrient deficiencies
- (C) Low birth weight
- (D) Overnutrition and obesity

Ans :

(B) Micronutrient deficiencies
"Hidden hunger" is a term used to describe micronutrient deficiencies, which occur when the intake of essential vitamins and minerals is inadequate. It is called "hidden" because the symptoms are often not immediately visible, yet they can have serious long-term health consequences.

17. Which of the following is NOT listed as a micronutrient of major public health concern?

- (A) Iron
- (B) Vitamin A
- (C) Calcium
- (D) Iodine

Ans :

(C) Calcium

While calcium is an important nutrient, the micronutrients of major public health concern specifically mentioned are iron, vitamin A, iodine, and zinc. Deficiencies of these particular micronutrients are widespread and have severe impacts on health, making them a priority for public health interventions.

18. Which groups are most vulnerable to Iron-deficiency Anemia (IDA)?

- (A) Elderly men and young boys
- (B) Middle-aged men and women
- (C) Adolescent boys and male athletes
- (D) Pregnant women and adolescent girls

Ans :

(D) Pregnant women and adolescent girls

The most vulnerable groups for Iron-deficiency Anemia (IDA) are those with increased iron requirements. This includes women in their child-bearing age, pregnant women (due to the needs of the fetus), adolescent girls (due to menstrual blood loss and growth spurts), and school-age children.

19. What is a primary function of hemoglobin in the body?

- (A) To produce energy for muscles
- (B) To carry oxygen in the blood
- (C) To fight bacterial infections
- (D) To synthesize essential vitamins

Ans :

(B) To carry oxygen in the blood

Hemoglobin is the protein in red blood cells that is responsible for transporting oxygen from the lungs to the rest of the body's tissues. A deficiency of iron, a key component of hemoglobin, impairs this function, leading to symptoms like fatigue and breathlessness.

20. A key symptom of Iron-deficiency Anemia (IDA) is breathlessness upon slight exertion. Why does this occur?

- (A) The body cannot produce enough energy from food
- (B) The lungs are unable to take in sufficient air
- (C) The body's capacity to carry oxygen is reduced
- (D) The muscles become weak and cannot function properly

Ans :

(C) The body's capacity to carry oxygen is reduced

IDA results in low levels of hemoglobin, the molecule that carries oxygen. When oxygen-carrying capacity is reduced, the body's tissues do not receive enough oxygen to meet the demands of physical activity, leading to symptoms like fatigue and breathlessness even with minor exertion.

- 21.** Assertion (A): Vitamin A deficiency is the most common cause of preventable childhood blindness. Reason (R): Vitamin A is essential for the maintenance of healthy epithelium and normal vision.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is a well-established fact. Reason (R) correctly states that Vitamin A's role in maintaining healthy eye tissues and vision is crucial. Therefore, a deficiency (VAD) directly leads to eye problems like night blindness that can progress to total blindness, making (R) the correct explanation for (A).

- 22.** What does the "vicious cycle between vitamin A deficiency and infection" imply?
- (A) Vitamin A deficiency directly causes infections to occur
(B) Infection reduces the body's ability to produce Vitamin A
(C) Deficiency lowers resistance to infection, and infection increases Vitamin A loss
(D) Both deficiency and infection are caused by a poor diet

Ans :

(C) Deficiency lowers resistance to infection, and infection increases Vitamin A loss

The vicious cycle means that Vitamin A deficiency weakens the immune system, making a person more susceptible to infections. In turn, when an infection occurs, it increases the body's metabolic demand for and loss of Vitamin A, thus worsening the deficiency and creating a continuous negative loop.

- 23.** What is the primary cause of Iodine Deficiency Disorders (IDD)?

- (A) A genetic inability to absorb iodine
(B) Excessive intake of foods that block iodine
(C) Poor sanitation leading to iodine loss from the body
(D) An ecological phenomenon of iodine-deficient soil

Ans :

(D) An ecological phenomenon of iodine-deficient soil

Iodine Deficiency Disorders (IDD) are largely an ecological problem. They occur in regions where the soil, and consequently the water and crops grown in it, are deficient in iodine. This leads to an inadequate dietary intake of iodine for the population living in that area.

- 24.** The most common and visible manifestation of iodine deficiency in adults is an enlarged thyroid gland, known as what?

- (A) Cretinism
(B) Goitre
(C) Myxedema
(D) Thyrotoxicosis

Ans :

(B) Goitre

Goitre is the term for the enlargement of the thyroid gland, located in the neck. It is the most common sign of iodine deficiency in adults, as the gland swells in an attempt to capture more iodine from the blood to produce thyroid hormone.

- 25.** What is one of the most severe and irreversible effects of iodine deficiency during pregnancy?
- (A) Mental retardation of the fetus
(B) Low birth weight of the fetus
(C) Increased risk of twins
(D) Physical deformities in the mother

Ans :

(A) Mental retardation of the fetus

Iodine is crucial for brain development. A deficiency during pregnancy can have several adverse effects on the fetus, with the most serious and irreversible consequence being mental retardation and other congenital abnormalities. This condition is also known as cretinism.

- 26.** The Government of India's overarching scheme for holistic nutrition, launched in March 2018, is called what?

- (A) National Health Mission
(B) POSHAN Abhiyaan
(C) Mid-Day Meal Scheme

(D) Janani Suraksha Yojana

Ans :

(B) POSHAN Abhiyaan

POSHAN Abhiyaan, or the PM's Overarching Scheme for Holistic Nutrition, was launched in 2018 to tackle malnutrition in a targeted and time-bound manner. It aims to reduce stunting, under-nutrition, anemia, and low birth weight through a multi-ministerial convergence mechanism.

27. Which of the following is NOT a target of the POSHAN Abhiyaan?

- (A) Stunting
- (B) Under-nutrition
- (C) Anemia among young children
- (D) Overnutrition and obesity

Ans :

(D) Overnutrition and obesity

POSHAN Abhiyaan specifically targets the problems of stunting, under-nutrition, anemia (among young children, women, and adolescent girls), and low birth rate. While overnutrition is a public health concern, it is not listed as a primary target of this particular mission.

28. Which ministry is the implementing agency for the POSHAN Abhiyaan?

- (A) Ministry of Health and Family Welfare
- (B) Ministry of Human Resource Development
- (C) Ministry of Women and Child Development
- (D) Ministry of Rural Development

Ans :

(C) Ministry of Women and Child Development
The Ministry of Women and Child Development (MWCD) is the nodal ministry responsible for implementing the POSHAN Abhiyaan across the country. It works in convergence with other ministries to achieve the scheme's targets for improving nutritional outcomes.

29. Fortifying salt with iodine is an example of which type of nutritional intervention?

- (A) A diet-based strategy
- (B) A medicinal supplementation
- (C) A long-term policy instrument
- (D) A poverty alleviation scheme

Ans :

(A) A diet-based strategy

Fortification of essential foods like salt with iodine is a direct, short-term intervention that falls under food-based strategies. It involves adding

micronutrients to commonly consumed foods to increase their nutritional value and prevent deficiencies in the wider population without requiring individual behavioral changes.

30. Which of the following is an example of an 'indirect policy instrument' or long-term strategy for tackling malnutrition?

- (A) Distributing free iron and folic acid tablets
- (B) Providing supplementary food at Anganwadi centres
- (C) Improving the status of women and their education
- (D) Fortifying wheat flour with essential micronutrients

Ans :

(C) Improving the status of women and their education

Indirect policy instruments are long-term strategies that address the root causes of malnutrition through structural changes. Improving the status and education of women is a key example, as it empowers them to make better health and nutrition choices for themselves and their families.

31. What is a key advantage of food-based strategies over nutrient-based (medicinal) approaches for preventing deficiencies?

- (A) They provide a much higher dose of nutrients
- (B) They show results in a much shorter time frame
- (C) They require less participation from the food industry
- (D) They are sustainable and carry no risk of overdose

Ans :

(D) They are sustainable and carry no risk of overdose

Food-based strategies, such as dietary diversification and fortification, are considered sustainable because they integrate into existing dietary patterns. A major advantage is that they are safer, as they do not carry the risk of overdose or toxicity that can sometimes occur with high-dose medicinal supplements.

32. Which of the following is an example of a nutrient-based or medicinal approach to combat malnutrition?

- (A) Giving vitamin A supplements to vulnerable children

- (B) Promoting home gardening to increase vegetable intake
- (C) Providing nutrition and health education to mothers
- (D) Adding iron to wheat flour during milling process

Ans :

(A) Giving vitamin A supplements to vulnerable children

The nutrient-based or medicinal approach involves providing specific nutrients in the form of supplements (like tablets, capsules, or syrups) directly to individuals, especially those in vulnerable groups who are at high risk of deficiency. Giving vitamin A doses is a classic example of this short-term strategy.

33. Why are nutrient supplementation programmes often considered a short-term strategy?

- (A) Because the human body cannot store supplements for long
- (B) Because they are expensive and can have coverage issues
- (C) Because they only address a single nutrient deficiency
- (D) Because the supplements expire quickly after production

Ans :

(B) Because they are expensive and can have coverage issues

Supplementation is generally a short-term measure because such programmes can be expensive to run on a large scale and often face logistical challenges in reaching the entire target population (coverage). The long-term goal is to shift towards sustainable food-based approaches.

34. Promoting home gardening to increase the consumption of leafy vegetables is an example of which strategy?

- (A) Food fortification
- (B) Nutrient supplementation
- (C) Poverty alleviation
- (D) Dietary diversification

Ans :

(D) Dietary diversification

Dietary diversification aims to increase the variety of foods consumed to ensure a broader intake of nutrients. Promoting horticulture interventions like home gardening helps families grow and consume a wider range of micronutrient-rich

foods, such as vegetables and fruits, thereby diversifying their diet.

35. Which programme is an outreach initiative for early childhood care and development, covering children up to 6 years and mothers?

- (A) Mid-Day Meal Programme
- (B) Public Distribution System
- (C) Integrated Child Development Services (ICDS)
- (D) National Health Mission

Ans :

(C) Integrated Child Development Services (ICDS)

The Integrated Child Development Services (ICDS) is a comprehensive outreach programme focused on early childhood. It provides a package of services including supplementary nutrition, health check-ups, immunization, and pre-school education to children under 6 years, as well as to pregnant and nursing mothers.

36. Match the nutrition programme in Column I with its primary objective in Column II.

	Column I		Column II
1.	Public Distribution System	a.	Provide cooked meals to school children
2.	Mid-Day Meal Programme	b.	Prevent blindness due to Vitamin A deficiency
3.	National Prophylaxis Programme	c.	Provide family-based care to orphaned children
4.	SOS Children's Villages	d.	Ensure food security by providing subsidised grains

(A) 1-d, 2-a, 3-b, 4-c

(B) 1-a, 2-d, 3-c, 4-b

(C) 1-d, 2-b, 3-a, 4-c

(D) 1-c, 2-a, 3-d, 4-b

Ans :

(A) 1-d, 2-a, 3-b, 4-c

The Public Distribution System (PDS) provides subsidised food grains for food security. The Mid-Day Meal Programme gives cooked meals to school children. The National Prophylaxis Programme aims to prevent Vitamin A deficiency. SOS Children's Villages provide family-like care for orphaned children.

- 37.** What is the fundamental concept behind the health care system in India?
- (A) Health care is a commodity to be purchased by citizens
 - (B) Health care is primarily the responsibility of private hospitals
 - (C) Health is a fundamental human right provided by the government
 - (D) Health care focuses exclusively on treating communicable diseases

Ans :

(C) Health is a fundamental human right provided by the government

The underlying principle of India's health care system is that health is a fundamental human right. Consequently, it is considered the responsibility of the government to provide adequate health care services to all its citizens to promote, maintain, monitor, and restore their health.

- 38.** Arrange the levels of health care in India from the first point of contact to the most specialized level.
- 1. Tertiary Level
 - 2. Secondary Level
 - 3. Primary Level
- (A) 3, 2, 1
 - (B) 1, 2, 3
 - (C) 2, 3, 1
 - (D) 3, 1, 2

Ans :

(A) 3, 2, 1

The health care system in India is structured in three tiers. The Primary level (e.g., PHCs) is the first contact point. The Secondary level (e.g., district hospitals) handles more complex issues. The Tertiary level (e.g., medical colleges, AIIMS) is the highest, most specialized level.

- 39.** Which institutions typically provide primary level health care in India's public health system?
- (A) All India Institutes of Medical Sciences (AIIMS)
 - (B) District hospitals and community health centres
 - (C) Specialised regional hospitals
 - (D) Primary Health Centres (PHCs)

Ans :

(D) Primary Health Centres (PHCs)

The primary level of health care, which is the first point of contact for individuals and communities with the health system, is delivered through a

network of Primary Health Centres (PHCs) and their sub-centres, especially in rural areas.

- 40.** A patient with a common illness would first visit a PHC. If the condition is too complex, they would be referred to a district hospital. This process demonstrates what?
- (A) The failure of the primary health care system
 - (B) The three-level structure of health care referral
 - (C) The high cost of tertiary medical care
 - (D) The lack of doctors in rural areas of India

Ans :

(B) The three-level structure of health care referral

This scenario perfectly illustrates the referral mechanism within India's three-level health care system. Problems that cannot be managed at the primary level are referred to the secondary level for more advanced care, and from there to the tertiary level if needed, ensuring a structured pathway for patient care.

- 41.** The role of a public health nutritionist primarily involves participation in which of the following?
- (A) Individual diet counselling for hospitalised patients
 - (B) Developing recipes for high-end restaurants
 - (C) Strategies of health promotion and disease prevention
 - (D) Managing the finances of a food manufacturing unit

Ans :

(C) Strategies of health promotion and disease prevention

A public health nutritionist is mainly involved in strategies for health promotion and the prevention of nutrition-related diseases within the community. Their work focuses on populations and groups rather than the one-on-one clinical management of individual patients.

- 42.** Which of the following is a key area of knowledge required for a public health nutritionist?
- (A) Advanced surgical techniques
 - (B) International trade law
 - (C) Automotive engineering principles
 - (D) Nutritional assessment and food science

Ans :

(D) Nutritional assessment and food science

A public nutritionist needs a strong foundation in several key areas to be effective. These include

nutritional science, understanding nutritional needs across the life cycle, methods of nutritional assessment, and food science to understand the composition and use of foods in programmes.

- 43.** A public health nutritionist working with UNICEF or WHO on a national deworming campaign is working in which sector?
- (A) An international organisation's programme
 - (B) A government developmental programme
 - (C) A corporate social responsibility programme
 - (D) A hospital's outreach programme

Ans :

(A) An international organisation's programme
UNICEF and WHO are prominent international organisations. A professional working with them on a health campaign would be part of an international effort to address public health issues, often in partnership with national governments and other NGOs.

- 44.** A professional who plans, implements, and evaluates large-scale feeding programmes for school children is most likely a what?
- (A) Clinical dietitian
 - (B) Food technologist
 - (C) Public health nutritionist
 - (D) Catering manager

Ans :

(C) Public health nutritionist
Public health nutritionists are specifically trained to work on large-scale feeding programmes, such as the Mid-Day Meal scheme. Their role involves planning nutritionally adequate meals, managing implementation, and evaluating the programme's impact on the health and nutrition of the target group (school children).

- 45.** Which of the following is NOT a typical career avenue for a public health nutritionist?
- (A) Working as a consultant for a corporate CSR programme
 - (B) Teaching and research in an academic institution
 - (C) Working with an NGO on a community nutrition project
 - (D) Providing one-on-one diet therapy in an ICU

Ans :

(D) Providing one-on-one diet therapy in an ICU
Providing intensive, individualised diet therapy in a clinical setting like an Intensive Care Unit (ICU) is the role of a clinical dietitian or medical

nutrition therapist. A public health nutritionist's focus is on populations and community-level interventions, not individual acute care.

- 46.** Consider the following statements about Protein-Energy Malnutrition (PEM):
1. It is caused by an insufficient intake of micronutrients.
 2. It is assessed by evaluating anthropometric measurements like weight and height.
 3. Marasmus is a form of severe PEM caused primarily by protein deficiency.

Which of the above statements is/are correct?

- (A) 2 only
- (B) 1 and 3 only
- (C) 2 and 3 only
- (D) 1, 2 and 3

Ans :

- (A) 2 only

Statement 1 is incorrect; PEM is caused by macronutrient (energy and protein) deficiency. Statement 3 is incorrect; marasmus is from energy deficiency, while kwashiorkor is from protein deficiency. Statement 2 is correct; anthropometric measurements are the standard method for assessing PEM.

- 47.** Assertion (A): Food-based strategies like dietary diversification are considered highly sustainable for combating malnutrition.
Reason (R): These strategies require long-term changes in eating behaviours and agricultural policies.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 - (C) (A) is true but (R) is false.
 - (D) (A) is false but (R) is true.

Ans :

- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).

Assertion (A) is true; food-based strategies are sustainable. Reason (R) is also true; these strategies do require behavioral and policy changes to be effective. However, (R) describes the challenges or requirements for implementation, not the primary reason for their sustainability. The sustainability comes from being integrated into daily life.

- 48.** Which of the following pairs of nutritional problems and their primary cause is correctly matched?
- (A) Goitre : Vitamin A deficiency
 - (B) Anemia : Iodine deficiency
 - (C) Kwashiorkor : Protein deficiency
 - (D) Stunting : Acute food shortage

Ans :

(C) Kwashiorkor : Protein deficiency

Kwashiorkor is a form of severe malnutrition caused by inadequate protein intake. Goitre is caused by iodine deficiency. Anemia is most commonly caused by iron deficiency. Stunting is a result of chronic, long-term malnutrition, not necessarily an acute shortage.

- 49.** All of the following are examples of food security programmes in India EXCEPT:
- (A) Public Distribution System (PDS)
 - (B) Antodaya Anna Yojana (AAY)
 - (C) Annapurna Scheme
 - (D) National Service Scheme (NSS)

Ans :

(D) National Service Scheme (NSS)

The Public Distribution System, Antodaya Anna Yojana, and Annapurna Scheme are all food security programmes designed to provide food grains to vulnerable populations. The National Service Scheme (NSS) is a youth programme focused on social service and national development, not food distribution.

- 50.** What is the main difference between the scope of clinical nutrition and public health nutrition?
- (A) Clinical nutrition focuses on children, while public nutrition focuses on adults
 - (B) Clinical nutrition addresses individuals, while public nutrition addresses populations
 - (C) Clinical nutrition is government-funded, while public nutrition is privately funded
 - (D) Clinical nutrition uses food, while public nutrition uses medicinal supplements

Ans :

(B) Clinical nutrition addresses individuals, while public nutrition addresses populations

The fundamental difference in scope is the target group. Clinical nutrition and dietetics focus on the nutritional management of individual patients, often in a hospital or clinic setting. Public health nutrition addresses the nutritional problems of

the community or entire populations through large-scale programmes.

- 51.** What is the primary purpose of the 'vicious cycle' diagram for Vitamin A deficiency?
- (A) To illustrate the link between deficiency and infection
 - (B) To show the dietary sources of Vitamin A
 - (C) To explain the process of Vitamin A absorption
 - (D) To demonstrate the symptoms of eye damage

Ans :

(A) To illustrate the link between deficiency and infection

The diagram specifically illustrates the cyclical relationship where Vitamin A deficiency increases susceptibility to infection, and the resulting infection, in turn, increases the body's losses of Vitamin A, thereby worsening the deficiency. It highlights the interconnectedness of nutrition and immunity.

- 52.** The mission of public health nutrition is to prevent which of the following?
- (A) Only undernutrition
 - (B) Only overnutrition
 - (C) Only communicable diseases
 - (D) Both undernutrition and overnutrition

Ans :

(D) Both undernutrition and overnutrition

The core mission of public health nutrition is comprehensive. It aims to prevent both extremes of the malnutrition spectrum—undernutrition (like stunting and wasting) and overnutrition (like obesity)—to maintain optimal nutritional status for the entire population.

- 53.** A city child who rarely plays outdoors and consumes a diet high in fast food and soft drinks is at high risk for what?
- (A) Protein-Energy Malnutrition
 - (B) Iodine Deficiency Disorder
 - (C) Overnutrition and obesity
 - (D) Vitamin A deficiency

Ans :

(C) Overnutrition and obesity

The combination of a sedentary lifestyle (less outdoor play) and a diet high in energy, sugar, and fat from processed and fast foods are key contributing factors to undesirable weight gain, leading to overweight, obesity, and related non-communicable diseases.

- 75.** Which of the following is NOT a component of the ‘underlying causes’ of malnutrition at the household/family level?
- Political and economic social systems
 - Poor water, sanitation, and hygiene
 - Inadequate health services access
 - Poor maternal and child care practices

Ans :

(A) Political and economic social systems
Political and economic systems are classified as ‘basic causes’ of malnutrition, as they shape the overall environment in which households function. Poor water and sanitation, inadequate access to health services, and poor care practices are all listed as ‘underlying causes’ at the household and family level.

- 76.** A professional working as a school health counsellor, focusing on the nutrition of students, is working in the field of:
- Food Processing
 - Clinical Dietetics
 - Public Health Nutrition
 - Institutional Management

Ans :

(C) Public Health Nutrition
Working as a nutritionist or health counsellor in a school setting involves promoting health and preventing nutritional problems among a specific community group (school children). This falls squarely within the scope and career avenues of public health nutrition.

- 77.** Which statement best describes the current nutritional scenario in India?
- The problem of undernutrition has been completely eradicated.
 - The country only faces the problem of overnutrition.
 - Micronutrient deficiencies are no longer a public health concern.
 - The country faces a double burden of undernutrition and overnutrition.

Ans :

(D) The country faces a double burden of undernutrition and overnutrition.
India is experiencing a nutritional transition where it faces the “double burden of malnutrition”. This means that while problems of undernutrition like stunting and wasting persist, there is also a

simultaneous and rapid increase in problems of overnutrition like obesity and related diseases.

- 78.** Match the public health term in Column I with its appropriate description in Column II.

	Column I		Column II
1.	Hidden Hunger	a.	Insufficient intake of energy and protein
2.	Low Birth Weight	b.	Height is less than adequate for age
3.	Stunting	c.	Deficiency of micronutrients
4.	PEM	d.	Weighing less than 2.5 kg at birth

- 1-c, 2-d, 3-b, 4-a
- 1-d, 2-c, 3-a, 4-b
- 1-c, 2-b, 3-d, 4-a
- 1-a, 2-d, 3-b, 4-c

Ans :

(A) 1-c, 2-d, 3-b, 4-a
Hidden hunger refers to micronutrient deficiencies. Low birth weight is defined as weighing less than 2.5 kg. Stunting is low height-for-age. PEM is a deficiency of protein and energy.

- 79.** Consider the following statements:
- Community health centres function as the first referral level in the secondary tier of health care.
 - Cretinism is an irreversible condition caused by severe iron deficiency during pregnancy.
 - POSHAN Abhiyaan is implemented by the Ministry of Health and Family Welfare.
 - Dietary diversification is a sustainable, food-based strategy for preventing malnutrition.

Which of the above statements are correct?

- 1 and 4 only
- 2 and 3 only
- 1, 2 and 4 only
- 2, 3 and 4 only

Ans :

(A) 1 and 4 only
Statement 1 is correct. Statement 2 is incorrect; cretinism is caused by iodine deficiency. Statement 3 is incorrect; it’s implemented by the Ministry of Women and Child Development. Statement 4 is correct.

- (B) To use both approaches equally and indefinitely
- (C) To shift away from supplementation towards food-based approaches
- (D) To eliminate both approaches and rely on medical treatments

Ans :

(C) To shift away from supplementation towards food-based approaches

While supplementation is a useful short-term strategy for treating acute deficiencies, the long-term, sustainable goal is to improve diets and food systems. Therefore, public health policy aims to eventually shift away from reliance on supplementation towards more sustainable food-based approaches.

- 60.** Which of the following statements accurately describes the Public Distribution System (PDS)?
- (A) It provides free cooked meals in primary schools
 - (B) It is a credit scheme for farmers to buy seeds
 - (C) It is a programme for building rural sanitation facilities
 - (D) It is a food security programme providing subsidised grains

Ans :

(D) It is a food security programme providing subsidised grains

The Public Distribution System (PDS) is one of India's key food security programmes. Its primary function is to distribute essential food grains like wheat and rice at subsidised prices to vulnerable sections of the population through a network of fair price shops.

- 61.** Consider the following statements regarding nutritional problems and strategies:
1. 'Wasting' indicates chronic malnutrition, while 'stunting' indicates acute malnutrition.
 2. Goitre is the most common manifestation of Vitamin A deficiency in adults.
 3. Food fortification is considered a food-based strategy to combat micronutrient deficiencies.
 4. The ICDS programme targets children up to 6 years of age, and pregnant and nursing mothers.

Which of the above statements are correct?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

(B) 3 and 4 only

Statement 1 is incorrect; it's the reverse - wasting is acute, and stunting is chronic. Statement 2 is incorrect; goitre is from iodine deficiency. Statement 3 is correct, as fortification involves adding nutrients to food. Statement 4 is also correct, defining the target group of ICDS.

- 62.** The field of study concerned with promoting good health by preventing nutrition-related illnesses in the population is called what?
- (A) Clinical Dietetics
 - (B) Food Technology
 - (C) Public Health Nutrition
 - (D) Institutional Catering

Ans :

(C) Public Health Nutrition

This is the core definition of Public Health Nutrition. It focuses on the health of the whole population or community, using organised societal efforts to prevent disease and promote health, distinguishing it from the individual focus of clinical dietetics.

- 63.** The fact that many health problems that require complex care are resolved at district hospitals and community health centres indicates that these facilities function at which level?
- (A) Secondary level
 - (B) Primary level
 - (C) Tertiary level
 - (D) Quaternary level

Ans :

(A) Secondary level

The secondary level of health care is the first referral level, designed to handle more complex health problems that cannot be managed at the primary level. District hospitals and community health centres are the key institutions operating at this secondary tier.

- 64.** Which condition is caused by a severe deficiency of food and energy, leading to a wasted appearance in children?
- (A) Kwashiorkor
 - (B) Marasmus
 - (C) Scurvy
 - (D) Pellagra

Ans :

(B) Marasmus

Marasmus is the specific term for severe undernutrition resulting from a significant deficiency in total food and energy intake. It is characterized by severe wasting of muscle and fat, giving the child an emaciated, “old man” appearance.

- 65.** A public health nutritionist advising a government committee on policies to improve food availability and implementing land reforms is working on which type of intervention?
- (A) Indirect, long-term structural change
 (B) Direct, short-term supplementation
 (C) A medicinal, nutrient-based approach
 (D) A hospital outreach programme

Ans :

(A) Indirect, long-term structural change
 Working on policies like food availability and land reforms represents an indirect, long-term strategy. These institutional and structural changes aim to address the root or ‘basic’ causes of malnutrition by improving the overall socio-economic environment, rather than providing direct food or nutrient aid.

- 66.** Which of the following pairs of health institution and care level is INCORRECTLY matched?
- (A) Primary Health Centre (PHC) : Primary Level
 (B) Community Health Centre : Secondary Level
 (C) All India Institute of Medical Sciences (AIIMS) : Tertiary Level
 (D) District Hospital : Primary Level

Ans :

(D) District Hospital : Primary Level
 District hospitals are key institutions at the secondary level of health care, serving as a referral point for more complex cases from the primary level. PHCs are at the primary level, and specialized institutes like AIIMS are at the tertiary level.

- 67.** The government’s strategies to tackle malnutrition include all of the following EXCEPT:
- (A) Fortification of essential foods like salt
 (B) Implementing poverty alleviation schemes
 (C) Promoting the sale of imported luxury foods
 (D) Running food supplementation programmes like the Mid-Day Meal

Ans :

(C) Promoting the sale of imported luxury foods

Government strategies focus on ensuring nutritional security through programmes like fortification, poverty alleviation, and supplementation. Promoting imported luxury foods is not a public health strategy for tackling malnutrition; it is a matter of trade and private markets.

- 68.** Assertion (A): The consequences of communicable diseases are far worse for those who are not optimally nourished.
 Reason (R): Undernourished individuals and those with lower immunity due to conditions like obesity have a reduced ability to fight infections.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 (C) (A) is true but (R) is false.
 (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is correct; malnutrition worsens the outcome of infections. Reason (R) correctly explains why: both undernutrition and conditions like obesity can impair the immune system, reducing the body’s ability to defend against communicable diseases. Thus, (R) is the correct explanation for (A).

- 69.** Match the career activity in Column I with the most appropriate work setting in Column II.

	Column I		Column II
1.	Formulating national nutrition policies	a.	School Health Programme
2.	Working on large-scale feeding programmes	b.	International Organisation (e.g., UNICEF)
3.	Conducting nutrition counselling for school children	c.	Government advisory committee
4.	Implementing child survival programmes globally	d.	ICDS or Mid-Day Meal Programme

- (A) 1-c, 2-d, 3-a, 4-b
 (B) 1-d, 2-c, 3-b, 4-a
 (C) 1-c, 2-a, 3-d, 4-b
 (D) 1-b, 2-d, 3-a, 4-c

Ans :

(A) 1-c, 2-d, 3-a, 4-b

Formulating national policy is done in government committees. Large-scale feeding is typical of ICDS or MDM. Counselling children happens in school health programmes. Implementing global child survival programmes is a key role of international organizations like UNICEF.

- 70.** The rise in non-communicable diseases like hypertension and diabetes in India is linked to what shift?

(A) A decrease in the consumption of whole grains and pulses
(B) An increase in the number of hospitals and doctors
(C) A reduction in the prevalence of infectious diseases
(D) A government policy promoting sedentary occupations

Ans :

(A) A decrease in the consumption of whole grains and pulses

The shift in dietary patterns, including a reduced intake of healthy foods like whole grains, pulses, fruits, and vegetables, combined with an increased intake of processed foods high in fat, salt, and sugar, is a major driver of the rising prevalence of non-communicable diseases.

- 71.** Tertiary level health care institutions, like AIIMS, are primarily responsible for what?

(A) Providing basic immunizations and health check-ups
(B) Being the first point of contact for the community
(C) Dealing with the most complex health problems
(D) Running health awareness campaigns in villages

Ans :

(C) Dealing with the most complex health problems

The tertiary level is the highest and most specialized tier of the health care system. Institutions at this level, such as medical college hospitals and AIIMS, are equipped to handle the most complex health problems that cannot be managed at the primary or secondary levels.

- 72.** A diet or food-based strategy that involves increasing the availability and consumption of micronutrient-rich foods is best described as what?

(A) Supplementation
(B) Fortification
(C) Dietary Diversification
(D) Food Security

Ans :

(C) Dietary Diversification

Dietary diversification is a preventive, food-based strategy that focuses on increasing the variety of foods in a person's diet. The goal is to enhance the intake of various nutrients, especially micronutrients, by promoting consumption of a wide range of foods like fruits, vegetables, and pulses.

- 73.** A child with pale conjunctiva of the eyes and tongue, who complains of constant fatigue, is likely suffering from a deficiency of what?

(A) Vitamin A
(B) Iodine
(C) Calcium
(D) Iron

Ans :

(D) Iron

The symptoms described—general pallor (paleness) of the conjunctiva, tongue, and nail beds, along with fatigue and lethargy—are classic manifestations of Iron-deficiency Anemia (IDA). These symptoms arise from the reduced oxygen-carrying capacity of the blood due to low hemoglobin levels.

- 74.** Consider the following statements about public health interventions:

1. Food fortification is a nutrient-based, medicinal approach.
2. The Mid-Day Meal Programme is a food supplementation programme.
3. Health care in India is provided at three levels: primary, secondary, and tertiary.

Which of the above statements is/are correct?

(A) 1 only
(B) 2 and 3 only
(C) 1 and 3 only
(D) 1, 2 and 3

Ans :

(B) 2 and 3 only

Statement 1 is incorrect; food fortification is a food-based strategy, not medicinal. Statement 2 is correct; the MDM programme supplements the daily diet of school children. Statement 3 is also correct, describing the structure of India's health care system.

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is true; the programme is designed to prevent blindness caused by VAD. Reason (R) correctly states the crucial functions of Vitamin A, particularly for normal vision. Therefore, the programme provides Vitamin A specifically because of these functions, making (R) the correct explanation for (A).

- 86.** Which of the following accurately describes a characteristic of diet or food-based strategies?

- (A) They provide a targeted, high-potency dose of a single nutrient
- (B) They are generally considered short-term, emergency measures
- (C) They primarily involve distributing medicinal tablets and syrups
- (D) They are sustainable and can be adapted to cultural traditions

Ans :

(D) They are sustainable and can be adapted to cultural traditions

A key advantage of food-based strategies like dietary diversification or fortification is their sustainability. They can be integrated into the daily diet, are cost-effective, and can be adapted to fit different cultural and dietary traditions, promoting long-term improvements in nutritional status.

- 87.** What is a primary challenge associated with nutrient supplementation programmes compared to food fortification?

- (A) Fortification requires changes in eating behavior
- (B) Supplementation can be more costly and have narrow coverage
- (C) Fortification is less sustainable in the long run
- (D) Supplementation does not require any research

Ans :

(B) Supplementation can be more costly and have narrow coverage

As highlighted in the comparison, nutrient supplementation is often more costly than fortification. It also tends to have a narrower scope of coverage because it requires identifying and reaching specific target groups, whereas fortification reaches everyone who consumes the fortified food.

- 88.** The gradual scaling-up of interventions to all districts in the country is a key component of which major nutrition initiative?

- (A) National Health Mission
- (B) Mid-Day Meal Scheme
- (C) POSHAN Abhiyaan
- (D) Public Distribution System

Ans :

(C) POSHAN Abhiyaan

A large component of POSHAN Abhiyaan involves the gradual scaling-up of its interventions to cover all districts in the country by the year 2022. This phased rollout, starting with 315 districts in the first year, is designed for systematic and effective implementation.

- 89.** A government initiative that focuses on improving health and family welfare, implementing land reforms, and improving the status of women is using what type of strategy?

- (A) An indirect, long-term policy approach
- (B) A direct, nutrient-based approach
- (C) A short-term food supplementation approach
- (D) A community-based fortification approach

Ans :

(A) An indirect, long-term policy approach

These are examples of indirect policy instruments or long-term strategies. They aim to achieve national nutrition goals by bringing about institutional and structural changes, such as improving women's status or implementing land reforms, which address the root causes of malnutrition over time.

- 90.** The National Nutritional Anemia Prophylaxis Programme is an example of which type of intervention?

- (A) A food security programme
- (B) A nutrient deficiency control programme
- (C) A self-employment scheme
- (D) A food-based diversification programme

Ans :

(B) A nutrient deficiency control programme

This programme is specifically listed under the category of Nutrient Deficiency Control Programmes. It aims to control anemia, a specific micronutrient deficiency, through direct interventions like the distribution of iron and folic acid supplements to vulnerable groups.

- 80.** Why is it important for a public health nutritionist to understand government policies and programmes?
- (A) To be able to criticize them in public forums effectively
 - (B) To participate in their planning, implementation, and evaluation
 - (C) To ensure they receive personal benefits from the schemes
 - (D) To focus only on the failures of the public health system

Ans :

(B) To participate in their planning, implementation, and evaluation

A public health nutritionist must be acquainted with government policies and programmes because their role often involves working within these systems. They contribute their expertise to the planning, implementation, monitoring, and evaluation of these large-scale interventions to ensure they are effective in solving nutrition problems.

- 81.** According to the framework for understanding undernutrition, what is considered an 'underlying cause' at the household level?
- (A) The political and economic system of the country
 - (B) An individual child's inadequate dietary intake
 - (C) Poor maternal and child care practices at home
 - (D) The presence of a specific disease like measles

Ans :

(C) Poor maternal and child care practices at home

The framework categorizes causes into three levels. Poor maternal and child care practices, along with factors like insufficient access to food and poor sanitation, are considered underlying causes at the household/family level that lead to the immediate causes (inadequate intake and disease).

- 82.** A child who appears wasted and has a very low weight for their height is most likely suffering from which condition?
- (A) Chronic malnutrition
 - (B) Acute malnutrition
 - (C) Hidden hunger
 - (D) Overnutrition

Ans :

(B) Acute malnutrition

Wasting, or low weight-for-height, is the primary indicator of acute (short-term) malnutrition. It suggests a recent and severe process of weight loss, often associated with starvation or severe disease. Chronic malnutrition, in contrast, is indicated by stunting (low height-for-age).

- 83.** Besides iron, vitamin A, and iodine, which other micronutrient deficiency is mentioned as being of major public health concern?
- (A) Zinc
 - (B) Selenium
 - (C) Magnesium
 - (D) Potassium

Ans :

(A) Zinc

The text explicitly lists the deficiencies of iron, vitamin A, iodine, and zinc as being of major public health concern due to their widespread prevalence and significant impact on health and development.

- 84.** How does iron-deficiency anemia (IDA) adversely affect cognitive functions in children?
- (A) It reduces bone density in the skull
 - (B) It impairs attention span and concentration
 - (C) It causes irreversible vision damage
 - (D) It leads to the swelling of brain tissue

Ans :

(B) It impairs attention span and concentration
In children, IDA has a significant negative impact on cognitive development and function. Specifically, it is known to adversely affect their attention span, memory, and ability to concentrate, which can have long-lasting consequences on their learning and academic performance.

- 85.** Assertion (A): The National Prophylaxis Programme for Prevention of Blindness focuses on providing Vitamin A supplements.
Reason (R): Vitamin A is necessary for the maintenance of healthy epithelium, normal vision, growth, and immunity.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 - (C) (A) is true but (R) is false.
 - (D) (A) is false but (R) is true.

Ans :

- 54.** Why is a multidisciplinary approach essential for solving public nutrition problems?
- Because nutritional problems are linked to a variety of factors
 - Because nutrition problems are caused by a single factor
 - Because only doctors can solve nutrition-related problems
 - Because it is the cheapest way to run a programme

Ans :

(A) Because nutritional problems are linked to a variety of factors
Nutritional problems are complex and not just linked to food. They are caused by a variety of interacting factors, including economic, agricultural, health, social, and political issues. Therefore, a multidisciplinary approach involving various sectors and experts is necessary to address these root causes effectively.

- 55.** Which of the following is NOT a component of the service package provided under ICDS?
- Supplementary feeding
 - Formal primary school education
 - Immunisation services
 - Health and nutrition education

Ans :

(B) Formal primary school education
The ICDS provides non-formal pre-school education for children aged three to six. Formal primary schooling (from Class 1 onwards) falls under the purview of the education system, not the ICDS, which is an early childhood care and development programme.

- 56.** Match the term in Column I with its correct definition in Column II.

	Column I		Column II
1.	Underweight	a.	Height is less than adequate for age
2.	Stunting	b.	Weight is less than adequate for age
3.	Wasting	c.	Severe undernutrition due to protein deficiency
4.	Kwashiorkor	d.	Weight is not adequate relative to height

- 1-b, 2-a, 3-d, 4-c
- 1-a, 2-b, 3-c, 4-d
- 1-b, 2-d, 3-a, 4-c

- 1-c, 2-a, 3-d, 4-b

Ans :

- 1-b, 2-a, 3-d, 4-c

Underweight is when body weight is less than adequate for age. Stunting is when height is less than adequate for age. Wasting is when weight is not adequate relative to height. Kwashiorkor is severe malnutrition caused by protein deficiency.

- 57.** Which of the following statements about Iron-deficiency Anemia (IDA) is incorrect?
- It is the most common nutritional disorder in the world.
 - It results in low levels of hemoglobin in the blood.
 - A key symptom is paleness of the conjunctiva of the eyes.
 - It primarily affects the body's ability to absorb calcium.

Ans :

(D) It primarily affects the body's ability to absorb calcium
Statements A, B, and C are all correct descriptions of IDA. IDA is related to iron levels and hemoglobin production, which affects oxygen transport. It does not primarily affect the body's ability to absorb calcium; that is more related to factors like Vitamin D.

- 58.** The irreversible mental retardation seen in cretinism is a consequence of deficiency of which micronutrient during fetal life?
- Iron
 - Zinc
 - Vitamin A
 - Iodine

Ans :

(D) Iodine
Iodine is essential for the synthesis of thyroid hormones, which are critical for the normal development of the fetal brain. A deficiency of iodine in the mother during pregnancy leads to insufficient hormone production, causing irreversible mental retardation and other congenital issues in the fetus, a condition known as cretinism.

- 59.** What is the long-term goal regarding the use of nutrient supplementation versus food-based approaches?
- To replace all food-based approaches with supplements

- 91.** All of the following are components of the service package delivered at an 'anganwadi' under ICDS EXCEPT:
- (A) Supplementary feeding for children below six
 - (B) Basic healthcare like immunisation
 - (C) Non-formal pre-school education for children
 - (D) Formal education for children aged 6-10

Ans :

(D) Formal education for children aged 6-10

The ICDS package includes non-formal pre-school education for children aged three to six years. It does not provide formal primary school education, which begins at age six and is handled by the formal education system. The other options are core services of the ICDS.

- 92.** What is the primary purpose of the Mid-Day Meal Programme?
- (A) To provide supplementary food to school children
 - (B) To provide vocational training to adolescents
 - (C) To ensure food security for rural families
 - (D) To deliver healthcare services to pregnant women

Ans :

(A) To provide supplementary food to school children

The Mid-Day Meal Programme is a food supplementation programme specifically targeted at school children. It aims to improve their nutritional status, encourage school enrollment and attendance, and enhance concentration by providing a cooked meal at school.

- 93.** Which statement accurately describes the health care services in India?
- (A) They are provided at two levels: primary and secondary
 - (B) They are solely managed by private sector hospitals
 - (C) They include services to promote, maintain, and restore health
 - (D) They focus exclusively on medical care for acute illnesses

Ans :

(C) They include services to promote, maintain, and restore health

Health care is defined broadly to include a multitude of services that not only treat illness (restore health) but also help to promote health, maintain it, and monitor it. It is a comprehensive

concept that goes beyond just medical care for sickness.

- 94.** At which level of the health care system would you find institutions like medical college hospitals and specialized hospitals?
- (A) The primary level
 - (B) The secondary level
 - (C) The community level
 - (D) The tertiary level

Ans :

(D) The tertiary level

The tertiary level is the third and highest level of health care. It consists of highly specialized institutions such as medical college hospitals, regional hospitals, specialized hospitals (e.g., cancer centers), and All-India Institutes of Medical Sciences (AIIMS) that handle the most complex cases.

- 95.** What is the primary role of a public nutritionist working in a government developmental programme like ICDS?
- (A) To perform complex surgeries on patients
 - (B) To manage the financial investments of the programme
 - (C) To participate in health promotion and preventive services
 - (D) To design marketing campaigns for food products

Ans :

(C) To participate in health promotion and preventive services

A public nutritionist working in a programme like ICDS would be eminently suited to participate in health promotion and prevention strategies. Their expertise in nutrition, assessment, and education would be crucial for delivering the programme's services effectively to children and mothers.

- 96.** Match the nutritional strategy in Column I with its correct example in Column II.

	Column I		Column II
1.	Nutrient Supplementation	a.	Promoting kitchen gardens
2.	Food Fortification	b.	Providing iron tablets to pregnant women
3.	Dietary Diversification	c.	Running a Public Distribution System

- (A) The diet-based approach
- (B) The medicinal approach
- (C) The food security approach
- (D) The poverty alleviation approach

Ans :

- (B) The medicinal approach

This strategy falls under the nutrient-based or medicinal approach. It involves the direct provision of nutrients as supplements (tablets, syrups) to prevent or treat deficiencies in high-risk groups, and it is considered a short-term, therapeutic or preventive measure.

- 141.** The term 'wasting' in children refers to:

- (A) Low weight for height
- (B) Low height for age
- (C) Low weight for age
- (D) Low intelligence for age

Ans :

- (A) Low weight for height

Wasting is the term used when a child's weight is not adequate relative to their height. It is an indicator of acute malnutrition and signifies recent and severe weight loss.

- 142.** The National Iodine Deficiency Disorder Control Programme is primarily focused on promoting the use of what?

- (A) Iron-fortified flour
- (B) Vitamin A supplements
- (C) Iodised salt
- (D) High-protein biscuits

Ans :

- (C) Iodised salt

The cornerstone of the National Iodine Deficiency Disorder Control Programme is the universal iodisation of salt. This food-based strategy (fortification) is the most effective and sustainable way to ensure the entire population receives an adequate amount of iodine.

- 143.** Why is it stated that if malnutrition is tackled, it can help India develop economically?

- (A) Because malnutrition only affects the wealthiest segment of society
- (B) Because malnourished individuals consume fewer resources
- (C) Because tackling malnutrition is a source of foreign investment
- (D) Because malnutrition leads to significant productivity losses

Ans :

- (D) Because malnutrition leads to significant productivity losses

Malnutrition has a severe economic impact. It leads to productivity losses that are estimated to be more than 10% of lifetime earnings for individuals and 2-3% of the nation's GDP. By tackling malnutrition, this loss can be prevented, thereby boosting economic growth and development.

- 144.** A community faces a high prevalence of goitre. A public health nutritionist would most likely recommend an intervention focusing on which micronutrient?

- (A) Iodine
- (B) Iron
- (C) Vitamin C
- (D) Zinc

Ans :

- (A) Iodine

Goitre, the enlargement of the thyroid gland, is the most common manifestation of iodine deficiency. Therefore, any intervention to address a high prevalence of goitre in a community would need to focus on improving the intake of iodine.

- 145.** Which statement best describes the purpose of POSHAN Abhiyaan?

- (A) To provide financial loans for starting small businesses
- (B) To build sanitation facilities in every rural household
- (C) To monitor and review the implementation of nutrition schemes
- (D) To provide free higher education for girls in urban areas

Ans :

- (C) To monitor and review the implementation of nutrition schemes

A key role of POSHAN Abhiyaan is to serve as an overarching scheme that monitors and reviews the implementation of all nutrition-related schemes to create synergy and ensure that the targets for reducing malnutrition are met in a coordinated and effective manner.

- 146.** Match the health care level in Column I with the corresponding institution in Column II.

	Column I		Column II
1.	Primary Level	a.	District Hospital

(D) 1, 3 and 4 only

Ans :

(A) 2 only

Statement 1 is incorrect; LBW is <2.5 kg. Statement 2 is correct. Statement 3 is incorrect; primary care is the first contact level. Statement 4 is incorrect; hidden hunger refers to micronutrient deficiencies.

102. Assertion (A): The Public Distribution System (PDS) is classified as an indirect, long-term strategy for improving nutrition.

Reason (R): The PDS addresses the basic cause of malnutrition by improving food security and access to food for vulnerable populations.

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).

(C) (A) is true but (R) is false.

(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is true; PDS is a long-term policy instrument. Reason (R) correctly explains that by ensuring food security, the PDS targets a basic cause of malnutrition (insufficient access to food), making it an indirect, structural intervention. Thus, (R) is the correct explanation for (A).

103. A professional who works as a consultant to a food company to develop a fortified food product for the market is working in which field?

(A) Clinical Dietetics

(B) Public Health Nutrition

(C) Food Service Management

(D) Hospital Administration

Ans :

(B) Public Health Nutrition

This role combines knowledge of nutrition and food-based strategies (fortification) to impact population health through commercial products. Such consultancy roles, especially with corporate entities aiming to improve the nutritional profile of their products for public benefit, fall within the broad scope of public health nutrition.

104. Which two factors are identified as the immediate causes of malnutrition at the individual level?

(A) Poverty and low level of education

(B) Poor sanitation and insufficient access to food

(C) Political instability and poor healthcare services

(D) Inadequate dietary intake and disease/infections

Ans :

(D) Inadequate dietary intake and disease/infections

The conceptual framework clearly identifies two immediate causes that directly impact an individual's nutritional status: inadequate or faulty dietary intake, and the presence of disease or infections. These are the most direct determinants of malnutrition.

105. The art and science of promoting health and preventing disease through the organized efforts of society is the definition of what?

(A) Clinical medicine

(B) Food technology

(C) Public health nutrition

(D) Personal wellness

Ans :

(C) Public health nutrition

This is a comprehensive definition of public health nutrition, emphasizing its focus on organized, societal-level action to promote health and prevent disease for the entire population, rather than focusing on individual efforts or treatments alone.

106. Which of the following pairs of a nutritional problem and its major consequence is correctly matched?

(A) Protein Deficiency : Kwashiorkor

(B) Vitamin A Deficiency : Goitre

(C) Iron Deficiency : Childhood blindness

(D) Iodine Deficiency : Scurvy

Ans :

(A) Protein Deficiency : Kwashiorkor

Kwashiorkor is the specific form of severe malnutrition caused by a primary deficiency in protein. Goitre is from iodine deficiency, childhood blindness from Vitamin A deficiency, and scurvy from Vitamin C deficiency.

107. Why is there a need for a trained cadre of public health professionals in India?

(A) To manage the import and export of food products

(B) To address and solve complex, large-scale nutritional problems

(C) To provide individual diet plans for celebrity

129. The key areas of expertise for a public nutritionist include all of the following EXCEPT:

- (A) Nutritional needs throughout the life cycle
- (B) Mass media and communication
- (C) Advanced pharmacology
- (D) Programme management

Ans :

(C) Advanced pharmacology

A public nutritionist needs expertise in nutritional science, assessment, food science, communication, and programme management. Advanced pharmacology, which is the study of drugs and their actions, is the domain of physicians and pharmacists, not public nutritionists.

130. An Anganwadi worker is observed weighing a child and plotting the weight on a growth chart. This activity is a part of which component of ICDS?

- (A) Non-formal pre-school education
- (B) Supplementary feeding
- (C) Health education for mothers
- (D) Growth monitoring

Ans :

(D) Growth monitoring

This activity is a core part of the ICDS service package. Regular weighing of children and plotting their weight on growth charts is known as growth monitoring. It helps in the early detection of undernutrition and allows for timely intervention.

131. Consider the following public health problems:

1. Low birth weight
2. Growth retardation among pre-schoolers
3. Micronutrient deficiencies

Which of these are identified as alarming nutrition-related problems in India?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1, 2, and 3

Ans :

(D) 1, 2, and 3

The text explicitly lists all three as major nutrition-related problems creating an alarming situation in the country: a high proportion of low birth weight babies, widespread growth retardation among pre-schoolers, and a large number of people suffering from micronutrient deficiencies.

132. Which of the following statements about the causes of malnutrition is correct?

- (A) Underlying causes like poor sanitation directly lead to death
- (B) Basic causes include an individual's faulty dietary intake
- (C) Immediate causes like disease can be influenced by underlying causes
- (D) Basic causes at the societal level are independent of political factors

Ans :

(C) Immediate causes like disease can be influenced by underlying causes

The framework shows a causal pathway. Underlying causes at the household level, such as poor sanitation or inadequate health services, increase the risk of the immediate causes, such as disease and infection, which in turn lead to malnutrition.

133. What is the primary objective of a 'food-based strategy' like dietary diversification?

- (A) To provide a single, high-dose nutrient to cure a deficiency
- (B) To improve overall diet quality by increasing food variety
- (C) To distribute free food grains to the entire population
- (D) To create new, genetically modified food products

Ans :

(B) To improve overall diet quality by increasing food variety

The central idea of dietary diversification is to improve the intake of a wide range of nutrients by encouraging the consumption of a greater variety of foods. This is a preventive and sustainable approach to enhance overall diet quality and prevent multiple deficiencies simultaneously.

134. The Community Health Centres (CHCs) function as the first referral level for which tier of the health system?

- (A) The primary health care system
- (B) The tertiary health care system
- (C) The national health insurance system
- (D) The private hospital network

Ans :

(A) The primary health care system

Community Health Centres are part of the secondary level of care and function as the first referral level. This means they are the first place that patients from the primary health care system

social systems are a basic cause. Malnutrition, disability, and death are the ultimate outcomes.

- 113.** What is the primary advantage of food fortification as a public health strategy?
- (A) It provides a very high therapeutic dose for sick individuals
 - (B) It can deliver nutrients to a large population without requiring major behavioral change
 - (C) It is the cheapest of all nutritional interventions
 - (D) It is only effective for treating Protein-Energy Malnutrition

Ans :

(B) It can deliver nutrients to a large population without requiring major behavioral change
Fortification's main strength is its wide reach. By adding micronutrients to staple foods that are regularly consumed by a large part of the population (like salt or flour), it can improve the nutritional intake of many people at once without them having to consciously change their eating habits.

- 114.** Which of the following is an INCORRECT statement regarding Iodine Deficiency Disorders (IDD)?
- (A) Goitre is a common manifestation in adults.
 - (B) IDD is largely due to iodine-deficient soil.
 - (C) The effects of iodine deficiency during pregnancy are reversible.
 - (D) Iodine is required for normal mental and physical growth.

Ans :

(C) The effects of iodine deficiency during pregnancy are reversible.
This statement is incorrect. The adverse effects of iodine deficiency during pregnancy, especially the resulting mental retardation in the fetus (cretinism), are unfortunately irreversible. This highlights the critical importance of ensuring adequate iodine intake before and during pregnancy.

- 115.** Which of the following is listed as a self-employment and wage employment scheme in the context of nutrition programmes?
- (A) Antodaya Anna Yojana
 - (B) Social Safety Net Programmes
 - (C) Mid-Day Meal Programme
 - (D) National Prophylaxis Programme

Ans :

(B) Social Safety Net Programmes

Self-employment and wage employment schemes are categorized as social safety net programmes. They act as an indirect strategy to combat malnutrition by improving household income and purchasing power, thus enhancing food security.

- 116.** A practical activity involves planning low-cost, nutritious recipes for preschoolers in an Anganwadi. What is the primary purpose of such an activity?
- (A) To develop supplementary foods within a given budget
 - (B) To teach children advanced culinary skills
 - (C) To create high-energy snacks for athletes
 - (D) To test for the presence of adulterants in food

Ans :

(A) To develop supplementary foods within a given budget
The purpose of this practical is to provide insight into the practical challenges of public health nutrition, specifically planning and preparing supplementary foods for vulnerable groups like preschoolers, while adhering to realistic cost constraints and using locally available ingredients.

- 117.** When planning supplementary foods for a nutrition programme, why is using locally available food sources important?
- (A) Because they are always more nutritious than other foods
 - (B) Because imported foods are banned in nutrition programmes
 - (C) To make the recipes more complex and challenging
 - (D) To ensure the programme is sustainable and cost-effective

Ans :

(D) To ensure the programme is sustainable and cost-effective
Using locally available foods is a key principle in public nutrition programme planning. It helps keep the costs down and ensures that the ingredients are readily accessible, making the supplementary feeding programme more sustainable and replicable in the long term.

- 118.** What does the term "tertiary" signify in the context of India's health care system?
- (A) The third point of contact for a patient
 - (B) The third most common type of hospital
 - (C) The third and the highest level of care
 - (D) The care provided in the third month of illness

Ans :

(C) The third and the highest level of care
Tertiary is the third and the highest level of health care in the three-tiered system. It represents the pinnacle of specialized medical care, dealing with complex health problems that have been referred up from the primary and secondary levels.

119. Which statement accurately reflects the role of a public health nutritionist?

- (A) Their work is confined to a laboratory setting
- (B) They are mainly involved in policy making and programme management
- (C) They exclusively treat patients with chronic diseases
- (D) They are primarily responsible for food production in factories

Ans :

(B) They are mainly involved in policy making and programme management

The role of a public health nutritionist is broad and often involves working at a systems level. This includes participating in policy making, programme planning and management, education, and health promotion to improve the nutritional status of the population.

120. Examine the following statements related to public nutrition:

1. 'Underweight' is a condition where weight is inadequate relative to height.
2. The National Service Scheme (NSS) is a food supplementation programme for youth.
3. Kwashiorkor is severe malnutrition primarily caused by a lack of dietary protein.
4. The mission of public health nutrition is to prevent both undernutrition and overnutrition.

Which of the above statements are correct?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 3 and 4 only
- (D) 2, 3 and 4 only

Ans :

(B) 3 and 4 only

Statement 1 is incorrect; that defines 'wasting'. 'Underweight' is low weight-for-age. Statement 2 is incorrect; NSS is a social service scheme, not a feeding programme. Statement 3 is correct. Statement 4 is also correct.

121. Which group is NOT identified as a vulnerable group for which a public health nutritionist would typically design programmes?

- (A) Pregnant and lactating mothers
- (B) Children in the 0-6 years age group
- (C) Preschool children
- (D) Professional athletes

Ans :

(D) Professional athletes

Public health nutrition focuses on vulnerable groups within the general population, such as pregnant women, infants, and young children, who are at high risk for malnutrition. While athletes have specific nutritional needs, they are typically served by sports nutritionists, not public health programmes.

122. Why might a public health nutritionist be involved with an organization that undertakes large-scale feeding for the elderly?

- (A) To ensure the meals are gastronomically complex
- (B) To manage the financial audits of the organization
- (C) To ensure the food provided meets the group's nutritional needs
- (D) To personally cook all the meals for the programme

Ans :

(C) To ensure the food provided meets the group's nutritional needs

The expertise of a public health nutritionist is crucial in large-scale feeding programmes to ensure that the meals are not only safe and palatable but also nutritionally adequate and appropriate for the specific needs of the target group, in this case, the elderly.

123. Assertion (A): Community participation is crucial for the success of public health nutrition programmes.

Reason (R): When people are involved in the planning and implementation of a programme, it leads to better acceptance and sustainability.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is a key principle in public health. Reason (R) correctly explains that involving the community fosters a sense of ownership, ensures the programme is culturally appropriate, and promotes long-term sustainability, thus providing the correct rationale for (A).

- 124.** An intervention that aims to control iron, vitamin A, and iodine deficiencies among children and pregnant women by distributing tablets is best described as what?

- (A) Control of micronutrient deficiencies
- (B) Production of low-cost nutritious foods
- (C) A food security programme
- (D) A community participation initiative

Ans :

(A) Control of micronutrient deficiencies
This describes a direct, short-term intervention focused specifically on controlling micronutrient deficiencies among vulnerable groups. This is typically done through supplementation programmes that distribute nutrients like iron, vitamin A, folic acid, and iodine.

- 125.** Which of the following pairs is INCORRECTLY matched?

- (A) Primary Health Centre : First level of contact
- (B) POSHAN Abhiyaan : Holistic nutrition scheme
- (C) Marasmus : Severe protein deficiency
- (D) Hidden Hunger : Micronutrient deficiency

Ans :

(C) Marasmus : Severe protein deficiency
Marasmus is a form of severe undernutrition caused primarily by a deficiency of total food and energy. Kwashiorkor is the condition primarily caused by severe protein deficiency. All other pairs are correctly matched.

- 126.** Match the public health issue in Column I with its most relevant description in Column II.

	Column I		Column II
1.	Double burden of malnutrition	a.	Low height-for-age due to chronic undernutrition
2.	Stunting	b.	Most common cause of preventable childhood blindness

3.	Vitamin A Deficiency	c.	Coexistence of undernutrition and overnutrition
4.	Goitre	d.	Enlarged thyroid gland due to iodine deficiency

- (A) 1-c, 2-a, 3-b, 4-d
- (B) 1-d, 2-c, 3-a, 4-b
- (C) 1-c, 2-b, 3-d, 4-a
- (D) 1-a, 2-d, 3-b, 4-c

Ans :

- (A) 1-c, 2-a, 3-b, 4-d

The double burden is the coexistence of under- and overnutrition. Stunting is low height-for-age. VAD is a leading cause of childhood blindness. Goitre is an enlarged thyroid from iodine deficiency.

- 127.** A key difference between a dietitian and a public health nutritionist is that the latter must have strong skills in what?

- (A) Individual patient counseling
- (B) Advanced biochemical analysis
- (C) Therapeutic diet formulation
- (D) Programme management and communication

Ans :

(D) Programme management and communication
While a dietitian focuses on individual care, a public health nutritionist works with populations. This requires a different skill set, including expertise in programme management, mass media and communication, and understanding educational methods to influence large groups effectively.

- 128.** The Antodaya Anna Yojana (AAY) is a specific scheme that falls under which broader category of programmes?

- (A) Food Supplementation Programmes
- (B) Nutrient Deficiency Control Programmes
- (C) Food Security Programmes
- (D) Self-Employment Schemes

Ans :

- (C) Food Security Programmes

The Antodaya Anna Yojana is listed as a Food Security Programme. It is a more targeted version of the Public Distribution System, aimed at providing highly subsidized food grains to the poorest of the poor families to ensure their food security.

4.	Food Security	d.	Adding Vitamin A to edible oil
----	---------------	----	--------------------------------

- (A) 1-b, 2-d, 3-a, 4-c
 (B) 1-d, 2-b, 3-c, 4-a
 (C) 1-b, 2-a, 3-d, 4-c
 (D) 1-a, 2-c, 3-b, 4-d

Ans :

- (A) 1-b, 2-d, 3-a, 4-c

Supplementation is giving nutrients directly, like iron tablets. Fortification is adding nutrients to common foods, like Vitamin A in oil. Diversification involves increasing food variety, like through kitchen gardens. Food security ensures access to food, like through PDS.

- 97.** What is the main reason that public health nutrition is described as being built on the foundations of both biological and social sciences?
 (A) Because it only deals with the biology of digestion
 (B) Because it requires knowledge of chemistry and physics only
 (C) Because nutrition is influenced by both biological needs and social factors
 (D) Because social scientists are the only professionals in the field

Ans :

- (C) Because nutrition is influenced by both biological needs and social factors

The field is multidisciplinary because nutritional status is determined not just by biological factors (needs, diseases) but also by a wide range of social sciences (behavioral, social, economic, and managerial factors). A public nutritionist must understand both aspects to be effective.

- 98.** A child with a height of 90 cm at age 5, when the standard height is 110 cm, is an example of what?
 (A) Wasting
 (B) Stunting
 (C) Underweight
 (D) Kwashiorkor

Ans :

- (B) Stunting

Stunting is defined as having a height that is less than adequate for one's age. This example clearly depicts a child whose linear growth has been significantly hampered, which is the hallmark of chronic malnutrition or stunting.

- 99.** A nutritionist working for an NGO is tasked with creating educational materials about healthy eating for a rural community. This activity is part of which broad strategy?
 (A) Food-based strategy
 (B) Nutrient-based/medicinal approach
 (C) Tertiary health care
 (D) Poverty alleviation scheme

Ans :

- (A) Food-based strategy

Providing nutrition and health education is a key component of food-based strategies. This approach aims to empower individuals and communities with knowledge to make better food choices, which is a sustainable, preventive measure against malnutrition.

- 100.** Which of the following statements about the scope of public health nutrition is INCORRECT?
 (A) Professionals can work with international organizations like UNICEF.
 (B) Public nutritionists can be involved in corporate CSR programmes.
 (C) There are avenues in teaching, research, and entrepreneurship.
 (D) Career opportunities are limited only to government hospital jobs.

Ans :

- (D) Career opportunities are limited only to government hospital jobs.

The scope is very wide and not limited to government hospitals. Public nutritionists can work in various settings, including national and international NGOs, government bodies, corporate CSR, large-scale feeding programs, schools, and in academic and research institutions.

- 101.** Consider the following statements about public health in India:
 1. Low birth weight is defined as a birth weight of less than 3.0 kg.
 2. The National Iodine Deficiency Disorder Control Programme is a key government initiative.
 3. Tertiary health care is the first level of contact for an individual with the health system.
 4. "Hidden hunger" refers to severe Protein-Energy Malnutrition.

Which of the above statements is/are correct?

- (A) 2 only
 (B) 1 and 3 only
 (C) 2 and 4 only

(like PHCs) are sent to when they require more complex care.

- 135.** A professional hired by a corporate firm to manage their CSR programmes related to food and nutrition security for vulnerable groups is most likely a:
- (A) Clinical Dietitian
 - (B) Food Inspector
 - (C) Public Health Nutritionist
 - (D) Hospital Catering Manager

Ans :

(C) Public Health Nutritionist

This role fits perfectly within the career scope of a public health nutritionist. They can be involved with corporate Corporate Social Responsibility (CSR) programmes that deal with improving food and nutrition security for communities, applying their expertise in programme management and community nutrition.

- 136.** Review the following statements:

1. Low birth weight may lead to child mortality.
2. Tertiary health care is delivered through a network of Primary Health Centres (PHCs).
3. Iron-deficiency anemia can adversely affect cognitive functions in children.
4. Food fortification is an example of a nutrient-based, medicinal approach.

Which combination of statements is correct?

- (A) 1 and 3 only
- (B) 2 and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

(A) 1 and 3 only

Statement 1 is correct. Statement 2 is incorrect; PHCs provide primary care. Statement 3 is correct. Statement 4 is incorrect; fortification is a food-based strategy.

- 137.** Assertion (A): The prevalence of overnutrition and related diseases is gradually increasing in India.

Reason (R): Dietary patterns have shifted towards processed foods high in fat and sugar, and lifestyles have become more sedentary.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.

(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is a stated fact about the Indian health scenario. Reason (R) correctly identifies the key drivers for this trend: the shift to unhealthy diets and reduced physical activity. Thus, (R) provides the direct cause for (A).

- 138.** During a visit to an Anganwadi, a student observes a health worker giving nutrition and hygiene education to a group of mothers. This activity fulfills which objective of the ICDS?

- (A) Providing supplementary feeding to children
- (B) Offering health, nutrition, and hygiene education
- (C) Conducting growth monitoring of infants
- (D) Administering immunizations to children

Ans :

(B) Offering health, nutrition, and hygiene education

Providing health, nutrition, and hygiene education, particularly to mothers, is one of the six core services offered under the Integrated Child Development Services (ICDS) scheme. This empowers mothers to better care for their children's health and nutritional needs.

- 139.** Which of the following is an INCORRECT statement about the role of a public health nutritionist?

- (A) They are suited to participate in strategies of health promotion.
- (B) They need skills in mass media and communication.
- (C) They can work in developmental programmes of NGOs.
- (D) Their primary focus is on individual patient diet prescriptions.

Ans :

(D) Their primary focus is on individual patient diet prescriptions.

The primary focus of a public health nutritionist is on populations and communities, not individual patient prescriptions. Formulating therapeutic diets for individual patients is the specific role of a clinical dietitian or medical nutrition therapist.

- 140.** The strategy of providing free iron, vitamin A, and folic acid tablets to vulnerable groups is based on which approach?

clients

- (D) To conduct advanced research in molecular biology

Ans :

- (B) To address and solve complex, large-scale nutritional problems

India faces significant and complex public health challenges, including the double burden of malnutrition and the prevalence of communicable diseases. A trained cadre of public health professionals, including nutritionists, is essential to address, manage, and solve these widespread problems effectively.

- 108.** A health worker visiting a village to distribute iron and folic acid tablets to pregnant women is part of which type of programme?

- (A) A nutrient deficiency control programme
(B) A food security programme
(C) A horticulture intervention
(D) A poverty alleviation scheme

Ans :

(A) A nutrient deficiency control programme
This activity is a classic example of a nutrient deficiency control programme, specifically the National Nutritional Anemia Prophylaxis Programme. It uses a direct, medicinal approach (supplementation) to prevent and control anemia in a high-risk, vulnerable group.

- 109.** The POSHAN Abhiyaan aims to tackle all of the following issues EXCEPT:

- (A) Low birth rate
(B) Stunting in children
(C) Anemia in women
(D) Dental caries in adults

Ans :

- (D) Dental caries in adults

The specific targets of the POSHAN Abhiyaan are stunting, under-nutrition, anemia (among young children, women, and adolescent girls), and reducing the incidence of low birth weight babies. Dental caries is not a stated target of this national nutrition mission.

- 110.** The first level of contact for a community with the national health system is provided through which of the following?

- (A) District Hospitals
(B) Medical Colleges
(C) Super-speciality Hospitals
(D) Primary Health Centres

Ans :

- (D) Primary Health Centres

The primary level of health care is explicitly defined as the first level of contact for individuals, families, and the community with the health system. In India, this is provided through a network of Primary Health Centres (PHCs) and their sub-centres.

- 111.** Consider the following statements about career opportunities in public nutrition:

1. Public nutritionists can work as school health counsellors.
2. The field offers opportunities in international organisations like WHO and UNICEF.
3. Careers are strictly limited to roles within the government sector.

Which of the above statements is/are correct?

- (A) 1 only
(B) 1 and 2 only
(C) 2 and 3 only
(D) 1, 2 and 3

Ans :

- (B) 1 and 2 only

Statement 1 is correct. Statement 2 is correct. Statement 3 is incorrect; career avenues exist in government, voluntary organisations (NGOs), international organisations, corporate sectors, academia, and research, indicating a wide and varied scope.

- 112.** Match the cause of malnutrition in Column I with its classification level in Column II.

	Column I		Column II
1.	Disease infections	or	a. Underlying Cause (Household Level)
2.	Poor water/sanitation	b.	Immediate Cause (Individual Level)
3.	Political and social systems	c.	Outcome
4.	Malnutrition, disability, death	d.	Basic Cause (Societal Level)

- (A) 1-b, 2-a, 3-d, 4-c
(B) 1-a, 2-b, 3-c, 4-d
(C) 1-b, 2-d, 3-a, 4-c
(D) 1-d, 2-a, 3-b, 4-c

Ans :

- (A) 1-b, 2-a, 3-d, 4-c

Disease/infections are an immediate cause. Poor water/sanitation is an underlying cause. Political/

2.	Secondary Level	b.	All India Institute of Medical Sciences
3.	Tertiary Level	c.	Anganwadi Centre
4.	Community Outreach	d.	Primary Health Centre

- (A) 1-d, 2-a, 3-b, 4-c
 (B) 1-a, 2-d, 3-c, 4-b
 (C) 1-d, 2-b, 3-a, 4-c
 (D) 1-c, 2-a, 3-d, 4-b

Ans :

- (A) 1-d, 2-a, 3-b, 4-c

The primary level is served by PHCs. The secondary level includes district hospitals. The tertiary level includes specialized institutes like AIIMS. The Anganwadi centre is a key point for community outreach under ICDS.

- 147.** Consider the following statements regarding micronutrient deficiencies:

1. Iron-deficiency anemia is most common in elderly men.
2. Vitamin A deficiency can lead to night blindness.
3. Iodine deficiency during pregnancy can cause cretinism in the fetus.

Which of the above statements is/are correct?

- (A) 3 only
 (B) 1 and 2 only
 (C) 2 and 3 only
 (D) 1, 2 and 3

Ans :

- (C) 2 and 3 only

Statement 1 is incorrect; IDA is most common in pregnant women and adolescent girls. Statement 2 is correct, as night blindness is an early sign of VAD. Statement 3 is also correct; iodine deficiency during pregnancy can lead to cretinism.

- 148.** A professional involved in teaching and academics in the field of public nutrition would likely work where?

- (A) In a hospital's emergency room
 (B) In a university or college
 (C) In a food processing factory
 (D) At a local government tax office

Ans :

- (B) In a university or college

Teaching and academic careers are based in educational institutions. A public health nutritionist with an interest in teaching and

research would find employment opportunities as a faculty member in universities and colleges that offer courses in nutrition and public health.

- 149.** The concept of “public health” refers to what kind of action?

- (A) Individual action to improve personal fitness
 (B) Corporate action to maximize company profits
 (C) Medical action taken only during epidemics
 (D) Collective action taken by society to protect health

Ans :

- (D) Collective action taken by society to protect health

The term “public health” specifically refers to the collective, organized action taken by a society as a whole to protect and promote the health of its entire population, not just the efforts of individuals or specific groups.

- 150.** What is the primary focus of the food supplementation programme, the Mid-Day Meal?

- (A) Pregnant women
 (B) School children
 (C) Elderly adults
 (D) Infants below 1 year

Ans :

- (B) School children

The Mid-Day Meal Programme is a food supplementation initiative specifically targeted at children attending school. It provides them with a free cooked meal to improve their nutritional status and educational outcomes.

- 151.** Which of the following is an INCORRECT statement about Protein-Energy Malnutrition (PEM)?

- (A) It can occur in adults, especially the elderly.
 (B) Marasmus and kwashiorkor are severe forms of PEM.
 (C) It is primarily caused by a deficiency of Vitamin C.
 (D) It is assessed using anthropometric measurements.

Ans :

- (C) It is primarily caused by a deficiency of Vitamin C.

PEM is caused by an insufficient intake of macronutrients—energy and protein. A deficiency of Vitamin C causes scurvy, which is a separate

micronutrient deficiency disorder. All other statements about PEM are correct.

- 152.** A public health team is designing a programme for a remote tribal area. The team decides to promote the cultivation and consumption of local green leafy vegetables. This is an example of what?
- (A) Dietary diversification
(B) Nutrient supplementation
(C) Food fortification
(D) A social safety net programme

Ans :

(A) Dietary diversification
This intervention is a perfect example of dietary diversification through a horticulture intervention. By promoting local, micronutrient-rich foods, the programme aims to increase the variety in the community's diet in a culturally appropriate and sustainable way.

- 153.** What is the ultimate goal of the "continuum of care" provided by the three-level health system?
- (A) To ensure all citizens use only private hospitals
(B) To provide a structured referral pathway for patients
(C) To limit the number of patients reaching tertiary care
(D) To make primary health care centers financially profitable

Ans :

(B) To provide a structured referral pathway for patients
The three-level system is designed to provide a seamless continuum of care. It creates a structured referral pathway where patients can move from primary to secondary and then to tertiary care based on the complexity of their health needs, ensuring they receive the appropriate level of attention.

- 154.** Consider the following statements:
1. Low birth weight babies weigh less than 2.5 kg at birth.
 2. Wasting refers to low weight-for-age.
 3. Food-based strategies carry a high risk of nutrient toxicity.
 4. Goitre is a manifestation of iodine deficiency.
- Which of the above statements is/are correct?
- (A) 1 and 4 only
(B) 2 and 3 only

- (C) 1, 2, and 4 only
(D) 1, 3, and 4 only

Ans :

(A) 1 and 4 only
Statement 1 is correct. Statement 2 is incorrect; wasting is low weight-for-height. Statement 3 is incorrect; food-based strategies do not carry a risk of overdose or toxicity. Statement 4 is correct.

- 155.** Assertion (A): The services provided by ICDS are delivered in an integrated manner at the anganwadi.
Reason (R): An integrated approach ensures that the multiple, interrelated needs of a young child for health, nutrition, and early learning are met holistically.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).
Assertion (A) is a factual statement about how ICDS works. Reason (R) provides the core philosophy behind this integrated approach: child development is holistic, and therefore services must be delivered together to have an optimal impact, making (R) the correct rationale for (A).

- 156.** Match the programme/scheme in Column I with its primary target group in Column II.

	Column I		Column II
1.	ICDS	a.	The poorest of the poor families
2.	Mid-Day Meal Scheme	b.	Children under six and pregnant/nursing mothers
3.	Antodaya Anna Yojana	c.	School-going children
4.	National Prophylaxis Programme for Anemia	d.	Adolescent girls and pregnant women

- (A) 1-b, 2-c, 3-a, 4-d
(B) 1-c, 2-b, 3-d, 4-a
(C) 1-b, 2-a, 3-c, 4-d
(D) 1-d, 2-c, 3-a, 4-b

Ans :

(A) 1-b, 2-c, 3-a, 4-d

ICDS targets young children and mothers. The Mid-Day Meal is for school children. Antodaya Anna Yojana targets the poorest families. Anemia control programmes target groups with high iron needs like adolescent girls and pregnant women.

157. A practical exercise involving preparing a power point presentation after visiting an Anganwadi centre aims to help students do what?
- (A) Learn advanced software development skills
 - (B) Observe and understand the functioning of a public nutrition programme
 - (C) Evaluate the financial profitability of the centre
 - (D) Develop new recipes for the supplementary feeding

Ans :

(B) Observe and understand the functioning of a public nutrition programme
The purpose of such a visit and presentation is to give students first-hand exposure to a real-world public nutrition programme. It allows them to observe the activities, interact with personnel, and gain a practical understanding of how services like ICDS function on the ground.

158. Which of the following is a correct statement about the challenges faced by public health in India?
- (A) Communicable diseases like smallpox have been completely replaced by non-communicable diseases.
 - (B) Malnutrition is a minor issue, affecting less than 5% of children.
 - (C) The health care system has successfully eliminated the need for tertiary care.
 - (D) The country is facing a “double burden” of both undernutrition and overnutrition.

Ans :

(D) The country is facing a “double burden” of both undernutrition and overnutrition.
India’s key public health challenge is the “double burden of malnutrition,” where problems of undernutrition persist alongside a rising prevalence of overnutrition and related non-communicable diseases. This creates a complex health landscape.

159. A nutritionist evaluating a child’s height and finding it to be significantly below the standard for their age is identifying which indicator of malnutrition?

- (A) Stunting
- (B) Wasting
- (C) Underweight
- (D) Obesity

Ans :

(A) Stunting

Stunting is the specific indicator used when a child’s height is less than adequate for their age. It reflects chronic or long-term malnutrition that has impeded their linear growth potential.

160. A professional who advises government policy-making committees, works with NGOs on developmental programmes, and undertakes research on community nutrition issues has a career in:
- (A) Clinical Research
 - (B) Public Health Nutrition
 - (C) Food Service Management
 - (D) Corporate Finance

Ans :

(B) Public Health Nutrition

These diverse roles—policy advice, programme work with NGOs, and community-based research—are all classic examples of the varied career avenues available within the field of public health nutrition. This demonstrates the broad and impactful scope of the profession.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

In a remote village, a 4-year-old boy named Raju is brought to a Primary Health Centre (PHC). He exhibits severe growth retardation, his weight is extremely low for his height (wasting), and he appears listless and frail. The doctor diagnoses him with a severe form of Protein-Energy Malnutrition (PEM). A public health nutritionist investigating the case finds that Raju’s family is extremely poor and has insufficient access to food. Their diet consists mainly of rice with very little pulses, vegetables, or milk. The immediate cause of his condition is an inadequate intake of energy and protein. However, the nutritionist also identifies underlying causes at the household level: poor maternal and child care practices due

In India, primary level healthcare is the first level of contact for individuals and families with the health system. These services are provided through a network of Primary Health Centres (PHCs) and sub-centres in the community.

190. What is a primary reason that the costs of malnutrition are considered very high for a nation?

- (A) Malnourished individuals tend to earn more money.
- (B) It leads to significant productivity losses and impacts the Gross Domestic Product (GDP).
- (C) It has no effect on the country's economic development.
- (D) The cost of nutritious food is the only economic factor.

Ans :

(B) It leads to significant productivity losses and impacts the Gross Domestic Product (GDP). The costs of malnutrition are extremely high, not just for individuals but for the nation. Experts estimate that it leads to productivity losses of more than 10% of lifetime earnings for individuals and 2-3% of the nation's GDP.

Direction : Read the following case study and answer the following questions.

A new national nutrition mission, POSHAN Abhiyaan, is launched with the ambitious goal of making India malnutrition-free. The mission recognizes that nutritional problems cannot be solved by a single ministry or department alone. Therefore, its core strategy is to create a robust multi-ministerial convergence mechanism. It brings together the Ministry of Women and Child Development, the Ministry of Health and Family Welfare, and other related departments to work in synergy. The program sets specific targets to reduce stunting, under-nutrition, and anemia among young children, women, and adolescent girls, as well as to lower the incidence of low birth weight babies. A key component of the mission is the use of technology for real-time monitoring of the implementation of various schemes like ICDS. It also focuses on behavior change communication to promote healthy eating practices at the community level. This overarching scheme aims to create a unified effort to tackle malnutrition comprehensively and effectively across the country.

191. What is the full name of the POSHAN Abhiyaan mission?

- (A) Prime Minister's Overarching Scheme for Health and Nutrition.
- (B) Public Organisation for Strategic Health and Nutrition.
- (C) PM's Overarching Scheme for Holistic Nutrition.
- (D) People's Scheme for Holistic Nutrition.

Ans :

(C) PM's Overarching Scheme for Holistic Nutrition.

POSHAN Abhiyaan stands for the PM's Overarching Scheme for Holistic Nutrition. It was launched in March 2018 with the goal of improving nutritional outcomes for children, pregnant women, and lactating mothers in a time-bound manner.

192. A central strategy of POSHAN Abhiyaan is to:

- (A) Create synergy through a robust multi-ministerial convergence mechanism.
- (B) Have each ministry work in isolation on nutrition-related issues.
- (C) Focus only on providing food without any health or education components.
- (D) Replace all existing nutrition programs with a single new one.

Ans :

(A) Create synergy through a robust multi-ministerial convergence mechanism.

POSHAN Abhiyaan strives to create synergy by bringing together various ministries and departments. This convergence mechanism ensures a coordinated and comprehensive approach to tackling the multi-faceted problem of malnutrition in the country.

193. Which of the following is a key target of the POSHAN Abhiyaan mission?

- (A) To increase the prevalence of obesity among adults.
- (B) To reduce stunting, under-nutrition, and anemia among vulnerable groups.
- (C) To promote the consumption of processed and fast foods.
- (D) To decrease the age of retirement for government employees.

Ans :

(B) To reduce stunting, under-nutrition, and anemia among vulnerable groups.

This is attributed to a shift in dietary patterns towards cheap, energy-dense processed foods and snacks that are high in fat, sugar, and salt, but low in essential micronutrients. Physical activity has also decreased as more people take up sedentary jobs. A nutritionist addressing the community calls this situation the 'double burden of malnutrition'. She explains that the community is simultaneously facing the health consequences of both undernutrition and overnutrition. Her challenge is to design a public health program that addresses both problems, promoting nutrient-rich foods for children while also creating awareness about healthy eating and active lifestyles for adults to prevent non-communicable diseases.

- 166.** The coexistence of both undernutrition (stunting) and overnutrition (obesity) in the same community is known as what?
- (A) The communicable disease epidemic.
 - (B) The double burden of malnutrition.
 - (C) The green revolution.
 - (D) The food fortification program.

Ans :

(B) The double burden of malnutrition.
The term 'double burden of malnutrition' refers to the coexistence of both undernutrition (like stunting and wasting) and overnutrition (like overweight and obesity). This is an increasing problem in many developing countries, including India.

- 167.** The condition where a child's height is less than adequate for their age due to chronic malnutrition is called:
- (A) Wasting
 - (B) Underweight
 - (C) Stunting
 - (D) Anemia

Ans :

(C) Stunting
Stunting, or short stature, is a sign of chronic or long-term malnutrition where a child's height is less than adequate for their age. It reflects a failure to receive adequate nutrition over an extended period.

- 168.** The rise in diabetes and hypertension among the adults is linked to what dietary change?
- (A) A shift towards diets high in energy, sugar, fat, and salt from processed foods.
 - (B) An increase in the consumption of whole

grains, pulses, and vegetables.

- (C) A traditional diet rich in fiber and micronutrients.
- (D) A significant reduction in the total amount of food consumed.

Ans :

(A) A shift towards diets high in energy, sugar, fat, and salt from processed foods.

Changes in dietary patterns, especially an increased intake of processed foods high in energy, fat, sugar, and salt, combined with a sedentary lifestyle, lead to undesirable weight gain and increase the risk of non-communicable diseases like diabetes and hypertension.

- 169.** The nutritionist's work involves addressing health problems that affect a large number of people in a specific group. This focus on populations is characteristic of:

- (A) Clinical Nutrition
- (B) Food Technology
- (C) Personal Fitness Training
- (D) Public Health Nutrition

Ans :

(D) Public Health Nutrition
Public health nutrition differs from clinical nutrition as its professionals address the problems of the community or public, especially vulnerable groups. It uses large-scale, organized efforts to solve problems affecting the wider population.

- 170.** The diseases like hypertension and diabetes, which are increasing in the adult population, are classified as what?
- (A) Non-communicable diseases
 - (B) Communicable diseases
 - (C) Infectious diseases
 - (D) Genetic disorders

Ans :

(A) Non-communicable diseases
Diseases such as hypertension, heart disease, diabetes, and cancer are non-communicable diseases. Their prevalence is rising due to changes in lifestyle and dietary patterns, and they take a toll on physical health and quality of life.

Direction : Read the following case study and answer the following questions.

A state government, concerned about the high prevalence of Vitamin A Deficiency (VAD) and Iron-Deficiency Anemia (IDA) among its young

to a lack of awareness, and poor sanitation and hygiene leading to recurrent infections that worsen his nutritional status. The basic causes are linked to the family's poverty and the community's lack of access to government health and nutrition services. The nutritionist recommends immediate therapeutic feeding for Raju and plans a long-term intervention for the community focusing on nutrition education and linking families with government food security programs.

- 161.** Raju's condition of having a body weight that is not adequate relative to his height is termed as what?

(A) Stunting
(B) Wasting
(C) Underweight
(D) Obesity

Ans :

(B) Wasting

Wasting is an indicator of acute malnutrition where an individual's weight is not adequate relative to their height. It signifies a recent and severe process of weight loss, often associated with starvation and/or disease.

- 162.** The inadequate intake of food by Raju is considered which level of cause for his malnutrition?

(A) Basic cause
(B) Underlying cause
(C) Immediate cause at the individual level
(D) Societal cause

Ans :

(C) Immediate cause at the individual level

The immediate causes of malnutrition are those that directly affect the individual. These include inadequate or faulty dietary intake and the presence of diseases or infections that prevent the body from properly absorbing or utilizing nutrients from food.

- 163.** The family's poverty and lack of access to health services are examples of what kind of causes of malnutrition?

(A) Underlying causes at the household level.
(B) Immediate causes at the individual level.
(C) Genetic and biological causes.
(D) Causes related to personal food preferences.

Ans :

(A) Underlying causes at the household level.

Underlying causes of malnutrition exist at the household and family level. They include factors

like insufficient access to food, poor maternal and child care practices, poor sanitation, and inadequate health services, which create the conditions for malnutrition.

- 164.** The severe form of undernutrition caused primarily by a deficiency of food and energy, leading to a frail appearance as seen in Raju, is known as what?

(A) Kwashiorkor
(B) Scurvy
(C) Pellagra
(D) Marasmus

Ans :

(D) Marasmus

Marasmus is a severe form of malnutrition characterized by energy deficiency. It arises from an inadequate intake of all macronutrients (protein, carbohydrates, and fats), leading to extreme wasting of subcutaneous fat and muscle, giving a skeletal appearance.

- 165.** What is the primary mission of public health nutrition, as demonstrated by the nutritionist's intervention?

(A) To treat only individual, hospitalized patients.
(B) To develop new processed foods for commercial sale.
(C) To promote good health by preventing nutrition-related illnesses in the population.
(D) To focus solely on the dietary needs of professional athletes.

Ans :

(C) To promote good health by preventing nutrition-related illnesses in the population.

Public health nutrition is a field concerned with promoting good health and preventing nutrition-related problems in the population. It uses large-scale, organized approaches to solve issues affecting the community, especially vulnerable groups.

Direction : Read the following case study and answer the following questions.

A public health survey in an urban slum reveals a peculiar health scenario. A significant number of children under five are found to be stunted and underweight, suffering from undernutrition due to poverty and poor dietary diversity. At the same time, a growing number of adults in the same community are overweight or obese, with rising rates of diabetes and hypertension.

Direction : Read the following case study and answer the following questions.

Geeta works as an Anganwadi worker in her village as part of the Integrated Child Development Services (ICDS) program. Her anganwadi center is a hub of activity for the community's mothers and young children. Every day, she provides supplementary feeding to children below six years of age, as well as to pregnant and nursing mothers, to bridge the nutritional gap in their diets. She meticulously maintains growth charts for each child, weighing them regularly to monitor their development and identify cases of malnutrition early. For children aged three to six, she conducts non-formal pre-school education activities, using play-based methods to stimulate their cognitive and social development. Geeta also organizes monthly meetings with mothers to provide health and nutrition education, teaching them about infant feeding practices, hygiene, and the importance of immunization. The ICDS program, through workers like Geeta, aims to deliver a package of services in an integrated manner to foster the holistic development of children and care for expectant and nursing mothers.

- 176.** The ICDS program, delivered through the Anganwadi center, is primarily an outreach program for what?
- (A) Higher education for college students.
 - (B) Elderly care and retirement planning.
 - (C) Early childhood care and development.
 - (D) Agricultural development and farmer support.

Ans :

(C) Early childhood care and development.
The Integrated Child Development Services (ICDS) is a major government program focused on early childhood care and development. It covers pregnant and nursing mothers, infants, and young children up to the age of six.

- 177.** The supplementary feeding provided at the Anganwadi is an example of which type of intervention?
- (A) A self-employment scheme.
 - (B) A food supplementation program.
 - (C) A food security program like PDS.
 - (D) A formal education program.

Ans :

(B) A food supplementation program.

Food supplementation programs are direct, short-term interventions designed to provide additional food to vulnerable groups to meet their nutritional needs. The supplementary feeding at ICDS is a key component aimed at preventing malnutrition in children and mothers.

- 178.** What is the purpose of Geeta maintaining growth charts for the children?
- (A) To monitor their physical growth and identify signs of malnutrition early.
 - (B) To keep a record of their attendance for pre-school activities.
 - (C) To determine their eligibility for financial aid.
 - (D) To create a photo album for each child.

Ans :

(A) To monitor their physical growth and identify signs of malnutrition early.

Growth monitoring is a crucial service of the ICDS. By regularly weighing children and plotting the measurements on a growth chart, health workers can track their development, detect growth faltering, and take corrective action against malnutrition promptly.

- 179.** The ICDS program aims to meet the needs of children below six in a holistic manner by providing:
- (A) Only food, but no health or education services.
 - (B) Only pre-school education, but no nutrition or health support.
 - (C) Only financial assistance to the families.
 - (D) An integrated package of health, nutrition, and early learning services.

Ans :

(D) An integrated package of health, nutrition, and early learning services.

ICDS is designed to deliver a package of services—including supplementary nutrition, immunization, health check-ups, and non-formal pre-school education—in an integrated manner to promote the holistic development of young children and reduce mortality and malnutrition.

- 180.** The Anganwadi worker plays a crucial role at which level of the healthcare system?
- (A) Tertiary level (specialized hospitals).
 - (B) Secondary level (district hospitals).
 - (C) Primary level (first point of contact for the community).
 - (D) International level (global health

organizations).

Ans :

(C) Primary level (first point of contact for the community).

The Anganwadi center functions at the grassroots level and is part of the primary healthcare infrastructure. It serves as the first and most accessible point of contact for the community for basic health and nutrition services.

Direction : Read the following case study and answer the following questions.

A team of healthcare professionals visits a remote community in the Himalayan belt of India. They observe that a large number of adults, particularly women, have a visible swelling in the neck, a condition known as goitre. They also find that many children in the community have delayed mental and physical development, a condition suggestive of cretinism. The team suspects that these health issues are due to a deficiency of a specific micronutrient in the local diet. Since this is an ecological phenomenon linked to the soil in the region being deficient in this nutrient, the food grown locally lacks it as well. The professionals conclude that the community is suffering from Iodine Deficiency Disorders (IDD). They immediately recommend a two-fold strategy: first, to ensure the universal availability and consumption of iodized salt in the region, and second, to conduct an awareness campaign about the irreversible effects of this deficiency, especially on fetal development if a pregnant woman is deficient.

- 181.** The spectrum of disabling conditions, including goitre and cretinism, caused by inadequate intake of a specific micronutrient is known as:
- (A) Protein-Energy Malnutrition (PEM)
 - (B) Vitamin A Deficiency (VAD)
 - (C) Iron-Deficiency Anemia (IDA)
 - (D) Iodine Deficiency Disorders (IDD)

Ans :

(D) Iodine Deficiency Disorders (IDD)

The term Iodine Deficiency Disorders (IDD) refers to a wide range of conditions affecting health due to inadequate iodine intake. These include goitre, hypothyroidism, and severe effects on fetal development like mental retardation and cretinism.

- 182.** What is the most common and visible manifestation of iodine deficiency in adults?

- (A) Night blindness
- (B) Rickets
- (C) An enlarged thyroid gland, known as goitre
- (D) Severe weight loss or marasmus

Ans :

(C) An enlarged thyroid gland, known as goitre
Iodine is required for the synthesis of thyroid hormones. When iodine is deficient, the thyroid gland enlarges in an attempt to produce more hormone, resulting in goitre, which is the most common sign of iodine deficiency.

- 183.** IDD is described as an ecological phenomenon primarily because it is largely due to:

- (A) A deficiency of iodine in the soil of a particular region.
- (B) The cultural food habits of the population.
- (C) A lack of physical activity in the community.
- (D) The high cost of nutritious food.

Ans :

(A) A deficiency of iodine in the soil of a particular region.

Iodine Deficiency Disorders are considered an ecological phenomenon because they are most prevalent in regions where the soil, and consequently the water and crops, are deficient in iodine. This makes the local diet inherently low in this essential micronutrient.

- 184.** The health team's emphasis on pregnant women is critical because iodine deficiency during pregnancy can have what severe, irreversible effect on the fetus?

- (A) It can cause the fetus to be overweight at birth.
- (B) It can lead to mental retardation and congenital abnormalities.
- (C) It can result in the child having perfect vision.
- (D) It can guarantee immunity against all infections.

Ans :

(B) It can lead to mental retardation and congenital abnormalities.

Iodine deficiency during pregnancy has severe adverse effects on the fetus, as the nutrient is crucial for brain development. The damage, which includes mental retardation, is unfortunately irreversible, making prevention through adequate maternal intake essential.

- 185.** The recommended strategy of promoting the use of iodized salt is an example of what kind of public health intervention?
- (A) Food fortification
 - (B) Nutrient supplementation
 - (C) Dietary diversification
 - (D) Health education only

Ans :

- (A) Food fortification

The addition of iodine to salt is a classic, highly effective example of food fortification. This strategy ensures that the population receives adequate iodine through a commonly consumed food item, preventing IDD on a large scale.

Direction : Read the following case study and answer the following questions.

A public health organization launches a campaign in a rural district focused on improving maternal and child health. The campaign emphasizes the importance of a nutritious diet for pregnant women to prevent the birth of low birth weight babies. A low birth weight baby is defined as one weighing less than 2.5kg at birth. The campaign educators explain to the community that low birth weight is a serious issue as it can have adverse effects throughout the child's growing years and may even lead to child mortality. They highlight that these babies are more susceptible to infections and are more likely to experience growth retardation and developmental delays. The intervention promotes a diet rich in all essential nutrients for expectant mothers and encourages them to attend regular health check-ups at the local Primary Health Centre (PHC). The program's goal is to reduce the incidence of low birth weight, thereby giving children a healthier start in life and reducing the overall burden of malnutrition in the community.

- 186.** What is the standard weight threshold below which a newborn is classified as a low birth weight baby?
- (A) Less than 4.0 kg
 - (B) Less than 3.5 kg
 - (C) Less than 3.0 kg
 - (D) Less than 2.5 kg

Ans :

- (D) Less than 2.5 kg

An infant born weighing less than 2500g or 2.5kg is defined as a low birth weight baby. This is a critical indicator of maternal health and

nutrition, as well as the newborn's future health and survival.

- 187.** The public health campaign highlights that low birth weight can lead to what long-term consequence for the child?
- (A) Enhanced athletic performance in adulthood.
 - (B) Above-average height and physical growth.
 - (C) Adverse effects throughout their growing years, including growth retardation.
 - (D) Complete immunity to all childhood diseases.

Ans :

- (C) Adverse effects throughout their growing years, including growth retardation.

Low birth weight is a significant risk factor with long-term consequences. It can have adverse effects on the child's growth, development, and health throughout their growing years and may even have implications in their adult life.

- 188.** The campaign focuses on improving the diet of pregnant women. This is an example of tackling which level of cause for child malnutrition?
- (A) Immediate causes affecting the child after birth.
 - (B) Basic causes related to national economic policy.
 - (C) Causes related to the child's genetic makeup.
 - (D) Underlying causes related to poor maternal and child care practices.

Ans :

- (D) Underlying causes related to poor maternal and child care practices.

Poor maternal nutrition is an underlying cause of child malnutrition. By focusing on the health and diet of pregnant women, the campaign addresses one of the key factors that contribute to low birth weight and subsequent health problems.

- 189.** The local Primary Health Centre (PHC) represents which level of the healthcare system in India?
- (A) The primary level, which is the first point of contact for the community.
 - (B) The secondary level, which deals with more complex health problems.
 - (C) The tertiary level, which includes specialized hospitals and medical colleges.
 - (D) A private, for-profit healthcare facility.

Ans :

- (A) The primary level, which is the first point of contact for the community.

children, decides to implement two major public nutrition interventions. For VAD, they opt for a nutrient-based approach. Under the National Prophylaxis Programme, they organize camps to administer high-dose Vitamin A supplements to all children between 1 and 5 years of age every six months. For IDA, they decide on a food-based strategy. They launch a program to fortify wheat flour, which is supplied through the Public Distribution System (PDS), with iron and folic acid. The rationale is that since wheat flour is a staple food consumed by almost everyone, fortifying it will ensure that a large section of the population, including children, receives these essential micronutrients regularly through their diet. The government believes that while the Vitamin A supplementation is a good short-term measure, the food fortification program offers a more sustainable, long-term solution to combatting 'hidden hunger' without requiring drastic changes in people's eating habits.

- 171.** The distribution of high-dose Vitamin A supplements is an example of which type of strategy to combat nutritional problems?
- (A) A food-based strategy.
 - (B) A nutrient-based or medicinal approach.
 - (C) A horticulture intervention.
 - (D) A long-term dietary diversification plan.

Ans :

(B) A nutrient-based or medicinal approach.
In a nutrient-based or medicinal approach, nutrient supplements are given to vulnerable groups who are at risk of or are suffering from a deficiency. It is typically a short-term strategy used for specific micronutrients like vitamin A.

- 172.** The term used to refer to micronutrient deficiencies like VAD and IDA is:
- (A) Protein-Energy Malnutrition
 - (B) Double Burden of Malnutrition
 - (C) Overnutrition
 - (D) Hidden Hunger

Ans :

(D) Hidden Hunger
The term "hidden hunger" is used to describe micronutrient deficiencies. This is because, unlike energy deficiency which causes visible wasting, the signs of micronutrient deficiencies may not be apparent until they become severe, yet they cause significant health problems.

- 173.** Adding iron and folic acid to wheat flour is a process known as:
- (A) Food fortification
 - (B) Dietary diversification
 - (C) Nutrient supplementation
 - (D) Horticulture intervention

Ans :

(A) Food fortification
Food fortification is a diet or food-based strategy where essential micronutrients are added to staple foods to increase their nutritional value and prevent deficiencies. This strategy is cost-effective, sustainable, and reaches a wide population.

- 174.** What is a major advantage of a food-based strategy like fortification over a nutrient-based strategy like supplementation?
- (A) It is only effective for a very small number of people.
 - (B) It requires people to change their eating habits completely.
 - (C) It is sustainable, has wide coverage, and does not carry the risk of overdose.
 - (D) It is a very expensive and temporary solution.

Ans :

(C) It is sustainable, has wide coverage, and does not carry the risk of overdose.
Food-based strategies like fortification are considered sustainable and have long-term benefits. They are cost-effective, can be adapted to cultural traditions, and avoid the risk of toxicity from overdosing, which can be a concern with high-dose supplements.

- 175.** Vitamin A deficiency is a major public health concern because it is the most common cause of what condition in children?
- (A) Goitre
 - (B) Scurvy
 - (C) Beriberi
 - (D) Childhood blindness

Ans :

(D) Childhood blindness
Vitamin A is necessary for normal vision. A deficiency can lead to night blindness, which, if not corrected, can progress to permanent and complete blindness. VAD remains the most common preventable cause of childhood blindness globally.

The mission has specific targets to reduce stunting and under-nutrition among children, anemia among young children, women, and adolescent girls, and to reduce the incidence of low birth weight. These are key indicators of malnutrition.

- 194.** The use of technology for real-time monitoring of program implementation is intended to do what?
- (A) Make the work of field-level functionaries more difficult.
 - (B) Increase the amount of paperwork required for reporting.
 - (C) Reduce the amount of funding allocated to nutrition programs.
 - (D) Monitor and review the implementation of all schemes effectively.

Ans :

(D) Monitor and review the implementation of all schemes effectively.

A large component of POSHAN Abhiyaan involves using technology for real-time monitoring. This helps in tracking the implementation of various nutrition schemes, identifying gaps, and ensuring that services reach the intended beneficiaries effectively.

- 195.** The mission's focus on behavior change communication acknowledges that solving malnutrition requires:
- (A) Changes in eating behavior and health practices at the community level.
 - (B) Only providing food supplements without changing habits.
 - (C) Only government policies without community involvement.
 - (D) A focus on treatment rather than prevention.

Ans :

(A) Changes in eating behavior and health practices at the community level.

By focusing on behavior change communication, the mission recognizes that long-term, sustainable improvement in nutrition requires changes in the knowledge, attitudes, and practices of the community regarding diet, health, and hygiene.

Direction : Read the following case study and answer the following questions.

In a discussion on strategies to combat micronutrient deficiencies, a public health expert compares two different approaches for tackling Vitamin A Deficiency (VAD). The first approach is a long-term, food-based strategy that involves

promoting dietary diversification. This includes educating communities on the importance of consuming a variety of foods rich in Vitamin A and beta-carotene, such as green leafy vegetables, yellow and orange fruits, and animal products. It also involves horticulture interventions like encouraging families to set up home gardens to increase the availability of these foods. The second approach is a short-term, nutrient-based strategy involving the periodic supplementation of high-dose Vitamin A capsules to young children. The expert argues that while supplementation is effective for immediate and therapeutic treatment, the food-based approach is more sustainable, cost-effective, and culturally adaptable in the long run. It provides multiple micronutrients simultaneously and improves overall food security, empowering the community to meet their own nutritional needs.

- 196.** Encouraging families to set up home gardens to grow vegetables is an example of which type of food-based strategy?
- (A) Food fortification
 - (B) Nutrient supplementation
 - (C) A medicinal approach
 - (D) Dietary diversification and horticulture intervention

Ans :

(D) Dietary diversification and horticulture intervention

Food-based strategies are preventive measures that use food as a tool. This includes dietary diversification, which aims to increase the variety of foods consumed, and horticulture interventions like home gardening to increase the local availability of micronutrient-rich foods.

- 197.** What is a key advantage of the food-based strategy (dietary diversification) over the nutrient-based strategy (supplementation)?
- (A) It is less sustainable and has short-term benefits.
 - (B) It is more expensive and has a narrow scope of coverage.
 - (C) It provides many micronutrients simultaneously and improves food security.
 - (D) It carries a high risk of overdose and toxicity.

Ans :

(C) It provides many micronutrients simultaneously and improves food security.

A major advantage of dietary diversification is that it provides a range of micronutrients

- (A) Food Technology
- (B) Food Manufacturing
- (C) Food Preservation
- (D) Food Science

Ans :

(D) Food Science

Food Science is a broad discipline that applies principles from chemistry, physics, and biology to study all technical aspects of food. It covers the nature of food, its processing, causes of spoilage, and the changes it undergoes from the farm to the consumer's plate.

- 7.** What distinguishes Food Technology from Food Science?
- (A) Food Science deals with spoilage, while Food Technology does not.
 - (B) Food Technology applies Food Science knowledge for food production.
 - (C) Food Science is about mass production, while Technology is about research.
 - (D) Food Technology focuses only on raw materials, not finished products.

Ans :

(B) Food Technology applies Food Science knowledge for food production.

Food Technology is the application of Food Science. It uses the scientific knowledge of food's nature and properties, discovered through Food Science, to develop practical methods for the selection, preservation, processing, packaging, and distribution of safe, nutritious, and desirable food products for consumers.

- 8.** The mass production of food products using principles of food technology to meet the needs of a growing population is known as:
- (A) Food Science
 - (B) Food Analysis
 - (C) Recipe Development
 - (D) Food Manufacturing

Ans :

(D) Food Manufacturing

Food manufacturing is defined as the mass production of food products. It utilizes the principles and systems developed through food technology to produce food on a large scale, making it one of the largest manufacturing industries today, catering to widespread consumer needs.

- 9.** Who is credited with the development of the canning process in 1810, a decisive event in food preservation history?
- (A) Louis Pasteur
 - (B) JRD Tata
 - (C) Nicolas Appert
 - (D) Gregor Mendel

Ans :

(C) Nicolas Appert

Nicolas Appert's development of the canning process in 1810 was a landmark event in food preservation. This invention had a major and lasting impact on food preservation techniques, allowing for the long-term storage of food items, which was crucial for military supplies and civilian use.

- 10.** What was the primary contribution of Louis Pasteur's research to food technology?
- (A) He put food technology on a scientific basis with pasteurisation.
 - (B) He invented the process of freezing foods for preservation.
 - (C) He developed the first artificial sweetener for diet foods.
 - (D) He created the first genetically modified crop for higher yield.

Ans :

(A) He put food technology on a scientific basis with pasteurisation.

Louis Pasteur's research on wine spoilage and his development of 'pasteurisation' were pivotal in putting food technology on a scientific footing. Pasteurisation, the process of heating milk to destroy pathogens, was a significant advance in ensuring the microbiological safety of food for consumers.

- 11.** Arrange the following historical developments in food technology in chronological order:
1. Development of 'pasteurisation' by Louis Pasteur.
 2. Development of instant soup mixes for working women.
 3. Development of the canning process by Nicolas Appert.
 4. Use of food technology to serve military needs during world wars.
- (A) 3, 1, 4, 2
 - (B) 1, 3, 2, 4
 - (C) 3, 4, 1, 2
 - (D) 2, 1, 3, 4

- (C) Tertiary level
- (D) International level

Ans :

- (A) Primary level

The primary level is the first point of contact for an individual or community with the health system. In India, these services are provided through a network of Primary Health Centres, sub-centres, and Anganwadis.

- 203.** In this tiered system, the Community Health Centres (CHCs) and district hospitals belong to which level?

- (A) Primary level
- (B) Secondary level
- (C) Tertiary level
- (D) Quaternary level

Ans :

- (B) Secondary level

More complex health problems that cannot be managed at the primary level are dealt with at the secondary level. This level typically includes district hospitals and Community Health Centres, which also function as the first referral units.

- 204.** The medical college hospital, which deals with the most complex health problems, is an institution at which level of care?

- (A) Primary level
- (B) Secondary level
- (C) Initial contact level
- (D) Tertiary level

Ans :

- (D) Tertiary level

The tertiary level is the third and highest level of healthcare, dealing with the most complex problems that cannot be managed at the first two levels. It includes institutions like medical college hospitals and specialized institutes.

- 205.** The process of sending a patient from a lower-level facility to a higher-level one for more specialized care is known as:

- (A) A referral
- (B) A discharge
- (C) An admission
- (D) A follow-up

Ans :

- (A) A referral

A referral is the process by which a healthcare provider at one level of the care system directs a

patient to another provider or facility, typically at a higher level, for more specialized diagnosis or treatment.

Direction : Read the following case study and answer the following questions.

Priya is a student of Human Ecology and Family Sciences who wants to pursue a career as a public health nutritionist. She learns that this career is very different from being a clinical dietitian who works with individual patients. A public health nutritionist works with entire communities and populations. Their role could involve working with government nutrition programs like ICDS or the Mid-Day Meal scheme. They might also work for national or international non-governmental organizations (NGOs) like UNICEF or GAIN, helping to design, implement, and evaluate large-scale health and nutrition interventions. Another avenue is working as a consultant for government policy-making committees or with corporate social responsibility (CSR) programs that focus on food and nutrition security. Priya understands that to be successful in this field, she would need a strong knowledge of nutritional science, nutritional assessment methods, program management, and communication skills to effectively educate communities and advocate for policy changes.

- 206.** What is the primary difference between a clinical dietitian and a public health nutritionist?

- (A) A clinical dietitian works with communities, while a public health nutritionist works with individual patients.
- (B) A clinical dietitian works with individual patients, while a public health nutritionist works with communities and populations.
- (C) There is no difference between the two professions.
- (D) A clinical dietitian focuses on food production, while a public health nutritionist focuses on food safety.

Ans :

- (B) A clinical dietitian works with individual patients, while a public health nutritionist works with communities and populations.

The key distinction is the scale of work. Clinical nutritionists typically focus on the dietary management of individual patients, whereas public health nutritionists address the nutritional problems of entire communities or populations through large-scale programs.

from different foods at the same time, unlike supplementation which targets a single nutrient. It also promotes self-reliance and improves household food security.

198. The periodic distribution of Vitamin A capsules is a short-term strategy primarily used for which purpose?

- (A) To prevent all types of diseases in the entire population.
- (B) As a therapeutic treatment and preventive measure for specific target groups.
- (C) To change the agricultural policies of the country.
- (D) To provide a permanent solution to malnutrition.

Ans :

(B) As a therapeutic treatment and preventive measure for specific target groups.

Nutrient supplementation is a short-term, medicinal approach used for the prevention and treatment of specific deficiencies in targeted, high-risk, vulnerable groups, such as giving Vitamin A supplements to young children.

199. A long-term goal for public health nutritionists should be to:

- (A) Shift away from supplementation towards sustainable food-based approaches.
- (B) Rely exclusively on nutrient supplementation programs forever.
- (C) Shift away from food-based approaches towards supplementation.
- (D) Focus only on treating deficiencies and not on prevention.

Ans :

(A) Shift away from supplementation towards sustainable food-based approaches.

While supplementation is useful for immediate relief, the long-term, sustainable goal of public health nutrition is to shift towards food-based approaches. This empowers communities to meet their nutritional needs through a balanced and diverse diet.

200. Yellow and orange fruits and green leafy vegetables are promoted in the campaign because they are rich sources of what?

- (A) Iodine
- (B) Iron
- (C) Calcium
- (D) Beta-carotene (a precursor of Vitamin A)

Ans :

(D) Beta-carotene (a precursor of Vitamin A)

Dark green leafy vegetables and yellow or orange colored fruits and vegetables are rich sources of beta-carotene, which the body can convert into Vitamin A. Promoting their consumption is a key food-based strategy to prevent VAD.

Direction : Read the following case study and answer the following questions.

In India's tiered healthcare system, a pregnant woman named Fatima from a rural village first visits her local Anganwadi for advice and supplementary nutrition. Later, when she develops a complication, she is referred by the Anganwadi worker to the nearest Primary Health Centre (PHC), where a doctor examines her. The PHC is able to manage most of her needs but determines that she requires more specialized care. They refer her to the Community Health Centre (CHC) at the block level, which acts as the first referral level and has better facilities. The CHC, in turn, finds that her condition is highly complex and requires advanced medical intervention. Finally, she is sent to the district's medical college hospital, which represents the highest level of care. This journey illustrates how the healthcare system is structured to provide services at different levels, starting from the most basic community outreach and progressing to highly specialized institutions, ensuring that patients can be referred to the appropriate level of care based on the complexity of their health problems.

201. India's healthcare system is structured into how many levels?

- (A) One level
- (B) Two levels
- (C) Three levels
- (D) Four levels

Ans :

(C) Three levels

India's healthcare system is structured to provide care at three levels: primary, secondary, and tertiary. This tiered structure allows for a referral system where patients can access increasingly specialized care as needed.

202. The Primary Health Centre (PHC) and the Anganwadi represent which level of healthcare?

- (A) Primary level
- (B) Secondary level

CHAPTER 04

FOOD PROCESSING AND TECHNOLOGY

SUMMARY

1. INTRODUCTION

For centuries, foods have been processed to improve digestibility, enhance palatability, and extend shelf life. Traditional Indian preserved products include pickles, murabbas, and papads. With modern industrialization and changing consumer needs, there is a growing demand for “fresh,” “organic,” “safer,” and “healthier” foods that are convenient and have a long shelf life. This has driven scientists to develop advanced methods and technologies for food processing.

2. SIGNIFICANCE

India’s food industry has become a major producer of processed foods, ranking fifth globally in size and contributing nearly 6% to the GDP. The significance of food processing and technology is multifaceted:

- **Economic Growth:** Changes in lifestyle and globalization have fueled demand for a variety of processed products, making research into new technologies essential.
- **Nutritional Improvement:** Food fortification is used to add essential nutrients to staple foods, such as iodine to salt and vitamins to milk and oils, to combat deficiency disorders. FSSAI has established standards for fortifying key staples.
- **Health and Wellness:** In response to the increasing prevalence of diseases like diabetes and heart disease, scientists are altering the nutrient content of foods, for example, by using artificial sweeteners to reduce calories or replacing fat with specially treated proteins.
- **Consumer Demand:** There is a rising demand for foods that are free of chemicals and

preservatives, yet retain their natural flavor and have a long shelf life, which has increased the importance of and demand for food technologists.

3. BASIC CONCEPTS

3.1 Food Science

Food science is a broad discipline that applies principles from chemistry, physics, microbiology, and other sciences to study the technical aspects of food. It covers everything from harvesting and slaughtering to cooking and consumption, focusing on the composition of foods, the changes they undergo during processing and storage, and the causes of spoilage.

3.2 Food Processing

Food processing involves the methods and techniques used to convert raw ingredients into finished or semi-finished products. This transformation turns raw materials from plants and animals into attractive, marketable, and often long-shelf-life food products.

3.3 Food Technology

Food technology applies scientific and socio-economic knowledge to the production, preservation, processing, packaging, and distribution of food. Its goals are to create foods that are safe, nutritious, desirable, affordable, and convenient, while also promoting sustainability and minimizing waste.

3.4 Food Manufacturing

Food manufacturing is the mass production of food products, which utilizes the principles of food technology to meet the diverse needs of a

growing population. It is currently one of the world's largest manufacturing industries.

3.5 Development of Food Processing and Technology

The field has evolved significantly over time. Key milestones include Nicolas Appert's invention of the canning process in 1810 and Louis Pasteur's research on pasteurization in 1864, which was a major advancement in ensuring microbiological food safety. In the 20th century, world wars, space exploration, and rising consumer demands for convenient items like instant soups and ready-to-cook meals further spurred the growth of food technology. Today, food technologists focus on producing safer, fresher, and healthier foods to meet modern consumer needs.

3.6 Importance of Food Processing and Preservation

Food processing is essential to prevent the physical, chemical, and biological deterioration of foods. Spoilage can be caused by various factors, including pests, improper storage temperatures, exposure to light and oxygen, and contamination by microorganisms like bacteria and fungi. The fundamental concepts behind food processing aim to prevent spoilage by:

- Applying heat.
- Removing water/moisture.
- Lowering storage temperature.
- Reducing pH.
- Controlling oxygen availability.

3.7 Classes of Foods Based on Perishability

Foods are classified based on how quickly they spoil:

- **Perishable foods:** Spoil within one or two days (e.g., milk, fish, meat).
- **Semi-perishable foods:** Last for one to two weeks (e.g., fruits, vegetables).
- **Non-perishable foods:** Last for about a year (e.g., grains, pulses, oilseeds).

3.8 Classification of Processed Foods

Processed foods can be categorized based on the extent and type of processing:

- **Minimally processed foods:** Processed very little to retain the quality of fresh foods (e.g., cleaned and cut vegetables).

- **Preserved foods:** Preservation methods do not substantially change the product's character (e.g., frozen peas, canned fruits).
- **Manufactured foods:** The original characteristics are lost, and ingredients like salt, sugar, or oil are used for preservation (e.g., pickles, jams).
- **Formulated foods:** Created by mixing and processing ingredients to make shelf-stable products (e.g., bread, biscuits, ice cream).
- **Food derivatives:** Components are extracted from raw products through purification (e.g., sugar from sugarcane, oil from oilseeds).
- **Functional foods:** Foods that offer health benefits beyond basic nutrition (e.g., probiotics).
- **Medical foods:** Used for the dietary management of specific diseases (e.g., lactose-free milk).

4. PREPARING FOR A CAREER

A career in the food industry requires a wide range of knowledge and skills, including food science, chemistry, microbiology, food processing, quality assurance, nutrition, and sensory evaluation. Educational paths range from short-term certificate and diploma courses for entry-level jobs to Bachelor's, Master's, and doctoral degrees for roles in large-scale industry, research, and academia. Prominent institutions in India include the Central Food Technological Research Institute (CFTRI) and the National Institute of Food Technology and Entrepreneurship Management (NIFTEM).

5. SCOPE

The food processing sector in India is a major growth area, creating a high demand for well-trained professionals. Food technologists can work in various specializations such as dairy, meat, beverages, and fats and oils. Career avenues exist in production management, quality assurance, research and development, marketing, project financing, teaching, and consultancy.

5.1 Self Employment Avenues

Food processing has deep roots in India as a household or cottage industry. With government support and incentives, particularly for women, there are significant opportunities for entrepreneurs to start their own food enterprises. These can range from low-investment ventures

like making pickles or dehydrated products to high-technology, investment-intensive operations.

MULTIPLE CHOICE QUESTION

1. Which of the following traditional Indian products are examples of food preservation?

(A) Roti and Dal
(B) Khichdi and Pulao
(C) Pickles and Murabbas
(D) Kheer and Halwa

Ans :

(C) Pickles and Murabbas

Pickles, murabbas, and papads are classic examples of preserved food products made traditionally in India from vegetables, fruits, or grains. These methods were developed to extend the shelf life of seasonal produce, making them available for consumption throughout the year, which is a primary goal of food preservation.

2. What has been the primary stimulus for scientists to develop new methods and techniques for food processing in modern times?

(A) A decrease in agricultural production globally
(B) The need to adhere to ancient cooking practices
(C) The demand for foods with a shorter shelf life
(D) The consumer demand for safer and healthier foods

Ans :

(D) The consumer demand for safer and healthier foods

Modern consumer demands for 'fresh', 'organic', safer, healthier, and shelf-stable foods with specific functional properties have served as a major stimulus for scientists. This has pushed the industry to innovate beyond simple preservation to meet complex consumer expectations regarding nutrition, taste, and convenience.

3. Which statement accurately reflects India's position in the global food industry?

(A) It ranks fifth in size and contributes about 6 per cent of the GDP.
(B) It is primarily an agro-deficit country with low processed food output.
(C) It focuses solely on exporting raw agricultural produce, not processed foods.

(D) It has seen a decline in demand for processed foods due to lifestyle changes.

Ans :

(A) It ranks fifth in size and contributes about 6 per cent of the GDP.

The Indian food industry is a major global player, ranking fifth in size and contributing significantly to the national economy with nearly 6 per cent of the GDP. This growth is driven by India's transition to an agro-surplus status and increasing consumer demand for a variety of processed food products.

4. What is the primary purpose of food fortification?

(A) To improve the taste and texture of staple foods
(B) To add missing nutrients to foods to meet dietary needs
(C) To decrease the shelf life of perishable food items
(D) To remove essential nutrients from processed foods

Ans :

(B) To add missing nutrients to foods to meet dietary needs

Food fortification involves adding nutrients that are lacking in staple foods to ensure that minimum dietary requirements are met by the population. Examples include iodised salt and vitamin A-fortified milk, which help prevent widespread nutrient deficiency disorders without requiring major changes in dietary habits.

5. A company wants to produce a low-calorie version of ice cream. Which food technology application would be most suitable for this purpose?

(A) Replacing fat with specially treated proteins
(B) Increasing the sugar content for better taste
(C) Using whole milk instead of skimmed milk
(D) Adding extra butter to improve the texture

Ans :

(A) Replacing fat with specially treated proteins
To reduce the calorie content of foods like ice cream, scientists can replace high-energy components like fat with specially treated proteins. These proteins mimic the smooth texture of fat but significantly lower the overall energy value of the product, catering to health-conscious consumers.

6. Which term describes the broad discipline concerned with all technical aspects of food, from harvesting to consumption?

- 207.** Working with international organizations like UNICEF or national programs like ICDS falls under the scope of which field?
- (A) Public Health Nutrition
 - (B) Food Technology
 - (C) Hotel Management
 - (D) Textile Design

Ans :

- (A) Public Health Nutrition

Public health nutritionists have wide-ranging career opportunities. They can be involved with government developmental programs like ICDS or work with voluntary and international organizations like UNICEF, which undertake large-scale nutrition interventions.

- 208.** Besides nutritional science, what is a key area of knowledge required for a public health nutritionist?
- (A) Automotive engineering.
 - (B) Interior design.
 - (C) Software programming.
 - (D) Program management and communication.

Ans :

- (D) Program management and communication.

The role of a public health nutritionist is multi-faceted. It requires skills in program management to plan and implement interventions, and strong communication skills to educate communities and advocate for policies.

- 209.** What kind of role can a public health nutritionist play at the government level?
- (A) A construction worker building new hospitals.
 - (B) A pilot for the national airline.
 - (C) A consultant or advisor in policy-making committees.
 - (D) A security guard at a government office.

Ans :

- (C) A consultant or advisor in policy-making committees.

Public health nutritionists can work at the government level in various capacities. They can serve as consultants or advisors on policy-making committees, using their expertise to help shape national nutrition policies and programs.

- 210.** The work of a public health nutritionist is multidisciplinary because it is built on the foundations of:
- (A) Both biological and social sciences.
 - (B) Only biological sciences.

- (C) Only social sciences.
- (D) Only managerial sciences.

Ans :

- (A) Both biological and social sciences.

The field of public health nutrition is inherently multidisciplinary. It draws knowledge from nutritional and biological sciences as well as behavioral, social, and managerial sciences to effectively address complex population-level health problems.

Ans :

(A) 3, 1, 4, 2

The correct chronological order is: Nicolas Appert developed canning in 1810; Louis Pasteur conducted his research and developed pasteurisation in 1864; food technology advanced to serve military needs in the 20th century's world wars; and products like instant soups were developed later to meet consumer needs.

- 12.** Assertion (A): Food processing often adds value to the resultant product.

Reason (R): Processing generally increases the storability, portability, palatability, and convenience of food materials.

- (A) Both A and R are true, and R is the correct explanation of A.
(B) Both A and R are true, but R is not the correct explanation of A.
(C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that food processing adds value is true because, as the reason states, it improves key characteristics like storability (shelf-life), portability, taste (palatability), and ease of use (convenience). These enhancements make the product more desirable and useful to the consumer, thereby adding value.

- 13.** Which of the following is NOT a primary cause of food deterioration?
- (A) Contamination by microorganisms like bacteria and moulds.
(B) Exposure to controlled, low-temperature storage conditions.
(C) Degradation by naturally present enzymes in the food.
(D) Inappropriate temperatures used for processing or storage.

Ans :

(B) Exposure to controlled, low-temperature storage conditions.

Controlled, low-temperature storage (refrigeration/freezing) is a method of food preservation, not a cause of deterioration. Factors that cause deterioration include pests, improper temperatures, light, oxygen, moisture, microorganisms (like bacteria and fungus), and enzymes that are naturally present in food.

- 14.** Which of the following is NOT one of the oldest methods of food preservation?

- (A) Sun drying and salting
(B) Controlled fermentation
(C) Roasting and smoking
(D) Irradiation and vacuum packing

Ans :

(D) Irradiation and vacuum packing

Sun drying, salting, pickling, fermentation, roasting, and smoking are among the oldest preservation methods dating back to prehistoric times. Irradiation and vacuum packing are modern techniques developed with the advent of industrial and scientific advancements, not ancient methods.

- 15.** What term is used to describe foods that spoil quickly, typically within one or two days?

- (A) Non-perishable foods
(B) Semi-perishable foods
(C) Perishable foods
(D) Shelf-stable foods

Ans :

(C) Perishable foods

Perishable foods are defined as those that spoil quickly, usually within one or two days if not preserved. Examples of such foods include milk, curd, fish, and meat, which provide a rich environment for microbial growth and require immediate preservation methods like refrigeration.

- 16.** Which of the following is an example of a semi-perishable food?

- (A) Onions and potatoes
(B) Rice and wheat
(C) Milk and fish
(D) Pulses and dals

Ans :

(A) Onions and potatoes

Semi-perishable foods are those that can last for a few weeks. Root crops like onions and potatoes fall into this category, typically lasting for 2-4 weeks. In contrast, milk is perishable, and grains like rice and wheat are non-perishable.

- 17.** What is the temperature range known as the 'Danger Zone' for bacterial growth in food?

- (A) Below 0°C
(B) 0°C to 5°C
(C) 5°C to 60°C
(D) Above 100°C

Ans :

(C) 5°C to 60°C

The temperature range between 5°C and 60°C is referred to as the 'Danger Zone'. Within this range, bacteria can grow rapidly, making it crucial to keep high-risk foods either below 5°C (refrigerated) or above 60°C (kept hot) to ensure safety.

18. Which basic principle of food processing is aimed at preventing the growth of most spoilage microorganisms by removing a key requirement for their survival?

(A) Application of heat
(B) Removal of water/moisture
(C) Reduction of pH
(D) Lowering of temperature

Ans :

(B) Removal of water/moisture

Removing water or moisture through methods like dehydration is a fundamental food preservation principle. Microorganisms require moisture to grow and multiply, so eliminating it effectively inhibits their activity and extends the shelf life of the food product, as seen in dried fruits or grains.

19. Match the class of processed food in Column I with its corresponding example in Column II.

	Column I		Column II
1.	Minimally processed food	a.	Bread
2.	Manufactured food	b.	Frozen peas
3.	Formulated food	c.	Sliced carrots
4.	Preserved food	d.	Jams

(A) 1-c, 2-d, 3-a, 4-b
(B) 1-a, 2-b, 3-c, 4-d
(C) 1-c, 2-a, 3-d, 4-b
(D) 1-b, 2-d, 3-a, 4-c

Ans :

(A) 1-c, 2-d, 3-a, 4-b

Sliced carrots are minimally processed; jams are manufactured foods where raw characteristics are lost; bread is a formulated food made by mixing ingredients; and frozen peas are preserved foods where the character is largely retained. This matching correctly aligns each class with its example.

20. Foods like bread, biscuits, and ice cream, which are prepared by mixing and processing individual ingredients to create relatively shelf-stable products, are classified as:

(A) Manufactured foods
(B) Minimally processed foods
(C) Food derivatives
(D) Formulated foods

Ans :

(D) Formulated foods

Formulated foods are defined as products created by mixing and processing various ingredients to form a new, relatively shelf-stable food item. Bread, biscuits, and ice cream fit this description perfectly as their final form and properties result from a specific formulation and process.

21. Which pair correctly identifies a type of processed food and its definition?

(A) Medical foods: Foods with beneficial effects like probiotics.
(B) Food derivatives: Conversion of oil to vanaspati.
(C) Functional foods: Foods processed as little as possible.
(D) Preserved foods: Ingredients mixed to create new products.

Ans :

(B) Food derivatives: Conversion of oil to vanaspati.

Food derivatives are components obtained from a raw product, which may be further processed. The conversion of oil (a derivative of oilseeds) into vanaspati is a prime example of this. The other options incorrectly pair the food type with its definition or example.

22. Why is it important for a food processing professional to have knowledge of the assessment of raw food quality?

(A) To ensure the final product has a lower nutritional content
(B) To use poor quality materials to reduce the overall cost
(C) To ensure the production of high-quality finished food products
(D) To increase the microbial activity in the final food item

Ans :

(C) To ensure the production of high-quality finished food products

Assessing the quality of raw foods and ingredients is crucial for the quality production of the final food product. The quality of the end product is directly dependent on the quality of the starting

materials, making this knowledge essential for any food processing professional.

- 23.** Which of the following is NOT a key skill required for Recipe Development in the food industry?
- (A) Knowledge of the nature and properties of food
 - (B) Expertise in cooking and accurate measurement
 - (C) Innovations in product design based on consumer perceptions
 - (D) Assessment of the quality of raw foods for production

Ans :

(D) Assessment of the quality of raw foods for production

While assessing raw material quality is a vital skill in food processing, it falls under the category of 'Food as a material', which precedes recipe development. Recipe development focuses more on cooking expertise, ingredient use, design, and innovation for the final product preparation.

- 24.** Which system is crucial for a food technologist to understand for ensuring food safety during the manufacturing process?
- (A) Hazard Analysis and Critical Control Point (HACCP)
 - (B) Global Positioning System (GPS)
 - (C) Customer Relationship Management (CRM)
 - (D) Supply Chain Management (SCM)

Ans :

(A) Hazard Analysis and Critical Control Point (HACCP)

Hazard Analysis and Critical Control Point (HACCP) is a key system for ensuring food safety. A food technologist must understand and implement HACCP to identify, prevent, and control potential hazards at critical points throughout the food production process, ensuring the final product is safe for consumption.

- 25.** What is meant by 'sensory evaluation' in the context of food product development?
- (A) Analyzing the nutritional content of a food product in a lab
 - (B) Assessing a product by testing and tasting to check its appeal
 - (C) Calculating the total cost of production for a new food item
 - (D) Using information technology to design a product's packaging

Ans :

(B) Assessing a product by testing and tasting to check its appeal

Sensory evaluation is the assessment of food products by using the human senses—specifically taste, smell, sight, and touch. In food product development, it is a crucial step to test and taste the produced foods to ensure they meet consumer expectations for flavor, texture, and appearance.

- 26.** A food technologist is tasked with improving the quality control procedures for a beverage company. This work falls under which key activity of the food industry?
- (A) Ensuring food safety and monitoring food quality
 - (B) Research and development
 - (C) Marketing and consumer research
 - (D) Recipe and product formulation

Ans :

(A) Ensuring food safety and monitoring food quality

Improving quality control procedures is a core function related to ensuring food safety and monitoring food quality. This involves establishing and refining processes to consistently meet predefined standards, which is distinct from creating new products (R&D) or marketing them.

- 27.** Which institute in India is specifically mentioned for offering short-term certificate courses in food technology suitable for self-employment?
- (A) National Institute of Food Technology and Entrepreneurship Management (NIFTEM)
 - (B) Indian Institute of Technology (IIT)
 - (C) Central Food Technological Research Institute (CFTRI)
 - (D) All India Institute of Medical Sciences (AIIMS)

Ans :

(C) Central Food Technological Research Institute (CFTRI)

The Central Food Technological Research Institute (CFTRI) in Mysore is highlighted as a key institution that offers short-term certificate, craft, and diploma courses. These courses are particularly suitable for individuals aiming for self-employment or placement in small-scale food processing units.

- 28.** What is the primary advantage of pursuing a Bachelor's or Master's degree in food technology?

Ans :

(C) Because they are preferred by bacteria for growth
Protein-rich foods are termed 'High Risk Foods' because they provide an ideal environment for bacteria to thrive and multiply. This makes them highly susceptible to spoilage and a common source of foodborne illness if not handled, stored, and cooked correctly.

40. What are 'medical foods'?

- (A) Foods that are naturally rich in vitamins and minerals.
- (B) Foods used in the dietary management of specific diseases.
- (C) Any food product sold over-the-counter in a pharmacy.
- (D) Foods that are fortified with probiotics for gut health.

Ans :

(B) Foods used in the dietary management of specific diseases.

Medical foods are specifically defined as those used in the dietary management of diseases or specific health conditions. Examples include lactose-free milk for individuals with lactose intolerance or low-sodium salt for managing hypertension, prescribed under medical supervision.

41. Assertion (A): A food technologist needs expertise in cooking and knowledge of the properties of food for recipe development.

Reason (R): Recipe development involves designing, analyzing, and adapting recipes, which requires practical food handling skills and innovation.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that cooking expertise is needed is true, and the reason explains why. The tasks of designing, analyzing, and innovating recipes (Reason) directly depend on a deep understanding of cooking principles, food properties, and handling skills (Assertion), making R the correct explanation for A.

42. How does a 'preserved food' like frozen vegetables differ from a 'manufactured food' like jam?

- (A) Preserved food changes character substantially, while manufactured food does not.
- (B) Preserved food uses chemical preservatives, while manufactured food does not.
- (C) Preserved food has a shorter shelf-life than manufactured food.
- (D) Preserved food retains its character, while manufactured food loses it.

Ans :

(D) Preserved food retains its character, while manufactured food loses it.

The key difference lies in the change to the raw material's character. Preserved foods, like frozen vegetables, are processed in a way that does not substantially change their original character. In contrast, manufactured foods, like jam, lose the original characteristics of the raw product.

43. Match the food processing principle in Column I with its primary mechanism of action in Column II.

	Column I		Column II
1.	Application of heat	a.	Creates an acidic environment
2.	Removal of water	b.	Slows down microbial and enzymatic activity
3.	Lowering of temperature	c.	Kills or inactivates microorganisms
4.	Reduction of pH	d.	Inhibits microbial growth by dehydration

- (A) 1-b, 2-a, 3-d, 4-c
- (B) 1-c, 2-d, 3-b, 4-a
- (C) 1-d, 2-c, 3-a, 4-b
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

(B) 1-c, 2-d, 3-b, 4-a

Applying heat (e.g., pasteurization) kills microorganisms. Removing water (e.g., drying) inhibits their growth by dehydration. Lowering the temperature (e.g., refrigeration) slows down microbial and enzymatic action. Reducing pH (e.g., pickling) creates an acidic environment unsuitable for many microbes.

44. Which of the following pairs of a food processing career avenue and its description is INCORRECT?

Ans :

(C) Food Processing

Food processing is precisely defined as the set of methods and techniques used to transform raw ingredients into finished and semi-finished products. This encompasses a wide range of activities from simple washing and cutting to complex manufacturing processes that alter the food's form and properties.

34. Which factor is NOT typically associated with the spoilage of food?
- (A) Infestation by insects
 - (B) Degradation by enzymes
 - (C) Growth of microorganisms
 - (D) Fortification with vitamins

Ans :

(D) Fortification with vitamins

Fortification is the process of adding nutrients to enhance a food's value and is a method of food improvement, not a cause of spoilage. Food spoilage is caused by factors like pests, microorganisms, enzymes, improper temperature, light, and moisture, which lead to deterioration.

35. What is the primary goal of applying heat as a food preservation method?
- (A) To enhance the raw flavor of the food
 - (B) To reduce or eliminate microbial activity
 - (C) To increase the water content of the food
 - (D) To promote the growth of natural enzymes

Ans :

(B) To reduce or eliminate microbial activity

The application of heat, through methods like pasteurisation or canning, is a core principle of food preservation aimed at reducing or eliminating harmful microbial activity. Heat destroys bacteria, yeasts, and moulds, thereby preventing spoilage and making the food safe for long-term storage and consumption.

36. A home preserver makes mango pickle using salt, oil, and spices. Which classes of processed foods does this product fall into?
- (A) Minimally processed and Formulated food
 - (B) Food derivative and Functional food
 - (C) Preserved food and Manufactured food
 - (D) Medical food and Minimally processed food

Ans :

(C) Preserved food and Manufactured food

Pickles are a form of preserved food, as the method extends shelf life. They are also classified

as manufactured foods because the original characteristics of the raw mango are lost, and ingredients like salt, oil, and spices are used to create the final product.

37. According to the text, what is a significant aspect of food technology related to sustainability?
- (A) To avoid waste and utilise all food produced
 - (B) To increase the amount of food waste during production
 - (C) To use only non-renewable resources in food manufacturing
 - (D) To disregard the environmental impact of processing

Ans :

(A) To avoid waste and utilise all food produced
A significant aspect of modern food technology is promoting sustainability by aiming to avoid waste, save and utilize all food that is produced, and ensure safe and sustainable processing practices. This addresses the economic and environmental challenges of food loss.

38. Which of the following statements about the development of food technology is correct?
- (A) The canning process was invented by Louis Pasteur.
 - (B) Food technology's growth was hindered by world wars.
 - (C) Instant soup mixes were first developed for ancient civilizations.
 - (D) Pasteurisation was developed to destroy disease-producing organisms in milk.

Ans :

(D) Pasteurisation was developed to destroy disease-producing organisms in milk.

Louis Pasteur developed 'pasteurisation' specifically as a process for treating milk to destroy disease-producing organisms, which was a major step in ensuring microbiological safety. Canning was developed by Nicolas Appert, and world wars actually contributed to the growth of food technology.

39. Why are protein-rich foods like meat, fish, and dairy products known as 'High Risk Foods'?
- (A) Because they are difficult to cook properly
 - (B) Because they have a very long natural shelf life
 - (C) Because they are preferred by bacteria for growth
 - (D) Because they are always low in nutritional value

- (A) It is only useful for starting a small, home-based business.
- (B) It limits career options strictly to teaching and academia.
- (C) It is a shorter path to becoming a chef than culinary school.
- (D) It provides the most comprehensive grounding for jobs in large-scale units.

Ans :

(D) It provides the most comprehensive grounding for jobs in large-scale units.

Bachelor's and Master's degrees, along with research qualifications, provide the most thorough and comprehensive foundation for careers in the food industry, especially within large-scale units, research, training, and entrepreneurship. These advanced degrees offer in-depth knowledge and skills required for complex roles.

- 29.** Assertion (A): The demand for well-trained human resources in the Indian food industry is high.
Reason (R): There is an increasing consumer demand for processed, packed, and convenient foods with a prolonged shelf life.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion is true because the reason accurately explains the driving force. The growing consumer demand for processed, convenient, and shelf-stable foods directly fuels the expansion of the food industry, which in turn creates a high demand for well-trained professionals to manage production and innovation.

- 30.** In which department of a food industry would a food technologist work on modifying existing products and researching consumer markets?
- (A) Production Management
 - (B) Quality Assurance
 - (C) Research and Development (R&D)
 - (D) Marketing and Sales

Ans :

(C) Research and Development (R&D)

The Research and Development (R&D) department in a food industry is responsible for activities like modifying existing food products, developing new ones, researching consumer markets, and developing new technologies. This role is central to innovation and keeping the company competitive.

- 31.** Why is entrepreneurship considered a highly rewarding avenue in the field of food processing?
- (A) Because it requires minimal investment and no technical knowledge.
 - (B) Because government support, such as finances and training, is available.
 - (C) Because it is limited only to large, technology-intensive units.
 - (D) Because there is no competition from established brands in the market.

Ans :

(B) Because government support, such as finances and training, is available.

Entrepreneurship in food processing is a rewarding avenue partly because the government provides incentives and support through finances, training, infrastructure, and marketing facilities. This support, especially for women entrepreneurs, makes it easier for individuals to start their own enterprises, from small-scale to large-scale operations.

- 32.** All of the following are key segments of the Indian food industry EXCEPT:
- (A) Milk and milk products
 - (B) Snack foods and bakery products
 - (C) Fruit and vegetable products
 - (D) Textile and apparel manufacturing

Ans :

(D) Textile and apparel manufacturing

The key segments of the Indian food industry include milk products, snacks, bakery items, fruit and vegetable products, beverages, fish, and meat processing. Textile and apparel manufacturing belongs to a different industrial sector and is not a segment of the food industry.

- 33.** Which term refers to the set of methods used to convert raw ingredients into finished or semi-finished food products?
- (A) Food Spoilage
 - (B) Food Analysis
 - (C) Food Processing
 - (D) Food Consumption

- (A) Production Manager: Oversees the manufacturing process.
- (B) Quality Assurance: Ensures products meet safety standards.
- (C) Sensory Evaluation: Manages the financial aspects of projects.
- (D) Research and Development: Develops new food products.

Ans :

(C) Sensory Evaluation: Manages the financial aspects of projects.

Sensory Evaluation involves assessing the taste, smell, texture, and appearance of food products. Managing financial aspects falls under roles like Project Financing or general management, not sensory evaluation. The other pairs correctly describe the respective career functions in the food industry.

- 45.** Which factor has NOT contributed to the increased importance of food processing and technology?
- (A) A societal shift towards consuming only raw, unprocessed foods
 - (B) The desire to have seasonal foods all year round
 - (C) The need for convenient, ready-to-cook meals for working individuals
 - (D) The emergence of an agro-surplus situation in countries like India

Ans :

(A) A societal shift towards consuming only raw, unprocessed foods

The importance of food technology has grown due to factors like the need for year-round availability of seasonal foods, convenience, and managing agricultural surplus. A shift towards consuming only raw foods would decrease, not increase, the need for processing technology.

- 46.** What is the underlying principle that makes food processing essential for transforming bulky and sometimes inedible food materials?
- (A) To convert them into more useful, concentrated, and palatable forms
 - (B) To make them less stable and more difficult to transport
 - (C) To reduce their nutritional value and aesthetic appeal
 - (D) To increase their perishability and susceptibility to spoilage

Ans :

(A) To convert them into more useful, concentrated, and palatable forms

Food processing is essential for converting bulky, perishable, and sometimes inedible raw materials into forms that are more useful (e.g., flour from wheat), concentrated, shelf-stable, and palatable. This transformation enhances the value and utility of the food for consumers.

- 47.** Probiotics, which are foods that can have a beneficial effect on human health, are an example of which category of processed foods?

- (A) Food derivatives
- (B) Medical foods
- (C) Manufactured foods
- (D) Functional foods

Ans :

(D) Functional foods

Functional foods are defined as foods that can provide a beneficial effect on human health beyond basic nutrition. Probiotics, known for promoting gut health, are a prime example of this category, as they are consumed for a specific physiological benefit.

- 48.** What is the primary function of a food technologist working in 'Regulatory Affairs'?

- (A) Developing new recipes for food products
- (B) Ensuring products comply with food laws and labeling requirements
- (C) Conducting tasting panels for new food items
- (D) Managing the daily operations of the production line

Ans :

(B) Ensuring products comply with food laws and labeling requirements

A professional in regulatory affairs within the food industry is responsible for ensuring that all products, packaging, and labeling comply with government food laws and standards. This is a critical role for legal compliance and market access.

- 49.** Which statement best describes the scope of entrepreneurship in food processing in India?

- (A) It can range from low-investment units to highly technology-oriented enterprises.
- (B) It is limited to small-scale, household activities like making pickles.
- (C) It is discouraged by the government due to a lack of raw materials.
- (D) It is only possible for individuals with a doctoral degree in food science.

Ans :

(A) 1-b, 2-d, 3-a, 4-c

A Production Manager oversees manufacturing operations. Quality Assurance ensures standards are met. R&D develops new products. Marketing and Sales personnel are responsible for selling the products. This matching correctly aligns the roles with their functions within the food industry.

72. What does the term 'palatability' refer to in the context of food processing?

- (A) The safety of the food for consumption
- (B) The acceptability of a food's flavor and texture
- (C) The shelf life of the food product
- (D) The ease of transporting the food

Ans :

(B) The acceptability of a food's flavor and texture

Palatability refers to how pleasing a food is to the palate, encompassing its taste, texture, and overall sensory appeal. Food processing often aims to enhance palatability to make the product more enjoyable and desirable for the consumer.

73. Which statement best reflects the impact of globalization on the Indian food industry?

- (A) It has reduced the demand for food technologists in India.
- (B) It has closed Indian markets to foreign investments.
- (C) It has led to a focus on only traditional preservation methods.
- (D) It has opened avenues for employment at all levels.

Ans :

(D) It has opened avenues for employment at all levels.

Globalization, along with lifestyle changes and increased mobility, has increased the demand for various products, which has in turn been helpful in improving food security and opening up avenues for employment at all levels within the food processing industry.

74. Why is controlling the availability of oxygen a key principle in food preservation?

- (A) Oxygen is required for the growth of all beneficial bacteria.
- (B) It prevents the growth of aerobic microorganisms and oxidative enzymes.
- (C) It helps to increase the temperature of the food product.

(D) Oxygen enhances the nutritional value of all food items.

Ans :

(B) It prevents the growth of aerobic microorganisms and oxidative enzymes.

Many spoilage microorganisms (aerobic) and oxidative enzymes require oxygen to function and cause food deterioration. Therefore, controlling or removing oxygen through methods like vacuum packing helps to preserve the food by inhibiting these spoilage agents.

75. Assertion (A): The study of food technology includes knowledge of packaging and distribution. Reason (R): The goal of food technology is to deliver safe, nutritious, and convenient foods to the consumer.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The overall goal of delivering safe, nutritious, and convenient food (Reason R) necessitates that a food technologist understands the entire process, which includes not just processing but also packaging and distribution (Assertion A), to maintain product quality until it reaches the consumer.

76. The National Institute of Food Technology and Entrepreneurship Management (NIFTEM) is mentioned as an institute that offers:

- (A) Short-term certificate courses for cottage industries
- (B) Only undergraduate degrees in Food Science
- (C) Post-graduate courses in specialized aspects of Food Technology
- (D) Medical degrees with a focus on nutrition

Ans :

(C) Post-graduate courses in specialized aspects of Food Technology

NIFTEM is specifically cited as an institute that offers postgraduate courses in specialized aspects of Food Processing and Technology. This highlights its role in providing advanced education for professionals seeking to specialize within the field.

and slicing. Canned pineapple is a preserved food, as it undergoes preservation methods (like heating and sealing) that change its character more substantially than minimal processing.

- 56.** Match the professional activity in Column I with the relevant knowledge area in Column II.

	Column I		Column II
1.	Developing a new biscuit recipe	a.	Food Hygiene and Food Safety
2.	Assessing raw milk for bacteria	b.	Labelling and packaging
3.	Designing a wrapper for a candy bar	c.	Recipe Development
4.	Training staff on clean food handling	d.	Food as a material

- (A) 1-d, 2-c, 3-a, 4-b
 (B) 1-c, 2-d, 3-b, 4-a
 (C) 1-a, 2-b, 3-c, 4-d
 (D) 1-b, 2-a, 3-d, 4-c

Ans :

- (B) 1-c, 2-d, 3-b, 4-a

Developing a recipe falls under Recipe Development. Assessing raw material quality relates to Food as a material. Designing a wrapper is part of Labelling and packaging. Training staff on cleanliness is a core part of Food Hygiene and Food Safety.

- 57.** Which statement accurately describes the characteristics of non-perishable foods?
- (A) They spoil within one or two days, like milk.
 (B) They last for one to two weeks, like most vegetables.
 (C) They generally last for one year, like grains and pulses.
 (D) They require freezing to prevent immediate spoilage.

Ans :

- (C) They generally last for one year, like grains and pulses.

Non-perishable foods are defined as those that are shelf-stable and can generally last for one year without spoilage under proper storage conditions. Grains (rice, wheat) and pulses are classic examples of this category due to their low moisture content.

- 58.** Why is it important for food technologists to have skills in using Information Technology (IT)?

- (A) To manually record all data using pen and paper
 (B) To support contemporary product design and production
 (C) To avoid communication with other departments
 (D) To increase the cost of food manufacturing

Ans :

- (B) To support contemporary product design and production

Information Technology skills are essential for modern food technologists to support various aspects of their work, including product design, managing contemporary production systems, and data analysis. IT helps in streamlining processes, improving accuracy, and fostering innovation.

- 59.** Which of the following is NOT a listed career avenue in the food processing and technology sector?

- (A) Production Manager
 (B) Sensory Evaluation Specialist
 (C) Research and Development Scientist
 (D) Clinical Psychologist

Ans :

- (D) Clinical Psychologist

The listed career avenues include roles like Production Manager, Sensory Evaluation specialist, and R&D scientist. A Clinical Psychologist works in the field of mental health and is not a career directly within the food processing and technology sector.

- 60.** The application of scientific, socio-economic, and legal knowledge for the production, preservation, and distribution of food is best defined as:

- (A) Food Technology
 (B) Food Analysis
 (C) Food Science
 (D) Food Manufacturing

Ans :

- (A) Food Technology

Food Technology is defined as the application of a wide range of knowledge—scientific, socio-economic, and legal—to the entire food supply chain, including production, preservation, processing, and distribution. This definition encompasses the practical and applied nature of the field.

Ans :

(A) It can range from low-investment units to highly technology-oriented enterprises. The scope for self-employment in food technology is vast. It can be a low-key, low-investment unit (like making salted peanuts) or a highly technology-oriented and investment-intensive enterprise. This flexibility makes it an accessible and rewarding avenue for many aspiring entrepreneurs.

50. A food company is developing a new line of breakfast cereals and wants to ensure it is fortified with folic acid. This process is an example of:
- (A) Food spoilage
 - (B) Food deterioration
 - (C) Food fortification
 - (D) Food contamination

Ans :

(C) Food fortification

The process of adding folic acid to flour or cereals is a clear example of food fortification. The goal is to add a specific nutrient that might be lacking in the general diet to improve the nutritional quality of the staple food and prevent deficiencies.

51. The transformation of sugarcane into sugar is classified as which type of processed food?
- (A) A minimally processed food
 - (B) A manufactured food
 - (C) A formulated food
 - (D) A food derivative

Ans :

(D) A food derivative

A food derivative is a component obtained from a raw product through purification. The extraction and purification of sugar from sugarcane perfectly fits this definition, as it involves isolating a specific component from the original raw material.

52. Which of the following is a primary reason for the spoilage of fresh fruits and vegetables even after harvesting?
- (A) The immediate halt of all biological processes.
 - (B) The activity of oxidative enzymes that continue to metabolise.
 - (C) A sudden increase in their water content.
 - (D) The spontaneous generation of preservatives.

Ans :

(B) The activity of oxidative enzymes that continue to metabolise.

After harvesting, oxidative enzymes present in fresh fruits and vegetables continue their metabolic

activity, using oxygen to break down compounds. This ongoing enzymatic action is a primary cause of spoilage and quality deterioration, reducing the shelf life of the produce.

53. The process of converting oil to vanaspati is known as:
- (A) Pasteurisation
 - (B) Hydrogenation
 - (C) Fermentation
 - (D) Dehydration

Ans :

(B) Hydrogenation

The conversion of liquid vegetable oil into solid or semi-solid vanaspati is achieved through a chemical process called hydrogenation. This process modifies the fat structure and is an example of further processing a food derivative.

54. Assertion (A): Food technologists today are challenged to produce foods suitable for the health needs of consumers.
Reason (R): There is increasing prevalence of diseases like diabetes and a growing consumer concern for wellness.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The challenge for modern food technologists (Assertion) is directly driven by the reason provided. The rising prevalence of lifestyle diseases and a greater focus on wellness have created consumer demand for healthier food options, compelling the industry to innovate and produce suitable products.

55. All of the following are examples of minimally processed foods EXCEPT:
- (A) Cleaned and trimmed spinach
 - (B) Sliced apples
 - (C) Shelled peas
 - (D) Canned pineapple

Ans :

(D) Canned pineapple

Minimally processed foods are processed as little as possible, using methods like cleaning, cutting,

Ans :

(D) A background in arts is more important than a science background.
Food technology is a science-based field. Therefore, a strong foundation in sciences like chemistry, biology, and physics is essential for a career in this area. While creativity is important, a science background is fundamental, making the statement incorrect.

67. An entrepreneur wants to start a small business making and selling dehydrated fruit slices. This venture is an example of:
- (A) A high-investment, technology-intensive unit
 - (B) A low-key technology and low-investment unit
 - (C) A business focused on non-perishable food
 - (D) A functional food manufacturing enterprise

Ans :

(B) A low-key technology and low-investment unit

A business making dehydrated products is given as an example of a low-key technology and low-investment unit. Dehydration is a relatively simple preservation technique that does not necessarily require massive capital or complex machinery, making it suitable for small-scale entrepreneurship.

68. Which of the following career paths in food technology primarily involves ensuring products meet specified standards through testing and monitoring?
- (A) Quality Assurance
 - (B) Marketing and Sales
 - (C) Project Financing
 - (D) Human Resource Management

Ans :

(A) Quality Assurance

Quality Assurance (QA) is the function dedicated to ensuring that food products consistently meet established standards of quality and safety. This involves systematic testing, monitoring, and implementation of control procedures throughout the production process.

69. Why has the need for food processing increased with the rise of an agro-surplus economy in India?
- (A) Because there is less food available to be processed
 - (B) To manage and prevent the spoilage of excess agricultural produce

(C) Because consumers have stopped eating processed foods

(D) To decrease the variety of food products in the market

Ans :

(B) To manage and prevent the spoilage of excess agricultural produce

An agro-surplus country produces more agricultural goods than it can immediately consume. This creates a critical need for storage and processing to preserve the surplus produce, prevent spoilage, and add value, thus making it available for longer periods and in different forms.

70. What is a key difference between minimally processed foods and formulated foods?
- (A) Minimally processed foods use many ingredients, while formulated foods use one.
 - (B) Minimally processed foods are shelf-stable for years, while formulated foods are not.
 - (C) Minimally processed foods retain quality, while formulated foods are new products.
 - (D) Minimally processed foods are always cooked, while formulated foods are raw.

Ans :

(C) Minimally processed foods retain quality, while formulated foods are new products.

Minimally processed foods are processed as little as possible to retain the quality of the fresh food. In contrast, formulated foods are created by mixing and processing various ingredients to result in entirely new products like bread or biscuits, where the original characteristics are transformed.

71. Match the career avenue in Column I with its primary responsibility in Column II.

	Column I		Column II
1.	Production Manager	a.	Develops new food products and technologies
2.	Quality Assurance	b.	Oversees the food manufacturing operations
3.	R&D	c.	Promotes and sells the finished products
4.	Marketing and Sales	d.	Ensures products meet safety and quality standards

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-a, 2-c, 3-d, 4-b
- (C) 1-c, 2-a, 3-b, 4-d
- (D) 1-d, 2-b, 3-c, 4-a

- 61.** Assertion (A): Initially, foods were processed primarily to improve their digestibility and palatability.
Reason (R): Early processing methods like drying and preserving were developed to ensure a continuous supply of food.
- (A) Both A and R are true, and R is the correct explanation of A.
(B) Both A and R are true, but R is not the correct explanation of A.
(C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(B) Both A and R are true, but R is not the correct explanation of A.

Both statements are true and reflect the initial reasons for food processing. However, ensuring a continuous supply (Reason R) is a separate, equally important goal alongside improving digestibility and palatability (Assertion A), rather than being the direct explanation for it. They are parallel motivations.

- 62.** Which of the following is a direct example of a 'Food Product Development' skill?
- (A) Knowing the seasonal availability of oranges.
(B) Understanding the chemical properties of salt.
(C) Accurately measuring flour for a single cake.
(D) Testing a new sauce recipe for a marketable product.

Ans :

(D) Testing a new sauce recipe for a marketable product.

Food Product Development involves activities like knowledge of product specifications and testing it against those specifications. Testing a new sauce to see if it's marketable fits this description, while the other options relate to 'Food as a material' or 'Recipe Development'.

- 63.** The addition of Vitamin A and D to milk and oils is an example of what process?
- (A) Food spoilage
(B) Food adulteration
(C) Food fortification
(D) Food contamination

Ans :

(C) Food fortification

Adding Vitamin A and D to commonly consumed items like milk and oils is a classic example of

food fortification. This process is done to enhance the nutritional value of the food and help prevent deficiencies of these specific vitamins in the population.

- 64.** What is the main advantage of cottage-scale food processing activities like making papads and pickles?
- (A) They utilize local raw materials and can be a source of local employment.
(B) They require large financial investments and advanced technology.
(C) They can be marketed globally without any quality checks.
(D) They result in products with a very short shelf life.

Ans :

(A) They utilize local raw materials and can be a source of local employment.

Household or cottage-scale food processing, such as making papads and pickles, has traditionally been a way to utilize local produce and provide a source of income and employment within the community. These activities are often low-investment and serve local markets.

- 65.** In food processing, what does 'shelf life' refer to?
- (A) The time taken to cook a food product
(B) The length of time a food may be stored before it spoils
(C) The nutritional value of the food product
(D) The total cost of the raw materials used

Ans :

(B) The length of time a food may be stored before it spoils

'Shelf life' refers to the duration for which a food product can be stored before it becomes unfit for consumption due to spoilage, deterioration of quality, or safety concerns. Extending shelf life is a primary objective of many food processing and preservation techniques.

- 66.** Which of the following statements about career preparation in food technology is incorrect?
- (A) A Bachelor's degree provides a comprehensive grounding for jobs.
(B) Short-term certificate courses are suitable for self-employment.
(C) Specialization is possible in areas like beverages or dairy products.
(D) A background in arts is more important than a science background.

- 77.** A food manufacturer adds iodised salt to their line of savory snacks. This action addresses which major objective of food processing?
- (A) Improving food security by preventing deficiencies
 - (B) Decreasing the overall portability of the product
 - (C) Reducing the palatability to lower consumption
 - (D) Shortening the product's established shelf life

Ans :

- (A) Improving food security by preventing deficiencies

Using iodised salt is an act of fortification designed to ensure consumers meet their minimum dietary requirement for iodine. This contributes to public health and food security by preventing nutritional deficiency disorders on a large scale through a staple or commonly consumed food.

- 78.** Which of the following correctly pairs a historical figure with their major contribution to food technology?
- (A) Nicolas Appert - Pasteurisation
 - (B) Louis Pasteur - Canning
 - (C) Nicolas Appert - Canning
 - (D) Louis Pasteur - Dehydration

Ans :

- (C) Nicolas Appert - Canning

Nicolas Appert is credited with the development of the canning process in 1810, which was a pivotal event in food preservation. Louis Pasteur is known for his work on spoilage and the development of pasteurisation. The other options incorrectly pair the figures and their contributions.

- 79.** What is the primary function of developing product specifications in food product development?
- (A) To ensure every product is unique and different from the last
 - (B) To provide a standard for quality that the final product must meet
 - (C) To make the production process as complicated as possible
 - (D) To list ingredients without mentioning their quantities

Ans :

- (B) To provide a standard for quality that the final product must meet

Product specifications are detailed descriptions of the desired characteristics of a final product,

including its ingredients, dimensions, quality, and sensory attributes. They serve as a crucial benchmark for quality control, ensuring that the manufactured product consistently meets the intended standard.

- 80.** Which term best describes the physical, chemical, and biological degradation of food, rendering it unfit for consumption?
- (A) Food Deterioration
 - (B) Food Fortification
 - (C) Food Formulation
 - (D) Food Manufacturing

Ans :

- (A) Food Deterioration

Food deterioration is the process associated with spoilage, development of off-flavors, discoloration, and loss of nutritional value due to physical, chemical, and biological factors. This process ultimately reduces the food's quality and makes it unsafe or unfit to eat.

- 81.** A key skill listed under 'Food as a material' for a food technologist is the assessment of:
- (A) Industrial manufacturing systems and their control
 - (B) The sensory properties of the final product
 - (C) The packaging and labeling of the product
 - (D) The quality of raw foods and ingredients

Ans :

- (D) The quality of raw foods and ingredients

The assessment of the quality of raw foods and ingredients is a fundamental skill under the 'Food as a material' category. The quality of the final product is directly dependent on the quality of the starting materials, making this an essential initial step in food processing.

- 82.** Why is knowledge of 'product specifications' essential for a professional in Food Product Development?
- (A) It helps in designing a product without any quality standards.
 - (B) It allows for random changes in the recipe during production.
 - (C) It provides a clear target for quality and consistency.
 - (D) It is only required for the marketing team's advertisements.

Ans :

- (C) It provides a clear target for quality and consistency.

facilitates it but doesn't solely cause it to be low-investment.

- 127.** Which of the following statements about the role of a food technologist are correct?
1. They are involved in developing new products.
 2. They are responsible for ensuring food safety and quality.
 3. They may work on improving quality control procedures.
 4. They exclusively work on packaging design and marketing.
- (A) 1 and 2 only
(B) 3 and 4 only
(C) 1, 2, and 3 only
(D) 2, 3, and 4 only

Ans :

(C) 1, 2, and 3 only

A food technologist's role is multifaceted, covering new product development, ensuring safety and quality, and improving control procedures. Their role is not exclusively limited to packaging and marketing; those are often separate, specialized functions, though a technologist provides input.

- 128.** Which of these is NOT listed as a key term at the end of the chapter?
- (A) Food spoilage
(B) Food preservation
(C) Food product development
(D) Food marketing

Ans :

(D) Food marketing

The key terms listed at the end of the chapter are: Food processing, food technology, food preservation, food science, food spoilage, and food product development. Food marketing is not explicitly listed as a key term.

- 129.** A food company wants to create a fruit juice that retains most of its fresh flavor and nutrients but has a longer shelf life. This challenge would be addressed by professionals in:
- (A) Food Science and Technology
(B) Agricultural Economics
(C) Human Resource Management
(D) Corporate Finance

Ans :

(A) Food Science and Technology

This task directly involves the principles of food science (understanding changes in flavor and nutrients) and food technology (applying

preservation techniques to extend shelf life while maintaining quality). It is a core challenge for professionals in this specific field.

- 130.** Why is 'costing' an important step in the practical for preparing a processed food product?
- (A) To ensure the product is as expensive as possible
(B) To understand the profitability and pricing of the product
(C) To determine the product's final color and texture
(D) To increase the time required for food preparation

Ans :

(B) To understand the profitability and pricing of the product

Costing is essential to understand the financial viability of a product. By calculating the total cost of production, one can determine a suitable selling price, assess potential profitability, and make informed business decisions, a key aspect of food entrepreneurship.

- 131.** Which of the following is NOT a fundamental concept for preventing food spoilage?
- (A) Application of heat
(B) Removal of water
(C) Lowering of temperature
(D) Increasing the pH

Ans :

(D) Increasing the pH

The basic concepts for preventing spoilage include applying heat, removing water, lowering temperature, and reduction of pH (making it more acidic). Increasing the pH would make the environment more alkaline, which can favor the growth of certain spoilage bacteria.

- 132.** A professional whose work involves advising on project financing and conducting project appraisals for new food ventures acts as a:
- (A) Production Manager
(B) Sensory Panelist
(C) Consultant
(D) Quality Controller

Ans :

(C) Consultant

The roles of project financing and project appraisal are listed as avenues for consultancy. A consultant provides specialized expert advice to businesses on specific aspects like financial viability and

A key responsibility within the food industry, particularly in Research and Development (R&D), is to modify existing products, develop new ones, and research consumer markets to ensure products meet current demands and preferences, driving innovation and maintaining a competitive edge.

- 88.** Which of the following is NOT a specialization branch mentioned for food technologists?
- (A) Beverages and dairy products
 - (B) Meat and poultry
 - (C) Civil engineering and architecture
 - (D) Stabilisers, preservatives, and colours

Ans :

(C) Civil engineering and architecture
Food technologists can specialize in various branches like beverages, dairy, meat, seafood, fats and oils, and food additives. Civil engineering and architecture are distinct professional fields and are not specialization branches within food technology.

- 89.** Why is it essential for a food technologist to have knowledge of 'Good Manufacturing Practices' (GMP)?
- (A) To ensure the aesthetic design of the factory
 - (B) To guarantee the safety and quality of manufactured food
 - (C) To manage the company's financial accounts
 - (D) To create marketing campaigns for new products

Ans :

(B) To guarantee the safety and quality of manufactured food
Good Manufacturing Practices (GMP) are a set of guidelines and procedures that ensure food products are consistently produced and controlled according to quality standards. Knowledge of GMP is crucial for a food technologist to ensure the safety, quality, and consistency of the manufactured food.

- 90.** What is the primary role of a 'Production Manager' in a food processing unit?
- (A) To develop new recipes in the laboratory
 - (B) To oversee the day-to-day manufacturing of food products
 - (C) To conduct sensory evaluation panels with consumers
 - (D) To design the packaging and labels for the products

Ans :

(B) To oversee the day-to-day manufacturing of food products

A Production Manager is a key figure in a food processing unit whose primary responsibility is to oversee the entire production process. This includes managing the workflow, personnel, and equipment to ensure efficient and timely manufacturing of food products according to specifications.

- 91.** Assertion (A): The scope for professionals in Food Technology and Food Processing is encouraging and rewarding.
Reason (R): The field requires the application of science and technology across a diverse range of specializations for processing, preservation, and distribution of food.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that the field has a rewarding scope is true because, as the reason states, it is a diverse and scientific field. The wide application of science and technology in various specializations creates numerous career opportunities, making the profession both challenging and rewarding.

- 92.** Which of the following is NOT listed as a work setting for food technologists?
- (A) Quality control departments in hotels and hospitals
 - (B) Law firms specializing in corporate litigation
 - (C) Labeling and packaging industries
 - (D) Fruit and vegetable processing units

Ans :

(B) Law firms specializing in corporate litigation
Food technologists work in a variety of settings including food industries, quality control labs, hotels, hospitals, packaging companies, and processing units for different food categories. Law firms are not a typical work setting for a food technologist, though they might consult on regulatory matters.

3.	Manufactured food	c.	Has a beneficial effect on human health
4.	Food derivative	d.	A component obtained from a raw product

- (A) 1-b, 2-d, 3-a, 4-c
 (B) 1-d, 2-c, 3-b, 4-a
 (C) 1-c, 2-a, 3-b, 4-d
 (D) 1-a, 2-b, 3-d, 4-c

Ans :

- (C) 1-c, 2-a, 3-b, 4-d

Functional foods (like probiotics) have beneficial health effects. Medical foods (like low-sodium salt) are for disease management. Manufactured foods (like pickles) transform raw ingredients. Food derivatives (like sugar from sugarcane) are components extracted from raw products.

- 105.** Which factor is NOT listed as influencing microbial growth in food?
 (A) Nutrient availability
 (B) Moisture and pH levels
 (C) Presence of inhibiting substances
 (D) The color of the packaging

Ans :

- (D) The color of the packaging

Factors influencing microbial growth include nutrient availability, moisture, pH, oxygen levels, temperature, and the presence or absence of inhibitors like antibiotics. While packaging is crucial for preservation, its color is not a direct factor that influences microbial growth itself.

- 106.** A professional who researches consumer markets to develop new food technologies is working in:
 (A) Quality Control
 (B) Research and Development
 (C) Production Management
 (D) Project Financing

Ans :

- (B) Research and Development

Research and Development (R&D) in the food industry involves not only creating new products but also researching consumer markets and developing new technologies. This function is essential for a company to innovate and stay aligned with consumer trends and technological advancements.

- 107.** The practical on designing a processed food product includes all the following steps EXCEPT:

- (A) Preparing a label for the product
 (B) Writing the recipe and method of preparation
 (C) Conducting a global marketing survey
 (D) Doing a cost analysis of the product

Ans :

- (C) Conducting a global marketing survey

The practical outlines steps like preparing the product, costing, evaluating it, and creating a label. It is a hands-on project focused on the development of a single product on a small scale. Conducting a global marketing survey is a complex task for a large-scale commercial launch, not this practical.

- 108.** According to the practical described, what information should be listed first in the 'list of ingredients' on a food label?
 (A) The ingredient used in the largest proportion
 (B) The ingredient used in the smallest proportion
 (C) The ingredients listed in alphabetical order
 (D) The most expensive ingredient used in the product

Ans :

- (A) The ingredient used in the largest proportion
 The practical specifies that the label information should include a list of ingredients in descending order of the proportions used. This is a standard food labeling regulation, meaning the ingredient that makes up the largest part of the product by weight must be listed first.

- 109.** What is the primary purpose of evaluating a prepared food product for taste, texture, and colour in the practical?
 (A) To determine its exact nutritional content
 (B) To assess its acceptability to the consumer
 (C) To calculate the energy consumed during preparation
 (D) To fulfill a legal requirement for food safety

Ans :

- (B) To assess its acceptability to the consumer
 Evaluating sensory attributes like taste, texture, and colour is done to assess the product's acceptability. These are key factors that determine whether a consumer will enjoy and purchase the product. The practical aims to teach students how to create a product that is not just preserved but also desirable.

- 110.** The practical suggests using locally available fruits, vegetables, or even peels for making a preserved product. What is the main advantage of this approach?

(D) Quality Certification Consultancy

A consultant specializing in quality certification, such as for ISO standards, helps companies implement and maintain quality management systems to meet the requirements for certification. This is a specialized role focused on standards and auditing, not direct production or marketing.

99. Why is it beneficial for a food technologist to have skills in both 'Food as a material' and 'Recipe Development'?

- (A) To ensure they can only work in either production or the kitchen
- (B) To develop a holistic understanding from raw material to final dish
- (C) To focus only on the cost of ingredients and ignore quality
- (D) To create recipes that are not safe for human consumption

Ans :

(B) To develop a holistic understanding from raw material to final dish

Having skills in both areas allows a professional to develop a comprehensive, holistic understanding of the food production process. They can select the best raw materials ('Food as a material') and know how to best use them to create an innovative and high-quality final product ('Recipe Development').

100. An entrepreneur starts a venture to produce and market fortified wheat flour with added iron and folic acid. This enterprise combines food processing with:

- (A) Public health nutrition
- (B) Clinical dietetics
- (C) Dairy technology
- (D) Meat processing

Ans :

(A) Public health nutrition

Fortifying a staple food like wheat flour with essential micronutrients is a key strategy in public health nutrition to combat widespread deficiencies like anemia. This venture, therefore, combines food processing technology with a public health goal.

101. Which of the following is NOT a valid reason why food processing is important?

- (A) It extends the shelf life of perishable items.
- (B) It adds value by increasing convenience.
- (C) It reduces the need for food safety standards.
- (D) It can improve the palatability of raw materials.

Ans :

(C) It reduces the need for food safety standards. Food processing, especially on a large scale, increases the complexity of the food chain and introduces new potential hazards. Therefore, it heightens, rather than reduces, the need for stringent food safety standards and quality control measures to protect consumer health.

102. The development of ready-to-cook items and instant soup mixes in the 20th century was specially catered to the needs of:

- (A) Military personnel during wars
- (B) Working women
- (C) Astronauts in space
- (D) Athletes requiring high-energy foods

Ans :

(B) Working women

The text explicitly states that products like instant soup mixes and ready-to-cook items were developed in the 20th century to cater to the needs of working women, who required convenient meal solutions due to changing lifestyles and time constraints.

103. How does the application of heat, such as in pasteurisation, contribute to food safety?

- (A) By destroying disease-producing microorganisms
- (B) By adding beneficial bacteria to the food
- (C) By increasing the food's natural enzyme activity
- (D) By lowering the pH of the food product

Ans :

(A) By destroying disease-producing microorganisms

The application of controlled heat, as in pasteurisation, is a critical food safety measure because it effectively destroys harmful, disease-producing microorganisms (pathogens) like bacteria. This makes the food, such as milk, much safer for human consumption without significantly altering its nutritional quality.

104. Match the type of processed food in Column I with the correct description in Column II.

	Column I		Column II
1.	Functional food	a.	Used for dietary management of a disease
2.	Medical food	b.	Raw ingredients transformed into a new product

Product specifications outline the precise characteristics a finished product must have. This knowledge is essential as it provides a clear, measurable target for quality, ensuring that the final product is consistent and meets both regulatory and consumer expectations.

- 83.** Which statement accurately describes a necessary skill for 'Recipe Development'?
- (A) Ignoring consumer perceptions when designing new products.
- (B) Following hygiene and safety norms during food production.
- (C) Using estimations instead of accurately measuring ingredients.
- (D) Avoiding any innovation in product design or preparation.

Ans :

(B) Following hygiene and safety norms during food production.

Following strict hygiene and safety norms during food production is a critical skill for recipe development. This ensures that the product is not only palatable and well-designed but also safe for consumption, which is a non-negotiable aspect of food preparation at any scale.

- 84.** Match the skill category in Column I with the specific skill in Column II.

	Column I		Column II
1.	Food as a material	a.	Expertise in cooking
2.	Food Product Development	b.	Knowledge of nutritional content and analysis
3.	Recipe Development	c.	Use of Information Technology for production
4.	General Skill	d.	Assessment by sensory methods

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-a, 2-c, 3-d, 4-b
- (C) 1-d, 2-a, 3-b, 4-c
- (D) 1-c, 2-b, 3-a, 4-d

Ans :

(A) 1-b, 2-d, 3-a, 4-c

Knowledge of nutritional content relates to 'Food as a material'. Sensory assessment is part of 'Food Product Development'. Expertise in cooking is crucial for 'Recipe Development'. Using IT for

production is a general skill applicable across the field.

- 85.** A food technologist specializing in 'Food Product Development' would be involved in all the following activities EXCEPT:

- (A) Testing a product against its specifications
- (B) Assessing products using sensory methods
- (C) Overseeing industrial manufacturing systems
- (D) Determining the seasonal availability of raw food

Ans :

- (D) Determining the seasonal availability of raw food

Determining the seasonal availability of raw food is a skill related to 'Food as a material,' which is the initial stage. Food Product Development focuses on the later stages, such as creating the product, testing it through sensory methods, and managing industrial production systems.

- 86.** To pursue higher education in food technology, what is the required educational qualification after the 10+2 level?

- (A) A diploma in fine arts
- (B) A degree in commerce
- (C) A Bachelor's degree in Home Science or a related science field
- (D) A certificate course in computer applications

Ans :

- (C) A Bachelor's degree in Home Science or a related science field

For advanced careers and higher education in food technology, one typically needs to complete a Bachelor's degree (B.Sc.) in Home Science or a related science field like Nutrition or Food Technology after the 10+2 level. This provides the necessary scientific foundation.

- 87.** Which of the following is a key responsibility of a professional working in the food industry?

- (A) Increasing the cost of production without ensuring profitability
- (B) Focusing solely on research while ignoring food safety
- (C) Developing products that have a very short shelf life
- (D) Modifying products and researching consumer markets

Ans :

- (D) Modifying products and researching consumer markets

- (A) It ensures the product is difficult and expensive to make.
- (B) It promotes the use of imported and exotic ingredients.
- (C) It guarantees the product will have a short shelf life.
- (D) It encourages sustainability and reduces food waste.

Ans :

(D) It encourages sustainability and reduces food waste.

Using locally available materials, including parts that are often discarded like peels, promotes the principles of sustainability and waste reduction. This approach is cost-effective and environmentally conscious, aligning with modern food technology goals.

- 111.** Which of the following is a correct step in preparing a label for a processed food product as per the practical?
- (A) The 'Best Before' date is optional for all products.
 - (B) The name and address of the manufacturer must be included.
 - (C) The list of ingredients should be in ascending order of use.
 - (D) Storage instructions are not necessary for preserved foods.

Ans :

(B) The name and address of the manufacturer must be included.

The practical specifies that the label must include the name and address of the manufacturer. This is crucial for traceability and consumer information. The 'Best Before' date, descending ingredient list, and storage instructions are also essential components of proper food labeling.

- 112.** Consider the following statements about skills required for a food technology professional:
1. Knowledge of food chemistry is essential for understanding food properties.
 2. Sensory evaluation skills are needed to assess product acceptability.
 3. Skills in adapting recipes are part of recipe development.
 4. Knowledge of industrial practices is not required for large-scale production.

Which of the above statements are correct?

- (A) 1 and 4 only
- (B) 2 and 3 only

- (C) 1, 2, and 3
- (D) 2, 3, and 4

Ans :

- (C) 1, 2, and 3

Knowledge of food chemistry, sensory evaluation skills, and the ability to adapt recipes are all crucial skills for a food technologist. Knowledge of industrial practices is absolutely required for large-scale production, making statement 4 incorrect. Therefore, statements 1, 2, and 3 are correct.

- 113.** Assertion (A): Food spoilage can be caused by naturally present enzymes in food.
Reason (R): Soon after harvesting, enzymes in plant sources continue to alter food quality.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that enzymes cause spoilage is true. The reason correctly explains this by stating that enzymes in plant sources remain active after harvesting and alter the food's quality, leading to deterioration. This enzymatic activity is a major cause of spoilage in fresh produce.

- 114.** According to FSSAI standards mentioned, which of the following staple foods can be fortified?
- (A) Only salt and wheat flour
 - (B) Only milk and sugar
 - (C) Only fruits and vegetables
 - (D) Salt, wheat flour, milk, and oats

Ans :

- (D) Salt, wheat flour, milk, and oats

The text explicitly states that the Food Safety and Standards Authority of India (FSSAI) has laid down standards for the fortification of staple foods like salt, wheat flour, milk, and oats, highlighting the importance of this public health measure.

- 115.** An individual with expertise in cooking, knowledge of ingredient properties, and skills in designing and adapting recipes would be best suited for which stage of food production?

- 93.** How does the rise of foreign investments and multinational companies in India impact the scope for food technologists?
- (A) It reduces the number of available jobs in the sector.
 - (B) It limits opportunities only to research and development roles.
 - (C) It shifts the focus exclusively to traditional, non-processed foods.
 - (D) It creates ample scope in both Indian and foreign organizations.

Ans :

(D) It creates ample scope in both Indian and foreign organizations.

With globalization, foreign investments and the entry of multinational companies have expanded the food industry in India. This creates ample opportunities for food technologists in a wide range of roles within both domestic and international organizations setting up facilities in the country.

- 94.** Which statement accurately describes the potential for self-employment in food technology?
- (A) It can be a very low-key, low-investment unit.
 - (B) It is only possible with a very large, investment-intensive setup.
 - (C) It requires a government job before starting a private venture.
 - (D) There is no government support available for entrepreneurs.

Ans :

(A) It can be a very low-key, low-investment unit. Self-employment in food technology is highly flexible. It can range from a very low-key, low-investment unit, such as making pickles or dehydrated snacks, to a large, technology-intensive operation. This accessibility makes it a viable career path for many individuals with varying levels of capital.

- 95.** According to the text, which of the following is NOT a primary responsibility of a food technologist in the industry?
- (A) Purchase and storage of raw materials
 - (B) Processing and manufacture of food
 - (C) Providing medical counseling to consumers
 - (D) Quality monitoring and management

Ans :

(C) Providing medical counseling to consumers
A food technologist's expertise is useful in departments like purchase, processing, quality

monitoring, and R&D. Providing medical counseling is the role of a healthcare professional, like a dietitian or doctor, not a food technologist.

- 96.** Consider the following statements regarding the Indian food industry:
- 1. It is the largest manufacturing industry in the world.
 - 2. It contributes nearly 6 per cent to India's GDP.
 - 3. The processed food segment accounts for 25 per cent of the industry.
 - 4. Its growth rate is estimated to be around 5 per cent.

Which of the statements are correct?

- (A) 1 and 4 only
- (B) 2 and 3 only
- (C) 1, 2, and 3
- (D) 2, 3, and 4

Ans :

(B) 2 and 3 only

The text states the Indian food industry ranks 5th in size (not largest), contributes nearly 6% of GDP, is estimated to grow at 20% (not 5%), and the processed food segment accounts for 25%. Therefore, only statements 2 and 3 are correct.

- 97.** The development of a new type of low-fat biscuit by modifying an existing recipe falls under which key activity?
- (A) Project Financing
 - (B) Quality Assurance
 - (C) Product Development
 - (D) Technical Marketing

Ans :

(C) Product Development

Product development is the specific area concerned with creating new products or modifying existing ones. Developing a new low-fat biscuit involves research, recipe modification, and testing, which are all core activities of the product development process in a food company.

- 98.** Which of the following career avenues involves assessing and certifying that a company's processes meet international quality standards like ISO 9000?
- (A) Production Management
 - (B) Sensory Evaluation
 - (C) Project Appraisal
 - (D) Quality Certification Consultancy

Ans :

- 121.** A career that involves visiting food manufacturing plants to check for compliance with quality and safety standards is best described as:
- (A) Food Auditor
 - (B) Sensory Panelist
 - (C) Recipe Developer
 - (D) Marketing Executive

Ans :

- (A) Food Auditor

A Food Auditor is a professional who conducts systematic examinations of a food safety program to ensure that a manufacturer is complying with established quality and safety standards. This role is crucial for certification and regulatory compliance.

- 122.** The research conducted by Louis Pasteur in 1864 focused on the spoilage of which product?
- (A) Bread
 - (B) Milk
 - (C) Wine
 - (D) Meat

Ans :

- (C) Wine

The text specifies that Louis Pasteur's landmark research in 1864, which led to a scientific understanding of spoilage, was initiated by studying the spoilage of wine and describing how to prevent it.

- 123.** Which of the following is an accurate statement regarding the classification of foods by perishability?
- (A) Grains and pulses are considered perishable foods.
 - (B) Fruits and vegetables are non-perishable foods.
 - (C) Fish and meat are semi-perishable foods.
 - (D) Root crops like onions are semi-perishable.

Ans :

- (D) Root crops like onions are semi-perishable.

The text classifies foods based on how quickly they spoil. Grains are non-perishable, fruits are semi-perishable, and fish is perishable. Root crops like onions and potatoes are correctly identified as semi-perishable because they can last for a few weeks.

- 124.** What is the main objective of creating "formulated foods" like biscuits or cakes?
- (A) To process raw ingredients as little as possible
 - (B) To obtain a single component from a raw food

- (C) To mix ingredients to create a new, shelf-stable product
- (D) To manage a specific disease or health condition

Ans :

- (C) To mix ingredients to create a new, shelf-stable product

Formulated foods are defined by the process of mixing and processing individual ingredients to create a completely new product with specific characteristics and relative shelf stability. This is distinct from minimal processing, extraction of derivatives, or creating medical foods.

- 125.** The expertise of food technologists is useful in various departments within a food company. Which department is responsible for ensuring the product reaches consumers effectively?
- (A) Distribution channels management
 - (B) Research and Development
 - (C) Quality Monitoring
 - (D) Purchase and storage

Ans :

- (A) Distribution channels management

While technologists contribute to many areas, the management of distribution channels is the specific function that ensures the finished product is effectively transported from the manufacturing plant to the final consumer while maintaining its quality.

- 126.** Assertion (A): Self-employment in food processing can be a low-investment venture.
Reason (R): The government provides incentives and financial support for entrepreneurs in the food sector.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

- (B) Both A and R are true, but R is not the correct explanation of A.

Both statements are true. It is possible to start a low-investment food business, and the government does provide support. However, the reason for it being low-investment is the nature of some processes (like making pickles), not just the government support. Government support

- (A) Food as a material
- (B) Food Product Development
- (C) Recipe Development
- (D) Quality Control

Ans :

- (C) Recipe Development

These skills—expertise in cooking, understanding ingredients, and designing or adapting recipes—are the core competencies listed under the ‘Recipe Development’ stage. This stage focuses on the practical creation of the food item itself, distinct from raw material assessment or industrial scaling.

- 116.** What is the primary benefit of converting bulky and perishable food materials into more concentrated and shelf-stable forms?
- (A) It makes the food more useful and reduces post-harvest losses.
 - (B) It makes the food more difficult to store and transport.
 - (C) It increases the likelihood of spoilage and waste.
 - (D) It significantly decreases the palatability of the food.

Ans :

- (A) It makes the food more useful and reduces post-harvest losses.

Processing bulky and perishable foods into concentrated, shelf-stable forms (like juice concentrate from fruit or flour from grain) makes them easier to store and transport, significantly reduces spoilage and waste, and makes them more useful for a wider range of applications.

- 117.** Which of the following is NOT a primary reason for the increased demand for processed foods in modern times?
- (A) Changes in lifestyle and increasing mobility
 - (B) A preference for foods that require long preparation times
 - (C) Higher per capita incomes and better purchasing power
 - (D) Globalization and exposure to different cuisines

Ans :

- (B) A preference for foods that require long preparation times

The demand for processed foods has been driven by a need for convenience and reduced preparation time, not a preference for foods that take a long time to cook. Factors like busy lifestyles, higher

incomes, and globalization have all contributed to this trend.

- 118.** The process of treating milk with heat to destroy disease-producing organisms is known as:
- (A) Canning
 - (B) Fortification
 - (C) Hydrogenation
 - (D) Pasteurisation

Ans :

- (D) Pasteurisation

Pasteurisation is the specific process, developed by Louis Pasteur, of treating milk or other liquids with mild heat to eliminate pathogens and extend shelf life. It is a cornerstone of microbiological food safety.

- 119.** A student prepares a jam for a practical. As part of the evaluation, they calculate the cost of ingredients, energy, labor, and packaging. This entire process is known as:
- (A) Sensory evaluation
 - (B) Shelf life study
 - (C) Costing
 - (D) Labeling

Ans :

- (C) Costing

Costing is the process of calculating the total expenses incurred in producing a product. The practical requires students to determine the cost of materials, energy, labor, and packaging to understand the financial aspect of food production.

- 120.** Why is it important for a student in the food processing practical to identify the preservatives used?
- (A) To understand how shelf life is extended
 - (B) To calculate the product’s calorie content
 - (C) To determine the color of the final product
 - (D) To ensure the product is not palatable

Ans :

- (A) To understand how shelf life is extended
- Identifying the preservatives used (like salt, sugar, or oil) helps in understanding the scientific principle behind the product’s extended shelf life. Preservatives work by inhibiting microbial growth or enzymatic action, which is a core concept in food preservation.

project planning, which is distinct from day-to-day production or quality control roles.

- 133.** All of the following are mentioned as factors that can lead to food deterioration EXCEPT:
- (A) Pests and insects
 - (B) Appropriate storage temperatures
 - (C) Excessive exposure to light
 - (D) Contamination by microorganisms

Ans :

(B) Appropriate storage temperatures
Appropriate storage temperatures (e.g., refrigeration or freezing) are a method of preventing food deterioration. Inappropriate temperatures, whether too high or fluctuating, are a cause of spoilage. Pests, light, and microorganisms are all factors that lead to deterioration.

- 134.** Which of the following statements about the development of food technology is INCORRECT?
- (A) Canning was developed in the early 19th century.
 - (B) Pasteur's research helped put food technology on a scientific basis.
 - (C) Space exploration contributed to the growth of food technology.
 - (D) The 21st century has seen a reduced need for food technologists.

Ans :

(D) The 21st century has seen a reduced need for food technologists.

The text indicates that in the 21st century, food technologists are challenged to produce foods for changing consumer needs, implying an increased, not reduced, need for their expertise. The other statements about canning, Pasteur, and space exploration are all correct.

- 135.** Consider the following food items:

- 1. Sliced apples
- 2. Frozen peas
- 3. Pickles
- 4. Bread

Which of these are examples of food that have undergone more than minimal processing?

- (A) 2, 3, and 4 only
- (B) 1 and 2 only
- (C) 1 and 3 only
- (D) All of the above

Ans :

(A) 2, 3, and 4 only

Sliced apples are minimally processed. Frozen peas are preserved, pickles are manufactured, and bread is formulated. Preserved, manufactured, and formulated foods all involve more processing steps and changes to the original product than minimal processing.

- 136.** Assertion (A): There is a growing consumer demand for foods free of chemical preservatives. Reason (R): This has increased the importance of food processing and technology to find alternative preservation methods.

(A) Both A and R are true, and R is the correct explanation of A.

(B) Both A and R are true, but R is not the correct explanation of A.

(C) A is true, but R is false.

(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The consumer demand for "clean label" foods (Assertion A) is a major trend. This directly challenges food technologists to innovate and develop new preservation techniques that do not rely on chemical additives (Reason R), thus increasing the importance of the field.

- 137.** What is the purpose of the practical task to "prepare a label" for the processed food product?

(A) To practice artistic drawing skills

(B) To understand legal and consumer information requirements

(C) To add extra weight to the final product

(D) To test the chemical composition of the food

Ans :

(B) To understand legal and consumer information requirements

Preparing a food label is an exercise in understanding the information that is legally required and essential for the consumer. This includes the product name, manufacturer details, ingredient list, weight, and storage instructions, which are all crucial for safety and informed choice.

- 138.** How does food technology contribute to making seasonal foods like mangoes available all year round?

(A) By developing new mango varieties that grow in winter.

(B) By reducing consumer demand for mangoes outside their season.

- (C) By selling fresh mangoes at a very high price in the off-season.
- (D) Through preservation techniques like canning, freezing, or drying.

Ans :

(D) Through preservation techniques like canning, freezing, or drying.

Food technology allows seasonal foods to be available year-round by using preservation methods. For example, mangoes can be processed into pulp, canned slices, or dried pieces, extending their shelf life far beyond the fresh season and making them accessible at any time.

- 139.** Which of the following is an accurate description of a “Career Avenue” in food technology?
- (A) Technical Writing: Writing fictional stories about food.
- (B) Nutrition Marketing: Using nutritional claims to promote products.
- (C) Clinical Research: Providing therapy for eating disorders.
- (D) Teaching and Academics: Working as a chef in a restaurant.

Ans :

(B) Nutrition Marketing: Using nutritional claims to promote products.

Nutrition Marketing is a valid career where technical knowledge of a product’s nutritional benefits is used to create marketing strategies. The other options misrepresent the roles; technical writing is non-fiction, clinical research in this context is different, and academics teach/research, not necessarily cook professionally.

- 140.** Match the term in Column I with its correct example in Column II.

	Column I		Column II
1.	Perishable Food	a.	Wheat
2.	Semi-perishable Food	b.	Milk
3.	Non-perishable Food	c.	Jam
4.	Manufactured Food	d.	Potato

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-a, 2-b, 3-c, 4-d
- (C) 1-d, 2-c, 3-b, 4-a
- (D) 1-c, 2-a, 3-d, 4-b

Ans :

- (A) 1-b, 2-d, 3-a, 4-c

Milk is a perishable food that spoils quickly. A potato is semi-perishable, lasting a few weeks. Wheat is a non-perishable grain. Jam is a manufactured food, created by processing fruit and sugar into a new product.

- 141.** Which term describes the application of basic sciences like chemistry and physics to understand the technical aspects of food?

- (A) Food Technology
- (B) Food Manufacturing
- (C) Food Science
- (D) Food Fortification

Ans :

(C) Food Science

Food Science is defined as the distinct field involving the application of basic sciences such as chemistry and physics. It provides the fundamental knowledge about the composition of foods, the changes they undergo, and the principles of their processing.

- 142.** Which of these career avenues would involve working directly on a production line to ensure efficiency and quality?

- (A) Consultant
- (B) Production Manager
- (C) Researcher
- (D) Teacher

Ans :

(B) Production Manager

A Production Manager’s role is hands-on and focused on the factory floor. They are responsible for managing the entire production process, ensuring it runs smoothly, efficiently, and meets all quality and output targets.

- 143.** A company uses a process to remove most of the water from grapes to make raisins. This is an application of which food preservation principle?

- (A) Application of heat
- (B) Removal of water/moisture
- (C) Lowering of temperature
- (D) Reduction of pH

Ans :

(B) Removal of water/moisture

Making raisins from grapes involves dehydration or drying, which is a direct application of the principle of water removal. By significantly reducing the moisture content, the growth of spoilage microorganisms is inhibited, thus preserving the fruit.

- 144.** Which of the following statements about the scope of food technology is INCORRECT?
- (A) The Indian food industry is a major producer of processed foods.
 - (B) Globalization has increased the demand for various types of products.
 - (C) The field provides limited opportunities for entrepreneurship.
 - (D) Food technologists are needed in quality control departments.

Ans :

(C) The field provides limited opportunities for entrepreneurship.

The text states that entrepreneurship is a highly rewarding avenue in food technology, with government support and opportunities ranging from small to large scale. Therefore, the statement that opportunities are limited is incorrect.

- 145.** Why is it important for a food technologist to have knowledge of food microbiology?
- (A) To study the spoilage of food caused by microorganisms
 - (B) To understand the principles of marketing and sales
 - (C) To analyze the financial performance of the company
 - (D) To design the architectural layout of the factory

Ans :

(A) To study the spoilage of food caused by microorganisms

Food microbiology is the study of microorganisms in food. This knowledge is critical for a food technologist to understand the causes of food spoilage, identify foodborne pathogens, and develop effective preservation and processing methods to ensure food safety.

- 146.** As per the text, which of the following is NOT a skill needed for 'Food as a material'?
- (A) Knowledge of seasonal availability of food stuffs
 - (B) Assessment of the quality of raw foods
 - (C) Understanding the influence of time and temperature on food
 - (D) Knowledge of industrial practices and manufacturing systems

Ans :

(D) Knowledge of industrial practices and manufacturing systems

Knowledge of industrial practices and manufacturing systems is listed as a skill under 'Food Product Development,' which deals with scaling up production. The 'Food as a material' category focuses on the properties and quality of the raw ingredients themselves.

- 147.** A career focused on developing and supplying specialty foods for specific health purposes, such as gluten-free bread, falls under which category?
- (A) Project Implementation
 - (B) Marketing and Sales
 - (C) Entrepreneurship
 - (D) Project Appraisal

Ans :

(C) Entrepreneurship

Developing and supplying a niche product like specialty health foods is a prime example of entrepreneurship. This involves identifying a market need, creating a product to meet that need, and building a business around it, often starting as a small or medium enterprise.

- 148.** In the practical, which of the following is NOT a criterion for the selection of raw materials?
- (A) Quality
 - (B) Cost
 - (C) Availability
 - (D) Brand name

Ans :

(D) Brand name

While the practical involves preparing a product, the selection of raw materials is based on practical considerations like quality, cost, and local availability. The brand name of a raw material is not a fundamental selection criterion for this educational exercise.

- 149.** Consider the following regarding food preservation principles:
1. Reducing pH creates an acidic environment that inhibits microbes.
 2. Lowering temperature kills all microorganisms instantly.
 3. Applying heat can destroy enzymes that cause spoilage.
 4. Removing moisture deprives microbes of the water they need to grow.

Which of the above statements are correct?

- (A) 1, 2 and 3
- (B) 1, 3 and 4
- (C) 2, 3 and 4
- (D) All of the above

- 169.** The primary principle behind pasteurisation as a method of food preservation is:
- (A) The removal of water/moisture.
 - (B) The reduction of pH.
 - (C) The lowering of storage temperature.
 - (D) The application of heat to eliminate microbial activity.

Ans :

(D) The application of heat to eliminate microbial activity.

One of the basic concepts in food processing to prevent spoilage is the application of heat. Pasteurisation specifically uses controlled heating to reduce or eliminate the activity of harmful microorganisms, thereby preserving the food.

- 170.** The development of food preservation techniques like pasteurisation and canning was initially driven by practical needs such as:
- (A) The need to prevent economic losses due to food spoilage and serve military needs.
 - (B) The desire for more convenient and ready-to-eat meals.
 - (C) The demand for foods free of all chemicals and pesticides.
 - (D) The rising popularity of ethnic foods from different countries.

Ans :

(A) The need to prevent economic losses due to food spoilage and serve military needs.

Early advancements in food technology, like canning and pasteurisation, were driven by pressing needs. These included preventing the spoilage of products like wine and serving military requirements for preserved food rations for soldiers.

Direction : Read the following case study and answer the following questions.

A group of women in a village in Maharashtra decides to start a small-scale enterprise to generate income. They notice that every year, a large quantity of tomatoes from their farms spoils during the peak harvest season due to a market glut. They decide to use a traditional method of food preservation to create a value-added product. They slice the fresh tomatoes, lightly salt them, and then spread them out on clean cloths under the hot sun for several days. This process of sun drying removes most of the water content from the tomatoes. The resulting dried tomatoes are

lightweight, have a concentrated flavor, and can be stored for many months without refrigeration. They package the dried tomatoes in simple, airtight bags and sell them in nearby urban markets as a gourmet ingredient for salads and pasta. Their enterprise is successful because it prevents food waste, provides a livelihood, and uses a simple, low-cost technology that relies on a fundamental principle of food preservation.

- 171.** The method of sun drying used by the women is a food preservation technique based on which principle?
- (A) Application of high heat to sterilize the food.
 - (B) Lowering the temperature to freezing point.
 - (C) Controlling the availability of oxygen.
 - (D) Removal of water/moisture to inhibit microbial growth.

Ans :

(D) Removal of water/moisture to inhibit microbial growth.

One of the oldest and most basic concepts in food preservation is the removal of water or moisture. Microorganisms require moisture to grow and cause spoilage, so dehydration effectively extends the shelf life of the food.

- 172.** Based on perishability, fresh tomatoes would be classified as what type of food?
- (A) Non-perishable food
 - (B) Semi-perishable food
 - (C) Perishable food
 - (D) Formulated food

Ans :

(C) Perishable food

Perishable foods are those that spoil quickly, typically within a day or two, if not preserved. Fresh produce like tomatoes, as well as milk, fish, and meat, fall into this category due to their high moisture content.

- 173.** After being processed by drying, the tomatoes become what?
- (A) More perishable than before.
 - (B) A shelf-stable product with extended storability.
 - (C) A food derivative.
 - (D) A minimally processed food.

Ans :

(B) A shelf-stable product with extended storability.

needs of consumers. This includes developing healthier options, functional foods, and products with improved safety and freshness.

- 155.** A person wants to pursue a career in the food industry that involves frequent interaction with consumers to understand their preferences and then translating that into product ideas. This role aligns best with:

(A) Research and Development (R&D)
(B) Production Management
(C) Quality Control
(D) Project Financing

Ans :

(A) Research and Development (R&D)

The Research and Development department is heavily involved in researching consumer markets and preferences. This information is then used to innovate and develop new products or modify existing ones, making it the best fit for a role that bridges consumer insights and product creation.

- 156.** According to the text, what is one of the largest manufacturing industries in the present times?

(A) The textile industry
(B) The automobile industry
(C) The electronics industry
(D) The food manufacturing industry

Ans :

(D) The food manufacturing industry

The text explicitly states that food manufacturing is one of the largest manufacturing industries in the present times, reflecting its massive scale and importance in meeting the daily needs of the global population.

- 157.** Match the food preservation method in Column I with the underlying principle in Column II.

	Column I		Column II
1.	Drying	a.	Lowering of temperature
2.	Pickling	b.	Application of heat
3.	Freezing	c.	Reduction of pH
4.	Canning	d.	Removal of water

(A) 1-d, 2-c, 3-a, 4-b
(B) 1-b, 2-a, 3-d, 4-c
(C) 1-c, 2-d, 3-b, 4-a
(D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-d, 2-c, 3-a, 4-b

Drying works by removing water. Pickling uses acid (vinegar) to reduce the pH. Freezing lowers the temperature to slow microbial growth. Canning uses high heat to sterilize the food and kill microorganisms.

- 158.** How does a robust food processing industry contribute to a country's food security?

(A) By preserving surplus produce and reducing losses
(B) By increasing the amount of post-harvest food wastage
(C) By reducing the shelf life of staple food grains
(D) By making food more expensive and inaccessible

Ans :

(A) By preserving surplus produce and reducing losses

A strong food processing industry plays a vital role in food security by preserving surplus agricultural produce that might otherwise spoil. This reduces post-harvest losses and makes food available for longer periods, ensuring a more stable and reliable food supply for the population.

- 159.** Assertion (A): It is important for a food technologist to be able to design, analyze, and adapt recipes.

Reason (R): This skill is crucial for creating innovative products that are tailored to specific consumer perceptions and needs.

(A) Both A and R are true, and R is the correct explanation of A.
(B) Both A and R are true, but R is not the correct explanation of A.
(C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The ability to design and adapt recipes (Assertion) is fundamental to the process of innovation. The reason correctly explains that this skill allows a technologist to create new products that cater to specific consumer demands, such as healthier or more convenient options.

- 160.** Which of the following are listed as career avenues in food processing and technology?

1. Production Managers
2. Sensory Evaluation experts
3. Project Financing consultants
4. Clinical Psychologists

- (A) 1 and 4 only
- (B) 2 and 3 only
- (C) 1, 2, and 3 only
- (D) All of the above

Ans :

- (C) 1, 2, and 3 only

The text lists Production Managers, Sensory Evaluation experts, and consultants for roles like Project Financing as career avenues. Clinical Psychology is a separate field of healthcare and is not a career within food processing and technology.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

A food manufacturing company, “NutriLife Foods,” aims to develop a new line of functional breakfast cereals. Their target audience is health-conscious consumers, so the product must be both nutritious and have a good shelf life without using artificial preservatives. The team of food technologists starts by selecting high-quality whole grains like oats and millets. They use their knowledge of food science to understand the chemical composition of these grains and how they will react to processing. To enhance the product’s health benefits, they decide to fortify it with folic acid and vitamin D, nutrients often lacking in modern diets. The processing involves cleaning, puffing the grains using heat, mixing them with natural sweeteners and dried fruits, and then packaging them in moisture-proof material to prevent spoilage. This entire set of methods, used to transform raw ingredients into a finished, marketable product, is a core example of food processing. The final product is a formulated food, designed not only for taste and convenience but also for specific health benefits, showcasing the advanced application of food technology in meeting consumer demands.

- 161.** The set of methods and techniques used by NutriLife Foods to transform raw grains into breakfast cereal is known as what?
- (A) Food Science
 - (B) Food Processing
 - (C) Food Manufacturing
 - (D) Food Deterioration

Ans :

- (B) Food Processing

Food processing is the specific set of methods and techniques applied to transform raw ingredients into finished or semi-finished products. This includes everything from cleaning the raw material to packaging the final product for sale.

- 162.** The final breakfast cereal, which is prepared by mixing and processing individual ingredients like puffed grains, sweeteners, and fruits, is classified as which type of food?
- (A) A minimally processed food.
 - (B) A preserved food.
 - (C) A formulated food.
 - (D) A food derivative.

Ans :

- (C) A formulated food.

Formulated foods are products created by mixing and processing various individual ingredients to result in a relatively shelf-stable and new food product. Bread, biscuits, and breakfast cereals fall under this category of processed foods.

- 163.** The decision to add folic acid and vitamin D to the cereal is an example of what process?
- (A) Food fortification
 - (B) Food adulteration
 - (C) Food spoilage
 - (D) Food fermentation

Ans :

- (A) Food fortification

Food fortification is the process of adding nutrients that may be lacking in a foodstuff to ensure that minimum dietary requirements are met. This is often done to staple foods to address widespread nutrient deficiencies.

- 164.** The broad discipline concerned with all technical aspects of food, from harvesting to consumption, including its biology, chemistry, and physics, is called:
- (A) Food Technology
 - (B) Agronomics
 - (C) Culinary Arts
 - (D) Food Science

Ans :

- (D) Food Science

Food science is a broad, distinct field that applies basic sciences like chemistry and physics to study the nature of foods, the causes of their spoilage,

and the principles underlying food processing, forming the knowledge base for technology.

- 165.** Why has food processing and technology gained significance in a country like India?
- (A) Because India has a deficit of agricultural produce.
 - (B) Because consumer demand for fresh, unprocessed food has completely disappeared.
 - (C) Because India has become an agro-surplus country, creating a need for storage and processing.
 - (D) Because there are no changes in lifestyle or eating habits.

Ans :

(C) Because India has become an agro-surplus country, creating a need for storage and processing. As India has progressed from an agro-deficit to an agro-surplus nation, the need to store and process agricultural and horticultural produce has increased significantly. This has been a major driver for the growth of the food industry.

Direction : Read the following case study and answer the following questions.

In the mid-19th century, French winemakers were facing a major economic crisis. Their wine was spoiling quickly during storage and transportation, turning sour and becoming undrinkable. They approached the renowned scientist Louis Pasteur for a solution. Pasteur, using his microscope, discovered that the souring was caused by the growth of undesirable microorganisms in the wine. He then conducted a series of experiments and found that by gently heating the wine to a specific temperature for a short duration, he could kill these harmful microorganisms without significantly altering the wine's taste. This process not only saved the French wine industry but also laid the foundation for a revolutionary food preservation technique. This method was later applied to milk to destroy disease-producing organisms, making it safe for consumption and extending its shelf life. This scientific breakthrough was a significant advance in ensuring the microbiological safety of food and was an early attempt to put food technology on a firm scientific basis.

- 166.** The process of gentle heating developed by Louis Pasteur to destroy harmful microorganisms in liquids like milk and wine is known as:
- (A) Canning
 - (B) Fermentation

- (C) Dehydration
- (D) Pasteurisation

Ans :

- (D) Pasteurisation

Pasteurisation is the process of treating food, especially liquids like milk, with mild heat to eliminate pathogens and extend shelf life. It was developed by Louis Pasteur and was a significant advance in ensuring microbiological food safety.

- 167.** Pasteur's research was a pivotal moment in the history of food technology because it:
- (A) Showed that microorganisms had no effect on food spoilage.
 - (B) Was an early attempt to put food technology on a scientific basis by identifying the cause of spoilage.
 - (C) Proved that heating food always destroys its taste and nutritional value.
 - (D) Was developed primarily to serve the needs of space exploration.

Ans :

- (B) Was an early attempt to put food technology on a scientific basis by identifying the cause of spoilage.

Louis Pasteur's research on wine spoilage and his description of how to avoid it represented an early and successful attempt to apply scientific principles to solve a food preservation problem, establishing a foundation for modern food technology.

- 168.** The spoilage of the wine was caused by which type of factor?
- (A) Physical deterioration due to light exposure.
 - (B) Chemical deterioration due to oxidation.
 - (C) Biological deterioration due to the growth of microorganisms.
 - (D) Degradation by naturally present enzymes in the grapes.

Ans :

- (C) Biological deterioration due to the growth of microorganisms.

Food is often spoiled by contamination from microorganisms like bacteria, fungus, and moulds. Pasteur's key discovery was that such microorganisms were responsible for the biological deterioration that was causing the wine to turn sour.

- (C) There is no difference between a food derivative and a manufactured food.
- (D) A food derivative has a short shelf life, while a cake has a long shelf life.

Ans :

(B) A food derivative is a component extracted and purified from a raw product, while a cake is a mixture of ingredients.

Food derivatives are components obtained from a raw product through purification, like extracting sugar from sugarcane. In contrast, manufactured foods are made by combining and processing multiple different ingredients to create a new product.

- 179.** Frozen peas are considered a 'preserved food' because the preservation method used:
- (A) Completely changes the character of the peas.
- (B) Adds many other ingredients to the peas.
- (C) Does not substantially change the original character of the product.
- (D) Extracts a specific component from the peas.

Ans :

(C) Does not substantially change the original character of the product.

In preserved foods like frozen or canned vegetables, the preservation methods are chosen to maintain the product's original character as much as possible, unlike formulated foods where the original characteristics are intentionally lost.

- 180.** A food product like lactose-free milk, designed for people with lactose intolerance, would be classified as what?
- (A) A medical food.
- (B) A minimally processed food.
- (C) A food derivative.
- (D) A standard preserved food.

Ans :

(A) A medical food.

Medical foods are a special category of processed foods used in the dietary management of specific diseases or conditions. Lactose-free milk is formulated to meet the needs of individuals who cannot digest lactose.

Direction : Read the following case study and answer the following questions.

A dairy plant that produces packaged milk and fruit juices aims to ensure the highest standards of safety and quality for its products. The

quality control manager explains their two-step preservation process. First, for the milk, they use High-Temperature Short-Time (HTST) pasteurisation, a method where the milk is heated to a high temperature for a very short period. This is a crucial application of heat to kill harmful bacteria like Salmonella and Listeria without significantly affecting the milk's nutritional value or taste. Second, for both milk and juice, after the heat treatment, the product is immediately filled into sterile cartons in an aseptic environment, and the cartons are sealed to be airtight. This packaging step is designed to control the availability of oxygen. By preventing oxygen from entering the package, they inhibit the growth of aerobic spoilage microorganisms and prevent oxidative chemical reactions that could degrade the quality of the product during its long shelf life. This combination of heat application and oxygen control is fundamental to their food processing technology.

- 181.** The pasteurisation process used by the dairy plant is based on which fundamental principle of food preservation?
- (A) Lowering of temperature.
- (B) Reduction of pH.
- (C) Application of heat.
- (D) Removal of water.

Ans :

(C) Application of heat.

The application of heat is a primary method used in food processing to eliminate or reduce microbial activity. Pasteurisation is a specific heat treatment designed to destroy pathogens and spoilage organisms in liquid foods.

- 182.** Why is controlling the availability of oxygen an important concept in food preservation?
- (A) Because all microorganisms require oxygen to grow.
- (B) To prevent the growth of aerobic microorganisms and oxidative spoilage.
- (C) To increase the rate of enzymatic browning in fruits.
- (D) Because oxygen helps in preserving the food for longer.

Ans :

(B) To prevent the growth of aerobic microorganisms and oxidative spoilage.

Controlling oxygen availability is a key preservation principle. It prevents the growth

Food processing operations are designed to extend the shelf life of products. By removing water, the women convert the perishable tomatoes into a more concentrated, shelf-stable product that can be stored for a long period without spoiling.

174. This enterprise is an example of what?
- (A) Small-scale entrepreneurship using traditional preservation methods.
 - (B) Large-scale food manufacturing in a factory.
 - (C) A research and development project by a multinational company.
 - (D) A government-run food distribution program.

Ans :

(A) Small-scale entrepreneurship using traditional preservation methods.
Food processing has long been practiced as a household or cottage-scale activity. The women's enterprise is a modern example of self-employment where they use a traditional technique to create a marketable product and earn a livelihood.

175. What type of food spoilage is primarily prevented by the drying process?
- (A) Physical spoilage from pests.
 - (B) Chemical spoilage from exposure to light.
 - (C) Spoilage from excessive freezing.
 - (D) Biological spoilage from bacteria, yeasts, and moulds.

Ans :

(D) Biological spoilage from bacteria, yeasts, and moulds.
The principal microorganisms that cause food spoilage—bacteria, fungi, yeasts, and moulds—all require moisture to grow. The drying process removes this moisture, thus preventing the biological deterioration they would otherwise cause in the fresh tomatoes.

Direction : Read the following case study and answer the following questions.

A Human Ecology and Family Sciences teacher takes her Class 12 students to a large supermarket to help them understand the different levels of food processing. In the fresh produce section, she points out a bag of pre-washed and pre-cut salad greens. She explains this is an example of a minimally processed food. Next, they move to the frozen food aisle, where she shows them a packet of frozen peas. She classifies this as a preserved food, where the character of the product is not substantially changed. In the canned goods aisle, she picks up

a can of peaches in syrup, another example of a preserved food. Then, they look at a loaf of bread and a packet of biscuits in the bakery section. The teacher explains that these are manufactured or formulated foods, where individual ingredients are mixed and processed to create an entirely new product. Finally, she shows them a bottle of cooking oil and a packet of sugar, explaining that these are food derivatives, where a component has been extracted and purified from a raw product like oilseeds or sugarcane.

176. According to the teacher's explanation, what is a key characteristic of minimally processed foods?
- (A) They are processed as little as possible to retain the quality of fresh food.
 - (B) They have lost all of their original characteristics.
 - (C) They are made by mixing many different ingredients together.
 - (D) They have been purified to extract a single component.

Ans :

(A) They are processed as little as possible to retain the quality of fresh food.
Minimally processed foods undergo very little processing, such as cleaning, trimming, cutting, or slicing. The primary goal of this level of processing is to maintain the quality and freshness of the food while making it more convenient.

177. How would a packet of biscuits be classified based on the extent of processing?
- (A) As a food derivative.
 - (B) As a preserved food.
 - (C) As a minimally processed food.
 - (D) As a formulated or manufactured food.

Ans :

(D) As a formulated or manufactured food.
Formulated foods, like biscuits or bread, are created by mixing and processing individual ingredients (flour, sugar, fat, etc.) to produce a new, relatively shelf-stable product whose original raw characteristics are lost.

178. What distinguishes a 'food derivative' like sugar from a 'manufactured food' like a cake?
- (A) A food derivative is an unprocessed raw material, while a cake is processed.
 - (B) A food derivative is a component extracted and purified from a raw product, while a cake is a mixture of ingredients.

Ans :

(B) 1, 3 and 4

Reducing pH, applying heat, and removing moisture are all correct principles. However, lowering temperature (refrigeration/freezing) only slows down or inhibits microbial growth; it does not kill all microorganisms instantly, making statement 2 incorrect.

- 150.** Assertion (A): In the 20th century, food preferences and choices changed, and people started incorporating foods from different regions. Reason (R): Factors like world wars and rising demand for varied products from consumers contributed to the growth of food technology.
- (A) Both A and R are true, but R is not the correct explanation of A.
(B) Both A and R are true, and R is the correct explanation of A.
(C) A is true, but R is false.
(D) A is false, but R is true.

Ans :

(A) Both A and R are true, but R is not the correct explanation of A.

Both statements are true. People's food preferences did diversify. The growth of food technology was indeed spurred by factors like wars and consumer demand. However, these factors are parallel developments; the growth of technology enabled the satisfaction of diverse preferences, but is not the direct explanation for the change in preferences itself.

- 151.** On a food label, what does the "net weight/volume" indicate?
- (A) The weight of the product including the packaging
(B) The weight of the product excluding the packaging
(C) The total cost of the product per gram
(D) The number of servings contained in the package

Ans :

(B) The weight of the product excluding the packaging

The net weight or net volume on a food label indicates the quantity of the food product itself, without including the weight or volume of the packaging material. This provides consumers with accurate information about the amount of product they are purchasing.

- 152.** Why is it important for a food technologist to be knowledgeable about the influence of additives?
- (A) To ensure only illegal additives are used in food products
(B) To avoid using any substances that extend shelf life
(C) To increase the microbial count in the final food
(D) To understand their role in preservation, color, and texture

Ans :

(D) To understand their role in preservation, color, and texture

Food additives are used for various technological purposes, such as preservation (preservatives), improving appearance (colors), and enhancing texture (stabilizers). A food technologist must understand these functions to use them correctly, safely, and effectively in product formulation.

- 153.** The process of trying to make a processed product different from what is already in the market by using different ingredients is an act of:
- (A) Standardization
(B) Contamination
(C) Innovation
(D) Deterioration

Ans :

(C) Innovation

The act of creating a new or different product by using new ingredients or methods is a form of innovation. In the food industry, innovation is key to standing out in a competitive market and meeting evolving consumer demands for novelty and variety.

- 154.** Which statement accurately describes a key challenge for 21st-century food technologists?
- (A) To decrease the shelf life of all processed foods
(B) To produce foods suitable for changing consumer health needs
(C) To use only ancient methods of food preservation
(D) To reduce the variety of safe and convenient foods

Ans :

(B) To produce foods suitable for changing consumer health needs

The text highlights that in the 21st century, food technologists are challenged to produce foods that are suitable for the health and other changing

of aerobic microorganisms that need oxygen to survive and also slows down oxidative chemical reactions that can cause food to deteriorate and develop off-flavors.

- 183.** The microorganisms that cause food spoilage, such as bacteria, fungi, and yeasts, grow rapidly under which of the following conditions?
- (A) Complete absence of nutrients and moisture.
 - (B) Extremely low temperatures (freezing).
 - (C) A highly acidic environment (low pH).
 - (D) Congenial conditions of temperature, moisture, and pH.

Ans :

(D) Congenial conditions of temperature, moisture, and pH.

Microbial growth is influenced by several factors. Microorganisms like bacteria and fungi grow very rapidly when conditions are congenial, meaning they have access to nutrients, moisture, and appropriate levels of temperature, pH, and oxygen.

- 184.** The temperature range between 5°C and 60°C is known as the 'Danger Zone' in food safety because:
- (A) It is the ideal temperature range for most bacteria to grow.
 - (B) It is the range in which food freezes solid.
 - (C) Food can only be safely cooked within this temperature range.
 - (D) No microorganisms can survive in this temperature range.

Ans :

(A) It is the ideal temperature range for most bacteria to grow.

The temperature range from 5°C to 60°C is called the 'Danger Zone' because it provides the optimal conditions for most pathogenic and spoilage bacteria to multiply rapidly, increasing the risk of foodborne illness.

- 185.** What are the primary agents of biological food spoilage?
- (A) Pests and insects only.
 - (B) Naturally present enzymes only.
 - (C) Bacteria, fungi, yeasts, and moulds.
 - (D) Physical contaminants like stones and dust.

Ans :

(C) Bacteria, fungi, yeasts, and moulds.

The principal microorganisms that cause food to spoil through biological processes are bacteria,

fungi (which include yeasts and moulds). Their growth leads to decomposition and the production of substances that render food unfit for consumption.

Direction : Read the following case study and answer the following questions.

A research and development team at a food technology institute is tasked with creating a new yogurt product that offers health benefits beyond basic nutrition. They decide to develop a probiotic yogurt. Probiotics are live microorganisms that, when administered in adequate amounts, confer a health benefit on the host, particularly for gut health. The team's challenge is to select a strain of bacteria that is not only beneficial but can also survive the acidic environment of the stomach and thrive in the gut. They also have to ensure that the live cultures remain viable throughout the yogurt's shelf life. This requires careful control of the fermentation process, storage temperatures, and packaging. The final product is more than just a dairy item; it is designed to have a specific beneficial effect on human health. This type of product, which is a food but offers additional physiological benefits, represents an emerging and important category in the field of food processing and technology.

- 186.** A food product like probiotic yogurt, which can have a beneficial effect on human health beyond basic nutrition, is best classified as a:
- (A) Functional food
 - (B) Food derivative
 - (C) Minimally processed food
 - (D) Manufactured food with no health benefits

Ans :

(A) Functional food

Functional foods are foods that can have a beneficial effect on human health. Probiotic yogurts are a prime example, as they are consumed for their positive impact on gut health, which goes beyond their basic nutritional content.

- 187.** The primary reason consumers are increasingly demanding functional and medical foods is:
- (A) A desire for foods with more artificial additives.
 - (B) A decline in the prevalence of all diseases.
 - (C) Increasing prevalence of diseases like heart disease and a growing concern for wellness.
 - (D) A preference for taste over any health considerations.

where it is further processed. It is mixed with other ingredients like milk solids, fat, and flavorings to create a line of manufactured confectionery products like toffees and candies. Another portion of the sugar is sold to a bakery, where it is used as an ingredient in formulated foods like cakes and biscuits. This entire supply chain illustrates how a single raw agricultural product can be transformed into a food derivative, which can then be used as an ingredient in more complex manufactured and formulated foods.

- 206.** The raw sugar produced by extracting and purifying it from sugarcane is an example of what?
- (A) A minimally processed food.
 - (B) A preserved food.
 - (C) A food derivative.
 - (D) A formulated food.

Ans :

(C) A food derivative.

In the food industry, a food derivative is a component that is obtained from a raw product through a process of purification. Extracting sugar from sugarcane or oil from oilseeds are classic examples of producing food derivatives.

- 207.** The toffees and candies made by mixing sugar with other ingredients are classified as what?
- (A) Raw food materials.
 - (B) Food derivatives.
 - (C) Minimally processed foods.
 - (D) Manufactured or formulated foods.

Ans :

(D) Manufactured or formulated foods.

Manufactured foods are products where the original characteristics of the raw materials are lost. They are created by mixing and processing various ingredients, such as sugar, fat, and flavorings, to produce a new product like candy.

- 208.** In some cases, a food derivative can be processed further. An example of this is:
- (A) Drying fresh vegetables in the sun.
 - (B) Converting vegetable oil into vanaspati through hydrogenation.
 - (C) Freezing fresh peas to preserve them.
 - (D) Cleaning and trimming raw meat.

Ans :

(B) Converting vegetable oil into vanaspati through hydrogenation.

A food derivative can itself become a raw material for further processing. For instance, vegetable oil (a derivative) can be processed further through

hydrogenation to create vanaspati, which is a different product with different properties.

- 209.** The primary goal of processing the sugarcane into sugar is to:
- (A) Convert a bulky, perishable raw material into a more useful, concentrated, and shelf-stable product.
 - (B) Decrease its shelf life and make it more perishable.
 - (C) Reduce its sweetness and palatability.
 - (D) Make it more difficult to transport and store.

Ans :

(A) Convert a bulky, perishable raw material into a more useful, concentrated, and shelf-stable product.

Food processing is often used to convert bulky and perishable raw materials like sugarcane into more useful forms. This adds value by increasing storability, portability, and creating a concentrated, shelf-stable product like sugar.

- 210.** The entire process from sugarcane to candy illustrates that:
- (A) All processed foods are simple food derivatives.
 - (B) Food processing only involves a single step.
 - (C) Raw materials cannot be transformed into different types of products.
 - (D) The food supply chain can involve multiple stages of processing and transformation.

Ans :

(D) The food supply chain can involve multiple stages of processing and transformation.

This case shows a multi-stage food chain where a raw material is turned into a derivative, which then becomes an ingredient for other manufactured foods. This highlights the complexity and diversity of modern food processing and technology.

- 192.** The growth of mould on the raspberries is an example of which type of food deterioration?
- (A) Physical deterioration
 - (B) Chemical deterioration
 - (C) Mechanical deterioration
 - (D) Biological deterioration

Ans :

(D) Biological deterioration

Biological deterioration is associated with spoilage caused by living organisms. This includes contamination and growth of microorganisms like bacteria, fungus, and moulds, which render the food unfit for consumption by breaking it down.

- 193.** Which factor created an ideal environment for the growth of mould on the raspberries?
- (A) The low sugar content of the fruit.
 - (B) The high moisture content of the fruit.
 - (C) The lack of oxygen in the truck.
 - (D) The very low pH (high acidity) of the fruit.

Ans :

(B) The high moisture content of the fruit.

One of the key factors influencing microbial growth is the availability of moisture. The high water content in fresh fruits like raspberries provides a congenial environment for spoilage microorganisms like moulds and yeasts to grow and multiply rapidly.

- 194.** Fresh raspberries are highly susceptible to spoilage and have a short shelf life. Therefore, they are classified as:
- (A) Perishable foods
 - (B) Non-perishable foods
 - (C) Semi-perishable foods
 - (D) Shelf-stable foods

Ans :

(A) Perishable foods

Perishable foods are those, like fresh fruits, milk, and meat, that spoil quickly, often within a day or two, unless they are preserved. Their high moisture and nutrient content make them highly susceptible to deterioration.

- 195.** The bruising of the fruit due to improper handling is what kind of hazard or cause of deterioration?
- (A) A biological hazard.
 - (B) A chemical hazard.
 - (C) An enzymatic hazard.
 - (D) A physical factor.

Ans :

(D) A physical factor.

Food deterioration can be caused by physical factors, which include inappropriate handling that leads to bruising or damage. This physical damage can then accelerate chemical and biological spoilage by breaking down the protective skin of the fruit.

Direction : Read the following case study and answer the following questions.

In a country where Vitamin A deficiency is a major public health problem, the government decides to partner with a large edible oil manufacturing company for a food fortification program. The company agrees to add a synthetic, oil-soluble form of Vitamin A to all the cooking oil it produces and sells nationwide. Food technologists at the company are responsible for ensuring the process is done correctly. They must calculate the precise amount of the vitamin to be added to ensure it meets the dietary requirements without causing toxicity. They also need to ensure that the vitamin is stable and does not degrade during the oil's shelf life. The packaging is modified to protect the oil from light, which can destroy the added vitamin. This initiative is an example of using food processing not just for preservation or convenience, but also to enhance the nutritional value of a staple food item and address a widespread health issue. The government supports this because it is a cost-effective way to reach a large population without requiring them to change their dietary habits.

- 196.** This initiative of adding a nutrient to a staple food like oil to improve the health of the population is known as:
- (A) Food adulteration
 - (B) Food coloring
 - (C) Food fortification
 - (D) Food flavoring

Ans :

(C) Food fortification

Food fortification is the practice of deliberately increasing the content of an essential micronutrient in a food. The aim is to improve the nutritional quality of the food supply and provide a public health benefit with minimal risk.

- 197.** What is the primary significance of this food fortification program?

flavor, texture, and nutritional value. Safety is a fundamental prerequisite of quality.

3.3 Food Standards

Effective food standards and control systems are necessary to ensure the supply of hygienic, wholesome food and to facilitate trade. Standards exist at four levels: company, national, regional, and international.

3.4 Food Standards and Regulations in India

Voluntary certification schemes in India include the ISI mark from the Bureau of Indian Standards (BIS) and Agmark for agricultural products. To consolidate various food-related laws, the Indian government passed the **Food Safety and Standards Act (FSSA), 2006**, establishing the **Food Safety and Standards Authority of India (FSSAI)**. FSSAI is responsible for setting science-based food standards, regulating the manufacture, storage, sale, and import of food, and promoting general awareness about food safety.

3.5 International Organisations and Standards, Quality, Research and Trade

- **Codex Alimentarius Commission (CAC):** An intergovernmental body that establishes international food standards to protect consumer health and facilitate trade. Its publication, the Codex Alimentarius ("Food Code"), is a key international reference.
- **International Organisation for Standardisation (ISO):** A non-governmental federation that publishes voluntary international standards, including the ISO 9000 family for quality management.
- **World Trade Organisation (WTO):** An organization that aims to ensure global trade flows smoothly and predictably by administering trade agreements and settling disputes.

3.6 Food Safety Management Systems

Since hazards can enter the food chain at any stage, adequate control throughout the chain is essential. Key systems include:

3.7 Good Manufacturing Practices (GMP)

GMPs are part of quality assurance that requires manufacturers to take proactive steps to ensure their products are safe and accurately labeled, thus protecting the consumer.

3.8 Good Handling Practices (GHP)

GHPs represent a comprehensive approach from farm to consumer to identify and minimize risks of contamination, ensuring all food handlers maintain good hygiene.

3.9 Hazard Analysis Critical Control Point (HACCP)

HACCP is a preventive system that provides assurance about food safety by identifying, evaluating, and controlling potential hazards at every step of the food chain, from raw material procurement to consumption. It is a proactive approach that allows for corrective action before a problem occurs, in contrast to simply testing the final product.

4. SCOPE

India's growing food processing sector has widened the scope and increased career opportunities in food quality and safety. Professionals in this area need knowledge in food chemistry, processing, analysis, microbiology, and food laws. Career opportunities exist in regulatory agencies (food safety officers), public and private quality control laboratories, and in-house quality units of large food companies, flight kitchens, and other institutions. There are also roles for food auditors and various positions within the food industry, as shown in Figure 6.6.

5. CAREER AVENUES

Career paths in this field include:

- Analysts or managers in quality control laboratories within the food industry.
- Positions in public and private food testing laboratories, including food inspectors.
- Specialists in HACCP and Quality Certification (like ISO).
- Food Auditors.
- Roles in teaching, academics, and research.
- Scientific writers and various roles in voluntary organizations.
- Entrepreneurship opportunities in setting up analytical labs, food safety consultancies, and educational services.

Ans :

(D) A Bachelor's degree in Food Technology or a related science field.

A Bachelor's degree in Food Technology provides the most comprehensive grounding for a career in the food industry. It equips students with the necessary scientific knowledge and technical skills required for various roles in the sector.

202. A deep understanding of food chemistry and food microbiology is essential for a food technologist to:

- (A) Design attractive packaging for food products.
- (B) Understand the composition of foods and control spoilage microorganisms.
- (C) Manage the financial accounts of a food company.
- (D) Create marketing campaigns for new food items.

Ans :

(B) Understand the composition of foods and control spoilage microorganisms.

Food chemistry helps a technologist understand the properties of food ingredients, while food microbiology is crucial for understanding and controlling the microorganisms that cause spoilage and foodborne illness, ensuring the safety and stability of the product.

203. The skill of conducting 'sensory evaluation' is important for what purpose in food product development?

- (A) To determine the cost of the final product.
- (B) To analyze the nutritional content of the food in a laboratory.
- (C) To assess the product's acceptability based on taste, texture, and appearance.
- (D) To ensure the product meets all legal labeling requirements.

Ans :

(C) To assess the product's acceptability based on taste, texture, and appearance.

Sensory evaluation involves assessing a food product using human senses (taste, smell, sight, touch). It is a critical skill for food technologists to ensure that the final product will be desirable and acceptable to consumers.

204. A food technologist working in a large manufacturing unit could be responsible for which of the following roles?

- (A) A Production Manager, a Quality Assurance professional, or a Research and Development scientist.
- (B) A farmer growing the raw materials.
- (C) A truck driver distributing the final products.
- (D) A shopkeeper selling the products to consumers.

Ans :

(A) A Production Manager, a Quality Assurance professional, or a Research and Development scientist.

The food industry offers diverse career avenues for technologists. They can work in various departments like production management, quality assurance and control, or research and development to create new products and improve existing ones.

205. The need for professionals with skills in food processing, safety, and quality control is driven by:

- (A) A decline in the demand for all types of processed food.
- (B) The growing demand for processed, packed, and convenient food with a prolonged shelf life.
- (C) The fact that all food processing can be done without any technical knowledge.
- (D) A surplus of trained food technologists in the job market.

Ans :

(B) The growing demand for processed, packed, and convenient food with a prolonged shelf life.

The modern consumer's demand for a wide variety of convenient, safe, and shelf-stable foods requires a well-trained human resource in the food industry. This has created a challenging and rewarding future for food technology professionals.

Direction : Read the following case study and answer the following questions.

A large agricultural cooperative specializes in processing sugarcane. The initial stage of their operation involves crushing the sugarcane to extract the juice. This raw juice then undergoes a series of processing steps, including clarification, evaporation, and crystallization, to produce raw sugar. This raw sugar is considered a 'food derivative' as it is a specific component that has been extracted and purified from the original plant material. However, the cooperative's processing does not stop there. A portion of this raw sugar is sent to a different unit

Ans :

(C) Increasing prevalence of diseases like heart disease and a growing concern for wellness.

The rising prevalence of chronic diseases and a greater consumer focus on health and wellness have made it necessary for scientists to develop foods with specific health benefits, leading to the growth of functional and medical foods.

- 188.** A professional working on developing such a product needs expertise in which specific area of food science?

(A) Food packaging only.
(B) Culinary arts and cooking skills only.
(C) Marketing and sales.
(D) Food chemistry and microbiology.

Ans :

(D) Food chemistry and microbiology.

Developing a functional food like probiotic yogurt requires in-depth knowledge of food chemistry to understand the ingredients and microbiology to select and manage the live bacterial cultures, ensuring their viability and effectiveness in the final product.

- 189.** What is the main objective of food technology in the 21st century, as illustrated by this case study?

(A) To only produce foods that cater to military needs.
(B) To produce foods suitable for the health and changing needs of consumers.
(C) To focus exclusively on traditional preservation methods like salting and pickling.
(D) To reduce the variety of food products available in the market.

Ans :

(B) To produce foods suitable for the health and changing needs of consumers.

In the 21st century, food technologists are challenged to go beyond basic preservation and produce foods that are tailored to the evolving needs of consumers. This includes developing products that support health, wellness, and specific dietary requirements.

- 190.** The work of the R&D team in creating this new product is an example of what?

(A) A career in research and development and product development within the food industry.
(B) A career in food distribution and logistics.
(C) A role in enforcing food regulations and standards.

(D) A job in large-scale food service management like catering.

Ans :

(A) A career in research and development and product development within the food industry.

Professionals in the food industry are often involved in research and development (R&D). This includes modifying existing food products or, as in this case, developing entirely new products to meet specific consumer demands and technological advancements.

Direction : Read the following case study and answer the following questions.

A shipment of fresh raspberries is being transported in a refrigerated truck from a farm to a distribution center several hundred kilometers away. Despite the refrigeration, when the shipment arrives, a significant portion of the raspberries are found to have spoiled. A food scientist investigating the issue explains that multiple factors contributed to this food deterioration. First, the natural enzymes present in the raspberries continued to function, even at low temperatures, causing the fruit to soften and lose its texture. Second, although refrigeration slowed it down, the growth of mould, a type of microorganism, was not completely halted, leading to visible spoilage. Third, the high moisture content of the berries created an ideal environment for this microbial growth. Finally, some of the spoilage was due to physical damage from improper handling and bumps during transport, which bruised the delicate fruit and made it more susceptible to decay. This case highlights the complex interplay of biological, chemical, and physical factors that can lead to food spoilage.

- 191.** The softening of the raspberries due to the action of natural substances within the fruit is an example of what type of spoilage?

(A) Spoilage due to infestation by pests.
(B) Spoilage due to contamination by chemicals.
(C) Degradation by naturally present enzymes.
(D) Spoilage from exposure to excessive light.

Ans :

(C) Degradation by naturally present enzymes.

Food can be spoiled due to the action of enzymes that are naturally present in it. These enzymes are biological catalysts that continue to cause chemical reactions, like ripening and softening, even after the food is harvested.

CHAPTER 05

FOOD QUALITY AND FOOD SAFETY

SUMMARY

1. INTRODUCTION

Food is a critical determinant of a population's health, nutritional status, and productivity. Consuming wholesome and safe food is essential, as unsafe food can lead to numerous food-borne diseases. Food-borne illness is a major global public health issue, which can damage trade, tourism, and economic growth.

2. SIGNIFICANCE

Food safety and quality have gained worldwide significance due to several factors:

- **Changing Lifestyles:** More people are eating outside their homes, where food is prepared in bulk and handled by many individuals, increasing contamination risks.
- **Processed and Packaged Foods:** The increasing demand for processed and packaged foods necessitates quality control for both raw and finished products.
- **Complex Logistics:** The long gap between food processing and consumption requires robust risk assessment and safety management during mass production and distribution.
- **Emerging Pathogens:** Microbial adaptations and increased international travel have contributed to a rise in food-borne diseases, with many new pathogens being discovered in recent decades.
- **International Trade:** As a signatory to the World Trade Organisation (WTO), India must adhere to international food safety and quality standards to protect consumers and facilitate trade.

- **Contaminants:** Environmental pollution and the use of agricultural pesticides and food additives make food analysis imperative.

3. BASIC CONCEPTS

3.1 Food Safety

Food safety is the assurance that food is acceptable for human consumption as intended. This concept is linked to toxicity (a substance's capacity to cause harm) and hazard (the probability of harm occurring). Food hazards are categorized as:

- **Physical Hazards:** Foreign materials not normally found in food, such as stones, hair, or parts of pests.
- **Chemical Hazards:** Harmful chemicals or substances intentionally or unintentionally added to food, including pesticides, toxic metals, and unapproved additives.
- **Biological Hazards:** Living organisms, particularly microorganisms like bacteria, viruses, and parasites that cause disease.
 - **Food Infection:** Caused by ingesting live pathogenic organisms, like Salmonella, which then multiply in the body.
 - **Food Intoxication:** Occurs when harmful toxins produced by bacteria, such as Staphylococcus aureus, are present in the food, even if the bacteria themselves have been killed.
- **Contamination** is the presence of harmful or objectionable foreign substances in food, while **adulteration** is the process of lowering food quality by adding inferior materials or extracting valuable ingredients.

3.2 Food Quality

Food quality is a holistic concept that includes negative attributes like spoilage and contamination as well as positive attributes such as color,

- (A) It improves the taste and texture of the cooking oil.
- (B) It helps in ensuring that minimum dietary requirements for a specific nutrient are met by the population.
- (C) It makes the cooking oil less expensive for consumers.
- (D) It is a method to increase the company's profits by using cheaper ingredients.

Ans :

(B) It helps in ensuring that minimum dietary requirements for a specific nutrient are met by the population.

The significance of food fortification is that it can help ensure a large population meets its minimum dietary requirements for a particular nutrient. This is especially important for staple foods that are consumed widely, like salt, flour, or oil.

- 198.** The role of the food technologists in ensuring the correct amount and stability of the added vitamin is crucial for what?
- (A) Ensuring the product's safety and effectiveness.
 - (B) Making the production process more complicated.
 - (C) Reducing the shelf life of the final product.
 - (D) Increasing the cost of the raw materials.

Ans :

(A) Ensuring the product's safety and effectiveness. Professionals in food technology are essential for the success of fortification programs. They ensure that the nutrient is added in the correct amount to be effective but safe, and that it remains stable throughout the product's shelf life.

- 199.** This is an example of food technology being used to:
- (A) Create a new type of food derivative.
 - (B) Preserve a highly perishable food item.
 - (C) Develop a new ready-to-cook meal item.
 - (D) Alter the nutrient content of a food to address health concerns.

Ans :

(D) Alter the nutrient content of a food to address health concerns.

Food technology is increasingly used to alter the nutrient content of foods to meet health needs. This can involve reducing calories or fat, or, as in this case, adding essential nutrients to combat deficiency disorders.

- 200.** The government's support for this program reflects an understanding that:

- (A) Food technology has a role to play in improving food security and public health.
- (B) All processed foods are inherently unhealthy.
- (C) Traditional foods are always nutritionally superior to processed foods.
- (D) Consumers should avoid all types of cooking oil.

Ans :

(A) Food technology has a role to play in improving food security and public health.

This case shows that food technology can be a powerful tool for public health. It can be used to improve food security and address nutritional deficiencies on a large scale, helping to improve the wellness of a nation.

Direction : Read the following case study and answer the following questions.

Rahul, a Class 12 student, is fascinated by the transformation of raw food materials into the diverse products he sees in the supermarket. He decides to explore a career in food technology. He learns that to become a professional food technologist, he would need a strong educational background, starting with a Bachelor's degree in Food Technology or a related field. His research reveals that the curriculum would cover subjects like food chemistry, food microbiology, food processing, and quality assurance. He understands that a food technologist needs a wide range of skills. For example, when developing a new product, they need knowledge of food ingredients and their properties, skills in product formulation and testing, and the ability to conduct sensory evaluations to ensure consumer acceptability. He also discovers the importance of understanding industrial practices, food safety regulations like HACCP, and food packaging and labeling. Rahul realizes that this career path would allow him to specialize in various branches, such as dairy products, beverages, or bakery, and could lead to roles in production, quality control, or research and development.

- 201.** To pursue a career as a food technologist, what is the most appropriate educational path for Rahul after Class 12?

- (A) A degree in literature or history.
- (B) A short-term course in hotel management.
- (C) A diploma in visual arts.
- (D) A Bachelor's degree in Food Technology or a related science field.

MULTIPLE CHOICE QUESTION

1. What is the primary assurance meant by the term 'food safety'?
- (A) The food is tasty and appealing
 - (B) The food is inexpensive and available
 - (C) The food is acceptable for human consumption
 - (D) The food is rich in essential nutrients

Ans :

(C) The food is acceptable for human consumption
Food safety is the assurance that food will not cause harm to the consumer when it is prepared and/or eaten according to its intended use. This concept focuses on preventing illness from food-borne hazards, making acceptability for consumption the core principle, distinct from taste, cost, or nutritional value alone.

2. Globally, what is considered a major problem of public health concern related to unsafe food?
- (A) Food wastage
 - (B) Food-borne illness
 - (C) High food prices
 - (D) Low food production

Ans :

(B) Food-borne illness
Unsafe food can lead to a large number of food-borne diseases. Globally, this is recognized as a major public health issue, impacting health, trade, and economic growth far more directly than issues like wastage or pricing, which have different implications.

3. According to the National Family Health Survey, 2015-2016, what ailment did more than 9 lakh children under five suffer from in India?
- (A) Malnutrition
 - (B) Influenza
 - (C) Vitamin deficiency
 - (D) Acute diarrhea

Ans :

(D) Acute diarrhea
The National Family Health Survey, 2015-2016, reported that over 9 lakh children younger than five years of age suffered from acute diarrhea. This highlights the direct health impact of food and water-borne illnesses on the most vulnerable populations in the country.

4. Which of the following is NOT a direct consequence of food-borne illnesses mentioned in the text?
- (A) Damage to trade and tourism
 - (B) Impediment to economic growth
 - (C) Increased agricultural subsidies
 - (D) Loss of earnings and unemployment

Ans :

(C) Increased agricultural subsidies
Food-borne illnesses can damage trade and tourism, lead to loss of earnings, unemployment, and litigation, thereby impeding economic growth. Agricultural subsidies are a matter of government policy and are not a direct consequence of the prevalence of food-borne diseases.

5. Which statement accurately reflects why food safety is critical in large-scale food production?
- (A) Food is prepared in bulk and handled by many persons
 - (B) Food is prepared in small batches, reducing contamination risk
 - (C) Food is handled by few people, ensuring better quality control
 - (D) Food is consumed immediately after preparation, preventing spoilage

Ans :

(A) Food is prepared in bulk and handled by many persons
In commercial settings, foods are prepared in bulk and handled by many individuals, which increases the chances of contamination. Additionally, the time gap between preparation and consumption can allow spoilage if not stored correctly, making safety critical.

6. What factor has contributed to the increasing incidence of food-borne microbial diseases?
- (A) Decreased international travel
 - (B) Lower human susceptibility
 - (C) Stable microbial genetics
 - (D) Microbial adaptations and antibiotic resistance

Ans :

(D) Microbial adaptations and antibiotic resistance
Microbial adaptations, antibiotic resistance, altered human susceptibility, and international travel have all contributed to the rising incidence of food-borne microbial diseases. Pathogens evolve, making them more resilient and harder

to control, which poses a significant challenge to global food safety.

7. What is the significance of India being a signatory to the World Trade Organisation (WTO) agreement in the context of food safety?
- (A) It restricts India from exporting food products
 - (B) It requires India to import all its food
 - (C) It necessitates protecting the safety of its food for trade
 - (D) It mandates that only traditional foods can be traded

Ans :

(C) It necessitates protecting the safety of its food for trade

Being a signatory to the WTO agreement provides greater access to world markets but also makes it essential for India to protect the safety and quality of its foods to facilitate trade and ensure imported foods are also safe.

8. What is the definition of 'toxicity' in the context of food safety?
- (A) The probability that harm will result from misuse
 - (B) The capacity of a substance to produce harm or injury
 - (C) The presence of a foreign substance in food
 - (D) The intentional addition of an inferior material

Ans :

(B) The capacity of a substance to produce harm or injury

Toxicity is defined as the capacity of a substance to produce harm or injury of any kind under any conditions. It refers to the intrinsic potential of a substance to be poisonous, distinct from the likelihood (hazard) of it causing harm in practice.

9. How is a 'hazard' defined in food safety?
- (A) The inherent ability of a substance to cause any harm
 - (B) The presence of any foreign object in a food product
 - (C) The relative probability that harm will result from misuse
 - (D) The acceptable limit of a contaminant in a food item

Ans :

(C) The relative probability that harm will result from misuse

A hazard is the relative probability that harm or injury will result when a substance is not used in a prescribed manner and quantity. It combines the toxicity of a substance with the likelihood of exposure to it in a harmful way.

10. Which of the following is classified as a physical hazard in food?
- (A) Pesticide residue
 - (B) Salmonella bacteria
 - (C) Food preservatives
 - (D) Hair and stones

Ans :

(D) Hair and stones

A physical hazard is any physical material not normally found in food which can cause illness or injury. Examples include items like wood, stones, parts of pests, and hair. Pesticides are chemical hazards, and Salmonella is a biological hazard.

11. Which of the following is an example of a chemical hazard in food?
- (A) Fragments of bone
 - (B) Stems and seeds
 - (C) Viruses and molds
 - (D) Pesticides and toxic metals

Ans :

(D) Pesticides and toxic metals

Chemical hazards are chemicals or deleterious substances that may be intentionally or unintentionally added to foods. This category includes pesticides, chemical residues, toxic metals, and certain food additives, distinguishing them from physical or biological contaminants.

12. Which category of food hazards do microbiological organisms like bacteria and viruses belong to?
- (A) Biological hazards
 - (B) Physical hazards
 - (C) Chemical hazards
 - (D) Environmental hazards

Ans :

(A) Biological hazards

Biological hazards are living organisms, which include microbiological organisms such as bacteria, viruses, yeasts, molds, and protozoa. These organisms can cause illness through infection or intoxication and are a primary focus of food safety management.

13. What is the key difference between a food infection and a food intoxication?

- (A) Food infection is caused by toxins, while intoxication is by live organisms
- (B) Food infection results from live pathogens, while intoxication is from their toxins
- (C) Food infection is a chemical hazard, while intoxication is a biological one
- (D) Food infection has mild symptoms, while intoxication has severe ones

Ans :

(B) Food infection results from live pathogens, while intoxication is from their toxins

A food infection results from ingesting live pathogenic organisms that multiply in the body. In contrast, food intoxication is caused by consuming toxins produced by bacteria, which can be harmful even if the bacteria themselves have been killed.

- 14.** A cook cuts raw chicken on a chopping board and then, without washing it, uses the same board to chop vegetables for a salad. This is a classic example of which food safety issue?
- (A) Food intoxication
 - (B) Physical contamination
 - (C) Cross-contamination
 - (D) Chemical hazard

Ans :

(C) Cross-contamination

This scenario describes cross-contamination, where harmful bacteria like Salmonella from raw meat are transferred to a ready-to-eat food like salad. This is a common way pathogens spread, highlighting the need for proper hygiene and separation of raw and cooked foods.

- 15.** Which bacterium, commonly found in the nasal passages, throat, and on the skin of healthy individuals, can produce harmful toxins in food?
- (A) Salmonella
 - (B) Norovirus
 - (C) Rotavirus
 - (D) Staphylococcus aureus

Ans :

(D) Staphylococcus aureus

Staphylococcus aureus is present in the nasal passages, throat, and on the skin and hair of about 50% of healthy individuals. People carrying this organism can contaminate food, where the bacteria can produce toxins that cause food intoxication.

- 16.** What is the term for the presence of harmful or objectionable foreign substances in food, such as chemicals or micro-organisms?
- (A) Adulteration
 - (B) Fortification
 - (C) Contamination
 - (D) Homogenization

Ans :

(C) Contamination

Contamination is defined as the presence of harmful or objectionable foreign substances in food, which can include chemicals, micro-organisms, or dilutants, occurring at any stage from processing to storage. It is distinct from adulteration, which often implies intentionality.

- 17.** What is food adulteration?
- (A) The process of improving the nutritional value of food
 - (B) The process where food quality is lowered by adding inferior material
 - (C) The presence of any foreign substance in food
 - (D) The process of ensuring food is safe for consumption

Ans :

(B) The process where food quality is lowered by adding inferior material

Food adulteration is the process in which the quality of food is lowered, either by adding an inferior quality material or by extracting a valuable ingredient. This intentional act degrades the product and can make it unsafe.

- 18.** Food quality is a holistic concept that includes which of the following?
- (A) Both positive and negative attributes, including safety and flavor
 - (B) Only the price and availability of the food product
 - (C) Only negative attributes like spoilage and contamination
 - (D) Only positive attributes like color, flavor, and texture

Ans :

(A) Both positive and negative attributes, including safety and flavor

Food quality is a comprehensive concept that refers to the attributes influencing a product's value. This includes negative aspects like spoilage and safety hazards, as well as positive ones like color, flavor, texture, and nutritional traits.

- 31.** What does the term 'Good Manufacturing Practices' (GMP) refer to?
- (A) A system to ensure manufacturers take proactive steps for product safety
 - (B) A set of marketing strategies for food products
 - (C) A guideline for employee salaries in the food industry
 - (D) A standard for the architectural design of food factories

Ans :

(A) A system to ensure manufacturers take proactive steps for product safety
Good Manufacturing Practices (GMP) are a component of quality assurance aimed at ensuring manufacturers and processors proactively take steps to make their products safe and prevent contamination and false labeling.

- 32.** What is the primary purpose of Hazard Analysis Critical Control Points (HACCP)?
- (A) To test only the final food product for safety
 - (B) To provide assurance about the safety of food through a preventive approach
 - (C) To punish food handlers who make mistakes
 - (D) To increase the cost of food production

Ans :

(B) To provide assurance about the safety of food through a preventive approach
HACCP is a preventive approach to food safety. It involves identifying potential hazards at each step of the food chain and implementing controls to prevent problems, rather than relying solely on end-product testing.

- 33.** Which of the following is NOT a benefit of implementing HACCP?
- (A) It enables detection of hazards at any stage of processing
 - (B) It assures consistently good quality products
 - (C) It allows for efficient and cost-effective use of resources
 - (D) It increases the need for end-product inspection and testing

Ans :

(D) It increases the need for end-product inspection and testing
HACCP is a preventive system that reduces the reliance on end-product testing because it builds safety into the process. While some end-product testing is still important, HACCP's goal is to prevent issues from occurring in the first place,

thus decreasing the overall need for extensive final checks.

- 34.** Which Act in India places the primary responsibility for safe food on producers and suppliers through systems like HACCP, GMP, and GHP?

- (A) The Prevention of Food Adulteration Act, 1954
- (B) The Meat Food Products Order, 1973
- (C) The Food Safety and Standards Act, 2006
- (D) The Vegetable Oil Products Order, 1947

Ans :

(C) The Food Safety and Standards Act, 2006
The Food Safety and Standards Act (FSSA), 2006, places the primary responsibility for producing and supplying safe food on the businesses themselves. It mandates the use of systems like HACCP, GMP, and GHP to ensure consumer protection.

- 35.** A food processing company wants to implement a system to identify potential biological, chemical, or physical hazards at every step, from receiving raw materials to shipping the final product. Which system should it adopt?

- (A) Hazard Analysis Critical Control Point (HACCP)
- (B) ISO 9000
- (C) Good Handling Practices (GHP)
- (D) Agmark Certification

Ans :

(A) Hazard Analysis Critical Control Point (HACCP)

HACCP is the specific system designed for this purpose. It involves a detailed evaluation of each step in a process to identify potential food hazards and establish controls to prevent them, ensuring safety throughout the food chain.

- 36.** A professional working in food safety who has expertise in Food Chemistry, Food Processing, Food Analysis, and Quality Control can find employment in which type of agency?

- (A) Financial institutions
- (B) Marketing and advertising agencies
- (C) Regulatory and public health agencies
- (D) Construction and engineering firms

Ans :

(C) Regulatory and public health agencies
Professionals with this knowledge base are required in regulatory and public health agencies

- 25.** Which of the following is a key function of the Food Safety and Standards Authority of India (FSSAI)?
- (A) Providing financial loans to food businesses
 - (B) Directly manufacturing and selling food products
 - (C) Framing regulations for food standards and guidelines
 - (D) Promoting the use of pesticides in agriculture

Ans :

(C) Framing regulations for food standards and guidelines

One of the primary functions of FSSAI is the framing of regulations to lay down science-based standards and guidelines for food articles. It also oversees the enforcement of these standards to ensure the availability of safe and wholesome food.

- 26.** What is the primary objective of the Codex Alimentarius Commission (CAC)?
- (A) To promote a single type of cuisine globally
 - (B) To set international food standards to protect consumer health
 - (C) To fund agricultural research in developing nations
 - (D) To regulate the price of food in international markets

Ans :

(B) To set international food standards to protect consumer health

The Codex Alimentarius Commission (CAC) is an intergovernmental body established with the objective of setting international standards to protect consumer health and facilitate fair practices in the food and agricultural trade.

- 27.** What is a key difference between Codex standards and ISO standards?
- (A) Codex is voluntary while ISO is mandatory
 - (B) Codex standards are reviewed every five years, while ISO standards are slow to change
 - (C) Codex is for food only, while ISO has no standards related to food
 - (D) Codex describes minimal acceptable practices, while ISO describes current industrial practices

Ans :

(D) Codex describes minimal acceptable practices, while ISO describes current industrial practices
A key distinction is that Codex standards are used to develop national regulations and describe

minimal acceptable practices. In contrast, ISO standards are voluntary, reviewed more frequently, and tend to describe current standard industrial practices for quality management.

- 28.** The ISO 9000 series of standards is primarily concerned with what aspect of an organization?
- (A) Environmental impact
 - (B) Financial profitability
 - (C) Employee satisfaction
 - (D) Quality Management

Ans :

(D) Quality Management

ISO 9000 is an international reference for quality requirements and is specifically concerned with an organization's "Quality Management" system. It provides a framework for ensuring that products and services consistently meet customer and regulatory requirements.

- 29.** What is the main objective of the World Trade Organisation (WTO)?
- (A) To set global food safety standards
 - (B) To provide humanitarian aid during food shortages
 - (C) To help trade flow smoothly, freely, and predictably
 - (D) To control the production of agricultural goods worldwide

Ans :

(C) To help trade flow smoothly, freely, and predictably

The primary objective of the WTO is to help trade flow smoothly, freely, fairly, and predictably. It achieves this by administering trade agreements, acting as a forum for negotiations, settling disputes, and assisting countries with trade policy issues.

- 30.** An effective food control system must consist of which two components?
- (A) Marketing and advertising
 - (B) Food inspection and analytical capability
 - (C) Product development and pricing
 - (D) Agricultural production and harvesting

Ans :

(B) Food inspection and analytical capability

An effective food control system relies on two main pillars: food inspection to verify compliance with regulations, and analytical capability, which involves well-equipped laboratories to test food for contaminants and pathogens. Both are essential for enforcement.

- (A) Salmonella and Staphylococcus
- (B) HIV and Influenza
- (C) E. coli and Listeria
- (D) Norovirus and Rotavirus

Ans :

- (D) Norovirus and Rotavirus

The text states that Norovirus, Rotavirus, and hepatitis E contribute to about 70 percent of cases of food-borne illnesses, highlighting their significant impact on public health.

- 55.** A consumer finds small stones in a bag of rice. This is an example of which type of hazard?

- (A) Biological
- (B) Chemical
- (C) Physical
- (D) Microbiological

Ans :

- (C) Physical

A physical hazard is any physical material not normally found in food. Stones are a classic example of this, as they are foreign objects that can cause injury if consumed.

- 56.** Consider the following statements regarding food safety challenges:

1. Increased international travel has no impact on food-borne diseases.
2. Logistics for bulk food transport are simple with no risk.
3. Pollution in the atmosphere, soil, and water can contaminate food.
4. Use of additives like preservatives and colorants requires food analysis.

Which of the above statements are correct?

- (A) 1 and 2
- (B) 3 and 4
- (C) 1, 2 and 3
- (D) 2, 3 and 4

Ans :

- (B) 3 and 4

Pollution is a source of contaminants in food. The use of additives necessitates analysis to ensure they are within safe limits. Conversely, international travel increases the spread of disease and bulk food logistics are complex and pose risks.

- 57.** Match the organization in Column I with its primary function in Column II.

	Column I		Column II
1	FSSAI	a	Promotes international standards for quality management
2	CAC	b	Administers trade agreements and settles disputes
3	ISO	c	Consolidates and regulates food laws within India
4	WTO	d	Develops international 'Food Code' to protect consumers

- (A) 1-c, 2-d, 3-a, 4-b
- (B) 1-d, 2-c, 3-b, 4-a
- (C) 1-a, 2-b, 3-d, 4-c
- (D) 1-b, 2-a, 3-c, 4-d

Ans :

- (A) 1-c, 2-d, 3-a, 4-b

FSSAI is India's national food regulatory body. CAC develops the Codex Alimentarius or 'Food Code'. ISO promotes voluntary international standards for quality management like ISO 9000. WTO's objective is to help trade flow smoothly.

- 58.** A food company wants to voluntarily certify the quality of its processed mango juice to gain consumer trust. Which Indian certification mark should it apply for?

- (A) Agmark
- (B) HACCP
- (C) ISO 9000
- (D) ISI mark

Ans :

- (D) ISI mark

The Bureau of Indian Standards (BIS) runs a voluntary certification scheme known as the 'ISI' mark specifically for processed foods and other consumer goods. Agmark is for agricultural products, while HACCP and ISO 9000 are management systems, not product marks.

- 59.** Why is it crucial for food inspectors to have analytical capability in their food control system?

- (A) To personally taste every food sample for quality
- (B) To have well-equipped labs for detecting contaminants and pathogens
- (C) To create marketing materials for safe food products
- (D) To provide financial advice to food businesses

Ans :

as food legislators, safety officers, and analysts. Their expertise is crucial for enforcing food laws and protecting public health.

- 37.** Which of the following is a potential career for someone trained in food quality and safety?

(A) Food Auditor
(B) Graphic Designer
(C) School Teacher (General)
(D) Social Media Manager

Ans :

(A) Food Auditor

One can work as a food auditor after undergoing the required training in food safety and quality management systems. This role involves assessing whether food businesses comply with safety standards and regulations.

- 38.** Consider the following statements about food safety:

- Food safety management is only important at the final stage of consumption.
- A food hazard can enter the food chain at any stage.
- Adequate control throughout the food chain is essential for safety.

Which of the above statements are correct?

(A) 1 and 2
(B) 2 and 3
(C) 1 and 3
(D) 1, 2 and 3

Ans :

(B) 2 and 3

A food hazard can enter the food at any stage of the food chain, from production to consumption. Therefore, adequate control throughout the entire food chain is essential, making statement 1 incorrect and statements 2 and 3 correct.

- 39.** Match the food safety term in Column I with its correct description in Column II.

	Column I		Column II
1.	Physical Hazard	a.	Salmonella in raw chicken
2.	Chemical Hazard	b.	A piece of glass in a jar of jam
3.	Biological Hazard	c.	Toxin produced by Staphylococcus aureus
4.	Food Intoxication	d.	Pesticide residue on an apple

(A) 1-b, 2-d, 3-a, 4-c
(B) 1-d, 2-b, 3-c, 4-a
(C) 1-b, 2-a, 3-d, 4-c
(D) 1-c, 2-d, 3-a, 4-b

Ans :

(A) 1-b, 2-d, 3-a, 4-c

A piece of glass is a physical hazard. Pesticide residue is a chemical hazard. Salmonella is a biological hazard causing food infection. A toxin produced by bacteria causes food intoxication. This matching correctly aligns each term with its example.

- 40.** Identify the incorrect pair from the following options.

(A) Good Manufacturing Practices (GMP) - Proactive steps for product safety
(B) Good Handling Practices (GHP) - Focus on hygiene of food handlers
(C) Food Safety and Standards Act (FSSA) - Consolidates Indian food laws
(D) Hazard Analysis Critical Control Point (HACCP) - Relies only on end-product testing

Ans :

(D) Hazard Analysis Critical Control Point (HACCP) - Relies only on end-product testing
HACCP is a preventive system that reduces the need for end-product testing by building controls into the process. It does not rely solely on testing the final product. The other pairs are correctly matched with their descriptions.

- 41.** Why has the demand for pre-packaged spices and mixes increased, making their quality a public health concern?

(A) Traditional home processing of spices has become more popular
(B) Pre-packaged spices are known to be less pure
(C) In former times, spices were processed at home ensuring purity
(D) Consumers no longer use spices in their cooking

Ans :

(C) In former times, spices were processed at home ensuring purity
In the past, spices and condiments were often processed at home, so their purity was not a major concern. With the rising demand for pre-packaged and processed spices, their quality and safety have become a significant public health issue.

Ans :

(B) It consolidated various food-related laws under one authority

The FSSAI was established to consolidate the various acts and orders related to food that were previously handled by different ministries and departments. This created a single point of reference for food safety and standards in India.

66. All of the following are functions of the FSSAI EXCEPT:

- (A) Providing training programs for people in food businesses.
- (B) Collecting data on food consumption and biological risks.
- (C) Issuing ISI marks for processed foods.
- (D) Promoting general awareness about food safety.

Ans :

(C) Issuing ISI marks for processed foods.

The FSSAI's functions include providing training, collecting data, and promoting awareness. The ISI mark, a voluntary certification, is run by the Bureau of Indian Standards (BIS), not the FSSAI.

67. Consider the following statements about international food safety bodies:

1. The CAC is an intergovernmental body establishing food standards.
2. ISO is a governmental federation of national standards bodies.
3. WTO's main objective is to set food safety standards.
4. India is a member of the Codex Alimentarius Commission.

Which of the above statements are correct?

- (A) 1 and 4
- (B) 2 and 3
- (C) 1, 2, and 4
- (D) All are correct

Ans :

(A) 1 and 4

The CAC is an intergovernmental body setting food standards, and India is a member. ISO is a non-governmental federation. WTO's main objective is related to the smooth flow of trade, not setting the standards themselves. Therefore, statements 1 and 4 are correct.

68. Match the type of food regulation in Column I with the correct example in Column II.

	Column I		Column II
1.	Indian National Law	a.	ISO 9000
2.	Voluntary Indian Mark	b.	Codex Alimentarius
3.	International Standard	c.	Agmark
4.	International Guideline	d.	FSSA, 2006

(A) 1-d, 2-c, 3-a, 4-b

(B) 1-c, 2-d, 3-b, 4-a

(C) 1-d, 2-a, 3-c, 4-b

(D) 1-b, 2-c, 3-a, 4-d

Ans :

(A) 1-d, 2-c, 3-a, 4-b

FSSA, 2006 is the primary national food law in India. Agmark is a voluntary certification mark in India. ISO 9000 is an international standard for quality management. Codex Alimentarius provides international guidelines and standards.

69. A new food processing unit is being set up. The manager wants to ensure that the risk of contamination is minimized from the farm stage all the way to the final consumer. Which practice should they focus on implementing?

- (A) Good Advertising Practices
- (B) Good Handling Practices (GHP)
- (C) Good Employee compensation Practices
- (D) Good Product Pricing Practices

Ans :

(B) Good Handling Practices (GHP)

Good Handling Practices (GHP) represent a comprehensive approach that covers the entire food chain, from farm to store or consumer. Its purpose is to identify potential risks at every stage and implement procedures to minimize contamination.

70. Which of the following job opportunities is listed as an avenue for entrepreneurship in the field of food safety?

- (A) Government Food Inspector
- (B) University Professor
- (C) Quality Control Lab Analyst
- (D) Food Safety Consultancy

Ans :

(D) Food Safety Consultancy

The text lists food safety consultancy as an entrepreneurial activity one can initiate in this field, along with establishing an analytical food

The inspector would report a failure to comply with which practice?

- (A) Good Marketing Practices
- (B) Good Financial Practices
- (C) Good Handling Practices (GHP)
- (D) Good Agricultural Practices

Ans :

(C) Good Handling Practices (GHP)

GHP ensures that all persons who handle food have good hygiene practices. The scenario described is a clear violation of hygienic food handling, which falls directly under the purview of GHP.

49. What is the primary role of a food analyst or public analyst?

- (A) To market and sell food products
- (B) To develop new food recipes for restaurants
- (C) To manage the finances of a food company
- (D) To analyze food in laboratories for quality and safety

Ans :

(D) To analyze food in laboratories for quality and safety

Professionals in food safety, such as food analysts or public analysts, are employed in laboratories to analyze food for its composition, quality, and safety, ensuring it complies with regulations.

50. Identify the correct pair from the following options related to food safety careers.

- (A) Food Auditor - Develops advertising campaigns
- (B) Quality Control Manager - Manages employee payroll
- (C) R&D Department - Creates new products and technologies
- (D) Food Inspector - Provides loans to food businesses

Ans :

(C) R&D Department - Creates new products and technologies

The Research and Development (R&D) department in a food industry is responsible for modifying existing products, developing new ones, and researching new technologies. The other options incorrectly match the career with its function.

51. Assertion (A): Effective food control systems are necessary to facilitate international trade.

Reason (R): Countries need to ensure that their exported foods are safe and that imported foods meet quality standards.

(A) Both A and R are true and R is the correct explanation of A.

(B) Both A and R are true but R is not the correct explanation of A.

(C) A is true but R is false.

(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

To facilitate international trade, especially under WTO agreements, countries must have effective food standards and control systems. This is because they need to assure trading partners of the safety of their exports and also protect their own consumers from unsafe imports.

52. What is the term used for the written specifications and procedures developed by a company for its own use, often based on national standards?

- (A) Regional Standards
- (B) International Standards
- (C) Company Standards
- (D) Global Standards

Ans :

(C) Company Standards

Company Standards are those prepared by a company for its own use. These internal standards help ensure consistency and quality in their products and are typically aligned with or based on national standards.

53. Why is it stated that foods that smell and appear good are not necessarily safe?

- (A) Because good appearance is a sign of high preservative content
- (B) Because harmful toxins produced by bacteria often cannot be detected by smell or taste
- (C) Because physical hazards like stones improve the flavor of food
- (D) Because the best-tasting foods are often the most contaminated

Ans :

(B) Because harmful toxins produced by bacteria often cannot be detected by smell or taste

The toxins produced by certain bacteria, which cause food intoxication, cannot be detected by smell, appearance, or taste. Therefore, a food item can look and smell perfectly fine but still contain harmful toxins, making it unsafe to eat.

54. Which two viruses are mentioned as contributing to about 70 percent of food-borne illness cases?

19. Which of the following is NOT a salient point for ensuring food safety and quality in food service?
- (A) Quality of raw materials and water
 - (B) Maximizing the time between food preparation and service
 - (C) Storage of food at appropriate temperature
 - (D) Cleanliness of premises, personnel, and equipment

Ans :

(B) Maximizing the time between food preparation and service

Ensuring food safety requires storing food at appropriate temperatures, maintaining cleanliness, and using quality raw materials. Maximizing the time between preparation and service without proper storage would increase the risk of spoilage and contamination, not enhance safety.

20. Which of the following represents the highest level of food standards?
- (A) Company Standards
 - (B) National Standards
 - (C) Regional Standards
 - (D) International Standards

Ans :

(D) International Standards

Food standards exist at four levels. International Standards, published by bodies like ISO and the Codex Alimentarius Commission, are at the top, followed by regional, national, and company standards. International standards facilitate global trade and cooperation.

21. In India, which authority is responsible for issuing National Standards for food?
- (A) Bureau of Indian Standards (BIS)
 - (B) Food Safety and Standards Authority of India (FSSAI)
 - (C) The World Trade Organisation (WTO)
 - (D) Agmark

Ans :

(B) Food Safety and Standards Authority of India (FSSAI)

National Standards in India are issued by the national standards body, which is the Food Safety and Standards Authority of India (FSSAI). FSSAI was established to consolidate food-related laws and regulate food safety nationwide.

22. What does the voluntary certification mark 'Agmark' apply to?

- (A) All consumer goods
- (B) Processed foods only
- (C) Agricultural products (raw and processed)
- (D) Imported electronic goods

Ans :

(C) Agricultural products (raw and processed)

Agmark is a voluntary certification scheme specifically for agricultural products, both raw and processed. Its purpose is to grade products and safeguard the health of consumers by ensuring a certain level of quality.

23. The Food Safety and Standards Act (FSSA) was passed in which year to consolidate various food-related laws in India?

- (A) 2006
- (B) 2000
- (C) 1954
- (D) 2011

Ans :

(A) 2006

The Indian Government passed the Food Safety and Standards Act (FSSA) in 2006. This was done to integrate the various laws and regulations pertaining to food safety under a single, comprehensive piece of legislation.

24. Assertion (A): The Food Safety and Standards Act, 2006, reflects a shift from vertical standards to horizontal standards.

Reason (R): The Act focuses more on the safety of food rather than just the compositional standards of specific food products.

- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are true but R is not the correct explanation of A.
- (C) A is true but R is false.
- (D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The FSSA reflects the international shift from compositional (vertical) standards to safety (horizontal) standards. This means its primary focus is on overarching safety principles applicable to all foods, which is a horizontal approach, rather than specific compositional rules for each food type (vertical).

(B) To have well-equipped labs for detecting contaminants and pathogens

Analytical capability, meaning access to well-equipped, accredited laboratories, is essential for a food control system. It allows for the scientific detection of food contaminants, pathogens, and other hazards that cannot be identified through visual inspection alone.

60. Which of the following statements about food-borne diseases is incorrect?

- (A) Food intoxication occurs from ingesting live pathogenic organisms.
- (B) Salmonella infection can cause diarrhea, fever, and abdominal cramps.
- (C) Inadequate cooking can allow Salmonella to survive in food.
- (D) Cross-contamination is a common way for pathogens to spread.

Ans :

(A) Food intoxication occurs from ingesting live pathogenic organisms.

Food intoxication results from consuming harmful toxins produced by bacteria, not from ingesting the live organisms themselves. Ingesting live organisms leads to food infection. The other statements are correct descriptions of food-borne disease characteristics.

61. Which term describes the process in which the quality of food is lowered by the extraction of a valuable ingredient?

- (A) Contamination
- (B) Fortification
- (C) Adulteration
- (D) Pasteurization

Ans :

(C) Adulteration

Food adulteration is the process where food quality is lowered not only by adding inferior substances but also by extracting a valuable ingredient. This fraudulent practice deceives the consumer and degrades the product's value and nutritional content.

62. What was the primary objective of the Prevention of Food Adulteration Act (PFA), 1954?

- (A) To promote the export of Indian foods
- (B) To prevent the adulteration of food
- (C) To set prices for all food items
- (D) To encourage the use of food additives

Ans :

(B) To prevent the adulteration of food

The Prevention of Food Adulteration Act of 1954 was enacted by the Government of India specifically to prevent the adulteration of food and protect consumers from fraudulent and unsafe practices in the food trade.

63. Assertion (A): The HACCP system is considered a preventive approach to food safety.

Reason (R): It identifies and controls potential hazards at specific points in the process, rather than just inspecting the final product.

(A) Both A and R are true and R is the correct explanation of A.

(B) Both A and R are true but R is not the correct explanation of A.

(C) A is true but R is false.

(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

HACCP is described as a preventive approach. The reason it is preventive is that it systematically identifies potential hazards at each step (critical control points) and applies controls to prevent them, which is more effective than relying on detecting problems in the end product.

64. Which of the following is an example of a visible biological hazard in food?

- (A) Bacteria
- (B) Viruses
- (C) Yeasts
- (D) Weevils

Ans :

(D) Weevils

Biological hazards can be visible or invisible. Visible biological hazards include pests like weevils, flies, and worms that can infest food. Bacteria, viruses, and yeasts are invisible microbiological hazards.

—

65. How does the establishment of the FSSAI reflect a change in India's food safety regulation?

- (A) It decentralized food laws among more ministries
- (B) It consolidated various food-related laws under one authority
- (C) It abolished all food safety standards entirely
- (D) It focused only on voluntary product certification

- 42.** What is a primary reason for the emergence of new food-borne pathogens in recent decades?
- (A) Genetic exchange or mutations in organisms
 - (B) A decrease in global food trade
 - (C) Stagnation in food processing technologies
 - (D) Reduction in human host susceptibility

Ans :

(A) Genetic exchange or mutations in organisms
Genetic exchange or mutations in micro-organisms can create new strains with the potential to cause disease, leading to the emergence of new pathogens. This is a key factor alongside changes in host susceptibility and the environment.

- 43.** What are 'adulterants' in the context of food?
- (A) Substances used to enhance the nutritional value of food
 - (B) Substances used for making food products unsafe for consumption
 - (C) Natural components of food that cause spoilage over time
 - (D) Chemicals used to test the quality of food products

Ans :

(B) Substances used for making food products unsafe for consumption
Adulterants are defined as substances which are used for the purpose of making food products unsafe for human consumption. They are intentionally added to lower quality or for fraudulent purposes, posing a direct risk to health.

- 44.** Which of the following statements about food quality is the most accurate?
- (A) Food quality is solely determined by the absence of safety hazards
 - (B) Food safety is a preliminary attribute and a precursor of quality
 - (C) Food quality is independent of nutritional traits and sensorial properties
 - (D) High-quality food must always be expensive and difficult to prepare

Ans :

(B) Food safety is a preliminary attribute and a precursor of quality
Safety is considered a preliminary and essential attribute of quality. Food quality is a broader, holistic concept that integrates safety with other factors like nutritional traits, color, flavor, and texture to determine a product's overall value.

- 45.** Which international organization publishes the 'Codex Alimentarius' or 'Food Code'?
- (A) World Health Organization (WHO)
 - (B) World Trade Organization (WTO)
 - (C) International Organization for Standardization (ISO)
 - (D) Codex Alimentarius Commission (CAC)

Ans :

(D) Codex Alimentarius Commission (CAC)
The document 'Codex Alimentarius', which means 'Food Code', is published by the Codex Alimentarius Commission (CAC). It is a collection of internationally adopted food standards, guidelines, and codes of practice.

- 46.** Which of the following was NOT a specific food-related Order or Act in India before being consolidated under the FSSA, 2006?
- (A) Fruit and Vegetable Product Order
 - (B) Meat Food Products Order
 - (C) Consumer Protection Act
 - (D) Vegetable Oil Products Order

Ans :

(C) Consumer Protection Act
The Fruit Product Order, Meat Food Products Order, and Vegetable Oil Products Order were specific food-related laws. The Consumer Protection Act is a broader law dealing with consumer rights across all goods and services, not just food. FSSA consolidated food-specific acts.

- 47.** What does the term 'Good Handling Practices' (GHP) primarily focus on?
- (A) A comprehensive approach to minimize contamination risk from farm to consumer
 - (B) The financial management of a food business
 - (C) The marketing and advertising of food products
 - (D) The speed of food delivery to the market

Ans :

(A) A comprehensive approach to minimize contamination risk from farm to consumer
Good Handling Practices (GHP) indicate a comprehensive approach covering the entire food chain, from the farm to the consumer. The goal is to identify potential sources of risk and implement procedures to minimize contamination.

- 48.** A food inspector visits a restaurant and finds that the kitchen staff do not wash their hands after handling raw meat and before preparing salads.

laboratory or providing food safety and sanitation education.

- 71.** Identify the correct pairing of a food hazard type and its example.
- (A) Physical Hazard - Salmonella
 - (B) Chemical Hazard - Hair
 - (C) Biological Hazard - Cleaning chemicals
 - (D) Microbiological Hazard - Viruses

Ans :

(D) Microbiological Hazard - Viruses
Viruses are a type of invisible/microbiological hazard. Salmonella is biological, hair is physical, and cleaning chemicals are chemical hazards. Therefore, the pairing of microbiological hazard and viruses is correct.

- 72.** Why is there a need for food safety management systems like GMP and HACCP in modern food production?
- (A) To increase the number of food recalls
 - (B) To ensure food is produced only in small, home-based settings
 - (C) To address the complexities of mass production and long supply chains
 - (D) To eliminate the need for any food safety regulations

Ans :

(C) To address the complexities of mass production and long supply chains
Modern food production involves mass production, complex transport logistics, and a long gap between processing and consumption. This increases risks, making systematic management systems like GMP and HACCP essential to ensure safety throughout the chain.

- 73.** What kind of food is most commonly associated with Salmonella infection if not handled or cooked properly?
- (A) Raw milk and eggs
 - (B) Canned vegetables
 - (C) Packaged biscuits
 - (D) Carbonated soft drinks

Ans :

(A) Raw milk and eggs
Salmonella exists in the intestinal tract of animals, and raw milk and eggs are mentioned as common sources of this bacterium. Proper cooking is required to destroy the pathogen and prevent infection.

- 74.** An outbreak of illness occurs after several people eat potato salad from a deli. The investigation reveals that the illness was caused by a toxin produced by bacteria in the salad, which was left at room temperature for too long. What is this type of illness called?
- (A) Food Infection
 - (B) Food Allergy
 - (C) Food Infestation
 - (D) Food Intoxication

Ans :

(D) Food Intoxication
This is an example of food intoxication, where the illness is caused by consuming toxins produced by organisms when the food is not kept at the correct temperature. The illness is from the toxin, not the live bacteria itself.

- 75.** Which statement about professionals in the food quality sector is incorrect?
- (A) They need expertise in Food Chemistry and Food Analysis.
 - (B) Knowledge of Food Laws and Sensory Evaluation is desirable.
 - (C) They are only employed in governmental regulatory agencies.
 - (D) They can work as food auditors or in quality control labs.

Ans :

(C) They are only employed in governmental regulatory agencies.
Professionals in this field have diverse employment opportunities. While they can work for regulatory agencies, they are also employed in large food industries, voluntary agencies, quality control labs, and as consultants or auditors.

- 76.** Assertion (A): The 'ISI' mark is a mandatory certification for all agricultural products in India. Reason (R): The Bureau of Indian Standards (BIS) runs the 'ISI' mark scheme for various consumer goods.
- (A) Both A and R are true and R is the correct explanation of A.
 - (B) Both A and R are true but R is not the correct explanation of A.
 - (C) A is true but R is false.
 - (D) A is false but R is true.

Ans :

(D) A is false but R is true.

The 'ISI' mark scheme is run by the BIS for consumer goods, including processed foods, so R is true. However, the certification is voluntary, not mandatory, and it is for processed foods, not specifically agricultural products (which use Agmark). Therefore, A is false.

77. Consider the following statements about HACCP:

1. It is a reactive system that detects problems only after they occur.
2. It involves identifying hazards at each step in the food chain.
3. It helps producers utilize resources efficiently and in a cost-effective manner.

Which of the above statements are correct?

- (A) 1 and 2
- (B) 2 and 3
- (C) 1 and 3
- (D) 1, 2 and 3

Ans :

- (B) 2 and 3

HACCP is a preventive, not reactive, approach. It involves identifying hazards at each stage and enables the efficient and cost-effective use of resources for assuring food safety. Thus, statements 2 and 3 are correct.

78. Match the hazard in Column I with its category in Column II.

	Column I		Column II
1.	Wood chips	a.	Microbiological Hazard
2.	Adulterants	b.	Physical Hazard
3.	Protozoa	c.	Invisible Biological Hazard
4.	Moulds	d.	Chemical Hazard

- (A) 1-b, 2-d, 3-c, 4-a
- (B) 1-d, 2-b, 3-a, 4-c
- (C) 1-b, 2-d, 3-a, 4-c
- (D) 1-c, 2-a, 3-d, 4-b

Ans :

- (A) 1-b, 2-d, 3-c, 4-a

Wood chips are a physical hazard. Adulterants are classified as chemical hazards. Protozoa and Moulds are both types of invisible/microbiological hazards. The matching correctly aligns the items. Note: While 'c' and 'a' are similar, protozoa and molds are both microbiological.

79. What is the primary implication of the FSSAI adopting a 'science-based' approach to setting food standards?

- (A) Standards are based on traditional recipes and cooking methods.
- (B) Standards are determined by consumer preference and taste.
- (C) Standards are based on scientific evidence and risk assessment.
- (D) Standards are based on the economic cost of production.

Ans :

- (C) Standards are based on scientific evidence and risk assessment.

FSSAI was established for laying down science-based standards for food. This means that regulations and limits for contaminants, additives, etc., are based on scientific risk assessment to protect human health, rather than on subjective or economic factors alone.

80. What is the purpose of the qualitative test using hydrochloric acid and a sucrose solution on a ghee sample?

- (A) To detect the presence of starch
- (B) To detect the presence of metanil yellow
- (C) To detect the presence of light berries
- (D) To detect the presence of sesame oil

Ans :

- (D) To detect the presence of sesame oil

The practical guide describes a test where concentrated hydrochloric acid and a sucrose solution are added to a ghee sample. The development of a pink color indicates the presence of sesame oil, which is a common adulterant in ghee.

81. In the test for detecting starch in milk, what chemical is added drop by drop to the sample?

- (A) Hydrochloric acid
- (B) Iodine solution
- (C) Copper acetate solution
- (D) Petroleum ether

Ans :

- (B) Iodine solution

The procedure for detecting starch as an adulterant in milk or ice cream involves adding an iodine solution to the sample. The presence of starch is indicated by the appearance of a blue color, a classic chemical reaction.

82. According to the practical, what percentage of stalks in tea leaves is considered the maximum permissible limit?

- (A) 10 per cent

- (B) 15 per cent
- (C) 25 per cent
- (D) 50 per cent

Ans :

- (C) 25 per cent

The practical for testing tea leaves states that the proportion of stalks should be less than 25 per cent. A higher percentage suggests that the quality of the tea is poor, as stalks are considered an inferior part of the product.

- 83.** In the test for light berries in black pepper, why does a higher percentage of floating berries suggest adulteration?
- (A) Floating indicates the berries have been extracted from
 - (B) Light berries are heavier and sink faster
 - (C) Light berries have a stronger flavor than heavier ones
 - (D) Only spoiled berries float in the alcohol-water mixture

Ans :

- (A) Floating indicates the berries have been extracted from

The practical suggests that a high percentage of light berries, which float in an alcohol-water mixture, indicates that valuable extracts may have been removed from them. This lowers the quality of the black pepper, making it an adulteration.

- 84.** A food analyst tests a sample of asafetida (hing) by dissolving it in petroleum ether and adding copper acetate solution. A blue color develops in the ether layer. What does this result indicate?
- (A) The presence of permitted flavor enhancers
 - (B) The asafetida is pure and of high quality
 - (C) The presence of starch as an adulterant
 - (D) The presence of colophenial resins

Ans :

- (D) The presence of colophenial resins

The development of a blue or green color in the ether layer during this specific test indicates the presence of colophenial resins. These resins are not permitted in asafetida and are considered a form of adulteration.

- 85.** Which statement accurately describes the purpose of Good Manufacturing Practices (GMP)?
- (A) GMP is a reactive tool to punish manufacturers after a problem occurs.
 - (B) GMP helps refine compliance and performance by producers to ensure safety.

- (C) GMP is primarily focused on the marketing and advertising of food products.
- (D) GMP is a government scheme to provide financial aid to food businesses.

Ans :

- (B) GMP helps refine compliance and performance by producers to ensure safety.

GMP is a proactive quality assurance tool that helps manufacturers refine their compliance and performance. It enables them to minimize or eliminate contamination and false labeling, thereby protecting the consumer and ensuring product safety.

- 86.** How does HACCP differ from traditional end-product inspection?
- (A) HACCP is a preventive approach, while inspection is a reactive one.
 - (B) HACCP is less scientific and relies on visual checks only.
 - (C) HACCP is more expensive and time-consuming than end-product testing.
 - (D) HACCP focuses only on raw materials, not the processing steps.

Ans :

- (A) HACCP is a preventive approach, while inspection is a reactive one.

In contrast to end-product inspection which detects problems after they occur (reactive), HACCP is a preventive approach. It identifies and controls potential hazards at various stages of production to ensure a safe end product.

- 87.** What has been a significant driver for the growth and increased responsibility in India's food processing industry?
- (A) A decrease in the Gross Domestic Product (GDP)
 - (B) A shift towards consuming only raw, unprocessed foods
 - (C) Increased international trade and the Food Safety and Standards Act
 - (D) A decline in consumer demand for packaged foods

Ans :

- (C) Increased international trade and the Food Safety and Standards Act

The text states that the growth in food processing, impetus to international trade, and the implementation of the FSSA, 2006 have increased the responsibility to achieve food safety,

thus widening the scope for professionals in this area.

- 88.** A professional in food safety and quality needs knowledge in all the following areas EXCEPT:
- (A) Food Chemistry and Food Microbiology
 - (B) Food Laws and Sensory Evaluation
 - (C) Food Processing and Quality Control
 - (D) Graphic Design and Digital Marketing

Ans :

(D) Graphic Design and Digital Marketing
While marketing is part of the food business, core knowledge for a food safety professional includes Food Chemistry, Microbiology, Laws, Processing, and Quality Control. Graphic design and digital marketing are separate specializations.

- 89.** Which role involves assessing food businesses to ensure they comply with safety management systems like HACCP and ISO?
- (A) Food Auditor
 - (B) Food Stylist
 - (C) Public Relations Officer
 - (D) Human Resources Manager

Ans :

(A) Food Auditor
A Food Auditor is a professional who, after undergoing required training, is responsible for auditing food businesses to verify their compliance with established food safety and quality standards and systems like HACCP or ISO.

- 90.** Consider the following potential career paths in food quality and safety:
1. Analyst in a Quality Control Laboratory.
 2. Specialist in HACCP implementation.
 3. Food inspector in the public sector.
 4. Scientific writer on food safety topics.
- Which of these are viable career avenues in this field?
- (A) 1 and 3 only
 - (B) 2 and 4 only
 - (C) 1, 2, and 3 only
 - (D) 1, 2, 3, and 4

Ans :

(D) 1, 2, 3, and 4
The text lists a wide range of career avenues, including working as analysts in quality control labs, specialists in HACCP, food inspectors in the public or private sector, and scientific writers. All four options are valid careers in this field.

- 91.** Match the term in Column I with its most relevant concept in Column II.

	Column I		Column II
1.	Toxicity	a.	Probability of harm from misuse
2.	Hazard	b.	Intrinsic capacity to cause harm
3.	Contamination	c.	Intentional lowering of quality
4.	Adulteration	d.	Presence of harmful foreign substance

- (A) 1-b, 2-a, 3-d, 4-c
- (B) 1-a, 2-b, 3-c, 4-d
- (C) 1-b, 2-c, 3-d, 4-a
- (D) 1-d, 2-a, 3-b, 4-c

Ans :

(A) 1-b, 2-a, 3-d, 4-c
Toxicity is the intrinsic capacity of a substance to cause harm. A hazard is the probability of that harm occurring. Contamination is the presence of a foreign substance. Adulteration is the intentional lowering of quality.

- 92.** A street food vendor prepares food in an open area with flies buzzing around, uses unwashed hands, and stores food at room temperature for hours. A customer who eats this food is at high risk of illness due to a failure in:
- (A) Food packaging
 - (B) Food hygiene
 - (C) Food pricing
 - (D) Food fortification

Ans :

(B) Food hygiene
The scenario describes multiple failures in food hygiene, including lack of cleanliness of the premises and personnel, improper food storage, and exposure to pests. These practices create a high risk of food-borne illness.

- 93.** What is the fundamental reason for having different levels of food standards, from company-level to international?
- (A) To create confusion for food manufacturers
 - (B) To ensure coordination and integration of quality at all levels
 - (C) To allow each country to have completely different safety rules
 - (D) To make international trade more difficult

Ans :

(B) To ensure coordination and integration of quality at all levels

The existence of standards at company, national, regional, and international levels allows for a well-coordinated system. This ensures that quality is integrated into every aspect of production and trade, from a single factory to the global market.

94. What does the 'horizontal standards' approach of the FSSA, 2006 prioritize?
- (A) Overarching safety principles applicable across all foods
 - (B) Specific compositional rules for each individual food product
 - (C) Voluntary guidelines with no legal enforcement
 - (D) Standards related only to the packaging of food

Ans :

(A) Overarching safety principles applicable across all foods

The FSSA reflects a shift to horizontal standards, which means it focuses on safety principles (like limits for contaminants, hygiene practices) that apply broadly across all food categories, rather than vertical standards that detail the specific composition of each product.

95. Identify the incorrect pairing of a food safety issue and its contributing factor.
- (A) Rise in food-borne illness - Increased international travel
 - (B) Need for food analysis - Use of food additives and preservatives
 - (C) Importance of HACCP - Simple, short food supply chains
 - (D) Change in eating habits - More people eating outside their homes

Ans :

(C) Importance of HACCP - Simple, short food supply chains

HACCP and other food safety systems have become more important because food supply chains have become long and complex. If supply chains were simple and short, the risk would be lower and the need for such rigorous systems less critical.

96. The assurance that food will not cause harm to the consumer when prepared and consumed as intended is known as:
- (A) Food Quality
 - (B) Food Safety

(C) Food Value

(D) Food Preference

Ans :

(B) Food Safety

Food safety is explicitly defined as the assurance that food is acceptable for human consumption according to its intended use and will not cause harm. It is a baseline requirement focused on preventing illness.

97. Which organism is a classic example of causing a food infection through the ingestion of live pathogens?
- (A) Staphylococcus aureus
 - (B) Clostridium botulinum
 - (C) Aspergillus flavus
 - (D) Salmonella

Ans :

(D) Salmonella

Salmonella is used as the classic example of a food infection, which results from ingesting the live pathogenic organism. It then multiplies in the body, causing disease. Staphylococcus aureus is an example of food intoxication.

98. Why is it important for a food safety professional to have knowledge of food microbiology?
- (A) To understand and control the microorganisms that cause spoilage and disease
 - (B) To design attractive packaging for food products
 - (C) To calculate the financial profitability of a food business
 - (D) To create advertisements for new food items

Ans :

(A) To understand and control the microorganisms that cause spoilage and disease

Food microbiology is the study of microorganisms in food. This knowledge is critical for a food safety professional to understand how pathogens contaminate food, how they grow, and what methods can be used to control or eliminate them to prevent spoilage and disease.

99. An entrepreneur wants to start a small business providing sanitary and safe packaged drinking water. Which certification mark would be most relevant to ensure consumer trust in the quality of their product?
- (A) Agmark
 - (B) Woolmark
 - (C) ISI mark

- (C) Creating a food safety consultancy firm
- (D) Providing food safety and sanitation education services

Ans :

(B) Working as a food safety inspector for the government
Starting a lab, a consultancy, or an education service are all examples of entrepreneurship where one initiates their own venture. Working as a food safety inspector is a salaried employment position within a government regulatory agency.

- 111.** Which of the following hazards is described as an “invisible microbiological hazard”?
- (A) Stones
 - (B) Weevils
 - (C) Yeasts
 - (D) Hair

Ans :

(C) Yeasts
Yeasts, along with bacteria, viruses, molds, and protozoa, are classified as invisible microbiological hazards. They are living organisms that are too small to be seen without a microscope but can cause spoilage or disease.

- 112.** The requirement for food manufacturers to have their products regularly tested is a consequence of the need to:
- (A) Meet the established standards of quality and safety.
 - (B) Increase the selling price of the products.
 - (C) Reduce the nutritional value of the food.
 - (D) Simplify the manufacturing process.

Ans :

(A) Meet the established standards of quality and safety.
Food manufacturers are required to meet standards of quality and safety set by regulatory bodies. Regular testing of their products is a necessary step to verify and demonstrate compliance with these standards, ensuring consumer protection.

- 113.** Identify the incorrect pairing of an international organization and its description.
- (A) CAC - Intergovernmental body for food standards
 - (B) ISO - Non-governmental federation of national standards bodies
 - (C) WTO - Helps trade flow smoothly and fairly
 - (D) FSSAI - An international organization for food safety

Ans :

(D) FSSAI - An international organization for food safety
FSSAI (Food Safety and Standards Authority of India) is the national regulatory body for India, not an international organization. The other pairings correctly describe the functions of CAC, ISO, and WTO.

- 114.** What is the primary characteristic of a ‘food infection’?
- (A) It is caused by a chemical contaminant.
 - (B) It results from the ingestion of live pathogenic organisms.
 - (C) It is caused by a toxin produced in the food.
 - (D) It is an allergic reaction to a food ingredient.

Ans :

(B) It results from the ingestion of live pathogenic organisms.
A food infection is specifically defined as an illness resulting from the ingestion of live pathogenic organisms, which then multiply within the human body to cause disease. This distinguishes it from food intoxication caused by pre-formed toxins.

- 115.** A label on a food product mentions “HACCP Certified”. What does this certification primarily assure the consumer about?
- (A) The product is organic and free from pesticides.
 - (B) The product has the lowest price in the market.
 - (C) The product was made using a preventive food safety system.
 - (D) The product has the highest possible nutritional value.

Ans :

(C) The product was made using a preventive food safety system.
HACCP is a management system focused on preventing food safety hazards. A “HACCP Certified” label indicates that the manufacturer has implemented this systematic, preventive approach to control potential hazards during production.

- 116.** Consider the following actions related to food safety:
1. Storing cooked food at room temperature for a whole day.
 2. Washing hands with soap before handling food.

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-c, 2-a, 3-d, 4-b
- (C) 1-b, 2-c, 3-d, 4-a
- (D) 1-d, 2-b, 3-a, 4-c

Ans :

- (A) 1-b, 2-d, 3-a, 4-c

The Fruit and Vegetable Product Order covered products like canned pulp. The Vegetable Oil Products Order covered vanaspati. The Meat Food Products Order regulated processed meat like sausages. The PFA was a general act covering items like spices.

- 105.** Which entity provides accreditation for laboratories to ensure they are capable of performing accurate food analysis?
- (A) Local consumer groups
 - (B) Food Safety and Standards Authority of India (FSSAI)
 - (C) Individual food manufacturing companies
 - (D) The World Trade Organization (WTO)

Ans :

- (B) Food Safety and Standards Authority of India (FSSAI)

One of the functions of FSSAI is to lay down mechanisms and guidelines for the accreditation of laboratories. This ensures that the labs performing food safety tests meet specific standards of competence and reliability.

- 106.** A food handler with a small cut on their finger continues to prepare sandwiches without wearing a glove. This poses a risk of contamination with which specific bacterium?
- (A) Salmonella
 - (B) Norovirus
 - (C) Staphylococcus aureus
 - (D) E. coli

Ans :

- (C) Staphylococcus aureus

Staphylococcus aureus is commonly found on the skin of healthy individuals and can enter food through cuts and wounds. If the food is not stored correctly, the bacteria can multiply and produce toxins, causing food intoxication.

- 107.** In the practical test for adulteration in tea leaves, what is the first step after boiling the tea leaves in water for 15 minutes?
- (A) Weigh the stalks immediately
 - (B) Filter out the water
 - (C) Add hydrochloric acid

- (D) Dry the tea leaves in an oven

Ans :

- (B) Filter out the water

The procedure specified in the practical requires the tea leaves to be boiled for 15 minutes. The immediate next step is to filter out the water before transferring the tea sample to a plate to separate the stalks.

- 108.** A student tests a sample of turmeric powder and adds a few drops of concentrated hydrochloric acid. The solution immediately turns a deep magenta color. What should the student conclude?
- (A) The turmeric is pure and of high quality.
 - (B) The turmeric is adulterated with starch.
 - (C) The turmeric contains excess moisture.
 - (D) The turmeric is adulterated with metanil yellow.

Ans :

- (D) The turmeric is adulterated with metanil yellow.

The development of a pink to magenta color upon the addition of concentrated hydrochloric acid is the positive test result for the presence of metanil yellow, a toxic and non-permissible chemical adulterant.

- 109.** Which of the following accurately describes a career in the R&D department of a food industry?
- (A) It focuses on developing new products and improving existing ones.
 - (B) It involves routine inspection of the final product on the assembly line.
 - (C) It is primarily responsible for the marketing and sale of food products.
 - (D) It deals with managing the company's financial accounts.

Ans :

- (A) It focuses on developing new products and improving existing ones.

The R&D (Research and Development) department in a food industry is responsible for innovation. This includes creating new food products, modifying existing ones, and researching new technologies to improve processing and quality.

- 110.** All of the following are examples of entrepreneurship opportunities in the food safety sector EXCEPT:
- (A) Starting an analytical food laboratory
 - (B) Working as a food safety inspector for the government

- 122.** Which of the following is an example of an “invisible” biological hazard?
- (A) Cockroaches
 - (B) Caterpillars
 - (C) Worms
 - (D) Protozoa

Ans :

(D) Protozoa

The text and diagrams distinguish between visible biological hazards (pests like cockroaches, worms) and invisible or microbiological hazards. Protozoa are microscopic organisms and fall into the invisible category along with bacteria and viruses.

- 123.** What is the underlying principle of a food control system’s ‘food inspection’ component?
- (A) To analyze the chemical composition of food in a lab.
 - (B) To verify that food production and handling comply with regulations.
 - (C) To provide financial support to food businesses.
 - (D) To develop new food products for the market.

Ans :

(B) To verify that food production and handling comply with regulations.

The purpose of food inspection is to verify conformity. Inspectors visit premises to ensure that foods are being produced, handled, processed, stored, and distributed in compliance with the established legislation and regulations.

- 124.** Which statement best describes the role of Good Handling Practices (GHP) in the food chain?
- (A) They apply only to the final consumer of the food.
 - (B) They are concerned solely with the packaging of the food product.
 - (C) They ensure all persons handling food maintain good personal hygiene.
 - (D) They are a set of rules for the financial management of food outlets.

Ans :

(C) They ensure all persons handling food maintain good personal hygiene.

A key aspect of Good Handling Practices is ensuring that all individuals who handle food adhere to good hygiene practices. This is part of a comprehensive approach to minimize contamination risk throughout the entire food chain.

- 125.** A consumer wants to be sure that the quality management system of a food company is of an international standard. Which certification would provide this assurance?
- (A) Agmark
 - (B) ISI Mark
 - (C) FSSAI License
 - (D) ISO 9000

Ans :

(D) ISO 9000

ISO 9000 is the international standard for “Quality Management” systems. It provides an internationally recognized framework for an organization’s processes and demonstrates a commitment to quality, distinct from product-specific marks or national licenses.

- 126.** The practical guide for testing food adulteration includes tests for all of the following EXCEPT:
- (A) Starch in milk and ice cream.
 - (B) Pesticide residues in fruits.
 - (C) Sesame oil in pure ghee.
 - (D) Metanil yellow in turmeric.

Ans :

(B) Pesticide residues in fruits.

The provided practicals outline simple qualitative tests for common adulterants like starch, sesame oil, and metanil yellow. Testing for pesticide residues is a complex analysis that requires sophisticated laboratory equipment and is not included in the described practicals.

- 127.** Consider the following statements about food safety systems:
1. GMP aims to minimize contamination and false labelling.
 2. GHP focuses on hygiene practices from farm to consumer.
 3. HACCP is a reactive system, not a preventive one.
 4. FSSAI, 2006 mandates that producers are responsible for food safety.

Which of the above statements are correct?

- (A) 1, 2, and 3
- (B) 1, 3, and 4
- (C) 1, 2, and 4
- (D) 2, 3, and 4

Ans :

(C) 1, 2, and 4

Statements 1, 2, and 4 are correct descriptions of GMP, GHP, and the FSSAI mandate. Statement

3. Using the same unwashed knife for raw meat and fresh vegetables.

Which of these actions promote food safety?

- (A) 2 only
- (B) 1 only
- (C) 1 and 2
- (D) 2 and 3

Ans :

- (A) 2 only

Washing hands is a fundamental practice for promoting food safety. Storing cooked food at room temperature allows bacteria to multiply, and using the same unwashed knife causes cross-contamination; both are unsafe practices.

- 117.** What is the purpose of adding petroleum ether to an asafetida sample in the described practical test?

- (A) To dissolve the starch present in the sample
- (B) To act as a solvent for the filterable components
- (C) To create a pink color indicating adulteration
- (D) To sterilize the sample before testing

Ans :

- (B) To act as a solvent for the filterable components

In the test for colophenial resins in asafetida, petroleum ether is used as a solvent. The sample is mixed with it, and the resulting solution (filtrate) is then tested with copper acetate, making the solvent a crucial part of the extraction process.

- 118.** Why is it important for a food label to include the “Best Before” or “Use By” date?

- (A) To indicate when the product was manufactured
- (B) To list the ingredients in descending order of proportion
- (C) To provide the name and address of the manufacturer
- (D) To inform the consumer about the product’s quality and safety over time

Ans :

- (D) To inform the consumer about the product’s quality and safety over time

The “Best Before” or “Use By” date provides crucial information to the consumer regarding the shelf life of the product. It indicates the period during which the food will retain its expected quality and, more importantly, remain safe for consumption.

- 119.** Assertion (A): Food quality is a broader concept than food safety.

Reason (R): Food quality includes positive attributes like color and flavor, in addition to the baseline requirement of safety.

- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are true but R is not the correct explanation of A.
- (C) A is true but R is false.
- (D) A is false but R is true.

Ans :

- (A) Both A and R are true and R is the correct explanation of A.

Food safety is a component of food quality, making quality the broader concept. The reason it is broader is that it encompasses not just the absence of hazards (safety) but also positive attributes like sensory properties and nutritional value.

- 120.** Which of these is a key activity for a Quality Control Manager in a food industry?

- (A) Designing advertising campaigns for the products
- (B) Managing the purchase of raw materials and ensuring they meet standards
- (C) Handling employee recruitment and payroll
- (D) Representing the company in legal disputes

Ans :

- (B) Managing the purchase of raw materials and ensuring they meet standards

A Quality Control Manager is responsible for overseeing the entire quality system. A crucial part of this is ensuring that all incoming raw materials meet the company’s and regulatory standards before they are used in production.

- 121.** The relative probability that harm or injury will result when a substance is not used in a prescribed manner and quantity is defined as:

- (A) Toxicity
- (B) Risk
- (C) Hazard
- (D) Contamination

Ans :

- (C) Hazard

This is the precise definition of a hazard provided in the text. It distinguishes the concept from toxicity (the intrinsic capacity to harm) by incorporating the probability of that harm occurring under specific conditions of use.

(D) FPO mark

Ans :

(C) ISI mark

The ISI mark from the Bureau of Indian Standards (BIS) is a voluntary certification for various consumer goods, including processed items like packaged drinking water. It signifies that the product conforms to Indian standards, making it a mark of safety and quality.

100. In the practical worksheet for identifying physical hazards in raw food ingredients, which of the following is NOT listed as a potential hazard?

- (A) Hair and stones
- (B) Stems and seeds
- (C) Artificial colors
- (D) Worms/Insect parts

Ans :

(C) Artificial colors

The worksheet for the practical focuses on identifying physical hazards. Hair, stones, stems, seeds, and insect parts are all examples of physical hazards. Artificial colors are a type of chemical hazard and would not be identified through this physical inspection.

101. Which of the following is a key reason for the increased global significance of food safety and quality?

- (A) A global trend towards consuming only locally grown food
- (B) The simplification of food supply chains worldwide
- (C) A decrease in per capita income and consumer demand
- (D) The growth of international trade and globalization of food supply

Ans :

(D) The growth of international trade and globalization of food supply

Globalization of the food supply, increased international trade (facilitated by agreements like WTO), and international travel have made food safety a global concern. A problem in one country can quickly affect consumers in another.

102. Assertion (A): The membership of the Codex Alimentarius Commission (CAC) includes governments from around the world.

Reason (R): The CAC is an intergovernmental body whose standards are used by countries to develop their own national food regulations.

(A) Both A and R are true and R is the correct explanation of A.

(B) Both A and R are true but R is not the correct explanation of A.

(C) A is true but R is false.

(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The CAC is an intergovernmental body with member countries from across the globe, making assertion (A) true. Its purpose is to establish international standards that serve as a reference for national regulations, which explains why its membership is governmental. Thus, R correctly explains A.

103. Consider the following regarding food hazards:

1. Physical hazards include items like stones and hair.
 2. Chemical hazards can be unintentionally added to food.
 3. Biological hazards are living organisms.
 4. Salmonella causes intoxication, not infection.
- Which of the above statements are correct?

(A) 1, 2 and 4

(B) 1, 3 and 4

(C) 2, 3 and 4

(D) 1, 2 and 3

Ans :

(D) 1, 2 and 3

Physical hazards include foreign objects like stones. Chemical hazards, like pesticide residue, can be unintentional. Biological hazards are living organisms. Statement 4 is incorrect because Salmonella is a classic example of a food infection, not intoxication.

104. Match the food product in Column I with the specific Indian Order/Act that traditionally regulated it in Column II, before the FSSA, 2006.

	Column I		Column II
1.	Canned Mango Pulp	a.	Meat Food Products Order
2.	Vanaspati	b.	Fruit and Vegetable Product Order
3.	Packaged Sausages	c.	Prevention of Food Adulteration Act
4.	Turmeric Powder	d.	Vegetable Oil Products Order

3 is incorrect; HACCP is a preventive system, which is its key feature.

- 128.** Match the food hazard in Column I with a relevant control measure in Column II.

	Column I		Column II
1.	Salmonella in chicken	a.	Metal detector on production line
2.	Piece of metal in food	b.	Thorough cooking to a high temperature
3.	Staphylococcus toxin	c.	Proper food handler hygiene (hand washing)
4.	Cross-contamination	d.	Using separate chopping boards for raw/cooked food

- (A) 1-b, 2-a, 3-c, 4-d
 (B) 1-a, 2-b, 3-d, 4-c
 (C) 1-b, 2-c, 3-a, 4-d
 (D) 1-d, 2-a, 3-b, 4-c

Ans :

(A) 1-b, 2-a, 3-c, 4-d
 Thorough cooking kills Salmonella (biological hazard). A metal detector finds metal pieces (physical hazard). Proper hygiene prevents the spread of Staphylococcus from handlers. Using separate boards prevents cross-contamination.

- 129.** The symptoms of Salmonella infection typically include diarrhea, fever, and which other condition?
 (A) Skin rash
 (B) Abdominal cramps
 (C) Headaches
 (D) Respiratory issues

Ans :

(B) Abdominal cramps
 The text explicitly lists the symptoms of Salmonella infection as diarrhea, fever, and abdominal cramps. These symptoms are characteristic of many food-borne infections affecting the gastrointestinal tract.

- 130.** Why is international cooperation on food standards, such as through the Codex Alimentarius Commission, important?
 (A) To ensure all countries produce and eat the exact same foods.
 (B) To set uniform prices for all food commodities worldwide.
 (C) To promote the use of a single language for all

food labels.

- (D) To facilitate trade and protect consumer health globally.

Ans :

(D) To facilitate trade and protect consumer health globally.
 International standards create a common reference point for food safety and quality. This harmonization facilitates fair trade between nations by preventing arbitrary barriers and ensures that consumers everywhere are protected from unsafe food products.

- 131.** Which of these is a key responsibility of a Food Safety Manager in a large food industry?
 (A) Personally cooking all the food served.
 (B) Leading the HACCP team and overseeing its implementation.
 (C) Designing the company's website and social media presence.
 (D) Negotiating employee salaries and benefits.

Ans :

(B) Leading the HACCP team and overseeing its implementation.
 A Food Safety Manager's role is central to ensuring compliance with safety protocols. This typically includes leading the HACCP team, managing the food safety system, and ensuring that all procedures are correctly implemented and monitored.

- 132.** Assertion (A): Simple visual inspection is not enough to guarantee food safety.
 Reason (R): Many food hazards, such as microbiological pathogens and chemical toxins, are invisible to the naked eye.
 (A) Both A and R are true and R is the correct explanation of A.
 (B) Both A and R are true but R is not the correct explanation of A.
 (C) A is true but R is false.
 (D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.
 Visual inspection can only detect obvious physical hazards. It cannot guarantee safety because the most dangerous hazards, like bacteria, viruses, and chemical toxins, are typically invisible. This makes scientific analysis and process control essential.

A physical hazard is defined as any physical material not normally found in food that can cause illness or injury. Pests, hair, stones, and wood are all classic examples of this type of hazard.

- 145.** A comprehensive food quality and safety curriculum includes knowledge of all the following, EXCEPT:

(A) Food Chemistry
(B) Food Processing and Preservation
(C) Food Microbiology
(D) Interior Design and Decoration

Ans :

(D) Interior Design and Decoration

The knowledge required for a career in food safety is technical and scientific, including chemistry, processing, and microbiology. Interior design is an unrelated field of study.

- 146.** A trainer for a food company is teaching new employees about preventing the spread of *Staphylococcus aureus*. What key instruction should they emphasize?

(A) Do not touch your nose, mouth, or hair while handling food.
(B) Cook all food to a minimum of 100°C.
(C) Always wear clean uniforms and aprons.
(D) Ensure all food is packaged in airtight containers.

Ans :

(A) Do not touch your nose, mouth, or hair while handling food.

Staphylococcus aureus is commonly found in the nasal passages, throat, hair, and on the skin of healthy individuals. Therefore, the most critical instruction to prevent its spread is to avoid touching these areas while handling food.

- 147.** In the practical test for detecting light berries in black pepper, what is used as the medium to separate the berries?

(A) Pure water
(B) Concentrated hydrochloric acid
(C) An alcohol-water mixture
(D) Petroleum ether

Ans :

(C) An alcohol-water mixture

The procedure specified in the practical uses an alcohol-water mixture with a specific gravity of 0.8 to 0.82. The light, possibly extracted, berries float in this mixture, while the heavier, good-quality berries sink.

- 148.** What is the fundamental benefit of having a single, consolidated food law like the FSSA, 2006, for the food industry?

(A) It increases the number of licenses required.
(B) It makes the regulatory process more cumbersome and complex.
(C) It eliminates all need for quality control.
(D) It provides a single point of reference, simplifying compliance.

Ans :

(D) It provides a single point of reference, simplifying compliance.

Before the FSSA, the food industry had to adhere to multiple laws and orders from different ministries, which was cumbersome. Consolidating these into a single act and under a single authority (FSSAI) provides a single, clearer point of reference, simplifying compliance.

- 149.** Which of the following statements about food safety careers is incorrect?

(A) A food auditor checks for compliance with safety standards.
(B) Quality control labs employ analysts to test food samples.
(C) A specialist in HACCP helps companies implement the system.
(D) A career in food safety does not require any scientific knowledge.

Ans :

(D) A career in food safety does not require any scientific knowledge.

Careers in food safety are highly scientific and technical. They require adequate knowledge and expertise in fields like Food Chemistry, Food Microbiology, Food Analysis, and Food Processing to be effective.

- 150.** What is the primary role of a trainer for the implementation of HACCP in a food industry?

(A) To audit the company's financial records.
(B) To educate and train employees on HACCP principles and procedures.
(C) To develop new recipes for the company.
(D) To manage the company's marketing budget.

Ans :

(B) To educate and train employees on HACCP principles and procedures.

A trainer for HACCP implementation is responsible for ensuring that all relevant employees understand the HACCP system, their

and objective information about food safety and related issues of concern, promoting transparency and awareness.

- 139.** A student adds iodine solution to a melted ice cream sample, and it immediately turns a dark blue color. What form of adulteration has likely occurred?
- (A) Vanaspati has been added to the ice cream.
 - (B) A non-permissible color has been used.
 - (C) Starch has been added to the ice cream.
 - (D) The ice cream has a high sugar content.

Ans :

(C) Starch has been added to the ice cream. The development of a blue color upon adding iodine solution is the characteristic test for the presence of starch. Adding starch to ice cream is a form of adulteration, often done to improve texture or thickness cheaply.

- 140.** Why must a food label list ingredients in descending order of their proportions?
- (A) To allow consumers to know the main components of the food.
 - (B) To make the ingredient list longer and more detailed.
 - (C) To confuse the consumer about the product's composition.
 - (D) It is a random requirement with no specific purpose.

Ans :

(A) To allow consumers to know the main components of the food. This labeling requirement provides transparency to the consumer. By listing ingredients in descending order by weight, it allows people to see what the product is primarily made of, which is important for health, dietary, and allergy reasons.

- 141.** Assertion (A): The 'Agmark' certification is a voluntary scheme.
Reason (R): It is a certification of agricultural products to safeguard consumer health.
- (A) Both A and R are true and R is the correct explanation of A.
 - (B) Both A and R are true but R is not the correct explanation of A.
 - (C) A is true but R is false.
 - (D) A is false but R is true.

Ans :

(B) Both A and R are true but R is not the correct explanation of A.

Both statements are true. 'Agmark' is a voluntary scheme, and its purpose is to certify agricultural products. However, its purpose (R) does not explain why it is voluntary (A). The voluntary nature is a policy choice, not a direct result of its purpose.

- 142.** Identify the correct pair of a problem and its primary hazard category.
- (A) Buttons in food - Chemical Hazard
 - (B) Salmonella in milk - Physical Hazard
 - (C) Cleaning chemicals in food - Biological Hazard
 - (D) Pesticide residues on vegetables - Chemical Hazard

Ans :

(D) Pesticide residues on vegetables - Chemical Hazard

Pesticide residues are a type of chemical hazard. Buttons would be a physical hazard, Salmonella is a biological hazard, and cleaning chemicals are also a chemical hazard.

- 143.** Consider the following statements about international food standards:
1. ISO standards are mandatory for all countries.
 2. Codex standards are often used as a basis for national regulations.
 3. The WTO helps settle trade disputes related to food standards.

Which of the above statements are correct?

- (A) 1 and 2
- (B) 2 and 3
- (C) 1 and 3
- (D) 1, 2, and 3

Ans :

(B) 2 and 3

Statement 1 is incorrect as ISO standards are voluntary. Statements 2 and 3 are correct. Codex standards serve as an international reference for national laws, and the WTO has a role in resolving trade disputes, which can involve food standards.

- 144.** Which type of hazard includes pests, hair, stones, and wood?
- (A) Biological Hazard
 - (B) Chemical Hazard
 - (C) Physical Hazard
 - (D) Toxicological Hazard

Ans :

(C) Physical Hazard

A hazard is defined as the relative probability that harm will result when a substance is not used in a prescribed manner and quantity. It combines the toxicity of a substance with the likelihood of exposure.

Direction : Read the following case study and answer the following questions.

A medium-sized Indian company that manufactures traditional pickles and spices wants to start exporting its products to the European Union. To do so, they must ensure their products meet international food standards. A consultant informs them about two key international bodies. The first is the Codex Alimentarius Commission (CAC), an intergovernmental body that develops international food standards, codes of practice, and guidelines to protect consumer health and ensure fair practices in the food trade. Many countries use Codex standards as a reference for their national regulations. The second is the International Organisation for Standardisation (ISO), a non-governmental federation that publishes voluntary standards, including the ISO 9000 series for quality management systems. The consultant explains that while adhering to Codex standards is often a regulatory requirement for trade, obtaining an ISO certification is a voluntary step that demonstrates a company's commitment to quality management. The company realizes it must upgrade its entire production process, from sourcing raw materials to packaging, to comply with these stringent international requirements.

- 176.** Which international, intergovernmental body establishes standards to protect consumer health and facilitate food trade, publishing them in the 'Codex Alimentarius'?
- (A) The World Trade Organisation (WTO)
 - (B) The International Organisation for Standardisation (ISO)
 - (C) The Codex Alimentarius Commission (CAC)
 - (D) The Food and Agriculture Organisation (FAO)

Ans :

(C) The Codex Alimentarius Commission (CAC)
The Codex Alimentarius Commission (CAC) is an intergovernmental body tasked with establishing international food standards to protect consumer health and facilitate trade. Its published collection of standards is known as the Codex Alimentarius or 'Food Code'.

- 177.** What is the primary mission of the International Organisation for Standardisation (ISO)?
- (A) To enforce national food laws and regulations directly.
 - (B) To settle international trade disputes between countries.
 - (C) To provide financial aid to developing countries.
 - (D) To promote the development of standardisation and related activities to facilitate the international exchange of goods and services.

Ans :

(D) To promote the development of standardisation and related activities to facilitate the international exchange of goods and services.

The mission of ISO, a non-governmental federation, is to promote the development of standardisation globally. This facilitates international trade and fosters cooperation in scientific, technological, and economic activities.

- 178.** What is a key difference between Codex standards and ISO standards?
- (A) Codex standards are voluntary, while ISO standards are mandatory government regulations.
 - (B) Codex standards are used to develop national regulations, while ISO standards are generally voluntary and describe industrial practices.
 - (C) Codex focuses on quality management, while ISO focuses only on food safety.
 - (D) Codex standards change every year, while ISO standards never change.

Ans :

(B) Codex standards are used to develop national regulations, while ISO standards are generally voluntary and describe industrial practices.

A key distinction is that Codex standards are often used by governments to develop national regulations and describe minimal acceptable practices. In contrast, ISO standards are typically voluntary and describe current standard industrial practices.

- 179.** To export its products, the Indian company must meet the requirements of international trade. Which organization's agreements govern this, covering goods, services, and intellectual property?
- (A) The Bureau of Indian Standards (BIS)
 - (B) The World Health Organisation (WHO)

roles within it, and the procedures they need to follow to maintain food safety.

- 151.** The capacity of a substance to produce harm or injury of any kind under any conditions is known as:
- (A) Hazard
 - (B) Toxicity
 - (C) Risk
 - (D) Adulteration

Ans :

(B) Toxicity

This is the precise definition of toxicity given in the text. It refers to the inherent potential of a substance to cause harm, regardless of the likelihood of exposure.

- 152.** A bakery discovers that a batch of flour they received is contaminated with small insect fragments. This is an example of what type of hazard?
- (A) Physical and Biological
 - (B) Chemical only
 - (C) Microbiological only
 - (D) Physical and Chemical

Ans :

(A) Physical and Biological

Insect fragments are a physical hazard (foreign material). Since the fragments come from a living organism (insect), it also falls under the broad category of a biological hazard. This highlights the overlap between hazard types.

- 153.** Why are food safety and quality particularly critical where food is freshly prepared and served on a large scale, like in canteens or restaurants?
- (A) Because the food is consumed immediately, so there is no risk.
 - (B) Because these settings use very few ingredients.
 - (C) Because food is handled by many people and often prepared in advance.
 - (D) Because freshly prepared food is naturally immune to bacteria.

Ans :

(C) Because food is handled by many people and often prepared in advance.

In large-scale food service, food is prepared in bulk, handled by many individuals, and often held for a period before serving. Each of these factors increases the opportunity for contamination and

microbial growth, making safety and quality critical.

- 154.** Which organization's mission is to promote the development of standardization to facilitate the international exchange of goods and services?
- (A) Codex Alimentarius Commission (CAC)
 - (B) World Health Organization (WHO)
 - (C) Food and Agriculture Organization (FAO)
 - (D) International Organization for Standardization (ISO)

Ans :

(D) International Organization for Standardization (ISO)

The mission of the International Organization for Standardization (ISO) is explicitly stated as promoting the development of standardization and related activities to facilitate international exchange and cooperation in scientific, technological, and economic activity.

- 155.** Which of the following is an accurate statement regarding food adulteration?
- (A) It always improves the quality of the food.
 - (B) It can involve biological and chemical contamination during storage.
 - (C) It is the same as food fortification.
 - (D) It is a process that is no longer a concern in India.

Ans :

(B) It can involve biological and chemical contamination during storage.

The definition of food adulteration is broad and includes not only intentional addition of substances but also biological and chemical contamination that may occur during growth, storage, processing, transport, and distribution, which lowers the food's quality.

- 156.** Assertion (A): The HACCP system is beneficial for producers and processors.
Reason (R): It allows them to utilize resources efficiently and in a cost-effective manner for assuring food safety.
- (A) Both A and R are true and R is the correct explanation of A.
 - (B) Both A and R are true but R is not the correct explanation of A.
 - (C) A is true but R is false.
 - (D) A is false but R is true.

Ans :

- 133.** According to the text, what is the effect of parasites like the tapeworm in pork?
- (A) They cause food intoxication
 - (B) They cause infestation
 - (C) They are a physical hazard
 - (D) They improve the texture of the pork

Ans :

- (B) They cause infestation

The text states that parasites, giving the example of the tapeworm in pork, can cause infestation. This is another category of biological hazard, distinct from microbial infections or intoxications.

- 134.** When preparing the practical to test for adulterants, why is it suggested to procure loose, unbranded materials?
- (A) Because loose materials are always cheaper.
 - (B) Because unbranded materials are guaranteed to be pure.
 - (C) To compare their quality against branded and packed items.
 - (D) Because branded items cannot be tested in a lab.

Ans :

- (C) To compare their quality against branded and packed items.

The practical's purpose is to acquaint students with testing and quality comparison. By collecting branded, unbranded packed, and loose samples, students can perform the tests and compare the results to see if there are differences in quality and purity among them.

- 135.** The requirement for food businesses to have accredited laboratories for testing is based on the need for:
- (A) Ensuring the analytical capability is reliable and accurate.
 - (B) Increased competition among labs.
 - (C) Reducing the number of tests that need to be performed.
 - (D) Providing employment for more scientists.

Ans :

- (A) Ensuring the analytical capability is reliable and accurate.

Accreditation is a process that verifies a laboratory's competence to perform specific tests accurately and reliably. Requiring food testing to be done in accredited labs ensures that the results are trustworthy, which is crucial for enforcing food safety standards.

- 136.** Which of the following statements about food hazards is incorrect?

- (A) Physical hazards are materials not normally found in food, like wood.
- (B) Chemical hazards can be intentionally added, like non-permissible colors.
- (C) Biological hazards are living organisms, such as bacteria and fungi.
- (D) Food handlers' personal hygiene has no impact on biological hazards.

Ans :

- (D) Food handlers' personal hygiene has no impact on biological hazards.

Food handlers' personal hygiene is a critical factor in controlling biological hazards. Bacteria like *Staphylococcus aureus* can be transferred from a handler's skin or nasal passages to food, causing contamination.

- 137.** Which term refers to the collection of internationally adopted Food Standards, Codes of Practice, and Guidelines published by the CAC?
- (A) ISO 9000
 - (B) The FSSA Compendium
 - (C) Codex Alimentarius
 - (D) The WTO Agreement

Ans :

- (C) Codex Alimentarius

The document published by the Codex Alimentarius Commission (CAC) is called the Codex Alimentarius, which translates to 'Food Code'. It is a comprehensive collection of international standards and guidelines aimed at protecting consumer health and ensuring fair trade practices.

- 138.** What is the primary objective of creating an information network across the country, as mandated by the FSSAI?
- (A) To sell food products directly to consumers.
 - (B) To ensure rapid and reliable information about food safety reaches the public.
 - (C) To advertise the services of private food testing laboratories.
 - (D) To collect taxes from food business operators.

Ans :

- (B) To ensure rapid and reliable information about food safety reaches the public.

A key function of FSSAI is to create an information network so that the public, consumers, Panchayats, and others receive rapid, reliable,

the salad after handling raw chicken. The salad was then left at room temperature for several hours before being served. Lab tests on the food confirmed the presence of toxins produced by the bacterium Staphylococcus aureus. The officer explained that this was a case of food intoxication. The bacteria, likely transferred from the food handler, multiplied rapidly in the food while it was in the temperature 'danger zone', producing harmful toxins. Since these toxins are not destroyed by heat and cannot be detected by smell or taste, the food appeared normal but was hazardous. This incident underscored the critical importance of personal hygiene and proper temperature control in preventing foodborne illnesses. The catering service was found to be in violation of basic food safety protocols.

- 161.** The illness caused by the consumption of food containing toxins produced by bacteria is known as:

(A) Food Infection
(B) Food Intoxication
(C) Food Infestation
(D) Food Adulteration

Ans :

(B) Food Intoxication

Food intoxication results from consuming harmful toxins that are produced by bacteria in the food before it is eaten. The illness is caused by the toxin itself, not the live bacteria, which is why symptoms can appear quickly.

- 162.** Staphylococcus aureus, the bacterium responsible for the outbreak, is commonly found where?

(A) Only in soil and water.
(B) Exclusively in raw vegetables and fruits.
(C) In the nasal passages, throat, skin, and hair of many healthy individuals.
(D) Only inside the intestinal tracts of animals.

Ans :

(C) In the nasal passages, throat, skin, and hair of many healthy individuals.

Staphylococcus aureus is commonly present in the environment and on the bodies of about 50 percent of healthy people. Food handlers can easily contaminate food if they touch these areas on their body and do not practice good hygiene.

- 163.** What is the temperature 'danger zone' where bacteria can reproduce very quickly in food?

(A) Between 5°C and 60°C
(B) Below 0°C
(C) Between 65°C and 100°C
(D) Above 100°C

Ans :

(A) Between 5°C and 60°C

The temperature range between 5°C and 60°C is known as the danger zone. In this range, pathogenic bacteria can grow and multiply rapidly, so food should not be held at these temperatures for extended periods.

- 164.** What is the difference between a food infection and a food intoxication?

(A) An infection is caused by toxins, while an intoxication is caused by live pathogens.
(B) There is no difference; the terms are used interchangeably.
(C) An infection is caused by viruses, while an intoxication is caused by bacteria.
(D) An infection results from ingesting live pathogens that multiply in the body, while intoxication is from consuming pre-formed toxins.

Ans :

(D) An infection results from ingesting live pathogens that multiply in the body, while intoxication is from consuming pre-formed toxins. A food infection results from eating food containing live pathogenic organisms which then grow in the human body. In contrast, food intoxication is caused by ingesting food that already contains toxins produced by microbial growth.

- 165.** The food safety officer's investigation and conclusion are part of which essential component of an effective food control system?

(A) Food Marketing and Sales
(B) Food Production and Processing
(C) Food Inspection
(D) New Product Development

Ans :

(C) Food Inspection

An effective food control system relies on food inspection to verify that products conform to standards. Government-appointed inspectors investigate to ensure foods are produced, handled, and distributed in compliance with safety regulations and legislation.

Direction : Read the following case study and answer the following questions.

A new fruit juice company, “FreshPress Inc.,” wants to ensure the absolute safety of its products from the farm to the consumer. Instead of relying only on testing the final product, they decide to implement the Hazard Analysis Critical Control Point (HACCP) system. A food safety consultant helps them identify potential hazards at every stage of their production process. For example, they identify biological hazards (like bacteria on raw fruit), chemical hazards (like pesticide residues), and physical hazards (like small stones or twigs). For each hazard, they determine ‘Critical Control Points’ (CCPs)—steps where control can be applied to prevent or eliminate the hazard. A key CCP is the pasteurization step, where the juice is heated to a specific temperature to kill harmful bacteria. They establish critical limits for this step (e.g., temperature and time), set up monitoring procedures, and define corrective actions to be taken if the limits are not met. This proactive, preventive approach helps the company produce consistently safe products and utilize its resources efficiently.

- 166.** What is the primary purpose of the HACCP system implemented by FreshPress Inc.?
- (A) To provide a preventive approach to ensure food safety by identifying and controlling hazards.
 - (B) To increase the price of the final product.
 - (C) To test only the final product for problems after they have occurred.
 - (D) To speed up the production process regardless of safety.

Ans :

(A) To provide a preventive approach to ensure food safety by identifying and controlling hazards. HACCP is a preventive approach to food safety. It involves identifying potential hazards at each step of the food chain and defining measures to control them, thereby preventing problems before they occur.

- 167.** In the HACCP system, the pasteurization step where bacteria are killed is an example of a:
- (A) Hazard
 - (B) Critical Control Point (CCP)
 - (C) Corrective Action
 - (D) Monitoring Procedure

Ans :

(B) A Critical Control Point (CCP)

A Critical Control Point (CCP) is a step in the food manufacturing process where control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level.

- 168.** The presence of pesticide residue on the raw fruit is what type of hazard?
- (A) Physical hazard
 - (B) Biological hazard
 - (C) Chemical hazard
 - (D) Mechanical hazard

Ans :

(C) A chemical hazard

Chemical hazards are chemicals or deleterious substances that may be intentionally or unintentionally added to foods. This category includes residues from pesticides, cleaning chemicals, toxic metals, and unapproved food additives.

- 169.** Why is a system like HACCP considered more efficient than end-product testing alone?
- (A) Because it detects hazards at any stage, allowing for immediate correction and preventing waste.
 - (B) Because it is less scientific and requires no technical knowledge.
 - (C) Because it completely eliminates the need for any laboratory testing.
 - (D) Because it is a reactive system that only deals with consumer complaints.

Ans :

(A) Because it detects hazards at any stage, allowing for immediate correction and preventing waste.

End-product testing is reactive and detects problems only after they occur. In contrast, HACCP is a preventive system that enables the detection and control of hazards at any stage, ensuring quality and efficient resource use.

- 170.** The overall framework that includes HACCP, Good Manufacturing Practices (GMP), and Good Handling Practices (GHP) is known as a:
- (A) Food Marketing Strategy
 - (B) Financial Auditing System
 - (C) Human Resource Policy
 - (D) Food Safety Management System

Ans :

(D) A Food Safety Management System

Food safety and quality are ensured through comprehensive Food Safety Management Systems. These systems are built on practices like Good Manufacturing Practices (GMP), Good Handling Practices (GHP), and the systematic approach of HACCP.

Direction : Read the following case study and answer the following questions.

A consumer advocacy group organizes a workshop on food safety for college students. The speaker explains the different types of hazards that can make food unsafe. She begins by showing a picture of a small pebble found in a bag of lentils, identifying it as a physical hazard. Next, she discusses a case where a farmer had used an unapproved, toxic pesticide on his crops, which remained as a residue on the vegetables sold in the market. She classifies this as a chemical hazard. Finally, she explains how raw eggs can sometimes carry the bacterium Salmonella, a living organism that can cause a foodborne infection if the eggs are not cooked properly. This, she explains, is a biological hazard. The speaker emphasizes that while some hazards are visible, like the pebble, others like chemical residues and microorganisms are invisible, making it crucial for consumers to purchase food from reliable sources and for manufacturers to adhere to strict safety standards to prevent these harmful substances from reaching the consumer.

- 171.** A pebble found in a bag of lentils is an example of which type of hazard?
- (A) Biological hazard
 - (B) Chemical hazard
 - (C) Physical hazard
 - (D) Nutritional hazard

Ans :

(C) A physical hazard

A physical hazard is any physical material that is not normally found in a food and can cause illness or injury. This includes items like stones, wood fragments, hair, parts of pests, or metal pieces.

- 172.** The presence of Salmonella bacteria in raw eggs represents which type of hazard?
- (A) Biological hazard
 - (B) Chemical hazard
 - (C) Physical hazard
 - (D) Allergenic hazard

Ans :

(B) A biological hazard

Biological hazards are living organisms, particularly microbiological organisms, that can cause illness. Those associated with food that cause disease, like Salmonella, are termed food-borne pathogens.

- 173.** The capacity of a substance, like the toxic pesticide, to produce harm or injury of any kind under any condition is defined as its:

- (A) Toxicity
- (B) Hazard
- (C) Adulteration
- (D) Contamination

Ans :

(A) A toxicity

Toxicity is defined as the inherent capacity of a substance to produce harm or injury of any kind under any conditions. It is a measure of how poisonous a substance is, separate from the likelihood of exposure.

- 174.** The speaker's main point is that food safety requires control over:

- (A) Only the visible physical hazards in food.
- (B) Only the taste and flavor of the food.
- (C) Only hazards that are introduced during the cooking process.
- (D) A wide range of potential physical, chemical, and biological hazards.

Ans :

(D) A wide range of potential physical, chemical, and biological hazards.

Ensuring food safety requires a comprehensive approach that addresses all types of potential hazards. These can be physical, chemical, or biological, and can enter the food at any point in the food chain.

- 175.** What is the definition of a 'hazard' in the context of food safety?

- (A) The absolute certainty that harm will occur.
- (B) The relative probability that harm or injury will result when a substance is not used as prescribed.
- (C) Any substance that is naturally present in food.
- (D) The positive attributes of a food product, such as its flavor and color.

Ans :

(B) The relative probability that harm or injury will result when a substance is not used as prescribed.

(A) Both A and R are true and R is the correct explanation of A.

The HACCP system is indeed beneficial for producers. The reason is that by focusing on preventing hazards at critical points, it prevents costly mistakes, reduces waste, and allows for a more targeted and efficient use of resources compared to blanket testing.

157. Consider the following points for maintaining food hygiene:

1. Quality of raw materials and water.
2. Storing all food at room temperature.
3. Cleanliness of premises, personnel, and equipment.

Which of these points are essential for good food hygiene?

- (A) 1 and 2
(B) 2 and 3
(C) 1 and 3
(D) 1, 2, and 3

Ans :

(C) 1 and 3

Using quality raw materials and water, and maintaining cleanliness of the environment, personnel, and equipment are essential for food hygiene. Storing all food at room temperature is incorrect and dangerous, as many foods require refrigeration or freezing.

158. Match the career in Column I with its primary responsibility in Column II.

	Column I		Column II
1.	Food Safety Officer	a.	Implements HACCP and GMP in a factory
2.	Quality Control Analyst	b.	Investigates food safety compliance for a government agency
3.	Food Safety Manager	c.	Writes articles and reports on food safety issues
4.	Scientific Writer	d.	Performs chemical and microbiological tests on food samples

- (A) 1-b, 2-d, 3-a, 4-c
(B) 1-d, 2-b, 3-c, 4-a
(C) 1-b, 2-a, 3-d, 4-c
(D) 1-c, 2-d, 3-b, 4-a

Ans :

(A) 1-b, 2-d, 3-a, 4-c

A Food Safety Officer works for the government to ensure compliance. A QC Analyst performs lab tests. A Food Safety Manager implements safety systems within a company. A Scientific Writer communicates information to the public or industry.

159. A food handler is observed to have long, unkempt fingernails and is not wearing any hairnet while preparing food. This situation presents a high risk of which type of hazard?

- (A) Chemical Hazard
(B) Physical and Biological Hazard
(C) Radiological Hazard
(D) Allergenic Hazard

Ans :

(B) Physical and Biological Hazard

Dirt and bacteria (biological hazards) can accumulate under long fingernails. Hair falling into food is a physical hazard. Therefore, this poor hygiene presents a risk of both physical and biological contamination.

160. In the practical for testing pure ghee, what adulterant is being tested for when sesame oil is detected?

- (A) Starch
(B) Water
(C) Artificial coloring
(D) Hydrogenated fat/vanaspati

Ans :

(D) Hydrogenated fat/vanaspati

The practical test is designed to determine if the ghee is adulterated with hydrogenated fat (vanaspati). The detection of sesame oil is used as an indicator for this, as vanaspati often contains sesame oil.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

A large group of people fell ill with severe gastrointestinal symptoms after consuming food at a community feast. A food safety officer investigating the outbreak traced the source to a chicken salad. The investigation revealed that the cook, who had a small cut on his hand, prepared

(C) The Food Safety and Standards Authority of India (FSSAI)

(D) The World Trade Organisation (WTO)

Ans :

(D) The World Trade Organisation (WTO)
The World Trade Organisation (WTO) was established to help trade flow smoothly and predictably. Its agreements, which India is a signatory to, provide access to world markets and govern international trade in goods and services.

- 180.** By seeking to comply with international standards, the company is demonstrating its commitment to:
- (A) Ensuring its products are of good quality and safe to eat, thereby facilitating trade.
 - (B) Lowering the quality of its products to save money.
 - (C) Selling its products only within the local Indian market.
 - (D) Avoiding all forms of quality control and management.

Ans :

(A) Ensuring its products are of good quality and safe to eat, thereby facilitating trade.
Adherence to effective food standards and control systems is essential for any country or company wishing to enter international trade. It ensures that imported and exported foods are of good quality and safe to consume.

Direction : Read the following case study and answer the following questions.

Mrs. Sharma buys a packet of turmeric powder from a local, unbranded shop. At home, she performs a simple test by adding a few drops of hydrochloric acid to a turmeric solution and is shocked to see it turn magenta. She realizes the turmeric has been adulterated with Metanil yellow, a non-permissible and toxic colorant used to give it a bright yellow appearance. Upset by this, she decides to only buy spices that have a quality certification mark. Her friend advises her to look for products with the 'Agmark' certification, which is a voluntary scheme for agricultural products, or the 'ISI' mark from the Bureau of Indian Standards (BIS) for processed foods. She also learns about the Food Safety and Standards Authority of India (FSSAI), the single authority established by the Indian government to consolidate all food-related laws and set science-based standards to ensure the availability of safe and wholesome food for all

citizens.

- 181.** The process of lowering the quality of the turmeric powder by adding an inferior or harmful material like Metanil yellow is known as:
- (A) Food Fortification
 - (B) Food Contamination
 - (C) Food Preservation
 - (D) Food Adulteration

Ans :

(D) A food Adulteration
Food adulteration is the process where the quality of food is deliberately lowered. This can be done by adding an inferior substance or by extracting a valuable ingredient, making the food unsafe for consumption.

- 182.** Which single authority has been established by the Government of India to consolidate laws relating to food and regulate its manufacture, storage, sale, and import?
- (A) The Bureau of Indian Standards (BIS)
 - (B) The Directorate of Marketing and Inspection (for Agmark)
 - (C) The Food Safety and Standards Authority of India (FSSAI)
 - (D) The International Organisation for Standardisation (ISO)

Ans :

(C) The Food Safety and Standards Authority of India (FSSAI)
The Food Safety and Standards Authority of India (FSSAI) was established under the FSSA, 2006. Its purpose is to consolidate the various acts and orders related to food and to lay down science-based standards for food safety.

- 183.** The 'Agmark' is a voluntary certification scheme in India primarily for which type of products?
- (A) Industrial machinery and electronics.
 - (B) Agricultural products, both raw and processed.
 - (C) All imported consumer goods.
 - (D) Pharmaceutical drugs and medicines.

Ans :

(B) Agricultural products, both raw and processed.
Agmark is a voluntary certification scheme specifically for agricultural products in India. This grading and marking system helps safeguard the health of consumers by assuring the quality of these products.

- (D) By making the packaging less informative and more confusing.

Ans :

(B) By minimizing or eliminating contamination and preventing false labeling.

GMP helps protect consumers by enabling manufacturers to minimize contamination and false labeling. This ensures consumers can purchase products that are not harmful and that they are not misled about the product's nature or quality.

- 194.** GMP, along with Good Handling Practices (GHP) and HACCP, is part of a larger framework known as:

- (A) A supply chain management system.
- (B) A customer relationship management system.
- (C) A waste management system.
- (D) A food safety management system.

Ans :

(D) A food safety management system.

Food safety management systems are comprehensive frameworks designed to ensure food safety throughout the food chain. They are built upon essential programs like Good Manufacturing Practices (GMP), Good Handling Practices (GHP), and HACCP.

- 195.** By adopting GMP, Golden Crust is moving from a reactive approach to a _____ approach to food safety.

- (A) Proactive/Preventive
- (B) Regressive
- (C) Destructive
- (D) Minimalist

Ans :

(A) A Proactive/Preventive

GMP requires manufacturers to be proactive in ensuring safety. Instead of just reacting to problems after they occur, this system helps to refine compliance and performance by preventing issues like contamination from happening in the first place.

Direction : Read the following case study and answer the following questions.

A state government sets up a new, state-of-the-art food testing laboratory to strengthen its food control system. The laboratory's primary role is to provide analytical capability for testing food samples collected by food inspectors from across

the state. The lab is equipped to detect a broad range of food contaminants, including chemical residues like pesticides, biotoxins, pathogenic bacteria, food-borne viruses, and illegal food additives. To be credible, the laboratory must get accredited by a recognized body, which certifies its technical competence. Furthermore, the laboratory hires well-trained personnel, including food analysts who have in-depth knowledge of laboratory management and the physical, chemical, and microbiological analysis of food. This investment in analytical capability is crucial for enforcing the standards laid down by FSSAI and ensuring that the food sold in the state is safe for consumption. It is a critical backend support for the entire food inspection and regulatory mechanism.

- 196.** An effective food control system must consist of which two key components?

- (A) Marketing and advertising.
- (B) Food inspection and analytical capability.
- (C) Product development and packaging.
- (D) Financial management and human resources.

Ans :

(B) A food inspection and analytical capability.

A strong food control system requires two main pillars to be effective. The first is food inspection to verify compliance, and the second is analytical capability to test food samples in laboratories.

- 197.** What is the main function of a food testing laboratory in the food control system?

- (A) To carry out the analysis of food for safety and quality conformity.
- (B) To create new recipes for the food industry.
- (C) To design advertising campaigns for food products.
- (D) To provide loans to food manufacturers.

Ans :

(A) To carry out the analysis of food for safety and quality conformity.

There is a need for well-equipped and accredited laboratories to carry out the analysis of food. These labs test for contaminants and ensure that food products meet the required standards of quality and safety.

- 198.** A professional who works in such a laboratory analyzing food samples for quality and safety is known as a:

- (A) Food Inspector
- (B) Food Auditor

- 189.** The unintentional transfer of harmful bacteria from a raw food item (like chicken) to a ready-to-eat food is known as:
- (A) Pasteurization
 - (B) Fermentation
 - (C) Adulteration
 - (D) Cross-contamination

Ans :

- (D) A cross-contamination

Cross-contamination is a common way that pathogens like Salmonella are spread. This can happen when a cook uses the same uncleaned equipment, like a cutting board, for both raw and ready-to-eat foods.

- 190.** The doctor's explanation highlights that food safety is an assurance that food is:
- (A) Acceptable for human consumption according to its intended use.
 - (B) Low in cost and easily available.
 - (C) Rich in positive attributes like color and flavor, regardless of safety.
 - (D) Free from all forms of microorganisms, including beneficial ones.

Ans :

- (A) Acceptable for human consumption according to its intended use.

Food safety is defined as the assurance that a food is acceptable for human consumption according to its intended use. This means it is free from hazards that could cause harm or illness to the consumer.

Direction : Read the following case study and answer the following questions.

A large-scale bakery, "Golden Crust," decides to seek a certification for Good Manufacturing Practices (GMP) to enhance its reputation and ensure product safety. The GMP implementation requires them to overhaul their entire operation. They start by ensuring the quality of all incoming raw materials and water. They establish strict protocols for the cleanliness of the premises, including all equipment, food preparation surfaces, and storage areas. A major focus is placed on personnel hygiene, with mandatory training for all staff on proper handwashing techniques and wearing clean uniforms. They also implement strict rules for storing food at appropriate temperatures to prevent microbial growth. Furthermore, the GMP guidelines help them refine their processes to minimize the risk of contamination and ensure

that their products are not falsely labeled. By adopting GMP, Golden Crust is taking proactive steps to produce safe, high-quality products, which is a good business tool for refining compliance and performance.

- 191.** What is the primary purpose of Good Manufacturing Practices (GMP)?
- (A) To serve as a part of quality assurance, ensuring manufacturers take proactive steps to produce safe products.
 - (B) To increase the bakery's daily production output at any cost.
 - (C) To provide a set of guidelines for marketing and advertising bakery products.
 - (D) To reduce the number of employees working in the bakery.

Ans :

- (A) To serve as a part of quality assurance, ensuring manufacturers take proactive steps to produce safe products.

Good Manufacturing Practices (GMP) are a component of quality assurance. They are designed to ensure that manufacturers and processors proactively take steps to guarantee that their products are safe and meet quality standards.

- 192.** The mandatory training on handwashing for all staff is an example of which key aspect of GMP?
- (A) Quality of raw materials and water.
 - (B) Proper storage of food at appropriate temperatures.
 - (C) Cleanliness of personnel and good hygiene practices.
 - (D) Maintenance of accurate financial records.

Ans :

- (C) Cleanliness of personnel and good hygiene practices.

Personal hygiene is a critical component of any food safety system. GMP and Good Handling Practices (GHP) ensure that all persons who handle food follow good hygiene practices to prevent the contamination of food products.

- 193.** How does implementing GMP help protect consumers?
- (A) By ensuring the products are always sold at a discounted price.
 - (B) By minimizing or eliminating contamination and preventing false labeling.
 - (C) By using more artificial preservatives and colors in the products.

(B) An institutional setting designed for the care of infants and young children.

A crèche is specifically defined as an institutional setting that is designed to provide care for infants and young children, particularly when home-based care from a primary caregiver is unavailable. This care is a substitute arrangement in the absence of the primary caregiver.

4. Which statement best describes the benefit of a good preschool environment for a young child?
- (A) It guarantees that a child will excel academically in formal school later on.
 - (B) It replaces the home environment entirely for the child's learning and development.
 - (C) It provides a beneficial learning environment that complements learning at home.
 - (D) It is only necessary for children from families with limited educational resources.

Ans :

(C) It provides a beneficial learning environment that complements learning at home.

A good preschool offers a child-centred, informal program that provides a valuable learning environment. This experience complements the advantages of a good home environment and can be especially beneficial if the home environment is lacking in some aspects.

5. What is the potential negative consequence of forcing a young child into a formal, structured learning environment?
- (A) The child's natural curiosity will diminish, and they may feel anxious or insecure.
 - (B) The child will develop advanced academic skills much faster than their peers.
 - (C) The child will become more independent and require less guidance from adults.
 - (D) The child will develop stronger social skills through structured group activities.

Ans :

(A) The child's natural curiosity will diminish, and they may feel anxious or insecure.

Forcing a young child to sit and learn in a formal school-like setting can stifle their natural curiosity. This can lead to feelings of anxiety and insecurity, as it does not align with their developmental need for exploration and play-based learning.

6. According to the NCF (2005) Position Paper on Early Childhood Education, which of the following is a basic objective of ECCE?

- (A) To provide vocational training for future employment.
- (B) To ensure early specialization in academic subjects.
- (C) To facilitate the holistic development of the child.
- (D) To focus solely on the physical health of children.

Ans :

(C) To facilitate the holistic development of the child.

The National Curriculum Framework (2005) outlines that a basic objective of Early Childhood Care and Education (ECCE) is the holistic development of the child, enabling them to realize their full potential. The other objectives are preparation for school and providing support services.

7. What does the term 'infancy' typically refer to?
- (A) The period of life from birth until 8 years of age.
 - (B) The period between birth and one year of age.
 - (C) The period when a child is between two and three years old.
 - (D) The period just before a child enters formal schooling.

Ans :

(B) The period between birth and one year of age. Infancy is defined as the period between birth and one year, although some experts may extend it to two years. It is a time of intense dependence on adults for meeting everyday needs.

8. What is 'day care'?
- (A) An institution that only cares for infants in the absence of their mother.
 - (B) A short-term program focused on preparing children for specific school entrance exams.
 - (C) A government program that provides only nutritional support to young children.
 - (D) Care provided to preschool-aged children, often all day, in a caregiver's absence.

Ans :

(D) Care provided to preschool-aged children, often all day, in a caregiver's absence.

Day care refers to the care of children in their preschool years, which may include infants and preschoolers. These are typically all-day programs that operate in the absence of a primary caregiver at home.

- (C) Food Analyst/Public Analyst
- (D) Quality Control Manager

Ans :

(C) A Food Analyst/Public Analyst
Professionals with expertise in food analysis and quality control can work in regulatory agencies as food analysts or public analysts. Their role is to test food samples in laboratories to check for compliance with standards.

- 199.** The need for well-equipped laboratories is increasing due to:
- (A) The decreasing use of pesticides and additives in food.
 - (B) A decline in international food trade.
 - (C) The simplification of all food processing methods.
 - (D) The need to detect a wide range of contaminants, including environmental chemicals, biotoxins, and pathogenic bacteria.

Ans :

(D) The need to detect a wide range of contaminants, including environmental chemicals, biotoxins, and pathogenic bacteria.

A broad range of analytical capabilities is now required for food testing. This is because of the need to detect various hazards like food contaminants, environmental chemicals, biotoxins, and emerging food-borne viruses and parasites.

- 200.** The work done by this laboratory directly supports the enforcement of standards set by which national body in India?
- (A) The World Health Organization (WHO)
 - (B) The Bureau of Indian Standards (BIS)
 - (C) The Food Safety and Standards Authority of India (FSSAI)
 - (D) The Indian Council of Medical Research (ICMR)

Ans :

(C) The Food Safety and Standards Authority of India (FSSAI)

The Food Safety and Standards Act places the responsibility of ensuring safe food on producers and suppliers. Accredited laboratories provide the analytical evidence needed to enforce the standards and regulations laid down by FSSAI.

Direction : Read the following case study and answer the following questions.

During a global health conference, a virologist

presents on the topic of “Emerging Pathogens and Food Safety.” She explains that in the last three decades, nearly half of all known food-borne pathogens have been discovered. She highlights several factors contributing to the emergence of new pathogens. These include microbial adaptations, where genetic mutations create new, more virulent strains of bacteria or viruses. She also points to altered human susceptibility, where factors like malnutrition or other illnesses can make populations more vulnerable to new infections. Another major factor is the globalization of the food supply; increased international travel and trade mean that a pathogen can emerge in one geographic area and quickly spread to others through contaminated food products. She cites Norovirus and Hepatitis E as examples of viruses that have become significant contributors to foodborne illnesses globally. She concludes by stressing the need for active surveillance networks at national and international levels to detect, identify, and control these emerging threats.

- 201.** Which of the following is identified as a key factor in the emergence of new food-borne pathogens?
- (A) A decrease in international travel and trade.
 - (B) The stabilization of all microbial genetics with no mutations.
 - (C) Microbial adaptations, altered human susceptibility, and globalization of the food supply.
 - (D) A global shift towards consuming only locally produced and processed foods.

Ans :

(C) A microbial adaptations, altered human susceptibility, and globalization of the food supply. Factors important in the emergence of pathogens include the pathogen itself (e.g., genetic mutations), the human host (e.g., altered susceptibility), and environmental factors, including how food is produced, processed, and globally distributed.

- 202.** How does the globalization of the food supply contribute to the spread of pathogens?
- (A) It allows pathogens to emerge in new populations or geographic areas.
 - (B) It ensures that all food is completely sterile and free from any microorganisms.
 - (C) It limits the variety of foods people are exposed to.
 - (D) It makes it easier to trace the source of a foodborne outbreak.

- 184.** One of the key functions of FSSAI is to:
- (A) Frame regulations to lay down science-based standards and guidelines for articles of food.
 - (B) Provide training programs only for international chefs.
 - (C) Set food prices for all products in the market.
 - (D) Promote the use of non-permissible food additives.

Ans :

(A) Frame regulations to lay down science-based standards and guidelines for articles of food.

A primary mandate of FSSAI is the framing of regulations to establish science-based standards and guidelines for food articles. It is also responsible for creating the system to enforce these standards across the country.

- 185.** Substances like Metanil yellow, which are used to make food products unsafe for human consumption, are known as:
- (A) Nutrients
 - (B) Preservatives
 - (C) Fortificants
 - (D) Adulterants

Ans :

(D) Adulterants

Adulterants are substances specifically used for the purpose of adulteration. They are added to food to lower its quality, often for economic gain, and make the product unsafe for human consumption.

Direction : Read the following case study and answer the following questions.

A college student, Aman, eats from a street food vendor and later develops a severe case of food poisoning. His doctor explains that the illness was a food infection caused by Salmonella bacteria, which were present in the undercooked chicken he had consumed. The doctor clarifies the difference between this and food intoxication. He tells Aman that a food infection occurs when you ingest food containing live pathogenic organisms, which then multiply inside your body and cause disease. Salmonella often exists in the intestinal tracts of animals and can contaminate raw meat and eggs. In contrast, food intoxication is caused by consuming toxins that have already been produced by bacteria in the food before it is eaten, often due to improper storage. Aman learns that proper cooking is crucial to destroy live pathogens like

Salmonella, and good hygiene is essential to prevent cross-contamination from raw to cooked foods. This experience makes him acutely aware of the importance of food safety practices.

- 186.** Aman's illness, caused by ingesting live Salmonella bacteria that then multiplied in his body, is an example of a:

- (A) Food Intoxication
- (B) Food Infection
- (C) Chemical Hazard
- (D) Physical Hazard

Ans :

(B) A food Infection

A food infection results from the ingestion of live pathogenic organisms, like Salmonella. These organisms then multiply within the host's body, leading to disease symptoms such as diarrhea, fever, and cramps.

- 187.** A common source of Salmonella bacteria is:
- (A) The intestinal tract of animals, leading to contamination of raw meat and eggs.
 - (B) Properly cooked and handled food.
 - (C) Packaged and sterilized fruit juices.
 - (D) Iodized salt and fortified flour.

Ans :

(A) The intestinal tract of animals, leading to contamination of raw meat and eggs.

The Salmonella organism commonly exists in the intestinal tracts of animals. Consequently, raw products like milk, eggs, and meat can be sources of contamination, which is why thorough cooking is essential for safety.

- 188.** What is the most effective way to destroy pathogens like Salmonella in food?
- (A) Storing the food at room temperature for several hours.
 - (B) Washing the food with cold water.
 - (C) Proper and adequate cooking using heat.
 - (D) Mixing the contaminated food with other ingredients.

Ans :

(C) A proper and adequate cooking using heat.

Heat is effective in destroying Salmonella and other pathogenic organisms. Inadequate cooking is a common cause of foodborne infections because it allows some of the organisms to survive and cause illness.

Ans :

(B) A holistic concept that integrates both negative attributes (like hazards) and positive attributes (like flavor and texture).

Food quality is a holistic concept. It refers to attributes that influence a product's value, including negative ones like spoilage and contamination, as well as positive ones like color, flavor, texture, and nutritional value.

207. According to the holistic definition, what is considered a preliminary attribute and a precursor of quality?

- (A) Safety
- (B) Flavor
- (C) Color
- (D) Texture

Ans :

(A) A safety

Within the holistic concept of food quality, safety is considered a preliminary attribute and a precursor to overall quality. A food cannot be considered high quality if it is not, first and foremost, safe to consume.

208. Which of the following is considered a 'positive attribute' of food quality?

- (A) Contamination with bacteria.
- (B) Adulteration with a non-permissible color.
- (C) Spoilage and off-odors.
- (D) Desirable sensory properties like color, flavor, and texture.

Ans :

(D) A desirable sensory properties like color, flavor, and texture.

Food quality includes positive attributes that add value for the consumer. These are often sensory properties such as an appealing color, a pleasant odor and flavor, and a desirable texture, which make the food enjoyable.

209. The presence of spoilage, contamination, and adulteration are considered what kind of attributes?

- (A) Positive attributes
- (B) Negative attributes
- (C) Neutral attributes
- (D) Desirable attributes

Ans :

(B) A negative attributes

Negative attributes detract from a product's value to consumers. This category includes

spoilage, contamination with harmful substances, adulteration, and the presence of any food safety hazards that make the food unacceptable or unsafe.

210. Why is it essential for governments and international bodies to lay down food standards?

- (A) To make food products more expensive for consumers.
- (B) To limit the variety of food products available in the market.
- (C) To integrate quality into every aspect of food production and ensure foods are safe and wholesome.
- (D) To promote dishonest practices in the sale of food.

Ans :

(C) To integrate quality into every aspect of food production and ensure foods are safe and wholesome.

Effective food standards and control systems are necessary to integrate quality into all aspects of food production and service. This ensures the supply of hygienic and wholesome food and facilitates fair trade between nations.

CHAPTER 06

EARLY CHILDHOOD CARE AND EDUCATION

SUMMARY

1. SIGNIFICANCE

Early childhood is a crucial phase of rapid development where a child learns about the world, forms attachments with family members, and develops physically and cognitively. While children were traditionally cared for within the family, the increasing need for mothers to work outside the home has led to a rise in institutional child care, such as crèches and preschools. A good preschool provides a safe, secure, loving, and stimulating environment that enhances a child's learning, promotes curiosity, and prepares them for formal schooling. These services are particularly beneficial for children from disadvantaged backgrounds and also enable older siblings, who might otherwise be tasked with childcare, to attend school. The National Curriculum Framework (NCF) outlines the basic objectives of Early Childhood Care and Education (ECCE) as ensuring the holistic development of the child, preparing them for school, and providing support services for women and children.

2. BASIC CONCEPTS

Early childhood is the life phase from birth to eight years of age. Key concepts and terms associated with this field include:

- **Infancy:** The period from birth up to one or two years, characterized by intense dependence on adult caregivers.
- **Crèche:** An institutional setting designed for the care of infants and young children in the absence of home care.
- **Day care:** All-day care programs for both infants and preschoolers, provided when a primary caregiver is not available at home.

- **Preschool child:** A child who is developmentally ready to experience an environment beyond the immediate family.
- **Montessori schools:** Preschools that follow the educational principles developed by Maria Montessori.

The Government of India provides preschool education through `anganwadis` under its Integrated Child Development Services (ICDS) program. A core principle of ECCE, influenced by psychologists like Jean Piaget, is the understanding that young children have unique ways of comprehending the world and need a supportive environment to explore freely. The NCF (2005) emphasizes several guiding principles for ECCE, including play as the basis for learning, the primacy of experiential learning, developmentally appropriate practices, and a focus on health and well-being.

3. PREPARING FOR A CAREER

Working with young children requires specialized training due to their specific developmental needs and ways of understanding the world. ECCE professionals are responsible not only to the children but also to their families and the institutions they work for, requiring a high level of commitment and knowledge.

Essential skills and qualities for an ECCE professional include:

- A genuine interest in children and their development.
- Knowledge of the needs and capabilities of young children.
- Skills for creating interesting and creative activities.
- Enthusiasm for storytelling, exploration, and social interaction.
- Patience and willingness to answer children's frequent queries.

- An energetic nature and the capacity to understand individual differences.

An undergraduate degree in Child/Human Development or Child Psychology is an ideal qualification, although one-year diploma programs and Nursery Teacher Training courses are also available options for entry into the field. Additionally, administrative skills and a strong repertoire of artistic abilities like storytelling, music, and dance are crucial for an effective early childhood educator.

4. SCOPE

The field of ECCE offers widespread opportunities. A trained professional can work as a teacher in a nursery school, a caregiver in a crèche or day care center, or as part of a team developing programs for young children. Both governmental and non-governmental organizations hire ECCE professionals to plan and promote campaigns and services. Entrepreneurship is a significant avenue, allowing individuals to establish their own childcare centers, activity clubs, or preschools. For those interested in advanced roles, pursuing a postgraduate diploma, degree, or a doctorate can lead to careers in research, teacher training, and other senior positions.

5. CAREERS

Commonly available career paths in the ECCE field include:

- Teacher in a nursery school.
- Caregiver in a day care center or crèche.
- Team member for various programs focused on young children.
- Professional planner for campaigns and services organized by government agencies or NGOs.
- Entrepreneur in child-related ventures such as camps, educational picnics, activity clubs, and preschool centers.
- Pursuit of higher studies leading to research and other advanced roles in the field.

MULTIPLE CHOICE QUESTION

1. Why is the period of early childhood considered critical for a child's learning and development?
(A) It is when formal schooling and academic learning officially begin for the children.

- (B) It is the only period when children develop attachments to their family members completely.
- (C) It is when children have fully developed cognitive abilities to understand complex ideas.
- (D) It is a time of rapid growth when children actively explore and learn from their environment.

Ans :

(D) It is a time of rapid growth when children actively explore and learn from their environment. The early years are crucial because children learn to walk, talk, and manipulate objects, enabling active engagement with their surroundings. This interaction with people and materials is fundamental to their rapid learning and understanding of the world, satisfying their immense curiosity.

2. According to the text, what is a primary benefit of institutional care for young children in communities where older siblings are caregivers?
(A) It allows the older child to be released from caregiving duties to attend school.
(B) It provides young children with advanced academic skills before the formal school.
(C) It ensures that young children are exclusively cared for by only trained professionals.
(D) It replaces the family's role in the child's upbringing with institutional support.

Ans :

(A) It allows the older child to be released from caregiving duties to attend school. In many communities, older school-age children are tasked with caring for younger siblings, which prevents them from attending school themselves. Institutional care for young children frees these older siblings from their caregiving responsibilities, enabling them to pursue their own education.

3. As per the text, what is the primary purpose of a 'crèche'?
(A) A formal school for children aged three to six years focusing only on academics.
(B) An institutional setting designed for the care of infants and young children.
(C) A home-based program exclusively for children with special educational needs.
(D) A community center providing recreational activities for children of different ages.

Ans :

Ans :

(A) It allows pathogens to emerge in new populations or geographic areas. Increased globalization of the food supply and international travel create opportunities for pathogens to emerge in new populations or spread to new geographic areas, posing a global public health concern.

203. Altered human susceptibility, which makes people more vulnerable to new infections, can be caused by factors such as:

- (A) Excellent nutritional status and strong immunity.
- (B) Malnutrition and pre-existing health conditions.
- (C) A decrease in the overall human population.
- (D) Living in a completely sterile environment.

Ans :

(B) A malnutrition and pre-existing health conditions.

Changes in host susceptibility can lead to the emergence of new infections in vulnerable populations. Factors like malnutrition, age, and other health conditions can weaken a person's immune system, making them more susceptible.

204. The speaker's call for active surveillance networks highlights the need to:

- (A) Restrict all scientific research on new pathogens.
- (B) Ignore the emergence of new foodborne illnesses.
- (C) Assume that all foodborne illnesses are caused by known bacteria.
- (D) Detect, identify, and recognize emerging pathogens to control their spread.

Ans :

(D) A detect, identify, and recognize emerging pathogens to control their spread.

Given that many foodborne illnesses are of unknown etiology and new pathogens continue to emerge, there is a great need to detect and identify them. This requires establishing active surveillance networks both nationally and internationally.

205. The fact that nearly half of all known food-borne pathogens have been discovered in the last 25-30 years indicates that:

- (A) Food safety challenges are changing significantly, and new threats continue to emerge.

(B) The issue of food safety is becoming less complex over time.

(C) All foodborne illnesses have now been identified and can be easily controlled.

(D) Old pathogens are disappearing faster than new ones are emerging.

Ans :

(A) A food safety challenges are changing significantly, and new threats continue to emerge. The discovery of many new food-borne pathogens in recent decades indicates that food safety is a dynamic and evolving challenge. New pathogens will continue to emerge, requiring ongoing research and surveillance efforts.

Direction : Read the following case study and answer the following questions.

In a debate about what makes a food product "good," two groups of students present different views on the concept of food quality. The first group argues that food quality is primarily about safety. They contend that a product's most important attribute is that it is free from spoilage, contamination, and adulteration. They believe that as long as a food is safe to eat, its other characteristics are secondary. The second group, however, argues for a more holistic definition. They state that while safety is a prerequisite, food quality also includes positive attributes that influence a product's value to the consumer. This includes sensory properties like an appealing color, a pleasant flavor, and a desirable texture. They also add that nutritional traits and social considerations are part of the overall quality. They conclude that food quality is a comprehensive concept that integrates safety with other factors that make the food desirable, nutritious, and acceptable to the consumer.

206. The second group's argument defines 'food quality' as a:

- (A) Concept that is only concerned with the absence of negative attributes.
- (B) Holistic concept that integrates both negative attributes (like hazards) and positive attributes (like flavor and texture).
- (C) Measure of only the nutritional value of a food product.
- (D) Term that is completely synonymous with food safety.

9. Why is it important for an ECCE institution to work in harmony with a child's family and cultural context?
- (A) Because young children cannot distinguish between different realities and perspectives.
 - (B) Because families are legally required to approve all curriculum decisions.
 - (C) Because cultural traditions are more important than educational principles.
 - (D) Because it reduces the operational costs of running the ECCE institution.

Ans :

(A) Because young children cannot distinguish between different realities and perspectives. It is crucial for ECCE institutions to align with the child's family and culture because young children are unable to make distinctions about different perspectives and realities in the way older children or adults can. This alignment prevents confusion and supports the child's development.

10. Which of the following is NOT listed as a guiding principle of ECCE according to the NCF (2005)?
- (A) Play as the basis for learning.
 - (B) Emphasis on rote memorization.
 - (C) Use of local materials, arts, and knowledge.
 - (D) Health, well-being, and healthy habits.

Ans :

(B) Emphasis on rote memorization. The NCF (2005) guiding principles for ECCE emphasize experiential learning, play, and developmentally appropriate practices. Rote memorization is contrary to these principles, which prioritize understanding and exploration over passive learning.

11. Who was the developmental psychologist who emphasized that young children have different ways of understanding the world?
- (A) Lev Vygotsky
 - (B) Maria Montessori
 - (C) Jean Piaget
 - (D) Mahatma Gandhi

Ans :

(C) Jean Piaget The developmental psychologist Jean Piaget dedicated his work to understanding and explaining that young children possess unique ways of comprehending the world around them, necessitating a supportive environment for their exploration.

12. What is a 'toddler'?
- (A) An infant who has just learned to crawl.
 - (B) A child between the ages of two and three years.
 - (C) Any child who attends a day care facility.
 - (D) A child who is ready to enter formal school.

Ans :

(B) A child between the ages of two and three years.

The term 'toddler' refers to a child who is between two and three years old. The name is derived from the characteristic jumpy walk that a child exhibits at this age.

13. What distinguishes a 'preschool child' from a 'toddler'?
- (A) The ability to speak in complete sentences.
 - (B) The development of bladder and bowel control.
 - (C) The ability to walk and run independently.
 - (D) The readiness to experience environments beyond the family.

Ans :

(D) The readiness to experience environments beyond the family.

A child is called a 'preschool child' when they are ready to experience an extra-familial environment, meaning a setting beyond their immediate family. This readiness for broader social and learning experiences distinguishes them from the earlier toddler stage.

14. Schools based on the principles of early childhood education as outlined by a well-known educationist are often called what?
- (A) Anganwadi Schools
 - (B) Vygotsky Schools
 - (C) Piaget Schools
 - (D) Montessori Schools

Ans :

(D) Montessori Schools

Montessori schools are educational institutions for young children that are based on the principles and methods developed by the renowned educationist Maria Montessori.

15. A preschool teacher notices her students are fascinated by a snail they found in the garden. According to ECCE principles, what is the best course of action?
- (A) Tell them to ignore it and continue with the planned lesson on alphabets.

Career paths in ECCE include being a teacher, caregiver, entrepreneur in child-related activities, or working for NGOs. While related to education, becoming a corporate lawyer is not a direct career progression from ECCE training.

- 26.** Why are administrative and management skills important for a preschool teacher?

- (A) Because teachers are primarily responsible for the school's financial investments.
- (B) Because these skills are more important than interacting with the children.
- (C) To qualify for a higher salary bracket regardless of teaching performance.
- (D) To effectively manage record keeping, accounting, and parent communication.

Ans :

- (D) To effectively manage record keeping, accounting, and parent communication.

A teacher needs administrative and management skills for tasks like record keeping, accounting, and report-writing. These skills ensure the institution maintains proper records and that interaction with the parent community is effective and productive.

- 27.** What is a key feature of the Government of India's Integrated Child Development Services (ICDS) program?

- (A) It operates through child care centers called 'anganwadis'.
- (B) It offers university-level courses in child development.
- (C) It exclusively provides financial aid to private preschools.
- (D) It is a program designed only for urban children.

Ans :

- (A) It operates through child care centers called 'anganwadis'.

The Government of India's ICDS program delivers its services through a network of 'anganwadis' located in both urban and rural areas. These centers provide preschool education among other services.

- 28.** Assertion (A): A good preschool experience can be particularly beneficial for children living in difficult circumstances.

Reason (R): Preschool environments can provide essential nutrition, health interventions, and learning support that may be lacking at home.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).

A good preschool environment is known to be very beneficial for children in difficult circumstances or those needing additional support. This is because these services can provide interventions in nutrition and health, besides learning, which might not be adequately available in their home environment.

- 29.** What developmental milestone in infancy indicates a capacity to distinguish between familiar and unfamiliar people?

- (A) The ability to walk without support.
- (B) The development of bladder control.
- (C) The fear of unknown people or strangers.
- (D) The ability to pick up small objects.

Ans :

- (C) The fear of unknown people or strangers.

The fear of unknown people, often seen in babies around 8-12 months, is not just an emotional display. It demonstrates a cognitive milestone: the capacity to recognize familiar faces and, by extension, show fear of those who are unfamiliar.

- 30.** What is the term for the care of infants and young children in a setting outside their own home, particularly for business purposes by a woman in her neighborhood?

- (A) Formal schooling
- (B) Institutionalized centre
- (C) Government-run anganwadi
- (D) Informal family care setting

Ans :

- (D) Informal family care setting

An informal family care setting is described as a situation where a woman in a neighborhood sets up a 'crèche' in her own home for business purposes to care for local children.

- 31.** How does the role of an ECCE professional for a toddler differ from their role for a preschooler?

- (A) The professional focuses entirely on play for toddlers and academics for preschoolers.
- (B) The professional provides more physical care

(B) Because young children have short attention spans and plans often need to change.

Young children have short attention spans compared to older children. Therefore, a preschool teacher must be flexible and prepared with many activities to adapt to the children's changing needs and interests, ensuring an effective learning environment.

- 21.** Consider the following skills required for an ECCE professional:

1. Enthusiasm for activities like story-telling and exploration.
2. Capacity for understanding individual differences among children.
3. Strict adherence to a pre-written lesson plan without any deviation.

Which of the skills listed above are essential for an early childhood professional?

- (A) 1 and 3 only
- (B) 2 and 3 only
- (C) 1 and 2 only
- (D) 1, 2, and 3

Ans :

- (C) 1 and 2 only

An effective ECCE professional must have enthusiasm for engaging activities and the capacity to understand individual differences. However, strict adherence to a lesson plan is discouraged; flexibility and adaptability are crucial due to the nature of young children.

- 22.** What constitutes a “developmentally appropriate practice” in ECCE?

- (A) Providing learning experiences that are enjoyable, meaningful, and suited to the child's age.
- (B) Giving a child tasks that are far beyond their current capabilities to challenge them.
- (C) Using the same teaching methods for a 2-year-old and a 7-year-old.
- (D) Focusing exclusively on academic worksheets and drills from a very early age.

Ans :

- (A) Providing learning experiences that are enjoyable, meaningful, and suited to the child's age.

Developmentally appropriate practice, a key ECCE principle, involves providing an environment where learning is easy, enjoyable, and meaningful. Tasks should be neither too easy nor too difficult to maintain the child's interest and motivation.

- 23.** Which of the following is an educational qualification option for someone wanting to enter the ECCE field soon after schooling?

- (A) A doctoral degree in Child Psychology.
- (B) A one-year diploma or an Open University course.
- (C) A mandatory five-year apprenticeship under a senior teacher.
- (D) A master's degree in educational administration.

Ans :

- (B) A one-year diploma or an Open University course.

For those wishing to enter the ECCE field shortly after completing their schooling, options such as a one-year diploma, Nursery Teacher Training (NTT), or courses from an Open University are available.

- 24.** An aspiring ECCE professional is highly knowledgeable about child development theories but is quiet and unwilling to participate in playful activities. What challenge might this person face?

- (A) They will excel at administrative tasks but struggle with direct child interaction.
- (B) They will be overqualified for most preschool teaching positions.
- (C) They will find it easy to manage a classroom but difficult to write reports.
- (D) They will be preferred by parents who want a strictly academic environment.

Ans :

- (A) They will excel at administrative tasks but struggle with direct child interaction.

A fundamental requirement for an effective ECCE specialist is a predisposition to be open and interactive with children. Skills in playful activities are mandatory, and a lack of enthusiasm for interaction would be a significant challenge in working directly with children.

- 25.** Which of the following is NOT a typical career path or service in the field of ECCE?

- (A) Working as a caregiver in a day care center.
- (B) Becoming a corporate lawyer specializing in education policy.
- (C) Setting up one's own preschool as an entrepreneur.
- (D) Working for an NGO that promotes services for young children.

Ans :

- (B) Becoming a corporate lawyer specializing in education policy.

2. Preschool Child
3. Infant
- (A) 3, 1, 2
- (B) 1, 3, 2
- (C) 2, 1, 3
- (D) 3, 2, 1

Ans :

- (A) 3, 1, 2

The developmental sequence begins with infancy (birth to 1-2 years), followed by the toddler stage (2-3 years), and then the preschool child stage (ready for extra-familial environments).

- 55.** Why is the “child-centred approach” considered ideal for young children’s learning?
- (A) It ensures the teacher has complete control over all activities.
 - (B) It makes learning enjoyable and is suited to their developmental stage.
 - (C) It is the most cost-effective method for managing large groups of children.
 - (D) It focuses on preparing children for competitive exams from an early age.

Ans :

- (B) It makes learning enjoyable and is suited to their developmental stage.

The child-centred approach, often incorporating play-way methods, is ideal because it makes learning enjoyable and aligns with the developmental needs and characteristics of young children. This approach respects their pace and interests.

- 56.** According to the text, what is one of the most important aspects for a professional who wishes to become an effective early childhood specialist?
- (A) Having a degree from a prestigious university.
 - (B) Having a predisposition to be open and interactive with children.
 - (C) Being skilled in financial management and fundraising.
 - (D) Having prior experience of working in a corporate environment.

Ans :

- (B) Having a predisposition to be open and interactive with children.

The text states that a fundamental requirement for an effective early childhood specialist is having a predisposition to be open and interactive with children, beyond any formal degrees acquired.

- 57.** A preschool curriculum heavily relies on worksheets and discourages creative art or outdoor play. This approach violates which key principle of ECCE?
- (A) The principle of using local materials and knowledge.
 - (B) The principle of maintaining health and healthy habits.
 - (C) The principle that play and art are the basis of learning.
 - (D) The principle of having a mix of formal and informal interaction.

Ans :

- (C) The principle that play and art are the basis of learning.

The NCF (2005) guiding principles explicitly state that play should be the basis for learning and art the basis of education. A curriculum focused on worksheets while discouraging play and art directly contradicts this fundamental principle.

- 58.** What is the primary reason for a young child’s attachment to their mother or primary caregiver?
- (A) The caregiver is the source of security, care, and emotional bonding.
 - (B) The caregiver provides the child with toys and material possessions.
 - (C) The child is biologically programmed to be attached only to the mother.
 - (D) The child understands the social importance of the family structure.

Ans :

- (A) The caregiver is the source of security, care, and emotional bonding.

The infant develops an attachment with family members, particularly the mother, who is generally the primary caregiver. This bond is crucial for the child’s sense of security and emotional well-being.

- 59.** What is meant by “holistic development” in the context of ECCE?
- (A) Development focused solely on cognitive and intellectual skills.
 - (C) Development that is accelerated to meet the standards of older children.
 - (C) Development that is centered around religious and spiritual teachings only.
 - (D) Development that addresses all areas: physical, social, emotional, and cognitive.

Ans :

- (D) Development that addresses all areas: physical, social, emotional, and cognitive.

for toddlers and more learning experiences for preschoolers.

- (C) The professional uses strict discipline with toddlers and a lenient approach with preschoolers.
- (D) The professional's role is identical for both toddlers and preschoolers without any difference.

Ans :

(B) The professional provides more physical care for toddlers and more learning experiences for preschoolers.

A teacher for preschoolers has less need for supervising physical care (like cleaning, feeding, toilet activity) compared to a caregiver for toddlers. The focus for preschoolers shifts more towards providing stimulating learning opportunities and enhancing creative expression.

- 32.** Besides play, what is highlighted as another basis for education in the guiding principles of ECCE by NCF (2005)?
- (A) Rote memorization
 - (B) Competitive sports
 - (C) Technology
 - (D) Art

Ans :

(D) Art

According to the guiding principles of ECCE outlined by the NCF (2005), art is considered a fundamental basis of education, alongside play. This emphasizes creative expression as a key learning tool.

- 33.** Why must an ECCE professional be energetic and prepared for physical activity?
- (A) Because they are required to compete with children in sports activities.
 - (B) Because setting up and managing play activities requires physical effort.
 - (C) Because young children's high energy levels demand active adult participation.
 - (D) Because physical fitness is a primary criterion for salary increments.

Ans :

(C) Because young children's high energy levels demand active adult participation.

Working with young children is physically demanding. An ECCE professional needs to be energetic to match the children's activity levels and engage with them effectively in various playful indoor and outdoor activities for long periods.

- 34.** A parent is worried because their 4-year-old child, who attends a good preschool, eats vegetables there but refuses them at home. What is the most likely explanation?
- (A) The child is learning new eating habits by observing their peers.
 - (B) The preschool teacher is a better cook than the parent.
 - (C) The child is being forced to eat against their will at the preschool.
 - (D) The vegetables served at the preschool are of a superior quality.

Ans :

(A) The child is learning new eating habits by observing their peers.

Children learn very quickly among their peers. It is a common observation in preschool settings that children may eat foods they refuse at home, influenced by seeing other children eat them.

- 35.** Which statement accurately reflects the nature of learning in early childhood?
- (A) Children learn best through passive listening and memorization of facts.
 - (B) All children learn naturally, and preschool only accelerates this process.
 - (C) Learning only occurs in formal settings like a school or a classroom.
 - (D) A child's curiosity is a hindrance to effective learning and must be controlled.

Ans :

(B) All children learn naturally, and preschool only accelerates this process.

The text states, "All children learn, naturally." Preschool experiences are valuable because they enhance this natural learning process by providing exposure to other adults, environments, and materials, rather than being the sole source of learning.

- 36.** Early childhood is the phase of life from birth until what age?
- (A) 5 years
 - (B) 12 years
 - (C) 10 years
 - (D) 8 years

Ans :

(D) 8 years

Early childhood is formally defined as the period of life that spans from birth up to 8 years of age. It is commonly divided into two sub-stages: birth to three years and three to eight years.

- 45.** Match the age-related behavior in Column A with the developmental concept it signifies in Column B.

	Column A		Column B
1.	A one-year-old clings to their mother.	a.	Rapid vocabulary growth in mother tongue.
2.	A baby of 9 months fears strangers.	b.	Readiness for extra-familial experiences.
3.	A 3-year-old enjoys nursery school.	c.	Development of attachment to the primary caregiver.
4.	A 4-year-old constantly asks "Why?".	d.	Cognitive ability to recognize familiar faces.

- (A) 1-c, 2-d, 3-b, 4-a
 (B) 1-a, 2-b, 3-c, 4-d
 (C) 1-b, 2-a, 3-d, 4-c
 (D) 1-d, 2-c, 3-a, 4-b

Ans :

- (A) 1-c, 2-d, 3-b, 4-a

Clinging demonstrates attachment to the caregiver. Fearing strangers shows recognition of familiar faces. Enjoying nursery school indicates readiness for experiences beyond the family. Constant questioning reflects rapid vocabulary growth and curiosity.

- 46.** Consider the following statements regarding the significance of ECCE:

1. It provides essential support to society in developing the next generation.
2. It primarily focuses on teaching older children how to care for their younger siblings.
3. It benefits children in difficult circumstances by providing nutrition and health interventions.
4. Institutional care for young children can enable older siblings to attend school.

Which of the statements given above are correct?

- (A) 1, 2 and 3
 (B) 1, 3 and 4
 (C) 2, 3 and 4
 (D) 1, 2 and 4

Ans :

- (B) 1, 3 and 4

ECCE supports society's future, helps children in difficult circumstances with health and nutrition,

and frees older siblings to attend school. Its focus is on the young child's development, not on training older siblings as caregivers.

- 47.** Which of the following are listed as guiding principles of ECCE in the NCF (2005)?

1. Primacy of experience rather than expertise.
2. Blend of textual and cultural sources.
3. A strict separation between formal and informal interactions.
4. Recognition of the special features of children's thinking.

Which of the statements given above are correct?

- (A) 1, 2 and 4
 (B) 1, 2 and 3
 (C) 1, 3 and 4
 (D) 2, 3 and 4

Ans :

- (A) 1, 2 and 4

The NCF (2005) principles for ECCE include prioritizing experience, blending textual and cultural sources, and recognizing children's unique ways of thinking. It advocates for a mix of formal and informal interactions, not a strict separation.

- 48.** Identify the essential skills for an early childhood professional from the list below:

1. The ability to be adaptive and flexible with children.
2. Deep knowledge of advanced calculus and physics.
3. Willingness and interest in answering children's queries.
4. A good repertoire of skills in arts like music and dance.

Which of the statements given above are correct?

- (A) 1, 2 and 3
 (B) 2, 3 and 4
 (C) 1, 3 and 4
 (D) 1, 2 and 4

Ans :

- (C) 1, 3 and 4

An ECCE professional must be flexible, willing to answer questions, and skilled in the arts to engage children effectively. Advanced knowledge of unrelated subjects like calculus is not a required skill for this profession.

- 49.** Which of the following are potential career opportunities in the field of ECCE?

1. Setting up one's own day care centre as an entrepreneur.

children's care. Day care provides all-day care for preschoolers. A toddler is a child between two and three years of age.

- 42.** Match the ECCE principle from NCF (2005) in Column A with its implication in Column B.

	Column A		Column B
1.	Play as the basis for learning	a.	Using drawings, songs, and drama to facilitate understanding.
2.	Art as the basis of education	b.	Allowing children to learn through hands-on activities.
3.	Primacy of experience	c.	Making learning enjoyable and child-led through activities.
4.	Use of local materials	d.	Incorporating stones, leaves, and regional crafts into lessons.

- (A) 1-d, 2-c, 3-b, 4-a
 (B) 1-c, 2-a, 3-b, 4-d
 (C) 1-a, 2-b, 3-d, 4-c
 (D) 1-b, 2-d, 3-a, 4-c

Ans :

- (B) 1-c, 2-a, 3-b, 4-d

The NCF (2005) principles state that play is the basis for learning, art is a medium for education, experience (experiential learning) is prioritized, and local materials should be used. The options correctly match these principles with their practical implications in a preschool setting.

- 43.** Match the professional skill in Column A with its importance for an ECCE professional in Column B.

	Column A		Column B
1.	Enthusiasm for story-telling	a.	To keep accurate accounts, and communicate with parents effectively.
2.	Administrative skills	b.	To create engaging and memorable learning experiences for children.
3.	Adaptability and flexibility	c.	To cater to the unique needs and learning paces of each child.

4.	Understanding individual differences	d.	To manage a dynamic classroom with children having short attention spans.
----	--------------------------------------	----	---

- (A) 1-b, 2-a, 3-d, 4-c
 (B) 1-c, 2-d, 3-a, 4-b
 (C) 1-d, 2-c, 3-b, 4-a
 (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-b, 2-a, 3-d, 4-c

Story-telling skills make learning engaging. Administrative skills are for record-keeping and parent interaction. Flexibility is needed for short attention spans. Understanding individual differences allows catering to each child's needs.

- 44.** Match the career avenue in Column A with its description in Column B.

	Column A		Column B
1.	Entrepreneurship	a.	Working for an organization that plans and promotes services for children.
2.	Higher Studies	b.	Setting up one's own child care and education-related program.
3.	NGO Professional	c.	Enrolling in a doctoral degree to conduct research in the field.
4.	Teacher/Caregiver	d.	Working directly with children in a nursery school or crèche.

- (A) 1-d, 2-c, 3-a, 4-b
 (B) 1-c, 2-a, 3-b, 4-d
 (C) 1-b, 2-c, 3-a, 4-d
 (D) 1-a, 2-d, 3-c, 4-b

Ans :

- (C) 1-b, 2-c, 3-a, 4-d

Entrepreneurship involves starting one's own program. Higher studies can lead to a doctoral degree and research. NGO professionals plan and promote services. Teachers and caregivers work directly with children in schools and crèches.

- 37.** According to the text, why would parents also benefit from knowing about child development?
- (A) To develop realistic expectations and avoid competitive comparisons.
 - (B) To ensure their child becomes a professional athlete.
 - (C) To learn how to run a preschool business from home.
 - (D) To replace the need for doctors and healthcare professionals.

Ans :

(A) To develop realistic expectations and avoid competitive comparisons.

Parents would greatly benefit from a scientific understanding of development, which leads to realistic expectations. This knowledge helps them appreciate individual differences and realize that competitive comparisons between children are often pointless.

- 38.** Which opportunity is available for an ECCE professional who wishes to pursue higher studies after a degree?
- (A) A mandatory internship in a corporate company.
 - (B) A post-graduate diploma or degree in early childhood education.
 - (C) A vocational course in an entirely different unrelated field.
 - (D) Direct entry into a senior government administrative role.

Ans :

(B) A post-graduate diploma or degree in early childhood education.

For those wishing to pursue higher studies in the field, options include enrolling in a post-graduate diploma or degree in early childhood education, which can lead to a doctoral degree and more senior professional roles.

- 39.** An entrepreneur wants to start her own preschool. Beyond being a good teacher, what other key expertise would she require?
- (A) Advanced knowledge of child psychology theories only.
 - (B) Skills in professional sports coaching and training.
 - (C) Expertise in the organization and management of institutions.
 - (D) A degree in architecture to design the school building.

Ans :

(C) Expertise in the organization and management of institutions.

Setting up one's own child care program requires more than teaching skills. The entrepreneur would need expertise related to the organization and management of such institutions, including administration, finance, and record-keeping.

- 40.** Which of the following is an accurate statement about career prospects in ECCE?
- (A) The field offers diverse possibilities including entrepreneurship and NGO work.
 - (B) Careers are limited to teaching in government schools only.
 - (C) A doctoral degree is a mandatory requirement for entry-level caregiver roles.
 - (D) There is declining demand for trained ECCE professionals in modern society.

Ans :

(A) The field offers diverse possibilities including entrepreneurship and NGO work.

The scope of ECCE is widespread, offering varied careers. A trained professional can work as a teacher or caregiver, join NGOs, or start their own enterprise, indicating diverse possibilities beyond a single role.

- 41.** Match the term in Column A with its correct description in Column B.

	Column A		Column B
1.	Infancy	a.	Cares for preschool children all day in a caregiver's absence.
2.	Crèche	b.	The period from birth to one year, marked by dependence.
3.	Day Care	c.	A child aged 2-3 years, named for their jumpy walk.
4.	Toddler	d.	An institutional setting designed for the care of very young children.

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-c, 2-a, 3-d, 4-b
- (C) 1-d, 2-b, 3-c, 4-a
- (D) 1-a, 2-c, 3-b, 4-d

Ans :

(A) 1-b, 2-d, 3-a, 4-c

Infancy is the period from birth to one year. A crèche is an institutional setting for young

2. Working as a coordinator of a programme run by someone else.
3. Becoming a trainer of teachers in early childhood education.
4. Working as a stock market analyst for educational companies.

Which of the statements given above are correct?

- (A) 1, 2 and 3
- (B) 1, 2 and 4
- (C) 1, 3 and 4
- (D) 2, 3 and 4

Ans :

- (A) 1, 2 and 3

Career options in ECCE include entrepreneurship (starting a day care), coordination roles, and training other teachers. Working as a stock market analyst, while related to companies, is a finance career, not an ECCE career.

- 50.** Consider the characteristics of an ideal learning environment for a young child:

1. It is a safe and secure environment.
2. It has a variety of people and play materials.
3. It must have at least one caring adult present.
4. It is a highly competitive and formal setting.

Which of the characteristics given above are correct?

- (A) 1, 3 and 4
- (B) 2, 3 and 4
- (C) 1, 2 and 4
- (D) 1, 2 and 3

Ans :

- (D) 1, 2 and 3

The best learning environment for a young child is one that is safe, secure, and loving. It should contain a variety of people and play materials, and always have the presence of a caring adult. A competitive, formal setting is developmentally inappropriate.

- 51.** All of the following are reasons why institutional child care has become increasingly necessary EXCEPT:

- (A) Mothers working outside the home.
- (B) The decline of traditional joint family support systems.
- (C) The belief that institutional care is always superior to family care.
- (D) The need for substitute care provisions for the child.

Ans :

- (C) The belief that institutional care is always superior to family care.

The need for institutional care has risen due to mothers working externally and changes in family structures. It serves as a substitute provision. The text does not suggest it is inherently superior to family care, only that it can be beneficial and complementary.

- 52.** Which pair correctly links a term with its definition?

- (A) Toddler : A child who is ready for experiences beyond the family.
- (B) Crèche : An all-day program for preschoolers in a caregiver's absence.
- (C) ECCE : A program focused only on the physical care of young children.
- (D) Infancy : The period from birth to one year marked by high dependency.

Ans :

- (D) Infancy : The period from birth to one year marked by high dependency.

Infancy is correctly defined as the period from birth to one year, characterized by intense dependence on adults for everyday needs. The other pairs are mismatched with their definitions provided in the text.

- 53.** Which of the following pairs incorrectly matches the educational requirement with the career level in ECCE?

- (A) One-year Diploma : Entry-level role after schooling.
- (B) Undergraduate Degree : Foundation for a career in the field.
- (C) Doctoral Degree : Required for a caregiver role in a crèche.
- (D) Post-graduate Degree : Equips for research and senior roles.

Ans :

- (C) Doctoral Degree : Required for a caregiver role in a crèche.

A doctoral degree equips a professional for research and senior activities, not for an entry-level caregiver role. One-year diplomas are suitable for entry-level roles, and undergraduate/post-graduate degrees provide a foundation for advanced careers.

- 54.** Arrange the following developmental stages in the correct chronological order:

1. Toddler

- (B) Create an impromptu lesson around the snail, discussing its features and habitat.
- (C) Take the snail away to avoid distraction and maintain classroom discipline.
- (D) Ask the children to memorize the scientific name of the snail for a test.

Ans :

(B) Create an impromptu lesson around the snail, discussing its features and habitat.

An essential ECCE principle is to satisfy a child's curiosity and use their interests as a basis for learning. The best approach is to provide an optimal learning environment that allows exploration, making the experience meaningful and engaging for the children.

- 16.** Assertion (A): The vocabulary of a young child in their mother tongue grows rapidly during the early years.

Reason (R): Young children are curious and constantly ask adults questions about the world around them.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

A young child's vocabulary expands rapidly because their growing curiosity compels them to ask questions like "Why is this so?" This constant questioning and interaction with adults and the environment directly fuels their language development and understanding of the world.

- 17.** Why is training considered even more critical for ECCE professionals than for parents?
- (A) Because parents are naturally skilled at child-rearing without any knowledge.
 - (B) Because professionals are responsible for children other than their own and to society.
 - (C) Because ECCE professionals are paid, whereas parenting is an unpaid role.
 - (D) Because children behave better with trained professionals than with their own parents.

Ans :

(B) Because professionals are responsible for children other than their own and to society.

While parents benefit from knowledge of child development, training is more critical for ECCE professionals because they are formally responsible for other people's children. Their work involves accountability to the children, their families, their institution, and the wider society.

- 18.** Which of the following statements accurately describes the focus of a preschool teacher's role?

- (A) Primarily supervising physical care like feeding and toilet training.
- (B) Strictly enforcing discipline and a rigid daily schedule.
- (C) Providing stimulating opportunities for creative expression and exploration.
- (D) Teaching advanced academic subjects to prepare for competitive exams.

Ans :

(C) Providing stimulating opportunities for creative expression and exploration.

The role of a preschool teacher shifts from intensive physical care to focusing more on providing interesting and stimulating opportunities for children to learn. The emphasis is on enhancing creative expression and exploration through various experiences.

- 19.** Which psychologist emphasized the great need children have for a concerned, caring, and knowledgeable adult to guide their learning?

- (A) Jean Piaget
- (B) Maria Montessori
- (C) Erik Erikson
- (D) Lev Vygotsky

Ans :

(D) Lev Vygotsky

Lev Vygotsky, a psychologist and educator, highlighted the crucial role that a concerned, caring, and knowledgeable adult plays in a child's development and learning process.

- 20.** Why is it important for a preschool teacher to have a large repertoire of activities and be flexible?

- (A) Because preschool regulations require a minimum number of activities per day.
- (B) Because young children have short attention spans and plans often need to change.
- (C) Because parents expect to see a different activity every single day of the year.
- (D) Because a large number of activities looks impressive on a school's brochure.

Ans :

Holistic development, a key objective of ECCE, refers to the all-round development of a child. This encompasses all domains, including physical, language, social-emotional, and cognitive learning experiences.

- 60.** In addition to governmental organizations, which other type of organization hires professionals for planning and promoting services for young children?

(A) Stock exchanges
(B) Manufacturing corporations
(C) Non-governmental organisations (NGOs)
(D) Professional sports leagues

Ans :

(C) Non-governmental organisations (NGOs)
The text mentions that several governmental and non-governmental organizations (NGOs) hire professionals to plan and promote campaigns or services targeted at young children.

- 61.** The ability of a one-year-old child to know that their mother does not 'vanish' when she leaves the room demonstrates the development of what?
- (A) A sense of deep insecurity.
(B) A strong fear of abandonment.
(C) Advanced language abilities.
(D) A sense of object permanence and security.

Ans :

(D) A sense of object permanence and security.
The child's ability to understand that the mother continues to exist even when not visible is a sign of developing object permanence. This cognitive milestone leads to a greater sense of security regarding the primary caregiver's temporary absence.

- 62.** Which statement accurately describes the educational approach of Montessori schools?
- (A) They are based on the principles of education outlined by Lev Vygotsky.
(B) They are based on the principles of early childhood education by Maria Montessori.
(C) They are exclusively run by the government under the ICDS scheme.
(D) They focus on a highly structured, teacher-led, and formal curriculum.

Ans :

(B) They are based on the principles of early childhood education by Maria Montessori.
Montessori schools are specifically defined as institutions that are based on the educational

principles for early childhood that were outlined by the well-known educationist, Maria Montessori.

- 63.** Assertion (A): The curriculum for early childhood education must be flexible and pluralistic.
Reason (R): Young children have diverse learning styles, short attention spans, and come from various cultural backgrounds.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The NCF (2005) advocates for flexibility and plurality in ECCE. This is necessary because teachers must be adaptive to children's short attention spans, individual differences, and diverse cultural contexts to be effective.

- 64.** An ECCE center is located in a tribal area. To be culturally sensitive, which activity should the teacher prioritize?
- (A) Teaching children rhymes and stories exclusively from Western cultures.
(B) Using imported plastic toys that are unfamiliar to the children.
(C) Incorporating local folk tales, art forms, and materials into the curriculum.
(D) Insisting that children speak only in English, ignoring their native language.

Ans :

(C) Incorporating local folk tales, art forms, and materials into the curriculum.

A guiding principle of ECCE is to use local materials, arts, and knowledge. The teacher should be aware of the community and culture to make activities contextual and meaningful, linking with the child's home environment rather than opposing it.

- 65.** What is the main difference between a 'crèche' and a 'preschool'?
- (A) A crèche is for profit, while a preschool is always non-profit.
(B) A crèche focuses on care for infants, while a preschool focuses on education for 3-6 year olds.
(C) A crèche is only found in rural areas, while

- 98.** Which pair incorrectly links the organization/program with its primary function?
- (A) ICDS : Government program operating through anganwadis.
- (B) Montessori School : Based on principles of Maria Montessori.
- (C) Nursery Teacher Training : Provides training for the ECCE field.
- (D) Crèche : A formal school for advanced academic learning.

Ans :

(D) Crèche : A formal school for advanced academic learning.

A crèche is an institutional setting for the care of infants and young children, not a formal school for advanced academics. The other pairs are correctly matched based on the text.

- 99.** The NCF (2005) Position Paper on ECCE lists “Preparation for school” as one of its basic objectives. What does this primarily involve?
- (A) Ensuring children can pass the entrance exam for Grade 1.
- (B) Helping children adapt to a learning environment with peers.
- (C) Teaching children the entire curriculum of the next grade.
- (D) Focusing on competitive sports to build resilience.

Ans :

(B) Helping children adapt to a learning environment with peers.

“Preparation for school” involves helping the young child get ready for formal schooling by enhancing their exposure to other adults, environments, and materials in a gentle, informal way. It is more about social and environmental adaptation than academic cramming.

- 100.** Why is an understanding of child development theories from psychologists like Piaget and Vygotsky important for an ECCE teacher?
- (A) To understand children’s unique ways of thinking and guide their learning.
- (B) To pass the mandatory psychology exam for teacher certification.
- (C) To impress parents with complex terminology during meetings.
- (D) To write research papers for academic journals.

Ans :

(A) To understand children’s unique ways of thinking and guide their learning.

Understanding theories from Piaget helps teachers recognize children’s unique ways of thinking, while Vygotsky’s work highlights how a knowledgeable adult can provide an optimal environment for learning. This knowledge is crucial for effective teaching.

- 101.** Match the developmental phenomenon in Column A with its typical age of emergence in Column B.

	Column A		Column B
1.	Fear of unknown people	a.	Around one year
2.	Clinging to the primary caregiver	b.	3-8 years
3.	Readiness for preschool	c.	2-3 years
4.	Jumpy walk of a ‘toddler’	d.	8-12 months

(A) 1-b, 2-c, 3-a, 4-d

(B) 1-d, 2-a, 3-b, 4-c

(C) 1-c, 2-d, 3-b, 4-a

(D) 1-a, 2-b, 3-c, 4-d

Ans :

(B) 1-d, 2-a, 3-b, 4-c

Fear of unknown people emerges around 8-12 months. Clinging to a caregiver is typical around one year. Readiness for preschool is associated with the 3-8 year stage. The ‘toddler’ stage with its jumpy walk is around 2-3 years.

- 102.** A person is planning to become an ECCE entrepreneur and open a preschool. Which of the following aspects must they consider?

- Expertise in organization and management.
- Training as a child care worker and educator.
- Knowledge of the community and culture.
- A mandatory doctoral degree in business.

Which of the statements given above are correct?

(A) 1, 2 and 3

(B) 2, 3 and 4

(C) 1, 3 and 4

(D) 1, 2 and 4

Ans :

(A) 1, 2 and 3

An entrepreneur in this field needs expertise in organization and management, training as an educator, and awareness of the local culture to make the program relevant. A doctoral degree

- 71.** What type of training course, besides diplomas, offers specific training in the ECCE field?
- (A) Nursery Teacher Training
 - (B) Advanced Management Training
 - (C) Software Development Training
 - (D) Financial Analyst Training

Ans :

- (A) Nursery Teacher Training

Nursery Teacher Training (NTT) is mentioned as another specific course that offers training for a career in the field of early childhood care and education.

- 72.** A group of children in a preschool are given a set of identical blocks and told to build the exact same tower as the teacher. This activity lacks emphasis on which key aspect of ECCE?
- (A) Discipline and order
 - (B) Following instructions
 - (C) Creative expression
 - (D) Mathematical skills

Ans :

- (C) Creative expression

The focus of ECCE should be on enhancing creative expression and exploration. An activity that requires exact replication discourages creativity and does not allow children to explore their own ideas, which is a vital part of developmentally appropriate learning.

- 73.** The feeling of wonder that parents express when their child eats independently at preschool for the first time highlights what benefit of the ECCE environment?
- (A) The nutritional superiority of preschool meals.
 - (B) The effectiveness of peer learning and observation.
 - (C) The result of strict disciplinary measures at school.
 - (D) The advanced motor skills taught in preschools.

Ans :

- (B) The effectiveness of peer learning and observation.

This observation is a prime example of how children learn very quickly among peers. Seeing other children perform a task like eating independently motivates a child to do the same, often to the surprise of their parents.

- 74.** In the context of ECCE, what does “primacy of experience rather than expertise” mean?
- (A) Emphasizing hands-on, experiential learning for the child.
 - (B) Prioritizing the teacher’s expertise over the child’s activities.
 - (C) Focusing on theoretical knowledge rather than practical skills.
 - (D) Valuing expert opinion over direct observation of children.

Ans :

- (A) Emphasizing hands-on, experiential learning for the child.

This NCF (2005) principle means that experiential learning is emphasized. The child’s own direct experiences and active engagement are considered more fundamental to their learning process than the passive reception of an expert’s knowledge.

- 75.** Which of the following is listed as a career option for an ECCE professional in the text?
- (A) A university professor of theoretical physics.
 - (B) An entrepreneur running educational picnics.
 - (C) A chef in a five-star hotel restaurant.
 - (D) A graphic designer for a fashion magazine.

Ans :

- (B) An entrepreneur running educational picnics. The text lists “Entrepreneur in child related activities: Camps, edu-picnics, activity clubs, preschool education centres” as a specific career path for those trained in ECCE.

- 76.** The rapid growth of a child’s vocabulary in their mother tongue during the early years is directly linked to their what?
- (A) Ability to read and write complex sentences.
 - (B) Innate understanding of grammatical rules.
 - (C) Formal instruction in language classes.
 - (D) Curiosity and interaction with the environment.

Ans :

- (D) Curiosity and interaction with the environment.

A child’s vocabulary in their mother tongue grows rapidly at this time because they are curious to learn. Their interaction with people and materials around them, including asking questions, is what drives this linguistic development.

- 77.** Which of the following is NOT an essential attribute for a person wanting to work with young children?

a monotone and seems uninterested in playing. Why might they be an unsuitable choice?

- (A) They are overqualified for the position.
- (B) They lack the mandatory skills of enthusiasm and interaction.
- (C) They would be better suited for an administrative role.
- (D) Their qualifications would intimidate the children.

Ans :

(B) They lack the mandatory skills of enthusiasm and interaction.

Skills of story-telling, music, and organizing playful activities are mandatory for working with children. A person who is unwilling to interact with children in several different, engaging ways would not be an effective early childhood specialist.

- 109.** The provision of institutional care for young children in remote areas helps achieve which broader societal goal?
- (A) Increasing the population density in remote areas.
 - (B) Promoting the education of older siblings, especially girls.
 - (C) Encouraging families to move to urban centers.
 - (D) Reducing the overall cost of education for the government.

Ans :

(B) Promoting the education of older siblings, especially girls.

When older children are responsible for caring for younger ones, they often miss school. Institutional care for young children releases the older child from this task, allowing them to attend school, which is a significant societal benefit.

- 110.** The NCF (2005) principle of “blend of textual and cultural sources” means that ECCE programs should:
- (A) Only use textbooks and ignore all cultural elements.
 - (B) Only use cultural stories and ignore all books.
 - (C) Integrate knowledge from books with local stories, arts, and traditions.
 - (D) Ensure that textual sources are from a different culture.

Ans :

(C) Integrate knowledge from books with local stories, arts, and traditions.

This principle advocates for a balanced approach where learning is not just from textbooks but is also rooted in the child’s own cultural context, using local arts, knowledge, and traditions to make education more relevant and meaningful.

- 111.** The training for teachers and helpers in crèches should specifically focus on the needs of which age group?
- (A) Adolescents
 - (B) Elderly individuals
 - (C) School-aged children
 - (D) Very young children

Ans :

(D) Very young children

The text states that teachers and helpers in crèches and day care programs need to be especially trained for the care of very young children, addressing their unique safety, feeding, and developmental needs.

- 112.** Which statement about the anganwadis under the ICDS is true?
- (A) They are private, high-fee institutions for urban elites.
 - (B) They are government-supported centers in urban and rural areas.
 - (C) They provide higher education degrees to young adults.
 - (D) They focus exclusively on providing mid-day meals to school children.

Ans :

(B) They are government-supported centers in urban and rural areas.

The Government of India has addressed the needs of the early childhood age group by offering preschool education through anganwadis that operate under the ICDS in both urban and rural areas.

- 113.** What does it mean for an ECCE professional to have a “good repertoire of skills in the arts”?
- (A) They should be proficient in activities like story-telling, dance, and music.
 - (B) They must be a professionally certified artist or musician.
 - (C) They need to have a degree in art history or critique.
 - (D) They should be able to sell children’s artwork for profit.

children shifts focus to providing interesting and stimulating opportunities for learning, exploration, and creative expression.

- 82.** Why is “experiential learning” considered a primary principle in ECCE?
- (A) It allows children to learn directly through hands-on activities and exploration.
 - (B) It reduces the need for trained teachers and expensive play materials.
 - (C) It ensures all children in a class learn the exact same thing at the same pace.
 - (D) It is the fastest method to teach children complex theoretical concepts.

Ans :

(A) It allows children to learn directly through hands-on activities and exploration.

Experiential learning is central to ECCE because children at this age learn best by doing. Engaging with people and materials directly allows them to gather information, satisfy their curiosity, and construct their own understanding of the world around them.

- 83.** What is the core idea behind a “child-centred” approach in ECCE?
- (A) Allowing children to do whatever they want without any adult guidance or rules.
 - (B) Focusing the curriculum and activities on the individual needs and interests of the child.
 - (C) Centering all activities around one specific child who is chosen as the leader.
 - (D) Ensuring that the physical center of the classroom is designed for the child.

Ans :

(B) Focusing the curriculum and activities on the individual needs and interests of the child.

A child-centered approach means that the program is designed to be enjoyable and suited to the developmental stage of young children. It respects their pace, interests, and need for play-based, informal learning rather than a rigid, teacher-imposed curriculum.

- 84.** Besides child care, what other support services are often integrated into ECCE programs like the anganwadis?
- (A) Financial planning and investment advice for parents.
 - (B) Advanced vocational training for older siblings.
 - (C) Legal aid services for the local community.

(D) Interventions in nutrition and health for children and mothers.

Ans :

(D) Interventions in nutrition and health for children and mothers.

ECCE services often provide interventions in nutrition and health, in addition to learning experiences. The ICDS program, through anganwadis, specifically offers a package of services including supplementary feeding, growth monitoring, immunisation, and health education to mothers.

- 85.** How does a preschool experience contribute to a child’s preparation for formal schooling?
- (A) By helping them get accustomed to a learning environment outside the home.
 - (B) By teaching the entire Grade 1 syllabus in advance.
 - (C) By making them proficient in multiple foreign languages.
 - (D) By eliminating the need for parental involvement in education.

Ans :

(A) By helping them get accustomed to a learning environment outside the home.

A key objective of ECCE is preparation for school. A good preschool experience helps prepare the young child for formal schooling by enhancing their exposure to other adults, environments, and materials in a gentle, informal manner.

- 86.** Which statement accurately describes the role of play in early childhood?
- (A) Play is a frivolous activity that distracts from real learning.
 - (B) Play is the fundamental basis for a child’s learning and development.
 - (C) Play is only important for physical development, not cognitive growth.
 - (D) Play should be strictly structured and led by the teacher at all times.

Ans :

(B) Play is the fundamental basis for a child’s learning and development.

The NCF (2005) identifies play as the basis for learning. For young children, play is not separate from learning; it is the primary medium through which they explore, discover, solve problems, and make sense of their world.

- 87.** A nursery school teacher notices that a child is very quiet and does not interact with others. What skill is most needed by the teacher in this situation?
- (A) The skill of ignoring the child to promote independence.
 - (B) The skill of forcing the child into group activities.
 - (C) The capacity for understanding individual differences.
 - (D) The ability to follow a rigid lesson plan strictly.

Ans :

(C) The capacity for understanding individual differences.

An essential skill for an ECCE professional is the capacity for understanding individual differences. The teacher needs to recognize that children have different temperaments and require varied approaches to encourage their participation and ensure their comfort and well-being.

- 88.** The guiding principles of ECCE as per NCF (2005) include all of the following EXCEPT:
- (A) A mix of formal and informal interactions.
 - (B) Developmentally appropriate practices.
 - (C) Recognition of the special features of children's thinking.
 - (D) Standardized testing as the primary assessment tool.

Ans :

(D) Standardized testing as the primary assessment tool.

The ECCE principles emphasize play, experience, and developmentally appropriate practices. A reliance on standardized testing is characteristic of formal schooling for older children and is contrary to the informal, process-oriented approach of ECCE.

- 89.** What is the minimum educational qualification suggested for a career in ECCE if one wishes to have a foundational degree?
- (A) A one-year diploma in any subject.
 - (B) A high school certificate only.
 - (C) A certification in business management.
 - (D) An undergraduate degree in child/human development.

Ans :

(D) An undergraduate degree in child/human development.

For a career in this field, the text suggests it is essential to have studied children's development. An undergraduate degree in a subject that includes child/human development or child psychology as part of the course is a required qualification.

- 90.** Why is it important for an ECCE teacher to have skills in voice modulation?
- (A) To make story-telling and interactions more engaging.
 - (B) To sing professionally at school events.
 - (C) To command authority and discipline in the class.
 - (D) To meet the requirements of a government exam.

Ans :

(A) To make story-telling and interactions more engaging.

Skills like voice modulation are mandatory when working with children because they make activities, especially story-telling, more dynamic, interesting, and captivating for a young audience, thereby enhancing the learning experience.

- 91.** Assertion (A): An ECCE professional must be aware of the community and culture in which a child is growing up.
Reason (R): Preschool activities should be contextualized to the child's culture and regional environment to be meaningful.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 - (C) (A) is true but (R) is false.
 - (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

It is important for an ECCE professional to be aware of the community and culture so that the activities can be linked to the child's home environment. This makes the learning experience more relevant, familiar, and meaningful for the child.

- 92.** What is the term for a setting, often in a woman's home, where child care is provided for business purposes?
- (A) A public school
 - (B) An institutionalised centre
 - (C) An informal family care setting

(D) A government hospital

Ans :

(C) An informal family care setting

The text describes an informal family care setting as one where a woman in a neighborhood establishes a 'crèche' in her home for business, providing substitute care for children.

93. In what way are crèches and day care centers similar?

- (A) They are both exclusively for children over the age of six.
- (B) They both primarily provide substitute care in the absence of a primary caregiver.
- (C) They are both legally required to follow a formal academic curriculum.
- (D) They are both short, half-day programs focused only on play.

Ans :

(B) They both primarily provide substitute care in the absence of a primary caregiver.

Both crèches and day care centers are institutional arrangements that provide care for children, typically all day, when the primary caregiver at home is unavailable, for example, due to work.

94. Which of the following is a realistic expectation from an ECCE professional?

- (A) They should be enthusiastic about activities like exploration and nature.
- (B) They must ensure every child learns to read by age three.
- (C) They are responsible for diagnosing and treating children's medical conditions.
- (D) They must have a master's degree to work in any entry-level position.

Ans :

(A) They should be enthusiastic about activities like exploration and nature.

A key skill listed for an early childhood professional is having enthusiasm for activities like storytelling, exploration, and nature, which are central to a child's learning process at this age. The other options are unrealistic or incorrect.

95. An ECCE center prides itself on having a very rigid, quiet, and highly structured environment where children work on worksheets all day. This center is failing to recognize which special feature of children's thinking?

- (A) Their ability to memorize large amounts of information.

(B) Their need for active engagement and learning through play.

(C) Their preference for working alone rather than in groups.

(D) Their natural inclination towards formal academic tasks.

Ans :

(B) Their need for active engagement and learning through play.

The NCF (2005) emphasizes recognizing the special features of children's thinking, which includes their need for play and active engagement. A rigid, worksheet-based environment ignores this fundamental aspect of child development and how young children learn best.

96. The ability of an infant to develop a sense of security even when the primary caregiver is temporarily absent is contingent upon what?

- (A) The infant's ability to speak in full sentences.
- (B) The caregiver providing the infant with a new toy.
- (C) The development of the knowledge that the caregiver still exists.
- (D) The infant being distracted by another adult.

Ans :

(C) The development of the knowledge that the caregiver still exists.

The text explains that a child's crying when a mother leaves soon subsides because the child develops the ability to know that the mother does not 'vanish'. This cognitive understanding is key to their developing sense of security.

97. To pursue a career in ECCE, one can undertake all of the following educational paths EXCEPT:

- (A) A one-year diploma in early childhood education.
- (B) A bachelor's degree in Human Development.
- (C) A post-graduate degree in early childhood education.
- (D) A law degree specializing in corporate mergers.

Ans :

(D) A law degree specializing in corporate mergers.

Relevant educational paths for ECCE include diplomas and degrees in child/human development. A law degree in corporate mergers is an unrelated field and would not prepare someone for a career in early childhood education.

- (A) Being energetic and enthusiastic.
- (B) Having a capacity for understanding individual differences.
- (C) A deep interest in abstract philosophical debates.
- (D) A willingness to answer children's questions.

Ans :

(C) A deep interest in abstract philosophical debates.

Essential attributes for an ECCE professional include being energetic, understanding individual differences, and being willing to answer questions. An interest in abstract philosophy is not a required or relevant attribute for working directly with young children.

- 78.** Assertion (A): It is important for a preschool teacher to be skilled in arts like story-telling, dance, and music.

Reason (R): These skills are mandatory for creating engaging, playful, and interactive learning activities for young children.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The text explicitly states that skills in story-telling, dance, music, and organizing playful activities are "mandatory when working with children." These skills are crucial for making learning interactive and enjoyable for them.

- 79.** A person with a degree in Human Development is considering a career in ECCE. They are very organized and good with paperwork but shy around groups of children. What role might be a good fit for them?

- (A) A lead teacher in a large, active preschool class.
- (B) An entrepreneur starting a children's activity camp.
- (C) A coordinator or manager of an ECCE program.
- (D) A caregiver for infants requiring constant interaction.

Ans :

(C) A coordinator or manager of an ECCE program.

While direct interaction with children requires an open and playful personality, a role as a coordinator or manager would leverage their organizational and administrative skills. This allows them to contribute to the field without being in a direct, high-interaction teaching role.

- 80.** What is the underlying philosophy for providing institutional support and programs for children, youth, and the elderly?

- (A) That families are no longer capable of caring for their members at all.
- (B) That the government and society have a responsibility to ensure the well-being of all citizens.
- (C) That institutional care is more cost-effective than family-based care.
- (D) That these groups should be segregated from the rest of the community.

Ans :

(B) That the government and society have a responsibility to ensure the well-being of all citizens.

The text indicates that when families are unable to meet needs, it is the responsibility of the government and society to step in. The goal is to ensure all citizens, especially vulnerable groups, have opportunities for a decent life and holistic development.

- 81.** What is the main difference in focus between the care for an infant and the education for a preschool child?

- (A) Infant care is about physical safety, while preschool education is about social interaction.
- (B) Infant care emphasizes dependency, while preschool education emphasizes complete independence.
- (C) Infant care is provided by family, while preschool education is provided only by the state.
- (D) Infant care is largely custodial, while preschool education is focused on stimulation and learning.

Ans :

(D) Infant care is largely custodial, while preschool education is focused on stimulation and learning. While both involve care, infant care is primarily custodial, meeting basic needs of feeding, safety, and cleaning. Preschool education for older

is not a mandatory requirement for setting up a preschool.

- 103.** Which of the following is a key reason for the increasing need for institutional child care in recent times?
- (A) A government mandate requiring all children to attend a crèche.
 - (B) A decline in the number of children being born in the country.
 - (C) The changing structure of families and more mothers working outside the home.
 - (D) The belief that children learn better from teachers than from parents.

Ans :

(C) The changing structure of families and more mothers working outside the home.
The text highlights that in recent times, there has been an increasing need for institutional child care. This is linked to situations where mothers are working outside the home and the decline of traditional support systems like joint families.

- 104.** How does providing institutional care for young children support women?
- (A) It exempts women from all child-rearing responsibilities.
 - (B) It allows working mothers a substitute provision for the care of their child.
 - (C) It provides women with high-paying jobs as caregivers.
 - (D) It offers financial assistance to all mothers regardless of their employment status.

Ans :

(B) It allows working mothers a substitute provision for the care of their child.
One of the basic objectives of ECCE is to provide support services for women. For mothers working outside the home, institutional care like crèches and day care centers provides a necessary substitute arrangement for their child's care.

- 105.** Which skill set is needed by teachers and helpers in crèches and day care programs dealing with very young children?
- (A) Skills in teaching advanced mathematics and science.
 - (B) Expertise in managing children's safety, feeding, and emotional needs.
 - (C) The ability to conduct formal examinations and grading.
 - (D) Knowledge of university admission procedures.

Ans :

(B) Expertise in managing children's safety, feeding, and emotional needs.
Teachers and helpers in programs for very young children need to be specially trained for their care, including their safety, feeding, toilet habits, language development, and their social and emotional needs.

- 106.** Assertion (A): The tasks given to a child in a preschool should be neither too easy nor too difficult.

Reason (R): An optimal learning environment is one where a child's interest and motivation are maintained.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The text explicitly states that tasks should be neither too easy nor too difficult; otherwise, a child will lose interest and/or motivation. This directly supports the idea that an optimal environment is one that sustains a child's engagement.

- 107.** How is an ECCE program different from formal primary schooling?

- (A) ECCE uses a child-centered, informal approach, while formal schooling is structured.
- (B) ECCE is exclusively for children with special needs, while formal schooling is for all.
- (C) ECCE focuses only on physical health, while formal schooling focuses on academics.
- (D) ECCE teachers do not require training, unlike teachers in formal schools.

Ans :

(A) ECCE uses a child-centered, informal approach, while formal schooling is structured.
ECCE is characterized by a child-centered, informal approach that uses play and exploration as the basis for learning. This contrasts with the more structured, curriculum-driven nature of formal schooling for older children.

- 108.** A candidate for a preschool teacher position has excellent academic qualifications but speaks in

preschools are only in urban areas.

- (D) A crèche requires certified teachers, while a preschool does not have any requirements.

Ans :

(B) A crèche focuses on care for infants, while a preschool focuses on education for 3-6 year olds. A crèche is particularly designed for the care of infants and young children. A preschool is for children (typically 3+) who are ready for an educational environment beyond the family, preparing them for formal schooling.

- 66.** A professional early childhood educator should be knowledgeable about all of the following EXCEPT:
- (A) The needs and capabilities of young children.
(B) The cultural context of the community they serve.
(C) Skills for planning creative and interesting activities.
(D) Advanced macroeconomic theories and principles.

Ans :

(D) Advanced macroeconomic theories and principles.

An ECCE professional needs knowledge about children's needs, cultural context, and activity planning. While a basic understanding of economics might be useful for management, advanced macroeconomic theory is not a required area of expertise for this role.

- 67.** What is the age range for early childhood that is commonly divided into two stages for developmental analysis?
- (A) Birth to 3 years and 3-5 years
(B) Birth to 2 years and 2-6 years
(C) Birth to 3 years and 3-8 years
(D) Birth to 1 year and 1-7 years

Ans :

(C) Birth to 3 years and 3-8 years

The phase of early childhood, defined as birth to 8 years, is commonly divided into two stages: from birth to three years, and from three to eight years, based on the distinct developmental changes in each stage.

- 68.** What is meant by "extra-familial" environment in the context of a preschool child?
- (A) An environment that is outside of or beyond the immediate family.
(B) An environment that is hostile to family

values.

- (C) An environment exclusively for extended family members.
(D) An environment that is located far away from the child's home.

Ans :

(A) An environment that is outside of or beyond the immediate family.

A preschool child is so-called because they are ready for experiences in an environment beyond that of the family, which is referred to as an "extra-familial" environment. It signifies a move into a wider social setting.

- 69.** How does a preschool experience enhance a child's natural learning process?
- (A) By replacing natural learning with a structured academic curriculum.
(B) By isolating the child from their peers to focus on individual tasks.
(C) By teaching that learning can only happen inside a classroom.
(D) By providing exposure to other adults, environments, and materials.

Ans :

(D) By providing exposure to other adults, environments, and materials.

While children learn naturally, preschool experiences enhance this process. They do so by expanding the child's world through exposure to other adults, different environments, and new materials, complementing what is learned at home.

- 70.** Why are the "early years" considered extremely important for a child to explore the environment?
- (A) Because children have no interest in their environment after this period.
(B) Because children learn to walk, run, manipulate things, and speak during this time.
(C) Because the environment during these years is guaranteed to be completely safe.
(D) Because formal schooling begins, restricting all forms of environmental exploration.

Ans :

(B) Because children learn to walk, run, manipulate things, and speak during this time.

The early years are crucial for exploration because the development of motor skills (walking, running) and language enables children to actively engage with and discover the world around them.

Ans :

(A) They should be proficient in activities like story-telling, dance, and music.

Having a good repertoire of skills in the arts means the professional is equipped with the ability to tell stories, use dance and music, modulate their voice, and organize playful activities, all of which are mandatory for effectively engaging young children.

- 114.** A preschool teacher prepares a detailed lesson plan for the day but has to quickly change it because the children are captivated by a passing butterfly. This teacher demonstrates which essential skill?
- (A) Inability to control the classroom.
 - (B) Poor planning and preparation.
 - (C) Lack of knowledge about butterflies.
 - (D) Adaptability and flexibility.

Ans :

(D) Adaptability and flexibility.

A preschool teacher often has to quickly change their lesson plan and strategies to deal with the needs and short attention spans of young children. Being adaptive and flexible is essential to being an effective teacher in this dynamic environment.

- 115.** Opportunities for an ECCE professional include all of the following EXCEPT:
- (A) Being a caregiver in a crèche.
 - (B) Being a teacher in a nursery school.
 - (C) Being a financial auditor for a bank.
 - (D) Being a coordinator for a children's program.

Ans :

(C) Being a financial auditor for a bank.

Careers in ECCE are centered around working with children and managing related programs. A financial auditor's role is in a completely different professional field and does not align with the skills and training of an ECCE specialist.

- 116.** How does the NCF (2005) view of ECCE differ from a purely academic approach?
- (A) The NCF focuses on rote memorization, while academics focus on play.
 - (B) The NCF views ECCE holistically, including health and well-being, not just academics.
 - (C) The NCF is only for rural children, while the academic approach is for urban children.
 - (D) The NCF completely discards the need for any kind of learning.

Ans :

(B) The NCF views ECCE holistically, including health and well-being, not just academics.

The NCF (2005) guiding principles for ECCE are holistic, encompassing play, art, experience, and importantly, "Health, well-being and healthy habits". This is broader than a purely academic approach that might neglect these other crucial developmental areas.

- 117.** A "developmentally appropriate" task for a 4-year-old would be one that:
- (A) Requires them to sit still and listen for an hour.
 - (B) Involves writing a long essay on a complex topic.
 - (C) Allows for hands-on exploration of colors and shapes.
 - (D) Is designed for an 8-year-old to provide a challenge.

Ans :

(C) Allows for hands-on exploration of colors and shapes.

Developmentally appropriate practices involve providing activities suited to the child's age and capabilities. For a 4-year-old, hands-on exploration is engaging and suitable, whereas long periods of sitting or complex writing tasks are inappropriate.

- 118.** Which of the following is NOT a location where substitute child care arrangements might take place?
- (A) The child's own home with a hired helper.
 - (B) The home of the caregiver.
 - (C) An institutional crèche.
 - (D) The child's formal primary school.

Ans :

(D) The child's formal primary school.

The text lists the child's own home, the caregiver's home, or an institution/crèche as locations for substitute care. Formal primary school is an educational stage that follows early childhood care and is not a substitute care arrangement.

- 119.** The growing need for institutional child care is a reflection of what broader societal change?
- (A) A shift in economic and social structures, including family composition.
 - (B) A decrease in the value placed on family life.
 - (C) A government policy to nationalize all child-rearing.
 - (D) A general decline in children's ability to learn

at home.

Ans :

(A) A shift in economic and social structures, including family composition.

The increasing need for institutional child care is a symptom of broader societal shifts, such as the rise of nuclear families, the decline of the joint family system, and more women entering the workforce, all of which alter traditional child care patterns.

- 120.** A person wants to start a day care center. They have a deep interest in children but no formal training. What would be the most crucial first step for them?

- (A) Renting a large and expensive building.
- (B) Acquiring formal training through a diploma or relevant course.
- (C) Designing a fancy logo and marketing campaign.
- (D) Buying a large number of expensive, imported toys.

Ans :

(B) Acquiring formal training through a diploma or relevant course.

The text repeatedly emphasizes that any adult working with children, especially professionally, must be carefully and well-trained. Before starting an enterprise, acquiring the necessary scientific knowledge and training is the most critical foundational step.

- 121.** Match the action in Column A with the ECCE skill it demonstrates in Column B.

	Column A		Column B
1.	Creating a puppet show for children.	a.	Understanding individual differences.
2.	Comforting a child who is missing their parent.	b.	Administrative and management skills.
3.	Keeping a daily attendance and fee record.	c.	Skills for creative and interesting activities.
4.	Giving a shy child extra time to join an activity.	d.	Capacity for interacting with children (emotional support).

- (A) 1-c, 2-d, 3-b, 4-a
- (B) 1-d, 2-c, 3-a, 4-b

- (C) 1-b, 2-a, 3-d, 4-c
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-c, 2-d, 3-b, 4-a

Creating a puppet show demonstrates creativity. Comforting a child shows emotional interaction skills. Keeping records requires administrative skills. Giving a shy child time shows an understanding of individual differences.

- 122.** Consider the following statements about the role of a caregiver for infants in a crèche:

1. They are primarily responsible for the child's physical safety and feeding.
2. They need to be trained to support the child's social and emotional needs.
3. Their main focus is to teach the infant formal reading and writing skills.

Which of the skills listed above are essential for an infant caregiver?

- (A) 1 and 3 only
- (B) 2 and 3 only
- (C) 1 and 2 only
- (D) 1, 2, and 3

Ans :

(C) 1 and 2 only

A caregiver for infants must be trained in safety, feeding, and toilet habits, as well as language development and social and emotional needs. Formal academic instruction like reading and writing is developmentally inappropriate for infants.

- 123.** Which of the following is NOT a valid reason why an ECCE professional needs to be well-trained?

- (A) They are responsible for children other than their own.
- (B) They receive formal recognition and payment for their work.
- (C) They are accountable to the children's families and the institution.
- (D) Their personal opinions about child-rearing are sufficient for the job.

Ans :

(D) Their personal opinions about child-rearing are sufficient for the job.

An ECCE professional's work requires a scientific understanding of development. Relying solely on personal opinions is insufficient given their responsibility to children, families, and the wider society.

- 124.** The principle of using “local materials, arts and knowledge” in ECCE directly supports which broader concept?
- (A) Globalization of education
 - (B) Cultural context and relevance
 - (C) Standardization of curriculum
 - (D) Commercialization of art

Ans :

- (B) Cultural context and relevance

Using local materials and arts ensures that the ECCE program is connected to the child’s own cultural context and home environment. This makes the learning more meaningful and respects the child’s background.

- 125.** What is the term used by Lev Vygotsky to describe the role of a caring and knowledgeable adult in a child’s learning?
- (A) A disciplinarian
 - (B) A passive observer
 - (C) A guide or facilitator
 - (D) A formal instructor

Ans :

- (C) A guide or facilitator

Vygotsky’s theory outlines the great need children have for a concerned, caring, and knowledgeable adult who can provide an optimal environment for learning. This role is best described as a guide or facilitator, helping the child move forward.

- 126.** Which of the following best defines “substitute care” in the context of early childhood?
- (A) Care provided to substitute one child’s learning style with another.
 - (B) Care provided by someone other than the primary caregiver, such as in a crèche.
 - (C) A temporary form of care that is considered inferior to home care.
 - (D) A government program that substitutes education with vocational training.

Ans :

- (B) Care provided by someone other than the primary caregiver, such as in a crèche.

The text describes the need for “substitute provisions” when the mother is working, which can be informal family care or an institutional center like a crèche. It is care that stands in for the primary caregiver.

- 127.** How does the learning environment in a good preschool contrast with a formal school meant for older children?

- (A) The preschool is informal, loving, and has a variety of play materials.
- (B) The preschool is unsafe and insecure, unlike a formal school.
- (B) The preschool focuses on individual, competitive learning.
- (D) The preschool has a rigid curriculum based on memorization.

Ans :

- (A) The preschool is informal, loving, and has a variety of play materials.

A good preschool environment is described as safe, secure, loving, with a variety of people and play materials. This contrasts sharply with a formal school for older children, which might be more structured and less play-oriented.

- 128.** An ECCE professional is leading an activity where children are making collages using leaves, twigs, and pebbles they collected. This activity best exemplifies which two ECCE principles?
- (A) Use of local materials and art as a basis for education.
 - (B) A mix of formal interaction and textual sources.
 - (C) Primacy of expertise and developmentally inappropriate practice.
 - (D) Emphasis on competition and standardized outcomes.

Ans :

- (A) Use of local materials and art as a basis for education.

This activity directly applies the NCF (2005) principles of using “local materials” (leaves, twigs) and using “art as the basis of education” (making a collage) for a hands-on, creative learning experience.

- 129.** An ECCE professional’s responsibilities extend to all of the following groups EXCEPT:

- (A) The children under their supervision.
- (B) The family members of the children.
- (C) The institution they work for.
- (D) The local municipal corporation’s financial planning committee.

Ans :

- (D) The local municipal corporation’s financial planning committee.

An ECCE professional is responsible to the children, their families, and the institution they work for, as well as the larger society. Their

Ans :

(D) A highly formal and rigid atmosphere.

A good learning environment for a young child should be safe, secure, and loving, with play materials and caring adults. A formal and rigid atmosphere is counterproductive to their developmental needs and can cause anxiety.

- 152.** Assertion (A): An ECCE professional must be physically energetic.

Reason (R): Working with young children often involves considerable physical activity for long periods.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The text lists being “energetic and prepared for physical activity for considerably long periods of time” as a necessary skill. This is because engaging with children in their high-energy play requires physical stamina from the professional.

- 153.** If a preschool teacher strictly follows their pre-written lesson plan even when children show no interest, they are prioritizing what over the children’s needs?

- (A) The children’s creative expression.
(B) The principle of flexibility.
(C) Their own plan of action.
(D) The children’s curiosity.

Ans :

(C) Their own plan of action.

The text warns that a teacher should be flexible rather than “focussed on completing one’s own plan of action”. Prioritizing a pre-written plan over the children’s immediate interests and needs is ineffective.

- 154.** The role of ECCE in providing support services for women and children highlights its function as a:

- (A) Purely academic institution.
(B) Commercial business venture.
(C) Political advocacy group.
(D) Social support system.

Ans :

(D) Social support system.

By providing substitute care for working mothers and interventions in health and nutrition, ECCE programs function as a crucial social support system for both women and children, contributing to the well-being of the family and community.

- 155.** Besides an undergraduate degree, which qualification can provide training for the ECCE field?

- (A) A degree in civil engineering.
(B) A certificate in culinary arts.
(C) A Nursery Teacher Training course.
(D) A license in commercial piloting.

Ans :

(C) A Nursery Teacher Training course.

The text explicitly mentions “Nursery Teacher Training” as another course that offers specific training for a career in the ECCE field.

- 156.** What is the primary difference between an informal family care setting and an institutionalized center?

- (A) Informal care is for-profit, while institutional care is always non-profit.
(B) Informal care is typically home-based, while institutional care is in a separate facility.
(C) Informal care requires certified teachers, while institutional care does not.
(D) Informal care is for older children, while institutional care is for infants.

Ans :

(B) Informal care is typically home-based, while institutional care is in a separate facility.

An informal family care setting is described as a woman setting up a crèche in her home. This contrasts with an institutionalized center, which implies a more formal, separate establishment designed for child care.

- 157.** The ability to appreciate individual differences among children helps an ECCE professional to:

- (A) Avoid competitive comparisons between children.
(B) Treat all children in the exact same way.
(C) Ensure all children meet developmental milestones at the same time.
(D) Create a highly competitive and stressful environment.

Ans :

(A) Avoid competitive comparisons between children.

- (D) Because parents do not value teachers with high academic qualifications.

Ans :

(C) Because working with children is an active, interactive, and dynamic process.

ECCE is not a passive, theoretical job. It requires deep engagement and a willingness to interact with children in many different ways through play, art, and music. Theoretical knowledge alone cannot substitute for these mandatory interactive skills.

136. The NCF (2005) principle of “flexibility and plurality” in ECCE refers to:

- (A) The need for a rigid, one-size-fits-all curriculum.
- (B) The importance of adapting to individual children and diverse contexts.
- (C) The use of multiple textbooks for every single subject.
- (D) The requirement for teachers to be fluent in multiple languages.

Ans :

(B) The importance of adapting to individual children and diverse contexts.

“Flexibility and plurality” means the program should be adaptable to the different needs and learning styles of children and should respect the plurality of cultures and contexts from which they come.

137. An ECCE professional’s role as a coordinator of a program would primarily involve:

- (A) Managing and overseeing the activities of the program.
- (B) Directly teaching a class of young children all day.
- (C) Conducting advanced psychological research.
- (D) Providing one-on-one counseling to parents.

Ans :

(A) Managing and overseeing the activities of the program.

The role of a coordinator is a managerial one, involving the supervision and organization of a program run by someone else, rather than direct teaching or research.

138. A parent insists that their 3-year-old child should only focus on learning the alphabet and numbers in preschool, and that play is a waste of time. This parent’s view is in conflict with which core ECCE concept?

(A) The importance of a clean and hygienic environment.

(B) The understanding that play is the basis of a child’s learning.

(C) The need for regular health check-ups for children.

(D) The role of the teacher as a caring adult figure.

Ans :

(B) The understanding that play is the basis of a child’s learning.

The parent’s view directly conflicts with the fundamental ECCE principle, as stated by the NCF (2005), that play is the basis for learning. A good preschool program integrates learning into play rather than seeing them as separate, conflicting activities.

139. What is the ultimate goal of providing a supportive and stimulating environment for a young child?

- (A) To ensure the child becomes a famous artist or scientist.
- (B) To accelerate their development far beyond their peers.
- (C) To enable the child to realize their full potential.
- (D) To make the child completely independent of adult help.

Ans :

(C) To enable the child to realize their full potential.

A basic objective of ECCE is the holistic development of the child to enable them to realize their potential. The goal is not to force a specific outcome but to provide the conditions for optimal, all-round growth.

140. Which statement accurately reflects the availability of career-oriented courses in ECCE?

- (A) Courses are only available at the doctoral level in foreign universities.
- (B) Only full-time undergraduate degree programs are available.
- (C) There are no formal training courses available for this field in India.
- (D) A variety of options exist, including diplomas and Open University courses.

Ans :

(D) A variety of options exist, including diplomas and Open University courses.

The text mentions several options for training, including one-year diplomas, Open University educational courses, and Nursery Teacher Training, in addition to undergraduate and post-graduate degrees, indicating a variety of available paths.

- 141.** Match the entity in Column A with its primary role in ECCE in Column B.

	Column A		Column B
1.	ICDS	a.	Provides a framework of educational principles for ECCE.
2.	Jean Piaget	b.	A government program offering integrated services through anganwadis.
3.	NCF (2005)	c.	Theorist who explained children's unique ways of understanding.
4.	Maria Montessori	d.	Educationist whose principles are used in specific preschools.

- (A) 1-b, 2-c, 3-a, 4-d
 (B) 1-c, 2-a, 3-d, 4-b
 (C) 1-d, 2-b, 3-a, 4-c
 (D) 1-a, 2-d, 3-c, 4-b

Ans :

(A) 1-b, 2-c, 3-a, 4-d
 ICDS is a government program with anganwadis.
 Piaget explained children's unique thinking.
 NCF (2005) provides educational principles.
 Montessori's principles are used in specific schools.

- 142.** An effective ECCE curriculum should incorporate which of the following elements?

1. Developmentally appropriate practices.
2. A blend of textual and cultural sources.
3. A mix of formal and informal interactions.
4. A rigid focus on expertise over experience.

Which of the statements given above are correct?

- (A) 1, 2 and 4
 (B) 2, 3 and 4
 (C) 1, 2 and 3
 (D) 1, 3 and 4

Ans :

(C) 1, 2 and 3
 According to the NCF (2005) principles, an effective ECCE curriculum should be developmentally appropriate, blend textual and cultural sources, and have a mix of formal and informal interactions.

It should prioritize experience over expertise, not the other way around.

- 143.** Which of the following best describes the professional accountability of an ECCE teacher?
- (A) They are accountable only to the school principal for academic results.
 (B) They are accountable to the children, their families, and the institution.
 (C) They have no formal accountability as their work is considered informal.
 (D) They are accountable only for the financial profitability of the school.

Ans :

(B) They are accountable to the children, their families, and the institution.
 ECCE professionals have a broad accountability. They are responsible to the children, the families of those children, the institution they work for, and the larger society, making their role a highly professional one.

- 144.** Why does the text suggest that even parents would benefit from a scientific understanding of child development?

- (A) To help them win arguments with their children.
 (B) To enable them to teach their children advanced subjects.
 (C) To eliminate the need for sending their children to school.
 (D) To lead to realistic expectations and interactions with children.

Ans :

(D) To lead to realistic expectations and interactions with children.

The text states that all adults, including parents, will benefit from a scientific understanding of development. This knowledge leads to realistic expectations and better interactions with children, appreciating their individual differences.

- 145.** The term 'toddler' is derived from what characteristic of a child at that age?

- (A) Their tendency to talk constantly.
 (B) Their jumpy and unsteady walk.
 (C) Their habit of throwing objects.
 (D) Their ability to solve simple puzzles.

Ans :

(B) Their jumpy and unsteady walk.

The text specifies that the term ‘toddler’ for a child between two and three is derived from the “jumpy walk that a young child has at this age”.

- 146.** Assertion (A): The experiences provided by a good preschool can be extremely beneficial for young children.

Reason (R): The child-centered approach and play-way method make learning enjoyable and are ideally suited for young children.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The text states that good preschool experiences are found to be extremely beneficial. It then explains that this is because the child-centered approach and play-way method make learning enjoyable and are ideally suited for this age group.

- 147.** How does the need for child care in recent times differ from traditional arrangements?

- (A) Traditionally, there was no need for child care at all.
(B) Traditionally, care was often provided by family in joint households.
(C) In recent times, only institutional care is considered acceptable.
(D) Traditionally, only fathers were responsible for child care.

Ans :

(B) Traditionally, care was often provided by family in joint households.

Traditionally, the care of the child was usually the responsibility of another female member of the household, often within a joint family setting. In recent times, the decline of this structure has increased the need for institutional care.

- 148.** A person is setting up a day care center. Which of the following should be a top priority in their planning?

- (A) Ensuring the center has the latest video game consoles.
(B) Hiring teachers trained in high school-level curriculum.
(C) Designing a highly competitive ranking

system for the children.

- (D) Creating a safe, secure, and loving environment for children.

Ans :

- (D) Creating a safe, secure, and loving environment for children.

The text emphasizes that the best learning environment for a child at this age is one that is safe, secure, and loving, with the presence of a caring adult. This is a more fundamental priority than any other amenity or system.

- 149.** What is the significance of a young infant developing an attachment with their grandparents?

- (A) It indicates the child is developing social bonds with multiple family members.
(B) It shows that the parents are not providing adequate care.
(C) It is a sign of a developmental delay in recognizing the mother.
(D) It means the child will not need to attend a preschool later on.

Ans :

- (A) It indicates the child is developing social bonds with multiple family members.

The infant develops an attachment with family members, including the mother, father, siblings, and grandparents. Forming bonds with multiple caregivers is a normal and healthy part of social and emotional development.

- 150.** What is the term for the educational approach that emphasizes learning through hands-on activities and exploration?

- (A) Rote memorization
(B) Experiential learning
(C) Passive observation
(D) Theoretical instruction

Ans :

- (B) Experiential learning

The NCF (2005) principle of “primacy of experience rather than expertise” emphasizes experiential learning, where children learn through direct, hands-on activities.

- 151.** Which of the following is NOT a characteristic of a good learning environment for a young child?

- (A) A variety of play materials.
(B) The presence of a caring adult.
(C) A safe and secure physical space.
(D) A highly formal and rigid atmosphere.

Ans :

(D) It enhances the child's exposure to other adults, peers, and learning materials in a structured, enjoyable environment.

A good preschool experience helps to enhance a child's learning by providing exposure to new environments, materials, and people. It complements the learning at home and is particularly beneficial for social development through peer interaction.

162. The "child-centered approach" mentioned by Anjali's friend means the preschool program should be:

- (A) Rigidly structured around the teacher's lesson plan.
- (B) Focused on the unique needs, interests, and developmental stage of the child.
- (C) Designed to create intense academic competition among children.
- (D) Based entirely on activities chosen by the parents.

Ans :

(B) Focused on the unique needs, interests, and developmental stage of the child.

A child-centered approach, which is ideal for young children, tailors the learning environment and activities to the individual child's capabilities and interests. This makes learning meaningful and enjoyable, fostering a positive attitude towards education.

163. What is the main objective of Early Childhood Care and Education (ECCE) according to the NCF (2005)?

- (A) To ensure all children can read and write by the age of three.
- (B) To provide a substitute for home care so that all mothers can work.
- (C) To promote the holistic development of the child and prepare them for formal schooling.
- (D) To train children in specific vocational skills for future employment.

Ans :

(C) To promote the holistic development of the child and prepare them for formal schooling.

The basic objectives of ECCE are the holistic development of the child to enable them to realize their potential, and preparation for formal school. It also aims to provide support services for women and children.

164. The "play way method" is considered ideal for young children because:

- (A) Play is the natural basis for learning for young children, making it enjoyable and effective.
- (B) It is the fastest way to teach complex academic concepts.
- (C) It requires no supervision from adults or teachers.
- (D) It is a very quiet and disciplined method of instruction.

Ans :

(A) Play is the natural basis for learning for young children, making it enjoyable and effective. One of the guiding principles of ECCE is that play should be the basis for learning. For young children, play is not just for fun; it is the primary medium through which they explore, discover, and understand the world.

165. The period of life from birth to eight years of age is known as what?

- (A) Infancy
- (B) Toddlerhood
- (C) Adolescence
- (D) Early Childhood

Ans :

(D) Early Childhood

Early childhood is defined as the phase of life extending from birth up to eight years of age. This period is critical for development and is often subdivided based on the significant developmental changes that occur.

Direction : Read the following case study and answer the following questions.

A large IT company decides to set up an on-site crèche to support its employees who are new parents. The crèche is designed to care for infants and toddlers from six months to three years of age. The management understands that caring for this age group requires specialized skills and a very different approach than a nursery school. The space is designed with utmost attention to safety, with soft flooring and no sharp corners. The caregivers are trained specifically in infant care, including feeding, diapering, and ensuring emotional security. They know that infants are intensely dependent on adults and develop a deep attachment to their primary caregivers. Therefore, they maintain a low child-to-caregiver ratio to provide individual attention and create a secure

Appreciating individual differences helps adults, including professionals and parents, to realize that competitive comparisons between children are often pointless and counterproductive. It fosters a more supportive environment.

158. Which pair correctly links a theorist with their key contribution to ECCE?

- (A) Piaget : Emphasized the need for a knowledgeable adult guide.
- (B) Vygotsky : Explained children's unique ways of understanding the world.
- (C) NCF (2005) : Focused solely on physical development of children.
- (D) Montessori : Developed principles for specific ECCE schools.

Ans :

(D) Montessori : Developed principles for specific ECCE schools.

Maria Montessori was a well-known educationist who outlined principles of early childhood education upon which Montessori schools are based. The other pairs misattribute the contributions.

159. A crèche for infants has a schedule that is very rigid, with fixed times for every activity and no room for individual needs. This approach ignores which key aspect of infant care?

- (A) The need for a structured environment.
- (B) The importance of flexibility for individual rhythms.
- (C) The requirement for group activities.
- (D) The benefit of a predictable routine.

Ans :

(B) The importance of flexibility for individual rhythms.

While routines are helpful, infants have individual rhythms for sleeping, feeding, and attention. A highly rigid schedule ignores these individual needs and the flexibility required to provide responsive care to very young children.

160. Ultimately, a career in ECCE is suitable for those who are drawn towards what?

- (A) Earning a high salary with minimal effort.
- (B) Working with data and financial reports.
- (C) Understanding and nurturing children's development.
- (D) Achieving a position of power and authority.

Ans :

(C) Understanding and nurturing children's development.

The entire chapter emphasizes that a career in ECCE requires a deep interest in children, knowledge about their needs, and a motivation to interact with them and provide opportunities for their growth and development.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

Anjali, a young mother, is considering enrolling her three-year-old son, Rohan, in a nearby preschool. Rohan has been cared for exclusively at home within the family. Anjali believes he is learning naturally at home but has noticed he is shy around other children. A friend tells her that a good preschool provides a child-centered approach and uses the play-way method, which makes learning enjoyable and helps children develop social skills. The preschool she is considering emphasizes holistic development, providing a variety of materials and experiences that stimulate curiosity without overburdening the child. The program is designed to be informal, with a mix of activities that enhance language, creative expression, and social-emotional skills. Anjali is weighing the benefits of this structured learning environment, where Rohan can interact with peers and other caring adults, against her comfort in keeping him in the familiar home setting. Her decision is influenced by the understanding that these early years are extremely important for a child to learn new things and explore the world around them, and a preschool experience could complement his development at home.

161. What is the primary benefit of a good preschool experience for a child like Rohan?

- (A) It guarantees early entry into formal schooling before the required age.
- (B) It replaces the role of the family in the child's development.
- (C) It focuses solely on academic learning through rote memorization.
- (D) It enhances the child's exposure to other adults, peers, and learning materials in a structured, enjoyable environment.

professional responsibilities do not typically extend to the financial planning of the local government.

- 130.** The fact that a young child's fear of strangers shows a capacity to recognize familiar faces illustrates that:

- (A) Emotional and cognitive development are interconnected.
- (B) All emotional displays in children are signs of distress.
- (C) Cognitive development is complete by the age of one.
- (D) Emotional development is not important in early childhood.

Ans :

(A) Emotional and cognitive development are interconnected.

This example shows that what appears to be a purely emotional reaction (fear) is underpinned by a cognitive achievement (recognizing familiar faces). This highlights the interconnectedness of different developmental domains in early childhood.

- 131.** What is the primary medium through which children in a good preschool setting learn things that often surprise their parents?

- (A) Watching educational television shows.
- (B) Listening to long lectures from the teacher.
- (C) Interacting with and observing their peers.
- (D) Reading advanced academic textbooks.

Ans :

(C) Interacting with and observing their peers.

The text emphasizes that children learn very quickly among peers. The example of a child eating new foods at preschool highlights how peer interaction and observation lead to new learning and behaviors.

- 132.** Which of the following pairs correctly links a developmental capability with its importance in ECCE?

- (A) Learning to walk : Allows for active engagement with the environment.
- (B) Bladder control : A prerequisite for creative art activities.
- (C) Recognizing colors : The only sign of cognitive development.
- (D) Speaking fluently : Necessary before any social interaction can occur.

Ans :

(A) Learning to walk : Allows for active engagement with the environment.

The text states that once children learn to walk, run, and manipulate things, they become capable of actively engaging with the environment, which is crucial for their learning.

- 133.** Which pair incorrectly matches a career with its description in the ECCE field?

- (A) Entrepreneur : Sets up their own child care program.
- (B) Trainer : Teaches other aspiring ECCE professionals.
- (C) Researcher : Conducts studies by pursuing a doctoral degree.
- (D) Caregiver : Manages the financial investments of the institution.

Ans :

(D) Caregiver : Manages the financial investments of the institution.

A caregiver's role is to directly care for children's needs. Managing financial investments is an administrative or managerial function, not the primary role of a caregiver.

- 134.** Arrange the following steps for pursuing an advanced career in ECCE in a logical sequence.

1. Obtain a post-graduate degree or diploma.
2. Enroll in a doctoral degree program.
3. Complete an undergraduate degree in a relevant subject.

(A) 3, 1, 2

(B) 1, 3, 2

(C) 2, 3, 1

(D) 3, 2, 1

Ans :

(A) 3, 1, 2

The logical academic progression is to first get a foundational undergraduate degree, then pursue higher studies with a post-graduate degree or diploma, which then qualifies one to enroll in a doctoral program for research.

- 135.** Why is it insufficient for an ECCE professional to only have theoretical knowledge without practical interactive skills?

- (A) Because children cannot understand theoretical concepts at all.
- (B) Because practical skills are easier to acquire than theoretical knowledge.
- (C) Because working with children is an active, interactive, and dynamic process.

bond with each child. The program focuses on sensory exploration, language development through songs and talk, and safe physical movement. This institutional setting is designed to be a substitute care arrangement that provides a safe, loving, and stimulating environment for very young children while their parents are at work.

- 166.** What is an institutional setting specifically designed for the care of infants and young children, often in the absence of home care?
- (A) A formal school
 - (B) A high school
 - (C) A crèche
 - (D) A university

Ans :

- (C) A crèche

A crèche is the name given to an institutional setting that is particularly designed to provide care for infants and young children. It often serves as a substitute care arrangement when parents are at work.

- 167.** The primary focus of the caregivers in the crèche is on the infants' physical care and:
- (A) Preparation for competitive exams.
 - (B) Intense academic instruction.
 - (C) Vocational skill training.
 - (D) Social and emotional needs, and building a sense of security.

Ans :

- (D) Social and emotional needs, and building a sense of security.

For infants and toddlers, who are in a period of intense dependence, providing emotional security is paramount. Caregivers in a crèche must focus on meeting their needs for love and attachment to help them feel safe and secure.

- 168.** Why is a low child-to-caregiver ratio important in a crèche setting?
- (A) To provide individual attention and meet the intense dependency needs of infants.
 - (B) To reduce the company's expenditure on salaries.
 - (C) To allow caregivers to have more free time during the day.
 - (D) To create a more competitive environment for the children.

Ans :

- (A) To provide individual attention and meet the intense dependency needs of infants.

Infants are heavily dependent on adults for their everyday needs and for emotional security. A low child-to-caregiver ratio ensures that each child receives the individual attention and care required to build a secure attachment.

- 169.** The period from birth to one year, during which a child is largely dependent on adults for everyday needs, is known as:
- (A) Early childhood
 - (B) Preschool years
 - (C) Toddlerhood
 - (D) Infancy

Ans :

- (D) Infancy

Infancy is typically defined as the period between birth and one year of age. This stage is characterized by the child's intense dependence on adults, usually the primary caregivers, for all their basic needs.

- 170.** The need for institutional child care arrangements like crèches has increased in recent times primarily due to:
- (A) The belief that children should not be raised by their parents.
 - (B) The breakdown of traditional support systems like joint families and an increase in working mothers.
 - (C) A government mandate that all children must attend a crèche.
 - (D) A decline in the quality of care provided within homes.

Ans :

- (B) The breakdown of traditional support systems like joint families and an increase in working mothers.

In recent times, with changes in family structures and an increasing number of mothers working outside the home, the need for institutional child care like crèches and day care centers has grown significantly to provide substitute care.

Direction : Read the following case study and answer the following questions.

In a remote tribal village, many older girls were unable to attend school because they were responsible for taking care of their younger siblings while their parents went out to work in the fields. To address this, a non-governmental organization (NGO) helped the community set up an Anganwadi, which functions as a crèche and preschool for the younger

- 189.** To pursue higher studies and take on more senior roles like a trainer or researcher in ECCE, Meera could enroll in a:
- (A) Post-graduate diploma or degree in early childhood education.
 - (B) Degree in engineering or architecture.
 - (C) Certificate course in a foreign language.
 - (D) Diploma in computer application.

Ans :

- (A) A post-graduate diploma or degree in early childhood education.

For those wishing to pursue higher studies in the field, options like a post-graduate diploma or degree are available. These qualifications can lead to a doctoral degree and senior roles like research, training, and coordination.

- 190.** The scope of careers in ECCE is widespread. A person trained in this field can work as a:
- (A) Corporate lawyer or financial analyst.
 - (B) Teacher in a nursery school, caregiver in a crèche, or a program coordinator.
 - (C) Civil engineer or an urban planner.
 - (D) A pilot or a flight attendant.

Ans :

- (B) A teacher in a nursery school, caregiver in a crèche, or a program coordinator.

The scope of ECCE is very broad. A trained professional can work as a teacher or caregiver, coordinate programs for NGOs, become an entrepreneur, or work as a trainer for other teachers in the same subject.

Direction : Read the following case study and answer the following questions.

A well-known developmental psychologist, Jean Piaget, dedicated his life to understanding how children think. He proposed that young children have very different ways of understanding the world compared to adults. For example, a young child might believe that the moon follows them when they walk at night, or that a tall, narrow glass holds more water than a short, wide one, even if they see the same amount of water being poured. An ECCE teacher, who is trained in these principles, understands that these are not “silly mistakes” but reflect the special features of a child’s thinking at that particular developmental stage. Therefore, instead of simply correcting the child, she provides a supportive environment for them to explore such phenomena on their own. She

might give the child different shaped containers and water to pour and discover the concept of volume for themselves. This approach respects the child’s unique way of constructing knowledge and facilitates genuine understanding.

- 191.** The teacher’s approach is based on which important principle of ECCE?
- (A) Children’s thinking is flawed and must be corrected through direct instruction.
 - (B) The belief that all children think exactly like miniature adults.
 - (C) The idea that children’s understanding of the world does not change with age.
 - (D) Recognition of the special features of children’s thinking.

Ans :

- (D) Recognition of the special features of children’s thinking.

A guiding principle of ECCE is to recognize the special features of children’s thinking. Understanding that children have different ways of comprehending the world allows educators to create supportive environments for them to learn effectively.

- 192.** According to Jean Piaget’s work, why do young children need a supportive environment for learning?
- (A) Because they are incapable of learning anything on their own.
 - (B) To be protected from all forms of challenges and difficulties.
 - (C) To explore phenomena in their own ways and construct their own understanding.
 - (D) To learn to think exactly like adults as quickly as possible.

Ans :

- (C) To explore phenomena in their own ways and construct their own understanding.

Piaget’s research showed that young children are active learners who construct their understanding of the world. They need a supportive environment that allows them to explore phenomena in their own way to facilitate this process.

- 193.** Providing the child with different containers and water to experiment with is an example of:
- (A) Experiential learning.
 - (B) A formal written examination.
 - (C) Rote memorization.
 - (D) A lecture-based lesson.

care and benefits the community by helping build a healthy and developed next generation.

Direction : Read the following case study and answer the following questions.

Ms. Sharma is undergoing a Nursery Teacher Training (NTT) diploma course to prepare for a career in early childhood education. The course curriculum emphasizes that an ECCE professional needs a wide range of skills beyond just being fond of children. She learns about the developmental needs and capabilities of young children and how to plan activities that are “developmentally appropriate.” The training includes sessions on how to be an effective storyteller, using voice modulation and puppets to capture children’s attention. She practices organizing a variety of creative activities, including music, dance, and art, using low-cost, locally available materials. A significant part of her training focuses on being energetic, flexible, and adaptive, as young children have short attention spans. She is also taught basic administrative skills like record keeping and how to communicate effectively with parents. The course aims to equip her with the knowledge and practical skills needed to be a competent and effective professional in an early childhood setting.

- 176.** What is a fundamental requirement for a person who wants to become an effective early childhood specialist?
- (A) A deep interest in financial management and accounting.
 - (B) A predisposition to be open and interactive with children.
 - (C) The ability to enforce strict discipline and silence in the classroom.
 - (D) A preference for working in isolation without any interaction.

Ans :

(B) A predisposition to be open and interactive with children.

While many skills can be taught, a fundamental requirement for working effectively with young children is having a genuine interest in them and a willingness and capacity for positive and open interaction with them.

- 177.** The term “developmentally appropriate practices” means that the activities planned for children should be:
- (A) Suited to their age, developmental stage, needs, and capabilities.

- (B) The same for all age groups, from infants to adults.
- (C) As academically challenging as possible to accelerate their learning.
- (D) Designed to be completed without any adult guidance.

Ans :

(A) Suited to their age, developmental stage, needs, and capabilities.

Developmentally appropriate practice is a guiding principle of ECCE. It means that the learning environment and activities must be tailored to the specific age and developmental level of the children to be effective and meaningful.

- 178.** Why is it essential for a preschool teacher to be flexible and adaptive?
- (A) Because young children have a long and focused attention span.
 - (B) Because lesson plans for young children should never be changed.
 - (C) Because flexibility is a sign of poor planning and preparation.
 - (D) Because young children have short attention spans and their needs can change quickly.

Ans :

(D) Because young children have short attention spans and their needs can change quickly.

Young children have a comparatively short attention span. A preschool teacher must be prepared to be flexible and adaptive, often having to quickly change her plans and strategies to respond to the immediate needs and interests of the children.

- 179.** Besides interactional skills, what other skills are required for an ECCE professional to manage a center effectively?
- (A) Advanced surgical skills.
 - (B) Legal expertise in corporate law.
 - (C) Administrative and management skills for record keeping and parent communication.
 - (D) Skills in computer programming and software development.

Ans :

(C) Administrative and management skills for record keeping and parent communication.

An ECCE professional also needs to be capable of administrative and management tasks. These skills are required for record keeping, report-writing, and maintaining effective and productive communication with the parent community.

- 207.** According to the expert panel, what is a key objective of ECCE?
- (A) To ensure all children score high marks in tests.
 - (B) To prepare children for school by fostering holistic development.
 - (C) To complete the primary school syllabus before children turn six.
 - (D) To replace all play activities with academic drills.

Ans :

(B) To prepare children for school by fostering holistic development.

A basic objective of ECCE is the preparation for school. This is best achieved not by teaching academics early, but by fostering the all-round development of the child, which creates a strong foundation for later learning.

- 208.** Using activities like sorting objects to teach pre-math skills is an example of what?
- (A) An informal and experiential learning approach.
 - (B) A formal, abstract method of teaching mathematics.
 - (C) A method that is not effective for learning.
 - (D) A test to measure a child's IQ.

Ans :

(A) An informal and experiential learning approach.

ECCE principles advocate for informal and experiential learning. Pre-academic skills are best taught through concrete, hands-on activities like sorting and playing, which are more meaningful and appropriate for young children than abstract drills.

- 209.** The principle of “blend of formal and informal interactions” suggests that the learning environment should:
- (A) Consist of only unstructured, free play without any adult guidance.
 - (B) Involve only formal, teacher-led instruction.
 - (C) Include a mix of planned activities and spontaneous, child-initiated interactions.
 - (D) Exclude any form of interaction between the teacher and the child.

Ans :

(C) A include a mix of planned activities and spontaneous, child-initiated interactions.

An effective ECCE environment provides a balance. It includes both formal (teacher-planned) interactions and informal ones that arise spontaneously from the children's interests, allowing for both guided learning and child-led exploration.

- 210.** The panel's drafted principles are largely in line with the recommendations of which national document?
- (A) The Indian Penal Code.
 - (B) The Companies Act.
 - (C) The National Sports Policy.
 - (D) The National Curriculum Framework (NCF), 2005.

Ans :

(D) The National Curriculum Framework (NCF), 2005.

The guiding principles mentioned, such as play as the basis of learning, art in education, and developmentally appropriate practices, are all key recommendations outlined in the NCF (2005) Position Paper on Early Childhood Education.

(B) A encourage active engagement with a variety of materials and experiences.

Setting up learning corners provides children with opportunities to actively engage with different materials and people around them. This exploration is how children at this age gather information and construct their understanding of the world.

- 185.** The preschool's focus on the process of creation in the art corner, rather than the final product, promotes what?

(A) Creative expression and exploration without fear of judgment.
(B) Competition among children to create the best artwork.
(C) The mass production of identical art pieces.
(D) The development of writing skills only.

Ans :

(A) A creative expression and exploration without fear of judgment.

In early childhood art, the focus should be on the process of exploring materials and expressing oneself creatively. This builds confidence and encourages creativity, whereas focusing only on the final product can create pressure and stifle exploration.

Direction : Read the following case study and answer the following questions.

Meera, after completing her post-graduate diploma in early childhood education, decides to become an entrepreneur. She starts her own day care center in her neighborhood. She soon realizes that running the center involves much more than just her expertise in child development and care. She has to manage the finances, including setting fees, paying salaries, and maintaining a budget. She is responsible for recruiting and training her staff of caregivers and helpers. She needs to ensure the center complies with all safety and licensing regulations. A significant part of her work involves communication with the parents, providing them with regular updates about their children's progress and addressing their concerns. She also has to market her center to attract new admissions. Meera's venture requires her to be a multi-skilled professional, combining her knowledge as an educator with the skills of a manager, administrator, and communicator to run a successful and high-quality child care program.

- 186.** Meera's venture of setting up her own day care center is an example of what career path in ECCE?

(A) Working as a teacher in a government school.
(B) Being a researcher in a university.
(C) Entrepreneurship in a child-related activity.
(D) A career as a government policy-maker.

Ans :

(C) An entrepreneurship in a child-related activity.

The scope of ECCE includes entrepreneurship. A trained professional can set up their own child care and education-related program, such as a day care center, crèche, or preschool, which involves running it as an enterprise.

- 187.** A program like a day care center primarily provides care for children during the day in what situation?

(A) In the absence of a primary caregiver at home, often because parents are working.
(B) When the child needs specialized medical treatment.
(C) For only one hour per week for recreational purposes.
(D) When the child is preparing for a competitive examination.

Ans :

(A) In the absence of a primary caregiver at home, often because parents are working.

Day care is the care of children, who can be infants and/or preschoolers, during the day. It typically serves as a substitute care arrangement when the primary caregiver is unavailable, for instance, due to employment.

- 188.** What skills, beyond her training as an educator, does Meera need to run her enterprise successfully?

(A) Only skills in cooking and cleaning.
(B) Expertise in advanced medical procedures.
(C) The ability to work completely alone without any staff.
(D) Skills in organization, management, finance, and communication.

Ans :

(D) Skills in organization, management, finance, and communication.

Starting an ECCE enterprise requires expertise beyond being an educator. It necessitates skills in organization and management, including handling finances, recruiting staff, and effective communication with parents and the community.

children. The establishment of this Early Childhood Care and Education (ECCE) center had a dual benefit. Firstly, it provided the young children, who were often from resource-poor environments, with a safe, stimulating space where they received supplementary nutrition, basic healthcare, and opportunities for early learning. Secondly, it freed the older siblings, particularly girls, from their caregiving duties, allowing them to enroll in and attend formal school regularly. This intervention shows how ECCE services can be a critical support system, not just for the holistic development of the young child, but also for the wider family and community, especially in promoting education for the girl child.

- 171.** The establishment of the ECCE center in the village primarily serves which important societal function?
- (A) It acts as a support service for women and children, enabling older siblings to attend school.
 - (B) It functions as a vocational training center for adults.
 - (C) It replaces the role of parents in raising their children.
 - (D) It serves as a commercial, for-profit business for the NGO.

Ans :

(A) It acts as a support service for women and children, enabling older siblings to attend school. One of the basic objectives of ECCE is to provide support services for women and children. By caring for young children, it releases older siblings, often girls, from caregiving duties, thereby enabling them to access education.

- 172.** For children living in difficult or resource-poor circumstances, a good preschool environment is known to be:
- (A) Detrimental to their development.
 - (B) Of no significant benefit.
 - (C) Very beneficial as it can compensate for a lack of resources at home.
 - (D) A source of anxiety and insecurity.

Ans :

(C) Very beneficial as it can compensate for a lack of resources at home.

For children from disadvantaged backgrounds, a good preschool can be an important factor in their growth. It provides a stimulating and supportive

environment that can help compensate for what may be lacking in their home environment.

- 173.** What is a key reason that institutional care for young children can be beneficial for the older child in the family?
- (A) It teaches the older child how to manage a large institution.
 - (B) It releases the older child from the task of child care, allowing them to attend school.
 - (C) It provides the older child with a place to play with their younger siblings.
 - (D) It increases the household chores for the older child.

Ans :

(B) It releases the older child from the task of child care, allowing them to attend school.

In many communities, older children, especially girls, are often tasked with caring for younger siblings, which prevents them from attending school. Institutional care for young children is thus beneficial for the older child's education.

- 174.** The Anganwadi, part of the ICDS program, provides services for children up to what age?
- (A) Eighteen years of age.
 - (B) Ten years of age.
 - (C) Three years of age.
 - (D) Six years of age.

Ans :

(D) Six years of age.

The Government of India's Integrated Child Development Services (ICDS) program, operating through Anganwadis, offers preschool education and other services to children in the age group of three to six years, along with care for younger children.

- 175.** The scenario illustrates that ECCE benefits not just the individual child but also:
- (A) Families and the community by providing essential support.
 - (B) The local political leaders.
 - (C) Large multinational corporations.
 - (D) Only the teachers who work in the center.

Ans :

(A) Families and the community by providing essential support.

Early childhood care and education is an activity that provides benefits beyond the individual child. It supports families by assisting parents with child

Ans :

(A) Experiential learning.

Experiential learning, or learning by doing, is a key principle of ECCE. By allowing the child to experiment with the containers themselves, the teacher is facilitating a hands-on experience through which the child can discover and learn.

194. Why is it important for an ECCE professional to have scientific knowledge of child development?

- (A) To create realistic expectations and interact with children effectively.
- (B) To prove that all children are the same and develop at the same pace.
- (C) To enforce a strict, one-size-fits-all curriculum.
- (D) To focus only on the physical growth of children.

Ans :

(A) To create realistic expectations and interact with children effectively.

A scientific understanding of child development and growth helps adults to have realistic expectations. It enables them to appreciate individual differences and to interact with children in a supportive and effective manner.

195. The child's belief that the tall, narrow glass holds more water reflects their focus on a single, perceptually salient feature (height). This is a characteristic of:

- (A) The advanced, logical thinking of an adult.
- (B) A specific stage of cognitive development in early childhood.
- (C) A lack of interest in the activity.
- (D) A deliberate attempt to give the wrong answer.

Ans :

(B) A specific stage of cognitive development in early childhood.

Piaget's theory outlines stages of cognitive development. The child's reasoning is characteristic of a particular stage where their thinking is dominated by perception. This is a normal feature of their development, not an error.

Direction : Read the following case study and answer the following questions.

A community-based preschool in a multicultural neighborhood makes a conscious effort to involve families and respect the cultural context of its children. The director believes that an ECCE institution must work along with, rather than in

opposition to, the family. For their annual food festival, instead of serving generic snacks, they invite parents and grandparents to prepare and share traditional dishes from their respective cultures. During story time, the teachers include folk tales and songs from the different communities represented in the class. The artwork and displays in the classroom reflect a blend of various cultural sources. For example, they use local materials and art forms for craft activities. This approach is significant because it helps young children, who are unable to make distinctions about different realities, to see a connection between their home environment and their school environment. It makes them feel secure and valued, and it fosters respect for diversity and plurality among the children from a very early age.

196. The preschool's approach is based on which important principle of ECCE?

- (A) The importance of the cultural context and working in partnership with the family.
- (B) The belief that school and home environments should be kept completely separate.
- (C) The idea that all children should be exposed to only one, uniform culture.
- (D) A focus on global trends, ignoring the local context completely.

Ans :

(A) The importance of the cultural context and working in partnership with the family.

An essential principle is that any ECCE institution must recognize the importance of the cultural context in which it operates. It should work with the family to create a bridge between the child's home and school environments.

197. Why is it particularly significant to consider the cultural context for a young child?

- (A) Because young children are already experts in cultural studies.
- (B) Because young children are unable to make distinctions about different perspectives and realities like older children can.
- (C) Because it helps to create a more confusing and stressful environment for them.
- (D) Because culture has no impact on a child's development.

Ans :

(B) Because young children are unable to make distinctions about different perspectives and realities like older children can.

It is crucial to be sensitive to the cultural context for young children as they cannot yet navigate different perspectives and realities. A disconnect between home and school culture can be confusing and unsettling for them.

- 198.** Including folk tales and traditional dishes in the curriculum is an example of using:
- (A) Only modern, text-based resources.
 - (B) Only materials imported from other countries.
 - (C) A curriculum that is irrelevant to the children's lives.
 - (D) A blend of textual and cultural sources, and local knowledge.

Ans :

(D) A blend of textual and cultural sources, and local knowledge.

A guiding principle of ECCE is to use a blend of textual and cultural sources, as well as local materials, arts, and knowledge. This makes the learning experience more relevant, familiar, and meaningful for the children.

- 199.** The practice of involving parents and grandparents in school activities helps to:
- (A) Strengthen the partnership between the school and the family.
 - (B) Decrease the workload of the teachers.
 - (C) Show that the school cannot function on its own.
 - (D) Reduce the amount of time children spend on learning.

Ans :

(A) Strengthen the partnership between the school and the family.

Involving family members in school activities is a key strategy for building a strong and positive relationship between the home and the school. This collaboration is highly beneficial for the child's overall development and well-being.

- 200.** By celebrating different cultures, the preschool is fostering what value in the children?
- (A) A sense of cultural superiority.
 - (B) An indifference towards all cultural practices.
 - (C) Respect for diversity and plurality.
 - (D) A dislike for their own cultural background.

Ans :

(C) Respect for diversity and plurality.

Exposing children to different cultural traditions in a positive and respectful manner helps them develop an appreciation for diversity. This is a

fundamental aspect of creating an inclusive and harmonious learning environment.

Direction : Read the following case study and answer the following questions.

Mr. Singh's 12-month-old daughter, Priya, who has just started walking, shows typical signs of attachment and stranger anxiety. She cries whenever he or his wife leaves the room and clings to them in the presence of unfamiliar people. Mr. Singh understands from a child development book that this is a normal phase. It shows that Priya has developed the cognitive ability to recognize familiar faces and is deeply attached to her primary caregivers. He knows that soon she will develop a sense of security even when they are not physically present, understanding that they haven't "vanished." As Priya grows into a toddler, she becomes more independent, actively exploring her environment, manipulating objects with her hands, and developing control over her body. Her vocabulary in her mother tongue is growing rapidly, and she is constantly asking "Why?". Her parents realize that their role is to provide a safe and loving environment that satisfies her curiosity without forcing her to learn things she is not yet capable of.

- 201.** Priya's fear of unfamiliar people at 12 months is not just an emotional display but also indicates her:
- (A) Inability to see properly.
 - (B) Lack of attachment to her parents.
 - (C) Capacity to recognize familiar faces and distinguish them from strangers.
 - (D) Advanced language skills.

Ans :

(C) Capacity to recognize familiar faces and distinguish them from strangers.

The fear of strangers, which often appears around 8-12 months, is a cognitive milestone. It shows that the infant can now recognize familiar people and is therefore wary of those who are unfamiliar.

- 202.** The child between two and three years of age, who often has a jumpy walk, is sometimes referred to as a:
- (A) Newborn
 - (B) Infant
 - (C) Preschooler
 - (D) Toddler

Ans :

(D) A toddler

The term 'toddler' is often used for a child between two and three years of age. The name is derived from the characteristic unsteady or "toddling" walk that children have as they master their walking skills.

203. A young child's development of a sense of security, knowing that a caregiver exists even when out of sight, is a crucial part of what developmental process?

- (A) Social and emotional development, particularly attachment.
- (B) Physical and motor development.
- (C) Language development.
- (D) Cognitive development related to numbers.

Ans :

(A) A social and emotional development, particularly attachment.

A key part of emotional development is the child's ability to develop a sense of security about their primary caregiver's absence. This understanding that the person continues to exist helps them overcome separation anxiety.

204. The rapid growth in Priya's vocabulary and her constant "Why?" questions indicate her:

- (A) Lack of interest in learning.
- (B) Growing curiosity and active engagement with the world.
- (C) Difficulty in communicating her basic needs.
- (D) Desire to challenge her parents' authority.

Ans :

(B) A growing curiosity and active engagement with the world.

Once children learn to speak, their vocabulary grows rapidly, and they become very curious. The frequent asking of "why" questions is a sign that they are actively trying to gather information and make sense of the world.

205. To support Priya's development as a toddler, the best learning environment her parents can provide is one that is:

- (A) Highly structured with formal lessons and tests.
- (B) Filled with complex electronic gadgets to accelerate her learning.
- (C) Restrictive, to prevent her from making any mistakes.
- (D) Safe, secure, and loving, with a variety of play materials to explore.

Ans :

(D) A safe, secure, and loving, with a variety of play materials to explore.

The best learning environment for a young child is one that is safe, secure, and loving. It should contain a variety of play materials and the presence of a caring adult to satisfy their curiosity.

Direction : Read the following case study and answer the following questions.

An education board is reviewing its curriculum framework for early childhood education. They consult a panel of experts, including developmental psychologists and experienced preschool teachers. The panel strongly recommends that the curriculum for children under six should be informal and based on developmentally appropriate practices. They argue against introducing formal reading, writing, and arithmetic in a structured, "school-like" manner. Instead, they emphasize the importance of providing a rich environment for language development through stories and conversation, and pre-math skills through activities like sorting and pattern-making. The panel drafts a list of guiding principles, which includes recognizing art and play as the basis of education, blending formal and informal interactions, and using local materials and knowledge. They state that the primary goal is not to rush children into academics but to prepare them for school by fostering their holistic development, curiosity, and a positive attitude towards learning. This approach aims to build a strong foundation for future learning.

206. The panel's recommendation against formal academic instruction for young children is based on the concept of:

- (A) Accelerating the learning process.
- (B) A teacher-centered curriculum.
- (C) Early specialization in academic subjects.
- (D) Developmentally Appropriate Practices (DAP).

Ans :

(D) A developmentally Appropriate Practices (DAP).

Developmentally Appropriate Practice (DAP) is a core concept in ECCE. It means that educational practices should be tailored to the age, individual needs, and socio-cultural context of the child, avoiding premature formal instruction.

- 180.** The training in using puppets and voice modulation is intended to develop which mandatory skill for working with children?
- (A) The skill of storytelling and engaging in playful activities.
 - (B) The ability to conduct formal examinations.
 - (C) The capacity for writing academic research papers.
 - (D) The skill of managing large financial budgets.

Ans :

(A) The skill of storytelling and engaging in playful activities.

Skills in the arts, such as storytelling, dance, music, and organizing playful activities, are considered mandatory for professionals working with young children. These skills help to create an engaging and stimulating learning environment.

Direction : Read the following case study and answer the following questions.

A preschool named “Khel-Kood” bases its entire curriculum on the principle that play is the foundation of learning for young children. The classrooms are not set up with traditional desks and chairs but are organized into different ‘learning corners’—a block corner, a reading corner with picture books, a nature corner with plants and pebbles, and an art corner with clay and paints. The teachers act as facilitators, guiding the children’s exploration rather than directing it. For instance, when children are playing with blocks, the teacher might ask questions that encourage them to think about size, shape, and balance. In the art corner, the focus is on the process of creation, not the final product. The school’s philosophy is that through such free and guided play, children develop cognitive skills, social skills by interacting with peers, emotional maturity by expressing themselves, and physical coordination. They believe this approach is far more effective for holistic development than forcing young children to sit still and learn through rote memorization.

- 181.** The educational philosophy of “Khel-Kood” preschool is based on which guiding principle of ECCE?
- (A) Play as the basis for learning.
 - (B) The primacy of rote memorization.
 - (C) A teacher-centric, instruction-based model.
 - (D) The separation of learning from all forms of play.

Ans :

(A) A play as the basis for learning.

A core guiding principle of ECCE, as outlined in the NCF (2005), is recognizing play as the basis for all learning in the early years. Play is the most natural and effective way for children to learn.

- 182.** In this preschool, the teacher’s role is that of a:
- (A) Strict disciplinarian who enforces rules.
 - (B) Passive observer who does not interact with the children.
 - (C) Lecturer who delivers formal lessons to the class.
 - (D) Facilitator who guides and supports the children’s learning through play.

Ans :

(D) A facilitator who guides and supports the children’s learning through play.

In a play-based, child-centered environment, the teacher’s role shifts from being a formal instructor to a facilitator. They observe, guide, and enrich the children’s play experiences to promote learning and development.

- 183.** Forcing a young child to sit in one place and learn like in a formal school can lead to what negative outcome?
- (A) It will enhance their natural curiosity and creativity.
 - (B) It will make the child feel more secure and confident.
 - (C) The child’s curiosity will diminish, and they may feel anxious and insecure.
 - (D) It will improve their physical health and motor skills.

Ans :

(C) A the child’s curiosity will diminish, and they may feel anxious and insecure.

A formal learning environment that is not developmentally appropriate can be detrimental to a young child. It can stifle their natural curiosity and motivation to learn, and can lead to feelings of anxiety and insecurity.

- 184.** The organization of the classroom into ‘learning corners’ is designed to:
- (A) Restrict children’s access to play materials.
 - (B) Encourage active engagement with a variety of materials and experiences.
 - (C) Keep the classroom tidy and unused.
 - (D) Test the children’s ability to sit still for long periods.

Ans :

CHAPTER 07

MANAGEMENT OF SUPPORT SERVICES, INSTITUTIONS AND PROGRAMMES FOR CHILDREN, YOUTH AND ELDERLY

SUMMARY

1. SIGNIFICANCE

While the family is the fundamental unit for care, it often cannot provide all the specialized services like formal education and healthcare that its members need. Therefore, society establishes support structures like schools and hospitals. However, many families, particularly those facing financial hardship, are unable to access these services. This makes it the responsibility of the state and society to create and manage institutions and programs that support vulnerable groups, ensuring they have opportunities for holistic development and a decent life.

2. BASIC CONCEPTS

The term 'vulnerable' refers to groups in society who are more susceptible to adverse circumstances and are likely to suffer greater harm from them. Children, youth, and the elderly are considered vulnerable groups because if their unique developmental and other needs are not met, they can face significant negative consequences.

3. WHY ARE CHILDREN VULNERABLE?

Childhood is a period of rapid, holistic development, making children particularly vulnerable to the lasting negative impacts of adverse experiences. Those living in difficult circumstances where their basic needs for food, health, and care are not met are at the highest risk. The Juvenile Justice (Care and Protection of Children) Act, 2000, provides

a legal framework for two categories of children: those "in conflict with law" and those "in need of care and protection," such as orphans, street children, and victims of abuse.

3.1 Institutions, Programmes and Initiatives for Children

Several key initiatives exist to support vulnerable children:

- **Integrated Child Development Services (ICDS):** This is one of the world's largest early childhood programs, providing integrated health, nutrition, and education services to children under six and their mothers through a network of 'anganwadi' centers.
- **SOS Children's Villages:** An independent NGO that offers long-term, family-based care to orphaned and abandoned children in a supportive village environment, helping them recover from trauma and grow into independent adults.
- **Children's Homes:** Government-run institutions that provide custodial care, education, and vocational training for children who are in state custody. These include Observation Homes for temporary stays, Special Homes for juveniles who have violated the law, and Juvenile/Children's Homes for long-term care.
- **Adoption:** This process has been institutionalized and legalized in India, with the Central Adoption Resource Authority (CARA) setting guidelines to safeguard the welfare and rights of children.

Ans :

(C) To gain support, as many private companies support innovative programs.

Building linkages with the private sector is important because many financial institutions and companies support innovative social programmes as part of their social responsibilities. This can be a significant source of funding and other forms of support for the institution.

- 28.** Which of the following is considered an administrative skill required for managing an institution?

(A) Interacting with community leaders
(B) Handling finances and maintaining records
(C) Providing emotional counseling to beneficiaries
(D) Planning recreational activities

Ans :

(B) Handling finances and maintaining records
Administrative skills for managing an organization include practical tasks like handling finances, recruiting personnel, buying equipment, and maintaining records and stocks. These are distinct from interpersonal or programmatic skills.

- 29.** What is the most crucial personal attribute for an entrepreneur starting an institution for a needy group?

(A) A strong vision and commitment to the cause.
(B) A desire for quick financial profit.
(C) An ability to avoid all interactions with people.
(D) A preference for working in a structured corporate environment.

Ans :

(A) A strong vision and commitment to the cause.
A person starting a social institution needs a clear vision of what they want to achieve and how the organization will help the target group. This vision, combined with deep commitment and passion, is the driving force behind overcoming the challenges of such an enterprise.

- 30.** Which undergraduate degree is suggested as a suitable first step for a career in managing support services for vulnerable groups?

(A) Bachelor of Engineering
(B) Bachelor of Commerce
(C) Bachelor of Fine Arts
(D) Bachelor of Home Science or Social Work

Ans :

(D) Bachelor of Home Science or Social Work
For a career focused on managing institutions for vulnerable populations, an undergraduate degree in Home Science (or Family and Community Sciences), Social Work, or other social sciences is recommended as these programs provide the necessary foundational knowledge about these groups.

- 31.** Match the support programme (Column I) with its primary target group (Column II).

	Column I		Column II
1.	Anganwadi	a.	Non-student rural youth
2.	Nehru Yuva Kendra	b.	Elderly persons living in isolation
3.	SOS Children's Village	c.	Children below six years and mothers
4.	Mobile Medicare Units	d.	Orphaned and abandoned children

(A) 1-c, 2-a, 3-d, 4-b
(B) 1-d, 2-c, 3-b, 4-a
(C) 1-b, 2-d, 3-a, 4-c
(D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-c, 2-a, 3-d, 4-b
Anganwadis (under ICDS) serve children below six and mothers. Nehru Yuva Kendras target non-student rural youth. SOS Villages provide homes for orphaned children. Mobile Medicare Units provide care to elderly in rural/isolated areas.

- 32.** All of the following are examples of institutions or programmes for children EXCEPT:

(A) Integrated Child Development Services (ICDS)
(B) Children's Homes run by the Government
(C) National Old Age Pension Scheme (NOAPS)
(D) SOS Children's Villages

Ans :

(C) National Old Age Pension Scheme (NOAPS)
ICDS, Government Children's Homes, and SOS Villages are all specifically for children. The National Old Age Pension Scheme (NOAPS) is a programme designed to support destitute elderly persons, not children.

- 33.** Why is it stated that a family cannot 'always' provide all the specialized services for its members?

MULTIPLE CHOICE QUESTION

1. What is the primary reason that societal structures like schools and hospitals are necessary, even when families are functioning well?
- (A) Families are often unwilling to provide basic services for their members.
 - (B) Families cannot always provide all the specialised services their members need.
 - (C) Societal structures are designed to replace the family's primary functions.
 - (D) Societal structures exist mainly to generate employment for the community.

Ans :

(B) Families cannot always provide all the specialised services their members need. While the family is the basic unit for care, it cannot always offer specialized services like formal education or advanced health care. Societal institutions like schools and hospitals are created to supplement the family's role by providing this expert support, ensuring the optimal development of individuals.

2. Why does the state or society often need to intervene and provide support for many families in India?
- (A) Because all families prefer to rely on government assistance programs.
 - (B) Because societal structures are more efficient than family units.
 - (C) Due to a lack of resources, preventing them from meeting basic needs.
 - (D) To enforce a uniform lifestyle across all communities in the country.

Ans :

(C) Due to a lack of resources, preventing them from meeting basic needs. Many families in India lack the necessary resources, especially financial ones, to meet their members' basic needs or to access services provided by society. This inability necessitates intervention from the government and society to ensure citizens' well-being and development.

3. In the context of social services, what does the term 'vulnerable' refer to?
- (A) Individuals who are physically weak and require constant medical attention.
 - (B) Groups that are financially wealthy but socially isolated from others.

- (C) People who deliberately choose to live in high-risk environments.
- (D) Persons who are more likely to be harmed by adverse circumstances.

Ans :

(D) Persons who are more likely to be harmed by adverse circumstances.

The term 'vulnerable' identifies persons or groups within a society who are more susceptible to being negatively affected by adverse situations. These groups, such as children, youth, and the elderly, require special attention because their needs are often unmet.

4. Which statement best explains why children are considered a vulnerable group?
- (A) Childhood is a period of rapid, holistic development where negative experiences have lasting effects.
 - (B) Children are inherently lazy and refuse to take care of themselves.
 - (C) Children are not considered important members of the family or society.
 - (D) Children have fully developed coping mechanisms and do not need support.

Ans :

(A) Childhood is a period of rapid, holistic development where negative experiences have lasting effects.

Children are vulnerable because childhood is a critical period of rapid growth in all domains. Their needs must be met holistically, as adverse experiences during this stage can have a significant and long-lasting negative impact on their overall development.

5. According to official estimates, approximately how many children in India are engaged in work?
- (A) 5 million
 - (B) 10 million
 - (C) 17 million
 - (D) 50 million

Ans :

(C) 17 million

Official estimates indicate that 17 million children are engaged in work in India, though other sources like the World Bank suggest this number could be as high as 44 million. This highlights the vulnerability of a significant portion of India's child population.

Nehru Yuva Kendras are specifically designed to involve the non-student youth in rural areas in national development. They organize activities like non-formal education, vocational training, and leadership camps to make this group functionally efficient and socially useful.

- 17.** Assertion (A): The government promotes adventure activities like mountaineering and trekking for youth.

Reason (R): These activities are intended to encourage a spirit of risk-taking, teamwork, and endurance.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 (C) (A) is true, but (R) is false.
 (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The government provides financial assistance for adventure activities with the specific aim of fostering qualities like adventure, risk-taking, cooperative teamwork, and endurance among the youth. Therefore, the reason directly explains the assertion.

- 18.** What is the primary goal of the Scouts and Guides programme supported by the government?

- (A) To provide military training to young boys and girls.
 (B) To prepare students for competitive examinations.
 (C) To develop the character of youth to make them good citizens.
 (D) To offer financial aid for starting small-scale businesses.

Ans :

(C) To develop the character of youth to make them good citizens.

The government supports Scouts and Guides to develop the character of boys and girls, making them good citizens by instilling loyalty, patriotism, thoughtfulness for others, and a desire for social service.

- 19.** Where is the Asia Pacific Regional Centre for advanced studies in youth work, under the Commonwealth Youth Programme, located?

- (A) New Delhi, India
 (B) Lusaka, Zambia
 (C) Georgetown, Guyana
 (D) Chandigarh, India

Ans :

(D) Chandigarh, India

Under the Commonwealth Youth Programme, three regional centres for advanced studies in youth work were established. The centre for the Asia Pacific region was set up in Chandigarh, India.

- 20.** What is the stated age for a person to be considered a 'Senior Citizen' in India?

- (A) 55 years and above
 (B) 60 years and above
 (C) 65 years and above
 (D) 70 years and above

Ans :

(B) 60 years and above

While many countries define a senior citizen as being 65 years or older, in India, the term applies to individuals who are in the age group of 60 years and above.

- 21.** Consider the following statements about the elderly population in India.

1. A majority of the elderly population resides in urban areas.
2. There is a trend of "feminisation" of the elderly population.
3. The number of persons above 80 years (older-old) is decreasing.
4. A large percentage of Senior Citizens live below the poverty line.

Which of the above statements are correct?

- (A) 2 and 4 only
 (B) 1 and 3 only
 (C) 1, 2, and 3 only
 (D) 2, 3, and 4 only

Ans :

(A) 2 and 4 only

Key features of India's elderly population include a majority (80%) residing in rural areas, feminisation, an increase (not decrease) in the older-old population, and a large proportion living below the poverty line. Therefore, only statements 2 and 4 are correct.

- 22.** Which of the following is identified as a primary reason for the health vulnerability of the elderly?

- 11.** What is the main purpose of the Central Adoption Resource Authority (CARA)?
- (A) To provide financial assistance directly to adoptive parents.
 - (B) To set up guidelines for adoption to safeguard children's welfare.
 - (C) To operate orphanages and children's homes across the country.
 - (D) To conduct legal proceedings for property inheritance by children.

Ans :

(B) To set up guidelines for adoption to safeguard children's welfare.

CARA was constituted by the Government of India to establish and regulate guidelines for the adoption process. Its primary objective is to protect the welfare and rights of children who are being considered for adoption, ensuring the process is standardized and safe.

- 12.** According to the National Youth Policy, 2014, what is the age range defined as 'youth'?
- (A) 15-29 years
 - (B) 13-19 years
 - (C) 18-35 years
 - (D) 21-40 years

Ans :

(A) 15-29 years

The National Youth Policy of 2014 defines 'youth' as individuals falling within the age group of 15 to 29 years. This definition is crucial for targeting specific government programmes and initiatives aimed at this demographic.

- 13.** Which of the following is NOT mentioned as a reason for the vulnerability of youth?
- (A) Pressure to excel in a highly competitive environment.
 - (B) Preparing to take on adult roles like earning a livelihood.
 - (C) Biological changes occurring in the body during adolescence.
 - (D) Lack of interest in participating in social and community activities.

Ans :

(D) Lack of interest in participating in social and community activities.

Youth are vulnerable due to biological changes, the pressure to succeed, and the transition to adult roles. The text does not suggest that a lack of interest in social activities is a primary cause of

their vulnerability; in fact, programmes encourage such participation.

- 14.** Which of the following is NOT listed as an especially vulnerable group within the youth category?
- (A) Rural and Tribal Youth
 - (B) Youth with disabilities
 - (C) Youth who are enrolled in higher education
 - (D) Out-of-school Youth

Ans :

(C) Youth who are enrolled in higher education
The text identifies specific vulnerable youth subgroups, including rural and tribal youth, out-of-school youth, and youth with disabilities. Youth enrolled in higher education are generally not categorized as an especially vulnerable group in this context.

- 15.** What is the primary objective of the National Service Scheme (NSS)?
- (A) To provide financial scholarships for higher education abroad.
 - (B) To involve college students in social service and national development.
 - (C) To offer professional sports training to young athletes.
 - (D) To run political campaigns during national and state elections.

Ans :

(B) To involve college students in social service and national development.

The National Service Scheme (NSS) aims to engage college-level students in various programmes of social service and activities contributing to national development, such as construction, environmental improvement, and community welfare initiatives.

- 16.** Which statement accurately describes the focus of the Nehru Yuva Kendras?
- (A) They aim to enable non-student rural youth to contribute to development.
 - (B) They primarily focus on providing employment in government sectors.
 - (C) They are exclusively dedicated to promoting classical arts and music.
 - (D) They offer advanced scientific research facilities for postgraduate students.

Ans :

(A) They aim to enable non-student rural youth to contribute to development.

The 'anganwadi' is the focal point of the ICDS scheme; it is the community-based childcare centre where the integrated package of services like supplementary nutrition, health check-ups, and pre-school education is provided to children and mothers.

- 39.** What is a key feature of the SOS Children's Village model that helps children recover from trauma?
- (A) Strict discipline and rigorous academic training.
 - (B) The experience of relationships and love within a family-like unit.
 - (C) Frequent relocation to different cities to broaden their experience.
 - (D) Limited interaction with other children to promote independence.

Ans :

(B) The experience of relationships and love within a family-like unit.

The SOS model emphasizes creating a stable family environment where children experience love and build relationships with a mother figure and siblings, which is crucial for helping them recover from past trauma.

- 40.** A 16-year-old is caught for a minor theft. According to the Juvenile Justice Act, which type of home would this child most likely be placed in?
- (A) Old Age Home
 - (B) Shelter for the homeless
 - (C) A regular adult prison
 - (D) Special Home

Ans :

(D) Special Home

Juveniles (children under 18) who are found guilty of violating the law are placed in Special Homes for custodial care, protection, and rehabilitation, as mandated by the Juvenile Justice Act.

- 41.** The National Service Volunteer Scheme provides opportunities for nation-building to which group?
- (A) Students who have completed their first degree.
 - (B) Students who have just completed their 10th standard.
 - (C) Non-student youth in urban areas.
 - (D) Retired government officials.

Ans :

(A) Students who have completed their first degree.

This scheme allows students who have finished their first degree to engage full-time for one or two years in national development programs, often working through Nehru Yuva Kendras.

- 42.** Which of the following is NOT an activity typically promoted by Nehru Yuva Kendras?
- (A) Vocational training
 - (B) Organisation of work camps
 - (C) Providing old-age pensions
 - (D) Promotion of rural sports

Ans :

(C) Providing old-age pensions

Nehru Yuva Kendras focus on youth development through activities like vocational training, work camps, and promoting sports. Providing pensions is a social security function for the elderly, not a youth programme.

- 43.** Assertion (A): Many elderly individuals in India experience loneliness and isolation.

Reason (R): Children often move away for marriage or work, and the traditional family network is fragmenting, especially in cities.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The reasons provided in (R)—children moving away and the breakdown of the joint family system—are direct causes for the feelings of loneliness and isolation experienced by many elderly people, as described in (A).

- 44.** What is meant by the 'feminisation of the elderly population'?

- (A) Elderly men are adopting traditionally female roles.
- (B) There are more elderly women than elderly men, often due to higher female life expectancy.
- (C) The government provides more support to elderly women than men.
- (D) The elderly population is increasingly focused on feminist issues.

Ans :

- (A) Their refusal to accept modern medical treatments and care.
- (B) Decreased physiological reserves and defence mechanisms.
- (C) A deliberate choice to live an unhealthy and inactive lifestyle.
- (D) The lack of availability of any hospitals or clinics for them.

Ans :

(B) Decreased physiological reserves and defence mechanisms.

The elderly are more susceptible to disease primarily because the aging process naturally leads to decreased physiological reserves and weaker bodily defence mechanisms, making them less able to fight off illnesses.

- 23.** What is the primary purpose of a Day Care Centre for Alzheimer's Disease/Dementia Patients?
- (A) To provide long-term residential accommodation for all elderly.
 - (B) To offer financial pensions to patients and their families.
 - (C) To provide specialised day-care and support for patients.
 - (D) To conduct advanced medical research on finding a cure.

Ans :

(C) To provide specialised day-care and support for patients.

These centers are specifically designed to provide specialised day-care for elderly individuals suffering from Alzheimer's disease or dementia. They offer a supportive environment and activities tailored to the needs of these patients, providing respite for their regular caregivers.

- 24.** What is the main eligibility criterion for the National Old Age Pension Scheme (NOAPS)?
- (A) The person must be above 65 years and considered destitute.
 - (B) The person must be above 60 years and have a chronic illness.
 - (C) The person must be living in a designated urban slum area.
 - (D) The person must be a retired government employee.

Ans :

(A) The person must be above 65 years and considered destitute.

The National Old Age Pension Scheme (NOAPS) is for destitute elderly individuals, defined as those without regular financial support. Beneficiaries must be above 65 years of age and provide proof of their age and destitute status.

- 25.** A person wants to start a programme for the elderly. Which skill set would be most crucial for ensuring the programme's success by involving the local community?
- (A) Financial accounting skills
 - (B) Legal documentation skills
 - (C) Technical repair skills
 - (D) People skills

Ans :

(D) People skills

Running a successful community-based programme requires strong people skills to interact with various groups, including the community, government officials, and internal staff. Building linkages and ensuring community participation are pillars of effective programmes, making these interactive skills essential.

- 26.** What does 'participatory planning' involve in the context of managing a community programme?
- (A) The programme is planned by involving the people it is for.
 - (B) The manager makes all decisions independently without any input.
 - (C) Only government officials are involved in the planning process.
 - (D) The planning is outsourced to an external consulting agency.

Ans :

(A) The programme is planned by involving the people it is for.

Participatory planning is an approach where the intended beneficiaries—the community members themselves—are involved in the planning process right from the start. This fosters a sense of ownership and ensures the programme effectively meets their actual needs.

- 27.** Why is it important for a programme manager to build a relationship with the private sector?
- (A) To hire private security for the institution.
 - (B) Because private sector companies are required by law to run all social programs.
 - (C) To gain support, as many private companies support innovative programs.
 - (D) To sell the institution's products exclusively to private employees.

6. Under the Juvenile Justice Act, 2000, what is the definition of a child “in conflict with law”?
- A child who has disagreements with their parents or guardians.
 - A child who has been caught by the police for violating a law.
 - A child who needs special care and protection due to poverty.
 - A child who runs away from home to live on the streets.

Ans :

(B) A child who has been caught by the police for violating a law.

A child “in conflict with law,” also known as a juvenile delinquent, is defined as a minor who has been apprehended by the police for committing or being accused of committing a crime under the Indian penal code.

7. Which of the following is NOT listed as a category for children “in need of care and protection” under the Juvenile Justice Act?
- A child who is mentally or physically challenged with no support system.
 - A child who is a victim of armed conflict or natural calamity.
 - A child who is vulnerable to being inducted into drug abuse.
 - A child who is performing exceptionally well in academics at school.

Ans :

(D) A child who is performing exceptionally well in academics at school.

The Juvenile Justice Act identifies children “in need of care and protection” based on vulnerability and risk, such as being challenged with no support, victims of calamity, or at risk of drug abuse. Academic performance is not a criterion for this classification.

8. What is the primary aim of the Integrated Child Development Services (ICDS) programme?
- To provide financial loans to families for starting new businesses.
 - To meet the holistic needs of children below six years of age.
 - To offer higher education scholarships to youth in rural areas.
 - To build retirement homes for the elderly population in cities.

Ans :

(B) To meet the holistic needs of children below six years of age.

The ICDS programme is the world’s largest early childhood initiative, aiming to meet the health, nutrition, stimulation, and early education needs of children under six in an integrated manner to promote their holistic development.

9. What is the core vision of the SOS Children’s Villages organization?
- To provide short-term emergency relief exclusively during natural disasters.
 - To offer vocational training to unemployed youth in urban centers.
 - To provide family-based, long-term care for orphaned and abandoned children.
 - To run day-care centers for the children of working parents.

Ans :

(C) To provide family-based, long-term care for orphaned and abandoned children.

SOS Children’s Villages is a non-governmental organization focused on providing a family-like environment and long-term care for children who cannot be raised by their biological families. The model involves an “SOS mother” caring for a group of children in a home setting.

10. Match the type of Children’s Home (Column I) with its correct description (Column II).

	Column I		Column II
1.	Observation Homes	a.	For juveniles found guilty of violating a law.
2.	Special Homes	b.	For long-term stay of children whose families are untraceable or unfit.
3.	Juvenile Homes	c.	For temporary stay during an investigation.

- 1-c, 2-a, 3-b
- 1-a, 2-b, 3-c
- 1-b, 2-c, 3-a
- 1-c, 2-b, 3-a

Ans :

(A) 1-c, 2-a, 3-b

Observation Homes are for temporary stay pending investigation. Special Homes are custodial care for juveniles who have violated the law. Juvenile/Children’s Homes provide long-term care for children who cannot return to their families.

- (A) Because optimal development often requires expert services like advanced healthcare.
- (B) Because families are legally prohibited from providing education at home.
- (C) Because family members are generally not interested in each other's well-being.
- (D) Because community structures are always better funded than individual families.

Ans :

(A) Because optimal development often requires expert services like advanced healthcare.

The statement emphasizes that for optimal growth, members need specialized services such as formal education and professional healthcare which a single family unit typically cannot provide on its own. This necessitates the existence of supportive community structures.

- 34.** According to the Planning Commission of India (2011-2012), what percentage of the population was living below the national poverty line?
- (A) 15.5%
 - (B) 29.5%
 - (C) 45.5%
 - (D) 55.5%

Ans :

(B) 29.5%

The Planning Commission's data for 2011-2012 indicated that 29.5 percent of India's population was living below the national poverty line, highlighting widespread economic vulnerability.

- 35.** Assertion (A): There is a need for government-initiated programmes for children, youth, and the elderly.
Reason (R): It is the responsibility of the government and society to ensure all citizens have a decent life and opportunities for development.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The need for government programmes arises directly from the state's fundamental responsibility to provide for its citizens, especially

vulnerable groups, ensuring they have a decent life and opportunities for holistic development.

- 36.** Which of the following pairs of 'vulnerable group' and 'reason for vulnerability' is correctly matched?
- (A) Children - Fully developed physically and emotionally
 - (B) Youth - Established in their careers and family life
 - (C) Elderly - Increased physiological reserves and strong immunity
 - (D) Children - Rapid development period where adverse experiences have lasting impact

Ans :

(D) Children - Rapid development period where adverse experiences have lasting impact

Children are vulnerable because childhood is a period of rapid development where negative experiences can have long-lasting effects. The other options state the opposite of the reasons for vulnerability for the respective groups.

- 37.** The Juvenile Justice (Care and Protection of Children) Act, 2000, concerns itself with which two categories of children?
- (A) "Gifted children" and "slow learners"
 - (B) "Rural children" and "urban children"
 - (C) "Children in conflict with law" and "children in need of care and protection"
 - (D) "Children in private schools" and "children in government schools"

Ans :

(C) "Children in conflict with law" and "children in need of care and protection"

The Act specifically addresses two distinct categories: children who have violated the law (in conflict with law) and those who are vulnerable and require support (in need of care and protection).

- 38.** In the context of the ICDS programme, what is an 'anganwadi'?
- (A) The childcare centre where ICDS services are delivered.
 - (B) A vocational training centre for adults.
 - (C) A residential school for older children.
 - (D) A mobile health clinic for the elderly.

Ans :

(A) The childcare centre where ICDS services are delivered.

4. WHY ARE YOUTH VULNERABLE?

Youth (defined as 15-29 years old) is a vulnerable stage due to significant biological changes, peer pressure, and the stress of preparing for adult roles like finding a livelihood and starting a family. They face risks related to substance abuse and reproductive health. Specific groups like rural, tribal, and out-of-school youth, as well as female adolescents and youth with disabilities, are especially vulnerable.

4.1 YOUTH PROGRAMMES IN INDIA

To address these vulnerabilities, India has several youth programs:

- **National Service Scheme (NSS):** Involves college students in social service and national development projects.
- **Nehru Yuva Kendras:** Aim to enable non-student rural youth to contribute to development through activities like non-formal education, vocational training, and leadership camps.
- **Promotion of Adventure:** The government provides financial assistance to youth clubs for activities like mountaineering and trekking to foster a spirit of adventure and teamwork.
- **Scouts and Guides:** Aims to develop character, patriotism, and a desire for social service among boys and girls.

5. WHY ARE THE ELDERLY VULNERABLE?

India's elderly population (60 years and above) is steadily increasing, with a majority residing in rural areas and a significant percentage living below the poverty line. Their vulnerability is heightened by factors such as deteriorating health, loneliness, financial dependency, and the breakdown of traditional family support systems. The National Policy for Older Persons, adopted in 1999, aims to address these challenges.

5.1 SOME PROGRAMMES FOR THE ELDERLY

Various programs cater to the needs of the elderly, including:

- Services providing for basic needs like food, shelter, and healthcare.
- Initiatives to strengthen intergenerational relationships.
- Institutional care such as Old Age Homes, Day Care Centres, and Multi-Service Centres.

- Mobile Medicare Units to provide medical care in rural and isolated areas.
- Helplines, counseling centers, and mental health programs.
- The National Old Age Pension Scheme (NOAPS), which offers financial assistance to destitute elderly persons.

6. PREPARING FOR A CAREER

A career in managing support services requires a broad knowledge base and multiple skills in planning, management, and evaluation. An undergraduate degree in Home Science, Social Work, or a related social science provides a strong foundation.

6.1 People Skills

Running a successful program requires excellent people skills to interact effectively with diverse groups, including the community, the private sector, government officials, and internal staff. Building community linkages and encouraging participatory planning are crucial for program success.

6.2 Administrative Skills

Professionals in this field must have strong administrative skills to handle finances, recruit personnel, manage space and equipment, and maintain records and stocks. Those wishing to start their own organization also need a clear vision, passion, and entrepreneurial abilities.

7. SCOPE

The demand for quality programs and institutions serving children, youth, and the elderly is continuous, offering a wide variety of career opportunities for those with the right training and inclination.

8. CAREER AVENUES

Career options in this field include:

- Establishing your own institution to provide services to a target group.
- Working as a manager or functionary at any level within an established institution or program.
- Becoming a researcher, consultant, or evaluator for existing programs and institutions.

(B) There are more elderly women than elderly men, often due to higher female life expectancy. "Feminisation of the elderly population" is a demographic term referring to the increasing proportion of females in the older age groups. This is often because women tend to live longer than men.

45. In what year was the National Policy for Older Persons adopted by the government?
- (A) 1989
 - (B) 1995
 - (C) 1999
 - (D) 2005

Ans :

(C) 1999

The government adopted the National Policy for Older Persons in the year 1999 to address the health, economic, and social needs of the elderly population and ensure their well-being.

46. Programmes for the elderly in India include all of the following EXCEPT:
- (A) Organizing entrance exams for university admissions.
 - (B) Setting up Old Age homes for shelter.
 - (C) Providing Mobile Medicare Units in rural areas.
 - (D) Encouraging Active and Productive Ageing.

Ans :

(A) Organizing entrance exams for university admissions.

Programmes for the elderly focus on their specific needs like shelter, health, and active aging. University entrance exams are for youth pursuing higher education, not a service targeted at the elderly.

47. Which of the following skills are essential for managing a support institution?
1. People skills for community interaction.
 2. Administrative skills for handling finances.
 3. A strong vision and commitment to the cause.
- (A) 1 only
 - (B) 1 and 2 only
 - (C) 2 and 3 only
 - (D) 1, 2, and 3

Ans :

(D) 1, 2, and 3

A successful manager or founder of a support institution needs a combination of people skills for interaction, administrative skills for operations

like finance, and a personal vision and passion for the work. All three are crucial for effective management.

48. An NGO wants to start a new youth center. The first step in 'participatory planning' should be to:
- (A) Rent a building and buy equipment.
 - (B) Hire staff and assign them duties.
 - (C) Consult with the local youth to understand their needs.
 - (D) Apply for government funding immediately.

Ans :

(C) Consult with the local youth to understand their needs.

Participatory planning requires involving the intended beneficiaries from the very beginning. Therefore, the first step should be to engage with the local youth to ensure the program is designed to meet their actual needs and preferences.

49. Which of the following pairs is incorrectly matched?
- (A) ICDS - Early childhood care
 - (B) Nehru Yuva Kendras - Rural non-student youth
 - (C) CARA - Guidelines for adoption
 - (D) NOAPS - Vocational training for youth

Ans :

(D) NOAPS - Vocational training for youth
NOAPS (National Old Age Pension Scheme) provides pensions to the destitute elderly. Vocational training for youth is a function of organizations like the Nehru Yuva Kendras, not NOAPS. The other pairs are correctly matched.

50. The services delivered at an 'anganwadi' include all of the following EXCEPT:
- (A) Supplementary feeding
 - (B) Immunisation
 - (C) Pre-school education
 - (D) Formal school examinations

Ans :

(D) Formal school examinations
Anganwadis provide a package of services including supplementary feeding, immunisation, and non-formal pre-school education. They do not conduct formal school examinations, as their focus is on early childhood development, not formal schooling.

51. Match the organization/policy (Column I) with the year it was established/adopted (Column II).

(D) Anganwadi - Providing supplementary nutrition to preschoolers

Ans :

(C) Children's Home - Providing higher education scholarships

Children's Homes provide long-term care, board, education, and vocational training for children who cannot return to their families. They do not primarily provide higher education scholarships.

63. Assertion (A): Many youth face significant risks related to sexual and reproductive health.

Reason (R): Many young people lack the knowledge and power to make informed choices in these matters.

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

(C) (A) is true, but (R) is false.

(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion that youth face sexual and reproductive health risks is directly explained by the reason that they often lack the necessary information and autonomy to make safe and informed decisions.

64. Why is financial dependency a source of stress for many elderly individuals?

(A) They prefer to live in complete isolation.

(B) It can lead to a feeling of being a burden on the younger generation.

(C) They are not legally allowed to receive financial support.

(D) Younger family members are always unwilling to provide support.

Ans :

(B) It can lead to a feeling of being a burden on the younger generation.

Financial dependency on their children or others can be a significant source of stress for the elderly, contributing to feelings of loneliness, isolation, and being a burden.

65. What is the primary objective of the government providing financial assistance for inter-state youth visits?

(A) To promote tourism within the country.

(B) To encourage migration from rural to urban

areas.

(C) To conduct a nationwide census of the youth population.

(D) To promote national integration and cultural understanding.

Ans :

(D) To promote national integration and cultural understanding.

The government funds visits for youth between states with different cultures to promote a greater understanding of the country's diverse historical and cultural heritage, thereby fostering national integration.

66. An organization running a home for the elderly finds that many residents are seriously ill and require constant nursing. Which specific type of facility should they consider establishing?

(A) A Day Care Centre

(B) A Respite Care and Continuous Care Home

(C) A Mobile Medicare Unit

(D) A Multi-Service Centre

Ans :

(B) A Respite Care and Continuous Care Home
Respite Care and Continuous Care Homes are specifically designed for older persons who are seriously ill and require continuous nursing care, which is a higher level of care than a standard old age home.

67. In the context of services for the elderly, what is a "Multi-Service Centre"?

(A) A center providing daycare, educational, and healthcare opportunities.

(B) A hospital that performs multiple types of surgeries.

(C) A financial institution offering multiple types of pension plans.

(D) A transportation hub with services to multiple cities.

Ans :

(A) A center providing daycare, educational, and healthcare opportunities.

A Multi-Service Centre for older persons is a facility that provides a range of services in one place, such as daycare, educational and entertainment activities, healthcare, and companionship.

68. Which statement best describes the role of an entrepreneur in the field of support services?

(A) They work as a government employee implementing existing policies.

Adoption was institutionalized and legalized precisely because the traditional, informal system was insufficient. A formal system with legal backing and guidelines (like those from CARA) was needed to protect the rights and welfare of children in the adoption process.

- 57.** Which of the following is NOT an objective of the activities organized by Nehru Yuva Kendras?
- (A) Popularising nationally accepted objectives like secularism.
 - (B) Making youth economically productive and socially useful.
 - (C) Developing a scientific temper among rural youth.
 - (D) Providing direct financial loans for starting large industries.

Ans :

(D) Providing direct financial loans for starting large industries.

Nehru Yuva Kendras focus on development through education, training, and social service to make youth productive and aware. They do not function as banks to provide large industrial loans.

- 58.** The practice of participatory management in a community programme helps to foster a sense of:
- (A) Ownership and involvement
 - (B) Detachment and indifference
 - (C) Competition and rivalry
 - (D) Dependence and passivity

Ans :

(A) Ownership and involvement

When a community is involved in planning and managing a program intended for them, it creates a sense of ownership and deep involvement, which is a key factor in the program's long-term success and sustainability.

- 59.** A manager of a support institution needs to interact with all of the following groups EXCEPT:
- (A) The community and beneficiaries
 - (B) Government officials for legal compliance
 - (C) Internal staff and personnel
 - (D) International space research agencies

Ans :

(D) International space research agencies

A manager interacts with the community, government officials, and internal personnel as part of their regular duties. Interaction with

international space agencies is irrelevant to the management of such institutions.

- 60.** Which of the following statements accurately describe the National Service Scheme (NSS)?
- 1. It is for students who have completed their first degree.
 - 2. It involves students in social service and national development.
 - 3. The work includes activities like tree plantation and mass immunization.
 - 4. It is primarily focused on promoting adventure sports.

Which of the above statements are correct?

(A) 1 and 4 only

(B) 2 and 3 only

(C) 1, 2, and 3 only

(D) 2, 3, and 4 only

Ans :

(B) 2 and 3 only

The NSS is for college-level students (not necessarily graduates) and involves them in social service like tree plantation and immunization campaigns. The National Service Volunteer Scheme is for graduates. Promoting adventure sports is a separate government initiative.

- 61.** What kind of services are provided by Mobile Medicare Units for the elderly?
- (A) Medical care to those in rural and isolated areas.
 - (B) Financial planning and investment advice.
 - (C) Legal aid for property disputes.
 - (D) Transportation services for social events.

Ans :

(A) Medical care to those in rural and isolated areas.

Mobile Medicare Units are designed to provide medical care and health services specifically to older persons who live in rural, isolated, and backward areas and may not have easy access to hospitals.

- 62.** Which of the following pairs of an institution/ programme and its function is incorrectly matched?
- (A) Observation Home - Temporary stay for children during investigation
 - (B) Special Home - Custodial care for juvenile law violators
 - (C) Children's Home - Providing higher education scholarships

2.	Administrative Skills	b.	Interacting with the community, government officials, and internal staff.
3.	Visionary Skills	c.	The ability to initiate and establish a new organisation for a cause.
4.	Entrepreneurial Skills	d.	Having a deep commitment and a clear idea of what one wants to achieve.

- (A) 1-b, 2-a, 3-d, 4-c
 (B) 1-a, 2-b, 3-c, 4-d
 (C) 1-d, 2-c, 3-b, 4-a
 (D) 1-c, 2-d, 3-a, 4-b

Ans :

- (A) 1-b, 2-a, 3-d, 4-c

People skills relate to interaction. Administrative skills cover operational tasks like finance. Visionary skills involve having a strong commitment and goal. Entrepreneurial skills relate to the ability to start a new venture.

- 86.** All of the following are listed as specific needs of youth that require societal support EXCEPT:
 (A) Appropriate education and training
 (B) Gainful employment
 (C) Opportunities for personal development
 (D) Complete isolation from peer groups

Ans :

- (D) Complete isolation from peer groups

Youth require education, employment, and personal development opportunities. Peer interaction is a normal and important part of this life stage; complete isolation is not a need and can be detrimental.

- 87.** Why is the “holistic perspective” considered important when designing programmes for vulnerable groups?
 (A) It is cheaper to provide services all at once.
 (B) It ensures that all needs are met together for optimal impact.
 (C) It allows the programme to focus on only one specific need.
 (D) It is the only approach approved by international funding agencies.

Ans :

(B) It ensures that all needs are met together for optimal impact.

The holistic perspective stems from the philosophy that an individual’s needs are interconnected. Addressing them together (e.g., health, education, nutrition) is believed to have a more significant and lasting positive impact than tackling each need in isolation.

- 88.** In the context of the Juvenile Justice Act, what does ‘adjudication’ refer to?
 (A) The process of providing vocational training.
 (B) The act of arresting a juvenile.
 (C) The formal process of making a judgment or decision in a case.
 (D) The act of adopting a child from an institution.

Ans :

- (C) The formal process of making a judgment or decision in a case.

The text mentions a “child-friendly approach in the adjudication and disposition of matters.” Adjudication is the legal process by which a judge or magistrate reviews evidence and argumentation to come to a decision in a case.

- 89.** Which of the following is an example of a programme aimed at encouraging “Active and Productive Ageing”?
 (A) A programme that involves elderly individuals in community volunteering.
 (B) A programme providing free meals to destitute elderly.
 (C) A programme offering continuous nursing care for the terminally ill.
 (D) A programme that provides old age pensions.

Ans :

- (A) A programme that involves elderly individuals in community volunteering.

Active and Productive Ageing focuses on utilizing the experience and capacities of the elderly. Involving them in community volunteering recognizes them as a resource and keeps them engaged, which is distinct from providing basic needs like food or pensions.

- 90.** Which of the following pairs of ‘youth programme’ and its ‘primary focus’ is correctly matched?
 (A) National Service Scheme - Providing full-time jobs to graduates
 (B) Nehru Yuva Kendras - Enabling non-student rural youth in development
 (C) Scouts and Guides - Promoting adventure

- (B) They initiate and set up a new organization or programme.
- (C) They only provide financial donations to existing institutions.
- (D) They conduct academic research on social problems.

Ans :

(B) They initiate and set up a new organization or programme.

An entrepreneur in this field is someone who takes the initiative to start a new institution or programme to serve a specific needy group, which involves planning, management, and vision.

69. Which of the following are considered ‘people skills’ for a programme manager?

1. Building linkages with the community.
2. Cultivating cordial interpersonal relations within the organization.
3. Interacting with government departments for funding.

- (A) 1 only
(B) 1 and 2 only
(C) 2 and 3 only
(D) 1, 2, and 3

Ans :

(D) 1, 2, and 3

People skills involve effective interaction with all groups of people connected to the organization. This includes building rapport with the community, maintaining harmony among staff, and liaising with external bodies like the government.

70. Which of the following is an example of an open and distance learning university in India that offers programmes relevant to this career field?

- (A) Delhi University
(B) Jawaharlal Nehru University
(C) Indira Gandhi National Open University
(D) Banaras Hindu University

Ans :

(C) Indira Gandhi National Open University
The text specifically mentions the Indira Gandhi National Open University (IGNOU) as providing relevant programmes like NGO Management and Youth Development Work through its open and distance learning system.

71. Match the vulnerable group (Column I) with a key challenge they face (Column II).

	Column I		Column II
1.	Children	a.	Peer pressure and preparing for adult roles
2.	Youth	b.	Decreased physiological reserves and health issues
3.	Elderly	c.	Period of rapid development sensitive to adverse experiences

- (A) 1-c, 2-a, 3-b
(B) 1-a, 2-b, 3-c
(C) 1-b, 2-c, 3-a
(D) 1-c, 2-b, 3-a

Ans :

(A) 1-c, 2-a, 3-b

Children’s key challenge is their rapid development period. Youth face challenges like peer pressure and transition to adulthood. The elderly face challenges related to declining health and physiological reserves.

72. The government’s support for NGOs working in the social sector is an example of:

- (A) The government taking over all private organizations.
(B) A partnership approach to delivering social services.
(C) The government discouraging any private initiatives.
(D) The private sector being solely responsible for social welfare.

Ans :

(B) A partnership approach to delivering social services.

When the government provides support to NGOs, it exemplifies a partnership approach where both state and non-state actors collaborate to address social issues and deliver services to the needy.

73. What are ‘Respite Care Homes’ designed to provide?

- (A) Short-term relief for regular caregivers of seriously ill persons.
(B) Permanent housing for all elderly people.
(C) Recreational and travel services for senior citizens.
(D) Financial assistance for elderly individuals.

Ans :

(A) Short-term relief for regular caregivers of seriously ill persons.

	Column I		Column II
1.	Juvenile Justice Act	a.	1999
2.	First SOS Village in India	b.	2014
3.	National Policy for Older Persons	c.	1964
4.	National Youth Policy	d.	2000

- (A) 1-d, 2-c, 3-a, 4-b
 (B) 1-a, 2-b, 3-c, 4-d
 (C) 1-b, 2-d, 3-a, 4-c
 (D) 1-c, 2-a, 3-d, 4-b

Ans :

- (A) 1-d, 2-c, 3-a, 4-b

The Juvenile Justice Act was passed in 2000. The first SOS village in India was set up in 1964. The National Policy for Older Persons was adopted in 1999. The National Youth Policy was defined in 2014.

- 52.** The approach of providing interventions for nutrition, health, and learning together, rather than separately, is known as a:
- (A) Segmented approach
 (B) Holistic approach
 (C) Financial approach
 (D) Temporary approach

Ans :

- (B) Holistic approach

The philosophy that all needs of an individual must be met together for optimal impact is called a holistic approach. Programmes like ICDS adopt this by integrating services for health, nutrition, and education.

- 53.** According to the text, what is one reason for the high rate of maternal and infant mortality in India?
- (A) Lack of hospitals in major cities.
 (B) Less than half of all deliveries are conducted by trained attendants.
 (C) An over-reliance on traditional medicine for all ailments.
 (D) The widespread refusal of immunization by the population.

Ans :

- (B) Less than half of all deliveries are conducted by trained attendants.

A significant cause of high maternal and infant mortality and morbidity in India is that less than

half of all deliveries are attended by trained birth attendants, increasing the risk of complications.

- 54.** What is a 'destitute' person, in the context of the National Old Age Pension Scheme?
- (A) Someone who is physically disabled.
 (B) Someone who lives in a rural area.
 (C) Someone not having any regular means of subsistence.
 (D) Someone who has recently retired from a job.

Ans :

- (C) Someone not having any regular means of subsistence.

The term 'destitute' in the context of NOAPS refers to an elderly person who does not have a regular source of income, either on their own or through financial support from family members.

- 55.** Which statement accurately describes a positive feature of India's elderly population?
- (A) Most elderly individuals are financially independent due to high pensions.
 (B) The majority of people aged 60 or more are economically active.
 (C) The entire elderly population has access to high-quality healthcare.
 (D) There is no incidence of chronic illness among the elderly.

Ans :

- (B) The majority of people aged 60 or more are economically active.

A positive characteristic mentioned is that a majority of individuals aged 60 or more remain economically active, largely because they work in sectors without a mandatory retirement age. This highlights their potential as a human resource.

- 56.** Assertion (A): Adoption in India has been institutionalised and legalised.
 Reason (R): There was a need to regulate adoption beyond the family to safeguard the welfare and rights of children.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 (C) (A) is true, but (R) is false.
 (D) (A) is false, but (R) is true.

Ans :

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

- (A) Segregated service delivery
- (B) Financial management
- (C) Integrated service delivery
- (D) Legal enforcement

Ans :

(C) Integrated service delivery
By providing multiple services (health, nutrition, education) at a single point (the anganwadi), the ICDS programme exemplifies an integrated or holistic approach to early childhood development.

- 80.** A recent graduate with a degree in social work wants to gain practical experience in youth development before pursuing a master's degree. Which scheme would be most suitable for them?
- (A) National Old Age Pension Scheme
 - (B) National Service Volunteer Scheme
 - (C) SOS Children's Village adoption program
 - (D) Mobile Medicare Unit service

Ans :

(B) National Service Volunteer Scheme
The National Service Volunteer Scheme is specifically designed for students who have completed their first degree to involve themselves full-time for a year or two in national development programmes, particularly those run by Nehru Yuva Kendras. This provides direct, relevant experience.

- 81.** What percentage of India's population has access to adequate sanitation facilities according to the text?
- (A) Less than 30 per cent
 - (B) Approximately 50 per cent
 - (C) More than 75 per cent
 - (D) Nearly 90 per cent

Ans :

(A) Less than 30 per cent
The text highlights significant challenges in India, stating that less than 30 per cent of the population has access to adequate sanitation facilities. This contributes to health problems and indicates a basic need that is not being met for a large majority.

- 82.** Pervasive discrimination against girls and women is reflected in which of the following adverse indicators?
- (A) Higher enrollment in university programs
 - (B) Better nutritional and educational outcomes
 - (C) Greater participation in the organized workforce

- (D) A declining ratio of girls to boys

Ans :

(D) A declining ratio of girls to boys
Gender discrimination manifests in several negative indicators, including poor nutritional and educational outcomes for girls. A significant and concerning reflection of this is the declining sex ratio, particularly in the youngest age group.

- 83.** Which statement accurately describes the situation of malnutrition among children under five in India, as per the text?
- (A) Malnutrition is a minor issue affecting only a small fraction of children.
 - (B) Nearly two-thirds of children suffer from moderate or severe malnutrition.
 - (C) Only children living in urban areas suffer from any form of malnutrition.
 - (D) Malnutrition among children has been completely eradicated in recent years.

Ans :

(B) Nearly two-thirds of children suffer from moderate or severe malnutrition.
The text points out the severe problem of malnutrition in India, stating that nearly two-thirds of children under the age of five are affected by moderate or severe forms, which has a lasting impact on their overall development.

- 84.** According to the text, a little over one-third of all children who enroll in Standard I are able to reach which standard?
- (A) Standard VIII
 - (B) Standard V
 - (C) Standard X
 - (D) Standard XII

Ans :

(A) Standard VIII
The text highlights a high dropout rate in the Indian education system, stating that only a little over one-third of children who enroll in Standard I continue their education up to Standard VIII.

- 85.** Match the career-related skill (Column I) with its correct description (Column II).

	Column I		Column II
1.	People Skills	a.	Handling finances, recruiting personnel, and maintaining records.

‘Respite’ means a short period of rest or relief. Respite Care Homes provide temporary care for seriously ill older persons, giving their primary caregivers a much-needed break from their duties.

- 74.** Which of the following is a key objective of the Commonwealth Youth Programme?
- (A) To provide a forum for cooperation among Commonwealth countries.
 - (B) To organize the Commonwealth Games for athletes.
 - (C) To create a common currency for all Commonwealth nations.
 - (D) To establish a unified military command for member nations.

Ans :

(A) To provide a forum for cooperation among Commonwealth countries.

The Commonwealth Youth Programme aims to involve youth in their countries’ development and to provide a platform for increasing cooperation and understanding among the member nations of the Commonwealth.

- 75.** All of the following are responsibilities of a person managing a support institution EXCEPT:
- (A) Handling finances and recruiting personnel.
 - (B) Ensuring harmonious relationships among people in the organisation.
 - (C) Ensuring the institution makes a substantial financial profit each year.
 - (D) Building linkages with the community and government.

Ans :

(C) Ensuring the institution makes a substantial financial profit each year.

Management responsibilities include administration, people management, and community linkage. For most social support institutions, the primary goal is service delivery and social welfare, not generating substantial financial profit.

- 76.** Consider the reasons why youth are considered a vulnerable group.
1. They are coming to terms with biological changes.
 2. They are preparing for adult roles like marriage and livelihood.
 3. They face peer pressure and intense competition.
 4. They possess complete knowledge and power to make all life choices.

Which of the above statements are correct?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 3, and 4 only
- (D) 1, 2, and 3 only

Ans :

- (D) 1, 2, and 3 only

Youth are vulnerable due to biological changes, the transition to adult roles, and peer pressure. The text explicitly states they often lack the knowledge and power to make informed choices, making statement 4 incorrect.

- 77.** Assertion (A): The number of ‘older-old’ persons (above 80 years) in India is increasing.
Reason (R): Life expectancy in India has steadily increased since 1947.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The increase in life expectancy is the direct demographic reason for the rise in the overall population of older persons, including the ‘older-old’ category. As people live longer, the number of individuals reaching very old age naturally increases.

- 78.** Under the Juvenile Justice Act, 2000, which category of child would a trafficked minor rescued from a red-light area fall into?
- (A) A child in conflict with law.
 - (B) A child in need of care and protection.
 - (C) A child eligible for the National Service Scheme.
 - (D) A child who requires a Special Home.

Ans :

- (B) A child in need of care and protection.

The Act lists trafficked minors rescued from exploitation as children “in need of care and protection” as they are victims who have been abused for unconscionable gain and require state support and rehabilitation.

- 79.** The philosophy of ICDS to provide supplementary feeding, immunization, and pre-school education together at an Anganwadi demonstrates the principle of:

- sports like mountaineering
(D) Promotion of Adventure - Training for national-level political leadership

Ans :

(B) Nehru Yuva Kendras - Enabling non-student rural youth in development
Nehru Yuva Kendras are specifically aimed at involving non-student youth in rural areas in development activities. The other pairs are mismatched with their primary objectives as described in the text.

- 91.** Assertion (A): The private sector is increasingly supporting innovative social programmes.
Reason (R): This engagement is seen as an opportunity for the private sector to discharge its social responsibilities.
(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(C) (A) is true, but (R) is false.
(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
The text states that the private sector's support for social programmes is a positive step, explicitly linking this to the opportunity for companies to fulfill their social responsibilities.

- 92.** A manager of a Children's Home needs to justify her budget for buying new play equipment. Which concept best supports her request?
(A) Children are vulnerable and adverse experiences have a lasting impact.
(B) Children should be prepared for adult roles B a very young age.
(C) The Juvenile Justice Act mandates specific types of play equipment.
(D) Play and stimulation are crucial for a child's holistic development.

Ans :

(D) Play and stimulation are crucial for a child's holistic development.
The need for play equipment is best justified by the developmental principle that play is not just for fun but is a critical component of a child's holistic development, fostering growth in all domains—physical, cognitive, social, and emotional.

- 93.** What is a key reason for the vulnerability of rural and tribal youth?
(A) They have better access to education and employment than urban youth.
(B) They are generally more exposed to positive peer influences.
(C) They often face limited opportunities for quality education and jobs.
(D) They are not affected by biological and emotional changes.

Ans :

(C) They often face limited opportunities for quality education and jobs.
Rural and tribal youth are considered a vulnerable subgroup primarily because they often have limited access to essential resources like quality education and gainful employment, which hinders their development and economic productivity.

- 94.** Consider the following statements about services for the elderly in India.
1. Mobile Medicare Units primarily serve elderly in urban hospitals.
2. Day Care Centres for Dementia patients provide specialized care.
3. Help-lines and counseling centres for older persons are available.
4. The National Old Age Pension Scheme is available to all citizens above 60.
Which of the above statements are correct?
(A) 1 and 4 only
(B) 2 and 3 only
(C) 1, 2 and 3 only
(D) 2, 3 and 4 only

Ans :

(B) 2 and 3 only
Mobile Medicare Units serve rural/isolated areas. NOAPS is for the destitute above 65, not all citizens above 60. Day Care Centres for Dementia and help-lines are correctly described as available services.

- 95.** Why is it important for the manager of a support institution to interact with government departments?
(A) To lobby for political positions for the beneficiaries.
(B) To sell products manufactured by the institution.
(C) For purposes like funding and fulfilling legal requirements.
(D) To get daily updates on changes in government

policies.

Ans :

(C) For purposes like funding and fulfilling legal requirements.

Interaction with government departments is a practical necessity for managing an institution. This is often required for securing government funding, grants, and ensuring the organization complies with all legal and regulatory mandates.

- 96.** Which of the following is NOT a career avenue mentioned in the scope of managing support services?
- (A) Setting up your own institution for a target group.
(B) Being a manager in an established programme.
(C) Being a researcher evaluating existing programmes.
(D) Working as a corporate lawyer in a multinational company.

Ans :

(D) Working as a corporate lawyer in a multinational company.

The career avenues mentioned are directly related to the social service sector, such as starting an institution, managing one, or being a researcher in the field. A corporate lawyer is a profession in a different field.

- 97.** Match the programme/initiative (Column I) with its main objective (Column II).

	Column I		Column II
1.	Promotion of Adventure	a.	To enable non-student rural youth to contribute to development.
2.	Scouts and Guides	b.	To develop character and inculcate a spirit of loyalty and patriotism.
3.	Nehru Yuva Kendras	c.	To encourage risk-taking, teamwork, and endurance.
4.	National Service Scheme	d.	To involve college students in programmes of social service.

- (A) 1-b, 2-c, 3-d, 4-a
(B) 1-c, 2-b, 3-a, 4-d
(C) 1-d, 2-a, 3-b, 4-c
(D) 1-a, 2-d, 3-c, 4-b

Ans :

(B) 1-c, 2-b, 3-a, 4-d

Promotion of Adventure aims to build qualities like risk-taking. Scouts and Guides focuses on character development. Nehru Yuva Kendras target non-student rural youth. The NSS involves college students in social service.

- 98.** Which statement accurately describes one of the roles of a manager within a support organization?
- (A) To cultivate cordial interpersonal relations for smooth functioning.
(B) To personally provide all the direct care to every beneficiary.
(C) To avoid all contact with the families of the beneficiaries.
(D) To focus solely on financial matters, ignoring personnel issues.

Ans :

(A) To cultivate cordial interpersonal relations for smooth functioning.

A key aspect of a manager's role is ensuring the smooth functioning of the organization. This heavily relies on cultivating harmonious and cordial interpersonal relationships among all people involved, including staff and beneficiaries.

- 99.** What is the purpose of "Sensitising programmes for children, particularly in Schools and Colleges" in the context of the elderly?
- (A) To teach children how to manage finances for their grandparents.
(B) To encourage children to pursue careers in geriatric medicine.
(C) To promote intergenerational bonding and respect for the elderly.
(D) To recruit school children as caregivers in old age homes.

Ans :

(C) To promote intergenerational bonding and respect for the elderly.

Such sensitizing programmes are designed to foster understanding, empathy, and respect between generations. They aim to strengthen the bond between children/youth and older persons, creating a more supportive social environment.

- 100.** What is the main drawback of a family being unable to access support services provided by society?
- (A) The government loses potential tax revenue.
(B) The support services become overcrowded.

- (C) The family becomes too independent and self-reliant.
- (D) The family members' needs for optimal growth may not be met.

Ans :

(D) The family members' needs for optimal growth may not be met.

When families, due to reasons like poverty, cannot access necessary support services like healthcare or education, their members' developmental needs may go unfulfilled, preventing them from reaching their full potential.

- 101.** What is 'substance abuse' as mentioned in the context of youth vulnerability?
- (A) Misusing funds allocated for a project.
- (B) The harmful use of alcohol and drugs.
- (C) The excessive consumption of junk food.
- (D) The overuse of social media platforms.

Ans :

(B) The harmful use of alcohol and drugs.

Substance abuse refers to the maladaptive and harmful consumption of substances like alcohol and drugs. The text mentions this as a rising issue among some adolescents trying to combat stress.

- 102.** Which two countries have the largest number of Senior Citizens in the world?
- (A) India and USA
- (B) China and Russia
- (C) India and China
- (D) USA and Japan

Ans :

(C) India and China

The text explicitly states that India is home to the second largest number of Senior Citizens in the world, after China, highlighting the significant demographic shift in these countries.

- 103.** Assertion (A): The services of an 'anganwadi' are delivered in an integrated manner.
- Reason (R): The programme aims to meet the health, nutrition, and early learning needs of children holistically.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The anganwadi delivers services in an integrated manner precisely because the ICDS programme's core philosophy is to address the multiple, interconnected needs of a child (health, nutrition, education) in a holistic way for maximum impact.

- 104.** A community observes that many elderly residents with arthritis struggle to get to the local clinic. Which type of service would be most effective in addressing this specific problem?
- (A) A physiotherapy clinic for older persons.
- (B) A helpline and counseling centre.
- (C) A programme to strengthen intergenerational bonds.
- (D) An old age home with residential facilities.

Ans :

(A) A physiotherapy clinic for older persons.

For elderly individuals suffering from arthritis and loss of mobility, a dedicated physiotherapy clinic would directly address their physical health needs, helping them manage their condition and improve their mobility.

- 105.** Which of the following is NOT a stated vision of the SOS Children's Villages?
- (A) To provide family-based, long-term care to children.
- (B) To help children recover from traumatic experiences.
- (C) To integrate the 'village' with the local community.
- (D) To provide temporary shelter only during natural disasters.

Ans :

(D) To provide temporary shelter only during natural disasters.

While SOS Villages may provide emergency relief, their core mission is to provide family-based, long-term care. Their facilities created after disasters are usually converted into permanent villages, not just temporary shelters.

- 106.** What is the first legal framework for juvenile justice in India mentioned in the text?
- (A) The Child Labour (Prohibition and Regulation) Act, 1986
- (B) The Right to Education Act, 2009
- (C) The Juvenile Justice (Care and Protection of Children) Act, 2000
- (D) The Protection of Children from Sexual

continuous nursing care that cannot be provided in a regular old age home or by their families.

- 118.** Assertion (A): The composition of a family varies at different stages of its life cycle.
Reason (R): A family's primary function is to look after the needs of its members, which include children, parents, and sometimes grandparents.
(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(C) (A) is true, but (R) is false.
(D) (A) is false, but (R) is true.

Ans :

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
Both statements are true facts about a family. However, the reason (R) explains the function of a family, not why its composition changes over time (which is due to births, deaths, children growing up and moving out, etc.). Therefore, (R) is not the correct explanation for (A).

- 119.** A manager of a youth program notices that many participants are dropping out due to pressure from their families to start earning money. To address this, the manager should consider integrating which component into the program?
(A) More recreational activities
(B) Stricter attendance policies
(C) Vocational training and employment linkage
(D) Advanced academic courses

Ans :

(C) Vocational training and employment linkage
The root cause of the problem is the need for employment. Integrating vocational training and connecting youth with job opportunities would directly address this pressure, making the program more relevant and valuable to them and their families, thus improving retention.

- 120.** Which of the following pairs is incorrectly matched?
(A) Youth with disabilities - Vulnerable Group
(B) Victims of trafficking - Vulnerable Group
(C) Female adolescents - Vulnerable Group
(D) Youth in high-paying jobs - Vulnerable Group

Ans :

(D) Youth in high-paying jobs - Vulnerable Group
Youth with disabilities, victims of trafficking, and female adolescents are all identified as especially

vulnerable groups. Youth who have secured high-paying jobs are generally considered to be in a stable, not vulnerable, position.

- 121.** Which policy did the Ministry of Youth Affairs and Sports adopt in 2003?
(A) The National Education Policy
(B) The National Health Policy
(C) The National Youth Policy
(D) The National Sports Policy

Ans :

(C) The National Youth Policy
The text states that the Ministry of Youth Affairs and Sports adopted the National Youth Policy in 2003, which laid the framework for youth development in the country.

- 122.** The fact that the government supports institutions run by NGOs for vulnerable groups indicates a recognition that:
(A) The government alone cannot meet all the needs of the population.
(B) NGOs are more profitable than government institutions.
(C) The government intends to phase out all its own social programs.
(D) NGOs are mandated by law to take over all social services.

Ans :

(A) The government alone cannot meet all the needs of the population.
The government's support for the NGO sector signifies an understanding that the scale of social challenges is vast. It promotes a collaborative approach where both government and non-government entities work together to meet the needs of citizens.

- 123.** The Juvenile Justice Act, 2000, provides for all of the following EXCEPT:
(A) A framework for the protection and treatment of children.
(B) A child-friendly approach in the adjudication of matters.
(C) Punishment for children with the same severity as for adults.
(D) Rehabilitation of children in need of care and protection.

Ans :

(C) Punishment for children with the same severity as for adults.

4.	Having a strong commitment to a cause	d.	People Skill
----	---------------------------------------	----	--------------

- (A) 1-d, 2-a, 3-b, 4-c
 (B) 1-a, 2-d, 3-c, 4-b
 (C) 1-b, 2-c, 3-a, 4-d
 (D) 1-c, 2-b, 3-d, 4-a

Ans :

- (A) 1-d, 2-a, 3-b, 4-c

Interacting with leaders requires people skills. Handling finances is an administrative skill. Setting up a new institution is an entrepreneurial skill. Having a strong commitment is a visionary skill.

- 113.** Which Certificate Programme offered by IGNOU is mentioned as being relevant for a career in managing support institutions?

- (A) Certificate in Information Technology
 (B) Certificate in Tourism Studies
 (C) Certificate in Food and Nutrition
 (D) Certificate in NGO Management

Ans :

- (D) Certificate in NGO Management

The text specifically highlights the Certificate Programme in NGO Management and the Diploma in Youth Development Work offered by IGNOU as relevant distance learning courses for this career path.

- 114.** The purpose of the role-play practical about a large joint family is to:

- (A) Teach students acting and scriptwriting skills.
 (B) Help students understand intergenerational dynamics and the role of the elderly.
 (C) Encourage students to live in joint families.
 (D) Demonstrate the financial benefits of a joint family system.

Ans :

- (B) Help students understand intergenerational dynamics and the role of the elderly.

The practical's purpose is to use role-play as a technique to communicate the complex dynamics within a family, helping students understand the needs and place of members of every age group, especially the elderly.

- 115.** Which of the following best describes the 'out-of-school youth' category?

- (A) Youth who are on vacation from school.
 (B) Youth who attend school but are not

interested in studies.

- (C) Youth who are not enrolled in any formal educational institution.
 (D) Youth who have graduated and are pursuing higher studies.

Ans :

- (C) Youth who are not enrolled in any formal educational institution.

'Out-of-school youth' refers to young people who are not currently part of the formal education system. They are considered a vulnerable group due to limited opportunities for skill development and employment.

- 116.** Consider the following statements about the challenges faced by children in India.

- Nearly all children between 6 and 14 years go to school.
- About 3 million children are estimated to live on the streets.
- Child labour is completely non-existent as per official estimates.
- Only one in three pre-school age children has access to early learning.

Which of the above statements are correct?

- (A) 2 and 4 only
 (B) 1 and 3 only
 (C) 1, 2, and 4 only
 (D) 2, 3, and 4 only

Ans :

- (A) 2 and 4 only

The text states that less than half of children (6-14 years) go to school (making 1 incorrect) and that 17 million children work (making 3 incorrect). The statements about street children and access to early learning are presented as correct facts.

- 117.** What is the primary service provided by Respite Care Homes and Continuous Care Homes?

- (A) Daycare for healthy and active elderly.
 (B) Financial support for elderly living with families.
 (C) Vocational training for the elderly to re-enter the workforce.
 (D) Care for seriously ill older persons requiring continuous nursing.

Ans :

- (D) Care for seriously ill older persons requiring continuous nursing.

These specialized homes are meant for older persons who are seriously ill and need a level of

Ans :

(C) The Juvenile Justice (Care and Protection of Children) Act, 2000

The text specifically identifies the Juvenile Justice (Care and Protection of Children) Act, 2000, as the first legal framework established for juvenile justice in the country.

- 107.** What are the three kinds of homes for children mentioned under the government's care system?

1. Observation Homes
2. Special Homes
3. Juvenile/Children's Homes

- (A) 1 only
(B) 1 and 2 only
(C) 2 and 3 only
(D) 1, 2, and 3

Ans :

- (D) 1, 2, and 3

The text describes the government's system as comprising three distinct types of homes: Observation Homes for temporary stay, Special Homes for juveniles who have violated the law, and Juvenile/Children's Homes for long-term care.

- 108.** The establishment of Central Adoption Resource Authority (CARA) reflects a shift from:

- (A) Informal social/religious practices to an institutionalised, legal framework.
(B) Formal, legal adoption to informal family arrangements.
(C) Institutional care to foster care systems.
(D) International adoption to purely domestic adoption.

Ans :

(A) Informal social/religious practices to an institutionalised, legal framework.

The creation of CARA and the legalisation of adoption signify a move away from traditional, informal adoptions within the family towards a formal, regulated system with legal guidelines to protect children's rights.

- 109.** The age group of 13-19 years is specifically referred to as:

- (A) Youth
(B) Young adults
(C) Adolescents
(D) Toddlers

Ans :

(C) Adolescents

While the broader 'youth' category is 15-29 years, the text specifies that those between the ages of 13 and 19 are referred to as adolescents.

- 110.** An NGO plans to organize a camp to teach rural non-student youth about a new farming technique. Which government organization would be the most appropriate partner for this initiative?

- (A) National Service Scheme (NSS)
(B) SOS Children's Villages
(C) Central Adoption Resource Authority (CARA)
(D) Nehru Yuva Kendras (NYK)

Ans :

(D) Nehru Yuva Kendras (NYK)

Nehru Yuva Kendras are specifically aimed at enabling non-student youth in rural areas to contribute to development and acquire new skills, making them the ideal government partner for such a program.

- 111.** All of the following are listed as challenges faced by the elderly in India EXCEPT:

- (A) Lack of access to healthcare in rural areas.
(B) Feelings of loneliness and isolation.
(C) Having too much leisure time with no responsibilities.
(D) Financial dependency on the younger generation.

Ans :

(C) Having too much leisure time with no responsibilities.

The text details the challenges of healthcare access, loneliness, and financial dependency. It does not frame having leisure time as a problem; in fact, it highlights the need for active and productive aging.

- 112.** Match the career activity (Column I) with the type of skill it primarily requires (Column II).

	Column I		Column II
1.	Interacting with community leaders	a.	Administrative Skill
2.	Handling finances and records	b.	Entrepreneurial Skill
3.	Setting up a new institution	c.	Visionary Skill

A core principle of the Juvenile Justice Act is its “special approach” and “child-friendly” nature. It aims for treatment and rehabilitation, not for punishing children with the same harshness as the adult justice system.

- 124.** Match the institution (Column I) with its defining characteristic (Column II).

	Column I		Column II
1.	Observation Home	a.	Family-based, long-term care by a ‘mother’.
2.	Special Home	b.	Custodial care for law-violating juveniles.
3.	Anganwadi	c.	Temporary stay during an investigation.
4.	SOS Village	d.	Integrated services for health, nutrition, and pre-school education.

- (A) 1-d, 2-a, 3-b, 4-c
 (B) 1-b, 2-d, 3-a, 4-c
 (C) 1-a, 2-c, 3-b, 4-d
 (D) 1-c, 2-b, 3-d, 4-a

Ans :

- (D) 1-c, 2-b, 3-d, 4-a

An Observation Home is for temporary stay. A Special Home is for juveniles who have violated the law. An Anganwadi provides integrated services. An SOS Village is characterized by its family-based care model with an SOS mother.

- 125.** The lack of which nutrient in salt adversely affects the mental and physical growth of a child?
 (A) Iodine
 (B) Iron
 (C) Calcium
 (D) Vitamin D

Ans :

- (A) Iodine

The text mentions that less than half of the country’s households consume iodised salt and that a lack of iodine has adverse effects on a child’s mental and physical growth.

- 126.** A social worker finds an 8-year-old child living on the street with no family and no means of sustenance. Under the JJ Act, this child would be classified as:
 (A) A juvenile delinquent
 (B) A child in need of care and protection
 (C) A child eligible for adoption only

- (D) A young offender

Ans :

- (B) A child in need of care and protection

The JJ Act defines children “in need of care and protection” as those without any home or means of sustenance. A street child with no family fits this definition perfectly, making them eligible for state support and protection.

- 127.** The main purpose of providing awareness generation programmes for caregivers of the elderly is to:
 (A) Pay them a salary for their work.
 (B) Help them find alternative employment opportunities.
 (C) Teach them how to manage the finances of the elderly person.
 (D) Provide them with information on self-care, health, and disease management.

Ans :

- (D) Provide them with information on self-care, health, and disease management.

These awareness programmes are educational in nature, designed to equip caregivers with the knowledge they need to provide better care. This includes understanding preventive health, managing diseases, and even taking care of their own well-being.

- 128.** An institution that provides food, care, and shelter for elderly individuals who cannot live on their own is known as a(n):
 (A) Old Age Home
 (B) Day Care Centre
 (C) Multi-Service Centre
 (D) Physiotherapy Clinic

Ans :

- (A) Old Age Home

An Old Age Home is a residential facility specifically designed to provide the basic needs of food, care, and shelter for older persons who require such support.

- 129.** Which youth programme in India aims to develop character by inculcating a spirit of loyalty, patriotism, and thoughtfulness?
 (A) Nehru Yuva Kendras
 (B) National Service Scheme
 (C) Scouts and Guides
 (D) Commonwealth Youth Programme

Ans :

- 141.** The need for a “child-friendly approach” in the juvenile justice system implies that the system should:
- (A) Treat children exactly like adult criminals.
 - (B) Prioritize punishment over rehabilitation.
 - (C) Be managed entirely by child psychologists.
 - (D) Consider the child’s developmental needs and best interests.

Ans :

(D) Consider the child’s developmental needs and best interests.

A “child-friendly approach” means that the justice system adapts its processes to be non-intimidating and focuses on the child’s well-being, catering to their developmental needs and prioritizing their ultimate rehabilitation over punitive measures.

- 142.** What is the primary purpose of a “Helpline” for older persons?
- (A) To provide transportation services.
 - (B) To deliver meals to their homes.
 - (C) To offer immediate counseling and assistance over the phone.
 - (D) To organize social gatherings and events.

Ans :

(C) To offer immediate counseling and assistance over the phone.

A helpline is a telephone service that provides immediate support, information, and counseling to individuals in need, offering a direct and accessible point of contact for older persons facing various issues.

- 143.** Which of the following statements about the ICDS programme is incorrect?
- (A) It is the world’s largest early childhood programme.
 - (B) It offers health and hygiene education to mothers.
 - (C) It provides supplementary feeding for children below six years.
 - (D) It is exclusively managed by private NGOs without government support.

Ans :

(D) It is exclusively managed by private NGOs without government support.

The Integrated Child Development Services (ICDS) is a flagship programme of the Government of India. It is not exclusively managed by NGOs; it is a government-run initiative.

- 144.** Which of the following are key characteristics of Observation Homes?
- 1. They are for children who have been found guilty of a crime.
 - 2. The stay is temporary.
 - 3. The purpose is to complete an investigation.
- (A) 1 only
 - (B) 2 only
 - (C) 2 and 3 only
 - (D) 1, 2 and 3

Ans :

(C) 2 and 3 only

Observation Homes are for temporary stay while an investigation into the child’s background is completed. Children found guilty are placed in Special Homes, not Observation Homes.

- 145.** The National Youth Policy of 2014 categorizes youth with disabilities as:
- (A) A privileged group
 - (B) An especially vulnerable group
 - (C) A group not requiring any special attention
 - (D) A group to be excluded from youth programs

Ans :

(B) An especially vulnerable group

The text explicitly lists “Youth with disabilities” as one of the subgroups within the youth population that is considered especially vulnerable and in need of targeted support.

- 146.** Match the social challenge (Column I) with the related vulnerable group (Column II).

	Column I		Column II
1.	Substance abuse to combat stress	a.	Children
2.	Malnutrition affecting development	b.	Elderly
3.	Loneliness due to family fragmentation	c.	Youth

- (A) 1-c, 2-a, 3-b
- (B) 1-a, 2-b, 3-c
- (C) 1-b, 2-c, 3-a
- (D) 1-a, 2-c, 3-b

Ans :

(A) 1-c, 2-a, 3-b

Substance abuse is mentioned as a key challenge for youth. Malnutrition has a profound impact on the development of children. Loneliness due to

between different age groups, such as youth and senior citizens.

- 135.** One of the unique features of the SOS Children's Village is that in each SOS home there is a:
- (A) 'Teacher'
 - (B) 'Manager'
 - (C) 'Doctor'
 - (D) 'Mother'

Ans :

(D) 'Mother'

The SOS family model is built around an "SOS mother" who lives with and looks after a group of 10-15 children, creating a family-like environment that is central to the organization's approach.

- 136.** The training for a career in managing support institutions should equip a person with all the following skills EXCEPT:
- (A) The ability of a planner and manager.
 - (B) Strong knowledge of the target group's needs.
 - (C) Skills in advanced surgical procedures.
 - (D) The ability of an evaluator and entrepreneur.

Ans :

(C) Skills in advanced surgical procedures.
Managing a support institution requires planning, management, evaluation, and knowledge of the target group. Advanced surgical skills are highly specialized medical skills and are not a requirement for this management-oriented career path.

- 137.** An 'Observation Home' under the Juvenile Justice system is a place where:
- (A) Juveniles serve long-term sentences for their crimes.
 - (B) Children stay temporarily during an investigation.
 - (C) Elderly people are observed for health issues.
 - (D) Children are observed for academic potential.

Ans :

(B) Children stay temporarily during an investigation.

An Observation Home is a short-term facility where children stay while authorities conduct investigations, such as tracing their families or gathering background information, before a final decision is made about their care.

- 138.** Which of the following pairs is correctly matched?
- (A) National Youth Policy (2014) - Defines youth as 18-35 years

- (B) National Policy for Older Persons (1999) - Focuses on youth employment
- (C) ICDS Programme - Provides residential care for the elderly
- (D) Juvenile Justice Act (2000) - Concerns children in conflict with law

Ans :

(D) Juvenile Justice Act (2000) - Concerns children in conflict with law

The Juvenile Justice Act of 2000 specifically deals with children in conflict with law and those in need of care. The other pairs have incorrect information regarding the age definition, focus, or target group.

- 139.** An entrepreneur wants to start an initiative that helps the elderly feel valued and useful. Which of the following ideas aligns best with the principle of "Active and Productive Ageing"?

- (A) A programme where elderly persons mentor young students.
- (B) A service that delivers pre-cooked meals to their homes.
- (C) A clinic that provides free medical check-ups.
- (D) A service that provides full-time nursing care at home.

Ans :

(A) A programme where elderly persons mentor young students.

Active and Productive Ageing recognizes the elderly as a valuable human resource. A mentorship programme utilizes their rich experience and residual capacities for the benefit of national development, keeping them actively engaged.

- 140.** According to the text, which of the following is NOT a cause of vulnerability for the elderly?

- (A) Decreased physiological reserves
- (B) Fragmentation of the traditional family network
- (C) A high rate of economic activity in sectors without a retirement age
- (D) Disabilities such as low vision from cataracts

Ans :

(C) A high rate of economic activity in sectors without a retirement age

The text lists declining health, family fragmentation, and disabilities as causes of vulnerability. A high rate of economic activity is mentioned as a positive feature, not a cause of vulnerability.

work.

Which of the above statements are correct?

- (A) 1 and 4 only
- (B) 2 and 3 only
- (C) 1, 2, and 3 only
- (D) All of the above

Ans :

- (C) 1, 2, and 3 only

Physiotherapy clinics, specialized day care centres, and mobile medicare units are all listed as programmes specifically for the elderly. The National Service Scheme (NSS) is a programme for college-level youth, not the elderly.

- 153.** What life expectancy figures for males and females in India for 2009-13 are cited in the text?
- (A) 69.3 years for females and 65.8 years for males.
 - (B) 60.1 years for females and 58.5 years for males.
 - (C) 65.2 years for females and 62.3 years for males.
 - (D) 72.5 years for females and 70.1 years for males.

Ans :

- (A) 69.3 years for females and 65.8 years for males.

The text states that life expectancy in India has increased significantly, reaching 69.3 years for females and 65.8 years for males during the period of 2009-13.

- 154.** The provision of services for children, youth, and elderly by the government and NGOs reflects the society's commitment to:
- (A) Ensuring economic equality for all citizens.
 - (B) Providing a decent life and opportunities for all its members.
 - (C) Controlling the population growth rate.
 - (D) Promoting a single, uniform culture across the nation.

Ans :

- (B) Providing a decent life and opportunities for all its members.

The establishment of these support services is a direct expression of the government and society's responsibility to care for its citizens, especially the vulnerable, ensuring they can lead a decent life and have opportunities for development.

- 155.** A person with a diploma in Youth Development Work would be best suited for a job in which of the following organizations?

- (A) An Old Age Home
- (B) A Crèche for infants
- (C) A Children's Adoption Agency
- (D) A Nehru Yuva Kendra

Ans :

- (D) A Nehru Yuva Kendra

A diploma in Youth Development Work provides specialized training for working with youth. Nehru Yuva Kendras are government organizations focused on youth development, making this the most suitable place of employment.

- 156.** Which statement best describes the purpose of 'Special Homes' in the juvenile justice system?
- (A) They are for the temporary observation of all children.
 - (B) They provide long-term family-based care like SOS villages.
 - (C) They provide custodial care for juveniles found guilty of violating the law.
 - (D) They are specialized schools for gifted children.

Ans :

- (C) They provide custodial care for juveniles found guilty of violating the law.

Special Homes are specifically designated institutions for the custodial care, treatment, and rehabilitation of juveniles (children under 18) who have been found by the justice system to have violated a law.

- 157.** A key vulnerability of youth is the pressure to excel in an increasingly _____ world.
- (A) cooperative
 - (B) competitive
 - (C) isolated
 - (D) simple

Ans :

- (B) competitive

The text explicitly mentions that "peer pressure and pressure to excel in an increasingly competitive world are other factors that can cause a lot of stress and turmoil" for youth.

- 158.** The National Service Scheme (NSS) involves students in which of the following activities?
1. Construction and repair of roads.
 2. Tree plantation and removal of weeds.
 3. Mass immunisation and child-care.

changing family structures is a significant issue for the elderly.

- 147.** The role of a manager in recruiting personnel for a support institution requires them to:
- (A) Hire only their family members and friends.
 - (B) Look for staff with the specific skills needed to run the program.
 - (C) Hire the least expensive staff regardless of qualification.
 - (D) Avoid recruiting anyone and do all the work themselves.

Ans :

(B) Look for staff with the specific skills needed to run the program.

Effective management involves recruiting personnel who have the appropriate skills and knowledge base to handle the various aspects of the programme, ensuring that quality services are delivered to the beneficiaries.

- 148.** According to the text, what is the age group for beneficiaries of the National Old Age Pension Scheme (NOAPS)?
- (A) 55 years and above
 - (B) 60 years and above
 - (C) 70 years and above
 - (D) 65 years and above

Ans :

(D) 65 years and above

The text specifies that beneficiaries of the NOAPS should be above 65 years of age and meet the criterion of being destitute.

- 149.** Assertion (A): It is important to have a broad knowledge base and multiple skills to manage support institutions.
Reason (R): The role involves being a planner, manager, evaluator, and sometimes an entrepreneur, while also understanding the target group's needs.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion that a broad knowledge base is needed is directly explained by the multifaceted

nature of the role described in the reason. A manager must wear many hats—planner, manager, etc.—which requires diverse skills and knowledge.

- 150.** To promote 'intergenerational bonding', a community centre should organize which of the following activities?
- (A) A chess tournament exclusively for senior citizens.
 - (B) A video game competition exclusively for youth.
 - (C) A storytelling session where elderly members share stories with children.
 - (D) A career counseling workshop for high school students.

Ans :

(C) A storytelling session where elderly members share stories with children.

Intergenerational bonding requires interaction between different age groups. A storytelling session involving both elderly members and children is a perfect example of an activity that fosters connection and understanding between these generations.

- 151.** Which of the following pairs is incorrectly matched?
- (A) ICDS - Aims for holistic development of children
 - (B) SOS Children's Village - Pioneered a family approach for child care
 - (C) CARA - Sets guidelines for child adoption
 - (D) Observation Homes - Long-term custodial care for juveniles

Ans :

(D) Observation Homes - Long-term custodial care for juveniles

Observation homes are for temporary stay during investigation. Long-term custodial care for juveniles who have violated the law is provided in Special Homes.

- 152.** Which of the following are mentioned as programmes or services available for the elderly in India?
1. Physiotherapy clinics for older persons.
 2. Day Care Centres for Alzheimer's/Dementia patients.
 3. Mobile Medicare Units for rural and isolated areas.
 4. The National Service Scheme for volunteer

(C) Scouts and Guides

The text explicitly states that the Scouts and Guides programme aims to develop the character of boys and girls to make them good citizens by inculcating values like loyalty, patriotism, and thoughtfulness for others.

130. Which statement accurately reflects a key issue regarding youth health mentioned in the text?

- (A) Youth have no health concerns due to their age.
- (B) All youth have complete knowledge about reproductive health.
- (C) Substance abuse is not a health concern for youth.
- (D) Youth face significant risks related to sexual and reproductive health.

Ans :

(D) Youth face significant risks related to sexual and reproductive health.

The text clearly identifies that youth face significant risks related to sexual and reproductive health, often compounded by a lack of knowledge and power to make informed decisions.

131. A person planning to start an institution for the elderly must consider the following aspects:

1. The appropriate location for the target beneficiaries.
2. The combination of services to be provided.
3. The recruitment of staff with the right skills.
4. The legal formalities of registering the organization.

Which of the above aspects are essential?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 2, and 3 only
- (D) 1, 2, 3, and 4

Ans :

(D) 1, 2, 3, and 4

Starting an institution is a complex enterprise that requires careful planning in all these areas. The manager or entrepreneur must consider the location, the services offered, the staff required, and the legal formalities to ensure the institution is viable and effective.

132. Assertion (A): The National Service Scheme (NSS) helps in the implementation of various relief and rehabilitation programmes.

Reason (R): NSS students render assistance to local authorities to meet the needs of economically

and socially weaker sections of the community.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion that NSS aids in relief programmes is directly explained by the reason that its student volunteers assist local authorities in this work, specifically targeting weaker sections of the community.

133. A remote village has a high number of elderly people with cataracts leading to low vision. Which service would be the most direct and beneficial intervention?

- (A) A program on 'Active and Productive Ageing'
- (B) A health program focused on cataract screening and surgery camps
- (C) A physiotherapy clinic for mobility issues
- (D) A day care centre for dementia patients

Ans :

(B) A health program focused on cataract screening and surgery camps

The text identifies cataracts as a common cause of low vision and blindness in the elderly. A direct intervention involving screening and surgical camps would most effectively address this specific health problem in the community.

134. The term 'intergenerational relationships' in the context of support programmes refers to building bonds between:

- (A) People of the same age group.
- (B) People from different socio-economic backgrounds.
- (C) People from different generations, like children and the elderly.
- (D) People working in different government departments.

Ans :

(C) People from different generations, like children and the elderly.

'Intergenerational' literally means 'between generations'. Programmes focusing on this aim to strengthen relationships and understanding

- (A) 1 only
- (B) 1 and 2 only
- (C) 2 and 3 only
- (D) 1, 2, and 3

Ans :

- (D) 1, 2, and 3

The text provides a comprehensive list of NSS activities, which include national development work like road construction, environmental improvement like tree plantation, and social services like assisting in mass immunization and child-care.

- 159.** Why is having a ‘vision’ considered a critical attribute for an entrepreneur starting a social institution?
- (A) It serves as a strong source of commitment and passion for the cause.
 - (B) It helps in getting government approvals quickly.
 - (C) It guarantees immediate financial success and profitability.
 - (D) It is a legal requirement for registering any new organization.

Ans :

- (A) It serves as a strong source of commitment and passion for the cause.

A vision provides the driving force for an entrepreneur. A person with a clear vision is deeply committed and has a strong passion for their cause, which helps them overcome the numerous challenges involved in establishing and running a social institution.

- 160.** What is the main purpose of “participatory planning, management, and implementation” in community programmes?
- (A) To ensure that the manager has complete control over all decisions.
 - (B) To reduce the cost of the programme by avoiding professional input.
 - (C) To create a sense of community involvement and ownership.
 - (D) To fulfill a mandatory requirement set by foreign donors.

Ans :

- (C) To create a sense of community involvement and ownership.

The participatory approach involves the beneficiaries in all stages of the programme. This is done to ensure the programme is relevant to

their needs and, most importantly, to foster a sense of ownership and involvement, which are key to its success.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

An NGO establishes a multi-service center for the elderly in an urban neighborhood. The center aims to address the various challenges faced by senior citizens, many of whom live alone and experience loneliness and health issues. The manager of the center, Ms. Das, has designed a program that offers a wide range of services. It functions as a day care center where elderly persons can find companionship and participate in recreational activities like board games, yoga, and music sessions. A mobile medicare unit visits the center twice a week to provide basic health check-ups and distribute common medicines. The center also runs a helpline and counseling service to provide emotional support to those who are feeling isolated or distressed. Furthermore, Ms. Das organizes awareness programs on topics like preventive health care and financial planning for old age. Her goal is to create a conducive and sensitive social milieu that addresses the economic, health, and emotional needs of the elderly, helping them to lead active, healthy, and fruitful lives.

- 161.** Why are the elderly considered a ‘vulnerable’ group in society?
- (A) Because they are always financially independent and physically strong.
 - (B) Because they are more susceptible to disease, may face loneliness, and can be financially dependent.
 - (C) Because they have no experience or knowledge to contribute to society.
 - (D) Because the family structure in India has remained unchanged for centuries.

Ans :

- (B) Because they are more susceptible to disease, may face loneliness, and can be financially dependent.

The elderly are a vulnerable group due to various reasons. These include increased vulnerability to disease, potential financial dependency, and

feelings of loneliness or isolation, especially due to changing family structures and lifestyles in modern society.

- 162.** The service providing health check-ups at the center via a visiting unit is an example of a:
- (A) Mobile Medicare Unit.
 - (B) National Old Age Pension Scheme.
 - (C) Respite Care Home.
 - (D) Children's Home.

Ans :

(A) A Mobile Medicare Unit.

Mobile Medicare Units are a type of program designed to provide medical care to older persons, especially those who may have difficulty accessing hospitals. These units can visit community centers or rural and isolated areas.

- 163.** The center's primary objective of providing companionship and activities is to combat which common problem faced by the elderly?
- (A) Lack of educational qualifications.
 - (B) The need for advanced vocational training.
 - (C) A desire to travel internationally.
 - (D) Feelings of loneliness and isolation.

Ans :

(D) A feelings of loneliness and isolation.

In the later stages of the family life cycle, many elderly individuals may find themselves alone. Multi-service centers address this by providing opportunities for companionship and social interaction, which is crucial for their emotional well-being.

- 164.** One of the positive features concerning the elderly population in India is that:
- (A) A very small percentage of them live in rural areas.
 - (B) There is no feminization of the elderly population.
 - (C) Most of them who are 60 years or older are economically active.
 - (D) There are no elderly persons living below the poverty line.

Ans :

(C) A most of them who are 60 years or older are economically active.

A positive aspect of India's elderly population is that a majority of those aged 60 or more remain economically active. This is often because they are engaged in sectors that do not have a mandatory retirement age.

- 165.** Ms. Das, as the manager, needs 'people skills' to interact with various groups. Which of the following is NOT one of these groups?
- (A) International space agencies for satellite data.
 - (B) The community and the elderly beneficiaries.
 - (C) Government officials for funding or legal requirements.
 - (D) People within her own organization, such as staff and volunteers.

Ans :

(A) An international space agencies for satellite data.

A person managing such an institution needs people skills to interact with the community, government departments for funding, the private sector for support, and the people within their own organization. Interaction with space agencies is not relevant.

Direction : Read the following case study and answer the following questions.

A group of college students joins the National Service Scheme (NSS) and participates in a 10-day special camp in a nearby village. Their program officer has planned a series of activities aimed at national development and social service. The students' tasks include repairing the approach road to the village, cleaning the village pond, and planting tree saplings to improve the local environment. In the afternoons, they conduct non-formal education classes for out-of-school children and organize awareness sessions for women on topics like hygiene, sanitation, and child care. They also help the local authorities in a mass immunization drive. Through these activities, the NSS volunteers are not only contributing to the development of the rural community but are also developing a sense of social responsibility, teamwork, and leadership. The program provides them with an opportunity to understand the problems faced by people in different parts of the country and to be involved in constructive solutions.

- 166.** The National Service Scheme (NSS) is a program that primarily aims to involve which group in social service and national development?
- (A) Elderly citizens
 - (B) Industrial workers
 - (C) College-level students
 - (D) Pre-school children

Ans :

(C) A college-level students

The National Service Scheme (NSS) is a youth program specifically aimed at involving students at the college level. It provides them with opportunities to engage in various programs of social service and national development during their studies.

- 167.** The activities like repairing roads and planting trees are aimed at what objective?
- (A) Providing the students with a paid summer job.
 - (B) Promoting a spirit of adventure and risk-taking.
 - (C) Training the students for a career in politics.
 - (D) Involving the youth in programs of national development and social service.

Ans :

(D) Involving the youth in programs of national development and social service.

NSS activities are designed to involve students in constructive work for national development. This includes projects like improving infrastructure, environmental conservation, and promoting hygiene, all of which contribute to the community's well-being.

- 168.** According to the National Youth Policy, 2014, the term 'youth' refers to persons in which age group?
- (A) 10-19 years
 - (B) 15-29 years
 - (C) 20-35 years
 - (D) 18-25 years

Ans :

(B) A 15-29 years

The National Youth Policy of 2014 defines 'youth' as individuals who are in the age group of 15 to 29 years. This group is seen as a crucial force for national growth and socio-economic development.

- 169.** In order to be socially useful and economically productive, what do youth primarily need?
- (A) Appropriate education and training, and gainful employment.
 - (B) Only access to recreational opportunities.
 - (C) Protection from all forms of challenges and responsibilities.
 - (D) The opportunity to live in a different country.

Ans :

(A) Appropriate education and training, and gainful employment.

To contribute effectively to society, youth require access to appropriate education and training. This helps them secure gainful employment and provides them with opportunities for personal development and advancement, making them productive citizens.

- 170.** The NSS program helps students develop a sense of loyalty, patriotism, and thoughtfulness for others. These are characteristics also promoted by which other youth organization?
- (A) The Commonwealth Youth Programme.
 - (B) The National Service Volunteer Scheme.
 - (C) The Nehru Yuva Kendras.
 - (D) The Scouts and Guides.

Ans :

(D) A The Scouts and Guides.

The Scouts and Guides organization aims to develop the character of boys and girls to make them good citizens. It does so by inculcating a spirit of loyalty, patriotism, and thoughtfulness for others.

Direction : Read the following case study and answer the following questions.

A 14-year-old boy, Raju, is caught by the police for a minor theft. Since he is under 18, he is dealt with under the Juvenile Justice (Care and Protection of Children) Act. He is taken to an Observation Home, where he will stay temporarily while an investigation is conducted. During the same week, a 10-year-old girl, Meena, is found abandoned at a railway station. She has no family or means of sustenance. She is also brought under the purview of the same Act. However, she is categorized differently from Raju. She is considered a 'child in need of care and protection' and is placed in a Children's Home. The Act provides a special, child-friendly approach for both children, but the institutions and processes they go through are different. Raju's case will be adjudicated to determine his involvement in the offense, while the focus for Meena will be on tracing her family or providing long-term care, protection, and rehabilitation.

- 171.** Under the Juvenile Justice Act, what is Raju, who is accused of violating a law, categorized as?
- (A) A child in need of care and protection.
 - (B) A child in conflict with law.
 - (C) An orphaned child.
 - (D) A child with special needs.

programs initiated by the government to look after the needs of senior citizens, acknowledging its responsibility to ensure that all citizens, including the elderly, have a decent life.

- 201.** The National Old Age Pension Scheme (NOAPS) is designed to provide for which specific need of the elderly?
- (A) Recreational and entertainment needs.
 - (B) Advanced medical and surgical needs.
 - (C) Higher education and research needs.
 - (D) Economic needs, by providing financial support.

Ans :

(D) A economic needs, by providing financial support.
The NOAPS is a program designed to provide for the economic needs of the elderly. It offers a monthly pension to provide some financial security, particularly for those who are considered destitute and have no other means of support.

- 202.** Who are the intended beneficiaries of the NOAPS?
- (A) Destitute old persons who do not have any regular means of subsistence.
 - (B) All citizens above the age of 18.
 - (C) Only elderly persons who are financially well-off.
 - (D) Only elderly persons living in urban areas.

Ans :

(A) A destitute old persons who do not have any regular means of subsistence.
The NOAPS is specifically meant for old persons who are considered destitute. This means they do not have a regular means of subsistence on their own or through financial support from their family members.

- 203.** The establishment of such schemes shows that when families are unable to meet the needs of their members, who has a responsibility to step in?
- (A) Only international charitable organizations.
 - (B) Only the individual's neighbors and friends.
 - (C) The state/society and the government.
 - (D) Only private, for-profit companies.

Ans :

(C) A the state/society and the government.
When families are unable to provide for their members, especially vulnerable ones, it is the responsibility of the state and society to step in. The government responds by setting up institutions and programs to meet these needs.

- 204.** The NOAPS is an example of a program that caters to which of the following?
- (A) Building intergenerational relationships.
 - (B) Encouraging active and productive aging.
 - (C) Providing institutional care like old age homes.
 - (D) Catering to the basic needs of destitute elderly persons.

Ans :

(D) A catering to the basic needs of destitute elderly persons.

There are various types of programs for the elderly. The NOAPS falls under the category of programs that cater to the basic needs of older persons, particularly providing financial support for food and shelter to the destitute elderly.

- 205.** The fact that state governments can add to the pension amount shows a model of:
- (A) A program run exclusively by the central government.
 - (B) A partnership between the central and state governments.
 - (C) A program funded entirely by the private sector.
 - (D) An initiative run solely by non-governmental organizations.

Ans :

(B) A partnership between the central and state governments.

The structure of the NOAPS, where the state governments can contribute additional funds, demonstrates a collaborative model. This partnership between the central and state governments helps to enhance the support provided to the beneficiaries.

Direction : Read the following case study and answer the following questions.

A group of children who were rescued from a child trafficking ring are brought to a 'Special Home' under the Juvenile Justice Act. These children are victims of exploitation and are deeply traumatized. The director of the home understands that their needs go far beyond just food and shelter. The home provides a comprehensive rehabilitation program. This includes psychological counseling to help them cope with their trauma, education to bridge the gaps in their schooling, and vocational training in skills like tailoring and carpentry to equip them for a productive future. The director

- (B) Administrative Skills
- (C) Counseling Skills
- (D) Technical Skills

Ans :

- (B) Administrative Skills

Running or managing an organization or program involves various administrative tasks. These include handling finances, recruiting personnel, maintaining records, and buying equipment, all of which are essential for smooth functioning.

- 177.** Building linkages with the community and involving them in the planning process is an example of which crucial skill?
- (A) People skills, specifically community participation.
 - (B) Financial auditing.
 - (C) Legal drafting.
 - (D) Data programming.

Ans :

- (A) A people skills, specifically community participation.

Effective programs are built on community involvement and ownership. The ability to build linkages with the community and encourage their participation is a key 'people skill' required for the success of any social service institution.

- 178.** For a person wanting a career in managing support services, what is a suitable educational path?
- (A) A degree in mechanical engineering.
 - (B) A diploma in culinary arts.
 - (C) A certificate in fashion design.
 - (D) An undergraduate degree in Home Science, Social Work, or other social sciences.

Ans :

- (D) An undergraduate degree in Home Science, Social Work, or other social sciences.

To prepare for a career in managing services for vulnerable groups, an appropriate first step is an undergraduate degree in Home Science (or Family and Community Sciences), Social Work, or another social science, as these focus on these populations.

- 179.** Anika's strong commitment to her cause and a clear idea of what she wants to achieve for the youth reflects that she has a:
- (A) Lack of direction.
 - (B) Short-term interest.
 - (C) Vision.
 - (D) Desire for profit only.

Ans :

- (C) A vision.

A person who wants to start a new organization needs to have a vision. This vision is about what they want to achieve and how their organization will meet the needs of the target group, driven by deep commitment.

- 180.** The youth group that Anika is targeting—'out-of-school youth'—is considered especially vulnerable because:
- (A) They have more opportunities than other youth.
 - (B) They lack access to education and training, which are needed for gainful employment.
 - (C) They are all from wealthy families.
 - (D) They are not interested in any form of personal development.

Ans :

- (B) They lack access to education and training, which are needed for gainful employment.

Within the broad category of 'youth', some groups are especially vulnerable. Out-of-school youth are one such group because they lack the education and skills required for economic productivity and social advancement.

Direction : Read the following case study and answer the following questions.

SOS Children's Villages is an independent, non-governmental organization with a unique approach to caring for orphaned and abandoned children. Instead of a large, impersonal institution, they have pioneered a family-based model. In each SOS home, a dedicated caregiver, known as the 'mother', looks after a group of 10-15 children of different ages. This group lives together as a family, with the children forming sibling-like bonds. They celebrate festivals together, share chores, and support each other, helping the children to recover from past trauma and experience the love and stability of a family environment once again. These individual homes are located together in a campus, forming a supportive 'village' environment. The children attend local schools and are integrated into the surrounding community, which helps in their social development. The organization provides individual support for each child until they become independent young adults, ready to be productive members of society. This model provides a holistic and nurturing alternative to traditional orphanages.

people to take initiative in their communities. Through these activities, the Kendras aim to help the youth acquire functional capabilities, become economically productive, and develop a positive sense of identity and purpose, thereby steering them away from negative influences like drugs and crime.

- 191.** The Nehru Yuva Kendras (NYKs) primarily aim to serve which group?

(A) Pre-school children in rural areas.
(B) Elderly citizens living in old age homes.
(C) Non-student youth, particularly in rural and semi-urban areas.
(D) College students who are part of the NSS.

Ans :

(C) A non-student youth, particularly in rural and semi-urban areas.

The Nehru Yuva Kendras are designed to enable non-student youth, especially those in rural areas, to contribute to development. They provide opportunities for personal growth and community involvement for youth who are not in formal education.

- 192.** Why is youth considered a vulnerable period?
- (A) Because at this stage, individuals are fully mature and face no challenges.
(B) Due to biological changes, peer pressure, and the stress of preparing for adult roles.
(C) Because youth have no impact on national progress or development.
(D) Because all support services are withdrawn from individuals once they become youth.

Ans :

(B) Due to biological changes, peer pressure, and the stress of preparing for adult roles.

Youth is a vulnerable period for many reasons. Individuals are coping with biological changes, peer pressure, and the stress of preparing for adult roles like earning a livelihood, which can lead to turmoil and maladjustive behaviors.

- 193.** The vocational training courses offered by the NYK are intended to help the youth:
- (A) Acquire skills for self-reliance and become economically productive.
(B) Prepare for participation in international sports events.
(C) Learn about the cultural heritage of other countries.
(D) Get involved in political campaigns.

Ans :

(A) Acquire skills for self-reliance and become economically productive.

A key goal of the Nehru Yuva Kendras is to organize vocational training. This helps non-student youth acquire functional capabilities and skills that can lead to self-reliance and make them economically productive members of society.

- 194.** Organizing sports and cultural activities helps to provide youth with:

(A) Only academic education.
(B) Financial support for their families.
(C) A way to avoid all forms of work.
(D) Constructive recreational opportunities.

Ans :

(D) A constructive recreational opportunities.

Access to sports, physical education, and recreational opportunities is an important requisite for youth development. Programs like NYKs organize such activities to provide youth with constructive ways to spend their time and develop their talents.

- 195.** The term 'adolescents' refers to individuals in which specific age group?

(A) 0-6 years
(B) 7-12 years
(C) 13-19 years
(D) 20-29 years

Ans :

(C) 13-19 years

While 'youth' is a broader category (15-29 years), the term 'adolescents' specifically refers to those in the age group of 13 to 19 years. This is a critical sub-period within the youth stage of life.

Direction : Read the following case study and answer the following questions.

Mrs. Gupta is an 85-year-old widow who lives with her son's family in a small apartment in a big city. She suffers from arthritis, which restricts her mobility, and is also developing cataracts, which affects her vision. Her son and daughter-in-law both have long working hours and have little free time to care for her. Due to her health issues and the family's busy lifestyle, Mrs. Gupta often feels like a burden and suffers from loneliness and a sense of isolation. Her situation reflects the challenges faced by the "older-old" population in India. The fragmentation of the traditional family network and the high cost of living in cities mean that many families struggle

for immunization services and the distribution of Vitamin A supplements. The supervisor notes that the Anganwadi is successfully delivering a package of services in an integrated manner, addressing the health, nutrition, and early learning needs of the community's children and mothers, thereby fostering their holistic development.

- 186.** The ICDS program aims to meet the needs of which target group?
- (A) Elderly persons above 60 years.
 - (B) College students and youth.
 - (C) Children below six years of age, and pregnant and nursing mothers.
 - (D) Industrial workers and their families.

Ans :

(C) A children below six years of age, and pregnant and nursing mothers.

The ICDS program is a comprehensive early childhood initiative. It specifically targets children up to six years of age and also provides essential services to pregnant women and nursing mothers to ensure their health and nutrition.

- 187.** The delivery of supplementary feeding, health check-ups, and pre-school education together at the Anganwadi is an example of what kind of approach?
- (A) A fragmented and uncoordinated approach.
 - (B) An integrated approach to foster holistic development.
 - (C) An approach focused only on education.
 - (D) An approach that deals only with health emergencies.

Ans :

(B) An integrated approach to foster holistic development.

A key feature of the ICDS program is that it delivers a package of services—including health, nutrition, and early learning—in an integrated manner. This holistic approach addresses the multiple, interconnected needs of a young child.

- 188.** What is the name of the childcare center through which ICDS services are delivered at the community level?
- (A) Primary Health Centre
 - (B) SOS Children's Village
 - (C) Children's Home
 - (D) Anganwadi

Ans :

(D) An Anganwadi

The services of the ICDS program are delivered through a vast network of community-level childcare centers known as 'Anganwadis'. These centers are the focal point for the delivery of the program's integrated services.

- 189.** The non-formal pre-school education component of ICDS is provided for which specific age group of children?
- (A) Children from 3 to 6 years.
 - (B) Children from 0 to 2 years.
 - (C) Children from 6 to 10 years.
 - (D) All children below 18 years.

Ans :

(A) A children from 3 to 6 years.

While ICDS provides nutrition and health services for all children below six, the non-formal pre-school education component is specifically designed for children in the age group of three to six years to prepare them for formal schooling.

- 190.** The ICDS is an initiative of which body?
- (A) The World Health Organization.
 - (B) A private, non-governmental organization.
 - (C) The Government of India.
 - (D) A corporate foundation.

Ans :

(C) The Government of India.

The Integrated Child Development Services (ICDS) is a flagship program of the Government of India. It represents the government's commitment to addressing the needs of young children and mothers across the country.

Direction : Read the following case study and answer the following questions.

A city is facing a growing problem with youth delinquency and substance abuse among adolescents from disadvantaged neighborhoods. In response, the city administration decides to strengthen the Nehru Yuva Kendras (NYKs) in these areas. The Kendras are tasked with enabling non-student youth to become productive and socially useful citizens. The NYK coordinators organize a variety of programs. They start vocational training courses in skills like mobile repair, basic computer operations, and tailoring to improve the youths' chances of self-reliance. They establish youth clubs that organize sports activities and cultural programs to provide constructive recreational opportunities. They also run youth leadership training camps to empower the young

Ans :

(B) A child in conflict with law.

The Juvenile Justice Act concerns itself with two categories of children. Those who have been caught by the police for violating the Indian Penal Code are termed 'children in conflict with law' or juvenile delinquents.

- 172.** Meena, being abandoned and without any means of sustenance, falls into which category under the Act?

(A) A child in conflict with law.
(B) A juvenile delinquent.
(C) A child in need of care and protection.
(D) A young witness.

Ans :

(C) A child in need of care and protection.

The Act identifies children in need of care and protection as those who are without a home or means of sustenance, including abandoned, lost, or runaway children. They require support and rehabilitation from the state.

- 173.** What is the purpose of an Observation Home in the juvenile justice system?

(A) It is a place where children stay temporarily during an investigation.
(B) It is a permanent residence for orphaned children.
(C) It is a vocational training center for all youth.
(D) It is a home for elderly citizens.

Ans :

(A) It is a place where children stay temporarily during an investigation.

Observation Homes are temporary shelters where children stay while an inquiry is completed. The purpose is to gather information about their family background and investigate the circumstances that brought them into the system.

- 174.** Why are children considered a 'vulnerable' group requiring special laws and services?

(A) Because they are physically and emotionally mature.
(B) Because childhood is a period of rapid development, and adverse experiences can have a lasting impact.
(C) Because all children come from wealthy and stable families.
(D) Because they do not require any support from adults or society.

Ans :

(B) Because childhood is a period of rapid development, and adverse experiences can have a lasting impact.

Childhood is a period of rapid development in all domains. Children are dependent and vulnerable, and negative or adverse experiences during this time can have a lasting harmful impact on their overall growth and potential.

- 175.** The Juvenile Justice Act aims to provide a framework for the protection, treatment, and _____ of children.

(A) Punishment
(B) Incarceration
(C) Employment
(D) Rehabilitation

Ans :

(D) A rehabilitation

The Juvenile Justice Act adopts a child-friendly approach with the goal of rehabilitating children. The focus is on providing proper care, protection, and treatment that caters to their developmental needs for their ultimate reintegration into society.

Direction : Read the following case study and answer the following questions.

A young social entrepreneur, Anika, wants to set up an innovative program for youth who are out of school in a semi-urban area. She has a strong vision and passion for the cause, but she knows that running a successful program requires more than just good intentions. She starts by developing her administrative skills. She learns how to create a budget, handle financial records, and write proposals to seek funding from government departments and private organizations. She also works on her people skills. She spends time in the community to understand the needs of the youth and involves them in the planning process to ensure the program is relevant. She builds a network of contacts in the private sector to create internship and job opportunities for the youth. She recruits a team of trainers and counselors and focuses on cultivating cordial interpersonal relations within her organization. Anika understands that to manage this support service effectively, she needs to be a planner, a manager, and an evaluator, all at once.

- 176.** Anika's efforts to learn budgeting and financial record-keeping are part of developing which essential skill set?

(A) People Skills

to provide adequate care for their elderly members. This has led to an increased need for programs and institutions that can support the elderly and their families, addressing their needs for health care, companionship, and emotional well-being.

- 196.** The term “older-old” refers to which segment of the elderly population?
- (A) Persons in the age group of 60-65 years.
 - (B) Persons above 80 years of age.
 - (C) All persons who have retired from work.
 - (D) Only elderly persons living in rural areas.

Ans :

(B) A persons above 80 years of age.

A special feature of the elderly population in India is the increase in the number of the “older-old”. This term typically refers to persons who are above 80 years old and often have greater health and dependency needs.

- 197.** Mrs. Gupta’s health conditions of arthritis and cataracts are examples of what?
- (A) Disabilities that can arise from the aging process itself.
 - (B) Communicable diseases that are common in youth.
 - (C) Temporary illnesses that can be cured easily.
 - (D) Psychological conditions caused by stress.

Ans :

(A) Disabilities that can arise from the aging process itself.

The aging process itself can lead to certain disabilities. These include loss of mobility from arthritis and low vision or blindness from cataracts, which can affect an elderly person’s ability to care for themselves.

- 198.** The inability of Mrs. Gupta’s family to adequately care for her due to long working hours and limited space is a challenge associated with:
- (A) Traditional joint family systems.
 - (B) A rural and agricultural lifestyle.
 - (C) A lack of love and respect for the elderly.
 - (D) Modern urban life and changing family structures.

Ans :

(D) A modern urban life and changing family structures.

Certain features of modern city life, such as nuclear families, lack of free time, and limited living space, can lead to reduced support for the elderly within the family, creating a need for external support services.

- 199.** The feelings of loneliness and isolation experienced by Mrs. Gupta highlight the need to create a social milieu that is:
- (A) Conducive and sensitive to the emotional needs of the elderly.
 - (B) Focused only on the economic and health needs of the elderly.
 - (C) Designed to keep the elderly separated from the younger generation.
 - (D) That encourages the elderly to live completely independent lives without any support.

Ans :

(A) A conducive and sensitive to the emotional needs of the elderly.

Aging has become a major social challenge. It is necessary not only to provide for the economic and health needs of the elderly but also to create a social environment that is sensitive to their emotional needs.

- 200.** In India, a person is generally considered a ‘Senior Citizen’ upon reaching what age?

- (A) 50 years and above
- (B) 55 years and above
- (C) 60 years and above
- (D) 65 years and above

Ans :

(C) 60 years and above

While the age definition can vary, in India, Senior Citizens are generally defined as persons in the age group of 60 years and above. This is the age at which they often become eligible for various government schemes.

Direction : Read the following case study and answer the following questions.

The government launches a new scheme to provide financial assistance to destitute elderly persons who have no regular means of subsistence, either on their own or through support from family members. This scheme is called the National Old Age Pension Scheme (NOAPS). To be eligible, a person must be above a certain age and must provide proof of their destitute status. The scheme provides a small monthly pension to help them meet their basic needs. While the central government provides a base amount, the state governments are encouraged to add to this amount from their own resources. This program is a social safety net aimed at providing a degree of economic security to the most vulnerable among the elderly population. It is one of several

- 181.** What is the pioneering approach adopted by SOS Children's Villages for the care of orphaned children?
- (A) A large, dormitory-style institutional model.
 - (B) A family-based approach to long-term care.
 - (C) A system of temporary foster care only.
 - (D) An online, distance-based support program.

Ans :

(B) A family-based approach to long-term care. SOS Children's Villages has pioneered a unique family approach to the long-term care of orphaned and abandoned children. This model aims to provide a stable, loving family environment for children who cannot grow up with their biological families.

- 182.** The caregiver in an SOS home, who looks after a group of children, is known as the:
- (A) Manager
 - (B) Teacher
 - (C) 'Mother'
 - (D) Counselor

Ans :

(C) A 'Mother'

A distinctive feature of the SOS model is the 'mother' in each home. This caregiver is responsible for looking after a group of 10-15 children, creating a family unit where children can experience loving relationships and a sense of belonging.

- 183.** The main purpose of the SOS family-based model is to:
- (A) Provide a stable family environment to help children recover from trauma and grow up as independent adults.
 - (B) Prepare children for a career in social work.
 - (C) Keep the children isolated from the outside community.
 - (D) Offer only short-term emergency relief to children.

Ans :

(A) A provide a stable family environment to help children recover from trauma and grow up as independent adults.

The vision of SOS villages is to provide family-based, long-term care. In this stable environment, children experience love and relationships once again, helping them recover from traumatic experiences and grow into independent, self-reliant young adults.

- 184.** How does the SOS village model promote social integration for the children?
- (A) By keeping them within the village campus at all times.
 - (B) By limiting their interaction to only other children in the SOS village.
 - (C) By sending them to exclusive boarding schools far away from the village.
 - (D) By ensuring they are integrated with the local community and attend local schools.

Ans :

(D) By ensuring they are integrated with the local community and attend local schools.

The SOS families live together in a village that is integrated with the local community. The children attend neighborhood schools and participate in the social life of the community, which is crucial for their social development.

- 185.** SOS Children's Villages is an example of which type of organization?
- (A) An independent, non-governmental social organization (NGO).
 - (B) A government department.
 - (C) A for-profit private company.
 - (D) An international sports federation.

Ans :

(A) An independent, non-governmental social organization (NGO).

SOS Children's Villages is described as an independent, non-governmental social organization. This means it is part of the private/ NGO sector that works to provide support and services to vulnerable groups in society.

Direction : Read the following case study and answer the following questions.

The Integrated Child Development Services (ICDS) is one of the world's largest programs aimed at early childhood. A health supervisor is visiting an Anganwadi center to review its services. She observes that the Anganwadi worker is providing supplementary feeding to children under six and to pregnant and nursing mothers. She is also conducting non-formal pre-school education for the 3-6 year olds, using songs and stories. The supervisor checks the growth monitoring records, where the weight of each child is regularly plotted to track their development. She also confirms that the worker is coordinating with the local health auxiliary nurse midwife (ANM)

has to manage a team of counselors, teachers, and trainers. She also needs to liaise with legal authorities regarding the children's cases and with other NGOs for their eventual reintegration into society. This institution illustrates a specialized support service for a particularly vulnerable group of children who are in need of a very high degree of care, protection, and therapeutic intervention.

- 206.** According to the Juvenile Justice Act, children who are victims of trafficking and exploitation are considered to be:
- (A) Children in conflict with law.
 - (B) Children in need of care and protection.
 - (C) Children who are financially secure.
 - (D) Children who require no special services.

Ans :

(B) A children in need of care and protection. Children who have been abused, tortured, or exploited for purposes like sexual abuse or illegal acts, including trafficked minors, are identified as children in need of care and protection under the Juvenile Justice Act.

- 207.** The institution where juveniles found guilty of violating a law are placed is called a:
- (A) Special Home
 - (B) Observation Home
 - (C) Children's Home
 - (D) Day Care Centre

Ans :

(A) A Special Home
Special Homes are custodial care institutions where juveniles (children under 18) who have been found to have violated a law are placed. This is distinct from homes for children who are victims.

- 208.** The comprehensive program at the home, including counseling and vocational training, is an example of what?
- (A) A purely custodial and punitive approach.
 - (B) An approach focused only on the children's physical needs.
 - (C) A holistic approach that provides for proper care, protection, treatment, and rehabilitation.
 - (D) A short-term shelter providing only temporary accommodation.

Ans :

(C) A holistic approach that provides for proper care, protection, treatment, and rehabilitation.

The Juvenile Justice Act provides for a holistic approach. It emphasizes proper care, protection, and treatment by catering to the children's developmental needs for their ultimate rehabilitation through various institutions and programs.

- 209.** The director's need to liaise with counselors, legal authorities, and other NGOs demonstrates the importance of which skill for managing such an institution?
- (A) The ability to work in complete isolation.
 - (B) Expertise in financial investment and stock trading.
 - (C) Skills in architectural design and construction.
 - (D) People skills for interacting with different stakeholders.

Ans :

(D) A people skills for interacting with different stakeholders.
Running or working in such an organization means interacting with many different people. The ability to coordinate with staff, government officials, and other organizations is a crucial 'people skill' for the successful management of the institution.

- 210.** The primary reason that society and the government must provide such specialized services is that:
- (A) Many families are unable to provide the specialized services needed for the optimal growth of their members.
 - (B) Families are always unwilling to care for their children.
 - (C) All children prefer to live in institutions rather than with their families.
 - (D) Such services are highly profitable business ventures.

Ans :

(A) A many families are unable to provide the specialized services needed for the optimal growth of their members.
While the family is the basic unit, it cannot always provide all the specialized services needed for a member's optimal development. This is especially true for children who have experienced severe trauma and require professional therapeutic intervention.

- (A) Using short, thick jute fibres with high twist yarns in a plain weave.
- (B) Using long, fine silk fibres with low twist yarns in a satin weave.
- (C) Using fine wool fibres with textured yarns in a loose knit.
- (D) Using synthetic filament fibres with no twist in a twill weave.

Ans :

- (A) Using short, thick jute fibres with high twist yarns in a plain weave.

Jute fibres are naturally coarse, thick yarns create a grainy feel, and a plain weave construction is simple and firm, all contributing to the desired smooth, grainy, and coarse texture. The other options would result in softer, finer textures.

- 44.** What is the most precise definition of a 'line' as an element of design?
- (A) The boundary of a three-dimensional form.
 - (B) A mark that connects two points.
 - (C) A visual path for the eye to follow.
 - (D) The silhouette of a garment.

Ans :

- (B) A mark that connects two points.

The fundamental definition of a line is a mark that connects two points, indicating it has a beginning and an end. It is the most basic element used to define shape, provide movement, and determine direction in a design.

- 45.** Which type of line is known to emphasize height and convey a sense of dignity and severity?
- (A) Horizontal lines
 - (B) Diagonal lines
 - (C) Vertical lines
 - (D) Curved lines

Ans :

- (C) Vertical lines

Vertical lines direct the eye up and down, creating an illusion of increased height. This upward movement is associated with feelings of dignity, formality, and severity.

- 46.** In apparel design, what effect do horizontal lines primarily create?
- (A) An illusion of height and slimness.
 - (B) An illusion of width and stability.
 - (C) A feeling of drama and activity.
 - (D) A sense of softness and grace.

Ans :

- (B) An illusion of width and stability.
Horizontal lines guide the eye from side to side, creating an illusion of width. Because they echo the ground line, they also impart a feeling of stability and placidness to a design.

- 47.** A designer wants to create a dress that appears active and dramatic. Which type of line would be most effective in achieving this look?

- (A) Straight vertical lines
- (B) Soft, flowing curved lines
- (C) Straight horizontal lines
- (D) Oblique or diagonal lines

Ans :

- (D) Oblique or diagonal lines

Diagonal lines are inherently dynamic as they suggest motion and direction. Their angle can create an active, startling, or dramatic effect, making them more visually stimulating than stable horizontal or vertical lines.

- 48.** What is a 'restrained curve'?
- (A) A curve with a great degree of roundness.
 - (B) A complicated, free-hand curve like a scroll.
 - (C) A curve with a slight degree of roundness.
 - (D) A symmetrical curve like a figure of 8.

Ans :

- (C) A curve with a slight degree of roundness.

The term 'restrained curve' refers to a line that has only a slight bend or a gentle roundness. In contrast, a curve with a great degree of roundness is called a circular curve.

- 49.** Which lines are generally associated with femininity and daintiness in design?
- (A) Soft, curved lines
 - (B) Straight, rigid lines
 - (C) Sharp, diagonal lines
 - (D) Thick, horizontal lines

Ans :

- (A) Soft, curved lines

Curved lines are perceived as soft, graceful, and gentle, contrasting with the force and rigidity suggested by straight lines. This softness often leads to an impression of femininity and daintiness in a design.

- 50.** What is the primary difference between a shape and a form in design?
- (A) Shape is two-dimensional, while form is three-dimensional.
 - (B) Shape is geometric, while form is natural.

of roundness. They tend to give an impression of femininity.

2.6 Shapes or Forms

Shapes are created by connecting lines and can be two-dimensional or three-dimensional. There are four basic groups of shapes: natural, stylized, geometric, and abstract. In apparel, shape refers to the garment's silhouette and cut.

2.7 Patterns

A pattern is formed when shapes are grouped together, either as a single repeating shape or a combination of different shapes.

2.8 PRINCIPLES OF DESIGN

The principles of design are the rules governing how the elements are combined to create an appealing product. They include proportion, balance, emphasis, rhythm, and harmony.

2.9 Proportion

Proportion is the relationship between the sizes, colors, and shapes of different parts of a design to each other and to the whole. Pleasing proportions in garments are often based on the "golden mean," represented by ratios like 3:5:8.

2.10 Balance

Balance refers to the equal distribution of visual weight from a central point in a garment. It can be **formal (symmetrical)**, which gives a feeling of stability and dignity, or **informal (asymmetrical)**.

2.11 Emphasis

Emphasis creates a focal point that attracts the viewer's eye first, adding interest to a garment. It can be achieved through the use of contrasting colors, unique shapes, or interesting details and can be used to highlight a person's best features.

2.12 Rhythm

Rhythm is the repetition of lines, colors, or other details to create a pattern that guides the eye's movement through the design. It can be created through repetition, gradation (gradual change), radiation (from a central point), and parallelism.

2.13 Harmony

Harmony, or unity, is achieved when all the elements and principles of design work together to create a pleasing and cohesive effect.

2.14 Composition

A composition is the final artwork created by arranging the elements of design according to the principles of design in the most effective way within a given space.

3. PREPARING FOR A CAREER

A career in fabric and apparel design requires a thorough knowledge of materials, including fibre characteristics, processing techniques, and dyeing properties, as well as a strong understanding of design principles. Various educational institutions offer certificate, diploma, and degree programs in this field.

4. SCOPE

The design industry is a dynamic and varied creative sector. Textile designers need to be aware of changing fashion trends to create fresh and current designs. They can work in-house for textile companies or fashion houses, for design agencies, or as freelancers.

MULTIPLE CHOICE QUESTION

1. What is the most accurate description of 'design' in the context of fabric and apparel?
(A) The application of decorative elements to an object.
(B) The planning and creation of an article for a specific purpose.
(C) The selection of colours and patterns for a garment.
(D) The final appearance and aesthetic appeal of a product.

Ans :

- (B) The planning and creation of an article for a specific purpose.

Design is not merely about decoration or appearance. It is a comprehensive process that involves thoughtful planning and creation to ensure an article serves its intended function effectively, integrating both utility and aesthetics.

2. Which term describes the design that is inherent to the form and structure of a fabric or garment, without any superimposed ornamentation?
(A) Applied Design
(B) Decorative Design

- (C) Structural Design
- (D) Functional Design

Ans :

- (C) Structural Design

Structural design is fundamental to an object's form. In fabric, it relates to the fibre, yarn, and weave, while in a garment, it refers to the basic cut or silhouette. It is integral to the product's construction, not added on later.

- 3.** Which of the following is considered an example of 'applied design' on a garment?
- (A) The type of knit used for a sweater.
 - (B) The silhouette of a dress.
 - (C) The basic cut of a pair of trousers.
 - (D) Embroidery and fancy needle-work.

Ans :

- (D) Embroidery and fancy needle-work.

Applied design refers to ornamentation that is superimposed onto the basic structure of a fabric or garment. Embroidery, printing, and trims are added after the core structure is created to enhance its appearance.

- 4.** The "Grammar of Art," as it applies to Fabric and Dress Design, is composed of which two main factors?
- (A) Elements and Principles
 - (B) Aesthetics and Functionality
 - (C) Structural and Applied Design
 - (D) Art and Science

Ans :

- (A) Elements and Principles

The "Grammar of Art" provides a framework for creating designs. It consists of the Elements of Design (the tools like colour, line, texture) and the Principles of Design (the rules for using those tools, like balance and rhythm).

- 5.** Which statement correctly identifies the relationship between the elements and principles of design?
- (A) Principles of design are manipulated to create the elements of design.
 - (B) Elements of design are manipulated to create the principles of design.
 - (C) Elements and principles of design are independent and unrelated concepts.
 - (D) Principles of design are the tools, while elements are the rules of art.

Ans :

- (B) Elements of design are manipulated to create the principles of design.

The elements of design—colour, texture, line, and shape—are the fundamental tools or components. A designer manipulates these elements according to the principles of design—harmony, balance, rhythm, etc.—to create a successful composition.

- 6.** What is the scientific definition of colour?
- (A) A pigment applied to a surface.
 - (B) The emotional response to a visual stimulus.
 - (C) The inherent property of an object's surface.
 - (D) A visual sensation from the reflection of light rays.

Ans :

- (D) A visual sensation from the reflection of light rays.

Colour is the visual sensation that results when light rays strike the retina of the eye. The brain interprets the specific wavelengths of reflected light, producing the perception of a particular colour.

- 7.** When an object reflects all light rays that strike its surface, what colour does it appear to be?
- (A) Grey
 - (B) Black
 - (C) White
 - (D) Transparent

Ans :

- (C) White

The perception of white is created when a surface reflects all the wavelengths of visible light. Conversely, an object appears black when it absorbs all light rays and reflects none.

- 8.** Light rays of shorter wavelengths, such as green, blue, and purple, are grouped as what type of colours?
- (A) Receding or restful colours
 - (B) Advancing or stimulating colours
 - (C) Neutral or achromatic colours
 - (D) Primary or essential colours

Ans :

- (A) Receding or restful colours

Colours with shorter wavelengths, like blue and green, are known as receding or restful colours because they tend to appear farther away and have a calming effect on the viewer.

9. Colours with longer wavelengths, such as red, orange, and yellow, are known as which type of colours?
- (A) Receding or restful colours
 - (B) Achromatic or neutral colours
 - (C) Secondary or mixed colours
 - (D) Advancing or stimulating colours

Ans :

(D) Advancing or stimulating colours
Red, orange, and yellow have longer wavelengths and are classified as advancing or stimulating colours. They tend to appear closer and can evoke feelings of energy, warmth, and excitement.

10. Which three aspects are used to specify a colour completely?
- (A) Hue, Tint, and Shade
 - (B) Hue, Value, and Intensity
 - (C) Primary, Secondary, and Tertiary
 - (D) Lightness, Darkness, and Brightness

Ans :

(B) Hue, Value, and Intensity
Colour is defined by three distinct dimensions. Hue is the name of the colour (e.g., red), Value describes its lightness or darkness (tint or shade), and Intensity (or Chroma) refers to its brightness or dullness.

11. In the study of colour, what does the term 'Hue' refer to?
- (A) The brightness or purity of a colour.
 - (B) The lightness or darkness of a colour.
 - (C) The common name of the colour.
 - (D) The mixture of a colour with grey.

Ans :

(C) The common name of the colour.
Hue is simply the common name by which we identify a colour, such as red, yellow, or blue. It distinguishes one colour family from another on the colour wheel.

12. According to Munsell's Colour Wheel, which colours are considered primary colours?
- (A) Red, yellow, and blue
 - (B) Red, green, and blue
 - (C) Orange, green, and violet
 - (D) Yellow, cyan, and magenta

Ans :

(A) Red, yellow, and blue
Primary colours are the fundamental hues that cannot be created by mixing other colours. In the

traditional artist's colour wheel, these are red, yellow, and blue.

13. How are secondary colours created?
- (A) By mixing a primary colour with a neutral colour.
 - (B) By mixing one primary and one tertiary colour.
 - (C) By adding white to a primary colour.
 - (D) By mixing two primary colours.

Ans :

(D) By mixing two primary colours.
Secondary colours are positioned between the primary colours on the colour wheel because they are formed by mixing equal amounts of two adjacent primary colours: for example, red and yellow make orange.

14. Which of the following is a tertiary or intermediate colour?
- (A) Green
 - (B) Violet
 - (C) Yellow-orange
 - (D) Orange

Ans :

(C) Yellow-orange
Tertiary colours are created by mixing a primary colour with an adjacent secondary colour. Yellow-orange is made by combining the primary colour yellow with the secondary colour orange.

15. Which of the following pairs correctly identifies a group of neutral colours?
- (A) Red, yellow, blue
 - (B) White, black, grey
 - (C) Orange, green, violet
 - (D) Red-orange, blue-green

Ans :

(B) White, black, grey
Neutral colours, also known as achromatics, are colours without a specific hue. This category includes white, black, and all the shades of grey in between, as well as metallics.

16. What does the 'value' of a colour describe?
- (A) The lightness or darkness of the hue.
 - (B) The purity or brightness of the hue.
 - (C) The common name of the hue.
 - (D) The position of the hue on the colour wheel.

Ans :

(A) The lightness or darkness of the hue.

schemes are derived from the spatial relationships of colours on the colour wheel.

- 30.** Which statement accurately describes the limitation of a colour scheme?
- (A) It dictates the exact quantities of each colour to be used.
 - (B) It only applies to primary and secondary colours, not tertiary ones.
 - (C) It is a rigid rule that cannot be altered by the designer.
 - (D) It only suggests hues, not their specific values or intensities.

Ans :

(D) It only suggests hues, not their specific values or intensities.

A colour scheme provides a framework by suggesting which hues work well together. However, the designer or user retains the creative freedom to decide the specific values (lightness/darkness) and intensities (brightness/dullness) of those hues, as well as their proportions.

- 31.** Colour schemes that are based on hues having at least one hue in common are known as what type of schemes?
- (A) Contrasting schemes
 - (B) Complementary schemes
 - (C) Related schemes
 - (D) Triadic schemes

Ans :

(C) Related schemes

Related colour schemes create harmony by using colours that share a common hue. This shared characteristic ensures a visually cohesive and unified appearance. Examples include monochromatic and analogous schemes.

- 32.** What is a monochromatic colour harmony?
- (A) A harmony using only black, white, and grey.
 - (B) A harmony based on one hue, varied in value and/or intensity.
 - (C) A harmony using colours that are next to each other on the colour wheel.
 - (D) A harmony using colours opposite each other on the colour wheel.

Ans :

(B) A harmony based on one hue, varied in value and/or intensity.

A monochromatic harmony is built upon a single hue. Variations are created by using different tints (adding white), shades (adding black), and tones

(adding grey) of that one hue to create interest and depth.

- 33.** A colour scheme that uses only a combination of black and white is called:
- (A) Achromatic harmony
 - (B) Monochromatic harmony
 - (C) Accented neutral harmony
 - (D) Analogous harmony

Ans :

(A) Achromatic harmony

An achromatic harmony is a specific type of related scheme that is devoid of hue. It exclusively uses neutrals, most commonly a combination of black, white, and shades of grey.

- 34.** An interior designer decorates a room using beige, cream, and a small amount of bright red for the cushions. What colour scheme is this an example of?
- (A) Analogous harmony
 - (B) Monochromatic harmony
 - (C) Split complementary harmony
 - (D) Accented neutral harmony

Ans :

(D) Accented neutral harmony

This scheme is an accented neutral harmony because it primarily uses neutral colours (beige, cream) and adds a small, vibrant amount of a single hue (red) as an accent or point of emphasis.

- 35.** What does an analogous harmony refer to?
- (A) A combination using two or three hues that lie side by side on the colour wheel.
 - (B) A combination using two hues that are directly opposite on the colour wheel.
 - (C) A combination using three hues equidistant from one another on the colour wheel.
 - (D) A combination using one hue with variations in value and intensity.

Ans :

(A) A combination using two or three hues that lie side by side on the colour wheel.

An analogous harmony involves selecting colours that are adjacent to each other on the colour wheel, such as yellow, yellow-green, and green. This creates a serene and comfortable design as the colours are closely related.

- 36.** A colour scheme using two hues that lie directly opposite one another on the Colour Wheel is known as:

fashion house and the manufacturer are referring to the exact same shade, value, and intensity of blue.

- 24.** At which stage of fabric production is dyeing the most expensive?
- (A) Fibre stage
 - (B) Yarn stage
 - (C) Fabric stage
 - (D) Garment stage

Ans :

(A) Fibre stage

Dyeing at the fibre stage is the most expensive method because it requires a large quantity of dye and involves significant processing before the fibre is even spun into yarn. It is usually reserved for specific design requirements.

- 25.** Which of the following statements about dyeing at the yarn stage is correct?
- (A) It is the least common method of dyeing fabrics.
 - (B) It is primarily used for creating solid, single-coloured fabrics.
 - (C) It allows for the creation of designs like stripes, checks, and plaids.
 - (D) It is only suitable for manufactured fibres like polyester.

Ans :

(C) It allows for the creation of designs like stripes, checks, and plaids.

Dyeing yarn before it is woven or knitted is the key method for producing fabrics with patterned designs like stripes, checks, and plaids. Weaving different coloured yarns together creates these intricate patterns.

- 26.** The Ikat pattern is a result of a special dyeing technique applied at which stage?
- (A) Fabric stage
 - (B) Fibre stage
 - (C) Garment stage
 - (D) Yarn stage

Ans :

(D) Yarn stage

Ikat is a distinctive pattern created by a resist-dyeing technique applied to the yarns before they are woven into fabric. This pre-dyeing of yarns results in the characteristic blurred or feathered edge of the design.

- 27.** Which of the following is NOT a method of adding colour at the fabric stage?
- (A) Printing
 - (B) Jacquard patterning
 - (C) Appliqué work
 - (D) Batik

Ans :

(B) Jacquard patterning

Jacquard patterning is created by weaving dyed yarns on a special loom; therefore, the colour is introduced at the yarn stage. Printing, appliqué, and batik are all techniques used to apply colour or design to a pre-existing piece of fabric.

- 28.** Assertion (A): Textile designers must have a sound knowledge of the dyeing properties of different fibres.
Reason (R): The final product's requirements determine the stage and technique of colour application chosen by the designer.
- (A) Both A and R are true, and R is the correct explanation of A.
 - (B) Both A and R are true, but R is not the correct explanation of A.
 - (C) A is true, but R is false.
 - (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

A textile designer's knowledge of how different fibres react to dyes (A) is crucial because it directly informs their decisions on when (stage) and how (technique) to apply colour to meet the specific aesthetic and performance requirements of the final product (R).

- 29.** What is a colour scheme or colour harmony?
- (A) A specific shade of colour with its Pantone code.
 - (B) A guide for combining colours based on their relationship on the colour wheel.
 - (C) A scientific chart showing the wavelengths of different colours.
 - (D) The process of mixing primary colours to create secondary colours.

Ans :

(B) A guide for combining colours based on their relationship on the colour wheel.

Colour schemes, or harmonies, are established guidelines that suggest which hues can be combined effectively to create a pleasing aesthetic. These

CHAPTER 08

DESIGN FOR FABRIC AND APPAREL

SUMMARY

1. INTRODUCTION

Design is the human ability to conceive, plan, and create products that serve a purpose for individuals or groups. More than just aesthetic decoration, a good design integrates form with function, using materials appropriately to meet consumer expectations for price, color, and service.

2. BASIC CONCEPTS

2.1 Design Analysis

Design is a planned arrangement that results in an aesthetically satisfying object. It is studied in two aspects:

- **Structural Design:** This relates to the fundamental form and structure of an object, such as the basic cut or silhouette of a garment or the weave of a fabric. It does not involve superimposed ornamentation.
- **Applied Design:** This refers to the ornamentation added to the basic structure. For fabrics, this includes dyeing, printing, and embroidery; for garments, it includes trims and fasteners.

2.2 ELEMENTS OF DESIGN

The elements of design are the fundamental tools of art and include color, texture, line, and shape or form.

2.3 Colour

Colour is one of the most significant aspects of textile materials, influencing identity and reflecting culture, season, and events. It is a

visual sensation resulting from the reflection of light. The three dimensions of color are:

- **Hue:** The common name of a color (e.g., red, blue, green). The Munsell Colour Wheel organizes hues into primary, secondary, and tertiary colors.
- **Value:** The lightness or darkness of a hue, referred to as tints (lighter) and shades (darker).
- **Intensity or Chroma:** The brightness or purity of a color.

For international standardization in trade, the Pantone Shade Card provides a system of code numbers for all possible hues, tints, and shades. Color can be added to textiles at various stages—fibre, yarn, or fabric—to create diverse designs like woven stripes, tie-dyed Ikats, or printed patterns. Designers use various color schemes, such as monochromatic (one hue), analogous (neighboring hues), and complementary (opposite hues), as guides for combining colors effectively.

2.4 Texture

Texture is the sensory impression of a material's surface, perceived through sight and touch. It is described by how it looks (shiny, dull), feels (soft, rough), and behaves (limp, stiff). In textiles, texture is determined by fibre content, yarn type, fabric construction, finishes, and surface ornamentation.

2.5 Line

A line is a mark that connects two points, defining a shape and indicating movement and direction.

- **Straight lines** (vertical, horizontal, diagonal) can create effects of height, width, stability, or drama. They often express force and strength.
- **Curved lines** can appear soft and graceful or dramatic and bold, depending on their degree

- (A) Triadic harmony
- (B) Analogous harmony
- (C) Split complementary harmony
- (D) Complementary harmony

Ans :

(D) Complementary harmony

A complementary harmony is a contrasting scheme that pairs colours from opposite sides of the colour wheel, such as red and green or blue and orange. This creates a high-contrast, vibrant look.

- 37.** A designer chooses to use blue, yellow-orange, and red-orange in a fabric print. What type of colour scheme is this?

- (A) Triadic harmony
- (B) Double complementary harmony
- (C) Split complementary harmony
- (D) Analogous harmony

Ans :

(C) Split complementary harmony

This is a split complementary harmony. It uses a primary hue (blue) and the two colours adjacent to its direct complement (orange). The neighbours of orange are yellow-orange and red-orange.

- 38.** A triadic harmony is a combination of which colours?

- (A) Three hues that lie equidistant from one another on the colour wheel.
- (B) Four colours that form a rectangle on the colour wheel.
- (C) Two pairs of colours opposite each other on the colour wheel.
- (D) Three hues that are directly next to each other on the colour wheel.

Ans :

(A) Three hues that lie equidistant from one another on the colour wheel.

A triadic harmony uses three colours that are evenly spaced around the colour wheel, forming an equilateral triangle. An example is the combination of the three primary colours: red, yellow, and blue.

- 39.** How is 'texture' defined in the context of design?

- (A) The pattern or print on a material's surface.
- (B) The way a material is constructed or woven.
- (C) The weight and thickness of a material.
- (D) The sensory impression of sight and touch.

Ans :

(D) The sensory impression of sight and touch.

Texture refers to the surface quality of a material that can be perceived through both sight (visual texture) and touch (tactile texture). It encompasses qualities like shiny, dull, soft, or rough.

- 40.** Which of the following sets of words describes texture in terms of how it feels?

- (A) Shiny, dull, glossy
- (B) Limp, stiff, clinging
- (C) Soft, crisp, smooth
- (D) Dense, opaque, transparent

Ans :

(C) Soft, crisp, smooth

Words like soft, crisp, harsh, smooth, and rough describe the tactile quality of a texture—how it feels to the touch. The other options describe visual appearance or behaviour (drape).

- 41.** Which of the following is NOT a factor that determines the texture of textile materials?

- (A) Fibre content and its surface characteristics.
- (B) The colour harmony used in the fabric.
- (C) Yarn processing and yarn type.
- (D) Fabric construction technique like weaving or knitting.

Ans :

(B) The colour harmony used in the fabric.

Fibre content, yarn type, fabric construction, and finishes all directly impact the physical surface and feel of a fabric, thus determining its texture. Colour harmony is an element of design related to colour, not texture.

- 42.** Napping, fulling, and calendaring are examples of which factor that influences fabric texture?

- (A) Fibre content
- (B) Yarn processing
- (C) Fabric construction
- (D) Fabric finishes

Ans :

(D) Fabric finishes

Napping (brushing to create a soft surface), fulling (shrinking wool fabric to make it denser), and calendaring (pressing to create a smooth, glossy surface) are all finishing processes applied to fabric to alter its final texture.

- 43.** A designer wants to create a fabric with a very smooth, grainy, and coarse texture. Which combination of factors would best achieve this?

Value is the dimension of colour that refers to its relative lightness or darkness. Adding white to a hue creates a tint (lighter value), and adding black creates a shade (darker value).

17. On an 11-grade Grey Scale (0-10), what value represents pure white?

(A) 0
(B) 1
(C) 5
(D) 10

Ans :

(D) 10

The Grey Scale and Value Chart is a standardized scale for judging value. On this scale, 0 represents the darkest value (black), and 10 represents the lightest value (white). The mid-value, 5, represents pure grey or hue.

18. When a hue approaches white in value, what is it called?

(A) A shade
(B) A chroma
(C) A tint
(D) An intermediate

Ans :

(C) A tint

A tint is a lighter version of a hue, created by adding white. This process increases the value of the colour, moving it closer to white on the value scale.

19. How is a 'shade' of a colour created?

(A) By adding white to the hue.
(B) By adding black to the hue.
(C) By adding its complement to the hue.
(D) By mixing it with a primary colour.

Ans :

(B) By adding black to the hue.

A shade is created by adding black to a hue, which decreases its value and makes it darker. This moves the colour closer to black on the value scale.

20. What does 'chroma' or 'intensity' of a colour refer to?

(A) Its brightness or purity
(B) Its lightness or darkness
(C) Its position on the spectrum
(D) Its relationship to neutral colours

Ans :

(A) Its brightness or purity

Chroma, also known as intensity or saturation, describes the brightness, purity, or vividness of a colour. A high-intensity colour is bright and pure, while a low-intensity colour is dull or muted.

21. What is the primary way to reduce the intensity or dull a colour?

(A) By adding white to the colour.
(B) By adding black to the colour.
(C) By blending it with its opposite on the colour wheel.
(D) By blending it with an adjacent colour on the wheel.

Ans :

(C) By blending it with its opposite on the colour wheel.

The intensity of a colour is lowered most effectively by mixing it with its complement (the colour directly opposite it on the colour wheel). This neutralizes the colour, making it duller.

22. What is the name of the internationally recognized system that uses code numbers to identify all possible hues, tints, and shades for trade?

(A) Munsell Colour System
(B) VIBGYOR Spectrum Chart
(C) International Colour Code
(D) Pantone Shade Card

Ans :

(D) Pantone Shade Card

The Pantone Shade Card is an international standard used in trade, especially in textiles and fashion. It assigns a unique code number to each specific colour variation, ensuring consistent communication of colour across different locations and manufacturers.

23. An international fashion house wants to order fabric in a specific shade of blue from a manufacturer in India. Which tool would be most effective to ensure the colour is perfectly matched?

(A) A photograph of the desired blue colour.
(B) A detailed written description of the colour.
(C) The Pantone code number for the blue colour.
(D) A physical sample of the blue fabric sent by post.

Ans :

(C) The Pantone code number for the blue colour. The Pantone Shade Card system is designed for this exact purpose. Using a specific code number eliminates ambiguity and ensures that both the

(C) Shape is an outline, while form has interior detail.

(D) Shape is abstract, while form is representational.

Ans :

(A) Shape is two-dimensional, while form is three-dimensional.

A shape is a two-dimensional area enclosed by lines, such as a drawing on paper. A form has three dimensions (length, width, and depth) and can be viewed from multiple sides, like a human body or a garment.

51. The characteristics of a shape are determined by what?

(A) The colour used to fill the shape.

(B) The texture applied to the shape.

(C) The characteristics of the lines used to create it.

(D) The principle of design applied to it.

Ans :

(C) The characteristics of the lines used to create it.

Since shapes are created by connecting lines, the qualities of those lines (e.g., straight, curved, thick, thin) directly determine the resulting characteristics of the shape itself.

52. A design motif that is a simplified or modified version of a natural shape is known as what type of shape?

(A) Geometric shape

(B) Abstract shape

(C) Natural shape

(D) Stylised shape

Ans :

(D) Stylised shape

Stylised shapes are derived from natural shapes but are altered through simplification, modification, or exaggeration of certain parts to create a more decorative or interpretive version of the original.

53. Which pair correctly matches the shape type with its description?

(A) Geometric Shape - Free-form, not resembling any specific object.

(B) Abstract Shape - Can be formed using rulers and compasses.

(C) Stylised Shape - A perfect, un-modified copy of a natural object.

(D) Natural Shape - Copies nature or common man-made objects.

Ans :

(D) Natural Shape - Copies nature or common man-made objects.

Natural shapes are those that directly replicate the appearance of objects found in nature (like leaves or flowers) or common man-made items. The other options incorrectly pair the shape type with its description.

54. How is a pattern formed in design?

(A) By using a single, isolated shape.

(B) By connecting two points with a line.

(C) By grouping shapes together.

(D) By applying a single, solid colour.

Ans :

(C) By grouping shapes together.

A pattern is the result of arranging and repeating shapes. This can involve the repetition of a single shape or the combination of two or more different types of shapes in a structured or random arrangement.

55. What is the fundamental role of the principles of design?

(A) They are the basic tools and components of a design.

(B) They are the rules that govern how design elements are combined.

(C) They describe the physical characteristics of a material.

(D) They classify the different types of shapes and lines.

Ans :

(B) They are the rules that govern how design elements are combined.

The principles of design—proportion, balance, emphasis, rhythm, and harmony—are the guiding rules or strategies used to arrange the elements of design in the most appropriate and aesthetically pleasing way.

56. Which principle of design concerns the relation of one part of an object to another and to the whole?

(A) Balance

(B) Rhythm

(C) Emphasis

(D) Proportion

Ans :

(D) Proportion

Proportion is the design principle that deals with the relationship between the sizes, amounts, or

scale of various parts within a composition, as well as their relationship to the overall whole.

- 57.** The “golden mean” is a classical guideline for achieving pleasing proportion and is often represented by which sequence of ratios?
- (A) 3:5:8, 5:8:13
 - (B) 1:1:1, 2:2:2
 - (C) 1:2:4, 2:4:8
 - (D) 2:3:4, 3:4:5

Ans :

(A) 3:5:8, 5:8:13

The golden mean is a mathematical ratio considered to be aesthetically pleasing. In design, it's often expressed in ratios like 3:5:8, where the relationship of the smaller part to the larger part is the same as the larger part to the whole.

- 58.** According to the principle of proportion, if a shirt-pant dress is to be pleasing, and the shirt represents a value of 5, what value should the pant ideally represent?
- (A) 3
 - (B) 5
 - (C) 8
 - (D) 13

Ans :

(C) 8

Applying the golden mean ratio of 5:8:13, if the shirt (smaller part) represents 5, the pant (larger part) should represent 8. The combined effect of the shirt and pant would then represent the whole, which is 13.

- 59.** How is proportion of texture achieved in a garment?
- (A) By using only one type of texture throughout the entire outfit.
 - (B) By ensuring textures used do not overpower the wearer's size.
 - (C) By using textures that are opposite on a texture wheel.
 - (D) By using textures of equal weight and bulk in a dress.

Ans :

(B) By ensuring textures used do not overpower the wearer's size.

Proportion of texture relates to selecting fabrics with surface qualities that are appropriate for the wearer's physical frame. For instance, heavy and bulky textures can overwhelm a thin, petite person, creating a disproportionate look.

- 60.** To create a pleasing proportion and modify an awkward body shape, how can clothing be used?
- (A) By using a high waist bodice to camouflage a full abdomen.
 - (B) By dividing the body into exactly equal horizontal divisions.
 - (C) By placing large motifs on the largest part of the figure.
 - (D) By using shiny, bulky textures on areas to be minimized.

Ans :

(A) By using a high waist bodice to camouflage a full abdomen.

Clothing can create illusions to improve body proportions. A high-waisted (empire) bodice on a maternity dress draws the eye upward, away from the full abdomen, effectively camouflaging it and creating a more pleasing proportion.

- 61.** Which principle of design is defined as the equal distribution of weight from a central point of the garment?
- (A) Rhythm
 - (B) Proportion
 - (C) Balance
 - (D) Emphasis

Ans :

(C) Balance

Balance in design refers to achieving visual equilibrium. It involves distributing the visual weight of elements like colour, texture, and shape evenly, both vertically and horizontally, from a central axis.

- 62.** Which type of balance is achieved when a garment appears to be the same on each side of a central vertical line?
- (A) Informal balance
 - (B) Radial balance
 - (C) Asymmetrical balance
 - (D) Formal balance

Ans :

(D) Formal balance

Formal balance, also known as symmetrical balance, is created when the two sides of a design are a mirror image of each other. It gives a feeling of stability, dignity, and formality.

- 63.** While formal balance gives a feeling of stability and dignity, what is its main disadvantage?
- (A) It is very expensive to create.
 - (B) It can only be used with dark colours.

- (C) It is difficult to achieve in garments.
- (D) It tends to get monotonous.

Ans :

- (D) It tends to get monotonous.

The primary drawback of formal or symmetrical balance is that its predictable and ordered nature can become boring or monotonous to the eye, lacking the visual excitement of asymmetrical designs.

- 64.** What is the 'emphasis' or 'focal point' in a garment?
- (A) The point of greatest structural stability.
 - (B) The area that first attracts the viewer's eye.
 - (C) The geometric center of the design.
 - (D) The most expensive component of the garment.

Ans :

(B) The area that first attracts the viewer's eye. Emphasis is the principle of design that creates a center of interest or a focal point. It is the specific area within a design that is meant to capture the viewer's attention first.

- 65.** A person with a small waist wants to draw attention to this feature. According to the principle of emphasis, what would be an effective strategy?
- (A) Wear a bright and contrasting belt.
 - (B) Wear a loose, untucked blouse.
 - (C) Wear a dress with vertical stripes.
 - (D) Wear a decorative scarf around the neck.

Ans :

(A) Wear a bright and contrasting belt. To emphasize a positive feature like a small waist, one can use design details to draw the eye there. A bright, contrasting belt creates a strong focal point directly at the waistline, highlighting it effectively.

- 66.** How can emphasis be used to address figure problems?
- (A) By creating multiple focal points all over the garment.
 - (B) By placing design details on the area that needs to be hidden.
 - (C) By drawing attention to a positive feature and away from a problem area.
 - (D) By using the same colour and texture throughout the garment.

Ans :

- (C) By drawing attention to a positive feature and away from a problem area.

A key strategy in dressing for figure problems is to create a focal point on a flattering part of the body. This technique of emphasis draws the viewer's eye to the positive attribute, effectively de-emphasizing or camouflaging the less desirable area.

- 67.** Which principle of design involves the repeating of lines, colours, or other elements to create a pattern that allows the eye to flow through the garment?
- (A) Proportion
 - (B) Balance
 - (C) Emphasis
 - (D) Rhythm

Ans :

- (D) Rhythm

Rhythm is the principle of design that creates a sense of organized movement and visual flow. It is achieved by the regular repetition or progression of design elements, guiding the viewer's eye through the composition.

- 68.** Using a row of buttons that gradually increase in size from the collar to the hemline is an example of creating rhythm through which method?
- (A) Repetition
 - (B) Radiation
 - (C) Gradation
 - (D) Parallelism

Ans :

- (C) Gradation

Gradation creates rhythm through a gradual change in an element's quality, such as size, colour, or texture. In this case, the progressive increase in button size creates a visual path for the eye to follow.

- 69.** Which pair correctly matches the method of creating rhythm with its example?
- (A) Radiation - Tucks in a yoke lying parallel to each other.
 - (B) Repetition - A gradual increase in the size of motifs.
 - (C) Parallelism - Gathers originating from a central point at the waist.
 - (D) Repetition - Using the same lace trim at the neckline and hemline.

Ans :

(D) 1, 2, 3, and 4

Ans :

(C) 1, 2, and 4

Statement 1 correctly defines proportion. Statement 2 correctly describes the effect and drawback of formal balance. Statement 4 correctly defines harmony. Statement 3 is incorrect; repeating elements creates rhythm, not emphasis, which is about creating a single focal point.

107. Analyze the following statements regarding colour theory:

1. Primary colours are red, yellow, and blue and can be mixed to make other colours.
2. Value describes the lightness or darkness of a hue.
3. A shade is created by adding white to a colour.
4. Intensity is reduced by mixing a colour with its complement.

Which combination of statements is accurate?

(A) 1, 2, and 4

(B) 1, 2, and 3

(C) 2, 3, and 4

(D) 1, 3, and 4

Ans :

(A) 1, 2, and 4

Statement 1 correctly identifies primary colours. Statement 2 correctly defines value. Statement 4 correctly explains how to dull a colour. Statement 3 is incorrect; a shade is created by adding black, while adding white creates a tint.

108. Examine the following statements about fabric texture:

1. Texture refers only to the tactile qualities of a material.
2. Fabric construction techniques, like weaving, influence texture.
3. Fabric finishes, such as calendaring, can alter a fabric's texture.
4. Fibre content, such as using wool versus silk, determines texture.

Which of these statements are true?

(A) 1, 2, and 3

(B) 2, 3, and 4

(C) 1, 3, and 4

(D) 1, 2, 3, and 4

Ans :

(B) 2, 3, and 4

Statements 2, 3, and 4 correctly list the primary factors (construction, finish, and fibre) that determine texture. Statement 1 is false because texture is both a tactile (touch) and visual (sight) quality.

109. Evaluate the statements about lines and shapes in design:

1. Vertical lines emphasize width and create a placid effect.
2. Stylised shapes are simplified or modified versions of natural shapes.
3. Abstract shapes copy nature or man-made objects precisely.
4. Curved lines are generally associated with softness and grace.

Which statements are correct?

(A) 1 and 3

(B) 1 and 2

(C) 3 and 4

(D) 2 and 4

Ans :

(D) 2 and 4

Statement 2 correctly defines stylised shapes. Statement 4 correctly describes the feeling associated with curved lines. Statement 1 is incorrect; vertical lines emphasize height, while horizontal lines emphasize width. Statement 3 is incorrect; abstract shapes are non-representational, whereas natural shapes copy objects.

110. Consider the following regarding resist dyeing techniques:

1. In batik, wax is used as the resist material.
2. In tie and dye, thread is the most common resist material.
3. The Tritik technique involves sewing and gathering the fabric.
4. Laheria is a pattern created using the block printing method.

Which of the above are true?

(A) 1, 2, and 3

(B) 1 and 2 only

(C) 2, 3, and 4

(D) All are true

Ans :

(A) 1, 2, and 3

Statements 1, 2, and 3 accurately describe the resist materials and techniques for batik, tie and dye, and tritik, respectively. Statement 4 is

- 76.** According to the text, what is the key knowledge a fabric designer must possess?
- (A) Only an understanding of current fashion trends.
- (B) Thorough knowledge of fibre characteristics and processing.
- (C) Primarily skills in sketching and digital illustration.
- (D) A deep understanding of marketing and sales techniques.

Ans :

(B) Thorough knowledge of fibre characteristics and processing.

A fabric designer needs a comprehensive understanding of fibres, their properties, and how they can be processed and dyed. This technical knowledge is essential for achieving the desired appearance, durability, and cost for a specific end-use.

- 77.** Match the term in Column 1 with its correct description in Column 2.

	Column 1		Column 2
1.	Hue	a.	Lightness or darkness of a colour
2.	Value	b.	Brightness or purity of a colour
3.	Chroma	c.	The common name of a colour
4.	Tint	d.	A hue with white added

- (A) 1-c, 2-a, 3-b, 4-d
- (B) 1-a, 2-b, 3-c, 4-d
- (C) 1-b, 2-d, 3-a, 4-c
- (D) 1-d, 2-c, 3-b, 4-a

Ans :

(A) 1-c, 2-a, 3-b, 4-d

Hue is the colour's name (c). Value refers to its lightness or darkness (a). Chroma (or intensity) is its brightness or purity (b). A tint is specifically a hue to which white has been added (d).

- 78.** Match the colour scheme in Column 1 with its correct combination of colours in Column 2.

	Column 1		Column 2
1.	Monochromatic	a.	Red, yellow, and blue
2.	Complementary	b.	Yellow, yellow-green, and green

3.	Analogous	c.	Light blue, medium blue, and dark blue
4.	Triadic	d.	Red and green

- (A) 1-d, 2-c, 3-a, 4-b
- (B) 1-a, 2-b, 3-d, 4-c
- (C) 1-c, 2-d, 3-b, 4-a
- (D) 1-b, 2-a, 3-c, 4-d

Ans :

(C) 1-c, 2-d, 3-b, 4-a

Monochromatic uses one hue in different values (c). Complementary uses opposite colours like red and green (d). Analogous uses adjacent colours like yellow and its neighbors (b). Triadic uses three equidistant colours like red, yellow, and blue (a).

- 79.** Arrange the following colour classifications in the correct order of creation, from most basic to most complex.

1. Tertiary Colours
 2. Primary Colours
 3. Secondary Colours
- (A) 1, 2, 3
- (B) 2, 1, 3
- (C) 3, 2, 1
- (D) 2, 3, 1

Ans :

(D) 2, 3, 1

The correct sequence begins with Primary Colours (e.g., red, blue), which cannot be mixed. Next, Secondary Colours (e.g., orange) are created by mixing two primaries. Finally, Tertiary Colours (e.g., red-orange) are created by mixing a primary and a secondary colour.

- 80.** Assertion (A): A design that is aesthetically pleasing but not functional cannot be considered a well-designed object.

Reason (R): The greatest harmony in design is achieved when the aesthetic aspect is truly integrated with the utility of the object.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

(D) Repetition - Using the same lace trim at the neckline and hemline.

Repetition involves using the same element multiple times in a design. Using the same lace at both the neckline and hemline is a clear example of this. The other options incorrectly match the method and example.

- 70.** What is 'radiation' as a method for creating rhythm?
- (A) The gradual increase or decrease in the size of lines or motifs.
 - (B) The placement of elements parallel to each other.
 - (C) The movement of the eye in an organized way from a central point.
 - (D) The simple repetition of a button or a colour in a garment.

Ans :

(C) The movement of the eye in an organized way from a central point.

Radiation creates rhythm by having lines, shapes, or details fan out from a central point, like spokes on a wheel. Gathers spreading from a cuff or waistline are a classic example of this method.

- 71.** When all elements of design come together to create a pleasing and unified effect, which principle of design has been successfully achieved?
- (A) Emphasis
 - (B) Harmony
 - (C) Rhythm
 - (D) Balance

Ans :

(B) Harmony

Harmony, or unity, is the ultimate goal of design. It is achieved when all the individual elements and principles work together in agreement to form a cohesive, visually pleasing, and complete whole.

- 72.** Why is harmony considered a critical factor in producing marketable designs?
- (A) Because it makes the garment more durable.
 - (B) Because it ensures the garment is inexpensive to produce.
 - (C) Because it results in a publicly acceptable and pleasing product.
 - (D) Because it is the easiest principle of design to achieve.

Ans :

(C) Because it results in a publicly acceptable and pleasing product.

A harmonious design feels complete and aesthetically pleasing, which makes it acceptable and desirable to the public. This public acceptance is essential for a design to be commercially successful or marketable.

- 73.** A dress is designed with a curved neckline, curved cuffs, and a curved hemline. Adding square pockets to this dress would interrupt which principle?
- (A) Harmony by shape
 - (B) Rhythm by repetition
 - (C) Balance by form
 - (D) Proportion by texture

Ans :

(A) Harmony by shape

Harmony by shape is created when all the shapes within a garment are consistent and reflect one another. The introduction of sharp-cornered square pockets would clash with the established curved lines, disrupting the design's unity.

- 74.** Using a heavy, brocade salwar and kurta with a very thin, sheer cotton dupatta would show a lack of what?
- (A) Harmony by texture
 - (B) Harmony by colour
 - (C) Harmony by line
 - (D) Harmony by shape

Ans :

(A) Harmony by texture

Harmony by texture is achieved by using textures that are appropriate for each other. The heavy, formal texture of brocade clashes with the light, casual texture of sheer cotton, creating a discordant and inharmonious effect.

- 75.** What is a 'composition' in the context of design?
- (A) A single element of design, such as colour or line.
 - (B) The final retail price of a finished garment.
 - (C) The process of manufacturing a fabric from fibres.
 - (D) An artwork developed by arranging elements using design principles.

Ans :

(D) An artwork developed by arranging elements using design principles.

A composition is the final artwork or design that results from the thoughtful selection, placement, and arrangement of the elements of design (colour, line, etc.) according to the principles of design (balance, harmony, etc.) within a given space.

Ans :

(C) Thread

The classic and most common method of creating a resist in tie and dye involves tightly winding thread around portions of the fabric. This compression prevents the dye from seeping into the tied areas.

- 87.** The traditional Indian fabrics Bandhani and Laheria are created using which design technique?

(A) Block printing
(B) Batik
(C) Embroidery
(D) Tie-dyeing

Ans :

(D) Tie-dyeing

Bandhani (patterns of dots) and Laheria (diagonal stripes) are famous traditional textiles from Gujarat and Rajasthan. Their distinctive patterns are created by intricately tying and dyeing the fabric after it is woven.

- 88.** In modern tie and dye, besides thread, how can a resist effect be achieved?

(A) By using special dyes that resist each other.
(B) By knotting, crumpling, or folding the material itself.
(C) By applying heat to certain areas of the fabric.
(D) By using a special chemical wash after dyeing.

Ans :

(B) By knotting, crumpling, or folding the material itself.

Modern craft has expanded the technique. The fabric itself can be manipulated to form a resist. Knotting, folding, or crumpling the cloth and then tying over it creates varied and interesting patterns without just relying on thread.

- 89.** Which of the following tie-dye techniques is correctly paired with the pattern it produces?

(A) Knotting - Symmetrical stripes and bands
(B) Marbling - Shaded circular patterns
(C) Folding - Variegated, cloud-like effects
(D) Knotting - Shaded circular patterns

Ans :

(D) Knotting - Shaded circular patterns

Tying simple knots into the fabric before dyeing is one of the easiest techniques. When untied, it results in beautiful shaded circular patterns, with the tightest part of the knot remaining the original colour.

- 90.** To achieve a variegated and irregular cloud-like effect in tie and dye, which technique should be used?

(A) Binding
(B) Folding
(C) Marbling
(D) Tritik

Ans :

(C) Marbling

The marbling technique, which involves gathering the fabric into a ball or twisting and coiling it before tying, is specifically used to create irregular, non-uniform, cloud-like patterns on the fabric.

- 91.** A designer wants to create a tie-dye pattern with very precise, straight diagonal stripes (a lehria effect). Which technique would be the most suitable?

(A) Binding
(B) Knotting
(C) Marbling
(D) Folding

Ans :

(A) Binding

The binding technique involves tightly wrapping thread around folded or rolled fabric in specific patterns. To create stripes, including the diagonal lehria effect, the fabric is rolled and then bound at intervals to produce lines.

- 92.** What is the 'Tritik' technique in the context of resist dyeing?

(A) Folding the fabric into squares or triangles.
(B) Gathering the fabric into a solid ball.
(C) Binding the fabric tightly with thread in a spiral.
(D) Sewing the fabric with tacking stitches and gathering it.

Ans :

(D) Sewing the fabric with tacking stitches and gathering it.

The tritik technique involves using a needle and strong thread to sew a running or tacking stitch along a desired pattern line. The thread is then pulled tight to gather the cloth, creating a resist along the stitched line.

- 93.** Which tie-dye technique is known to achieve the best effects on thick materials because the fabric itself forms the resist?

(A) Tritik
(B) Marbling

- (C) Knotting
- (D) Folding

Ans :

- (D) Folding

Folding fabric into pleats, squares, or triangles creates thick layers. When these folds are held together, the layers of the fabric itself act as a strong resist, preventing dye from penetrating deeply. This makes it particularly effective on thicker materials.

- 94.** Why is it necessary to wash a cloth in hot soapy water before starting the tie and dye process?
- (A) To shrink the fabric to the correct size.
 - (B) To ensure the dye is absorbed evenly.
 - (C) To make the fabric easier to tie with thread.
 - (D) To set the final colour of the dye permanently.

Ans :

- (B) To ensure the dye is absorbed evenly.

Washing the fabric beforehand removes any sizing, dirt, or oils that might be present. This pre-treatment ensures that the fabric is clean and absorbent, allowing the dye to penetrate evenly and result in a uniform, patch-free colouration.

- 95.** What is Batik?
- (A) A form of resist printing using wax.
 - (B) A method of weaving with coloured threads.
 - (C) A style of embroidery using silk floss.
 - (D) A technique of painting directly on fabric.

Ans :

- (A) A form of resist printing using wax.

Batik is a specific resist-dyeing technique where molten wax is applied to fabric in a pattern. The wax solidifies and resists the dye, leaving the waxed areas in the original colour of the cloth.

- 96.** Why must dyeing in the batik process be carried out in cold temperatures (below 35°C)?
- (A) To make the colours more vibrant.
 - (B) To prevent the wax from melting.
 - (C) To help the dye penetrate the fabric faster.
 - (D) To ensure the fabric does not shrink.

Ans :

- (B) To prevent the wax from melting.

The entire principle of batik relies on wax acting as a solid resist. If the dye bath is hot, the wax will melt and run, destroying the pattern and allowing colour into the resisted areas. Therefore, cold dyes are essential.

- 97.** What creates the characteristic “crackle” effect in a finished batik piece?
- (A) Using a special type of cracked fabric.
 - (B) Applying the wax with a cracked brush.
 - (C) Cracks forming in the wax during dyeing.
 - (D) Scratching the design after dyeing is complete.

Ans :

- (C) Cracks forming in the wax during dyeing.

The beauty of batik often lies in its fine, web-like lines. These are created when the hardened wax cracks during the dyeing process. The dye seeps into these tiny fissures, creating the distinctive “crackle” effect.

- 98.** Which of the following is NOT a technique for applying wax in batik?
- (A) Painting the design area with wax.
 - (B) Outlining the design motif with wax.
 - (C) Dry brushing wax to give a shaded effect.
 - (D) Sewing the outline with wax-coated thread.

Ans :

- (D) Sewing the outline with wax-coated thread.

Wax application in batik is done using tools like brushes or a ‘tjanting’ to paint or draw the resist directly. Painting, outlining, and dry brushing are all valid methods. Sewing with thread is a characteristic of the Tritik technique, not batik.

- 99.** In batik, what two main types of wax are often used in combination?
- (A) Paraffin wax and beeswax
 - (B) Carnauba wax and soy wax
 - (C) Candelilla wax and rice bran wax
 - (D) Bayberry wax and Japan wax

Ans :

- (A) Paraffin wax and beeswax

The text specifies that two main types of wax are used for batik: paraffin wax, which is light and easily removed, and beeswax, which is darker and more adhesive. They are often blended to achieve different types of crackle effects.

- 100.** What is the correct sequence of steps for creating a multi-coloured batik fabric?
- (A) Dye → Apply wax → Remove wax → Re-dye
 - (B) Apply wax → Dye → Apply more wax → Re-dye
 - (C) Dye → Remove wax → Apply wax → Re-dye
 - (D) Apply wax → Remove wax → Dye → Re-dye

Ans :

(B) Apply wax → Dye → Apply more wax → Re-dye

For multiple colours, one starts by waxing the areas to remain the first colour, then dyeing. After that, more wax is applied to preserve the second colour, and the fabric is re-dyed in a new, usually darker, colour.

101. What is the final step in the batik process, after dyeing and crushing the frozen wax?

- (A) Applying another layer of wax for a glossy finish.
- (B) Polishing the fabric with a soft, dry cloth.
- (C) Air-drying the fabric in direct sunlight.
- (D) Hot pressing and soaping the fabric at a boil.

Ans :

(D) Hot pressing and soaping the fabric at a boil. To completely remove all residual wax from the fabric, the final stage involves ironing the fabric between layers of absorbent paper to melt and draw out the wax, followed by washing it in boiling soapy water.

102. In block printing, how is the design transferred onto the fabric?

- (A) The block is used as a stencil for spray painting.
- (B) The design area on the block is raised and pressed onto the fabric.
- (C) The design is carved into the block and filled with dye.
- (D) The block is heated and used to burn the design into the fabric.

Ans :

(B) The design area on the block is raised and pressed onto the fabric.

Block printing is a relief printing technique. The background area on the block is carved away, leaving the design area raised. This raised surface is inked with dye paste and then pressed onto the fabric to transfer the image.

103. For a multi-coloured block print design, what is required?

- (A) A single block with different coloured sections.
- (B) A special type of dye that changes colour.
- (C) A separate block for each different colour.
- (D) A single block that is re-carved for each colour.

Ans :

(C) A separate block for each different colour.

To create a design with multiple colours, a different block must be carved for each colour. Each block is registered and printed in sequence to build the final, multi-hued image.

104. When printing a multi-coloured design with blocks, which block is typically used first?

- (A) The outline block in the darkest colour.
- (B) The block for the lightest colour.
- (C) The block for the largest area of colour.
- (D) The block for the background colour.

Ans :

(A) The outline block in the darkest colour.

In traditional multi-colour block printing, the process usually begins by printing the outline block, typically in the darkest colour. This outline acts as a guide for registering and printing the subsequent “filling” blocks with lighter colours.

105. To ensure the fabric does not move during the block printing process, what preparation step is crucial?

- (A) The fabric must be heavily starched before printing.
- (B) The fabric must be dampened with water.
- (C) The fabric must be stretched on a wooden frame.
- (D) The fabric must be attached firmly to a padded table.

Ans :

(D) The fabric must be attached firmly to a padded table.

Any movement of the fabric during printing will cause smudging and misalignment of the pattern. Therefore, it is essential to lay the fabric flat on a padded surface and secure it firmly so it remains stationary.

106. Consider the following statements about textile design principles:

1. Proportion concerns the relation of parts to each other and to the whole.
2. Formal balance is often monotonous but gives a feeling of dignity.
3. Emphasis is created by repeating lines and colours throughout a garment.
4. Harmony is achieved when all design elements come together pleasingly.

Which of the statements are correct?

- (A) 1 and 3 only
- (B) 2, 3, and 4
- (C) 1, 2, and 4

Assertion (A) states that functionality is essential for good design, which is a core concept. Reason (R) explains why this is true: optimal design (harmony) requires the seamless integration of beauty (aesthetics) and usefulness (utility), thus providing the perfect rationale for the assertion.

81. What is the primary reason the field of Design for Fabric and Apparel can be considered two separate specializations?

- (A) Fabric is only used for apparel, while apparel uses many materials.
- (B) Fabric has numerous uses beyond apparel, and apparel uses materials other than fabric.
- (C) Fabric design is an art, whereas apparel design is a science.
- (D) Fabric design requires knowledge of weaving, while apparel design requires sewing.

Ans :

(B) Fabric has numerous uses beyond apparel, and apparel uses materials other than fabric. The field has diversified significantly. Fabric is now used in many industries beyond clothing and home furnishings, each with specific needs. Simultaneously, apparel design incorporates non-fabric materials, creating two distinct areas of specialization with unique requirements.

82. A career in textile design for apparel fashion demands an awareness of changing trends and an ability to produce designs that are:

- (A) Classic and unchanging.
- (B) Retro and historical.
- (C) Fresh, current, or ahead of the fashion curve.
- (D) Simple and minimalist.

Ans :

(C) Fresh, current, or ahead of the fashion curve. The apparel fashion industry is fast-paced. A textile designer must constantly be aware of evolving styles and be able to create innovative designs that are either on-trend or forward-thinking to meet market demands.

83. How does the turnaround for textile designs for apparel fashion typically compare to designs for furnishings?

- (A) Apparel fashion design has a much quicker turnaround.
- (B) Furnishing design has a much quicker turnaround.
- (C) Both have an equally slow and deliberate turnaround.

(D) Both have an equally fast and demanding turnaround.

Ans :

(A) Apparel fashion design has a much quicker turnaround.

The fashion cycle for apparel is significantly shorter than for home furnishings. Clothing trends change rapidly with seasons, requiring textile designers in this sector to work at a much faster pace to stay current.

84. Besides working for textile companies or fashion houses, where might a textile designer also find employment?

- (A) Only in museums and art galleries.
- (B) Exclusively as an independent artist.
- (C) Solely within academic institutions.
- (D) In a design agency or as a freelancer.

Ans :

(D) In a design agency or as a freelancer.

Career paths for textile designers are varied. In addition to direct employment with manufacturers, many work for design agencies that serve multiple clients or operate independently as freelancers, offering their services on a project basis.

85. What is the fundamental principle of resist dyeing techniques like tie and dye?

- (A) Applying colour to the entire fabric surface evenly.
- (B) Using threads of different colours to create a pattern.
- (C) Chemically altering the fabric to accept more dye.
- (D) Preventing dye from reaching certain areas of the fabric.

Ans :

(D) Preventing dye from reaching certain areas of the fabric.

Resist dyeing works by creating a physical barrier that “resists” or blocks the dye from penetrating specific parts of the fabric. The resisted areas retain the original fabric colour, creating the pattern.

86. In the tie and dye technique, what is the most common material used to create the resist?

- (A) Wax
- (B) Clay
- (C) Thread
- (D) Clips

incorrect; Laheria is a traditional pattern created by tie-dyeing, not block printing.

- 111.** Match the design principle in Column 1 with its correct description in Column 2.

	Column 1		Column 2
1.	Balance	a.	The relationship of the size of parts to the whole.
2.	Rhythm	b.	The creation of a focal point or center of interest.
3.	Proportion	c.	The sense of equilibrium in a design.
4.	Emphasis	d.	The organized movement of the eye through a design.

- (A) 1-c, 2-d, 3-a, 4-b
 (B) 1-a, 2-b, 3-c, 4-d
 (C) 1-b, 2-c, 3-d, 4-a
 (D) 1-d, 2-a, 3-b, 4-c

Ans :

- (A) 1-c, 2-d, 3-a, 4-b

Balance is about equilibrium (c). Rhythm is about organized movement (d). Proportion deals with the relationship of sizes (a). Emphasis is the creation of a focal point (b). This matching correctly aligns each principle with its definition.

- 112.** Match the shape type in Column 1 with the most appropriate example in Column 2.

	Column 1		Column 2
1.	Natural	a.	A free-form splash of paint
2.	Stylised	b.	A drawing of a leaf with veins
3.	Geometric	c.	A simplified drawing of a flower with exaggerated petals
4.	Abstract	d.	A perfect circle drawn with a compass

- (A) 1-d, 2-a, 3-c, 4-b
 (B) 1-b, 2-c, 3-d, 4-a
 (C) 1-c, 2-d, 3-a, 4-b
 (D) 1-a, 2-b, 3-d, 4-c

Ans :

- (B) 1-b, 2-c, 3-d, 4-a

A realistic leaf drawing is a natural shape (b). A simplified flower is a stylised shape (c). A perfect circle is a geometric shape (d). A random splash of paint is an abstract shape (a).

- 113.** Match the tie-dye technique from Column 1 to its description in Column 2.

	Column 1		Column 2
1.	Marbling	a.	Sewing with a tacking stitch and pulling the thread tight.
2.	Binding	b.	Folding fabric into symmetrical shapes like triangles.
3.	Tritik	c.	Twisting and coiling the fabric into a ball.
4.	Folding	d.	Tying thread tightly around areas to create stripes or dots.

- (A) 1-c, 2-d, 3-a, 4-b
 (B) 1-a, 2-c, 3-d, 4-b
 (C) 1-d, 2-b, 3-c, 4-a
 (D) 1-b, 2-a, 3-d, 4-c

Ans :

- (A) 1-c, 2-d, 3-a, 4-b

Marbling involves twisting and coiling (c). Binding is the process of tying thread tightly to create patterns like stripes (d). Tritik uses sewing and gathering (a). Folding involves creating symmetrical shapes before tying (b).

- 114.** Match the line type in Column 1 with the psychological effect it creates from Column 2.

	Column 1		Column 2
1.	Vertical Line	a.	Stability and width
2.	Horizontal Line	b.	Grace and femininity
3.	Diagonal Line	c.	Dignity and height
4.	Curved Line	d.	Activity and drama

- (A) 1-b, 2-d, 3-a, 4-c
 (B) 1-d, 2-a, 3-c, 4-b
 (C) 1-c, 2-a, 3-d, 4-b
 (D) 1-a, 2-c, 3-b, 4-d

Ans :

- (C) 1-c, 2-a, 3-d, 4-b

Vertical lines create a sense of dignity and height (c). Horizontal lines suggest stability and width (a). Diagonal lines convey activity and drama (d). Curved lines are associated with grace and femininity (b).

- 115.** Assertion (A): The Pantone Shade Card is essential for international trade in textile products.

Long, flowing curves are visually gentle and lead the eye smoothly through the design. This creates an impression of elegance, gracefulness, and rhythmic movement, distinct from the effects of other line types.

- 155.** What is the term for the relationship between the colours, shapes, and textures used in a garment?

(A) Composition
(B) Proportion
(C) Silhouette
(D) Construction

Ans :

(B) Proportion

Proportion is the design principle that specifically addresses the relationship between different elements. This includes how the size, colour, shape, and texture of one part relate to another and to the overall garment.

- 156.** To visually correct a short torso, a designer might place a horizontal design element, like a belt, where?

(A) Exactly at the natural waistline.
(B) Slightly lower than the natural waistline.
(C) Slightly higher than the natural waistline.
(D) No horizontal element should be used.

Ans :

(B) Slightly lower than the natural waistline.

Placing a horizontal line slightly lower than the natural waist creates a visual illusion that lengthens the torso area above the line, thus achieving a more balanced proportion.

- 157.** The Jacquard loom is used to create complex patterns by controlling individual yarns. This is an example of creating design at which stage?

(A) Fabric construction
(B) Fibre processing
(C) Fabric finishing
(D) Garment assembly

Ans :

(A) Fabric construction

Jacquard weaving is a method of fabric construction. The design is woven directly into the fabric by manipulating dyed yarns, making it an example of structural design that is integral to the material's creation.

- 158.** Which of the following correctly pairs a finishing process with its effect on texture?

(A) Napping - Creates a smooth, glossy surface.

(B) Calendaring - Creates a soft, fuzzy surface.

(C) Stiffening - Makes the fabric hang limp.

(D) Napping - Creates a soft, fuzzy surface.

Ans :

(D) Napping - Creates a soft, fuzzy surface.

Napping is a finishing process that involves brushing the fabric to raise the fibre ends, resulting in a soft, fuzzy texture (like flannel). Calendaring creates a smooth, glossy surface, and stiffening makes fabric less limp.

- 159.** Arrange the following steps for block printing a two-colour design in the correct order.

1. Press the filling block on the fabric.
2. Allow the printed fabric to dry.
3. Press the outline block on the fabric.
4. Apply dye paste to the outline block.

(A) 4, 3, 1, 2

(B) 1, 4, 3, 2

(C) 4, 1, 3, 2

(D) 3, 4, 1, 2

Ans :

(A) 4, 3, 1, 2

The correct sequence is: first, apply dye to the outline block (4); second, print the outline on the fabric (3); third, print the filling block(s) within the outline (1); and finally, let the completed print dry (2).

- 160.** The successful integration of all design principles—proportion, balance, emphasis, and rhythm—results in the achievement of:

(A) Chroma
(B) Texture
(C) Harmony
(D) Structure

Ans :

(C) Harmony

Harmony, or unity, is the ultimate goal and the culmination of successfully applying all other design principles. When balance, proportion, rhythm, and emphasis work together cohesively, the result is a harmonious and complete design.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

Ans :

(C) Applied design

Trims and notions are components that are superimposed onto the basic structure of the garment. They are added for decorative or functional purposes and are considered part of the applied design, enhancing the value of the final product.

- 121.** The spirit of people, seasons, and events are most often reflected through which element of design?

(A) Texture
(B) Colour
(C) Line
(D) Shape

Ans :

(B) Colour

Colour is a powerful and immediate visual cue. It is strongly associated with moods, seasons (e.g., autumn colours), events (e.g., festive colours), and the general spirit of people, making it a key element for designers to convey a specific message or feeling.

- 122.** Achromatic colours are so-named because they are considered to be:

(A) Colours with the highest intensity.
(B) Colours that are primary.
(C) Colours that are secondary.
(D) Colours without colour.

Ans :

(D) Colours without colour.

The term 'achromatic' literally means 'without colour'. It refers to the neutral group of white, black, and grey, which lack a specific hue and are defined by their value rather than a position on the colour spectrum.

- 123.** A dress with a simple, solid colour is most likely achieved by adding colour at which stage?

(A) Fabric stage
(B) Fibre stage
(C) Yarn stage
(D) Garment stage

Ans :

(A) Fabric stage

Dyeing at the fabric stage is the most common and economical method for producing single, solid-coloured materials. The entire bolt of woven or knitted fabric is submerged in a dye bath to achieve a uniform colour.

- 124.** Which of the following pairs incorrectly matches the design principle with its description?

(A) Proportion - Relation of parts to the whole.
(B) Balance - Equal distribution of visual weight.
(C) Emphasis - Repetition of elements to create flow.
(D) Harmony - Pleasing combination of all elements.

Ans :

(C) Emphasis - Repetition of elements to create flow.

Emphasis is about creating a single focal point, not repetition. The repetition of elements to create flow is the definition of Rhythm. The other pairs correctly match the principle with its description.

- 125.** Why is a basic understanding of the 'Grammar of Art' important for a textile designer?

(A) It provides a universal framework for creating successful designs.
(B) It is a legal requirement for selling textile products.
(C) It helps in calculating the cost of fabric production.
(D) It dictates the only acceptable styles for a given season.

Ans :

(A) It provides a universal framework for creating successful designs.

The 'Grammar of Art' (Elements and Principles of Design) provides the foundational knowledge and rules for composition. Understanding this framework allows a designer to create visually appealing and effective designs consistently, rather than relying on chance.

- 126.** The visible spectrum of seven colours produced when sunlight passes through raindrops is known by the acronym:

(A) ROYGBIV
(B) VIBGYOR
(C) PANTONE
(D) CMYK

Ans :

(B) VIBGYOR

VIBGYOR is the acronym for the sequence of colours in the visible light spectrum: Violet, Indigo, Blue, Green, Yellow, Orange, and Red. ROYGBIV represents the same colours but in the reverse order of wavelength.

Reason (R): It provides a standardized system of code numbers for colours, ensuring accurate communication between buyers and manufacturers in different locations.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The Pantone system (R) is the reason why it is so essential for international trade (A). By providing a universal, coded language for colour, it eliminates ambiguity and ensures that orders placed in one country can be precisely fulfilled in another.

- 116.** Assertion (A): In Batik, dyeing is always done using cold dyes.

Reason (R): The wax used as a resist will melt if exposed to a hot dye bath, which would ruin the design.

- (A) Both A and R are true, but R is not the correct explanation of A.
- (B) Both A and R are true, and R is the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The assertion that cold dyes must be used (A) is correct. The reason for this is that hot dyes would melt the wax resist (R), which perfectly explains the necessity stated in the assertion.

- 117.** Assertion (A): Horizontal lines on a garment can make a person appear wider.

Reason (R): The eye naturally follows lines, and horizontal lines guide the eye from side to side, creating an illusion of width.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

Assertion (A) states a well-known design effect. Reason (R) provides the precise psychological and visual mechanism for why this effect occurs—the side-to-side movement of the eye—thus serving as the correct explanation.

- 118.** Assertion (A): A heavy, bulky textured jacket would be a poor choice for a very thin and petite person.

Reason (R): The principle of proportion in texture dictates that the fabric's texture should be in a pleasing relationship with the wearer's figure.

- (A) Both A and R are true, and R is the correct explanation of A.
- (B) Both A and R are true, but R is not the correct explanation of A.
- (C) A is true, but R is false.
- (D) A is false, but R is true.

Ans :

(A) Both A and R are true, and R is the correct explanation of A.

The specific advice in assertion (A) is a direct application of the general principle of proportion in texture mentioned in reason (R). A bulky texture would be disproportionate to a petite frame, making the reason a perfect explanation for the assertion.

- 119.** When a design is described as having “harmony in form,” what does it broadly imply?

- (A) The design is colourful.
- (B) The design is functional.
- (C) The design is created for a specific purpose.
- (D) The design has a pleasing and unified structure.

Ans :

(D) The design has a pleasing and unified structure.

“Harmony in form” is a broad description of good design, indicating that all the visual parts of the object—its lines, shapes, colours, and textures—work together to create an integrated and aesthetically pleasing whole.

- 120.** Trims and notions, like fasteners, that are added to a garment are examples of what?

- (A) Structural design
- (B) Functional design
- (C) Applied design
- (D) Basic design

- (B) The fabric's structural design
- (C) The texture of the fabric
- (D) The value of the colours used

Ans :

- (A) The final pattern formation

The placement and repetition of motifs on a fabric create its final pattern. This arrangement can be geometric, natural, abstract, or stylized, and it is a key component of the fabric's overall applied design.

- 135.** Why is it stated that a good design does not permit easy dissection?
- (A) Because it uses only a single element.
 - (B) Because the elements are skillfully blended.
 - (C) Because the design is intentionally complex.
 - (D) Because the materials used are inseparable.

Ans :

(B) Because the elements are skillfully blended. In a well-executed design, the elements (colour, line, texture, shape) and principles are integrated so seamlessly that it's difficult to tell where one ends and another begins. This skillful blending creates a unified and harmonious whole.

- 136.** Unequal horizontal divisions in a garment tend to make a person look:
- (A) Shorter and wider
 - (B) Taller and slimmer
 - (C) Exactly their actual size
 - (D) More formally dressed

Ans :

- (B) Taller and slimmer

Unequal divisions are more interesting and dynamic to the eye than equal divisions. They prevent the eye from stopping at a halfway point, encouraging vertical movement and thus creating an illusion of greater height and slimmness.

- 137.** To hide large hips, where should a designer AVOID placing emphasis?
- (A) On the face and neckline.
 - (B) On the waistline.
 - (C) On the hip area.
 - (D) On the sleeves.

Ans :

- (C) On the hip area.

The principle of emphasis dictates that whatever is highlighted will draw the eye. Placing design details like a hip belt or pockets on the hip area

would attract attention directly to it, highlighting the feature rather than camouflaging it.

- 138.** Gathers in a waist, yoke, or cuffs are an example of creating rhythm through which method?
- (A) Parallelism
 - (B) Gradation
 - (C) Repetition
 - (D) Radiation

Ans :

- (D) Radiation

Gathers originate from a central line (like a waistband or cuff seam) and spread outwards. This movement from a central point is the defining characteristic of creating rhythm through radiation.

- 139.** Knife pleats in a skirt are an example of creating rhythm through which method?
- (A) Parallelism
 - (B) Gradation
 - (C) Radiation
 - (D) Repetition

Ans :

- (A) Parallelism

Knife pleats consist of a series of folds that all lie in the same direction and are parallel to each other. This arrangement of parallel lines creates a strong sense of rhythm and directional movement.

- 140.** The primary goal of a composition in design is to:
- (A) Use as many colours as possible.
 - (B) Create good visual appeal by applying principles.
 - (C) Showcase the most expensive materials.
 - (D) Follow fashion trends without deviation.

Ans :

- (B) Create good visual appeal by applying principles.

A composition is the intentional arrangement of design elements. Its main purpose is to apply the principles of design in the best possible way to create a final artwork that is visually appealing and effective.

- 141.** In the technique of Batik, what is the most commonly used tool for applying wax?
- (A) Sponges
 - (B) Brushes
 - (C) Rollers
 - (D) Stamps

- 127.** Which term refers to the fall or drape of a material in the context of fabric design?
- (A) The pattern
 - (B) The texture
 - (C) The shape and form
 - (D) The colour value

Ans :

- (C) The shape and form

In fabric, 'shape and form' refer to its three-dimensional characteristics, most notably how it hangs or drapes. This is determined by factors like the fabric's weight, weave, and fibre content.

- 128.** If a designer creates a pattern using only squares, circles, and triangles, what type of shapes are being used?
- (A) Natural shapes
 - (B) Stylised shapes
 - (C) Abstract shapes
 - (D) Geometric shapes

Ans :

- (D) Geometric shapes

Squares, circles, and triangles are shapes that can be mathematically formed and are not typically found in their perfect state in nature. They belong to the category of geometric shapes.

- 129.** In dress design, what is the primary purpose of texture?
- (A) To make the garment less expensive.
 - (B) To create interest and enhance desirable features.
 - (C) To ensure the garment is easy to clean.
 - (D) To add weight and structure to the silhouette.

Ans :

- (B) To create interest and enhance desirable features.

The main role of texture in apparel is to add visual interest and to complement the wearer. Different textures can be used to highlight or minimize certain features, contributing to a more flattering overall appearance.

- 130.** The outline of a garment's silhouette is an example of which element of design?
- (A) Colour
 - (B) Texture
 - (C) Line
 - (D) Pattern

Ans :

- (C) Line

A line can be formed by the outline of an object. The silhouette, which is the overall outline or shape of a garment, is a prime example of how line is used to define the form in apparel design.

- 131.** What kind of mood or effect do tiny, puffy curves in a design typically convey?

- (A) Youthful and gay
- (B) Severe and dignified
- (C) Dramatic and exaggerated
- (D) Stable and placid

Ans :

- (A) Youthful and gay

The scale and type of curve influence its emotional impact. Small, rounded, puffy curves are associated with a lighthearted, playful, and youthful feeling, making them suitable for cheerful designs.

- 132.** A design dominated by straight lines is likely to have what kind of effect?

- (A) Feminine and dainty
- (B) Soft and graceful
- (C) Youthful and gay
- (D) Masculine and strong

Ans :

- (D) Masculine and strong

Straight lines are visually associated with force, strength, and rigidity. A design where these lines are the dominant feature tends to convey a masculine effect, as opposed to the soft, graceful impression of curved lines.

- 133.** An artist creates a painting that does not resemble any specific object but evokes different feelings in different viewers. What type of shape has the artist used?

- (A) Natural shape
- (B) Stylised shape
- (C) Geometric shape
- (D) Abstract shape

Ans :

- (D) Abstract shape

Abstract shapes are free-form and non-representational. They do not copy anything specific but can suggest different things to different people based on personal associations and interpretations, which matches the description.

- 134.** The arrangement of motifs in a fabric, such as an all-over repeat, refers to what aspect of design?

- (A) The final pattern formation

- 148.** The choice of colour in a design is often affected by culture, tradition, and climate. This indicates that colour has a strong:
- (A) Scientific and technical meaning.
 - (B) Economic and commercial value.
 - (C) Physical and structural property.
 - (D) Social and psychological significance.

Ans :

(D) Social and psychological significance.
The fact that colour choices are influenced by societal factors like culture, tradition, and personal feelings demonstrates that colour carries deep social and psychological meaning beyond its physical properties.

- 149.** A dress made of shiny satin fabric will appear more conspicuous than a dress of the same colour made of matte cotton. This difference is due to the element of:
- (A) Line
 - (B) Shape
 - (C) Texture
 - (D) Value

Ans :

(C) Texture
The difference in appearance is due to the surface quality, or texture, of the fabrics. Shiny satin reflects more light, making it visually more prominent and textured differently than the light-absorbing matte cotton.

- 150.** An artist wants to create a colour harmony that is both high-contrast and complex, using four colours. Which scheme would be most appropriate?
- (A) Double complementary
 - (B) Monochromatic
 - (C) Analogous
 - (D) Accented neutral

Ans :

(A) Double complementary
A double complementary scheme uses two pairs of complementary (opposite) colours. This creates a high-contrast, vibrant, and complex palette, fitting the artist's requirement for a design with four high-contrast colours.

- 151.** Which of the following statements about design is most accurate?
- (A) A successful design prioritizes aesthetics over functionality.
 - (B) Structural design refers to decorations added

to a product.

- (C) The principles of design are the tools used to create art.
- (D) Design is the planning and creation of an article for a purpose.

Ans :

(D) Design is the planning and creation of an article for a purpose.

This statement provides the most comprehensive and accurate definition. Design is not just about looks (aesthetics) or decoration; it is a purposeful process of planning and creation that integrates function and form.

- 152.** What term is used to describe colours like white, black, grey, silver, and metallics?
- (A) Primary colours
 - (B) Tertiary colours
 - (C) Analogous colours
 - (D) Neutral colours

Ans :

(D) Neutral colours

These are classified as neutral or achromatic colours because they lack a specific, dominant hue. They are valued for their ability to complement and balance schemes composed of other colours.

- 153.** Dyeing yarn before weaving it into cloth is the method used to produce which of the following fabric designs?
- (A) Batik patterns
 - (B) Solid colour fabrics
 - (C) Woven plaids
 - (D) All-over prints

Ans :

(C) Woven plaids

Plaid designs are created by interlacing yarns of different colours in a specific sequence during the weaving process. This requires the yarns to be dyed to their final colours before the fabric is constructed.

- 154.** A smooth, flowing curved line in a dress design would most likely create a feeling of:
- (A) Rigidity and strength
 - (B) Action and drama
 - (C) Grace and rhythm
 - (D) Youthfulness and gaiety

Ans :

(C) Grace and rhythm

uses a few large, simple decorative items rather than many small ones to maintain a sense of openness. Her final design successfully transforms the small room into a more visually expansive and comfortable living space, demonstrating how a skilled understanding of design elements like line and texture can alter visual perception.

- 166.** The use of horizontal stripes on the curtains is intended to create what effect?
- (A) To make the ceiling appear higher.
 - (B) To make the room feel narrower.
 - (C) To create an illusion of width and make the room seem wider.
 - (D) To create a dramatic and active feeling.

Ans :

(C) To create an illusion of width and make the room seem wider.

Horizontal lines stress side-to-side movement. In interior design, they are used to create an illusion of width, making a narrow space appear wider and more stable, as they repeat the line of the ground.

- 167.** The choice of smooth, soft textures for the furniture is based on what principle?
- (A) Bulky, harsh textures make a space feel larger and more open.
 - (B) Smooth, soft textures reflect more light and can make a small space feel less cluttered.
 - (C) Texture has no impact on the perception of space.
 - (D) All furniture, regardless of space, should have a rough texture.

Ans :

(B) Smooth, soft textures reflect more light and can make a small space feel less cluttered.

Texture affects how a space is perceived. Smooth, simple textures tend to make a room feel more spacious and open, whereas heavy, bulky textures can appear overpowering and make a small space feel crowded.

- 168.** Line, texture, and color, which the designer used to create her design, are known as the:
- (A) Elements of Design.
 - (B) Principles of Design.
 - (C) Rules of Construction.
 - (D) Techniques of Manufacturing.

Ans :

(A) Elements of Design.

The elements of design are the basic tools that an artist or designer uses to create a composition. These fundamental elements include color, texture, line, and shape or form, which can be manipulated in various ways.

- 169.** If the designer had used tall, vertical stripes on the walls, what effect would that have created?
- (A) It would have made the room look wider.
 - (B) It would have made the room feel more placid and stable.
 - (C) It would have had no effect on the room's perception.
 - (D) It would have emphasized the height of the room and made the ceiling appear higher.

Ans :

(D) It would have emphasized the height of the room and made the ceiling appear higher.

Vertical lines stress an up-and-down movement. They emphasize height and can make a space with a low ceiling appear taller, giving an effect that is more severe, dignified, and reserved.

- 170.** The designer's overall goal of creating a pleasing and functional space by arranging the elements of design is an application of the:
- (A) Principles of Design.
 - (B) Laws of Physics.
 - (C) Rules of Grammar.
 - (D) Methods of Science.

Ans :

(A) Principles of Design.

The principles of design—such as proportion, balance, rhythm, emphasis, and harmony—are the rules that govern how the elements of design are mixed in the most appropriate way to create a successful and appealing product.

Direction : Read the following case study and answer the following questions.

A textile weaver is creating a luxurious silk fabric for a high-end apparel brand. The design is a complex floral pattern that is woven directly into the fabric using different colored silk threads. This process, known as Jacquard weaving, creates a pattern that is an integral part of the fabric's structure itself. The pattern is not printed or embroidered on top of the fabric after it is made. Later, a designer from the apparel brand decides to add further value to the fabric. She takes the woven silk and adds delicate beadwork and embroidery to certain areas of the floral pattern.

A fashion designer is developing a new collection for an autumn-winter line. She decides to use a monochromatic color scheme based on the hue 'red'. To avoid monotony, she manipulates the dimensions of this single color. For a heavy woolen coat, she chooses a deep maroon, which is a shade of red, created by adding black. For a delicate silk blouse, she selects a soft pink, which is a tint of red, created by adding white. To add a pop of energy, she designs a scarf in a very bright, pure crimson, which has high intensity. The overall collection, while using only one hue, looks diverse and sophisticated. She has effectively used different values (lightness and darkness) and intensities (brightness and dullness) of red to create a harmonious yet interesting range of garments. This approach demonstrates her skillful application of color theory to build a cohesive collection where all the pieces can be mixed and matched, creating a unified look for the consumer.

- 161.** The color scheme that is based on one hue and its variations in value and intensity is known as:
- (A) A complementary harmony.
 - (B) An analogous harmony.
 - (C) A monochromatic harmony.
 - (D) A triadic harmony.

Ans :

(C) A monochromatic harmony.

A monochromatic harmony is a color scheme that is based on just one hue. Visual interest and variety are created by using different values (tints and shades) and/or intensities of that single color throughout the design.

- 162.** The deep maroon color of the woolen coat is an example of what dimension of color?
- (A) A tint, which is a hue with white added.
 - (B) A shade, which is a hue with black added.
 - (C) A hue in its purest form.
 - (D) A neutral color like grey or silver.

Ans :

(B) A shade, which is a hue with black added.

A shade is created when a hue approaches black on the value scale, making it darker. The designer used a shade of red to create the deep maroon color, giving it a low value appropriate for a winter coat.

- 163.** What are the three dimensions or aspects used to specify a color?
- (A) Length, Width, and Height.

- (B) Red, Yellow, and Blue.
- (C) Primary, Secondary, and Tertiary.
- (D) Hue, Value, and Intensity/Chroma.

Ans :

(D) Hue, Value, and Intensity/Chroma.

Color is specified in three aspects. Hue is the name of the color (e.g., red). Value describes its lightness or darkness (tint or shade). Intensity, or chroma, refers to its brightness or purity.

- 164.** The bright, pure crimson scarf has a high:
- (A) Intensity or Chroma.
 - (B) Value only.
 - (C) Neutrality.
 - (D) Shade.

Ans :

(A) Intensity or Chroma.

Intensity, also known as chroma, describes the brightness or purity of a color. A bright, pure crimson is a color with high intensity, meaning it is not dulled by mixing it with other colors.

- 165.** By using only shades and tints of red, the designer is creating a collection that is likely to be perceived as:
- (A) Chaotic and disorganized.
 - (B) Clashing and uncoordinated.
 - (C) Dull and uninteresting.
 - (D) Harmonious and visually cohesive.

Ans :

(D) Harmonious and visually cohesive.

Related color schemes, such as a monochromatic harmony, have at least one hue in common. This shared characteristic creates a sense of unity and visual cohesion, making the collection look well-coordinated and pleasing to the eye.

Direction : Read the following case study and answer the following questions.

An interior designer is tasked with decorating a small, narrow living room to make it feel more spacious and welcoming. To achieve this, she decides to use the elements of design strategically. She chooses a light, neutral color for the walls to make the room appear larger. For the curtains on the narrow wall, she selects a fabric with bold, horizontal stripes. On the long walls, she hangs large mirrors to create an illusion of depth. For the furniture, she opts for pieces with smooth, soft textures and avoids bulky, heavily textured fabrics that would make the space feel cluttered. She also

Ans :

(B) Brushes

The text states that the most commonly used tools for applying wax in batik are brushes of various widths and sizes. These allow for a range of effects, from broad coverage to fine lines.

142. Why must brushes used for applying wax in batik have natural hair bristles?

- (A) Natural bristles hold more wax.
- (B) Natural bristles are less expensive.
- (C) Nylon or thermoplastic bristles would melt.
- (D) Natural bristles create a better crackle effect.

Ans :

(C) Nylon or thermoplastic bristles would melt.

The batik process involves applying hot, molten wax. Brushes made with synthetic materials like nylon or other thermoplastics would melt upon contact with the hot wax, rendering them useless and potentially ruining the artwork.

143. What is 'dry brushing' in the context of batik wax application?

- (A) Applying wax with a brush that is free of excess wax.
- (B) Using a dry brush to remove excess wax.
- (C) Painting the entire fabric with a dry brush before waxing.
- (D) Heating the fabric with a dry brush to set the wax.

Ans :

(A) Applying wax with a brush that is free of excess wax.

Dry brushing is a specific technique where a flat brush, with most of the liquid wax removed, is carried along design lines. This method deposits a smaller, less uniform amount of wax, creating a shaded effect.

144. A batik artist wants to create a design with fine, sharp lines within a waxed area. Which technique should be used?

- (A) Painting
- (B) Dry brushing
- (C) Outlining
- (D) Scratching

Ans :

(D) Scratching

The scratching technique involves first covering an area of fabric with a solid layer of wax. Then, a sharp tool, like the back of a pin, is used to

scratch lines into the hardened wax, exposing the fabric underneath so dye can penetrate.

145. In block printing, why might metal be used to reinforce parts of a wooden block?

- (A) To make the block heavier for better pressure.
- (B) To add a metallic colour to the print.
- (C) To strengthen fine lines or delicate parts of the design.
- (D) To make the block easier to clean after use.

Ans :

(C) To strengthen fine lines or delicate parts of the design.

Wood can be fragile, and very fine or delicate parts of a carved design are prone to breaking under the pressure of printing. Metal reinforcements are used to support these areas, ensuring durability and a crisp impression.

146. What is the purpose of the sponge base in a printing tray for block printing?

- (A) To absorb any spilled dye paste.
- (B) To ensure a uniform layer of dye is applied to the block.
- (C) To clean the block between colour applications.
- (D) To keep the dye paste from drying out too quickly.

Ans :

(B) To ensure a uniform layer of dye is applied to the block.

The block is lightly pressed into a tray containing dye paste on a sponge. The sponge acts as an ink pad, ensuring that the raised portions of the block pick up an even and consistent layer of colour for a clean print.

147. The effect of a line in a garment, such as making someone appear taller or wider, is primarily an example of a(n):

- (A) Visual illusion
- (B) Structural property
- (C) Tactile quality
- (D) Chemical finish

Ans :

(A) Visual illusion

Lines do not physically change the dimensions of a garment or person. Instead, they manipulate how the eye perceives the shape. This creation of an effect that differs from reality is a visual illusion.

This additional ornamentation is superimposed on the basic fabric structure, enhancing its beauty and creating a more opulent final product. This two-stage process illustrates a key distinction in how design can be incorporated into a textile: one as part of its fundamental construction, and the other as a surface embellishment.

- 171.** The floral pattern created through Jacquard weaving is an example of what type of design?
- (A) Applied design
 - (B) Surface design
 - (C) Printed design
 - (D) Structural design

Ans :

(D) Structural design

Structural design is that which depends on the form and is not a superimposed ornamentation. In fabric production, this includes the basic processing, type of yarn, and the method of weaving or knitting itself.

- 172.** The beadwork and embroidery added to the fabric later are an example of what type of design?
- (A) Applied design
 - (B) Structural design
 - (C) Functional design
 - (D) Weaving design

Ans :

(A) Applied design

Applied design is the part of the design that has been superimposed on the basic structure of an object. On fabric, this includes finishes, printing, embroidery, and other surface ornamentations that change the appearance.

- 173.** What is the fundamental difference between structural and applied design in fabrics?
- (A) Structural design is always simple, while applied design is always complex.
 - (B) Structural design is part of the fabric's construction, while applied design is added to the surface.
 - (C) Structural design is only used for apparel, while applied design is for home furnishings.
 - (D) There is no difference between the two types of design.

Ans :

(B) Structural design is part of the fabric's construction, while applied design is added to the surface.

Structural design is inherent to the form and construction of the fabric itself, created through weaving or knitting. In contrast, applied design involves adding ornamentation to the surface of the fabric after its basic structure is complete.

- 174.** The stage at which color is added can determine whether a design is structural or applied. Color added at which stage would result in a structural design?

- (A) At the fabric stage, through printing.
- (B) At the garment stage, through painting.
- (C) At the yarn stage, before weaving.
- (D) After the product is finished, through patchwork.

Ans :

(C) At the yarn stage, before weaving.

When color is added at the yarn stage, it becomes an integral part of the fabric's structure when woven. This creates structural designs like woven stripes, checks, or Jacquard patterns, as seen in the case study.

- 175.** The primary purpose of both structural and applied design is to:

- (A) Produce a result that gives aesthetic satisfaction and is suitable for its purpose.
- (B) Only improve the functional quality of the fabric.
- (C) Make the fabric more expensive regardless of its appearance.
- (D) Ensure the fabric is difficult to manufacture.

Ans :

(A) Produce a result that gives aesthetic satisfaction and is suitable for its purpose.

Design is the planning and creation of an article for a specific purpose. It goes beyond mere function to produce a result that is also aesthetically pleasing and appropriate for its intended use.

Direction : Read the following case study and answer the following questions.

A textile design student is creating a new print for a fabric meant for children's clothing. She decides to use geometric shapes as her primary motif. She starts with a simple arrangement of circles of the same size, repeating them at regular intervals across the fabric. This creates a simple, static rhythm. To make the design more dynamic, she introduces the principle of gradation. She creates rows of squares that gradually increase in size from small to large. She also experiments with color

Fashion moves in a cyclical pattern known as the **fashion cycle**, which describes the rise, culmination, and decline in the acceptance of a style . This cycle, often represented by a bell-shaped curve, includes the following stages:

- **Introduction:** Designers introduce new styles to the public .
- **Increase in Popularity (Rise):** As the new fashion is purchased and seen, its popularity grows .
- **Peak of Popularity:** The fashion is in high demand, leading to widespread copying and production at various price points .
- **Decline in Popularity:** Consumers tire of the style as it becomes mass-produced, and retailers move it to sale racks .
- **Rejection of a Style (Obsolescence):** The cycle ends as consumers move on to new looks, beginning a new cycle .

7. FASHION MERCHANDISING

Fashion merchandising is the strategic planning required to have the right merchandise, at the right time, in the right place, at the right price, and with the right sales promotion to maximize profits . A **fashion merchandiser** is the professional who translates a designer's vision into a manufacturable product, considering factors like fabric, price, and target market .

7.1 Levels of Merchandising

Merchandising occurs at three main levels:

- **Retail Organisation Merchandising:** Involves internal planning within a retail company to ensure adequate stock is on hand and sold at profitable prices .
- **Buying Agency Merchandising:** These agencies act as procurement offices for buyers, handling tasks like vendor identification, cost negotiation, and quality control .
- **Export House Merchandising:** This involves **buyer merchandisers**, who link the buyer and manufacturer, and **production merchandisers**, who ensure production follows the buyer's schedule and requirements .

7.2 Target Market

A target market is the specific group of consumers a product is aimed at . It is identified through **market segmentation**, which divides a larger market into subsets based on:

- **Demographic Segmentation:** Age, sex, occupation, income .
- **Geographic Segmentation:** Cities, states, regions, and climate .
- **Psychographic Segmentation:** Lifestyle, interests, and needs .
- **Behavioural Segmentation:** Opinions on specific products or services .

7.3 Merchandising Rights

Successful merchandising hinges on achieving the “rights”: the right merchandise, place, time, quantity, price, and promotion .

7.4 Fashion Retail Organisations - Overview of retailing

Fashion retail businesses include **Small Single-unit Stores**, **Department Stores**, and **Chain Stores** . These organizations are typically structured into major divisions, including merchandising, sales promotion, finance, and operations .

8. PREPARING FOR A CAREER

A career in fashion merchandising requires a combination of style and business sense . Key skills include:

- **Forecasting ability:** To predict fashion trends ahead of time .
- **Analytical ability:** To manage budgets, understand economic factors, and ensure profitability .
- **Communication ability:** To negotiate with manufacturers and market products to the public through advertising and press releases .

Educational qualifications range from certificates and diplomas to two-year associate's degrees and four-year bachelor's degrees in fashion design or merchandising .

9. SCOPE

The fashion industry offers lucrative opportunities and the potential for self-employment, as about one-third of professional designers are self-employed . Fashion design careers are available in a variety of industries. Popular roles include:

- **Visual Merchandise Designers:** Responsible for designing store displays and styling mannequins .
- **Fashion Designers:** Create designs for clothing and apparel, either for established labels or their own .

- 181.** The designer's use of a symmetrical, mirror-image design is an application of which type of balance?
- (A) Informal balance
 - (B) Radial balance
 - (C) Asymmetrical balance
 - (D) Formal balance

Ans :

(D) Formal balance

Formal balance, or symmetrical balance, is achieved when a design is the same on both sides of a central vertical line. This creates a feeling of stability, dignity, and formality, making it suitable for classic designs.

- 182.** The use of strong vertical lines in the gown's design helps to create what kind of effect?
- (A) An illusion of width and stability.
 - (B) An effect that is active and dramatic.
 - (C) A youthful and playful mood.
 - (D) An effect that is severe, dignified, and emphasizes height.

Ans :

(D) An effect that is severe, dignified, and emphasizes height.

Vertical lines are used to stress an up-and-down movement. In apparel design, they create a sense of dignity and reserve, making the wearer appear taller and slimmer, which is suitable for a formal gown.

- 183.** While formal balance creates a sense of stability, what is one potential drawback of this type of design?
- (A) It can sometimes become monotonous or less interesting.
 - (B) It always looks very active and exciting.
 - (C) It is only suitable for casual and informal clothing.
 - (D) It is very difficult and expensive to create.

Ans :

(A) It can sometimes become monotonous or less interesting.

Although formal balance gives a feeling of stability and dignity, it is often the most expected type of design. As a result, it can tend to get monotonous or appear less dynamic compared to informal balance.

- 184.** Balance, proportion, rhythm, emphasis, and harmony are known as the:
- (A) Elements of Design
 - (B) Principles of Design

- (C) Techniques of Color
- (D) Rules of Texture

Ans :

(B) Principles of Design

The principles of design are the rules that govern how the elements of design (color, line, texture, shape) are combined in the most effective way to produce an appealing and successful product.

- 185.** If the designer had used different elements on each side of the central line, but still created a sense of equal visual weight, what type of balance would this be?
- (A) Formal balance
 - (B) Symmetrical balance
 - (C) Informal or asymmetrical balance
 - (D) Radial balance

Ans :

(C) Informal or asymmetrical balance

Informal or asymmetrical balance occurs when two unequal sides of a design appear to have equal weight. This is achieved by balancing different shapes, colors, or textures, often creating a more dynamic and interesting effect.

Direction : Read the following case study and answer the following questions.

A textile artisan in Gujarat is renowned for her skill in creating 'Ikat' fabrics. This traditional technique involves a resist-dyeing process that is applied before the fabric is even woven. The artisan first tightly ties sections of the yarn bundles with thread to resist the dye. She then immerses the yarn bundles in a dye bath. The tied sections remain undyed, while the exposed sections absorb the color. She repeats this process with different colors to create a complex pattern on the yarns. Once the dyeing is complete, the yarns are carefully untied and then woven on a loom. As the fabric is woven, the pre-dyed patterns on the individual yarns come together to form the final intricate, feathery design characteristic of Ikat. This method is a prime example of how color application at the yarn stage can result in a unique and beautiful structural design.

- 186.** The Ikat technique is an example of applying color at which stage of fabric production?
- (A) At the fiber stage.
 - (B) At the yarn stage.
 - (C) At the fabric stage.
 - (D) At the garment stage.

gradation, creating a pattern where the color of the triangles gradually changes from a light yellow to a deep orange. The final design has a lively and playful feel due to the organized movement created by the repetition and gradual changes in the shapes and colors. This application of the principle of rhythm gives the fabric a sense of visual unity and flow, making it engaging for the eye.

- 176.** The organized movement created by the student in her design is an application of which principle of design?
- (A) Balance
 - (B) Emphasis
 - (C) Proportion
 - (D) Rhythm

Ans :

(D) Rhythm

Rhythm is a design principle that uses the repeating of lines, colors, shapes, or other elements to create a pattern. This guides the eye through the design, creating a sense of organized movement and visual unity.

- 177.** The pattern of squares that gradually increase in size is an example of rhythm created by:
- (A) Repetition
 - (B) Gradation
 - (C) Radiation
 - (D) Parallelism

Ans :

(B) Gradation

Rhythm by gradation is created by a gradual increase or decrease in the size of motifs, lines, or colors. This leads the eye in a specific direction and creates a more dynamic sense of movement.

- 178.** The initial pattern of circles of the same size at regular intervals is an example of rhythm created by:
- (A) Repetition
 - (B) Gradation
 - (C) Radiation
 - (D) Emphasis

Ans :

(A) Repetition

Rhythm by repetition is the simplest way to create a pattern. It involves the repeated use of a design element, like a shape or color, at regular intervals, which creates a sense of order.

- 179.** The motifs used by the student—circles, squares, and triangles—are what type of shapes?
- (A) Natural shapes
 - (B) Stylized shapes
 - (C) Abstract shapes
 - (D) Geometric shapes

Ans :

(D) Geometric shapes

Geometric shapes are those that can be mathematically formed or give a similar impression. Shapes like circles, squares, and triangles, which can be drawn with measuring instruments, fall into this category.

- 180.** If the student had arranged lines of color to move out from a central point, like the spokes of a wheel, this would be an example of rhythm by:
- (A) Repetition
 - (B) Gradation
 - (C) Radiation
 - (D) Parallelism

Ans :

(C) Radiation

Rhythm by radiation occurs when lines, shapes, or colors move outwards in an organized way from a central point. This creates a strong focal point and a dynamic sense of movement, like in sunburst patterns.

Direction : Read the following case study and answer the following questions.

A designer is creating a formal evening gown for a prestigious awards ceremony. The goal is to create a look that is dignified, stable, and conveys a sense of formality. To achieve this, she uses the principle of formal balance. The design of the gown is symmetrical; if you were to draw a line down the center, the left and right sides would be mirror images of each other. The neckline, sleeves, and decorative elements are identical on both sides. She also uses strong vertical lines in the cut of the dress and the placement of seams. These vertical lines emphasize height and create a stately, reserved effect. The overall design is harmonious and balanced, providing a feeling of stability and classic elegance. While some might find this type of balance less exciting than an asymmetrical design, it is perfectly suited to the formal and dignified character the designer wants to project for the occasion.

wearing clothes.

- (B) Because the face is often considered the focal point of beauty.
- (C) Because it is the easiest part of the garment to decorate.
- (D) Because details near the face are less expensive to create.

Ans :

(B) Because the face is often considered the focal point of beauty.

In our culture, the face is often seen as the primary focal point of beauty. Therefore, design details that draw attention to the face, such as an interesting neckline or collar, are particularly effective.

- 193.** How did the designer create emphasis in this dress?
- (A) By using the same color and texture throughout the entire garment.
 - (B) By using a simple, unadorned design with no focal point.
 - (C) By using contrasting colors, textures, and decorative detailing in a specific area.
 - (D) By making the entire dress from a very bright and patterned fabric.

Ans :

(C) By using contrasting colors, textures, and decorative detailing in a specific area.

Emphasis can be created by using contrasting colors, unusual shapes, or different lines and textures. The designer used a contrasting color and intricate embroidery to make the yoke the clear center of interest in the design.

- 194.** If a woman with a large waist wears a bright, wide belt, this would have what effect?
- (A) It would further emphasize and draw attention to her waist.
 - (B) It would de-emphasize her waist and make it look smaller.
 - (C) It would have no effect on the perception of her waist.
 - (D) It would draw attention to her shoulders instead.

Ans :

(A) It would further emphasize and draw attention to her waist.

Emphasis can be used to highlight positive features and camouflage figure problems. Conversely, adding a strong design detail to a

problem area, like a wide belt on a large waist, will only highlight it further.

- 195.** The successful blending of all the design elements in this dress to create a pleasing and unified whole is known as:
- (A) Harmony
 - (B) Proportion
 - (C) Balance
 - (D) Rhythm

Ans :

(A) Harmony

Harmony, or unity, is the ultimate goal of design. It is created when all the elements and principles of design come together to give a pleasing and harmonious effect, resulting in a well-integrated and successful product.

Direction : Read the following case study and answer the following questions.

In a textile design class, the teacher presents two different fabrics to the students to illustrate the concept of texture. The first fabric is a piece of pure silk charmeuse. It is extremely smooth to the touch and has a shiny, glossy appearance that reflects light. It is also lightweight and hangs in a soft, flowing manner. The second fabric is a piece of hand-woven, bulky wool tweed. It has a rough, coarse feel and a dull, opaque look that absorbs light. It is heavy and has a stiff drape. The teacher explains that these distinct sensory impressions are the 'texture' of the fabrics. She discusses how the texture is determined by the fibre content (fine silk vs. coarse wool), the yarn type (smooth filament vs. bulky spun), and the fabric construction. The students learn that these different textures would be used for very different purposes in apparel design, as they create completely different visual and tactile effects.

- 196.** The sensory impression of sight and touch, referring to the tactile and visual qualities of a material, is known as:
- (A) Color
 - (B) Line
 - (C) Pattern
 - (D) Texture

Ans :

(D) Texture

Texture is the element of design that refers to the sensory impression of a material. It can be

described in terms of how it looks (e.g., shiny, dull) and how it feels (e.g., soft, rough).

- 197.** Which of the following is a primary factor that determines the texture of a textile material?
- (A) The price of the fabric.
 - (B) The country where the fabric was made.
 - (C) The fibre content, yarn type, and fabric construction.
 - (D) The color of the dye used on the fabric.

Ans :

(C) The fibre content, yarn type, and fabric construction.

The texture of a fabric is determined by several factors during its manufacture. These include the type of fiber used, the processing and type of yarn, and the technique of fabric construction, such as the weave type.

- 198.** How can the texture of a fabric be described in terms of its visual qualities?
- (A) As shiny, dull, opaque, or transparent.
 - (B) Only as soft or harsh.
 - (C) Only as limp or stiff.
 - (D) Only in terms of its weight.

Ans :

(A) As shiny, dull, opaque, or transparent.
Texture has both tactile (touch) and visual (sight) qualities. The visual characteristics of texture can be described in terms of how the fabric looks, such as whether it is shiny, dull, opaque, or translucent.

- 199.** In dress design, a heavy, bulky texture like the wool tweed would be most suitable for:
- (A) A person with a large frame, as it would make them look smaller.
 - (B) A person with a petite frame, as it would be in proportion to their size.
 - (C) A dress meant for a formal summer event.
 - (D) A person with a thin frame, as it can add visual weight and size.

Ans :

(D) A person with a thin frame, as it can add visual weight and size.
Texture can create illusions of size. Heavy and bulky textures can appear overpowering on a petite person but can be used effectively to add apparent size and weight to a thin figure.

- 200.** The main purpose of using different textures in dress design is to:
- (A) Make the garment as inexpensive as possible.

(B) Create interest and enhance the desirable features of the person.

(C) Ensure the garment is difficult to care for.

(D) Use only one type of texture in all designs.

Ans :

(B) Create interest and enhance the desirable features of the person.

The main purpose of texture in apparel design is to create visual interest and to enhance the desirable features of the wearer. Different textures should be used in pleasing relationship to each other to achieve harmony.

Direction : Read the following case study and answer the following questions.

An apparel designer is creating a two-piece outfit consisting of a blouse and a long skirt. To ensure the design is visually pleasing and well-proportioned, she applies the principle of the 'Golden Mean'. The Golden Mean suggests that unequal parts in a relationship can be more appealing than equal ones. The designer decides that the length of the blouse should relate to the length of the skirt in a ratio of 3:5. This means that the blouse represents 3 parts of the whole, while the skirt represents 5 parts. The combined effect of the blouse and skirt would then represent 8 parts. This unequal division of the total length creates a more dynamic and interesting silhouette than if the blouse and skirt were of equal length (a 1:1 ratio), which could make the wearer look shorter and wider. By applying this principle of proportion, the designer creates a garment that is aesthetically balanced and flattering to the human form.

- 201.** The designer's use of a 3:5 ratio between the blouse and skirt is an application of which principle of design?
- (A) Balance
 - (B) Rhythm
 - (C) Proportion
 - (D) Emphasis

Ans :

(C) Proportion

Proportion is the principle of design that concerns the relation of one part of an object to another and to the whole. The 'Golden Mean' is a guideline for creating pleasing proportions using ratios like 3:5:8.

- 202.** What is the 'Golden Mean' in design?
- (A) A rule that all parts of a design must be of

equal size.

- (B) A ratio-based guideline for creating pleasing unequal divisions, such as 3:5:8.
- (C) A principle that dictates the use of only golden or yellow colors.
- (D) A method for creating perfect symmetry in a design.

Ans :

(B) A ratio-based guideline for creating pleasing unequal divisions, such as 3:5:8.

The Golden Mean is a concept of proportion represented by ratios like 3:5:8, 5:8:13, and so on. It suggests that a smaller part has the same relationship to a larger part as the larger part has to the whole.

- 203.** According to the principle of proportion, why is a 1:1 division (e.g., a blouse and skirt of equal length) often avoided in dress design?
- (A) Because it is the most difficult proportion to create.
 - (B) Because it makes a person look taller and slimmer.
 - (C) Because it is considered the most dynamic and interesting proportion.
 - (D) Because equal divisions can make a person look shorter and wider.

Ans :

(D) Because equal divisions can make a person look shorter and wider.

Equal divisions in a garment, such as a 50/50 split between the top and bottom, can create a horizontal line that visually cuts the body in half. This can make a person appear shorter and wider.

- 204.** The principle of proportion in apparel design applies to which of the following?
- (A) Only the relationship between the colors used.
 - (B) Only the relationship between the textures used.
 - (C) Only the relationship between the different shapes in a pattern.
 - (D) The relationship of size, color, shape, and texture of all parts to each other and the whole.

Ans :

(D) The relationship of size, color, shape, and texture of all parts to each other and the whole. The principle of proportion is comprehensive. It involves creating a pleasing relationship in the

size, color, shape, and texture of all the different parts of a design, ensuring they relate well to each other and to the overall garment.

- 205.** The skillful blending of all the elements in such a way that it is not apparent where one part leaves off and the other begins is the hallmark of a design with good:
- (A) Proportion
 - (B) Emphasis
 - (C) Contrast
 - (D) Color

Ans :

(A) Proportion

In a design with good proportion, the elements are so skillfully blended that the divisions are not obvious or jarring. The relationship between the parts feels natural and integrated, creating a pleasing and unified whole.

Direction : Read the following case study and answer the following questions.

A modern artist is commissioned to create a fabric print for a contemporary art gallery's gift shop. He decides to move away from recognizable shapes and creates a design using free-form, non-representational shapes. The design consists of bold, sweeping curves and sharp, angular forms that do not resemble any specific object in nature or the man-made world. One person might look at the print and see a representation of chaotic energy, while another might see a sense of calm and flow. The beauty of the design lies in this ambiguity and its ability to evoke different feelings and associations in different people. The artist has successfully created a pattern that is purely about the interplay of line and form, without being tied to a literal interpretation. This type of design, which relies on personal association rather than direct representation, is a distinct category of shape used in art and design.

- 206.** The free-form shapes used by the artist, which do not resemble any specific object, are known as what type of shapes?
- (A) Natural shapes
 - (B) Stylized shapes
 - (C) Geometric shapes
 - (D) Abstract shapes

Ans :

(D) Abstract shapes

Abstract shapes are free-form and do not resemble any specific object. They can represent different things to different people based on personal association, making them open to interpretation.

- 207.** If the artist had instead used simplified or modified shapes of flowers and leaves, what type of shapes would these be?

(A) Natural shapes
(B) Stylized shapes
(C) Geometric shapes
(D) Abstract shapes

Ans :

(B) Stylized shapes

Stylized shapes are simplified or modified natural shapes. They are recognizable but may have some parts distorted or exaggerated for artistic effect, creating a more decorative or simplified version of the original object.

- 208.** Shapes that copy nature or common man-made objects, such as a realistic drawing of a tree, are called:

(A) Natural shapes
(B) Stylized shapes
(C) Geometric shapes
(D) Abstract shapes

Ans :

(A) Natural shapes

Natural shapes are those that are a direct copy or representation of shapes found in nature or common man-made objects. They aim for realism in their depiction of the object.

- 209.** What is the term for the grouping of shapes, whether of one type or a combination of types, to form a design?

(A) A line
(B) A texture
(C) A pattern
(D) A color

Ans :

(C) A pattern

A pattern is formed when shapes are grouped together. This grouping can consist of one type of shape or a combination of different types, and their arrangement can also be natural, stylized, geometric, or abstract.

- 210.** What are the two fundamental elements that, when combined, create the plan of every design?

(A) Color and Texture

(B) Line and Shape
(C) Light and Shadow
(D) Proportion and Balance

Ans :

(B) Line and Shape

Line and shape are two closely related elements that together create the pattern or plan of every design. Every decorative detail we see is essentially a combination of different lines and the shapes they form.

CHAPTER 09

FASHION DESIGN AND

MERCHANDISING

SUMMARY

1. INTRODUCTION

Fashion design and merchandising are prominent career options in today's world, particularly in India, where a thriving textile industry provides a strong foundation . The concept of merchandising has evolved from simple bartering to a complex business function that began with the rise of 'ready-to-wear' garments in 1920 . This specialization satisfies both the creative and materialistic needs of people .

2. SIGNIFICANCE

The study of fashion design and merchandising provides a comprehensive understanding of how the fashion business operates . This field includes all processes, from producing raw materials to the retail stores that sell finished fashion merchandise . It equips individuals with the knowledge to respond to fashion trends and determine their suitability for retail operations, encompassing the key functions of 'planning, buying and selling' .

3. BASIC CONCEPTS

Fashion has grown into a major global business that employs millions of people in various sectors including design, manufacturing, marketing, and retail . To succeed, one must understand the nature of fashion, how it functions, and the factors that influence it .

4. FASHION TERMINOLOGY

Understanding specific terminology is essential for navigating the fashion industry:

- **Fashion:** Refers to the style or styles that are most popular at a particular time .

- **Style:** A specific look or characteristic in apparel or accessories. A style can go in and out of fashion but always remains as a distinct entity .
- **Fads:** These are short-lived fashions that may only last for a single season, as they lack the design strength to maintain long-term consumer interest .
- **Classic:** Styles that never become completely obsolete and remain accepted for extended periods. They are characterized by a simplicity of design that prevents them from being easily dated .

5. FASHION DEVELOPMENT

Knowledge of fashion history is crucial for designers to make informed decisions for current and future trends, as ideas from the past are often reinterpreted .

5.1 FRANCE THE CENTRE OF FASHION

France's dominance in international fashion began in the 18th century when the court of King Louis XIV in Paris became the trendsetter for Europe . Early fashion, known as **couture** (the art of dressmaking), consisted of intricate, handmade, and custom-fitted clothing for the wealthy . The Industrial Revolution introduced technological advances like the spinning jenny and power loom, and later the sewing machine, which democratized fashion by making it more accessible . This period also saw the creation of Levi Strauss's durable denim pants and the rise of ready-to-wear separates for women . The term **prêt-à-porter** (ready-to-wear) became widely known in the 1960s, describing factory-made clothing sold in standardized sizes .

6. FASHION EVOLUTION

Ans :

(B) At the yarn stage.

Dyeing done at the yarn stage helps to create a variety of multifarious designs. The Ikat technique, where yarns are tie-dyed before weaving, is a classic example of creating a patterned fabric through this method.

- 187.** The design created by the Ikat process is considered what type of design?
- (A) An applied design, like printing or embroidery.
 - (B) A surface design that is added after weaving.
 - (C) A temporary design that will wash out easily.
 - (D) A structural design, as the pattern is part of the fabric's construction.

Ans :

(D) A structural design, as the pattern is part of the fabric's construction.

Since the color is applied to the yarns before they are woven, the resulting pattern is an integral part of the fabric's structure. This makes it a structural design, not a surface decoration added later.

- 188.** What is the most common stage for dyeing fabric to produce simple, single-colored materials?
- (A) At the fiber stage.
 - (B) At the yarn stage.
 - (C) At the fabric stage.
 - (D) After the garment has been stitched.

Ans :

(C) At the fabric stage.

Dyeing at the fabric stage is the most common and economical method for producing large quantities of single-colored fabrics. It is also used for creating designs through techniques like tie-and-dye and batik on woven fabric.

- 189.** The technique of tightly winding thread around the yarn to prevent dye from reaching certain areas is known as:
- (A) Resist dyeing.
 - (B) Block printing.
 - (C) Batik.
 - (D) Weaving.

Ans :

(A) Resist dyeing.

The oldest form of designing with color is resist dyeing. This involves using a resist material, such as thread or wax, to block the dye from penetrating certain areas of the material, thereby creating a pattern.

- 190.** Besides Ikat, what other common fabric designs are created by weaving with pre-dyed yarns?

- (A) Plain white fabrics only.
- (B) Simple tie-and-dye patterns.
- (C) Printed floral designs.
- (D) Woven stripes, checks, and plaids.

Ans :

(D) Woven stripes, checks, and plaids.

Dyeing at the yarn stage is commonly used to create designs like woven stripes, checks, and plaids. Different colored yarns are interlaced during weaving to produce these classic patterns directly in the fabric structure.

Direction : Read the following case study and answer the following questions.

A designer is creating a special occasion dress for a client who wants to accentuate her face and shoulders. The main body of the dress is made from a simple, dark navy blue fabric. To create a focal point, the designer adds a beautifully embroidered yoke around the neckline. The yoke is made from a contrasting cream-colored fabric and is embellished with bright, colorful thread work and small, sparkling beads. When someone looks at the dress, their eye is immediately drawn to this detailed and decorative area, which in turn draws attention to the wearer's face. The rest of the dress is kept deliberately simple to avoid competing with this area of interest. This technique of creating a center of interest that first attracts the viewer's eye is a masterful application of a key design principle.

- 191.** The designer's use of the decorated yoke to create a center of interest is an application of which principle of design?
- (A) Balance
 - (B) Proportion
 - (C) Rhythm
 - (D) Emphasis

Ans :

(D) Emphasis

Emphasis, or creating a focal point, is the principle of design that first attracts the viewer's eye. It adds interest to a garment by focusing attention on a specific area, as seen with the embroidered yoke.

- 192.** Why are details that focus on the face particularly effective in apparel design?
- (A) Because the face is generally hidden when

- **Set Designer:** Conceptualize designs for movies, television, theatre, and trade shows .
- **Interior Designer:** Combine form and function to create beautiful and functional interior spaces for homes, offices, and hotels .

MULTIPLE CHOICE QUESTION

1. The recent boom in which field has led to new prospects in India's long-thriving textile industries?

(A) Information Technology
(B) Agricultural Science
(C) Fashion Designing
(D) Automotive Engineering

Ans :

(C) Fashion Designing

In a country like India with a rich history in textile industries, the recent surge in fashion designing has opened up new and exciting opportunities within the existing garment and accessory design domain, blending traditional crafts with modern trends.

2. The fashion industry is considered a significant creative sector because it satisfies which two fundamental human needs?

(A) The need for conformity and the need for tradition
(B) The creative urge and the materialistic needs of people
(C) The demand for uniformity and the desire for simplicity
(D) The requirement for durability and the need for utility

Ans :

(B) The creative urge and the materialistic needs of people

The fashion industry serves as a powerful outlet for artistic expression and creativity while also catering to people's desires for tangible goods, apparel, and accessories, thereby fulfilling both creative and materialistic aspirations.

3. What does the field of fashion merchandising encompass to ensure its success in the retail environment?

(A) Manufacturing, advertising, and transportation only

(B) Designing, sourcing, and legal compliance only

(C) Research, development, and customer service

(D) Planning, buying, and selling of fashion items

Ans :

(D) Planning, buying, and selling of fashion items

At its core, fashion merchandising is the business process that involves the strategic planning of what merchandise to offer, the procurement or buying of that merchandise, and the ultimate selling of it to the consumer to maximize profitability.

4. Which statement accurately describes what the study of fashion design and merchandising prepares students for?

(A) It primarily prepares students to become textile manufacturers and weavers.

(B) It equips students with knowledge on how the fashion business operates.

(C) It focuses exclusively on the history of international costume design.

(D) It trains students mainly in the legal aspects of the apparel industry.

Ans :

(B) It equips students with knowledge on how the fashion business operates.

The study of fashion design and merchandising provides a comprehensive understanding of the entire fashion ecosystem, including how the business functions, what to expect while working in it, and the processes from raw material to retail.

5. Assertion (A): The birth of 'ready-to-wear' in 1920 was a pivotal moment for the fashion business.

Reason (R): Retailers quickly realized that the sale of such garments was a significant business opportunity, making fashion apparel a key merchandise type.

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

(C) (A) is true, but (R) is false.

(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The introduction of 'ready-to-wear' garments revolutionized the fashion industry. Its success was driven by retailers recognizing its immense

commercial potential, which rapidly established fashion apparel as a major category in department stores and spurred the growth of fashion merchandising.

6. What is the term for any particular look, characteristic, or shape in apparel or accessories?
- (A) Fad
 - (B) Fashion
 - (C) Classic
 - (D) Style

Ans :

(D) Style

A style is a distinct and identifiable look or feature in clothing or accessories. While styles can fluctuate in popularity, becoming fashionable or unfashionable, the specific characteristics that define that style remain constant.

7. From the given options, identify the correctly matched pair of a fashion term and its definition.
- (A) Fad: A style that remains accepted for an extended period.
 - (B) Fashion: The style most popular at a given time.
 - (C) Classic: A short-lived fashion that lasts a single season.
 - (D) Style: The process of selling clothes in a retail store.

Ans :

(B) Fashion: The style most popular at a given time.

The term 'fashion' specifically refers to the style or set of styles that have achieved the highest level of popularity and acceptance among a large group of consumers at a particular point in time.

8. Which of the following is an example of a 'fad'?
- (A) Polo shirts
 - (B) Blazer jackets
 - (C) Baggy pants
 - (D) A Chanel suit

Ans :

(C) Baggy pants

Baggy pants are considered a fad because they were a short-lived fashion trend that gained immense popularity quickly but lacked the timeless design strength to hold consumer attention for an extended period, eventually fading away.

9. What term describes styles that are characterized by simplicity of design, which keeps them from being easily dated and allows them to remain accepted for long periods?
- (A) Fads
 - (B) Trends
 - (C) Antiques
 - (D) Classics

Ans :

(D) Classics

Classics are timeless styles that are never entirely out of fashion. Their defining feature is a simple, clean design that prevents them from becoming obsolete, ensuring their continued acceptance over many seasons or even years.

10. Which of the following statements about fads is incorrect?
- (A) They have strong design strength to hold attention.
 - (B) They can come and go in a single season.
 - (C) They often feature unmatched buttons or hot pants.
 - (D) They are considered to be short-lived fashions.

Ans :

(A) They have strong design strength to hold attention.

The defining characteristic of a fad is its lack of enduring design strength. This is precisely why fads fail to hold consumer attention for long periods and quickly fade from popularity, unlike classic styles.

11. During which historical period did fashion changes begin to accelerate due to the discovery of different cultures and new fabrics?
- (A) The Middle Ages
 - (B) The Renaissance
 - (C) The Industrial Revolution
 - (D) The Ancient Era

Ans :

(B) The Renaissance

The Renaissance was a period of great exploration and discovery, which exposed Western civilization to new cultures, customs, and textiles. This influx of new ideas and materials spurred a desire for novelty and accelerated the pace of fashion change.

12. In the 18th century, which city became the fashion capital of Europe, largely due to its royal court setting trends?

- (A) London
- (B) Rome
- (C) Paris
- (D) Vienna

Ans :

- (C) Paris

During the 18th century, the court of King Louis XIV in Paris became the epicenter of taste and style. The trends set by its members established Paris's dominance as the undisputed fashion capital of Europe.

- 13.** What French term was used for the art of dressmaking, where clothes were handmade and custom-fitted?
- (A) Prêt-à-porter
 - (B) Couturier
 - (C) Merchandising
 - (D) Couture

Ans :

- (D) Couture

'Couture' is the French term for the high art of dressmaking. It refers to the creation of exclusive, custom-fitted clothing that is meticulously crafted by hand from start to finish to fit a client's specific measurements.

- 14.** Which pair correctly identifies the terms for male and female designers in the art of dressmaking?
- (A) Male: Couturier, Female: Couturiere
 - (B) Male: Couturiere, Female: Couturier
 - (C) Male: Designer, Female: Seamstress
 - (D) Male: Artisan, Female: Modiste

Ans :

- (A) Male: Couturier, Female: Couturiere

In the world of couture, the correct French terminology designates a male designer as a 'couturier' and his female counterpart as a 'couturiere'. These terms signify a high level of artistry in dressmaking.

- 15.** What major historical event marked the beginning of technological advances in textile production and led to the creation of a middle class with spending power?
- (A) The French Revolution
 - (B) The American Revolution
 - (C) The Industrial Revolution
 - (D) The Renaissance Period

Ans :

- (C) The Industrial Revolution

The Industrial Revolution was a turning point that introduced key inventions like the power loom, leading to mass production of textiles. This economic shift also created a new middle class with disposable income for luxuries like better clothing.

- 16.** Assertion (A): The invention of the sewing machine was a key factor in democratizing fashion.
Reason (R): It transformed dressmaking from a painstaking handcraft into an industry, making fashionable clothing more accessible and affordable for everyone.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The invention of the sewing machine was revolutionary. It industrialized garment production, drastically reducing the time and cost of making clothes. This made fashion accessible beyond the wealthy elite, effectively democratizing it for the general public.

- 17.** What was the original purpose of the durable fabric used by Levi Strauss in 1849 to create long-wearing pants, which later became known as denims?
- (A) For making military uniforms
 - (B) For creating formal suits
 - (C) For producing ship sails
 - (D) For tents and wagon covers

Ans :

- (D) For tents and wagon covers

The rugged fabric that Levi Strauss famously used to create the first denim pants was originally intended for making durable items like tents and wagon covers. Its strength and longevity made it ideal for workwear.

- 18.** Which development in the 1880s was a significant step towards the manufacture of ready-to-wear clothes for women?
- (A) The introduction of the Chanel suit
 - (B) The popularity of custom-made gowns
 - (C) Women started wearing separate skirts and blouses

- (B) 1-c, 2-a, 3-d, 4-b
- (C) 1-a, 2-b, 3-c, 4-d
- (D) 1-b, 2-d, 3-a, 4-c

Ans :

- (D) 1-b, 2-d, 3-a, 4-c

The Introduction phase is when designers present new styles. The Rise phase sees the style being adopted by more people. The Peak is its height of popularity. Rejection occurs when consumers move on to new looks.

- 30.** What is the primary goal of fashion merchandising, often summarized as the 'five rights'?
- (A) To maximize designer creativity and artistic expression
 - (B) To ensure the right merchandise is at the right place, time, and price
 - (C) To focus solely on the advertising and promotion of clothing
 - (D) To manage the legal contracts between designers and retailers

Ans :

- (B) To ensure the right merchandise is at the right place, time, and price

Fashion merchandising is the strategic planning required to maximize profits by ensuring that the right products are available to consumers at the right time, in the right place, in the right quantities, and at the right price.

- 31.** What is the role of a fashion merchandiser in the manufacturing process?
- (A) To operate the sewing machines and assemble the garments
 - (B) To design the initial sketch of the clothing item
 - (C) To find the best way to manufacture an item considering price
 - (D) To personally deliver the finished goods to retail stores

Ans :

- (C) To find the best way to manufacture an item considering price

In manufacturing, a fashion merchandiser applies knowledge of fabrics and construction to translate a designer's vision into a producible item, finding the most efficient and cost-effective way to make it while considering the target market and price point.

- 32.** Which of the following is a key responsibility of a fashion merchandiser involved in buying for a retail store?
- (A) Ignoring fashion trends to focus on store inventory
 - (B) Buying items without considering the target market
 - (C) Selecting merchandise based only on personal taste
 - (D) Being well-versed in fashion trend analysis and forecasting

Ans :

- (D) Being well-versed in fashion trend analysis and forecasting

A merchandiser buying for a store must have strong skills in trend analysis and forecasting. This allows for more accurate ordering of items that will appeal to the store's target market and sell successfully.

- 33.** How do fashion merchandisers primarily promote a designer's items to potential buyers?
- (A) Through fashion shows where creations are presented to capture attention
 - (B) By offering large discounts directly to consumers online
 - (C) By writing academic articles about the designer's influence
 - (D) By focusing promotional efforts only on local newspapers

Ans :

- (A) Through fashion shows where creations are presented to capture attention

Fashion shows are a key promotional tool used by merchandisers. They create an exaggerated visual experience to showcase a designer's collection, capture the imagination of potential buyers, and generate interest for large quantity orders from stores.

- 34.** Assertion (A): A fashion merchandiser must have strong creative and visual skills.
Reason (R): They often offer suggestions on how to display items within a store and use visual effects in fashion shows to promote products.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

into new apparel.

- (B) The fashion is in such high demand that it is copied widely.
- (C) Consumers have turned to new looks, beginning a new cycle.
- (D) Styles are often put on sale racks as people tire of them.

Ans :

(D) Styles are often put on sale racks as people tire of them.

In the decline phase, a style has become so over-saturated through mass production that fashion-conscious consumers grow tired of it. Consequently, retailers often place these declining styles on sale racks to clear inventory.

- 25.** The final phase of the fashion cycle, where consumers have moved on to new looks, is known as what?
- (A) Culmination
 - (B) Adaptation
 - (C) Obsolescence
 - (D) Introduction

Ans :

(C) Obsolescence

The last phase of the fashion cycle is rejection or obsolescence. At this point, the majority of consumers have abandoned the style in favor of new fashions, effectively marking the end of its life cycle and starting a new one.

- 26.** In the introductory stage of the fashion cycle, how do designers create new styles?
- (A) By exactly replicating styles from the previous season
 - (B) By changing elements like line, shape, fabric, and color
 - (C) By only using classic and traditional design elements
 - (D) By conducting surveys on consumer-disliked styles

Ans :

(B) By changing elements like line, shape, fabric, and color

In the introduction phase, designers craft new styles by creatively altering and reinterpreting fundamental design elements such as line, color, shape, fabric, and detailing, and the relationships between these elements to offer something fresh to the public.

- 27.** A boutique introduces a unique style of jacket. It gets noticed and a few celebrities start wearing it. Soon, other stores start selling similar jackets. Which stage of the fashion cycle has the jacket reached?

- (A) Introduction
- (B) Rejection
- (C) Increase in Popularity
- (D) Decline

Ans :

(C) Increase in Popularity

The style has moved past the introduction stage. As it is being purchased, worn, and seen on influential people, and other retailers are beginning to notice its potential, it is clearly in the "Increase in Popularity" or rise phase.

- 28.** Assertion (A): The fashion cycle is a continuous process.

Reason (R): The rejection of one style by consumers directly leads to the introduction and acceptance of a new style, thus beginning a new cycle.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The fashion cycle is inherently continuous because consumer behavior drives it forward. As one style falls out of favor and is rejected, consumers actively seek new looks, which fuels the introduction of the next fashion trend, ensuring the cycle repeats.

- 29.** Match the phase of the Fashion Cycle in Column I with its key characteristic in Column II.

	Column I		Column II
1.	Introduction	a.	Style is at the height of its popularity
2.	Rise	b.	Designers offer new styles to the public
3.	Peak	c.	Consumers have turned to new looks
4.	Rejection	d.	New fashion is purchased and seen by many

(A) 1-d, 2-c, 3-b, 4-a

Ans :

(B) 1-c, 2-d, 3-a, 4-b

Demographic segmentation is based on population statistics like age and income. Geographic segmentation uses location and climate. Psychographic segmentation focuses on lifestyle and interests. Behavioural segmentation is based on consumer opinions and usage of products.

40. Segmenting a market based on the social activities, interests, and leisure pursuits of consumers falls under which category?
- (A) Demographic Segmentation
 - (B) Geographic Segmentation
 - (C) Behavioural Segmentation
 - (D) Psychographic Segmentation

Ans :

(D) Psychographic Segmentation

Psychographic segmentation groups consumers based on their lifestyle attributes, including their interests, hobbies, social activities, opinions, and values. This provides deeper insight into consumer motivations beyond basic demographics.

41. Which of the following is a critical factor in Geographic Segmentation for clothing merchandise?
- (A) The average income level of the population
 - (B) The educational qualifications of consumers
 - (C) The climate of various places
 - (D) The consumers' opinions on specific brands

Ans :

(C) The climate of various places

Climate is a crucial factor in geographic segmentation for apparel. The choice of clothing is highly dependent on weather conditions, so merchandise selection must vary significantly between regions with different climates.

42. Consider the following statements regarding the "Merchandising Rights":
1. The right merchandise must meet customer wants.
 2. The right place relates to the accessibility of the merchandise.
 3. The right quantity involves balancing sales volume and inventory.
 4. The right price should ensure profit while meeting customer expectations.

Which of the above statements are correct?

- (A) 1 and 3 only
- (B) 2 and 4 only

(C) 1, 2, and 3 only

(D) 1, 2, 3, and 4

Ans :

(D) 1, 2, 3, and 4

All four statements correctly define the core "rights" of merchandising. Successful merchandising hinges on having the right product, in the right place, in the right quantity, and at the right price to satisfy customers and achieve profitability.

43. What does determining the "Right Price" for a fashion item involve for a merchandiser?
- (A) Finding a price that is high enough for profit yet low enough to be competitive
 - (B) Setting the price as high as possible regardless of competition
 - (C) Setting a price that is low enough to just cover the costs
 - (D) Matching the price exactly to the main competitor's price

Ans :

(A) Finding a price that is high enough for profit yet low enough to be competitive

Setting the right price is a balancing act. The merchandiser must calculate a price that covers costs and generates a profit for the store, while also being competitive in the market and aligning with what customers expect to pay.

44. Which pair correctly matches the retail store type with its description?
- (A) Chain Store: An owner and family-operated single neighborhood store.
 - (B) Department Store: Consists of separate sections for different merchandise categories.
 - (C) Small Single-unit Store: Shares a brand and central management across multiple outlets.
 - (D) Department Store: A temporary market stall selling a single product type.

Ans :

(B) Department Store: Consists of separate sections for different merchandise categories.

A department store is characterized by its organization into separate sections, or departments, each dedicated to a specific category of goods such as clothing, electronics, or home goods, all under one roof.

45. What is a defining characteristic of chain stores in the retail industry?
- (A) They are always owned and operated by a

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

Creativity and visual merchandising skills are essential for a merchandiser. These skills are applied when promoting items through visually compelling fashion shows and when advising retailers on how to best display the products in-store to attract customers.

- 35.** What is the term for the specialized management function within the fashion industry that moves products from the designer's showroom to the retail sales floor?

(A) Retail Organisation Merchandising
(B) Export House Merchandising
(C) Buying Agency Merchandising
(D) Production Line Merchandising

Ans :

(A) Retail Organisation Merchandising
Retail Organisation Merchandising is the specific business function that oversees the entire process of moving fashion from the designer to the consumer. It involves the internal planning within a retail company to ensure the right merchandise is available and sold profitably.

- 36.** What is the primary function of a Buying Agency in the fashion industry?

(A) To manufacture garments for various designers
(B) To provide goods buying consultancy and procurement services
(C) To design and host promotional fashion shows
(D) To manage the finances of large retail stores

Ans :

(B) To provide goods buying consultancy and procurement services

A buying agency acts as a procurement office for buyers. Its main role is to provide expert consultancy on sourcing and buying goods, which includes identifying vendors, negotiating costs, and ensuring quality control on behalf of their clients.

- 37.** In an export house, what is the key difference between a buyer merchandiser and a production merchandiser?

(A) The buyer merchandiser handles finances, while the production merchandiser handles marketing.
(B) The buyer merchandiser links the buyer and manufacturer; the production merchandiser

links production and the buyer merchandiser.

- (C) The buyer merchandiser works on clothing, while the production merchandiser works on accessories.
(D) The buyer merchandiser is based in the retail store, while the production merchandiser is based in the factory.

Ans :

(B) The buyer merchandiser links the buyer and manufacturer; the production merchandiser links production and the buyer merchandiser.

The buyer merchandiser is the link between the client (buyer) and the factory, focusing on sourcing and sampling. The production merchandiser is the link between the factory floor and the buyer merchandiser, ensuring production schedules and quality are met.

- 38.** The strategy that involves dividing a larger market into subsets of consumers who have common needs is known as what?

(A) Market expansion
(B) Market saturation
(C) Market segmentation
(D) Market diversification

Ans :

(C) Market segmentation

Market segmentation is a core marketing strategy. It involves breaking down a broad target market into smaller, more manageable segments of consumers who share similar characteristics, needs, or behaviors, allowing for more focused marketing efforts.

- 39.** Match the type of market segmentation in Column I with its corresponding basis in Column II.

	Column I		Column II
1.	Demographic	a.	Lifestyle, interests, social activities
2.	Geographic	b.	Opinion on specific products or services
3.	Psychographic	c.	Population, age, sex, income
4.	Behavioural	d.	Cities, states, regions, climate

- (A) 1-d, 2-a, 3-b, 4-c
(B) 1-c, 2-d, 3-a, 4-b
(C) 1-b, 2-c, 3-d, 4-a
(D) 1-a, 2-b, 3-c, 4-d

financials, and how different styles will fit into a consumer's budget to ensure profitability.

- 51.** Assertion (A): Excellent communication skills are essential for a career in fashion merchandising.
Reason (R): Merchandisers must negotiate prices with manufacturers and effectively sell their fashion choices to the public through advertising and press releases.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(C) (A) is true, but (R) is false.
(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
Communication skills are non-negotiable in this field. A merchandiser's success depends on their ability to negotiate favorable terms with suppliers and to persuasively communicate the value of their fashion selections to the public through various marketing channels.

- 52.** What is the primary difference between a certificate/diploma program and a bachelor's degree in fashion merchandising?
- (A) A certificate program is more expensive than a bachelor's degree.
(B) A bachelor's degree focuses only on business, while a certificate focuses on art.
(C) A bachelor's degree is for designers, while a certificate is for merchandisers.
(D) A certificate is shorter and job-focused; a bachelor's degree is longer and includes liberal arts.

Ans :

(D) A certificate is shorter and job-focused; a bachelor's degree is longer and includes liberal arts.
Certificate or diploma programs are short-term (6-12 months) and concentrate on specific job skills for quick entry into the field. A bachelor's degree is a 4-year program that combines fashion and business courses with a broad liberal arts education.

- 53.** Which statement accurately reflects the career scope for fashion designers?
- (A) They are exclusively employed by large multinational corporations.

- (B) About one-third of professional fashion designers are self-employed.
(C) They can only work in the field of apparel and clothing design.
(D) Career opportunities in fashion design are declining rapidly.

Ans :

(B) About one-third of professional fashion designers are self-employed.
The fashion industry offers significant opportunities for entrepreneurship. A substantial portion, about one-third, of professional fashion designers are self-employed, running their own businesses or fashion labels, which is a major motivator for aspirants.

- 54.** Which fashion career professional is mainly responsible for designing window displays, styling mannequins, and creating props and accents in a store?
- (A) Fashion Designer
(B) Set Designer
(C) Visual Merchandise Designer
(D) Interior Designer

Ans :

(C) Visual Merchandise Designer
A Visual Merchandise Designer is responsible for the overall visual presentation of a store. Their tasks include creating appealing window displays, styling mannequins, arranging merchandise, and designing props to enhance the shopping environment and marketing campaigns.

- 55.** Set designers in the fashion industry are primarily assigned to conceptualize designs for which productions?
- (A) Residential homes and offices
(B) Clothing and apparel collections
(C) Retail store and window displays
(D) Movies, television, and theatre

Ans :

(D) Movies, television, and theatre
Set designers conceptualize and create the physical environments for productions. Their work is crucial in movies, television shows, and theatre, where they design sets that align with the script and director's vision. They may also design for trade shows.

- 56.** What is the main goal of interior designers, as described in the context of fashion-related careers?
- (A) To create clothing that is both functional and

single family.

- (B) They sell only one specific type of product in all locations.
- (C) They operate independently without any central management.
- (D) They share a brand and have standardized business methods.

Ans :

(D) They share a brand and have standardized business methods.

Chain stores are a group of retail outlets that operate under the same brand name and are centrally managed. This structure allows them to have standardized business practices, methods, and branding across all locations.

- 46.** The major divisions in a large retail organization typically include all of the following EXCEPT:
- (A) Merchandising division
 - (B) Manufacturing division
 - (C) Sales promotion division
 - (D) Finance and control division

Ans :

(B) Manufacturing division

While retail organizations have divisions for merchandising (buying/selling), sales promotion, and finance, they typically do not have their own manufacturing division. They purchase goods from external manufacturers or designers rather than producing them in-house.

- 47.** Which division in a retail organization is responsible for advertising, visual merchandising, and publicity?
- (A) The Finance and control division
 - (B) The Operational division
 - (C) The Merchandising division
 - (D) The Sales and promotion division

Ans :

(D) The Sales and promotion division

The Sales and promotion division is tasked with all activities that market the store and its products to the public. This includes creating advertisements, designing in-store visual displays (visual merchandising), and managing publicity and public relations.

- 48.** Why is forecasting ability an essential skill for a fashion merchandiser?
- (A) It helps in accurately predicting the company's financial profits for the year.
 - (B) It allows them to keep well ahead of fashion

trends and capitalize on them in time.

- (C) It is required for negotiating prices with clothing manufacturers effectively.
- (D) It assists in managing the day-to-day operations of the retail store.

Ans :

(B) It allows them to keep well ahead of fashion trends and capitalize on them in time.

Forecasting is crucial because the fashion industry is time-sensitive. A merchandiser must anticipate upcoming trends well in advance to ensure that the right products can be developed, produced, and delivered to stores exactly when consumer demand peaks.

- 49.** According to the text, which three divergent skills must a successful fashion designer and merchandiser possess?
- (A) Forecasting ability, analytical ability, and communication ability
 - (B) Artistic talent, manufacturing skill, and legal expertise
 - (C) Historical knowledge, textile expertise, and financial accounting
 - (D) Public speaking, trend spotting, and human resource management

Ans :

(A) Forecasting ability, analytical ability, and communication ability

To succeed in this field, one needs a combination of skills: the forecasting ability to anticipate trends, the analytical ability to understand the financial side of the business, and the communication ability to negotiate and sell ideas.

- 50.** What does the 'analytical ability' required of a fashion merchandiser primarily involve?
- (A) Analyzing the chemical composition of different textile fibers
 - (B) Analyzing the artistic merit and design quality of a garment
 - (C) Analyzing the economy, company finances, and consumer budgets
 - (D) Analyzing the historical fashion trends of the past century

Ans :

(C) Analyzing the economy, company finances, and consumer budgets

The analytical ability of a merchandiser refers to the 'dollars and sense' part of the job. It involves analyzing economic conditions, company

(D) The invention of the power loom for silk

Ans :

(C) Women started wearing separate skirts and blouses

The trend of women wearing separate skirts and blouses was a crucial move towards ready-to-wear. It allowed for easier size adjustments and let working-class women create varied outfits by mixing separates, boosting demand for manufactured garments.

19. What does the term 'Prêt-à-porter' refer to in the fashion industry?

- (A) Custom-made clothing for a specific client
- (B) Factory-made clothing sold in standardized sizes
- (C) A collection of handmade fashion accessories
- (D) The art of designing high-fashion garments

Ans :

(B) Factory-made clothing sold in standardized sizes

'Prêt-à-porter' is a French term that translates to 'ready-to-wear'. It describes clothing that is mass-produced in factories in standardized sizes and sold in finished condition, as distinct from custom-made haute couture.

20. Match the fashion personality in Column I with their significant contribution in Column II.

	Column I		Column II
1.	King Louis XIV	a.	Invented the foot treadle for the sewing machine
2.	Isaac Singer	b.	Created the first full prêt-à-porter line
3.	Levi Strauss	c.	His court made Paris the fashion capital
4.	Yves Saint Laurent	d.	Used durable fabric to make denims

- (A) 1-c, 2-a, 3-d, 4-b
- (B) 1-b, 2-d, 3-a, 4-c
- (C) 1-d, 2-c, 3-b, 4-a
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-c, 2-a, 3-d, 4-b

King Louis XIV's court set trends, making Paris a fashion capital. Isaac Singer developed the foot treadle. Levi Strauss created denims from durable fabric. Yves Saint Laurent was the first French couturier with a full prêt-à-porter line.

21. What is the visual representation of the way in which fashion changes over time, showing its introduction, rise, peak, and decline?

- (A) A linear graph
- (B) A pie chart
- (C) A bell-shaped curve
- (D) A bar diagram

Ans :

(C) A bell-shaped curve

The fashion cycle is visually represented by a bell-shaped curve. This curve effectively illustrates the stages of a style's acceptance, from its introduction and rise in sales, to its peak popularity, and eventual decline and rejection.

22. Arrange the stages of the fashion cycle in the correct chronological order.

- 1. Peak of Popularity
 - 2. Introduction of a Style
 - 3. Rejection of a Style
 - 4. Decline in Popularity
 - 5. Increase in Popularity
- (A) 2, 5, 1, 4, 3
 - (B) 2, 1, 5, 4, 3
 - (C) 1, 2, 5, 3, 4
 - (D) 5, 2, 1, 4, 3

Ans :

(A) 2, 5, 1, 4, 3

The fashion cycle follows a predictable sequence: a new style is introduced, it increases in popularity, reaches a peak, then begins to decline in popularity, and is finally rejected as consumers move to a new style.

23. During which phase of the fashion cycle are many manufacturers likely to produce adaptations of a style at different price levels?

- (A) Introduction of a Style
- (B) Peak of Popularity
- (C) Decline in Popularity
- (D) Rejection of a Style

Ans :

(B) Peak of Popularity

When a fashion reaches the height of its popularity, it is in high demand. This prompts many manufacturers to create copies or adaptations of the style to sell at various price points, capitalizing on its widespread acceptance.

24. Which statement best describes the "Decline in Popularity" phase of the fashion cycle?

- (A) Designers first interpret their creative ideas

beautiful

- (B) To design sets for large-scale theatre productions
- (C) To perfectly combine form with function in a given space
- (D) To style mannequins for retail window displays

Ans :

(C) To perfectly combine form with function in a given space

The primary objective of an interior designer is to create spaces that are not only aesthetically pleasing (form) but also safe and functional for the people using them. They enhance the beauty and utility of interior spaces.

- 57.** Which of the following is NOT listed as a popular fashion design career?
- (A) Visual Merchandise Designer
 - (B) Textile Chemical Engineer
 - (C) Set Designer
 - (D) Interior Designer

Ans :

(B) Textile Chemical Engineer

The text lists Visual Merchandise Designer, Set Designer, and Interior Designer as popular career paths. While related to textiles, Textile Chemical Engineering is a distinct engineering field and not listed as a primary fashion design career in this context.

- 58.** In fashion sketching, what is the term for an outline or rough sketch of a fashion figure?
- (A) Croquis
 - (B) Mannequin
 - (C) Silhouette
 - (D) Prototype

Ans :

(A) Croquis

A 'croquis' is the specific term used in fashion for a quick, rough sketch of a figure, which serves as the template or base upon which designers draw their apparel ideas. It is the foundational outline for fashion illustration.

- 59.** A fashion figure, or croquis, is constructed using which part of the body as the unit of measurement?
- (A) The hand
 - (B) The foot
 - (C) The torso
 - (D) The head

Ans :

(D) The head

The standard method for constructing a well-proportioned fashion figure is to use the head as the basic unit of measurement. The total height of the figure is typically 8.5 to 10 times the length of the head.

- 60.** What is the purpose of developing a fashion figure or croquis?
- (A) To create a final, wearable garment for a fashion show
 - (B) To serve as a form on which to communicate design ideas
 - (C) To act as a physical mannequin for displaying clothes in a store
 - (D) To be a pattern for cutting fabric for mass production

Ans :

(B) To serve as a form on which to communicate design ideas

A croquis is not a final product but a communication tool. Its purpose is to provide a standardized, elongated human form that allows designers to effectively sketch, illustrate, and communicate their design ideas for apparel before production.

- 61.** Which of the following pairs of fashion cycle stages and their descriptions is incorrectly matched?
- (A) Introduction: Designers offer new styles to the public.
 - (B) Peak: Many manufacturers copy the style at different price levels.
 - (C) Decline: The style is seen on celebrities for the first time.
 - (D) Rejection: Consumers turn to new looks, starting a new cycle.

Ans :

(C) Decline: The style is seen on celebrities for the first time.

Seeing a style on celebrities for the first time is characteristic of the Introduction or Rise stage, not the Decline stage. During the Decline stage, the style's popularity is fading, and it is being sold at a discount.

- 62.** A company wants to sell a new line of winter coats to young professionals living in cold, urban areas. This process of identifying a specific consumer group is an example of defining a:
- (A) Target market

of its domestic silk industry, which supplied the luxurious fabrics demanded by the aristocracy.

- 85.** Consider the following statements about clothing before the widespread adoption of ready-to-wear:
1. All clothes were handmade.
 2. Clothes were custom-made to fit exact measurements.
 3. Intricate seaming required painstaking hand sewing.

Which of the statements are correct?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1, 2, and 3

Ans :

- (D) 1, 2, and 3

Before the ready-to-wear era, garment production was entirely a manual process. Every piece of clothing was meticulously sewn by hand and custom-made to fit the specific measurements of an individual client, a process known as couture.

- 86.** What was an early industrial use for the newly invented sewing machines in America?
- (A) To make fashionable dresses for the wealthy
 - (B) To produce large quantities of Civil War uniforms
 - (C) To create theatrical costumes for stage productions
 - (D) To stitch sails for the expanding naval fleet

Ans :

- (B) To produce large quantities of Civil War uniforms

One of the first major applications of the sewing machine on an industrial scale was the mass production of uniforms for soldiers during the American Civil War, demonstrating its efficiency for standardized garment manufacturing.

- 87.** Which statement accurately describes the beginning of clothes specially made for laborers?
- (A) It began with the creation of wool coats for factory workers.
 - (B) It started with the design of cotton shirts for farmhands.
 - (C) It began with Levi Strauss making long-wearing pants from tent fabric.
 - (D) It started when fire-resistant suits were made for miners.

Ans :

(C) It began with Levi Strauss making long-wearing pants from tent fabric.

The origin of dedicated workwear can be traced to Levi Strauss, who repurposed durable fabric intended for tents to create tough, practical pants with pockets for laborers, which famously evolved into denim jeans.

- 88.** A style is introduced, sales are low. It is then adopted by fashion leaders, and sales begin to climb. Manufacturers then start copying it. This style is currently in which phase of the fashion cycle?

- (A) Rejection
- (B) Decline
- (C) Peak
- (D) Rise

Ans :

- (D) Rise

The style has moved past the initial introduction. Its adoption by fashion leaders and the subsequent increase in sales indicate it is in the 'Rise' or 'Increase in Popularity' phase, building momentum towards its peak.

- 89.** What is the primary reason a fashion merchandiser must have a strong historical and socio-cultural understanding of fabrics?

- (A) To help change a designer's vision into a marketable reality
- (B) To accurately price vintage clothing collections
- (C) To write academic papers on the history of textiles
- (D) To ensure compliance with international import laws

Ans :

- (A) To help change a designer's vision into a marketable reality

A deep understanding of fabrics, including their historical and cultural context, allows a merchandiser to make informed decisions during production. This knowledge helps translate a designer's creative concept into a tangible, marketable product that resonates with consumers.

- 90.** A fashion merchandiser's role in the selling process involves all the following EXCEPT:

- (A) Selling fashion items in large quantities to retail stores
- (B) Offering suggestions on how to display the items in the store

- (A) The wealthy class
- (B) The middle class
- (C) The working class
- (D) The artisan class

Ans :

- (A) The wealthy class

Prior to the Industrial Revolution and the advent of mass production, fashion was an exclusive domain. Only the wealthy aristocracy had the financial means to afford fashionable clothes, which were painstakingly handmade and custom-fitted.

- 69.** All of the following are examples of classic styles EXCEPT:

- (A) Blazer jackets
- (B) Polo shirts
- (C) Hot pants
- (D) Chanel suit

Ans :

- (C) Hot pants

Blazer jackets, polo shirts, and the Chanel suit are considered classics due to their timeless and simple designs. Hot pants, however, are a prime example of a fad—a short-lived fashion trend that quickly went out of style.

- 70.** Match the merchandising level in Column I with its primary function in Column II.

	Column I		Column II
1.	Retail Organisation Merchandising	a.	Acts as a link between the buyer and manufacturer
2.	Buying Agency Merchandising	b.	Moves fashion from showroom to the retail floor
3.	Export House (Buyer) Merchandising	c.	Ensures production goes according to schedule
4.	Export House (Production) Merchandising	d.	Provides goods buying consultancy services

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-d, 2-a, 3-c, 4-b
- (C) 1-c, 2-b, 3-d, 4-a
- (D) 1-a, 2-c, 3-b, 4-d

Ans :

- (A) 1-b, 2-d, 3-a, 4-c

Retail merchandising moves products to the sales floor. Buying agencies offer consultancy. An export house buyer merchandiser is the link between the client and the factory, while the production merchandiser ensures the production schedule is followed.

- 71.** A retailer notices that a particular style of dress is selling out very quickly. To capitalize on this, the retailer places a large reorder and the manufacturer increases production. This situation describes which phase of the fashion cycle?

- (A) Introduction
- (B) Peak of Popularity
- (C) Decline in Popularity
- (D) Rise in Popularity

Ans :

- (D) Rise in Popularity

The dress is past its introduction and is now gaining significant traction. As sales increase and retailers reorder, the style is clearly in the “Rise in Popularity” phase, moving towards its peak. It is not yet at peak, as mass copying hasn’t begun.

- 72.** The establishment of general stores in towns was a direct response to what societal change?

- (A) The decline of the monarchy in Europe
- (B) A large number of people settling in towns
- (C) The invention of the automobile
- (D) An increase in international trade fairs

Ans :

- (B) A large number of people settling in towns

As populations shifted from rural areas and settled in towns during and after the Industrial Revolution, the demand for a centralized place to buy goods grew. General stores were established to cater to the demands of these new town dwellers.

- 73.** According to the croquis proportions given, where is the waistline marked?

- (A) Just below 3 heads
- (B) Just below 2 heads
- (C) At 3.5 heads
- (D) At 4.5 heads

Ans :

- (A) Just below 3 heads

The provided guide for sketching a fashion croquis indicates that the waistline, which is the smallest part of the figure, should be marked at a level just below the 3-head mark from the top.

4.	Selling	d.	Use of fashion shows and visual effects
----	---------	----	---

- (A) 1-c, 2-a, 3-d, 4-b
 (B) 1-b, 2-d, 3-a, 4-c
 (C) 1-d, 2-c, 3-b, 4-a
 (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-c, 2-a, 3-d, 4-b

In manufacturing, fabric knowledge is key. In buying, understanding the target market is crucial. Promotion often involves fashion shows. Selling includes moving large quantities of product to retail stores.

- 96.** What is the primary purpose of the 'Right Promotion' in the context of merchandising?
 (A) To ensure the merchandise is physically located in an accessible store.
 (B) To achieve a profitable balance between the cost of promotion and the appeal created.
 (C) To have the correct amount of inventory to meet sales volume.
 (D) To select merchandise that the customer wants to buy.

Ans :

(B) To achieve a profitable balance between the cost of promotion and the appeal created.
 The 'Right Promotion' involves finding the most effective way to create appeal for the merchandise among customers while balancing the financial investment in those promotional activities to ensure they are profitable and successful.

- 97.** Which pair incorrectly matches the retail store type with its primary characteristic?
 (A) Department Store: Sells different product categories in separate sections.
 (B) Chain Store: Has multiple outlets with standardized methods and a shared brand.
 (C) Small Single-unit Store: Is a large, multi-story building in a city center.
 (D) Small Single-unit Store: Is often a neighborhood store operated by the owner.

Ans :

(C) Small Single-unit Store: Is a large, multi-story building in a city center.

A small single-unit store is typically a neighborhood shop, often family-operated. A large, multi-story building in a city center is more characteristic of a department store, not a small, single-unit operation.

- 98.** What function does the Operational division of a large retail store handle?
 (A) Advertising, visual merchandising, and publicity
 (B) Buying, selling, and merchandise planning
 (C) Credit, accounts payable, and inventory control
 (D) Maintenance of facilities and merchandise protection

Ans :

(D) Maintenance of facilities and merchandise protection

The Operational division is responsible for the physical functioning of the store. This includes the maintenance of the building and facilities, store and merchandise protection (security), personnel, customer service, and receiving merchandise.

- 99.** Assertion (A): The organizational structure of a retail firm can differ significantly from one company to another.
 Reason (R): The structure depends on variables like the type of merchandise sold, the size of the firm, and the specific target customer.
 (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 (C) (A) is true, but (R) is false.
 (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

There is no single organizational structure for all retail firms. The structure must be adapted to fit the specific needs of the business, which are determined by its size, the products it sells, and the customers it serves.

- 100.** A person enjoys analyzing economic data, consumer spending habits, and company profit margins to make business decisions. This person demonstrates a strong:
 (A) Forecasting ability
 (B) Communication ability
 (C) Analytical ability
 (D) Artistic ability

Ans :

(C) Analytical ability

This person's enjoyment of analyzing financial data, budgets, and economic factors directly

(D) To buy merchandise and plan its distribution

Ans :

(C) To handle credit, accounts payable, and inventory control

The Finance and Control division is responsible for the financial health of the organization. Its key functions include managing credit offered to customers, handling payments to suppliers (accounts payable), and financially tracking the value of merchandise (inventory control).

80. Which of the following statements about a fashion career is incorrect?

- (A) A flair for fashion alone is enough to bring you success.
- (B) Strong communication skills are essential for negotiation.
- (C) Analytical ability is needed to understand the financial side.
- (D) Forecasting ability helps in capitalizing on trends.

Ans :

(A) A flair for fashion alone is enough to bring you success.

While a flair for fashion is important, it is not sufficient for success on its own. A career in this field also demands strong business sense, including analytical, forecasting, and communication skills to navigate the industry effectively.

81. What is the relationship between 'style' and 'fashion'?

- (A) Style and fashion are identical and interchangeable terms.
- (B) A style can exist, but it only becomes a fashion when it is popular.
- (C) Fashion refers to the material, while style refers to the garment's cut.
- (D) Fashion is a timeless concept, whereas a style is a temporary trend.

Ans :

(B) A style can exist, but it only becomes a fashion when it is popular.

A 'style' is a specific look with distinct characteristics. That style only achieves the status of 'fashion' when it gains widespread popularity and acceptance among consumers at a particular point in time. A style can move in and out of fashion.

82. A well-fitted blazer jacket that has remained a popular wardrobe item for decades, suitable for various occasions, is best described as a:

- (A) Fad
- (B) Style
- (C) Trend
- (D) Classic

Ans :

(D) Classic

The blazer jacket is a prime example of a classic. Its simple, timeless design has allowed it to transcend fleeting trends and remain a widely accepted and fashionable item for an extended period, making it a staple in many wardrobes.

83. Assertion (A): Before the Industrial Revolution, fashion styles remained unchanged for very long periods.

Reason (R): The lack of mass production technology and limited exposure to other cultures meant that new ideas and materials were not readily available to inspire change.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

In ancient and medieval times, fashion changed very slowly. This was due to the absence of technologies for rapid production and the limited cultural exchange, which restricted the flow of new fabrics and design concepts that fuel fashion evolution.

84. Besides the royal court's support, what other industry's development was crucial for France becoming the center of fashion?

- (A) The cotton industry
- (B) The wool industry
- (C) The silk industry
- (D) The leather industry

Ans :

(C) The silk industry

France's dominance in fashion was cemented by two key factors: the trendsetting influence of the royal court and the significant development

- 74.** Which of the following statements about the role of a fashion merchandiser is correct?
- (A) Their primary focus is on the legal aspects of fashion patents.
 - (B) They are responsible for turning a designer's vision into a manufacturable reality.
 - (C) They work independently of designers and manufacturing teams.
 - (D) Their job ends once a product is designed and does not include selling.

Ans :

(B) They are responsible for turning a designer's vision into a manufacturable reality.

A key role of the fashion merchandiser is to bridge the gap between creative design and practical production. They apply their knowledge of fabrics, construction, and cost to make a designer's concept a viable, manufacturable product.

- 75.** In fashion, the term describing factory-made clothing sold in finished condition and in standardized sizes is known as:
- (A) Couture
 - (B) Bespoke
 - (C) Prêt-à-porter
 - (D) Atelier

Ans :

(C) Prêt-à-porter

Prêt-à-porter is the French term for ready-to-wear. It specifically refers to garments that are produced in factories in standard sizes and are sold to the public in a finished state, unlike couture which is custom-made.

- 76.** Assertion (A): In an export house, there are two types of merchandisers: buyer and production. Reason (R): These two roles are necessary to act as distinct links, one between the buyer and the factory, and the other between the factory floor and the initial merchandiser, ensuring smooth operations.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

Export houses divide merchandising responsibilities to manage the complex process efficiently. The buyer merchandiser handles client communication and sourcing, while the production merchandiser oversees the manufacturing process, creating a crucial two-part link for successful order fulfillment.

- 77.** If a fashion brand decides to market its products differently in Mumbai versus Shimla, it is primarily using which type of market segmentation?
- (A) Demographic
 - (B) Psychographic
 - (C) Behavioural
 - (D) Geographic

Ans :

(D) Geographic

Marketing differently in Mumbai and Shimla would be based on the significant differences in their location, and most importantly, their climate. This is a classic application of geographic segmentation, tailoring products to suit regional characteristics.

- 78.** What fundamental purpose do the "Merchandising Rights" (right product, place, time, price, quantity) serve?
- (A) To guarantee the highest possible creative quality in a design
 - (B) To provide a framework for maximizing profits and customer satisfaction
 - (C) To ensure compliance with international shipping regulations
 - (D) To create a legal contract between the retailer and the consumer

Ans :

(B) To provide a framework for maximizing profits and customer satisfaction

The "Merchandising Rights" serve as a guiding principle or framework for the business side of fashion. By adhering to these rights, a merchandiser aims to optimize sales and achieve maximum profitability while simultaneously meeting consumer demand effectively.

- 79.** What is the primary responsibility of the Finance and Control division in a retail organization?
- (A) To design advertising campaigns and special events
 - (B) To manage the maintenance of store facilities
 - (C) To handle credit, accounts payable, and inventory control

- (C) Personally operating the cash register for customer sales
- (D) Using knowledge of forecasting to recommend production numbers

Ans :

(C) Personally operating the cash register for customer sales

A fashion merchandiser is involved in the high-level selling process, which includes selling to stores and providing display advice. Their role does not typically extend to the final point-of-sale transaction with the end consumer at the cash register.

- 91.** What is the primary role of a 'production merchandiser' in an export house?
- (A) To communicate directly with the international buyer
 - (B) To handle the financial accounting for the export order
 - (C) To design the new styles for the next season
 - (D) To ensure production follows the schedule and requirements

Ans :

(D) To ensure production follows the schedule and requirements

The production merchandiser acts as the crucial link between the production floor and the buyer merchandiser. Their main responsibility is to oversee the manufacturing process, ensuring that production adheres to the buyer's required schedule and quality standards.

- 92.** Why is market segmentation considered an essential strategy for a fashion business?
- (A) It guarantees that every single consumer will buy the product.
 - (B) It allows the sales department to focus on the most likely purchasers.
 - (C) It is a legal requirement for all new clothing brands.
 - (D) It reduces the need for any form of advertising or promotion.

Ans :

(B) It allows the sales department to focus on the most likely purchasers.

Market segmentation is a vital strategy because it helps a business use its resources more efficiently. By dividing the market and identifying the consumers most likely to purchase the product, marketing and sales efforts can be targeted for the highest return.

- 93.** A company segments its market based on its customers' opinions about and ratings of its services. This is an example of:
- (A) Geographic Segmentation
 - (B) Demographic Segmentation
 - (C) Behavioural Segmentation
 - (D) Psychographic Segmentation

Ans :

(C) Behavioural Segmentation

This is an example of behavioural segmentation, as the market is being divided based on consumers' specific opinions, ratings, and usage patterns related to the product or service itself, which reflects their behavior as consumers.

- 94.** Consider the following aspects of a fashion merchandiser's role:
1. Providing input on fabrics during manufacturing.
 2. Using trend forecasting to make buying decisions.
 3. Organizing fashion shows to promote a designer's line.
 4. Giving recommendations on in-store item display.

Which aspects are part of a fashion merchandiser's responsibilities?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 2 and 3 only
- (D) 1, 2, 3, and 4

Ans :

(D) 1, 2, 3, and 4

A fashion merchandiser has a multifaceted role that spans the entire lifecycle of a garment. This includes involvement in manufacturing, buying, promotion through events like fashion shows, and the final selling process, which includes visual merchandising advice.

- 95.** Match the merchandising activity in Column I with the key consideration in Column II.

	Column I		Column II
1.	Manufacturing	a.	Awareness of target market and trends
2.	Buying	b.	Selling items in quantity to stores
3.	Promoting	c.	Knowledge of fabric and clothing construction

- (B) 1-b, 2-d, 3-a, 4-c
- (C) 1-c, 2-a, 3-b, 4-d
- (D) 1-a, 2-b, 3-d, 4-c

Ans :

- (B) 1-b, 2-d, 3-a, 4-c

A Fashion Designer creates clothing. A Visual Merchandise Designer works on store displays. A Set Designer conceptualizes sets for productions. An Interior Designer focuses on combining form and function within interior spaces.

- 107.** What is the unit of measurement used to establish the proportions of a fashion croquis?
- (A) Inches
 - (B) Centimeters
 - (C) The hand
 - (D) The head

Ans :

- (D) The head

In fashion illustration, the head is used as the standard unit of measurement to construct the croquis. The entire figure's proportions, such as the location of the waist, hips, and knees, are determined by multiples of the head's length.

- 108.** What is the main purpose of the horizontal and vertical guidelines used when drawing a croquis?
- (A) To help choose the color scheme for the final garment
 - (B) To ensure the proportions of the body parts are accurate
 - (C) To determine the type of fabric that should be used
 - (D) To create a pattern for cutting the actual fabric

Ans :

- (B) To ensure the proportions of the body parts are accurate

The guidelines (e.g., shoulder line, waistline, center front line) serve as a framework to ensure the sketched figure has the correct, albeit elongated, proportions. They help the artist accurately place key features like the bust, waist, and hips.

- 109.** Which of the following statements about sketching a fashion figure is correct?
- (A) The figure is typically 5 to 6 heads tall for realism.
 - (B) The shoulders are the narrowest part of the torso.
 - (C) The hips are generally drawn wider than the waist.

- (D) The head is used as a measurement unit only for the torso.

Ans :

- (C) The hips are generally drawn wider than the waist.

In a standard fashion figure, the proportions reflect an idealized form where the waist is the smallest part of the torso, the shoulders are the widest, and the hips are sized in between the two, creating a classic hourglass shape.

- 110.** On a 10-head fashion croquis, the hip plane is marked at which level?
- (A) 2 heads
 - (B) 3.5 heads
 - (C) 4.5 heads
 - (D) 6.5 heads

Ans :

- (B) 3.5 heads

According to the specific proportions outlined for drawing a 10-head croquis, the horizontal guideline for the hip plane should be marked at the 3.5-head level from the top of the figure.

- 111.** Assertion (A): The history of fashion helps designers make decisions for current and future fashions.
Reason (R): Ideas from the past are often reinterpreted to create new styles for today's market.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

A strong knowledge of fashion history is a valuable tool for designers. It provides a rich source of inspiration, as past styles, silhouettes, and details are frequently reinterpreted and updated to create contemporary fashion trends.

- 112.** What was the societal impact of the rise of a middle class during the Industrial Revolution?
- (A) It led to a decrease in the demand for clothing.
 - (B) It resulted in fashion becoming exclusive to the wealthy again.
 - (C) It caused the collapse of the textile industry in America.

corresponds to the ‘analytical ability’ required for a fashion merchandiser. This skill involves understanding the ‘dollars and sense’ part of the business to ensure profitability.

- 101.** Why might a fashion design student choose to also get a degree in business or fashion merchandising?
- (A) Because it is a legal requirement to work in the industry
 - (B) To improve their hands-on garment construction skills
 - (C) To focus exclusively on the historical aspects of fashion
 - (D) Especially if they want to run their own business or retail store

Ans :

(D) Especially if they want to run their own business or retail store
Combining a fashion design degree with a business or merchandising degree provides essential skills for entrepreneurship. It equips a designer with the knowledge needed to manage finances, marketing, and operations for their own successful business or store.

- 102.** Which educational path in fashion merchandising is described as a 4-year program combining a substantial amount of liberal arts with fashion and business courses?
- (A) A certificate program
 - (B) A diploma program
 - (C) An associate’s degree
 - (D) A bachelor’s degree

Ans :

(D) A bachelor’s degree
A bachelor’s degree in fashion merchandising is a comprehensive 4-year program. It is characterized by its blend of specialized fashion and business coursework with a broad foundation in liberal arts, offering a well-rounded education.

- 103.** The main goal of professionals in which career is to perfectly combine form with function to increase the beauty, safety, and functionality of a space?
- (A) Set Designer
 - (B) Interior Designer
 - (C) Fashion Designer
 - (D) Visual Merchandise Designer

Ans :

(B) Interior Designer

The core principle of interior design is the synthesis of aesthetics (form) and practicality (function). Interior designers work to make spaces like homes, offices, and hotels not only beautiful but also safe and highly functional for their occupants.

- 104.** Which of the following is NOT a primary responsibility of a visual merchandise designer?
- (A) Designing window displays
 - (B) Styling mannequins
 - (C) Conceptualizing designs for movie sets
 - (D) Arranging store merchandise

Ans :

(C) Conceptualizing designs for movie sets
While a visual merchandise designer arranges store layouts and displays, conceptualizing designs for movie sets is the primary responsibility of a set designer. These are two distinct career paths within the broader design field.

- 105.** A student is passionate about clothing design and wants to start their own fashion label immediately after their studies. Which skill, besides artistic talent, is crucial for them to develop?
- (A) Business and merchandising skills
 - (B) Knowledge of ancient history
 - (C) Advanced skills in chemistry
 - (D) Expertise in theatrical lighting

Ans :

(A) Business and merchandising skills
To run a successful fashion label, a designer needs more than just creative talent. Strong business and merchandising skills are essential for managing production, finances, marketing, and sales, which are all critical components of an independent brand.

- 106.** Match the career in Column I with its primary task in Column II.

	Column I		Column II
1.	Fashion Designer	a.	Conceptualizes designs for theatre productions
2.	Visual Merchandise Designer	b.	Creates designs for clothing and apparel
3.	Set Designer	c.	Combines form and function in a space
4.	Interior Designer	d.	Designs window displays and styles mannequins

(A) 1-d, 2-c, 3-a, 4-b

- (B) Fashion cycle
- (C) Production schedule
- (D) Couture line

Ans :

- (A) Target market

This scenario is a clear example of defining a target market. The company has identified a specific category of consumers (young professionals in cold, urban areas) at whom it will aim its product and marketing efforts.

- 63.** Assertion (A): For an apparel brand, understanding geographic segmentation is vital.
Reason (R): The climate of a region plays an important role in the selection of clothes, necessitating different merchandise for different locations.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

Geographic segmentation is crucial for clothing brands because clothing needs are heavily influenced by climate. A brand must offer different types of apparel (e.g., heavy coats vs. lightweight shirts) in different geographic locations to meet local needs.

- 64.** What is the typical full size of a fashion figure in “heads”?
- (A) 4 to 5 heads
 - (B) 6 to 7 heads
 - (C) 11 to 12 heads
 - (D) 8.5 to 10 heads

Ans :

- (D) 8.5 to 10 heads

The standard proportion for an elongated fashion figure, or croquis, is between 8.5 and 10 heads tall. This exaggeration of normal human proportions helps in better illustrating the drape and design of garments.

- 65.** Which statement correctly describes the function of the personnel and branch store division in a large retail organization?
- (A) It handles advertising and visual merchandising for all branches.

- (B) It is responsible for credit, accounts payable, and inventory control.
- (C) It may function separately if the store operations are very large.
- (D) It is primarily tasked with buying merchandise for the stores.

Ans :

- (C) It may function separately if the store operations are very large.

In smaller retail firms, personnel functions might be integrated into other divisions. However, in very large retail operations with multiple branches, a separate Personnel and Branch Store Division is often established to manage these extensive operations effectively.

- 66.** The division responsible for buying, merchandise planning and control, selling, and fashion coordination is the:
- (A) Finance and control division
 - (B) Merchandising division
 - (C) Operational division
 - (D) Sales promotion division

Ans :

- (B) Merchandising division

The Merchandising division is the core of a fashion retail business, responsible for all aspects related to the product. This includes planning what to buy, the actual buying process, controlling inventory, managing sales, and coordinating fashion themes.

- 67.** Why did the introduction of separate skirts and blouses in the 1880s help the working class?
- (A) It made custom-made clothing more affordable.
 - (B) The styles were more durable for manual labor.
 - (C) It was the only type of clothing allowed in factories.
 - (D) It allowed for variety in wardrobes by mixing separates.

Ans :

- (D) It allowed for variety in wardrobes by mixing separates.

Separates were a practical innovation for the working class because they offered versatility. By simply mixing different skirts and blouses, women could create multiple outfits, adding variety to their wardrobes in a cost-effective way.

- 68.** Before the Industrial Revolution, who were the primary consumers of fashionable clothes?

- (D) It created a new group with money to spend on luxuries like better clothing.

Ans :

(D) It created a new group with money to spend on luxuries like better clothing.

The Industrial Revolution spurred economic growth that created a new middle class. This group had disposable income for the first time, leading to increased demand for consumer goods, including better and more fashionable clothing.

- 113.** Which couturier is credited as being the first to come out with a full prêt-à-porter line, making high fashion more accessible?

- (A) Yves Saint Laurent
- (B) Coco Chanel
- (C) Christian Dior
- (D) Levi Strauss

Ans :

- (A) Yves Saint Laurent

Yves Saint Laurent (YSL) was a revolutionary figure in fashion, credited with being the first French haute couturier to launch a comprehensive ready-to-wear (prêt-à-porter) line, bridging the gap between exclusive couture and mass-market clothing.

- 114.** Which of the following statements about the fashion cycle is incorrect?

- (A) It is represented by a bell-shaped curve showing sales over time.
- (B) It begins with the introduction of a new style by designers.
- (C) At its peak, a style is exclusive and worn by only a few people.
- (D) It ends with the rejection of a style as consumers look for something new.

Ans :

- (C) At its peak, a style is exclusive and worn by only a few people.

At its peak, a fashion is at the height of its popularity and in widespread demand. It is often mass-produced and copied at this stage, making it the opposite of exclusive. Exclusivity is a characteristic of the introduction phase.

- 115.** Which three of the following are key components of the fashion merchandising process?

1. Planning the right merchandise.
2. Buying items from manufacturers.
3. Selling merchandise to consumers.
4. Manufacturing the textiles.

- (A) 1, 2 and 4

- (B) 1, 3 and 4

- (C) 2, 3 and 4

- (D) 1, 2 and 3

Ans :

- (D) 1, 2 and 3

The core of fashion merchandising is often simplified to three key activities: planning what to sell, buying those items from suppliers, and then selling them in a retail environment. Textile manufacturing precedes this process.

- 116.** The responsibility of a buying agent in a buying agency includes which of the following tasks?

- (A) Designing the garments for the buyer
- (B) Identifying vendors and negotiating costs
- (C) Marketing the final product to consumers
- (D) Managing the retail store's daily operations

Ans :

- (B) Identifying vendors and negotiating costs

A buying agent acts on behalf of a buyer, and their responsibilities are focused on the procurement process. This includes crucial tasks like sourcing and identifying suitable vendors, negotiating prices, and overseeing quality control.

- 117.** A fashion brand launches a line of clothing for teenagers (age 13-19) with a moderate family income. This is an example of which type of market segmentation?

- (A) Psychographic
- (B) Geographic
- (C) Behavioural
- (D) Demographic

Ans :

- (D) Demographic

This is an example of demographic segmentation because the market is being divided based on measurable population characteristics, specifically age (teenagers) and income (moderate family income). These are core demographic variables.

- 118.** Which pair correctly matches the retail division with its function?

- (A) Sales Promotion Division: Advertising and visual merchandising.
- (B) Merchandising Division: Maintenance of facilities and stores.
- (C) Finance and Control Division: Buying and merchandise planning.
- (D) Operational Division: Credit and accounts payable.

The fashion cycle is visually represented by a bell-shaped curve. This curve illustrates the rise and fall in the acceptance of a style, which is measured by its sales volume over a period of time.

Direction : Read the following case study and answer the following questions.

Priya is a fashion merchandiser for a large department store chain. Her job is to plan the store's inventory for the upcoming festive season. This involves much more than just picking out clothes she personally likes. Her primary responsibility is to ensure the store has the 'right merchandise, at the right time, in the right place, at the right price, and with the right sales promotion'. To do this, she spends months analyzing fashion trend forecasts and sales data from previous years. She studies the store's target market, considering their age, income level, and lifestyle preferences. She then works with designers and manufacturers to select or develop clothing lines that align with these trends and meet the needs of her customers. She negotiates costs to ensure the items can be sold at a price point her target market will accept while still ensuring profitability for the store. Finally, she collaborates with the marketing team to plan how the new collection will be displayed and promoted in the stores to attract customers and drive sales.

- 166.** Priya's job of planning to have the right merchandise at the right time and place to achieve maximum profits is known as:

(A) Fashion Designing
(B) Fashion Merchandising
(C) Clothing Construction
(D) Textile Manufacturing

Ans :

(B) Fashion Merchandising

Fashion merchandising is defined as the planning required to have the right merchandise, at the right time, place, and price, with the right promotion. This planning is crucial for achieving maximum profits in the fashion business.

- 167.** When Priya analyzes her store's target customers based on their age and income, what type of market segmentation is she using?
- (A) Geographic Segmentation
(B) Psychographic Segmentation
(C) Behavioural Segmentation
(D) Demographic Segmentation

Ans :

(D) Demographic Segmentation

Demographic segmentation involves dividing a market into subsets based on population characteristics. This includes factors such as age, sex, occupation, education, and income, which are all key considerations for a fashion merchandiser.

- 168.** A key role of a fashion merchandiser working in a retail organization is to:

(A) Sew the garments that will be sold in the store.
(B) Design the architectural layout of the department store.
(C) Move merchandise from the showroom to the retail sales floor and into the hands of consumers.
(D) Manage the company's financial accounts and investments.

Ans :

(C) Move merchandise from the showroom to the retail sales floor and into the hands of consumers. Merchandising within a retail organization is the business function that moves fashion from the designer's showroom to the retail sales floor. This involves planning, buying, and selling to ensure the right products reach the consumer.

- 169.** The "five rights" of merchandising are planning to have the right product, at the right time, in the right quantity, at the right place, and at the right

-----.

(A) Style
(B) Color
(C) Promotion
(D) Price

Ans :

(D) Price

The core components of merchandising include having the right merchandise, place, time, and quantity. The fifth component is the right price, which must be high enough for profit but low enough to meet customer expectations.

- 170.** The group of consumers that Priya is targeting with her merchandise plan is known as the:

(A) Target Market
(B) General Population
(C) Manufacturing Unit
(D) Supply Chain

Ans :

(A) Target Market

125. Assertion (A): The study of fashion merchandising equips individuals to understand when a style becomes a fashion.

Reason (R): This understanding helps determine a style's suitability for a specific retail operation and for what length of time it will be viable.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(C) (A) is true, but (R) is false.
(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

A core skill in fashion merchandising is recognizing the transition of a style into a fashion. This is critical for making strategic retail decisions about which products to carry and for how long to carry them to maximize sales.

126. A designer creates an unusual, brightly colored jumpsuit. Initially, only avant-garde fashion magazines feature it. This represents which stage of the fashion cycle?

- (A) Peak
(B) Decline
(C) Rise
(D) Introduction

Ans :

(D) Introduction

The jumpsuit is a new, innovative style being offered to the public for the first time. Its limited visibility in niche, fashion-forward media indicates it is in the 'Introduction' stage, where new ideas are tested.

127. Which pair incorrectly matches the fashion term with its description?

- (A) Style: A particular look in apparel.
(B) Fad: A short-lived fashion.
(C) Classic: Characterized by complexity of design.
(D) Fashion: The most popular style at a given time.

Ans :

(C) Classic: Characterized by complexity of design.

A classic is characterized by its simplicity of design, not complexity. This simplicity is what gives it a timeless quality and prevents it from

being easily dated, allowing it to remain in fashion for extended periods.

128. What innovation did Isaac Singer develop for the sewing machine in 1859 that significantly improved its usability?

- (A) The foot treadle
(B) An electric motor
(C) A self-threading needle
(D) An automatic bobbin winder

Ans :

(A) The foot treadle

In 1859, Isaac Singer developed the foot treadle for the sewing machine. This was a major advancement because it freed up the operator's hands to guide the fabric, making the sewing process faster and more efficient.

129. How did the rise of department stores and mail-order catalogs in the late 19th and early 20th centuries impact fashion?

- (A) They made fashion more exclusive and expensive.
(B) They made a wider variety of affordable fashions available to the general public.
(C) They led to a decline in the production of ready-to-wear clothing.
(D) They focused only on selling custom-made couture garments.

Ans :

(B) They made a wider variety of affordable fashions available to the general public.

Department stores and mail-order catalogs were key in democratizing fashion further. They offered a wide range of affordable, ready-to-wear styles to a broad audience, moving fashion beyond the confines of small, local shops and elite couturiers.

130. A successful fashion merchandiser needs a combination of skills. Which of the following four are most critical?

1. Strong knowledge of fabric and construction.
2. Excellent trend analysis and forecasting abilities.
3. Sharp visual merchandising and promotion skills.
4. Effective negotiation and communication abilities.

Which of the above statements are correct?

- (A) 1, 2 and 3 only
(B) 1, 3 and 4 only
(C) 2, 3 and 4 only

Ans :

(A) Sales Promotion Division: Advertising and visual merchandising.

The Sales Promotion Division is correctly matched with its functions, which are to create and manage all promotional activities for the store, including advertising campaigns, in-store visual displays, and publicity efforts.

- 119.** A successful career in fashion merchandising requires all of the following abilities EXCEPT:
- (A) Analytical ability
 - (B) Communication ability
 - (C) Forecasting ability
 - (D) Garment construction ability

Ans :

(D) Garment construction ability

While understanding construction is helpful, the primary divergent skills listed for a merchandiser are forecasting, analytical (business), and communication abilities. Hands-on garment construction is the specialized skill of a fashion designer or pattern maker.

- 120.** Which type of educational program in fashion merchandising can typically be completed in 6 months to 1 year and focuses on job-specific skills?
- (A) A bachelor's degree
 - (B) A master's degree
 - (C) An associate's degree
 - (D) A certificate or diploma

Ans :

(D) A certificate or diploma

Certificate or diploma programs are designed for quick entry into the workforce. They are short-term, lasting from six months to a year, and their coursework is concentrated on the practical, job-specific skills needed for fashion merchandising.

- 121.** Why is it important for fashion professionals to constantly equip themselves with fresh and new ideas?
- (A) To ensure that clothing prices remain high
 - (B) Because market and fashion trends are constantly changing
 - (C) To comply with government regulations on design
 - (D) Because raw materials become obsolete every season

Ans :

(B) Because market and fashion trends are constantly changing

The fashion industry is defined by its dynamic and constantly changing nature. To remain relevant and successful, professionals must continuously generate fresh ideas to keep up with evolving market demands and fashion trends.

- 122.** The fashion career that involves creating designs for clothing and apparel, either for popular designers or for one's own label, is a:
- (A) Set Designer
 - (B) Visual Merchandise Designer
 - (C) Fashion Designer
 - (D) Interior Designer

Ans :

(C) Fashion Designer

A Fashion Designer is the professional specifically tasked with the creative process of designing clothing and apparel. They may work for established fashion houses or operate their own independent fashion labels to bring their creative visions to life.

- 123.** On a standard fashion croquis, where are the shoulders positioned relative to the waist and hips?
- (A) Narrower than the waist
 - (B) The same width as the hips
 - (C) The same width as the waist
 - (D) The widest part of the torso

Ans :

(D) The widest part of the torso

The standard proportions for a fashion croquis dictate that the shoulders are the widest point of the torso, while the waist is the smallest, and the hips are in between. This creates an idealized, elongated figure for sketching.

- 124.** Which statement accurately describes the function of the center front vertical guideline when sketching a croquis?
- (A) It determines the overall height of the figure.
 - (B) It helps in placing the arms correctly.
 - (C) It establishes symmetry for the drawing.
 - (D) It indicates the hemline of the garment.

Ans :

(C) It establishes symmetry for the drawing.

The center front line is a crucial vertical guideline that runs down the middle of the figure. Its purpose is to act as an axis of symmetry, helping the artist to draw both sides of the body and garment evenly and in proportion.

- (A) Set Designer
- (B) Fashion Designer
- (C) Interior Designer
- (D) Visual Merchandise Designer

Ans :

- (A) Set Designer

A set designer's primary role is to conceptualize and create the physical settings or environments for various productions. This work is essential in film, television, and theatre to create the world in which the story takes place.

- 137.** Which of the following is NOT a correct guideline for sketching a fashion croquis?
- (A) The head is used as the unit of measurement.
 - (B) The full size is typically 8.5 to 10 heads.
 - (C) The waist is the widest part of the torso.
 - (D) Horizontal guidelines mark the bustline and hipline.

Ans :

- (C) The waist is the widest part of the torso.

In a standard fashion croquis, the waist is depicted as the smallest part of the torso to create an idealized, elongated silhouette. The shoulders are typically the widest part.

- 138.** Match the body landmark in Column I with its correct position on a 10-head croquis in Column II.

	Column I		Column II
1.	Shoulder line	a.	Just below 3 heads
2.	Waist line	b.	6.5 heads
3.	Hip plane	c.	1.5 heads
4.	Knees	d.	3.5 heads

- (A) 1-c, 2-a, 3-d, 4-b
- (B) 1-b, 2-d, 3-a, 4-c
- (C) 1-d, 2-c, 3-b, 4-a
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-c, 2-a, 3-d, 4-b

The correct proportions for a 10-head croquis are: shoulder line at 1.5 heads, waistline just below 3 heads, hip plane at 3.5 heads, and knees at 6.5 heads from the top.

- 139.** The fact that about one-third of professional fashion designers are self-employed indicates that the industry has significant scope for:
- (A) Government regulation

- (B) Entrepreneurial opportunities
- (C) Unionization of workers
- (D) Standardized job roles

Ans :

- (B) Entrepreneurial opportunities

The high percentage of self-employed designers highlights that the fashion industry provides fertile ground for entrepreneurship. It motivates aspirants with the idea that they can succeed on their own by starting their own labels or businesses.

- 140.** In what settings do interior designers commonly work?
- (A) Exclusively in theatre and film productions
 - (B) Only in fashion design studios and workshops
 - (C) In a variety of settings including retail stores, homes, and offices
 - (D) Primarily in textile mills and garment factories

Ans :

- (C) In a variety of settings including retail stores, homes, and offices

The skills of an interior designer are applicable across a wide range of environments. They work in diverse settings such as retail stores, residential homes, corporate offices, hospitals, and hotels, among many others.

- 141.** Which country's dominance over international fashion began in the early 18th century?
- (A) Italy
 - (B) England
 - (C) Spain
 - (D) France

Ans :

- (D) France

France's reign as the dominant force in international fashion started in the early 18th century, with the court of King Louis XIV in Paris setting the trends for all of Europe.

- 142.** Which of the following statements about the fashion industry is true?
- (A) It employs a small, select group of people in design only.
 - (B) It is a large business employing millions in various roles.
 - (C) It relies solely on traditional, non-technological methods.
 - (D) It is completely separate from the advertising and publishing sectors.

(D) 1, 2, 3 and 4

Ans :

(D) 1, 2, 3 and 4

All four skills are critical for a merchandiser. They need knowledge of production (1), forecasting ability for buying (2), promotional skills for marketing (3), and communication skills for negotiating and selling (4), covering the entire process.

131. What is the primary role of a 'buyer merchandiser' in an export house?

- (A) To oversee the stitching and finishing of garments
- (B) To act as a link between the buyer and the manufacturer
- (C) To manage the shipping and logistics of the final order
- (D) To create the advertising campaign for the product line

Ans :

(B) To act as a link between the buyer and the manufacturer

The buyer merchandiser serves as the main point of contact and communication between the international buyer (client) and the manufacturing facility. Their responsibilities include sourcing, sampling, and ensuring the product meets the buyer's requirements.

132. Segmenting the market based on variables such as population, age, sex, occupation, education, and income is known as:

- (A) Psychographic segmentation
- (B) Geographic segmentation
- (C) Demographic segmentation
- (D) Behavioural segmentation

Ans :

(C) Demographic segmentation

Demographic segmentation involves dividing a market into subgroups based on quantifiable population characteristics. Core demographic variables include age, gender, income, occupation, and education level, providing a basic profile of the consumer.

133. Which statement accurately describes the characteristics of a department store?

- (A) It consists of separate sections, known as departments, selling various goods.
- (B) It is typically a small, owner-operated neighborhood shop.

(C) It shares a single brand and central management across all its outlets.

(D) It provides only buying consultancy services to other businesses.

Ans :

(A) It consists of separate sections, known as departments, selling various goods.

The defining feature of a department store is its organization into distinct departments. Each department specializes in a different category of merchandise, such as clothing, home goods, or electronics, all housed within a single large store.

134. A student who excels at writing press releases, negotiating prices, and presenting ideas to a group would be demonstrating a strong:

- (A) Analytical ability
- (B) Forecasting ability
- (C) Technical ability
- (D) Communication ability

Ans :

(D) Communication ability

All the listed activities—writing press releases, negotiating, and presenting—are forms of communication. Excelling at them demonstrates strong communication ability, an essential skill for a fashion merchandiser who must sell ideas and negotiate deals.

135. What is the primary benefit of a bachelor's degree in fashion merchandising over a shorter diploma program?

- (A) It guarantees a higher starting salary upon graduation.
- (B) It provides a broader education and potentially more promotional opportunities.
- (C) It is the only way to become a self-employed fashion designer.
- (D) It focuses exclusively on hands-on, practical job skills.

Ans :

(B) It provides a broader education and potentially more promotional opportunities.

While a diploma offers quick job entry, a bachelor's degree provides a more comprehensive education by including liberal arts courses. This broad knowledge base can lead to a greater variety of promotional opportunities throughout a career.

136. A professional who conceptualizes designs needed for movies, television, and theatre productions is known as a:

This is a clear example of a designer drawing inspiration from fashion history. By using elements from 18th-century royal costumes, the designer is reinterpreting ideas from the past to create a new, contemporary collection.

- 149.** The transition from 'what was available was saleable' to the need for fashion merchandising was primarily driven by what development?
- (A) The decline of the silk industry in France
 - (B) The invention of the cotton gin
 - (C) The popularity of custom-made clothing
 - (D) The rise of 'ready-to-wear' and retail competition

Ans :

(D) The rise of 'ready-to-wear' and retail competition

In early trade, whatever was available could be sold. However, the introduction of ready-to-wear created a competitive retail environment with many choices, necessitating the specialized field of fashion merchandising to plan, buy, and sell effectively.

- 150.** On a 10-head croquis, the end of the torso is marked at what position?
- (A) A bit above 4.5 heads
 - (B) Just below 3 heads
 - (C) At 3.5 heads
 - (D) Just below 2 heads

Ans :

(A) A bit above 4.5 heads

According to the sketching guide provided, the end of the torso on the 10-head fashion figure is located at a point slightly above the 4.5-head mark from the top.

- 151.** The art of dress making, for which a male designer is called a 'couturier' and a female is called a 'couturiere', is known as:
- (A) Tailoring
 - (B) Merchandising
 - (C) Couture
 - (D) Prêt-à-porter

Ans :

(C) Couture

'Couture' is the specific French term for the high art of custom dressmaking. The practitioners of this art are known as couturiers (male) and couturieres (female), signifying their expertise in creating bespoke garments.

- 152.** Which of the following accurately describes a key task of the Sales and Promotion division in a retail store?
- (A) It ensures that adequate amounts of merchandise are on hand.
 - (B) It is responsible for visual merchandising and special events.
 - (C) It supervises the receiving and marking of merchandise.
 - (D) It manages credit, accounts payable, and inventory control.

Ans :

(B) It is responsible for visual merchandising and special events.

The Sales and Promotion division's mandate is to attract customers and drive sales. This is achieved through activities like advertising, creating appealing in-store displays (visual merchandising), orchestrating special events, and managing publicity.

- 153.** A bachelor's degree in fashion merchandising would be most suitable for a student who:
- (A) Wants to enter the fashion field as quickly as possible.
 - (B) Prefers to avoid business courses and focus only on art.
 - (C) Does not have the patience for long-term schooling.
 - (D) Desires a broad education and various promotional opportunities.

Ans :

(D) Desires a broad education and various promotional opportunities.

A four-year bachelor's degree is ideal for students seeking a deep and broad education that combines specialized fashion knowledge with liberal arts. This comprehensive background is designed to prepare them for a wide range of long-term promotional opportunities.

- 154.** An individual with a talent for creating unique designs for clothing and who dreams of managing their own fashion label would be best suited for a career as a:
- (A) Set Designer
 - (B) Interior Designer
 - (C) Visual Merchandise Designer
 - (D) Fashion Designer

Ans :

(D) Fashion Designer

Ans :

(B) It is a large business employing millions in various roles.

Today's fashion industry is a massive global business that employs millions of people across a wide spectrum of roles, including design, manufacturing, distribution, marketing, retailing, advertising, communications, and publishing.

- 143.** What is the primary difference in impact between a 'classic' and a 'fad'?
- (A) A classic has long-lasting acceptance, while a fad is short-lived.
 - (B) A classic is expensive, while a fad is cheap.
 - (C) A classic is handmade, while a fad is factory-made.
 - (D) A classic is for older consumers, while a fad is for younger ones.

Ans :

(A) A classic has long-lasting acceptance, while a fad is short-lived.

The core difference lies in their longevity. A classic style endures for extended periods due to its timeless design, whereas a fad captures attention intensely but fades quickly because it lacks lasting design strength.

- 144.** A clothing store owner carefully tracks sales data to see which items are selling best and uses this information to reorder popular items. This activity is a part of which retail division's function?
- (A) Operational division
 - (B) Finance and control division
 - (C) Merchandising division
 - (D) Sales promotion division

Ans :

(C) Merchandising division

Tracking sales data to inform buying decisions is a core function of the merchandising division. This process is part of merchandise planning and control, ensuring that the store has the right products in the right quantities to meet customer demand.

- 145.** Which term describes a neighborhood store that is typically owner and family operated?
- (A) Department Store
 - (B) Chain Store
 - (C) Outlet Store
 - (D) Small Single-unit Store

Ans :

(D) Small Single-unit Store

A small single-unit store is defined as a neighborhood-level retail business. Its key characteristics are that it is a single store (not part of a chain) and is often operated directly by the owner and their family.

- 146.** A fashion merchandiser's analytical ability involves analyzing all of the following EXCEPT:
- (A) The economy as a whole
 - (B) The particular company's economy
 - (C) The chemical structure of dyes
 - (D) A consumer's budget

Ans :

(C) The chemical structure of dyes

A merchandiser's analytical ability is focused on the business and economic aspects of fashion, such as the overall economy, company finances, and consumer spending. Analyzing the chemical structure of dyes falls under the technical domain of textile chemistry.

- 147.** Assertion (A): The Operational division is crucial for a smooth customer experience in a retail store. Reason (R): This division handles customer service, maintenance of facilities, and merchandise protection, all of which directly impact a shopper's visit.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The Operational division's responsibilities, including customer service, store maintenance, and security, are fundamental to creating a pleasant and functional shopping environment, thus ensuring a positive customer experience.

- 148.** A designer creates a collection inspired by the elaborate costumes of 18th-century French royalty. This is an example of:
- (A) Creating a fad
 - (B) Reinterpreting ideas from the past
 - (C) Following a geographic trend
 - (D) Designing a classic style

Ans :

(B) Reinterpreting ideas from the past

production of uniforms required for the armies during the Civil War.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

A young designer introduces a new style of jacket featuring asymmetrical cuts and bold, graphic prints. Initially, these jackets are very expensive and are only worn by a few fashion-forward celebrities and influencers. This represents the 'introduction' stage of its fashion cycle. As the style gains visibility through social media and magazines, its popularity begins to 'rise', and other high-end designers start creating similar versions. The style reaches its 'peak' of popularity when mass-market retailers produce affordable adaptations, making the jacket widely available in stores everywhere. At this point, the style is so common that the original trendsetters start to look for something new. Consequently, the popularity of the jacket begins to 'decline', and stores start marking them down for sale. Finally, in the 'rejection' phase, the style is considered outdated by most consumers, who have moved on to the next trend. This entire trajectory, from its initial launch to its eventual disappearance from mainstream stores, perfectly illustrates the natural life cycle of a fashion trend.

- 161.** The entire process described, from the introduction of the jacket style to its final decline, is known as the:
- (A) Manufacturing Process
 - (B) Merchandising Plan
 - (C) Fashion Cycle
 - (D) Retail Strategy

Ans :

(C) Fashion Cycle

The fashion cycle describes the way in which fashion changes over time. It includes the distinct stages of a style's introduction, rise in popularity, peak, decline, and eventual rejection by the public.

- 162.** At which stage of the fashion cycle are adaptations of the style mass-produced and sold at various price levels?
- (A) Peak of Popularity

- (B) Introduction
- (C) Rise
- (D) Rejection

Ans :

(A) Peak of Popularity

When a fashion is at the height, or peak, of its popularity, it is in such high demand that many manufacturers create copies or adaptations of it at different price levels to cater to a broad market.

- 163.** The initial phase, where the new jacket style is created and offered to the public by the designer, is known as the:
- (A) Culmination Phase
 - (B) Acceptance Phase
 - (C) Rejection Phase
 - (D) Introduction of a Style

Ans :

(D) Introduction of a Style

The fashion cycle begins with the introduction of a new style. At this stage, designers interpret their creative ideas into apparel and offer these new styles to the public, often at high prices and in limited quantities.

- 164.** What happens during the 'decline in popularity' phase of the fashion cycle?
- (A) The style becomes more exclusive and expensive.
 - (B) Fashion-conscious people tire of the style, and retailers put the items on sale racks.
 - (C) The style is just beginning to be noticed by the public.
 - (D) The style achieves its maximum sales volume.

Ans :

(B) Fashion-conscious people tire of the style, and retailers put the items on sale racks.

In the decline phase, so many copies of a style have been mass-produced that fashion-conscious people begin to look for something new. The declining styles are then typically put on sale racks in retail stores.

- 165.** The representation of the fashion cycle's stages of acceptance over time is typically shown as a:
- (A) Bell-shaped curve
 - (B) Straight line
 - (C) Circle
 - (D) Square

Ans :

(A) Bell-shaped curve

This individual's passion for creating clothing designs and ambition to run their own label align perfectly with the career path of a Fashion Designer. This role combines creative design with the potential for entrepreneurial leadership.

- 155.** The guidelines for sketching a fashion croquis include marking levels for all of the following EXCEPT:

(A) Shoulder line
(B) Bust line
(C) Fabric type
(D) Waist line

Ans :

(C) Fabric type

The guidelines for sketching a croquis are focused on establishing the correct proportions of the figure. They include marking the position of the shoulders, bust, and waist, but they do not involve specifying the type of fabric for the garment.

- 156.** In what year did 'ready-to-wear' first emerge, marking a significant shift in the fashion industry?

(A) 1880
(B) 1920
(C) 1950
(D) 1960

Ans :

(B) 1920

The year 1920 is cited as the birth of 'ready-to-wear'. This development was a turning point, as it led retailers to recognize the immense business potential of selling mass-produced garments, transforming the fashion landscape.

- 157.** Assertion (A): A blazer jacket is considered a classic style.

Reason (R): It is characterized by simplicity of design, which keeps it from being easily dated and allows it to remain accepted for an extended period.

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(C) (A) is true, but (R) is false.
(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

A blazer jacket exemplifies a classic style precisely because of its simple and timeless design. This

inherent simplicity prevents it from becoming obsolete, ensuring its enduring appeal and acceptance across different fashion eras.

- 158.** Which three of the following are distinct levels of fashion merchandising?

1. Retail Organisation Merchandising
2. Buying Agency Merchandising
3. Export House Merchandising
4. Designer Studio Merchandising

(A) 1, 2, and 4
(B) 1, 3, and 4
(C) 2, 3, and 4
(D) 1, 2, and 3

Ans :

(D) 1, 2, and 3

The text outlines three primary levels at which merchandising takes place: within a retail organization, through a buying agency that provides consultancy, and within an export house that handles international orders.

- 159.** What is the fundamental purpose of the vertical guidelines, such as the 'Princess' line, on a fashion croquis?

(A) To indicate where to add pockets and buttons
(B) To help in shaping the body and placing garment details
(C) To determine the appropriate color for the garment
(D) To show the type of stitching that should be used

Ans :

(B) To help in shaping the body and placing garment details

Vertical guidelines, like the center front and princess lines, serve as a map for the body's contours. They are essential for accurately shaping the figure and for correctly placing seams, darts, and other design details on the garment being sketched.

- 160.** An early use for sewing machines was to make uniforms for which war?

(A) The Revolutionary War
(B) The War of 1812
(C) The Civil War
(D) World War I

Ans :

(C) The Civil War

One of the first large-scale industrial applications of the sewing machine in America was the mass

A target market is defined as the specific category of consumers that a business is aiming to sell its products to. Understanding this group is essential for a merchandiser to make effective decisions about what to buy and sell.

Direction : Read the following case study and answer the following questions.

In a fashion studies class, a teacher is explaining the difference between various fashion terms. To illustrate, she shows two pictures. The first is of a pair of “hot pants” from the 1970s, which were extremely popular for a very brief period and then quickly went out of style. She explains that such short-lived fashions, which lack the design strength to hold consumer attention for long, are known as fads. The second picture is of a classic blazer jacket. She explains that this is a style that has remained more or less accepted for an extended period. While its popularity may fluctuate slightly, it never becomes completely obsolete because its simple, clean design keeps it from being easily dated. The teacher emphasizes that understanding the difference between a fad and a classic is crucial for both consumers, who want to build a lasting wardrobe, and for merchandisers, who need to make smart buying decisions to avoid being left with unsellable inventory.

- 171.** A fashion that is short-lived and can come and go in a single season is known as a:
- (A) Style
 - (B) Classic
 - (C) Fad
 - (D) Trend

Ans :

(C) Fad

Fads are defined as short-lived fashions that can appear and disappear within a single season. They are characterized by a lack of design strength, which prevents them from holding consumer attention for an extended period.

- 172.** A style like the blazer jacket, which remains accepted for an extended period and never becomes completely obsolete, is called a:
- (A) Fad
 - (B) Style
 - (C) Trend
 - (D) Classic

Ans :

(D) Classic

A classic refers to a style that never becomes completely obsolete. It is characterized by simplicity in its design, which prevents it from being easily dated and allows it to remain popular for a long time.

- 173.** What is the term for any particular look or characteristic in apparel or accessories, which may come and go in fashion but always remains as a specific design?
- (A) Style
 - (B) Fad
 - (C) Classic
 - (D) Fashion

Ans :

(A) Style

A style is defined as any particular look or characteristic in apparel or accessories. A specific style, like a polo shirt, always remains, even though it may move in and out of fashion over time.

- 174.** The term ‘fashion’ itself is best defined as:
- (A) A style that is only worn by a few people.
 - (B) The style or styles that are most popular at a given time.
 - (C) A style that has gone out of popularity.
 - (D) The process of manufacturing clothes.

Ans :

(B) The style or styles that are most popular at a given time.

‘Fashion’ is specifically defined as the style or styles that are the most popular among the public at any given time. It represents what a large segment of the population is choosing to wear.

- 175.** Why is it important for a fashion merchandiser to distinguish between a fad and a classic?
- (A) Because fads and classics are sold at the same price.
 - (B) Because classics are always more popular than fads.
 - (C) Because fads are only sold in department stores, while classics are sold in chain stores.
 - (D) To make informed buying decisions and avoid getting stuck with inventory that will quickly become unsellable.

Ans :

(D) To make informed buying decisions and avoid getting stuck with inventory that will quickly become unsellable.

CHAPTER 10

CARE AND MAINTENANCE OF FABRICS IN INSTITUTIONS

SUMMARY

1. INTRODUCTION

The care and maintenance of fabrics are crucial for retaining their specific properties and prolonging their functional lifespan. This process involves two main aspects: keeping the material free from physical damage and refreshing its appearance by removing dirt and stains to maintain its textural and visual qualities.

2. BASIC CONCEPTS

Laundry is described as both a science, based on scientific principles, and an art, requiring skill to achieve aesthetically pleasing results. The specific care and maintenance required for different fabrics depend on their fibre content, yarn type, construction technique, and applied finishes. The equipment used for these activities is primarily categorized into washing, drying, and ironing/pressing equipment.

2.1 Washing Equipment

Washing machines are available in top-loading and front-loading models and can be fully automatic, semi-automatic, or manually operated. The main principles of washing action are:

- **Agitation:** Used in top-loading machines, where blades create a current to force water through the fabric.
- **Pulsation:** Also used in top-loaders, this method involves rapid vertical movements of a pulsator.
- **Tumbling:** Used in front-loading machines, where a revolving cylinder lifts clothes to the top and drops them into the wash water.

After washing, rinsing removes dirt and detergent, followed by water extraction, which is typically done by spinning or draining.

2.2 Drying Equipment and Process

Commercial and institutional driers use two types of circulation systems: one circulates low-temperature air at high velocity, while the other circulates high-temperature air slowly.

2.3 Ironing and Hot pressing

Ironing is the process of smoothing out wrinkles, while pressing is used to create sharp creases. Most modern electric irons have an inbuilt thermostat to regulate temperature for different fabrics and may also have a steam function. In India, charcoal irons are also still in use.

3. INSTITUTIONS

Large institutions like hospitals, hotels, and prisons that require a constant supply of clean linen and uniforms typically have their own in-house laundry departments.

- **Hotels:** In the hospitality sector, aesthetics and the final finish of articles are most important. Laundries in hotels handle a variety of fibre contents and must also care for guests' personal laundry, with an emphasis on perfect starching, ironing, and folding.
- **Hospitals:** Hospital laundries prioritize hygiene, cleanliness, and disinfection. They mainly process cotton articles and, while cleanliness is paramount, the final finish like perfect ironing may not be as critical as in hotels. Some hospitals use disposable items to reduce the threat of infection.

3.1 Process of laundry functioning in hospitals

- 180.** When Ravi finds the best way to manufacture the item while considering factors like price and the buyer's target market, he is applying which key merchandising function?
- (A) Buying
 - (B) Promoting
 - (C) Selling
 - (D) Manufacturing

Ans :

(D) Manufacturing

In manufacturing, a fashion merchandiser provides significant input on fabrics and construction. They use their knowledge to find the best way to produce an item, taking into account crucial factors like price and the target market.

Direction : Read the following case study and answer the following questions.

A new apparel brand, "Eco Threads," is planning to launch a line of clothing made from sustainable materials like organic cotton and recycled fabrics. Before launching, the marketing team conducts detailed market research to identify their ideal customer. They decide against targeting the entire market. Instead, they use market segmentation. For demographic segmentation, they target young adults aged 20-35 with a mid-to-high income level. For geographic segmentation, they focus on major urban centers where environmental awareness is higher. Most importantly, they use psychographic segmentation. They aim to appeal to consumers who have a specific lifestyle: people who are socially active, have a strong interest in environmental issues, and value ethical production. The brand's marketing message is crafted to resonate with this group's values and needs, emphasizing sustainability and conscious consumption rather than just fashion trends. This targeted approach helps "Eco Threads" focus its resources effectively and connect with consumers who are most likely to purchase their products.

- 181.** The strategy of dividing a larger market into subsets of consumers who have common needs is known as:
- (A) Mass Marketing
 - (B) Market Segmentation
 - (C) Product Distribution
 - (D) Price Setting

Ans :

(B) Market Segmentation

Market segmentation is a strategy that involves dividing a larger market into smaller subsets of consumers who share common needs and applications for the goods or services being offered.

- 182.** When "Eco Threads" targets consumers based on their lifestyle, interests, and social activities, what type of segmentation are they using?
- (A) Demographic Segmentation
 - (B) Geographic Segmentation
 - (C) Psychographic Segmentation
 - (D) Behavioural Segmentation

Ans :

(C) Psychographic Segmentation

Psychographic segmentation involves dividing the market based on lifestyle factors. This includes social activities, interests, leisure pursuits, and personal needs and wants, which can define a specific target market group.

- 183.** Targeting young adults aged 20-35 with a certain income level is an example of:
- (A) Demographic Segmentation
 - (B) Geographic Segmentation
 - (C) Psychographic Segmentation
 - (D) Behavioural Segmentation

Ans :

(A) Demographic Segmentation

Demographic segmentation divides the market based on key population statistics. These include variables like age, sex, income, occupation, and education, which are fundamental for defining a consumer profile for fashion products.

- 184.** Why is it essential for a brand like "Eco Threads" to understand its target market?
- (A) To ensure they can sell their products to every single person in the country.
 - (B) To allow the sales department to focus on consumers who are 'most likely to purchase the offering'.
 - (C) To be able to set the highest possible price for their products.
 - (D) To create products that are not aligned with any consumer's needs.

Ans :

(B) To allow the sales department to focus on consumers who are 'most likely to purchase the offering'.

Understanding the target market is essential as it allows the sales and marketing departments to

A merchandiser must determine a style's suitability for their retail operation and for how long it will be popular. Mistaking a short-lived fad for a lasting trend can lead to significant financial losses from unsold stock.

Direction : Read the following case study and answer the following questions.

Ravi works as a production merchandiser in a large garment export house in India. A major American retail brand has placed an order for a new line of women's blouses. Ravi's role is to act as the crucial link between the international buyer and the local manufacturing unit. He receives the detailed specifications from the buyer's merchandiser, which include the exact fabric type, color codes, stitch details, and quality standards. He is responsible for sourcing the correct fabric and trims. He then coordinates with the factory's production team to create initial samples. Once the buyer approves the samples, Ravi's main job is to ensure that the bulk production goes according to the schedule and meets all the quality requirements set by the buyer. He regularly visits the factory floor to monitor the process, troubleshoot any issues that arise, and ensure that the final garments are produced exactly as per the buyer's specifications before they are shipped.

176. In an export house, what is the primary role of a production merchandiser like Ravi?

- (A) To act as a link between the production team and the buyer's merchandiser, ensuring production meets requirements.
- (B) To design the blouses for the American retail brand.
- (C) To personally sew all the garments in the factory.
- (D) To manage the retail store where the blouses will be sold in the US.

Ans :

(A) To act as a link between the production team and the buyer's merchandiser, ensuring production meets requirements.

In an export house, a production merchandiser is the link between the production department and the buyer's merchandiser. Their main responsibility is to ensure that production proceeds according to the schedule and the buyer's specific requirements.

177. The type of merchandising that takes place in a company that produces and ships garments to international buyers is known as:

- (A) Retail Organisation Merchandising
- (B) Export House Merchandising
- (C) Buying Agency Merchandising
- (D) Single Store Merchandising

Ans :

(B) Export House Merchandising

Export house merchandising involves the processes within a company that manufactures and exports garments. This level of merchandising has two types of merchandisers: the buyer merchandiser and the production merchandiser, who manage the process for foreign clients.

178. The other type of merchandiser in an export house, who acts as the primary link between the buyer and the manufacturer for sourcing and sampling, is the:

- (A) Production Merchandiser
- (B) Retail Merchandiser
- (C) Visual Merchandiser
- (D) Buyer Merchandiser

Ans :

(D) Buyer Merchandiser

The buyer merchandiser in an export house serves as the link between the buyer and the manufacturer. They are responsible for understanding the buyer's requirements, sourcing materials, getting samples made, and communicating with the buyer.

179. What skill is absolutely essential for Ravi to succeed in his role of coordinating between an international client and a local factory?

- (A) The ability to speak multiple foreign languages.
- (B) Forecasting ability to predict next season's trends.
- (C) Excellent communication skills to negotiate and convey information accurately.
- (D) Artistic skills to sketch new fashion designs.

Ans :

(C) Excellent communication skills to negotiate and convey information accurately.

Excellent communication skills are essential in this field. A merchandiser must be able to negotiate with manufacturers and clearly communicate the client's needs to the production team to ensure the final product is correct.

- (B) Due to the support from the royal court of King Louis XIV and the development of its silk industry.
- (C) By creating the first department stores in the world.
- (D) By being the first country to embrace mass-produced factory clothing.

Ans :

(B) Due to the support from the royal court of King Louis XIV and the development of its silk industry.

France's dominance in fashion began in the 18th century. The members of King Louis XIV's court became trendsetters, and the development of the French silk industry made Paris the fashion capital of Europe.

Direction : Read the following case study and answer the following questions.

A large department store is launching its new spring-summer collection. To create excitement and attract customers, the store hires a team of visual merchandise designers. Their primary task is to design the store's window displays, which act as a powerful marketing tool. The team conceptualizes a theme based on "A Tropical Paradise." They create vibrant backdrops, use creative props like artificial palm trees and exotic flowers, and organize the clothing placement to tell a visual story. A key part of their job is styling the mannequins, dressing them in the collection's key looks to showcase how the garments can be worn. The goal is to capture the attention of passersby and entice them into the store. Inside the store, they continue this theme, creating appealing merchandise displays and organizing clothing racks in a way that is easy for customers to navigate. Their work is a blend of creativity and strategic marketing, aiming to enhance the store's aesthetic appeal and drive sales.

- 191.** A professional who is mainly responsible for designing window displays, styling mannequins, and creating props and accents in a store is a:
- (A) Fashion Designer
 - (B) Set Designer
 - (C) Interior Designer
 - (D) Visual Merchandise Designer

Ans :

(D) Visual Merchandise Designer

Visual merchandise designers are responsible for a range of tasks including designing window displays, arranging store merchandise, creating props, organizing clothing placement, and styling mannequins to enhance the store's visual appeal.

- 192.** The work of a visual merchandise designer is crucial for which component of fashion merchandising?

- (A) Manufacturing
- (B) Buying
- (C) Promoting
- (D) Costing

Ans :

(C) Promoting

Visual merchandising is a key part of promoting fashion items. A merchandiser uses a creative mind and strong visual merchandising skills to create displays, like in fashion shows or store windows, that capture the attention of potential buyers.

- 193.** What is the primary goal of creating an attractive window display for a department store?

- (A) To capture the attention of potential buyers and attract them into the store.
- (B) To provide a resting place for tired shoppers.
- (C) To showcase the creative skills of the design team for an art competition.
- (D) To store excess inventory that does not fit on the shelves.

Ans :

(A) To capture the attention of potential buyers and attract them into the store.

The promotion of a designer's items often involves exaggerated visual effects in displays like fashion shows or store windows. The primary purpose of these displays is to capture the attention of potential customers and entice them to buy.

- 194.** The store's overall merchandising plan is carried out by which major division within the organization?

- (A) The Finance and Control division.
- (B) The Merchandising division.
- (C) The Operational division.
- (D) The Personnel division.

Ans :

(B) The Merchandising division.

focus their efforts on the category of consumers who are most likely to buy their products, ensuring the highest return on investment.

- 185.** The focus on major urban centers is an application of which segmentation strategy?
- (A) Demographic Segmentation
 - (B) Psychographic Segmentation
 - (C) Behavioural Segmentation
 - (D) Geographic Segmentation

Ans :

(D) Geographic Segmentation
Geographic segmentation involves dividing the market based on geographical units like cities, states, or regions. This is important for fashion as factors like climate and local culture can influence the choice of merchandise.

Direction : Read the following case study and answer the following questions.

Before the Industrial Revolution in 18th century France, fashion was a luxury available only to the wealthy elite. Garments were entirely handmade and custom-made to fit the customer's exact measurements. This art of dressmaking was known as 'couture'. However, the Industrial Revolution brought about significant technological advances. The invention of the power loom allowed for the mass production of fabrics in less time. The most transformative invention was the sewing machine, which turned the handcrafted art of sewing into an industry. This development was crucial in democratizing fashion, making it more accessible to the growing middle class who now had more money to spend. Later, in the 1960s, French couturiers like Yves Saint Laurent introduced 'prêt-à-porter' lines. These were factory-made clothes sold in finished condition and in standardized sizes, a radical alternative to the expensive, made-to-measure pieces of haute couture. This shift marked the true beginning of the modern ready-to-wear fashion industry that we know today.

- 186.** The art of dressmaking where clothes were handmade and custom-made for a client was known as:
- (A) Prêt-à-porter
 - (B) Merchandising
 - (C) Couture
 - (D) Retailing

Ans :

(C) Couture

'Couture' was the term used for the art of dressmaking, particularly in France. Before the industrial revolution, all fashionable clothes were handmade and custom-made to fit the client's exact measurements.

- 187.** What invention during the Industrial Revolution was most responsible for turning sewing into an industry and democratizing fashion?
- (A) The steam engine
 - (B) The power loom
 - (C) The cotton gin
 - (D) The sewing machine

Ans :

(D) The sewing machine
The invention of the sewing machine was a pivotal moment that turned the handcraft of sewing into an industry. This development democratized fashion, making it accessible to a much wider range of people beyond just the wealthy.

- 188.** What does the term 'prêt-à-porter' mean?
- (A) Ready-to-wear clothing
 - (B) Custom-made clothing
 - (C) Hand-sewn garments
 - (D) Vintage fashion

Ans :

(A) Ready-to-wear clothing
Prêt-à-porter is a French term for ready-to-wear clothing. It describes factory-made clothes that are sold in finished condition and in standardized sizes, as distinct from bespoke or made-to-measure couture pieces.

- 189.** Who is credited as being the first French haute couturier to come out with a full ready-to-wear line?
- (A) Levi Strauss
 - (B) Isaac Singer
 - (C) King Louis XIV
 - (D) Yves Saint Laurent (YSL)

Ans :

(D) Yves Saint Laurent (YSL)
Yves Saint Laurent (YSL) is credited as being the first major French haute couturier to introduce a complete prêt-à-porter, or ready-to-wear, line. This was a radical and influential move in the 1960s.

- 190.** How did France establish its dominance over international fashion in the 18th century?
- (A) By inventing the sewing machine first.

- (C) Production Merchandising
- (D) Retail Organisation Merchandising

Ans :

(D) A Retail Organisation Merchandising
Retail Organisation Merchandising is the specialized management function within a retail company. It involves the internal planning that takes place to ensure the stores have adequate merchandise to sell to consumers profitably.

- 200.** The UK company in this scenario is an example of what type of retail business?
- (A) A chain store
 - (B) A small single-unit store
 - (C) A department store
 - (D) A couture house

Ans :

(A) A chain store
A chain store is a type of retail outlet that shares a brand and central management, and typically has standardized business methods and practices across multiple locations. Fast-fashion brands often operate as chain stores.

Direction : Read the following case study and answer the following questions.

Two friends, Priya and Aisha, both aspire to have careers in the fashion industry. Priya is very eager to start working as soon as possible. She decides to enroll in a one-year diploma program in fashion merchandising. The coursework in this program is highly focused on the practical, job-related aspects of the field, such as trend analysis, buying, and visual display. This path will allow her to enter the fashion field more quickly. Aisha, on the other hand, has a long-term vision. She wants a broader education and more opportunities for promotion in the future. She chooses to pursue a four-year bachelor's degree in fashion design and merchandising. Her program combines a substantial amount of liberal arts requirements with specialized fashion and business courses. While this requires a longer period of schooling, Aisha believes it will provide her with a more comprehensive understanding of the industry and open up more diverse career paths in the long run.

- 201.** Priya's choice of a one-year diploma program is suitable for her because:
- (A) She desires a broad education with a focus on liberal arts.
 - (B) She wants to enter the fashion field more

quickly.

- (C) She is not interested in the practical aspects of the job.
- (D) The program guarantees her the highest-paying job in the industry.

Ans :

(B) She wants to enter the fashion field more quickly.

A certificate or diploma program, which can be completed in 6 months to a year, is a suitable option for someone who wants to enter the fashion field more quickly and does not have the patience for long-term schooling.

- 202.** What is a key feature of a bachelor's degree program in fashion merchandising compared to a diploma?
- (A) It has a much shorter duration.
 - (B) It focuses only on job-specific skills without any general education.
 - (C) It is only available through online distance learning.
 - (D) It combines a substantial amount of liberal arts requirements with fashion and business courses.

Ans :

(D) It combines a substantial amount of liberal arts requirements with fashion and business courses.

A bachelor's degree is a four-year program that combines a significant amount of liberal arts or general education requirements with specialized courses in fashion and business, offering a broader educational experience.

- 203.** A bachelor's degree may be a better choice for someone like Aisha who desires what?
- (A) The quickest possible entry into the workforce.
 - (B) A very narrow and specialized skill set.
 - (C) A broad education and various promotional opportunities in the future.
 - (D) To avoid studying any business-related subjects.

Ans :

(C) A broad education and various promotional opportunities in the future.

A bachelor's degree may be more suitable for a student who desires a broad education and is looking for more varied promotional opportunities in the long term, even if it requires more patience with schooling.

In a typical retail organization, the Merchandising division is responsible for key functions like buying, merchandise planning and control, selling, and fashion coordination to ensure the store has the right products for its customers.

195. The work of the visual merchandiser falls under which sub-division of the retail organizational structure?

- (A) The Merchandising division.
- (B) The Finance and Control division.
- (C) The Operational division.
- (D) The Sales and Promotion division.

Ans :

(D) The Sales and Promotion division.

The Sales and Promotion division in a retail organization is responsible for activities like advertising, visual merchandising, special events, and publicity, all of which are aimed at promoting the store and its products to the public.

Direction : Read the following case study and answer the following questions.

A fast-fashion chain store in the UK wants to source a large quantity of ethically produced, hand-embroidered tops from India. However, their buying team does not have the local knowledge or network to identify reliable vendors and manage quality control on the ground. To solve this, they hire a “Buying Agency” based in India. This agency acts as a procurement consultant for the UK retailer. The agency’s first task is to identify several small and medium-sized artisan cooperatives and factories that can produce the required quality and quantity. They then negotiate the costs on behalf of the UK buyer. Once production begins, the buying agency’s team is responsible for checking the in-process quality at the factories to ensure the embroidery and stitching meet the buyer’s standards. Finally, they perform a pre-shipment quality inspection before the goods are sent to the UK. Using this agency saves the UK retailer significant time and costs, and ensures they receive a quality product.

196. An organization that acts as a procurement consultant for a buyer, helping them to identify vendors and check quality, is known as a:

- (A) Department Store
- (B) Chain Store
- (C) Buying Agency
- (D) Single-unit Store

Ans :

(C) A Buying Agency

A buying agency provides services for goods buying consultancy and acts as a procurement office for buyers. This is a specialized management function within the fashion industry that facilitates the sourcing and buying process.

197. What is a key responsibility of a buying agent?

- (A) To design the clothes that the buyer wants to purchase.
- (B) To identify vendors, negotiate costs, and perform quality inspections.
- (C) To sell the final products in their own retail stores.
- (D) To manage the marketing campaigns for the buyer’s brand.

Ans :

(B) To identify vendors, negotiate costs, and perform quality inspections.

The responsibilities of a buying agent include identifying suitable vendors, negotiating costs, checking the in-process quality of the goods, and conducting a final pre-shipment quality inspection to ensure the product meets the buyer’s standards.

198. Why is it often profitable for international exporters or retailers to use the services of a buying agency?

- (A) Because it helps in significant cost and time savings.
- (B) Because it significantly increases their travel and administrative costs.
- (C) Because it guarantees that the products will be of lower quality.
- (D) Because it is a mandatory legal requirement for all international trade.

Ans :

(A) A because it helps in significant cost and time savings.

Selling through buying agencies can be very profitable for exporters and buyers. This is because it saves them considerable cost and time that would otherwise be spent on identifying vendors, negotiating, and managing quality control themselves.

199. The level of merchandising practiced by the UK retailer, which involves planning and buying for its own stores, is:

- (A) Export House Merchandising
- (B) Buying Agency Merchandising

able to afford fashionable clothing, which was all custom-made by hand.

- 209.** What was a key characteristic of ‘haute couture’ garments?
- (A) They were mass-produced in factories using machines.
 - (B) They were sold in standardized sizes to the general public.
 - (C) They were inexpensive and easily accessible to everyone.
 - (D) They were handmade and custom-made to fit the client’s exact measurements.

Ans :

(D) They were handmade and custom-made to fit the client’s exact measurements.

A defining feature of haute couture was that all the clothes were handmade and custom-made. This involved painstaking hand-sewing and fitting the garment to the customer’s precise measurements, making each piece unique and expensive.

- 210.** The introduction of prêt-à-porter lines by couturiers like YSL was significant because it:
- (A) Was a radical alternative that made fashion accessible to a wider audience.
 - (B) Made high fashion even more exclusive and expensive.
 - (C) Led to the complete disappearance of haute couture.
 - (D) Was a step back towards hand-sewing all garments.

Ans :

(A) Was a radical alternative that made fashion accessible to a wider audience.

The introduction of prêt-à-porter lines by major couturiers was a radical and democratic step. It made fashionable clothing available to the general public, bridging the gap between exclusive high fashion and the mass market.

- 204.** The coursework in Priya's diploma program is very focused on the actual job of fashion merchandising because:
- (A) The program duration is very short.
 - (B) The program is designed for students who want to become academics.
 - (C) The program includes a large number of liberal arts subjects.
 - (D) The program does not prepare students for a career in fashion.

Ans :

(A) The program duration is very short. Certificate or diploma programs in fashion merchandising have a short duration, typically 6-12 months. Because of this short timeframe, the coursework is very focused on the actual job skills needed for the profession.

- 205.** Regardless of the educational path, a flair for fashion alone is not enough for success. What other skill is crucial for a fashion merchandiser?
- (A) Analytical ability to understand the 'dollars and sense' part of the job.
 - (B) The ability to sew and construct garments from scratch.
 - (C) Knowledge of architectural design and construction.
 - (D) Expertise in information technology and software coding.

Ans :

(A) Analytical ability to understand the 'dollars and sense' part of the job. A successful fashion merchandiser needs more than just a flair for fashion. They must possess strong analytical ability to understand economic factors and juggle a complex set of variables to ensure profitability for their company.

Direction : Read the following case study and answer the following questions.

In post-World War II France, the world of fashion was dominated by 'haute couture'. This involved male designers, known as 'couturiers', creating exclusive, handmade, and custom-fitted garments for a very wealthy clientele. Each piece was a work of art, requiring painstaking hand-sewing. However, by the 1960s, a social and cultural shift was underway. A new, younger generation of consumers emerged who wanted fashionable clothing that was more accessible and affordable than the bespoke pieces of couture. Recognizing

this change, the famous couturier Yves Saint Laurent took a revolutionary step. He launched a full 'prêt-à-porter' line, which consisted of factory-made clothing sold in standardized sizes. This was the first time a major French couture house had offered a ready-to-wear collection. This move was a radical alternative to traditional couture and was instrumental in bridging the gap between high fashion and the general public, forever changing the landscape of the fashion industry.

- 206.** A male designer in the world of French haute couture is known as a:
- (A) Couturiere
 - (B) Couturier
 - (C) Merchandiser
 - (D) Retailer

Ans :

(B) Couturier
In the art of French dressmaking known as couture, a male designer was referred to as a 'couturier'. His female counterpart was called a 'couturiere'.

- 207.** The factory-made clothing sold in standardized sizes, launched as an alternative to couture, is known as:
- (A) Prêt-à-porter
 - (B) Haute couture
 - (C) Bespoke tailoring
 - (D) Custom-made fashion

Ans :

(A) Prêt-à-porter
Prêt-à-porter, or ready-to-wear, describes factory-made clothing sold in finished condition and in standardized sizes. It was a radical alternative to the made-to-measure pieces of haute couture when it emerged in the 1960s.

- 208.** Before the rise of ready-to-wear, who was the primary consumer of high fashion?
- (A) The growing middle class.
 - (B) Factory workers and laborers.
 - (C) Only the wealthy class who could afford custom-made clothes.
 - (D) The general public through mass-market stores.

Ans :

(C) Only the wealthy class who could afford custom-made clothes.
Until the Industrial Revolution and the rise of ready-to-wear, society largely consisted of two classes: wealthy and poor. Only the wealthy were

The laundry process in a hospital is a large-scale operation that involves a sequence of steps: collection of soiled linen, transportation, sorting, washing in high-capacity machines (100 kg or more), hydro-extraction to remove moisture, drying, pressing and folding, mending of damaged articles, packing, and finally, distribution back to the wards and departments. The linen stock requirement is high, with a minimum of six sets per bed needed to ensure a constant supply.

4. PREPARING FOR A CAREER

A career in this technical field requires a solid foundation in several areas:

- Knowledge of materials, including fibre content, yarn production, and fabric finishes.
- Knowledge of laundry processes, chemicals, and reagents.
- A working knowledge of the required machinery and its function.

While short-term Laundry Management courses are available, practical training or an internship is highly recommended. Academic qualifications in Textile Science, Textile Chemistry, or Fabric and Apparel are extremely useful for advancing in this field.

5. SCOPE

This is a field with significant entrepreneurial potential for those with a specialization in Textiles and Clothing. Services can be provided to individual households, small hospitals, nursing homes, and day-care centers. There are also stable employment opportunities within the in-house laundry programs of large organizations such as railways, airlines, shipping lines, major hotels, and hospitals.

MULTIPLE CHOICE QUESTION

1. What are the two primary aspects of care and maintenance of fabrics?
(A) Washing the fabrics and drying the fabrics
(B) Keeping material damage-free and refreshing its appearance
(C) Ironing textiles smoothly and storing them properly
(D) Selecting good textiles and using them carefully

(B) Keeping material damage-free and refreshing its appearance

Care and maintenance involve two key functions: preserving the physical integrity of the fabric by preventing and repairing damage, and maintaining its aesthetic qualities by removing dirt and stains to refresh its look and feel.

2. Why is laundering considered both a science and an art?
(A) It requires expensive equipment and creative folding techniques
(B) It involves chemical reactions and manual labour
(C) It applies scientific principles and requires skills for pleasing results
(D) It is a traditional practice passed down through generations

Ans :

(C) It applies scientific principles and requires skills for pleasing results

Laundering is a science because it's based on applying scientific principles and techniques for cleaning. It is also an art because it requires mastering specific skills to achieve aesthetically pleasing outcomes like crisp, well-finished linens.

3. Which of the following factors does NOT directly influence the care and maintenance requirements of a fabric?
(A) The fibre content and yarn type of the material
(B) The brand name and marketing of the fabric
(C) The construction technique and finishes applied
(D) The purpose for which the fabric will be used

Ans :

(B) The brand name and marketing of the fabric
The care needs of a fabric are determined by its physical properties such as fibre content, yarn type, construction method (e.g., weaving), and applied finishes. The end-use also dictates the level of care needed, whereas the brand name is a marketing aspect, not a physical one.

4. What are the three main types of equipment used for care and maintenance of fabrics?
(A) Washing, drying, and ironing/pressing equipment
(B) Buckets, basins, and scrubbing board equipment

- (C) Sewing machines, steamers, and folding equipment
- (D) Stain removers, detergents, and fabric softeners

Ans :

(A) Washing, drying, and ironing/pressing equipment

The primary equipment used in laundering, both domestically and commercially, falls into three main categories: washing equipment for cleaning, drying equipment for removing moisture, and ironing or pressing equipment for finishing the fabric.

- 5.** What is the main difference between a top-loading and a front-loading washing machine?
- (A) Top-loading machines are always fully automatic
 - (B) Front-loading machines use more water and detergent
 - (C) The type of fabrics that each machine can wash
 - (D) The direction from which garments are put into them

Ans :

(D) The direction from which garments are put into them

The fundamental difference between these two types of washing machines is their design for loading laundry. In a top-loading machine, garments are placed in from the top, while in a front-loading machine, they are placed in through a door on the front side.

- 6.** In the context of washing machines, what does the term 'fully automatic' imply?
- (A) The machine requires manual intervention for each cycle
 - (B) The machine has a single setting of controls for a complete wash
 - (C) The machine can only wash one type of fabric at a time
 - (D) The machine manually drains water after every rinse cycle

Ans :

(B) The machine has a single setting of controls for a complete wash

A fully automatic washing machine is designed to complete the entire laundry process—from water filling and temperature setting to the wash cycle and rinses—with a single time setting of controls, requiring no further operator intervention.

- 7.** Which washing method is typically used in top-loading washing machines and involves blades that rotate or oscillate?
- (A) Tumbling
 - (B) Pulsation
 - (C) Spinning
 - (D) Agitation

Ans :

(D) Agitation

Agitation is a washing method common in top-loading machines. It uses an agitator with blades that move in one or two directions to create a current in the water, forcing the wash solution through the fabric to remove dirt.

- 8.** Which washing method involves clothes being carried to the top of a horizontal cylinder and then dropped into the wash water?
- (A) Tumbling
 - (B) Agitation
 - (C) Pulsation
 - (D) Oscillation

Ans :

(A) Tumbling

Tumbling is the washing mechanism used in front-loading machines. A perforated horizontal cylinder revolves, carrying clothes to the top and then dropping them back into the water. In this method, the clothes move through the water, unlike agitation where water moves through clothes.

- 9.** Why is thorough rinsing considered an important phase in the wash cycle?
- (A) It determines the final spin speed of the machine
 - (B) It helps to save water during the washing process
 - (C) It prevents clothes from looking grey, dull, and harsh
 - (D) It is the phase where bleaching agents are added

Ans :

(C) It prevents clothes from looking grey, dull, and harsh

Thorough rinsing is crucial because it removes all detergent residue and loosened dirt from the fabric. If rinsing is not done properly, the remaining soap can make clothes appear grey and dull, and feel harsh to the touch.

10. Which of the following is NOT a method of water extraction in a washing machine?
- (A) Spinning at high speeds to generate centrifugal force
 - (B) Draining water through the bottom after the tub stops
 - (C) A combination of bottom-draining and spinning
 - (D) Soaking the clothes in a separate tub to absorb water

Ans :

(D) Soaking the clothes in a separate tub to absorb water

Washing machines use three main methods for water extraction: spinning, bottom-draining, and a combination of both. Soaking clothes is a pre-wash or washing step and is not a method for extracting or removing water from the garments after rinsing.

11. What is the primary principle behind water extraction by spinning in a washing machine?
- (A) Centrifugal force
 - (B) Gravitational pull
 - (C) Magnetic induction
 - (D) Heat application

Ans :

(A) Centrifugal force

Spinning extracts water by rotating the tub at high speeds (greater than 300 rpm). This rapid rotation generates a centrifugal force that throws the water outward from the clothes and up against the tub wall, from where it is pumped out.

12. What is a potential negative consequence of spinning clothes to near dryness at very high speeds?
- (A) It can damage the washing machine's motor
 - (B) It causes wrinkles that are difficult to remove
 - (C) It fails to remove all the detergent residue
 - (D) It consumes an excessive amount of electricity

Ans :

(B) It causes wrinkles that are difficult to remove
While high-speed spinning is effective for water removal, excessive speeds can cause deep-set wrinkles in the fabric. These wrinkles can become very difficult to remove, even with ironing, making the finishing process more challenging.

13. What distinguishes a semi-automatic washing machine from a fully automatic one?
- (A) Semi-automatic machines use a tumbling

washing method

- (B) Semi-automatic machines are always front-loading models
- (C) Semi-automatic machines require frequent operator intervention
- (D) Semi-automatic machines cannot use hot water

Ans :

(C) Semi-automatic machines require frequent operator intervention

The key difference is the level of automation. A fully automatic machine completes the entire wash cycle without intervention, whereas a semi-automatic machine requires the operator to perform steps like filling and draining/rinse water for each cycle.

14. In which type of washing machine is pulsation, caused by a vertical pulsator with rapid movements, typically used?
- (A) Front-loading machines
 - (B) Commercial tunnel washers
 - (C) Two-tub semi-automatic machines
 - (D) Top-loading machines

Ans :

(D) Top-loading machines

Pulsation is a washing method used in top-loading machines. It relies on a vertical pulsator that moves very rapidly, creating strong water currents to clean the clothes, similar to but distinct from the action of an agitator.

15. What type of system is characterized by circulating high-temperature air slowly through a dryer?
- (A) A system where air is drawn by a small fan through perforations
 - (B) A system where air enters from under the front panel at high velocity
 - (C) A centrifugal system that spins the clothes very rapidly in hot air
 - (D) A condensation system that collects water without an exhaust

Ans :

(A) A system where air is drawn by a small fan through perforations

This describes a specific type of dryer circulation system. Air is heated, then drawn by a fan through perforations at the top, passes downwards through the clothes, and exits. The slow movement results in high humidity in the exhausted air.

- 39.** Which two reagents are used alternately to treat old curry stains on cotton fabric?
- (A) Petrol and methylated spirit
 (B) Potassium permanganate and ammonia
 (C) Oxalic acid and borax solution
 (D) Glycerine and hydrogen peroxide

Ans :

(B) Potassium permanganate and ammonia
 The stain removal guide indicates a two-step chemical process for stubborn, old curry stains on cotton. The stained portion is dipped alternately in potassium permanganate and then in an ammonia solution to effectively bleach and remove the colouration.

- 40.** What is the purpose of preparing a “controlled sample” when practicing stain removal?
- (A) To have a backup piece of fabric in case of damage
 (B) To use less of the expensive stain removal chemicals
 (C) To practice the stain removal technique multiple times
 (D) To compare the treated fabric with the original stained one

Ans :

(D) To compare the treated fabric with the original stained one

In the practical exercise, keeping one stained sample untreated (the control) allows for a direct visual comparison with the treated sample. This helps in accurately assessing the effectiveness of the stain removal method used.

- 41.** Match the washing machine action in Column I with its description in Column II.

	Column I		Column II
1.	Agitation	a.	Clothes are lifted and dropped in a horizontal drum.
2.	Tumbling	b.	Blades create a current in a vertical tub.
3.	Pulsation	c.	Centrifugal force pushes water out of clothes.
4.	Spinning	d.	A disc at the bottom creates rapid vertical movements.

- (A) 1-b, 2-a, 3-d, 4-c
 (B) 1-d, 2-c, 3-a, 4-b
 (C) 1-b, 2-d, 3-c, 4-a
 (D) 1-a, 2-b, 3-d, 4-c

Ans :

(A) 1-b, 2-a, 3-d, 4-c

Agitation uses blades in a vertical tub (1-b). Tumbling occurs in a horizontal drum (2-a). Pulsation uses a rapidly moving vertical pulsator disc (3-d). Spinning uses centrifugal force for water extraction (4-c). These are distinct mechanisms used in washing machines.

- 42.** What is the typical load capacity of a washing machine in a large commercial or institutional laundry?

- (A) 5-10 kgs
 (B) 15-25 kgs
 (C) 40-50 kgs
 (D) 100 kg or more

Ans :

(D) 100 kg or more

Institutional laundries process massive volumes of linen and uniforms. The washing machines used in these settings are industrial-grade and have very large capacities, often able to handle 100 kilograms or more of laundry in a single cycle.

- 43.** Which statement best describes the primary goal of care and maintenance for industrial fabrics used for heat insulation?

- (A) To ensure they remain aesthetically pleasing and brightly coloured
 (B) To retain their specific functional properties over their expected life
 (C) To make them soft and comfortable for daily apparel use
 (D) To wash them frequently using standard household detergents

Ans :

(B) To retain their specific functional properties over their expected life

For industrial fabrics with specific functions, like heat insulation, the main goal of maintenance is to preserve those special properties. The focus is on functionality and serviceability rather than on appearance, which is secondary.

- 44.** Which of the following statements about the organisation of commercial laundries is correct?

- (A) They often have separate sections for different jobs like washing and pressing
 (B) They are typically small, single-room operations with one machine
 (C) They exclusively handle personal work and do not serve institutions

- correct explanation of A.
(C) A is true but R is false.
(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

Hospitals and hotels require a continuous and reliable supply of clean linen and uniforms to function. Having an in-house laundry department ensures that this critical need is met efficiently and in a timely manner, making it essential to their operations.

- 22.** What is the primary difference in laundry focus between a hospital and a high-end hotel?
(A) Hospitals use front-loading machines, while hotels use top-loading ones
(B) Hotels focus on hygiene and disinfection, while hospitals focus on aesthetics
(C) Hospitals use only disposable linens, while hotels use cotton
(D) Hospitals prioritize hygiene, while hotels prioritize aesthetics and finish

Ans :

(D) Hospitals prioritize hygiene, while hotels prioritize aesthetics and finish

The core priority for a hospital laundry is hygiene, cleanliness, and disinfection to prevent infections. In contrast, a hotel laundry's main focus is on aesthetics—ensuring linens are spotless, perfectly pressed, and folded to provide a luxurious experience for guests.

- 23.** In a hospital setting, what is a common practice for items that pose a high threat of infection?
(A) They are washed separately with strong bleach
(B) They are sent to a specialized commercial laundry
(C) They are often disposable and destroyed by burning
(D) They are starched and pressed at very high temperatures

Ans :

(C) They are often disposable and destroyed by burning

To mitigate the risk of cross-contamination and the spread of infections, many hospitals have adopted the use of disposable items, especially in high-risk areas. These items are used once and then safely destroyed, typically by incineration.

- 24.** According to the text, what is the minimum number of linen sets required in stock per bed in a hospital?
(A) Six sets
(B) Two sets
(C) Four sets
(D) Eight sets

Ans :

(A) Six sets

To manage the high turnover and ensure a constant supply of clean linen is always available for each patient, a hospital needs to maintain a minimum stock of six sets of linen per bed. This accounts for sets in use, in transit, in the laundry, and in storage.

- 25.** What is the correct sequence of the laundry process in a hospital, starting from collection?
(A) Washing, Sorting, Collection, Drying, Pressing, Distribution
(B) Collection, Sorting, Washing, Hydro-extraction, Drying, Distribution
(C) Sorting, Collection, Washing, Drying, Mending, Distribution
(D) Collection, Washing, Hydro-extraction, Mending, Sorting, Distribution

Ans :

(B) Collection, Sorting, Washing, Hydro-extraction, Drying, Distribution

The institutional laundry process follows a logical flow: dirty linen is first collected, then transported and sorted. It then goes through washing, water removal (hydro-extraction), and drying, followed by finishing (pressing), mending, packing, and finally, distribution back to the departments.

- 26.** Why might a hotel laundry place more emphasis on finishing processes like starching and perfect folding compared to a hospital laundry?
(A) Because hotel fabrics are always made of synthetic fibers
(B) Because hotels have a much larger volume of laundry to process
(C) Because guest perception and aesthetics are critical to the hospitality business
(D) Because hospital laundry equipment is not designed for finishing

Ans :

(C) Because guest perception and aesthetics are critical to the hospitality business

In the hospitality sector, the guest's experience is paramount. Perfectly finished linens—crisp, starched, and meticulously folded—contribute directly to an impression of luxury and high quality, which is a key part of a hotel's service offering and reputation.

- 27.** What is the function of a hydro-extractor in an institutional laundry?
- (A) It removes a significant percentage of moisture after washing
 - (B) It applies soap and detergent to the laundry load
 - (C) It heats the water to the correct temperature for disinfection
 - (D) It presses and folds the flat linen like bed sheets

Ans :

(A) It removes a significant percentage of moisture after washing
A hydro-extractor is a machine that works on the principle of centrifugal motion. It spins the wet laundry at high speeds to remove a large amount of moisture (60-70%) before the items are moved to the dryers, reducing drying time and energy consumption.

- 28.** Which of the following is a primary knowledge requirement for a career in laundry management?
- (A) Advanced skills in graphic design for marketing
 - (B) A degree in hospitality and tourism management
 - (C) Expertise in human resource and payroll software
 - (D) Knowledge of material science, chemicals, and machinery

Ans :

(D) Knowledge of material science, chemicals, and machinery

A professional in this technical field must have a thorough understanding of fabric properties (fibre, yarn, finishes), the effects of various chemicals, the laundry processes involved, and the functioning of the specialized machinery used.

- 29.** Why is practical training or an internship considered essential for someone entering the field of institutional laundry management?
- (A) Because theoretical courses are not available for this field
 - (B) Because each laundry setup has different

equipment and requirements

- (C) Because it is the only way to learn about fabric types
- (D) Because it guarantees a high-paying management position

Ans :

(B) Because each laundry setup has different equipment and requirements

While formal education provides a foundation, practical experience is crucial because laundry setups can vary significantly in terms of the types of equipment used, the specific workflow, and the unique requirements of the institution (e.g., a hospital vs. a hotel).

- 30.** Besides large hotels and hospitals, which other institutions are mentioned as requiring professional laundry services on a regular basis?
- (A) Schools, colleges, and universities
 - (B) Corporate offices and software companies
 - (C) Nursing homes and day care centres
 - (D) Government administrative buildings

Ans :

(C) Nursing homes and day care centres

The text points out that there are entrepreneurial opportunities in providing laundry services to a large number of smaller institutions, such as nursing homes, small hospitals, and day care centres, which require such services regularly but may not have in-house facilities.

- 31.** A laundry receives a fresh blood stain on a white cotton sheet. What is the correct first step to treat this stain?
- (A) Soak in hot water with strong detergent
 - (B) Apply bleach directly onto the dry stain
 - (C) Rub vigorously with a coarse brush and soap
 - (D) Soak in cold water, then wash in dilute ammonia

Ans :

(D) Soak in cold water, then wash in dilute ammonia

For fresh blood stains on cotton, heat should be avoided as it can set the protein in the stain. The correct procedure is to first soak the fabric in cold water to loosen the stain, followed by washing with a dilute ammonia solution.

- 32.** What reagent is suggested for removing old curry stains on silk and wool fabrics?
- (A) Javelle water
 - (B) Methylated spirit

- (C) Sodium perborate
- (D) Oxalic acid

Ans :

- (C) Sodium perborate

The provided table indicates that for old curry stains on delicate fabrics like silk and wool, bleaching with sodium perborate is the recommended treatment. Stronger agents like javelle water are suggested for cotton and linen only.

- 33.** Which pair of stain and removal agent for cotton fabric is correctly matched?
- (A) Lipstick - Kerosene
 - (B) Ball pen ink - Methylated spirit
 - (C) Old ink - Sour milk
 - (D) Fresh grease - French chalk

Ans :

- (B) Ball pen ink - Methylated spirit

According to the stain removal chart, steeping a cotton fabric in methylated spirit is the recommended method for removing a ball pen ink stain. Kerosene is for lipstick on synthetics, sour milk is for fresh ink, and French chalk is for grease on unwashable silk/wool.

- 34.** Why is it important to identify the type of stain before attempting to remove it?
- (A) To select the correct removal procedure and prevent damage
 - (B) To determine if the fabric is worth cleaning
 - (C) To calculate the cost of the cleaning service
 - (D) To ensure the stain is not permanent

Ans :

- (A) To select the correct removal procedure and prevent damage

Different stains react to different chemical agents and methods. Using the wrong procedure—for example, applying heat to a blood stain—can permanently set the stain or damage the fabric. Therefore, correct identification is the critical first step.

- 35.** For removing a fresh tea stain on a cotton cloth, what is the recommended method?
- (A) Soak in warm water and borax solution
 - (B) Pour boiling water through the stain
 - (C) Apply glycerine until the stain is removed
 - (D) Steep the fabric in methylated spirit

Ans :

- (B) Pour boiling water through the stain

The table on stain removal specifies that for fresh tea and coffee stains on cotton and linen, the most effective method is to stretch the stained area and pour boiling water through it from a height to flush out the stain.

- 36.** A customer brings in a silk garment with a grease stain that cannot be washed with water. What is the appropriate treatment?
- (A) Wash with hot water and strong soap
 - (B) Treat with a grease solvent like petrol
 - (C) Bleach the stain with hydrogen peroxide
 - (D) Spread French chalk on it, then brush off

Ans :

- (D) Spread French chalk on it, then brush off

For unwashable fabrics like some silks, a dry treatment is needed for grease stains. The procedure involves spreading an absorbent powder like French chalk over the stain, letting it absorb the grease for about an hour, and then brushing the powder away.

- 37.** Which substance is recommended for softening an old lipstick stain on cotton before washing?
- (A) Salt
 - (B) Vinegar
 - (C) Glycerine
 - (D) Ammonia

Ans :

- (C) Glycerine

For an old, set-in lipstick stain, the recommended procedure is to first moisten and soften the stain by working glycerine into it. After leaving it for a short while, the garment can then be rinsed and washed normally with soap and water.

- 38.** Which of the following pairs of fabric and treatment for an old blood stain is INCORRECT?
- (A) Synthetics: Wash in hot water
 - (B) Cotton: Steep in cold water and salt
 - (C) Silk: Apply starch paste, let dry, and brush
 - (D) Wool: Sponge with cold water first

Ans :

- (A) Wash in hot water

The chart specifies washing synthetics with blood stains in cold water. Using hot water on a protein-based stain like blood would set it, making it difficult or impossible to remove. The other pairings are consistent with the recommended procedures for old or fresh blood stains.

- (C) Synthetics
- (D) Cotton

Ans :

- (D) Cotton

Most hospital linens and garments are made of cotton. This is because cotton can withstand the high temperatures and harsh chemicals required for sterilization and has good wash-fastness, making it durable for frequent, rigorous laundering.

- 51.** Assertion (A): In a hotel laundry, perfect folding and pressing are highly emphasized.
Reason (R): The final finish of laundered goods directly impacts the guest's perception of quality and luxury.
- (A) Both A and R are true and R is the correct explanation of A.
 - (B) Both A and R are true but R is not the correct explanation of A.
 - (C) A is true but R is false.
 - (D) A is false but R is true.

Ans :

- (A) Both A and R are true and R is the correct explanation of A.

The aesthetic presentation of linen is a critical component of the guest experience in the hospitality sector. Therefore, hotel laundries emphasize perfect finishing touches like pressing and folding, as this reinforces the establishment's image of quality and attention to detail.

- 52.** Which of the following services is more likely to be offered by a hotel laundry than a hospital laundry?
- (A) Disinfection of all laundered items
 - (B) Mending of torn sheets and gowns
 - (C) Care of guests' personal laundry
 - (D) Washing of staff uniforms

Ans :

- (C) Care of guests' personal laundry
- Hotels, as part of their guest services in the hospitality sector, often provide laundry and dry-cleaning for the personal clothing of their guests. This is a service not typically required or offered by a hospital laundry.

- 53.** A semi-automatic washing machine is described as a 'two-tub' machine. What are the likely functions of the two tubs?
- (A) One for washing light clothes and one for heavy clothes

- (B) One for washing and rinsing, and one for spinning/drying

- (C) One for soaking clothes and one for washing
- (D) One for using soap and one for using detergent

Ans :

- (B) One for washing and rinsing, and one for spinning/drying

In a typical two-tub semi-automatic machine, one tub is dedicated to the washing and rinsing process. After washing, the clothes are manually transferred to the second, separate tub, which is designed for spinning to extract water.

- 54.** Which type of iron, still seen in India, uses live coal pieces for heating?
- (A) A steam iron
 - (B) A thermostat iron
 - (C) A travel iron
 - (D) A charcoal iron

Ans :

- (D) A charcoal iron

The text mentions that alongside modern electric irons, one can still find charcoal irons in India. These irons are designed as metal boxes with lids, where hot pieces of charcoal are placed inside to heat the soleplate for ironing.

- 55.** An institutional laundry is processing heavy articles like bed covers and curtains. What kind of iron would be most effective?
- (A) A heavier iron
 - (B) A lightweight iron
 - (C) A cordless iron
 - (D) A small travel iron

Ans :

- (A) A heavier iron

While lightweight irons are preferred for general household use, heavier articles like curtains and bed covers often require a heavier iron. The additional weight helps to apply more pressure, making it easier to smooth out wrinkles in the thick fabric.

- 56.** What is the main purpose of the "Receipt for Washable Linen" form used in hospitals?
- (A) To bill patients for the linen they use during their stay
 - (B) To serve as an advertisement for the hospital's services
 - (C) To create a record for collection and disbursement of linen
 - (D) To track the laundry staff's working hours

(D) They do not offer specialized services like dry-cleaning or mending

Ans :

(A) They often have separate sections for different jobs like washing and pressing

Large commercial laundries are organized departmentally to handle the workflow efficiently. They have different sections dedicated to specific tasks such as washing, water extraction, drying, pressing, sorting, and often specialized areas for dry-cleaning or hospital work.

- 45.** A small restaurant wants to outsource its daily table linen laundering. Which type of service would be most appropriate for its needs?

(A) An in-house laundry department
(B) A self-service laundromat
(C) An individual professional (dhobi)
(D) A commercial laundry

Ans :

(D) A commercial laundry

A commercial laundry is best suited for an institution like a small restaurant. It can handle the volume and provide the professional cleaning, pressing, and finishing required for table linens, often with transport services, which an individual professional might not manage.

- 46.** Besides washing machines and dryers, what other specialized equipment is commonly found in a large commercial laundry?

(A) Sewing machines and fabric looms
(B) Hydro-extractors and calendaring machines
(C) Dye vats and printing tables
(D) Carding and spinning machines

Ans :

(B) Hydro-extractors and calendaring machines
Commercial laundries use heavy-duty equipment beyond basic washers. Hydro-extractors are for efficient water removal, and calendaring machines (roller ironing) are used for high-speed pressing of large flat items like sheets and tablecloths.

- 47.** What is the main reason hospital laundries might not prioritize the perfect removal of stubborn stains or high-level finishing?

(A) Hospital staff are not trained in stain removal techniques
(B) The cost of stain removal chemicals is too high for hospitals
(C) The primary focus is on hygiene and rapid turnover of linen

(D) Hospital fabrics are designed to be stain-resistant

Ans :

(C) The primary focus is on hygiene and rapid turnover of linen

The paramount concern in a hospital laundry is disinfection and ensuring a constant supply of hygienically clean linen. The process is geared towards speed and sanitation, so time-consuming tasks like treating every stubborn stain or perfect pressing are secondary.

- 48.** What is the term for the process of condemning and segregating unusable material in an institutional laundry?

(A) Mending and segregation
(B) Sorting and stacking
(C) Invoicing and tagging
(D) Quality control

Ans :

(A) Mending and segregation

The process described in the hospital laundry workflow includes a step for “Mending and segregation of condemned articles.” This is where items that are too worn or damaged to be repaired are identified and removed from circulation.

- 49.** How does the quantum of bed linen laundry typically compare between a large hospital and a large hotel?

(A) It is much larger for hotels due to daily changes for all guests
(B) It is roughly the same for both types of institutions
(C) It is much larger for hospitals due to multiple changes per day in some wards
(D) It is smaller for hospitals as they primarily use disposable linen

Ans :

(C) It is much larger for hospitals due to multiple changes per day in some wards

While hotels have high turnover, large hospitals have a significantly larger quantum of bed linen laundry. This is because some departments, like maternity wards and operation theaters, may require five or more linen changes per bed per day.

- 50.** What type of material are most articles in hospitals, such as sheets and gowns, made of?

(A) Wool
(B) Silk

16. An institutional laundry needs to dry clothes quickly without significantly raising the room's temperature and humidity. Which dryer system would be most suitable?
- (A) A system circulating high-temperature air slowly
 - (B) A system where room air is circulated at high velocity
 - (C) A condenser dryer that recycles the air internally
 - (D) A steam-based drying cabinet for delicate items

Ans :

(B) A system where room air is circulated at high velocity

This system takes room air, heats it, and circulates it at high velocity through the clothes before exhausting it. This process keeps the room's temperature and humidity relatively normal, making it suitable for institutional settings where constant operation is required.

17. What is the primary purpose of 'pressing' fabrics, as distinct from 'ironing'?
- (A) To remove deep stains and dirt from the fabric
 - (B) To apply starch and other finishing agents evenly
 - (C) To put in sharp creases in sleeves or trouser legs
 - (D) To dry the fabric using controlled heat application

Ans :

(C) To put in sharp creases in sleeves or trouser legs

While ironing is the process of smoothing out wrinkles, pressing is specifically used to create sharp, defined creases. This is commonly done for items like trouser legs, pleated skirts, and sleeves to give them a structured finish.

18. What feature in most modern electric irons allows for the adjustment of temperature to suit different fabrics?
- (A) A built-in thermostat
 - (B) A detachable water tank
 - (C) A charcoal heating element
 - (D) A weighted soleplate

Ans :

(A) A built-in thermostat

Most electric irons are equipped with an inbuilt thermostat. This device regulates the heating element, allowing the user to select and maintain a specific temperature that is safe and effective for the type of fabric being ironed.

19. Which statement accurately describes the use of individual professionals, often called 'dhobis', in India?
- (A) They exclusively use large, automated commercial laundry equipment
 - (B) They serve institutions like large hospitals and five-star hotels
 - (C) They work from home and use places called dhobighats for washing
 - (D) They only provide dry-cleaning and pressing services

Ans :

(C) They work from home and use places called dhobighats for washing

Individual professionals or dhobis typically serve households and small institutions. They often work from their homes and utilize specially designated public areas known as 'dhobighats' for the manual washing of clothes.

20. In a commercial laundry, what is the purpose of using code tags?
- (A) To indicate the price of the laundry service
 - (B) To identify the items belonging to each customer
 - (C) To specify the type of detergent to be used
 - (D) To track the age of the fabric article

Ans :

(B) To identify the items belonging to each customer

Commercial laundries handle large volumes of items from many different customers. A system of code tags, which match the customer's invoice, is used to ensure that all articles can be correctly identified and returned to the rightful owner after processing.

21. Assertion (A): Large institutions like hospitals and hotels often have their own in-house laundry departments.

Reason (R): The constant flow of clean linen and uniforms is essential for the daily operations of these institutions.

- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are true but R is not the

and efficiency

Ans :

(C) To create a record for collection and disbursement of linen

This form acts as a crucial record-keeping tool. It documents the type and number of linen articles sent from a specific department to the laundry and those returned, ensuring accountability and proper management of linen inventory.

57. Which of the following is NOT listed as a key area of knowledge for a career in fabric care?

- (A) The effect of chemicals on fabrics
- (B) The functioning of laundry machinery
- (C) The fibre content and production of fabrics
- (D) The history of fashion and design

Ans :

(D) The history of fashion and design

A career in laundry management is technical. It requires knowledge of textile science, chemistry, and engineering related to laundry. Fashion history, while related to textiles, is not a primary requirement for managing the care and maintenance process.

58. What is 'calendaring' in the context of a commercial laundry?

- (A) The process of scheduling staff shifts
- (B) The system of invoicing customers for services
- (C) The chemical treatment used for disinfecting fabrics
- (D) The process of ironing large flat items using rollers

Ans :

(D) The process of ironing large flat items using rollers

Calendaring refers to a finishing process where damp, flat textiles like sheets or tablecloths are passed through heated rollers. This industrial-scale process quickly presses and dries the items, and it is also known as roller ironing.

59. Which of the following statements about care and maintenance is incorrect?

- (A) Laundry is a science based on scientific principles
- (B) The purpose for which a fabric is used affects its care needs
- (C) All fabrics can be cleaned using the same method
- (D) Care includes repairing physical damage to a material

Ans :

(C) All fabrics can be cleaned using the same method

Different fabrics have unique properties based on their fibre content, construction, and finishes. Therefore, they require different care methods; for example, wool cannot be washed at the same high temperatures as cotton. A universal cleaning method does not exist.

60. Which of the following is mentioned as a potential entrepreneurial venture in the field of fabric care?

- (A) Manufacturing industrial washing machines
- (B) Providing laundry services to households and small institutions
- (C) Developing new synthetic fibres for the textile industry
- (D) Publishing a magazine on laundry management techniques

Ans :

(B) Providing laundry services to households and small institutions

The text highlights that specializing in fabric care can lead to entrepreneurial activities. One such venture is establishing a laundry service that caters to the needs of end-users in metropolitan areas, including households and smaller institutions like day care centres.

61. A worker needs to remove a fresh ink stain from a white cotton uniform. Which of the following would be an appropriate initial treatment?

- (A) Rub the stain with a cut tomato and salt
- (B) Immediately apply hot water and bleach
- (C) Let the stain dry completely before washing
- (D) Treat the stain with a grease solvent like petrol

Ans :

(A) Rub the stain with a cut tomato and salt
The stain removal chart provides several options for fresh ink on cotton. One method is to rub the stain with a cut tomato and salt. Another is to soak it in sour milk. Both methods use mild acids to break down the ink before washing.

62. What is the purpose of using a "grease solvent" like petrol or methylated spirit?

- (A) To remove oily or greasy stains from fabric
- (B) To bleach coloured stains on white fabric
- (C) To set the dye in newly coloured textiles
- (D) To disinfect hospital linens effectively

Ans :

“Same as cotton,” which is to steep the stained area in methylated spirit and then wash it with soap and water.

- 98.** Which pair of stain and recommended treatment is INCORRECT?
- (A) Fresh Curry (Cotton) - Wash with soap and water
 - (B) Old Lipstick (Cotton) - Moisten with glycerine
 - (C) Fresh Ink (Silk) - Treat with sour milk or curd
 - (D) Old Grease (Cotton) - Apply French chalk powder

Ans :

(D) Old Grease (Cotton) - Apply French chalk powder
French chalk is recommended for treating grease on unwashable fabrics like silk. For an old grease stain on washable cotton, the recommendation is the same as for fresh grease: treat with a grease solvent and wash with hot water and soap.

- 99.** In a washing machine, the combination of bottom-drain and spin is considered the best water extraction system because it can remove:
- (A) Heavy dirt at the bottom and dirt in suspension
 - (B) Only the water, leaving all the dirt behind
 - (C) Wrinkles and creases from the fabric
 - (D) The color from the fabric if left for too long

Ans :

(A) Heavy dirt at the bottom and dirt in suspension
This combination system is highly effective because it addresses both types of dirt. The bottom drain removes heavy, settled dirt particles, while the concurrent spinning action removes the finer dirt suspended in the water through centrifugal force.

- 100.** What is the primary function of the Public Area Supervisor in a hotel's housekeeping department?
- (A) To clean and maintain all the guest rooms on one floor
 - (B) To manage the hotel's laundry and linen inventory
 - (C) To maintain cleanliness of the lobby, corridors, and restaurants
 - (D) To coordinate with the front office for guest check-ins

Ans :

(C) To maintain cleanliness of the lobby, corridors, and restaurants

The Public Area Supervisor is specifically responsible for the cleanliness and maintenance of all common areas of the hotel that are accessible to the public, such as the main entrance, lobby, corridors, public restrooms, offices, and restaurants.

- 101.** Match the housekeeping staff in Column I with their primary responsibility in Column II.

	Column I		Column II
1.	Room Attendant	a.	Performs heavy cleaning activities like mopping.
2.	Housemen	b.	Manages cleanliness of lobbies and corridors.
3.	Public Area Supervisor	c.	Does the actual cleaning of guest rooms and bathrooms.
4.	Floor Supervisor	d.	Responsible for cleanliness of rooms on a specific floor.

- (A) 1-c, 2-a, 3-b, 4-d
- (B) 1-d, 2-b, 3-a, 4-c
- (C) 1-c, 2-d, 3-b, 4-a
- (D) 1-a, 2-c, 3-d, 4-b

Ans :

(A) 1-c, 2-a, 3-b, 4-d
The Room Attendant cleans guest rooms (1-c). Housemen do heavy cleaning (2-a). The Public Area Supervisor manages common areas (3-b). The Floor Supervisor is responsible for an entire floor, including rooms and corridors (4-d).

- 102.** Why is it crucial for an institutional laundry to have a system for mending and segregating condemned articles?
- (A) To ensure that damaged items are not put back into circulation
 - (B) To calculate the total value of all linen in stock
 - (C) To provide a source of scrap fabric for other uses
 - (D) To reduce the amount of detergent used in each wash

Ans :

(A) To ensure that damaged items are not put back into circulation
This process is a quality control measure. It prevents worn-out or torn items from being sent back to hospital wards or hotel rooms, maintaining the standard of the linen supply and ensuring patient/guest comfort and safety.

Ans :

(C) Tumbler washer

A washing machine that uses a tumbling action operates with a horizontally placed cylinder or drum. This design is characteristic of front-loading machines, where clothes are tumbled through the water as the drum rotates.

69. Which statement about the laundry requirements in the hospitality sector is true?

- (A) The main focus is on disinfection using harsh chemicals
- (B) Aesthetics and final finish of articles are most important
- (C) Only woolen and silk fabrics are used for hotel linen
- (D) Guest laundry services are never provided by hotels

Ans :

(B) Aesthetics and final finish of articles are most important

For hotels and restaurants, the visual appeal of linens is a top priority. The laundry process emphasizes achieving a perfect finish, including starching, pressing, and folding, to meet the high aesthetic standards of the hospitality industry.

70. Which of the following is NOT listed as a section within a well-organized commercial laundry?

- (A) A separate section for hospital work
- (B) A section for special articles like carpets
- (C) A section for mending and stain removal
- (D) A section for manufacturing detergents

Ans :

(D) A section for manufacturing detergents

Commercial laundries are organized to process fabrics. They have sections for washing, pressing, dry-cleaning, special articles, and pre-treatments like mending. Manufacturing detergents is a separate chemical industry and not a function of a laundry service.

71. Match the stain type in Column I with its appropriate treatment for cotton fabric in Column II.

	Column I		Column II
1.	Fresh Blood	a.	Steep in methylated spirit
2.	Ball Pen Ink	b.	Soak in cold water, wash in dilute ammonia

3.	Fresh Tea	c.	Wash with hot water and soap
4.	Fresh Grease	d.	Pour boiling water through

(A) 1-b, 2-a, 3-d, 4-c

(B) 1-a, 2-b, 3-c, 4-d

(C) 1-c, 2-d, 3-a, 4-b

(D) 1-d, 2-c, 3-b, 4-a

Ans :

(A) 1-b, 2-a, 3-d, 4-c

Correct treatments from the text are: Fresh Blood on cotton is soaked in cold water and washed with dilute ammonia (1-b). Ball Pen Ink on cotton is steeped in methylated spirit (2-a). Fresh Tea on cotton is treated by pouring boiling water through it (3-d). Fresh Grease on cotton is washed with hot water and soap (4-c).

72. The optimum spinning speed for a washing machine to extract water without causing excessive wrinkles is approximately:

(A) 300-320 rpm

(B) 600-620 rpm

(C) 900-920 rpm

(D) 1100-1120 rpm

Ans :

(B) 600-620 rpm

The text states that while spin speeds can range from 333-1100 rpm, the optimum speed that balances effective water extraction with preventing hard-to-remove wrinkles is approximately 600-620 rpm.

73. Which principle of washing is described as 'clothes move through the water' rather than 'water moving through clothes'?

(A) Agitation

(B) Soaking

(C) Pulsation

(D) Tumbling

Ans :

(D) Tumbling

The text explicitly makes this distinction. In agitation and pulsation (top-loaders), water is forced through the stationary mass of clothes. In tumbling (front-loaders), the clothes are lifted and dropped, actively moving through the pool of water at the bottom of the drum.

74. A laundry service needs to keep records of items received from different clients and ensure they are

(A) To remove oily or greasy stains from fabric
Grease solvents are chemical substances specifically designed to dissolve oil-based stains. The text mentions using agents like petrol or methylated spirit to treat grease stains on cotton fabrics before washing them with soap and hot water.

- 63.** Why is sour milk or curd suggested for treating fresh ink stains on cotton?

- (A) Their white colour helps to mask the stain
- (B) Their cold temperature prevents the stain from setting
- (C) The mild acid (lactic acid) they contain helps dissolve the ink
- (D) They contain enzymes that break down the ink particles

Ans :

(C) The mild acid (lactic acid) they contain helps dissolve the ink

Sour milk and curd contain lactic acid. This mild acid acts as a gentle bleaching and dissolving agent, which can effectively break down and loosen fresh ink stains on fabrics like cotton, making them easier to wash out.

- 64.** How does the treatment for a fresh tea stain on cotton differ from the treatment on silk?

- (A) Cotton is treated with boiling water, while silk is steeped in warm water
- (B) Cotton is bleached, while silk is treated with a grease solvent
- (C) Cotton is soaked in salt water, while silk is soaked in ammonia
- (D) Cotton is treated with glycerine, while silk is treated with borax

Ans :

(A) Cotton is treated with boiling water, while silk is steeped in warm water

The treatment varies based on the fabric's tolerance to heat. Durable cotton can withstand boiling water poured through it. Delicate silk, however, would be damaged by boiling water, so a gentler method of steeping in warm water is recommended.

- 65.** What is Javelle water, as mentioned in the context of stain removal?

- (A) A type of absorbent powder for grease stains
- (B) A mild acid used for removing ink stains
- (C) A bleaching agent for treating old curry stains on cotton

(D) A solvent used for removing lipstick from synthetic fabrics

Ans :

(C) A bleaching agent for treating old curry stains on cotton

The stain removal chart indicates that for old curry stains on cotton, one of the treatment options is to bleach the fabric with Javelle water. This suggests it is a type of bleaching agent suitable for use on durable cotton and linen.

- 66.** Assertion (A): It is important to remove all soap and dirt from clothes during the rinsing phase.

Reason (R): Improper rinsing can leave clothes with a harsh texture and a grey, dull appearance.

(A) Both A and R are true and R is the correct explanation of A.

(B) Both A and R are true but R is not the correct explanation of A.

(C) A is true but R is false.

(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The reason provides the direct consequence of the action described in the assertion. The harsh, grey, and dull appearance of clothes is the negative outcome of failing to rinse them thoroughly, which is why complete removal of residue is so important.

- 67.** Why must dyeing in the batik process be carried out in cold temperatures?

- (A) To prevent the fabric from shrinking
- (B) To ensure the colours appear brighter
- (C) To save energy and reduce costs
- (D) To avoid melting the wax resist

Ans :

(D) To avoid melting the wax resist

Batik is a resist-dyeing technique where wax is used to block dye from certain areas. The dyeing must be done in cold or cool dye baths (below 35°C) because hot water would melt the wax, destroying the design.

- 68.** What is the term for a machine that performs washing in a horizontally placed, perforated cylinder?

- (A) Agitator washer
- (B) Pulsator washer
- (C) Tumbler washer
- (D) Hydro-extractor

- correct explanation of A.
(C) A is true but R is false.
(D) A is false but R is true.

Ans :

(C) A is true but R is false.
Assertion (A) is true; hotels prioritize aesthetics. However, Reason (R) is false. While many hotel linens are cotton, they absolutely require special finishing like pressing, starching, and folding to achieve the crisp, luxurious look expected in the hospitality industry. The fabric type doesn't negate the need for finishing.

- 81.** What is the primary role of the 'Desk control supervisor' in a hotel's housekeeping department?
(A) To personally clean the hotel lobby and entrance
(B) To coordinate with the front office about room status
(C) To manage the inventory of cleaning chemicals
(D) To supervise the hotel's gardening and floral staff

Ans :

(B) To coordinate with the front office about room status

The desk control supervisor acts as a communication hub, coordinating with the front office to get information on guest departures, assigning vacated rooms for cleaning, and then reporting back once the rooms are ready for new guests, ensuring a smooth turnover.

- 82.** Which member of the housekeeping staff is responsible for heavy cleaning activities like vacuuming, mopping, and shifting furniture?
(A) Room attendant
(B) Floor supervisor
(C) Linen room supervisor
(D) Housemen

Ans :

(D) Housemen

The role of housemen is specifically to perform the heavy physical cleaning tasks within the hotel. This includes operating heavy equipment like vacuum cleaners, mopping large floor areas, and moving furniture as needed for deep cleaning.

- 83.** Which statement accurately describes the responsibilities of a Linen Room Supervisor?
(A) They manage the acquisition, storage, issue, and cleanliness of all linen
(B) They are responsible for washing and ironing

all hotel linen personally

- (C) They only manage the uniforms for the front office staff
(D) They are primarily responsible for mending and repairing damaged linen

Ans :

(A) They manage the acquisition, storage, issue, and cleanliness of all linen

The Linen Room Supervisor has a comprehensive role that includes managing the entire lifecycle of linen and uniforms within the hotel, from purchasing and storage to issuing clean items to various departments and coordinating with the laundry.

- 84.** According to the text, what is the optimal spin speed range for a washing machine to effectively remove water without causing excessive, hard-to-remove wrinkles?
(A) 333-500 rpm
(B) 600-620 rpm
(C) 800-1000 rpm
(D) 1100-1200 rpm

Ans :

(B) 600-620 rpm

The text specifies that while spin speeds can go up to 1100 rpm, spinning to near dryness can cause stubborn wrinkles. Therefore, an optimal speed of approximately 600-620 rpm is recommended to balance water extraction and fabric care.

- 85.** A hospital laundry needs to process bed sheets from the Operation Theatre, which requires five changes per day. Which characteristic of the laundry operation is most critical here?
(A) Aesthetic finishing and starching
(B) Gentle washing for delicate fabrics
(C) Individual tagging for each sheet
(D) Rapid turnover and disinfection

Ans :

(D) Rapid turnover and disinfection

For areas with high usage and infection risk like an Operation Theatre, the laundry's primary focus must be on quickly washing, disinfecting, and returning the linen to service to meet the constant demand while maintaining strict hygiene standards.

- 86.** How does the treatment for an old blood stain on cotton differ from that for a fresh blood stain on the same fabric?
(A) Old stains are steeped in salt water, while

returned correctly. What system would be most effective?

- (A) Taking a photograph of each client with their laundry bag
- (B) Using different colored laundry bags for each client
- (C) Using a system of invoices and matching code tags
- (D) Asking clients to write their names on each item with a pen

Ans :

- (C) Using a system of invoices and matching code tags

For systematic and error-free handling of multiple clients' items, a professional system is needed. The text describes the use of an invoice for the number and type of articles, with matching code tags affixed to each item to identify ownership throughout the process.

- 75.** Which of the following is NOT a category of equipment used for manual washing at the household level?
- (A) Tumble dryers
 - (B) Buckets and basins
 - (C) Scrubbing boards
 - (D) Brushes

Ans :

- (A) Tumble dryers

Buckets, basins, scrubbing boards, and brushes are all examples of simple equipment used for manual washing. A tumble dryer is a piece of automated drying equipment, not a tool for manual washing.

- 76.** What is the term for a stain caused by contact and absorption of foreign matter that requires special treatment before washing?
- (A) A wrinkle
 - (B) A defect
 - (C) A stain
 - (D) A finish

Ans :

- (C) A stain

The practical section defines a stain as an unwanted mark or coloration on a fabric. It is caused by the absorption of foreign substances and typically requires specific, targeted treatment before the general washing process to ensure its removal.

- 77.** Before starting the tie-and-dye process, what must be done to the cloth to ensure even dye absorption?
- (A) It should be starched heavily
 - (B) It must be washed in hot soapy water
 - (C) It should be soaked in a salt solution
 - (D) It must be ironed completely smooth

Ans :

- (B) It must be washed in hot soapy water

To prepare a fabric for dyeing, it is essential to remove any sizing, starches, or impurities from the manufacturing process. Washing the cloth in hot soapy water ensures it is clean and will absorb the dye evenly, preventing a blotchy appearance.

- 78.** What is the main reason that dyeing is very rarely done at the fibre stage?
- (A) It is the most expensive process
 - (B) It makes the fibres too weak for spinning
 - (C) The colour fades quickly at this stage
 - (D) It is only possible for natural fibres

Ans :

- (A) It is the most expensive process

Dyeing at the fibre stage, known as stock dyeing, is the most costly method. This is because a lot of dye is wasted in the process, and the decision on colour must be made very early, creating a higher financial risk for the manufacturer.

- 79.** What is the primary difference in the resist material used in tie-dye versus batik?
- (A) Tie-dye uses thread, while batik uses clay
 - (B) Tie-dye uses knots, while batik uses folding
 - (C) Tie-dye uses clips, while batik uses sewing
 - (D) Tie-dye uses thread, while batik uses wax

Ans :

- (D) Tie-dye uses thread, while batik uses wax

Both are resist-dyeing techniques, but they use different materials to create the resist. In tie-dye, patterns are created by tightly winding thread around fabric sections to prevent dye penetration. In batik, molten wax is applied to the fabric to act as the resist.

- 80.** Assertion (A): The hospitality sector places great importance on the aesthetic finish of its laundered goods.
Reason (R): Most hotel linens are made of cotton, which does not require special finishing.
- (A) Both A and R are true and R is the correct explanation of A.
 - (B) Both A and R are true but R is not the

drying process faster and more energy-efficient, directly explaining its place in the workflow.

- 92.** What is the main difference between the washing actions of agitation and pulsation?
- (A) Agitation uses a horizontal drum, while pulsation uses a vertical one
 - (B) Agitation uses rotating blades, while pulsation uses rapid vertical movements
 - (C) Agitation is for commercial machines, while pulsation is for domestic ones
 - (D) Agitation uses hot water, while pulsation uses cold water only

Ans :

(B) Agitation uses rotating blades, while pulsation uses rapid vertical movements
Both methods are used in top-loading machines. However, agitation involves an agitator with blades creating a rotational or oscillating current. Pulsation, on the other hand, uses a bottom disc (pulsator) that creates rapid, strong, vertical water movements to clean clothes.

- 93.** What is the function of calendaring machines in a large laundry?
- (A) To sort clothes based on fabric type
 - (B) To apply starch automatically to uniforms
 - (C) To schedule the washing and drying cycles
 - (D) To press large flat items using heated rollers

Ans :

(D) To press large flat items using heated rollers
Calendaring machines, or roller irons, are used for finishing large, flat items like bed sheets and tablecloths. The fabric is fed between large, heated rollers that press and dry it simultaneously, providing a smooth finish efficiently.

- 94.** Which of the following statements about the role of a 'dhobi' is correct?
- (A) They primarily operate large, high-tech commercial laundries
 - (B) They often serve individual households and small institutions
 - (C) They specialize exclusively in dry-cleaning delicate garments
 - (D) They are employed directly by large hospitals for in-house services

Ans :

(B) They often serve individual households and small institutions
The text describes 'dhobis' as individual professionals who typically cater to the laundry

needs of households and smaller establishments like student hostels or small restaurants, often working from home and using 'dhobighats'.

- 95.** A hotel guest complains that their freshly laundered towels feel harsh and look dull. What is the most likely cause of this problem?
- (A) The towels were not rinsed thoroughly
 - (B) The towels were spun at too high a speed
 - (C) The towels were ironed at too high a temperature
 - (D) The towels were washed with cotton and synthetic items

Ans :

(A) The towels were not rinsed thoroughly
The text states that if the rinse phase is not thorough, leftover detergent residue can cause clothes to look grey and dull and have a harsh texture. This is the most direct cause for the symptoms described by the guest.

- 96.** Why are qualifications in Textile Chemistry and Textile Science useful for a career in laundry management?
- (A) To design new marketing campaigns for laundry services
 - (B) To operate the financial and accounting software of the business
 - (C) To understand the interaction between fabrics, chemicals, and processes
 - (D) To negotiate contracts with large institutional clients

Ans :

(C) To understand the interaction between fabrics, chemicals, and processes
Laundry management is a technical field. A background in Textile Chemistry and Science provides the essential knowledge of how different fibres react to various cleaning agents, temperatures, and mechanical actions, ensuring effective cleaning without damaging the fabrics.

- 97.** What is the recommended treatment for removing a ball pen ink stain from a silk garment?
- (A) Steep in methylated spirit, then wash
 - (B) The treatment is the same as for cotton
 - (C) Apply a paste of starch and brush it off
 - (D) Bleach the stain with Javelle water

Ans :

(B) The treatment is the same as for cotton
The stain removal chart indicates that for ball pen ink, the treatment for silk and wool is the

- fresh stains use ammonia
- (B) Old stains are soaked in hot water, while fresh stains use cold water
- (C) Old stains are ignored, while fresh stains are treated immediately
- (D) Old stains may require starch paste, while fresh stains are simply soaked

Ans :

(A) Old stains are steeped in salt water, while fresh stains use ammonia

The recommended treatment for a fresh blood stain on cotton involves soaking in cold water and washing with dilute ammonia. For an old stain, the procedure involves steeping it in a cold water and salt solution until the stain is removed.

- 87.** What two items does a single set of hospital bed linen normally consist of?
- (A) Bed sheet, duvet cover, and a pillow slip
- (B) Bed sheet, draw sheet, and a pillow slip
- (C) Fitted sheet, flat sheet, and a blanket
- (D) Mattress protector, bed sheet, and a pillow slip

Ans :

(B) Bed sheet, draw sheet, and a pillow slip

The text specifies that in a hospital setting, a standard linen set that is changed frequently typically consists of a bed sheet, a draw sheet (used for repositioning patients), and a pillow slip.

- 88.** Which of the following is NOT a correct procedure for stain removal as per the text?
- (A) Using petrol as a grease solvent for old stains on cotton
- (B) Applying a cut tomato and salt to a fresh ink stain on cotton
- (C) Pouring boiling water through a fresh tea stain on silk
- (D) Steeping a ball pen ink stain on cotton in methylated spirit

Ans :

(C) Pouring boiling water through a fresh tea stain on silk

Pouring boiling water is recommended for fresh tea stains on durable fabrics like cotton. This method would likely damage delicate fabrics like silk, for which steeping in warm water and a dilute borax solution is suggested instead.

- 89.** What is the underlying principle of using an absorbent powder like French chalk for grease stains on unwashable fabrics?

- (A) The powder chemically neutralizes the grease
- (B) The powder acts as a gentle abrasive to scrub the stain
- (C) The powder bleaches the stain without using liquid
- (D) The powder absorbs the oil from the fabric fibers

Ans :

(D) The powder absorbs the oil from the fabric fibers

Absorbent powders like French chalk work by drawing the liquid oil or grease out of the fabric fibers and into the powder particles through capillary action. The powder, now containing the grease, can then be brushed away from the fabric surface.

- 90.** Which chemical is specifically mentioned for treating old ink stains on cotton that persist after initial treatments?
- (A) Hydrogen peroxide
- (B) Methylated spirit
- (C) Dilute oxalic acid
- (D) Kerosene

Ans :

(C) Dilute oxalic acid

For stubborn, old ink stains on cotton, the text suggests a more intensive treatment. The procedure involves steeping the stained area in dilute oxalic acid, followed by a thorough rinse with a dilute borax solution to neutralize the acid.

- 91.** Assertion (A): In a commercial laundry, a hydro-extractor is used after the washing phase.
Reason (R): The hydro-extractor removes 60-70% of moisture, reducing the time and energy needed for the subsequent drying phase.
- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are true but R is not the correct explanation of A.
- (C) A is true but R is false.
- (D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The hydro-extractor's function is to efficiently remove a large volume of water from the laundry through centrifugal force. This is done immediately after washing to make the final

103. A small nursing home without an in-house laundry needs regular, reliable cleaning for its bed linens with a focus on hygiene. What is their best option?

- (A) Asking the nursing staff to wash linens by hand
- (B) Installing a single domestic washing machine
- (C) Hiring a dhobi for daily collection
- (D) Establishing a contract with a commercial laundry

Ans :

(D) Establishing a contract with a commercial laundry

A commercial laundry is the most suitable option for a small institution like a nursing home. It can handle the required volume, provide the necessary level of hygiene and finishing, and offer reliable service with transport, which is more professional and scalable than other options.

104. Which two chemical agents are suggested to treat an old curry stain on a cotton cloth?

- (A) Oxalic acid and Borax
- (B) Glycerine and Ammonia
- (C) Potassium permanganate and Ammonia
- (D) Methylated spirit and Petrol

Ans :

(C) Potassium permanganate and Ammonia

For a stubborn old curry stain on cotton, the text recommends a dual-chemical treatment. The stained portion is dipped alternately in potassium permanganate (a strong oxidizing agent/bleach) and ammonia to remove the discoloration.

105. Consider the following statements about washing machine operation:

1. Tumbling is a wash action where clothes move through water in a horizontal drum.
2. Spinning at 1100 rpm is optimal for preventing wrinkles in all fabrics.
3. Agitation involves blades that create a current in a top-loading machine's tub.

Which of the above statements is/are correct?

- (A) 1 and 3 only
- (B) 2 only
- (C) 1, 2 and 3
- (D) 1 and 2 only

Ans :

(A) 1 and 3 only

Statement 1 correctly describes tumbling.
Statement 3 correctly describes agitation.

Statement 2 is incorrect; the text suggests 1100 rpm is a high speed and that a lower speed of 600-620 rpm is optimal to prevent wrinkles.

106. All of the following are listed as sections in a commercial laundry EXCEPT:

- (A) A section for special articles like blankets and carpets
- (B) A section for dry-cleaning silks and woolens
- (C) A section for customer service and complaint resolution
- (D) A section for inspection and pre-treatments like mending

Ans :

(C) A section for customer service and complaint resolution

The text describes the operational sections of a commercial laundry, including specialized areas for hospital work, dry-cleaning, special articles, and pre-treatments. A dedicated customer service section is not mentioned as part of this operational workflow.

107. What is the first step in treating a fresh blood stain on any type of fabric (cotton, wool, or synthetic)?

- (A) Soaking or sponging with cold water
- (B) Applying a strong detergent paste
- (C) Rubbing the stain with salt
- (D) Immersing the fabric in hot water

Ans :

(A) Soaking or sponging with cold water

For all fabric types listed, the initial and most critical step for a fresh blood stain is to use cold water. Heat will set the protein in the blood, making the stain permanent. Cold water helps to loosen and flush out the stain before further treatment.

108. Why would a large hotel have both a Floor Supervisor and a Public Area Supervisor?

- (A) To create competition between the housekeeping staff
- (B) To manage different shifts throughout the 24-hour cycle
- (C) To specialize in cleaning different types of areas (private vs. common)
- (D) To handle guest complaints and special requests separately

Ans :

(C) To specialize in cleaning different types of areas (private vs. common)

The responsibilities are divided for efficiency. The Floor Supervisor focuses on the guest rooms and private corridors on a specific floor. The Public Area Supervisor is responsible for all common, high-traffic areas like the lobby, restaurants, and main entrance, which have different cleaning needs and schedules.

- 109.** Which reagent is recommended for treating a fresh ink stain by soaking it for half an hour before washing?

(A) Dilute borax solution
(B) Sour milk or curd
(C) Methylated spirit
(D) Kerosene

Ans :

(B) Sour milk or curd

The stain removal guide suggests a method for fresh ink stains on cotton is to soak the stain immediately in sour milk or curd for half an hour. The lactic acid in these substances helps to break down the ink before the item is washed.

- 110.** Assertion (A): For removing fresh grease from an unwashable silk fabric, one should spread French chalk on the stain.

Reason (R): French chalk acts as a grease solvent that chemically dissolves the grease on the silk fabric.

(A) Both A and R are true and R is the correct explanation of A.
(B) Both A and R are true but R is not the correct explanation of A.
(C) A is true but R is false.
(D) A is false but R is true.

Ans :

(C) A is true but R is false.

Assertion (A) is a correct procedure mentioned in the text. However, Reason (R) is false. French chalk is not a solvent; it is an absorbent powder that physically soaks up the grease from the fabric fibers. A solvent like petrol dissolves grease chemically.

- 111.** Match the type of laundry service in Column I with its typical client/location in Column II.

	Column I		Column II
1.	Household Laundry	a.	Large hospitals and hotels
2.	Commercial Laundry	b.	Individual households, small hostels

3.	Individual Professional (Dhobi)	c.	Articles of daily use within a family
4.	In-house Institutional Laundry	d.	Small hotels, restaurants, nursing homes

- (A) 1-c, 2-d, 3-b, 4-a
(B) 1-d, 2-a, 3-c, 4-b
(C) 1-c, 2-b, 3-d, 4-a
(D) 1-b, 2-d, 3-a, 4-c

Ans :

(A) 1-c, 2-d, 3-b, 4-a

Household laundry is for daily family use (1-c). Commercial laundries serve institutions like small hotels and restaurants (2-d). Dhobis serve individual households and small hostels (3-b). In-house laundries are found in large institutions like hospitals and hotels (4-a).

- 112.** What is the primary purpose of an iron's thermostat?

(A) To produce steam for easier ironing
(B) To automatically turn the iron off after a period of inactivity
(C) To increase the weight of the iron for better pressure
(D) To regulate the iron's temperature for different fabrics

Ans :

(D) To regulate the iron's temperature for different fabrics

A thermostat is a temperature control device. In an electric iron, it allows the user to select and maintain a heat level appropriate for the specific type of fabric being pressed, preventing scorching or melting.

- 113.** What advantage does a combination bottom-drain and spin system have over a simple spin system for water extraction?

(A) It uses significantly less electricity
(B) It can remove heavy, settled dirt in addition to suspended dirt
(C) It spins the clothes at a much higher velocity
(D) It is only found in domestic, not commercial, machines

Ans :

(B) It can remove heavy, settled dirt in addition to suspended dirt

This system is superior because it tackles both types of soil. The bottom-drain allows heavy dirt particles that have settled at the bottom of the tub to be flushed out, while the spinning action removes the finer dirt suspended in the water.

- 114.** Which of the following statements about stain removal is correct?
- (A) All stains should be treated with hot water immediately
 - (B) Bleach is a safe and effective remover for all stain types on all fabrics
 - (C) Identifying the stain correctly is a crucial first step
 - (D) Old, set-in stains are always easier to remove than fresh ones

Ans :

(C) Identifying the stain correctly is a crucial first step

The text emphasizes that to use the right procedure, it is important to first identify the stain. Different stains require different chemical and physical treatments, and using the wrong method can set the stain permanently or damage the fabric.

- 115.** A hotel wants to implement an eco-friendly practice in its laundry operation. Which of the following actions would align with this goal?
- (A) Placing cards in rooms to encourage the reuse of towels
 - (B) Washing every towel after a single use, regardless of guest preference
 - (C) Using single-use plastic bags for all clean linen
 - (D) Using the strongest chemical detergents available for all washes

Ans :

(A) Placing cards in rooms to encourage the reuse of towels

Encouraging guests to reuse towels is an eco-friendly practice mentioned in the text. It helps in saving natural resources like water and electricity, and also reduces the amount of detergent used for laundering, thus promoting environmental conservation.

- 116.** What is the recommended treatment for an old tea stain on a silk fabric?
- (A) Pour boiling water through the stain
 - (B) Rub vigorously with soap and a brush
 - (C) Apply a paste of washing soda

(D) Treat with dilute hydrogen peroxide

Ans :

(D) Treat with dilute hydrogen peroxide

For old, set-in tea or coffee stains on delicate silk, the stain removal chart suggests two options: steeping in a borax solution or treating the stain with dilute hydrogen peroxide, which acts as a gentle bleaching agent.

- 117.** How does the primary objective of a commercial laundry differ from that of a hospital's in-house laundry?
- (A) Commercial laundries focus on profit, while hospital laundries focus on cost-saving
 - (B) Commercial laundries prioritize aesthetics, while hospital laundries prioritize hygiene
 - (C) Commercial laundries use manual methods, while hospitals use automated ones
 - (D) Commercial laundries handle small loads, while hospitals handle large loads

Ans :

(B) Commercial laundries prioritize aesthetics, while hospital laundries prioritize hygiene

While both clean fabrics, their core missions differ. A hospital laundry's non-negotiable priority is disinfection and hygiene to prevent cross-infection. A commercial laundry, serving clients like hotels or individuals, must prioritize the aesthetic quality and final finish to satisfy customers.

- 118.** Which of the following is NOT a type of automatic washing machine movement described in the text?
- (A) Vibration
 - (B) Agitation
 - (C) Pulsation
 - (D) Tumbling

Ans :

(A) Vibration

The text details three major methods of mechanical washing action in machines: agitation (rotating blades in a top-loader), pulsation (rapid vertical movements in a top-loader), and tumbling (lifting and dropping clothes in a front-loader). Vibration is not listed as a primary method.

- 119.** What is the purpose of having a separate section for "special articles like blankets and carpets" in a commercial laundry?
- (A) Because these items belong to special VIP customers
 - (B) Because these items are always washed by

hand

- (C) Because they require different equipment and processes than regular apparel
- (D) Because they are always dyed and finished in a separate area

Ans :

(C) Because they require different equipment and processes than regular apparel

Blankets and carpets are bulky and made of different materials (like wool) compared to standard linen. They require larger, specialized machines and may need different cleaning methods (e.g., gentler washing, specific detergents, or different drying techniques) than regular clothing or sheets.

- 120.** An apprentice in a laundry mistakenly uses hot water to wash a load of hospital gowns stained with blood. What is the likely outcome?
- (A) The blood stains will be perfectly removed
- (B) The protein in the blood stains will set, making them permanent
- (C) The hot water will effectively disinfect the gowns
- (D) The washing machine will automatically switch to a cold rinse

Ans :

(B) The protein in the blood stains will set, making them permanent

This is a classic laundry error. Heat causes the proteins in stains like blood, egg, or milk to coagulate and bond with the fabric fibers, effectively “cooking” the stain into the cloth and making it extremely difficult or impossible to remove.

- 121.** Match the stain on a synthetic fabric in Column I with its appropriate removal agent in Column II.

	Column I		Column II
1.	Fresh Blood	a.	Same as cotton (methylated spirit)
2.	Ball Pen Ink	b.	Wash in cold water
3.	Fresh Curry	c.	Same as cotton (wash with soap & water)
4.	Old Lipstick	d.	Steep in kerosene or turpentine

- (A) 1-d, 2-c, 3-b, 4-a
- (B) 1-b, 2-a, 3-c, 4-d
- (C) 1-c, 2-d, 3-a, 4-b
- (D) 1-a, 2-b, 3-d, 4-c

Ans :

(B) 1-b, 2-a, 3-c, 4-d

From the stain removal chart: Fresh blood on synthetics is washed in cold water (1-b). Ball pen ink is treated the same as cotton, with methylated spirit (2-a). Fresh curry is treated the same as cotton, by washing with soap and water (3-c). Old lipstick is steeped in kerosene or turpentine (4-d).

- 122.** Consider the following statements regarding institutional laundries:

- Hotels prioritize aesthetics, while hospitals prioritize disinfection.
- A hospital’s linen requirement is a minimum of six sets per bed.
- Commercial laundries use invoices and code tags for identification.
- Hydro-extractors work by applying high heat to evaporate water.

Which of the above statements are correct?

- (A) 1, 2, and 3 only
- (B) 2, 3, and 4 only
- (C) 1, 3, and 4 only
- (D) 1, 2, 3, and 4

Ans :

(A) 1, 2, and 3 only

Statements 1, 2, and 3 are all correct facts presented in the chapter. Statement 4 is incorrect; hydro-extractors work on the principle of centrifugal motion (spinning) to remove water, not by applying heat.

- 123.** What is the primary method suggested for removing a fresh grease stain from a washable cotton fabric?

- (A) Apply an absorbent powder like French chalk
- (B) Treat with a grease solvent like petrol
- (C) Wash with hot water and soap
- (D) Bleach with javelle water

Ans :

(C) Wash with hot water and soap

The stain removal chart clearly states that for a fresh grease stain on cotton, the appropriate action is to wash the item with hot water and soap. Treating with a solvent is listed as an alternative/additional step for more stubborn stains.

- 124.** In the context of laundering, what does ‘serviceability’ of a product refer to?

- (A) The aesthetic appeal and fashionableness of the product
- (B) The period for which the product remains

functional and usable

- (C) The availability of customer service from the manufacturer
- (D) The cost of purchasing the product initially

Ans :

(B) The period for which the product remains functional and usable

Serviceability refers to the product's ability to serve its intended purpose effectively over a period of time. The text states that care and maintenance efforts are made to prolong the period of serviceability, meaning to keep the item useful for as long as possible.

125. What is a 'dhobighat'?

- (A) A type of commercial laundry with large automated machines
- (B) The shop where a professional launderer stores finished articles
- (C) A type of trolley used to transport linen in a hospital
- (D) A specially marked place in towns used for manual washing

Ans :

(D) A specially marked place in towns used for manual washing

The text explains that dhobis, or individual professional launderers, often make use of specially marked public places in towns and cities called 'dhobighats' to do their washing, particularly for large-scale manual laundering.

126. Assertion (A): Most hospital linens are made of cotton dyed with colors having excellent wash-fastness.

Reason (R): Hospital linens must endure frequent, rigorous washing at high temperatures with disinfectants without losing their color.

- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are true but R is not the correct explanation of A.
- (C) A is true but R is false.
- (D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

Hospitals use colored cotton linen and require the dyes to be wash-fast because the linens undergo harsh, frequent laundering for disinfection. The

need to withstand this process directly explains why dyes with excellent wash-fastness are chosen.

127. What is the recommended treatment for an old blood stain on a silk fabric?

- (A) Wash in hot water and strong bleach
- (B) Soak in cold water and salt solution
- (C) Apply a starch paste, let it dry, and then brush it off
- (D) Treat with a grease solvent like petrol

Ans :

(C) Apply a starch paste, let it dry, and then brush it off

For old blood stains on delicate fabrics like silk, a gentle, dry-to-damp method is recommended. The text suggests applying a paste of starch, which will absorb the stain as it dries. The dried paste is then brushed off, removing the stain with it.

128. How does a manually operated washing machine differ from a semi-automatic one?

- (A) Manually operated machines are always front-loading
- (B) Manually operated machines perform 50% or more of the work manually
- (C) Manually operated machines have a built-in dryer
- (D) Manually operated machines use the tumbling method of washing

Ans :

(B) Manually operated machines perform 50% or more of the work manually

The level of operator involvement is the key difference. While a semi-automatic machine requires some intervention (like filling water for rinse cycles), a manually operated machine relies on the operator for 50% or more of the work, representing the lowest level of automation.

129. Which of the following stain removal procedures is paired INCORRECTLY with its fabric type?

- (A) Old Curry on Cotton - Treat with potassium permanganate and ammonia
- (B) Fresh Grease on Silk (unwashable) - Spread French chalk and brush off
- (C) Fresh Tea on Cotton - Pour boiling water through
- (D) Old Ink on Silk - Steep in dilute oxalic acid

Ans :

(D) Old Ink on Silk - Steep in dilute oxalic acid
Steeping in dilute oxalic acid is a strong treatment recommended for old ink stains on cotton. For

- 161.** What is the most important aspect of laundry care in the hospitality sector, such as a hotel?
- (A) Using the strongest possible detergents, regardless of the fabric type.
 - (B) Achieving the fastest possible turnaround time, even if the quality is compromised.
 - (C) Aesthetics and the final finish of the articles, including perfect ironing and folding.
 - (D) Focusing only on hygiene and disinfection, with little regard for appearance.

Ans :

(C) Aesthetics and the final finish of the articles, including perfect ironing and folding.

In the hospitality sector, the aesthetics and final finish of laundered goods are of utmost importance. Factors like starching, ironing, pressing, and perfect folding are emphasized to maintain a high standard of presentation for guests.

- 162.** What is the purpose of a calendaring machine used in an institutional laundry?
- (A) To wash the clothes with high-pressure water jets.
 - (B) To extract water from the clothes using centrifugal force.
 - (C) To dry the clothes using hot air.
 - (D) To give a smooth, pressed finish to large flat items like bed sheets.

Ans :

(D) To give a smooth, pressed finish to large flat items like bed sheets.

Calendaring machines, along with flat bed ironing equipment, are used in large laundries for pressing. They are particularly useful for providing a smooth and crisp finish to large flat articles like bed linen and tablecloths.

- 163.** How does the laundry requirement of a luxury hotel differ from that of a hospital?
- (A) Hotels have a much larger quantum of bed linen to wash daily.
 - (B) Hotels deal with a wider variety of fiber contents and must cater to guests' personal laundry.
 - (C) Hospitals place a greater emphasis on perfect folding and starching.
 - (D) Hotels do not need to worry about the cleanliness of their linen.

Ans :

(B) Hotels deal with a wider variety of fiber contents and must cater to guests' personal laundry.

Compared to hospitals, which mostly use durable cotton, hotels often have articles with different fiber contents. They also have the additional responsibility of caring for guests' personal laundry, which may require special handling and dry-cleaning.

- 164.** The process of removing 60-70% of moisture from clothes using centrifugal motion after washing is done by a:
- (A) Washing machine
 - (B) Drier
 - (C) Folding machine
 - (D) Hydro-extractor

Ans :

(D) A Hydro-extractor

A hydro-extractor is a piece of equipment used in commercial and institutional laundries after the washing phase. It works on the principle of centrifugal motion to get rid of a significant amount of moisture from the clothes.

- 165.** The successful laundering of fabrics, which involves both scientific principles and skillful application, is considered both a:
- (A) Science and an art.
 - (B) Hobby and a sport.
 - (C) Business and a charity.
 - (D) Manual and an automated task.

Ans :

(A) Science and an art.

Laundry is described as both a science and an art. It is a science because it is based on the application of scientific principles, and an art because it requires the mastering of skills to produce aesthetically pleasing results.

Direction : Read the following case study and answer the following questions.

An entrepreneur is setting up a new commercial laundry service in a busy urban area. He plans to cater to individual households as well as small institutions like local restaurants and student hostels. To ensure an efficient workflow, he organizes his facility into different sections. The first section is for receiving and sorting, where articles are tagged, checked for damage, and sorted based on fabric type, color, and level of soil. The next section houses large-capacity washing

- 135.** What is the recommended treatment for an old curry stain on a wool fabric?
- (A) Bleach with sodium perborate
 - (B) Bleach with javelle water
 - (C) Treat with potassium permanganate
 - (D) Steep in dilute oxalic acid

Ans :

- (A) Bleach with sodium perborate

The stain removal chart specifies that for old curry stains on delicate wool (and silk), a gentler bleaching agent is required. Sodium perborate is the recommended chemical for this purpose to avoid damaging the protein fibers of the wool.

- 136.** Which of the following is a correct statement regarding ironing equipment?
- (A) Most electric irons lack a thermostat for temperature control
 - (B) Heavier irons are generally required for lightweight fabrics like silk
 - (C) Charcoal irons are a traditional type of iron still found in India
 - (D) The primary purpose of ironing is to disinfect the fabric

Ans :

- (C) Charcoal irons are a traditional type of iron still found in India

The text explicitly mentions that in India, one can still see charcoal irons being used. These are metal boxes heated by live coals, representing a traditional method of pressing clothes that coexists with modern electric irons.

- 137.** The process of sorting dirty linen in a hospital laundry involves separating it into categories like:
- (A) Cotton, wool, and synthetics
 - (B) Doctor's, patient's, and visitor's dress
 - (C) White, light-colored, and dark-colored
 - (D) Clean, mildly soiled, and very soiled

Ans :

- (D) Clean, mildly soiled, and very soiled

The text outlines the sorting step in a hospital laundry process. It specifies that bed linen is sorted based on the level of soilage into categories such as clean, mildly soiled, and very soiled, which determines the intensity of the required washing cycle.

- 138.** A new launderer wants to start an entrepreneurial venture targeting a niche market. Based on the text, which area offers significant potential?
- (A) Manufacturing high-capacity industrial

washing machines

- (B) Providing specialized care for antique textiles for museums
- (C) Offering laundry services to day care centers and small nursing homes
- (D) Developing a new brand of eco-friendly household detergent

Ans :

- (C) Offering laundry services to day care centers and small nursing homes

The text specifically identifies a market opportunity for entrepreneurs in providing laundry services to the large number of smaller institutions, like day care centers and nursing homes, that have a regular need but are unlikely to have their own in-house facilities.

- 139.** What is the key advantage of a top-loading washing machine with an agitator?
- (A) It uses less water and detergent than a front-loader
 - (B) Its mechanism forces water through the fabric to remove dirt
 - (C) It spins clothes at a higher speed for better drying
 - (D) It is gentler on delicate fabrics like silk and wool

Ans :

- (B) Its mechanism forces water through the fabric to remove dirt

The principle of agitation is to create strong water currents that are forced through the mass of clothes. This mechanical action is effective at dislodging dirt and providing a robust wash, which is the primary advantage of this design.

- 140.** According to the practical guide, what must be done to a fabric after treating an old ink stain with dilute oxalic acid?
- (A) It must be rinsed thoroughly with a dilute borax solution
 - (B) It must be dried immediately in a hot dryer
 - (C) It must be soaked in a salt solution for one hour
 - (D) It must be washed with a strong bleach like javelle water

Ans :

- (A) It must be rinsed thoroughly with a dilute borax solution

Oxalic acid is a strong chemical. After it has been used to treat the stain, it is essential to neutralize

silk, a much gentler treatment (“Same as cotton” which is sour milk or curd for fresh stains, and “Same as cotton” for old stains, implying repeated gentle methods) would be used to avoid fabric damage.

- 130.** What is the main entrepreneurial opportunity identified in the field of care and maintenance of fabrics?

(A) Inventing new types of washing machines
 (B) Starting a service to cater to households, nursing homes, and day care centers
 (C) Becoming a textile chemistry professor at a university
 (D) Writing books about the history of laundering

Ans :

(B) Starting a service to cater to households, nursing homes, and day care centers

The text points to a significant entrepreneurial opportunity in providing much-needed laundry services. This is especially true in metropolitan areas for working women, as well as for numerous small institutions that require regular laundry but lack in-house facilities.

- 131.** Match the institutional laundry function in Column I with the department/sector it primarily serves in Column II.

	Column I		Column II
1.	Focus on aesthetics and perfect folding	a.	Hospital Operation Theatre
2.	Focus on hygiene and disinfection	b.	Hotel Guest Rooms
3.	Frequent daily changes of linen	c.	Commercial Dry-Cleaners
4.	Care of guests' personal laundry	d.	Hospitality Sector (Hotels)

(A) 1-b, 2-a, 3-a, 4-d
 (B) 1-d, 2-a, 3-b, 4-c
 (C) 1-b, 2-a, 3-c, 4-d
 (D) 1-d, 2-b, 3-a, 4-d

Ans :

(A) 1-b, 2-a, 3-a, 4-d

Aesthetics are key for Hotel Guest Rooms (1-b). Hygiene is paramount for a Hospital Operation Theatre (2-a). Frequent changes also occur in the OT (3-a). Caring for personal laundry is a service of the Hospitality Sector (4-d).

- 132.** What substance is suggested to be worked into an old lipstick stain to moisten and soften it before washing?

(A) Vinegar
 (B) Salt
 (C) Borax
 (D) Glycerine

Ans :

(D) Glycerine

For an old, dried lipstick stain, which is waxy and oily, glycerine is recommended as a pre-treatment. Working glycerine into the stain helps to soften and break it down, making it much easier to remove during the subsequent washing process.

- 133.** A laundry manager notices that recently washed cotton sheets look greyish and feel stiff. Which part of the washing process should they investigate first?

(A) The spin cycle speed
 (B) The water filling temperature
 (C) The thoroughness of the rinsing phase
 (D) The brand of the detergent being used

Ans :

(C) The thoroughness of the rinsing phase

The text directly links a grey, dull, and harsh outcome to an improper rinsing phase. Insufficient rinsing leaves detergent and dirt residue on the fabric, causing this specific problem. Therefore, checking the rinse cycles is the logical first step.

- 134.** Why do large institutions like railways and airways often have their own in-house laundry programs?

(A) To provide employment for a large number of people
 (B) To ensure a constant, reliable supply of clean linen for their operations
 (C) To compete with commercial laundry businesses
 (D) To experiment with new and advanced washing technologies

Ans :

(B) To ensure a constant, reliable supply of clean linen for their operations

Similar to hotels and hospitals, transportation services like railways and airways have a massive and continuous need for clean linen (seat covers, blankets, napkins, etc.). An in-house laundry ensures they have full control over the supply, quality, and timeliness essential for their services.

infection risk

- (D) Hotels and hospitals have identical laundering processes and priorities

Ans :

(D) Hotels and hospitals have identical laundering processes and priorities

The text makes a clear distinction between the priorities of hotel and hospital laundries. While both clean linen, their primary objectives are different (aesthetics vs. hygiene), leading to different processes, chemical usage, and finishing standards. They are not identical.

- 147.** What is the recommended treatment for removing a fresh lipstick stain from a cotton fabric?
(A) Steep in methylated spirit and wash with soap
(B) Wash with hot water and soap
(C) Apply a paste of starch and brush off
(D) Soak in a solution of cold water and salt

Ans :

(A) Steep in methylated spirit and wash with soap
The stain removal chart specifies that for a fresh lipstick stain on cotton, the fabric should be steeped in methylated spirit. This solvent helps to break down the waxy and oily components of the lipstick before it is washed with soap and water.

- 148.** Assertion (A): A fully automatic washing machine requires no operator intervention after the initial settings are made.
Reason (R): These machines automatically control water filling, temperature, wash cycles, and rinsing.
(A) Both A and R are true and R is the correct explanation of A.
(B) Both A and R are true but R is not the correct explanation of A.
(C) A is true but R is false.
(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The reason perfectly explains what makes the machine 'fully automatic'. The automation of all key processes (water filling, temperature control, etc.) is what allows the operator to set it once and walk away, eliminating the need for further intervention.

- 149.** Match the laundry equipment in Column I with its primary function in Column II.

	Column I		Column II
1.	Top-loading washer with agitator	a.	To smoothen wrinkles and create sharp creases.
2.	Hydro-extractor	b.	To force water through clothes in a vertical tub.
3.	Tumble Dryer	c.	To remove 60-70% of moisture using centrifugal force.
4.	Iron/Press	d.	To dry clothes by circulating heated air.

- (A) 1-b, 2-c, 3-d, 4-a
(B) 1-c, 2-d, 3-a, 4-b
(C) 1-d, 2-a, 3-b, 4-c
(D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-b, 2-c, 3-d, 4-a

An agitator washer forces water through clothes (1-b). A hydro-extractor uses centrifugal force to remove water (2-c). A tumble dryer circulates hot air (3-d). An iron/press is for smoothing and creasing (4-a).

- 150.** What are the two types of circulation systems found in clothes dryers?
(A) Hot air at high velocity vs. Cold air at low velocity
(B) Low temperature air at high velocity vs. High temperature air at slow velocity
(C) Steam circulation vs. Dry heat circulation
(D) Centrifugal air circulation vs. Static air circulation

Ans :

- (B) Low temperature air at high velocity vs. High temperature air at slow velocity

The text describes two distinct types of dryer systems. The first uses relatively low-temperature air circulated at a high velocity. The second uses high-temperature air that is circulated slowly through the clothes.

- 151.** Why is it important for commercial laundries to have a system for inspection and pre-treatment?
(A) To increase the price of the service for stained items
(B) To sort clothes according to their brand name
(C) To ensure that all items are washed together in one large load
(D) To identify and treat issues like stains or damage before washing

Ans :

(D) To identify and treat issues like stains or damage before washing

Inspection and pre-treatment are crucial quality control steps. This process allows for the identification of problems like heavy stains or tears that need special attention before the main wash. Treating them beforehand leads to better results and prevents further damage.

- 152.** A launderer has to remove an unknown stain from a delicate silk blouse. What should be the first course of action?

- (A) Apply the strongest bleach available to ensure removal
- (B) Test a mild cleaning agent on an inconspicuous area of the blouse
- (C) Wash the entire blouse in a hot water cycle
- (D) Ignore the stain as it is probably permanent

Ans :

(B) Test a mild cleaning agent on an inconspicuous area of the blouse

When dealing with an unknown stain on a delicate fabric, caution is paramount. The professional approach is to test any cleaning agent on a hidden part of the garment (like an inside seam) to ensure it doesn't cause discoloration or damage before treating the visible stain. This principle is an extension of the text's emphasis on knowing the fabric and stain.

- 153.** In addition to bed linen and patient dresses, what other items are mentioned as being laundered by a hospital laundry?

- (A) Guest's personal clothing and accessories
- (B) Doctors' dress (coats, gowns) and general material like table cloths
- (C) Surgical instruments and medical equipment
- (D) Kitchen uniforms and chef's aprons

Ans :

(B) Doctors' dress (coats, gowns) and general material like table cloths

The text lists the scope of a hospital's laundry work. It includes linen for patient beds, patient dresses, and also the uniforms for doctors (coats, gowns, etc.), as well as general items used around the hospital like tablecloths and curtains.

- 154.** Which of the following statements about stain removal agents is INCORRECT based on the text?

- (A) Sour milk or curd can be used to treat fresh

ink stains on cotton

- (B) Glycerine is used to soften old lipstick stains before washing
- (C) Petrol is a type of grease solvent used on cotton fabrics
- (D) Boiling water is a safe treatment for fresh tea stains on all fabric types

Ans :

(D) Boiling water is a safe treatment for fresh tea stains on all fabric types

Boiling water is a harsh treatment recommended only for durable fabrics like cotton. It is not safe for all fabric types; it would damage delicate materials like silk and wool. Therefore, the statement that it is safe for all types is incorrect.

- 155.** What is the purpose of the 'bottom-drain' feature in some washing machines?

- (A) To add extra water to the tub during the wash cycle
- (B) To mix the detergent more effectively with the water
- (C) To stop the machine and drain water through the bottom at the end of a phase
- (D) To heat the water using an element at the bottom of the tub

Ans :

(C) To stop the machine and drain water through the bottom at the end of a phase

This feature describes a specific water extraction method. At the end of the wash or rinse phase, the machine with a perforated tub stops, and the water is drained out through the bottom before the spin cycle begins.

- 156.** What is the significance of the fact that institutional laundries often have arrangements for "zari polishing"?

- (A) It shows that they primarily clean metallic objects, not fabrics
- (B) It indicates they can handle specialized and delicate finishing processes
- (C) It means they use polishing machines instead of washing machines
- (D) It suggests that all their detergents contain polishing agents

Ans :

(B) It indicates they can handle specialized and delicate finishing processes

Zari polishing is a very specific finishing treatment for garments with metallic thread embroidery. The

fact that some laundries offer this service shows their capability to handle specialized, delicate, and high-value items beyond standard washing and pressing.

- 157.** A student hostel needs to get its residents' clothes laundered. Which type of service provider would it most likely use?
- (A) An individual professional (dhobi) or a commercial laundry
 - (B) A large in-house hospital laundry
 - (C) The housekeeping department of a five-star hotel
 - (D) A specialized carpet and blanket cleaning service

Ans :

(A) An individual professional (dhobi) or a commercial laundry

The text mentions that individual professionals (dhobis) and commercial laundries serve institutions like student hostels. These services are equipped to handle the volume and type of laundry from such establishments.

- 158.** To treat a fresh curry stain on a synthetic shirt, what would be the first step?
- (A) Bleach with sodium perborate
 - (B) Steep in methylated spirit
 - (C) Apply French chalk powder
 - (D) Wash with soap and water

Ans :

(D) Wash with soap and water

The stain removal guide indicates that for a fresh curry stain on synthetics, the treatment is the "Same as cotton." The treatment for fresh curry on cotton is to first wash the item with soap and water, and if the stain persists, bleach it in the sunlight.

- 159.** What is the term for a semi-automatic machine that requires the operator to fill and drain rinse water for each cycle?
- (A) A fully automatic machine
 - (B) A manually operated machine
 - (C) A semi-automatic machine
 - (D) A hydro-extractor

Ans :

(C) A semi-automatic machine

This level of operator intervention is the defining characteristic of a semi-automatic machine. Unlike a fully automatic one, it does not complete the

entire process independently and requires manual steps between the main cycles.

- 160.** Assertion (A): The weight of an iron can vary, with heavier irons being useful for some tasks. Reason (R): Heavier articles like curtains and bed covers may require heavier irons to effectively smooth out wrinkles.
- (A) Both A and R are true and R is the correct explanation of A.
 - (B) Both A and R are true but R is not the correct explanation of A.
 - (C) A is true but R is false.
 - (D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The reason directly explains the assertion. The need to press heavy, thick fabrics like curtains effectively is the specific reason why a heavier iron, which provides more pressure, would be more suitable than a lightweight one for that particular task.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

The executive housekeeper of a five-star hotel is managing the in-house laundry department. Unlike a hospital, her primary focus is on aesthetics and the final finish of all linen. The hotel uses high-quality bed sheets, bath towels, and restaurant tablecloths made from various fiber contents, which all require specific care. After collection, the articles are meticulously sorted. The washing process is followed by hydro-extraction to remove most of the moisture. For items like bed covers and tablecloths, the laundry uses a large flat bed ironing machine and calendaring machines to achieve a crisp, smooth finish. The staff is trained in perfect folding techniques. The department also handles guests' personal laundry, which can include delicate fabrics like silk and wool, requiring specialized care and sometimes dry-cleaning. The ultimate goal is to ensure that every fabric article presented to a guest is spotless, fresh, and perfectly finished, as this directly contributes to the hotel's image of luxury and quality service.

it to prevent damage to the fabric fibers. The guide specifies rinsing thoroughly with a dilute borax solution, which is alkaline and neutralizes the acid.

- 141.** Assertion (A): For a fresh tea stain on cotton, pouring boiling water through it is recommended. Reason (R): Cotton is a durable cellulosic fiber that can withstand high temperatures without damage.
- (A) Both A and R are true and R is the correct explanation of A.
(B) Both A and R are true but R is not the correct explanation of A.
(C) A is true but R is false.
(D) A is false but R is true.

Ans :

(A) Both A and R are true and R is the correct explanation of A.

The reason accurately explains the assertion. The ability of cotton to tolerate the heat of boiling water is precisely why this effective but harsh method is recommended for it, whereas it would damage heat-sensitive fabrics like silk or wool.

- 142.** Which of the following describes the 'Tumbling' method of washing?
- (A) A vertical pulsator creates rapid up-and-down water currents
(B) An agitator with blades rotates or oscillates in a tub
(C) Clothes are carried to the top of a revolving horizontal drum and dropped
(D) The machine stops, drains from the bottom, and then spins

Ans :

(C) Clothes are carried to the top of a revolving horizontal drum and dropped

This statement accurately describes the tumbling action found in front-loading washing machines. The horizontal drum's revolution continuously lifts the clothes and drops them back into the wash water, creating the cleaning action.

- 143.** What material are agitators in washing machines typically made from?
- (A) Stainless steel, wood, or glass
(B) Rubber, silicone, or fabric
(C) Copper, brass, or bronze
(D) Plastic, metal (aluminium), or bakelite

Ans :

(D) Plastic, metal (aluminium), or bakelite

The text states that agitators are made of materials like plastic, aluminium, or bakelite. These materials are chosen because they are durable and are not affected by detergents, bleaches, softeners, and other chemicals used in the washing process.

- 144.** Why are 'dhobighats' a practical solution for individual professional launderers in India?
- (A) They provide access to large, automated washing equipment free of charge
(B) They are designated spaces that can handle large-scale manual washing
(C) They offer dry-cleaning and pressing services to supplement manual work
(D) They are retail outlets for selling cleaned and finished garments

Ans :

(B) They are designated spaces that can handle large-scale manual washing

A 'dhobighat' provides the necessary infrastructure—like space, water access, and washing stones—for large-scale manual laundering that would be difficult to manage in a typical home environment, making it a practical workspace for dhobis.

- 145.** A commercial laundry is handling a large batch of silk sarees that need to be dry-cleaned. Which section of the laundry would manage this task?
- (A) The main washing section with large-capacity machines
(B) The section for special articles like blankets
(C) The section for dry-cleaning for fibre specific articles
(D) The mending and repair section

Ans :

(C) The section for dry-cleaning for fibre specific articles

Commercial laundries are departmentalized. Delicate, fibre-specific articles like silks, which require dry-cleaning instead of water-based washing, would be handled by a separate, specialized section equipped for that process.

- 146.** Which statement about institutional laundering is INCORRECT?
- (A) Hospitals prioritize hygiene and disinfection above all else
(B) Hotels emphasize aesthetics and the final finish of linens
(C) Hospitals often use disposable items to reduce

machines and a separate unit for dry-cleaning delicate items. After washing, the clothes are moved to the hydro-extraction section and then to the drying section. The final and largest section is dedicated to finishing, which includes pressing and ironing stations, a flat bed press for larger items, and folding and packaging tables. He also has a small area for mending and minor repairs. This systematic organization is crucial for handling a large volume of work efficiently and ensuring each customer's articles are returned clean and well-finished.

166. Why is it important for a commercial laundry to be organized into different sections?

- (A) To make the workflow more complicated and slow.
- (B) To handle a large volume of work efficiently with a specific job done in each section.
- (C) To ensure all employees are trained in only one specific task.
- (D) To use less equipment and save on electricity costs.

Ans :

(B) To handle a large volume of work efficiently with a specific job done in each section.

Commercial laundries are organized into different sections to streamline the workflow. Each section is dedicated to a specific job, such as washing, drying, or pressing, which allows for the efficient handling of a large volume of articles.

167. The first step in a commercial laundry after receiving articles from a customer is:

- (A) Washing and drying the clothes immediately.
- (B) Pressing and folding the articles.
- (C) Inspection, sorting, and tagging of the materials.
- (D) Packing the articles for delivery.

Ans :

(C) Inspection, sorting, and tagging of the materials.

In a commercial setup, the first step is to inspect and sort the materials received. This involves checking for damage, sorting by fabric type and color, and using code tags to identify each customer's items.

168. Having a separate section for dry-cleaning is necessary to handle what?

- (A) Very dirty clothes that cannot be cleaned by washing.

- (B) Only large articles like blankets and carpets.
- (C) Only white cotton clothes.
- (D) Fiber-specific articles like woolens and silks that can be damaged by water.

Ans :

(D) Fiber-specific articles like woolens and silks that can be damaged by water.

Commercial laundries often have a separate section for dry-cleaning. This is to provide special care for articles made from fibers like wool and silk, which can shrink or get damaged if washed with water.

169. This type of entrepreneurial venture in laundry services provides much-needed support, especially in:

- (A) Metropolitan areas where women are often working outside the home.
- (B) Rural areas where everyone washes their own clothes.
- (C) Communities where there is no access to water or electricity.
- (D) Places where there is no demand for clean clothes.

Ans :

(A) Metropolitan areas where women are often working outside the home.

Entrepreneurial ventures in laundry and fabric care provide essential support for end-users. This is especially true in metropolitan areas where lifestyles are busy and women are often part of the workforce outside the home.

170. The knowledge of different fibers, fabric construction, and finishes is crucial for which section of the laundry?

- (A) Only the packaging and delivery section.
- (B) Only the finance and billing section.
- (C) The sorting and washing section, to ensure correct treatment.
- (D) Only the mending and repair section.

Ans :

(C) The sorting and washing section, to ensure correct treatment.

Knowledge of the material, including its fiber content and construction, is a primary requirement for a laundry professional. This is essential for sorting clothes correctly and choosing the appropriate washing or cleaning method to avoid damage.

by the washing machines.

Ans :

(A) To keep a record of collection and disbursement of material to each department.

In institutions like hospitals, there is a system for keeping records for the collection and disbursement of linen and uniforms to and from each department, ensuring accountability and smooth supply.

Direction : Read the following case study and answer the following questions.

The process of caring for fabrics involves more than just washing. It is a multi-step process that ensures clothes are returned to the user clean, hygienic, and well-presented. In a large institutional laundry, after the clothes are washed and the excess water is removed by a hydro-extractor, they move to the next stage. Here, they are placed in large driers that use heated air to remove the remaining moisture. Once dry, the articles are taken to the finishing section. Here, they are ironed or pressed to remove wrinkles and give them a smooth appearance. For certain items like pleated skirts or trousers, pressing is done to put sharp creases back into the garment. After finishing, the clothes are carefully folded and stacked. In some cases, a mending service is also provided to repair any minor damage. Finally, the clean and finished articles are packed and made ready for distribution.

- 201.** The entire organized sequence of activities, from collection to distribution, in an institutional laundry is known as the:
- (A) Manufacturing cycle.
 - (B) Laundry process.
 - (C) Fashion design process.
 - (D) Retail cycle.

Ans :

(B) Laundry process.

The process of laundry functioning in an institution is a systematic flow of activities. It typically includes collection, sorting, washing, hydro-extraction, drying, pressing, folding, packing, and distribution of the processed material.

- 202.** What is the primary difference between ironing and pressing?
- (A) Ironing is for removing wrinkles, while pressing also helps to put creases into garments.
 - (B) Ironing is done with a cold surface, while

pressing is done with a hot surface.

- (C) Ironing is only for cotton clothes, while pressing is for silk clothes.
- (D) There is no difference between ironing and pressing.

Ans :

(A) Ironing is for removing wrinkles, while pressing also helps to put creases into garments. While both processes use heat to smoothen fabric, there is a distinction. Ironing is primarily for smoothening out wrinkles, whereas pressing also helps to put sharp creases into items like sleeves and pleated skirts.

- 203.** What is the purpose of the drying stage in the laundry process?
- (A) To add more moisture to the clothes.
 - (B) To wash the clothes with a special chemical.
 - (C) To fold the clothes into neat stacks.
 - (D) To remove the remaining moisture from the clothes after water extraction.

Ans :

(D) To remove the remaining moisture from the clothes after water extraction.

After the hydro-extraction stage removes a significant amount of water, the drying stage is necessary to remove the remaining moisture completely, either through open-air drying or by using mechanical driers.

- 204.** The final stage of the laundry process before the articles are sent back to the customer or department is:
- (A) Washing
 - (B) Sorting
 - (C) Drying
 - (D) Packing and Distribution

Ans :

(D) Packing and Distribution

After all the cleaning and finishing processes are complete, the final stages in an institutional laundry are packing the clean articles and then distributing them back to the respective departments or customers.

- 205.** Most modern electric irons have an inbuilt device that can adjust the temperature to suit the fabric being ironed. What is this device called?
- (A) A motor
 - (B) A thermostat
 - (C) A filter
 - (D) A hydro-extractor

Direction : Read the following case study and answer the following questions.

A large hospital is upgrading its in-house laundry facility. The laundry manager has to oversee the process for a massive daily load, which includes bed linen from over 1,500 beds, patient gowns, and doctors' coats. The primary concern is preventing the spread of infection. Many linens, especially from the operation theatre and maternity ward, are heavily soiled and require multiple changes a day. To handle this, the hospital uses large industrial washing machines and powerful disinfectants. After washing, the wet linen is moved to a hydro-extractor, a machine that uses a high-speed spin cycle to generate centrifugal force and remove about 60-70% of the water. This step is crucial because it significantly reduces the time and energy needed for the next stage: drying. The manager explains that while some domestic machines combine the spin and drain functions, in a large institutional setup, a separate, high-capacity hydro-extractor is more efficient for handling the enormous volume of laundry.

- 176.** The machine that uses centrifugal force to extract a large amount of water from clothes after washing is called a:
- (A) Drier
 - (B) Washing Machine
 - (C) Hydro-extractor
 - (D) Pressing Machine

Ans :

(C) A Hydro-extractor

A hydro-extractor is a piece of equipment specifically designed to remove a significant amount of water from laundry after the wash phase. It works through a high-speed spinning motion that creates centrifugal force.

- 177.** What is the main advantage of using a hydro-extractor in an institutional laundry?
- (A) It adds more water to the clothes.
 - (B) It completely dries the clothes, eliminating the need for a drier.
 - (C) It presses the clothes, removing all wrinkles.
 - (D) It significantly reduces the moisture content, which shortens the drying time.

Ans :

(D) It significantly reduces the moisture content, which shortens the drying time.

The primary benefit of hydro-extraction is that it removes a large percentage of the water from the fabrics. This makes the subsequent drying process much faster and more energy-efficient, which is critical in a high-volume setting.

- 178.** In a hospital laundry, what is the most important consideration?
- (A) Ensuring hygiene and disinfection to prevent cross-contamination.
 - (B) The final aesthetic appearance of the linen.
 - (C) Using the least amount of detergent possible.
 - (D) Washing clothes from all departments together in one load.

Ans :

(A) Ensuring hygiene and disinfection to prevent cross-contamination.

In a hospital, the laundry process must prioritize hygiene, cleanliness, and disinfection. This is essential to control the spread of infection and ensure the safety of both patients and healthcare workers.

- 179.** The amount of water extracted from clothes during a spin cycle is directly affected by the:
- (A) Color of the fabric.
 - (B) Type of detergent used.
 - (C) Speed at which the tub spins.
 - (D) Temperature of the water during the wash.

Ans :

(C) Speed at which the tub spins.

The amount of water extracted during spinning is directly related to the speed of the spin cycle. Higher spin speeds (measured in rpm) generate a greater centrifugal force, which in turn throws more water out of the fabric.

- 180.** Why is it important for a hospital to have a large stock of linen, such as a minimum of six sets per bed?
- (A) To ensure they can change the color of the linen every day.
 - (B) Because some linen may require multiple changes per day, especially in certain wards.
 - (C) To sell the extra linen to other institutions for a profit.
 - (D) Because the laundry is only done once a week.

Ans :

(B) Because some linen may require multiple changes per day, especially in certain wards.

Hospitals require a large stock of linen because of the high turnover. In areas like the operation theatre or maternity ward, sheets may need to be changed five or more times a day, necessitating a large reserve.

Direction : Read the following case study and answer the following questions.

An individual professional, commonly known as a 'dhobi', runs a small laundry service from his home. He collects clothes from several households in his neighborhood and also has a contract with a small local guesthouse. For washing, he goes to a 'dhobighat', a specially marked public place in the city with facilities for washing large quantities of clothes. He uses traditional methods of washing, which often involve manually scrubbing the clothes on a stone slab. After washing, he dries the clothes in the open air. His final service is ironing, for which he uses a heavy charcoal iron. He puts live coal pieces inside this metal box iron to heat it. Although he does not have the sophisticated equipment of a commercial laundry, he provides an essential service to his clients. This form of individual professional enterprise is a long-standing part of the fabric care industry in India, serving a niche between household laundry and large institutional setups.

- 181.** An individual professional who provides washing and/or ironing services to households and small institutions is often called a:
- (A) Laundry Manager
 - (B) Housekeeper
 - (C) Dhobi
 - (D) Textile Chemist

Ans :

(C) Dhobi

Individual professionals, often called dhobis, serve households and small institutions by collecting material for washing and/or ironing. This is a traditional and common form of professional fabric care service in many parts of India.

- 182.** The heavy metal box iron that is heated by placing live coal inside it is known as a:
- (A) Steam iron
 - (B) Thermostat iron
 - (C) Electric iron
 - (D) Charcoal iron

Ans :

(D) A Charcoal iron

A charcoal iron is a type of iron shaped like a metal box with a lid. Live pieces of coal are placed inside it to heat the iron's surface for pressing clothes. This is a traditional alternative to electric irons.

- 183.** What is a 'dhobighat'?

- (A) A large, automated commercial laundry factory.
- (B) A type of detergent used for washing clothes.
- (C) A specially marked public place in towns and cities for washing clothes.
- (D) A department store that sells washing machines.

Ans :

(C) A specially marked public place in towns and cities for washing clothes.

For washing, dhobis often make use of specially marked public places in cities called 'dhobighats'. These areas provide the space and facilities needed for washing large amounts of laundry, often using traditional methods.

- 184.** How does this type of individual professional service typically differ from a large commercial laundry?

- (A) It uses more advanced and automated equipment.
- (B) It relies more on traditional methods and manual labor.
- (C) It exclusively serves large hospitals and five-star hotels.
- (D) It always includes dry-cleaning and special finishing services.

Ans :

(B) It relies more on traditional methods and manual labor.

Unlike large commercial laundries with sophisticated machinery, individual professionals like dhobis generally use more traditional, manual methods for washing and ironing, catering to a different segment of the market.

- 185.** The role of such individual professionals grew into what larger form of enterprise?

- (A) 'Laundries' or 'Dry-cleaning shops'.
- (B) Textile manufacturing mills.
- (C) Fashion design boutiques.
- (D) Department stores.

Ans :

(A) 'Laundries' or 'Dry-cleaning shops'.

The concept of individual laundry workers gradually grew into more organized businesses. This led to the establishment of 'Laundries' or 'Dry-cleaning shops' where customers could take their articles for professional cleaning and finishing.

Direction : Read the following case study and answer the following questions.

A new boarding school is setting up its in-house laundry department to handle students' uniforms and hostel linen. The manager in charge must decide on the appropriate drying equipment. She is presented with two types of commercial driers. The first type circulates air of a relatively low temperature at a high velocity. The second type circulates air of a high temperature at a slow velocity. The manager is advised that the second type, with its slow air movement, results in the exhausted air having a very high relative humidity. In contrast, the first type, with its high-velocity air circulation, keeps the temperature and humidity of the room more normal. Considering the need for faster drying cycles to handle the large daily load, and to maintain a comfortable working environment in the laundry room, she opts for the low-temperature, high-velocity drier. This decision highlights how technical knowledge of equipment is essential for efficient laundry management in an institutional setting.

- 186.** What are the two types of circulation systems commonly found in commercial driers?
- (A) Low temperature/high velocity air, and high temperature/slow velocity air.
 - (B) Only high temperature/high velocity air.
 - (C) Only low temperature/low velocity air.
 - (D) Cold water circulation and hot water circulation.

Ans :

(A) A low temperature/high velocity air, and high temperature/slow velocity air.

There are two main types of circulation systems used in commercial driers. One uses air of a relatively low temperature circulated at high velocity, while the other uses air of a high temperature circulated slowly.

- 187.** In the drier that circulates high-temperature air slowly, what is a key characteristic of the exhausted air?
- (A) It has a very low relative humidity.
 - (B) It has a very high relative humidity.

(C) It is extremely cold.

(D) It contains a high concentration of detergent.

Ans :

(B) It has a very high relative humidity.

In a drier where the movement of high-temperature air is slow, the air picks up a lot of moisture from the clothes. As a result, the exhausted air has a high relative humidity.

- 188.** For efficient laundry management in an institution, what is a key requirement for the person in charge?
- (A) Knowledge of cooking and food preparation.
 - (B) Expertise in fashion design.
 - (C) A working knowledge of the machinery requirements and its functioning.
 - (D) Skills in interior decoration.

Ans :

(C) A working knowledge of the machinery requirements and its functioning.

The field of care and maintenance of fabrics is technical. A person managing an institutional laundry needs to have a sound working knowledge of the required machinery and how it functions to make efficient operational decisions.

- 189.** Besides drying in the open, which level of fabric care primarily uses commercial driers?
- (A) The household level.
 - (B) The commercial and institutional level.
 - (C) The individual professional (dhobi) level.
 - (D) All levels use commercial driers equally.

Ans :

(B) The commercial and institutional level.

While open-air drying is common, commercial driers are primarily used at the commercial and institutional level. This is because they need to process a large volume of laundry quickly and efficiently, regardless of weather conditions.

- 190.** The process of smoothening out wrinkles from clothes with a heated surface is known as:
- (A) Washing
 - (B) Drying
 - (C) Sorting
 - (D) Ironing

Ans :

(D) Ironing

Ironing is the process of using a heated, smooth metal surface to smoothen out the wrinkles that

- (C) The ability to design and stitch new uniforms.
- (D) Expertise in financial investment and stock markets.

Ans :

(A) An understanding of the specific needs and priorities of the institution.

A professional in this field must have a thorough knowledge of materials and processes. They must also understand the unique requirements of the institution they serve, whether it is a hospital's need for hygiene or a hotel's for aesthetics.

Ans :

(D) Textile Science and Textile Chemistry

A career in this field is technical. Qualifications in Textile Science and Textile Chemistry would be extremely useful as they provide in-depth knowledge of fabric properties and their reaction to different chemicals and processes.

Direction : Read the following case study and answer the following questions.

A commercial laundry has a system for keeping records to ensure that customers' articles are not lost or mixed up. When a customer brings in their clothes, the front desk employee first inspects each item for any pre-existing damage, which is noted down. Then, each article is given a small, durable tag with a code number that matches the number on the customer's invoice. This system of code tags is crucial for identifying the items belonging to each customer throughout the entire laundry process. The invoice given to the customer lists the kind and number of articles received and specifies the expected date of delivery. This organized system helps the laundry manage its work efficiently, prevents loss of items, and builds trust with the customers by maintaining a professional and transparent process.

- 196.** What is the primary purpose of using a system of code tags in a commercial laundry?
- (A) To make the clothes look more fashionable.
 - (B) To help identify the items of each customer or invoice.
 - (C) To add extra weight to the clothes so that the customer is charged more.
 - (D) To record the temperature at which the clothes were washed.

Ans :

(B) To help identify the items of each customer or invoice.

Commercial establishments have a system for keeping records. A system of code tags that matches the customer's invoice is used to help identify the items belonging to each customer throughout the laundering process.

- 197.** The document given to the customer that lists the number of articles received and the delivery date is called an:
- (A) Invoice
 - (B) Advertisement
 - (C) Instruction manual

(D) Warranty card

Ans :

(A) An Invoice

When an article is received from a customer, they are given an invoice. This document serves as a receipt, recording the kind and number of articles received and the promised date of delivery.

- 198.** Why is it important for the laundry to inspect and record any damage on an article when it is received?
- (A) To charge the customer extra for the damage.
 - (B) To decide whether the article needs to be washed at all.
 - (C) To estimate the final weight of the laundry load.
 - (D) To have a record in case the customer later claims the laundry caused the damage.

Ans :

(D) To have a record in case the customer later claims the laundry caused the damage.

When an article is received, it is checked, and any existing damage or special care requirement is recorded. This protects the laundry from being wrongly blamed for damage that was already present on the garment.

- 199.** This systematic approach of record-keeping is characteristic of which level of laundry service?
- (A) Household laundry.
 - (B) A professional commercial or institutional establishment.
 - (C) A traditional dhobi working from home.
 - (D) An individual washing their own clothes.

Ans :

(B) A professional commercial or institutional establishment.

Commercial and institutional laundries have a system for keeping records, including invoices and code tags. This organized approach is necessary to manage the large volume of work from multiple customers or departments efficiently.

- 200.** In an institutional laundry like a hospital, this record-keeping system is used for what purpose?
- (A) To keep a record of collection and disbursement of material to each department.
 - (B) To track the personal laundry of individual guests.
 - (C) To create a fashion catalogue of the different types of uniforms.
 - (D) To calculate the amount of water consumed

are created in fabric during use or washing, giving the garment a neat and crisp appearance.

Direction : Read the following case study and answer the following questions.

A student, Priya, is learning about the science of laundry. Her teacher explains that the process of cleaning fabrics is not just about using soap and water; it is a science that depends on several factors. For a practical demonstration, Priya is asked to wash two identical stained cotton cloths. The first she washes in cold, hard water with a soap bar. The second she washes in warm, soft water with a good quality detergent. She observes that the stain is removed much more effectively from the second cloth. Her teacher explains that the effectiveness of laundering depends on the suitability of the water (soft water is better), the type of cleaning agent (detergents work better in hard water than soaps), and the temperature of the water. This practical lesson helps Priya understand that effective fabric care is based on scientific principles and requires knowledge of how different materials and chemicals interact.

- 191.** The teacher's explanation demonstrates that the care and maintenance requirements of fabrics depend on:
- (A) Only the color of the fabric.
 - (B) Only the brand name of the garment.
 - (C) Factors like fiber content, type of yarn, and finishes given to the fabric.
 - (D) Only the price of the article of clothing.

Ans :

(C) Factors like fiber content, type of yarn, and finishes given to the fabric.

The specific care and maintenance needs of different fabrics are determined by several factors. These include the fiber content, the type of yarn and fabric construction, and any special finishes applied to the fabric.

- 192.** The practical demonstration highlights that successful laundering is based on the application of:
- (A) Guesswork and luck.
 - (B) Only artistic and creative skills.
 - (C) Only the instructions given by the garment manufacturer.
 - (D) Scientific principles and techniques.

Ans :

(D) Scientific principles and techniques.

Laundry is a science because it is based on the application of scientific principles and techniques. Understanding these principles, such as the chemistry of water and detergents, leads to more effective cleaning results.

- 193.** What are the two main aspects of care and maintenance of fabrics?
- (A) Keeping the material free of physical damage and retaining/refreshing its appearance.
 - (B) Only washing the fabric and only drying the fabric.
 - (C) Only ironing the fabric and only storing the fabric.
 - (D) Only buying new fabrics and discarding old ones.

Ans :

(A) Keeping the material free of physical damage and retaining/refreshing its appearance.

The care and maintenance of fabrics involve two key aspects. The first is keeping the material free from physical damage, and the second is retaining or refreshing its appearance by removing dirt and stains.

- 194.** The type of water used for washing affects the outcome. What is a key difference between hard and soft water in laundering?
- (A) Hard water forms a good lather with soap, while soft water does not.
 - (B) Soft water forms a good lather with soap, while hard water forms scum.
 - (C) Hard water and soft water have no difference in their cleaning ability.
 - (D) Hard water is always hot, while soft water is always cold.

Ans :

(B) Soft water forms a good lather with soap, while hard water forms scum.

Hard water contains mineral salts that react with soap to form an insoluble scum, which reduces the cleaning action. Soft water does not have these minerals, allowing soap to form a good lather and clean effectively.

- 195.** For a person pursuing a career in laundry management, knowledge of which subject is extremely useful?
- (A) Political Science
 - (B) History
 - (C) Geography
 - (D) Textile Science and Textile Chemistry

Ans :

(B) A thermostat

Most modern electric irons are equipped with a thermostat. This is a device that allows the user to regulate the temperature of the iron's surface, making it safe to use on different types of fabrics.

Direction : Read the following case study and answer the following questions.

A large hospital has a contract with a commercial laundry service for its non-infected linen, but it has decided to start using disposables for items from highly infectious wards. For items like masks and some gowns used in the operation theatre, the hospital finds it safer to use single-use products that can be destroyed by burning after use. This decision is made to minimize the risk of cross-contamination and the spread of infections, which could be a concern even with rigorous laundry disinfection processes. The laundry manager from the commercial service understands this decision. He explains that while his laundry handles hospital work in a separate section with strong disinfectants, the risk associated with certain highly infectious materials is best managed through disposal rather than reprocessing. This highlights a modern trend in institutional care where the choice between laundering and using disposables is made based on a careful assessment of hygiene risks.

206. Why has the hospital started using disposables for some items from infectious wards?

- (A) Because disposable items are less expensive than laundering reusable ones.
- (B) To minimize the threat of infection and cross-contamination.
- (C) Because there is a shortage of cotton fabric in the country.
- (D) To create more work for the laundry service.

Ans :

(B) To minimize the threat of infection and cross-contamination.

To manage the threat of infection, a number of hospitals have started using disposables for certain items. These items can then be destroyed, typically by burning, which eliminates the risk of cross-contamination associated with laundering.

207. This practice shows that in a hospital setting, the highest priority is:

- (A) The cost of the linen.
- (B) The aesthetic appearance of the fabric.

(C) The comfort of the laundry staff.

(D) Patient safety and hygiene.

Ans :

(D) Patient safety and hygiene.

The decision to use disposables, despite potential costs, underscores that the primary concern in a hospital is patient safety. Preventing the spread of infection takes precedence over all other considerations in fabric care.

208. The work from a hospital is often handled in what way by a large commercial laundry?

- (A) It is handled in a separate section with special care for hygiene.
- (B) It is mixed in with all the other personal and hotel laundry.
- (C) It is given the lowest priority and washed last.
- (D) It is washed without any detergents or disinfectants.

Ans :

(A) It is handled in a separate section with special care for hygiene.

Some large laundries may have a separate section specifically for hospital and institutional work. This allows them to use different processes and levels of disinfection appropriate for the higher hygiene requirements of healthcare textiles.

209. What is a key difference in the laundry requirements of a hospital compared to a hotel?

- (A) Hospitals require a much smaller volume of laundry.
- (B) Hospitals are less concerned with hygiene and cleanliness.
- (C) Hospitals may not require a perfect aesthetic finish, whereas hotels do.
- (D) Hospitals only use delicate fabrics that require dry-cleaning.

Ans :

(C) Hospitals may not require a perfect aesthetic finish, whereas hotels do.

In a hospital laundry, the main emphasis is on cleanliness. Stubborn stains may be ignored, and finishing like starching and perfect pressing may not be done, which is in sharp contrast to a hotel's focus on aesthetics.

210. The career of managing an institutional laundry requires knowledge of fabric care and:

- (A) An understanding of the specific needs and priorities of the institution.
- (B) Advanced skills in marketing and advertising.

Direction : Read the following case study and answer the following questions.

A family is buying a new washing machine and is trying to decide between a top-loading model and a front-loading model. The salesperson explains the difference in their washing mechanisms. The top-loading machine uses an 'agitator'—a central post with blades that rotates or oscillates. This creates a current in the tub that forces water through the fabric to remove dirt. The other top-loading model uses a 'pulsator' which has very rapid vertical movements. In contrast, the front-loading machine uses a 'tumbling' mechanism. It has a horizontally placed cylinder that revolves, carrying the clothes to the top and then dropping them back into the wash water. In this method, the clothes move through the water, rather than the water being forced through the clothes. The family learns that these different principles of keeping the fabric in motion in the washing solution are what determine how a machine cleans the clothes.

- 171.** What is the fundamental principle of all washing machines?
- (A) To keep the fabric completely still in the water.
 - (B) To use only hot water for all types of fabrics.
 - (C) To keep the fabric in movement in the washing solution to carry away dirt.
 - (D) To use a large amount of bleach in every wash cycle.

Ans :

(C) To keep the fabric in movement in the washing solution to carry away dirt.

The basic principle of any washing machine is to keep the fabric moving within the washing solution. This mechanical action helps to dislodge and carry away the dirt from the textile material, resulting in clean clothes.

- 172.** The washing mechanism used in front-loading machines, where clothes are carried to the top and then dropped into the water, is known as:
- (A) Agitation
 - (B) Pulsation
 - (C) Spinning
 - (D) Tumbling

Ans :

(D) Tumbling

The tumbling method is used in front-loading washing machines. In this process, a horizontal

cylinder revolves, lifting the clothes and then dropping them into the wash water, which causes the clothes to move through the water.

- 173.** An agitator, a central post with blades that creates a current, is typically found in which type of washing machine?
- (A) Top-loading machines
 - (B) Front-loading machines
 - (C) Two-tub semi-automatic machines
 - (D) Manually operated machines

Ans :

(A) Top-loading machines

The agitation method is commonly used in top-loading washing machines. These machines have an agitator, which is a finned post in the center of the tub that rotates or oscillates to create water currents.

- 174.** What is the primary difference between the agitation/pulsation and tumbling methods?
- (A) In agitation, clothes move through the water; in tumbling, water moves through the clothes.
 - (B) In agitation, water moves through the clothes; in tumbling, clothes move through the water.
 - (C) Agitation uses hot water, while tumbling uses cold water.
 - (D) Agitation is for colored clothes, while tumbling is for white clothes.

Ans :

(B) In agitation, water moves through the clothes; in tumbling, clothes move through the water.

A key difference lies in the movement. In agitation and pulsation methods, the machine forces water through the stationary or moving clothes. In the tumbling method, the machine causes the clothes to move through the water.

- 175.** A washing machine that requires the operator's intervention at frequent intervals, such as for filling and draining rinse water, is classified as:
- (A) A fully automatic machine.
 - (B) A manually operated machine.
 - (C) A commercial-grade machine.
 - (D) A semi-automatic machine.

Ans :

(D) A semi-automatic machine.

Semi-automatic washing machines require the intervention of the operator at frequent intervals during the wash cycle. For example, the user may need to manually fill and drain the water for each rinse cycle.

CHAPTER 11

HOSPITALITY MANAGEMENT

SUMMARY

1. INTRODUCTION

Hospitality is the act of providing a warm, friendly, and generous reception to guests, ensuring their comfort and care . In modern times, with the rise of global trade and tourism, paid hospitality services have become essential, moving beyond traditional stays in homes or ‘dharmashalas’ .

2. SIGNIFICANCE

The hospitality industry has grown significantly due to increased travel for business, leisure, medical tourism, and cultural events . Tourists expect comfortable, safe, and hygienic accommodation that feels like “A Home Away From Home,” making the hospitality industry one of the fastest-growing sectors worldwide .

3. BASIC CONCEPTS

Hospitality is the relationship between a guest and a host, involving the provision of lodging, food, and other services . Various establishments offer these services, including hotels, motels, lodges, resorts, and furnished apartments . The industry is organized into several key departments to ensure smooth functioning, such as accommodation (front office), food and beverage service, entertainment, and event management .

3.1 The Guest Cycle

The “Guest Cycle” describes the four stages of a guest’s interaction with a hotel:

- **Pre-arrival:** This stage includes making reservations and quoting rates .
- **Arrival:** The guest physically arrives, registers, and checks in .
- **Occupancy:** During this stage, the hotel provides various services to ensure the guest’s

satisfaction and security, aiming to build customer loyalty .

- **Departure:** The final stage where the guest checks out, settles bills, and the hotel records feedback for future reference .

4. DEPARTMENTS INVOLVED IN HOSPITALITY MANAGEMENT OF AN ORGANISATION

4.1 Front office

The front office is the central point of a hotel, where guests have their first and last interactions with the staff . Its functions include welcoming guests, managing reservations, registering guests, assigning rooms, handling messages, coordinating with other departments, and settling bills . The staff includes a Front Office Manager, supervisors, cashiers, telephone operators, receptionists, and bell staff, all of whom play a critical role in shaping the guest’s experience and the hotel’s image .

4.2 Housekeeping Department

The housekeeping department is responsible for maintaining a clean, hygienic, and aesthetically pleasing environment throughout the establishment . Its key functions are:

- Cleaning guestrooms and public areas .
- Managing the supply and laundering of linen and uniforms .
- Handling flower arrangements and landscape maintenance .
- Coordinating with other departments through a control desk .
- Pest control .

The department is typically led by an Executive Housekeeper and includes supervisors, room attendants, housemen, and linen room staff . Many hotels are now adopting eco-friendly practices, such as using organic cotton and chemical-free laundry agents .

4.3 Food and Beverages Department

- 23.** Which of the following is NOT a primary function of the Housekeeping Department?
- (A) Cleaning of public areas and guestrooms.
 - (B) Internal flower arrangement and landscape maintenance.
 - (C) Handling guest registration and check-out.
 - (D) Supply and upkeep of laundry and linen.

Ans :

(C) Handling guest registration and check-out.
The Housekeeping Department's functions include cleaning, laundry, linen supply, and aesthetics like flower arrangements. Handling guest registration and check-out is a core function of the Front Office department.

- 24.** The rise of housekeeping services on a contractual basis for corporate offices provides an avenue for what kind of opportunity?
- (A) Starting their own enterprise
 - (B) Government employment
 - (C) International trade
 - (D) Academic research

Ans :

(A) Starting their own enterprise
The trend of organizations hiring housekeeping services on a contractual basis has opened up significant avenues for people to start their own enterprises. This allows entrepreneurs to offer specialized cleaning and maintenance services to a variety of clients.

- 25.** Which section within the Housekeeping Department is responsible for passing information to staff working in various parts of the hotel?
- (A) Guestroom brigade
 - (B) Public area brigade
 - (C) Linen and uniform room
 - (D) Housekeeping control desk

Ans :

(D) Housekeeping control desk
The Housekeeping control desk acts as the central communication hub for the department. It is responsible for passing on information to the housekeeping staff who are deployed and working in different areas of the hotel.

- 26.** What is the primary role of the "Guestroom brigade" in the housekeeping department?
- (A) To maintain the cleanliness of the hotel lobby and foyer.
 - (B) To manage the supply of clean uniforms to all hotel staff.

- (C) To upkeep and clean the guestrooms and their facilities.
- (D) To handle the hotel's horticulture and flower arrangements.

Ans :

(C) To upkeep and clean the guestrooms and their facilities.

The Guestroom brigade is the section of the housekeeping department specifically responsible for the upkeep and cleaning of all guestrooms, ensuring they meet the hotel's standards of cleanliness and comfort for incoming and staying guests.

- 27.** Which statement accurately describes the function of the Linen and Uniform room?
- (A) It is responsible for cleaning all public areas like the lobby.
 - (B) It coordinates with laundry and provides clean linen and uniforms.
 - (C) It plans and controls all activities of the housekeeping department.
 - (D) It deposits and manages the misplaced luggage of the guests.

Ans :

(B) It coordinates with laundry and provides clean linen and uniforms.

The Linen and Uniform room has the specific responsibility of coordinating with the laundry service. Its primary function is to ensure a continuous supply of clean linen for the entire establishment and clean uniforms for all staff members.

- 28.** Who is at the top of the staffing hierarchy in a typical hotel's Housekeeping Department, responsible for managing its overall functioning?
- (A) Assistant Housekeeper
 - (B) Floor Supervisor
 - (C) Executive Housekeeper
 - (D) Desk Control Supervisor

Ans :

(C) Executive Housekeeper

The Executive Housekeeper is the head of the department and is responsible for managing the entire functioning of housekeeping. This involves the judicious use of manpower, materials, money, and other resources to maintain the hotel's standards.

4. What is the term for the relationship between a guest and a host, involving friendly and generous reception and entertainment?
- (A) Hospitality
 - (B) Service
 - (C) Accommodation
 - (D) Tourism

Ans :

(A) Hospitality

Hospitality is defined as the relationship between the guest and the host, encompassing the act of being hospitable. This includes the friendly and generous reception, welcoming, and entertainment of guests, along with providing services with warmth and courtesy.

5. Which type of establishment is a commercial entity offering lodging, meals, and other services to its guests?
- (A) Lodge
 - (B) Motel
 - (C) Hotel
 - (D) Resort

Ans :

(C) Hotel

A hotel is specifically defined as a commercial establishment that provides lodging, meals, and a variety of other services to travelers and tourists who are its guests. The other options offer more specialized or limited services compared to a full-service hotel.

6. What key feature distinguishes a motel from a hotel?
- (A) It offers a higher standard of luxury
 - (B) It primarily serves long-term residents
 - (C) It only offers food but not lodging
 - (D) It provides parking near the room

Ans :

(D) It provides parking near the room

A motel, similar to a hotel in providing services, is distinguished by its provision of a parking facility near the guest's room or having a room door that opens directly onto the parking lot. This feature caters to motorists and road travelers.

7. Which type of accommodation primarily offers a place for sleeping and may not include food and other services?
- (A) Resort
 - (B) Hotel
 - (C) Motel

(D) Lodge

Ans :

(D) Lodge

A lodge is an establishment that primarily offers rented accommodation for sleeping. Unlike a hotel, it may not necessarily provide food, beverage, and other extensive services, focusing on the basic need for shelter for travelers.

8. Which of the following statements best describes a resort?
- (A) A commercial establishment offering only lodging and meals to guests.
 - (B) An establishment known for its leisure attractions and amenities.
 - (C) A place that provides only parking facilities near the guest room.
 - (D) An establishment offering only rented accommodation for sleeping.

Ans :

(B) An establishment known for its leisure attractions and amenities.

A resort is known for its leisure attractions, offering a wide range of amenities, sports facilities, and recreational activities to provide a complete vacation experience for its guests. The other options define a hotel, motel, or lodge.

9. Which of the following correctly lists the four stages of the "Guest Cycle" in chronological order?
- (A) Pre-arrival, Arrival, Occupancy, Departure
 - (B) Arrival, Occupancy, Pre-arrival, Departure
 - (C) Occupancy, Arrival, Departure, Pre-arrival
 - (D) Pre-arrival, Occupancy, Arrival, Departure

Ans :

(A) Pre-arrival, Arrival, Occupancy, Departure

The "Guest Cycle" follows a logical progression of four distinct stages. It begins with the Pre-arrival stage (reservations), followed by the Arrival stage (check-in), then the Occupancy stage (stay), and concludes with the Departure stage (check-out).

10. In which stage of the Guest Cycle does the activity of reserving a room occur?
- (A) Arrival stage
 - (B) Pre-arrival stage
 - (C) Occupancy stage
 - (D) Departure stage

Ans :

(B) Pre-arrival stage

The pre-arrival stage includes activities that occur before the guest physically arrives at the hotel. This primarily involves quoting rates and reserving a room, either through the hotel's reservation department or a central reservation system.

- 11.** What is the main focus of the hospitality establishment during the Occupancy stage of the Guest Cycle?
- (A) Finalizing the guest's bill
 - (B) Processing the guest's registration
 - (C) Ensuring guest satisfaction
 - (D) Handling future reservations

Ans :

(C) Ensuring guest satisfaction

During the Occupancy stage, the primary focus is on guest satisfaction. This is achieved by providing various services, ensuring security, and coordinating guest services to encourage repeat business and foster 'customer loyalty'.

- 12.** The process of "check-out" and settlement of the guest's bill occurs during which stage of the Guest Cycle?
- (A) Departure
 - (B) Occupancy
 - (C) Arrival
 - (D) Pre-arrival

Ans :

(A) Departure

The Departure stage is the final phase of the Guest Cycle. It is during this stage that the guest prepares to leave the establishment, settles their final bill, and officially "checks out" of their accommodation.

- 13.** Which department is typically the first point of contact for a guest upon arriving at a hotel?
- (A) Housekeeping
 - (B) Food and Beverage
 - (C) Accounts
 - (D) Front Office

Ans :

(D) Front Office

The Front Office is the department where a guest first arrives and interacts with the hospitality staff. This initial interaction is critical for building a good relationship and creating a positive first impression of the organization.

- 14.** Why is the Front Office considered the focal point of a hotel?
- (A) It generates the highest revenue of all hotel departments.
 - (B) It is responsible for the cleanliness of the entire hotel.
 - (C) It is central to building the hotel's image and guest relations.
 - (D) It manages all the marketing and sales activities for the hotel.

Ans :

(C) It is central to building the hotel's image and guest relations.

The Front Office is considered the focal point because the services and interactions offered there play a central role in building the institution's image. The quality of service at the front office directly determines guest perception and the revenue generated.

- 15.** Which of the following is NOT a primary function of the Front Office staff?
- (A) Registering guests and allocating rooms
 - (B) Preparing food and beverages for guests
 - (C) Preparing and settling guest bills
 - (D) Welcoming guests and issuing room keys

Ans :

(B) Preparing food and beverages for guests

While the Front Office coordinates with various departments, its primary functions include welcoming guests, registration, room allocation, handling messages, and managing bills. Preparing food and beverages is the responsibility of the Food and Beverages department.

- 16.** Which of the following pairs correctly matches the Front Office role with its function?
- (A) Front Office Cashier - Maintaining guests' bills.
 - (B) Bellboy - Managing all front office staff shifts.
 - (C) Telephone Operator - Shifting guest baggage.
 - (D) Doorman - Reserving and assigning rooms.

Ans :

(A) Front Office Cashier - Maintaining guests' bills.

The Front Office Cashier is specifically responsible for maintaining the bills of the guests and for receiving payments from them during the check-out process. The other options incorrectly match roles with their respective duties.

17. Who is responsible for managing the front office, lobby, and transport activities, as well as scheduling staff shifts?
- (A) Assistant Manager
 - (B) Bell Captain
 - (C) Lobby Manager
 - (D) Front Office Manager

Ans :

(D) Front Office Manager

The Front Office Manager holds the overall responsibility for managing the front office and lobby. This includes scheduling staff shifts and duties, checking daily arrivals, and coordinating with other departments to ensure smooth operations.

18. What is the role of the Bell Captain in a hotel's Front Office?
- (A) To welcome guests at the main entrance and escort them inside.
 - (B) To handle guest payments and maintain their account folios.
 - (C) To supervise bell boys and all baggage movement in the lobby.
 - (D) To manage the telephone exchange and provide information.

Ans :

(C) To supervise bell boys and all baggage movement in the lobby.

The Bell Captain organizes, supervises, and controls the uniformed services, including the bell boys. A key part of their role is supervising all baggage movement during guest check-in and check-out to ensure efficiency and security.

19. Which of the following statements about the role of a Receptionist (Front Office Agent) is incorrect?
- (A) They reserve and assign rooms to guests.
 - (B) They provide information to guests as needed.
 - (C) They register guests upon their arrival.
 - (D) They supervise the cleaning of guest rooms.

Ans :

(D) They supervise the cleaning of guest rooms.

The Receptionist's duties include reserving, registering, and assigning rooms, as well as providing information. Supervising the cleaning of guest rooms is a function of the Housekeeping Department, not the Front Office.

20. The interaction between the front office staff and the guest is critical for which primary reason?

- (A) To ensure the hotel is at full occupancy.
- (B) To develop a good relationship and build a good image.
- (C) To sell the most expensive rooms and services.
- (D) To minimize the time spent on guest check-in.

Ans :

(B) To develop a good relationship and build a good image.

The initial interaction between the guest and the front office staff is extremely critical for developing a positive relationship and building a favorable image of the organization. This first impression significantly influences the guest's overall experience.

21. Which staff member is responsible for shifting the baggage of guests to and from their rooms?
- (A) Bellboy
 - (B) Doorman
 - (C) Receptionist
 - (D) Front Office Manager

Ans :

(A) Bellboy

The Bellboy is specifically tasked with the responsibility of shifting the baggage of guests, both into their rooms upon arrival and out of their rooms upon departure. This is a key part of the uniformed services supervised by the Bell Captain.

22. Assertion (A): The Housekeeping Department is primarily responsible for ensuring cleanliness and maintaining high standards of hygiene throughout the establishment.

Reason (R): A guest's decision to return to a hotel is largely independent of the room decor and cleanliness.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is false but (R) is true.
- (D) (A) is true but (R) is false.

Ans :

(D) (A) is true but (R) is false.

Assertion (A) is true as the Housekeeping Department's primary role is to maintain cleanliness and hygiene. Reason (R) is false because a guest's decision to revisit is heavily dependent on factors like room decor, safety, cleanliness, and hygiene.

This department manages the sale of all food and beverages within the hotel . It includes:

- **Kitchen:** Where food is prepared, often with specialized sections for butchery, bakery, and different types of cuisine . The kitchen is managed by an Executive Chef (Chef-de-cuisine) .
- **Kitchen Stewarding:** Responsible for the storage, maintenance, and cleanliness of all cutlery, crockery, and glassware, as well as maintaining kitchen hygiene .
- **Restaurant:** The commercial space where food and beverages are served to customers . It is managed by a restaurant manager who leads a team of supervisors and waiters .

4.4 Support Service Departments

These “back office” departments, such as Finance and Accounts, Engineering, Human Resources, and Sales and Marketing, provide essential support for the overall management and efficient functioning of the hotel .

5. SCOPE

The hospitality industry offers a wide range of job opportunities at various levels, from operations staff to top management . The industry often prefers to hire youth due to their high energy levels, openness to new ideas, and ambition . Essential competencies for staff include being well-groomed, having good manners and communication skills, and maintaining a cheerful attitude .

6. CAREER OPPORTUNITIES

Career options in hospitality management are diverse and include:

- Positions in housekeeping departments at all hierarchical levels .
- Entrepreneurial opportunities in housekeeping services .
- Roles in the front office, reception, and control desk of hotels .
- Entrepreneurial ventures for supplying flower arrangements and other decor .
- Specializing in theme-based event management within an organization .

MULTIPLE CHOICE QUESTION

1. What is the core cultural principle in India that equates guests with a divine status?
(A) Seva Paramo Dharma
(B) Vasudhaiva Kutumbakam
(C) Athithi Devo Bhava
(D) Satyameva Jayate

Ans :

(C) Athithi Devo Bhava

The phrase “Athithi Devo Bhava” encapsulates the Indian cultural ethos of treating guests as god-like figures. This principle emphasizes receiving every guest with warmth and providing the best possible care and service, which is a foundational concept in the hospitality industry in India.

2. What major economic shift has significantly driven the growth of paid hospitality services in modern times?
(A) Increase in agricultural trade
(B) Growth in local artisan markets
(C) Expansion of the cottage industry
(D) Rise in trade and commerce

Ans :

(D) Rise in trade and commerce

In modern times, the increasing trade and commerce within the country and between different nations have necessitated the provision of paid services for hospitality to accommodate travelers. This contrasts with ancient times when travelers often stayed with relatives or in ‘dharmshalas’.

3. The hospitality industry aims to provide travelers with an experience best described as which of the following?
(A) A Luxury Escape From Reality
(B) A Home Away From Home
(C) A Budget-Friendly Shelter
(D) A Formal Business Environment

Ans :

(B) A Home Away From Home

The hospitality industry has evolved to provide travelers with “A Home Away From Home.” This concept means offering comforts, facilities, safety, and a hygienic environment that are similar or close enough to what guests are accustomed to in their own homes.

- 29.** What is the primary duty of a Floor Supervisor in the housekeeping department?
- (A) To coordinate with the front office for guest departures.
 - (B) To perform heavy cleaning activities like vacuuming.
 - (C) To manage the supply and storage of all hotel linen.
 - (D) To ensure cleanliness of guest rooms and corridors on a specific floor.

Ans :

(D) To ensure cleanliness of guest rooms and corridors on a specific floor.

A Floor Supervisor is assigned to a specific floor and is responsible for overseeing the cleanliness and maintenance of all guest rooms, corridors, staircases, and floor pantries on that floor, ensuring standards are met.

- 30.** What is the key difference between the duties of a Room Attendant and a Houseman in housekeeping?
- (A) A Room Attendant cleans public areas, while a Houseman cleans guest rooms.
 - (B) A Room Attendant does actual cleaning of rooms, while a Houseman does heavy cleaning.
 - (C) A Room Attendant supervises cleaning, while a Houseman performs the cleaning.
 - (D) A Room Attendant handles laundry, while a Houseman handles pest control.

Ans :

(B) A Room Attendant does actual cleaning of rooms, while a Houseman does heavy cleaning. The Room Attendant is responsible for the detailed, actual cleaning of guest rooms and bathrooms. In contrast, the Housemen are tasked with heavy cleaning activities such as vacuuming, mopping, sweeping, and shifting furniture in various areas.

- 31.** Who is responsible for maintaining the cleanliness of public areas such as the main entrance, lobby, and banquet halls?
- (A) Public Area Supervisor
 - (B) Floor Supervisor
 - (C) Desk Control Supervisor
 - (D) Room Attendant

Ans :

(A) Public Area Supervisor

The Public Area Supervisor is specifically responsible for maintaining the cleanliness of all public areas within the hotel. This includes high-traffic zones like the main entrance, corridors, offices, banquet halls, and restaurants.

- 32.** What is the main purpose of having a Desk Control Supervisor who is available 24 hours a day?
- (A) To ensure continuous cleaning of the hotel lobby throughout the day and night.
 - (B) To personally greet and assist guests who arrive late at night.
 - (C) To serve as a constant point of contact for guests and staff for information.
 - (D) To manage the hotel's security and surveillance systems around the clock.

Ans :

(C) To serve as a constant point of contact for guests and staff for information.

The Desk Control desk must be manned 24 hours because it serves as a crucial, non-stop communication hub. Guests and staff need to contact this desk at any time to receive or transmit important information related to housekeeping services.

- 33.** Which of the following is an example of an eco-friendly practice that a hotel housekeeping department might adopt?
- (A) Using single-use plastic bottles for all toiletries.
 - (B) Changing towels and bedsheets for every guest daily.
 - (C) Keeping lights on in unoccupied rooms for ambiance.
 - (D) Using energy-efficient light bulbs in all guest rooms.

Ans :

(D) Using energy-efficient light bulbs in all guest rooms.

Using energy-efficient light bulbs in rooms is a key eco-friendly practice that helps save electricity. This aligns with the broader goal of environmental conservation and promoting sustainability within the hospitality industry.

- 34.** A guest checks out of a room. The Desk Control Supervisor needs to inform the relevant staff to get the room ready for the next guest. Who would be primarily responsible for the actual cleaning of the vacated room and bathroom?

	Column 1		Column 2
1.	Hotel	a.	Offers leisure attractions and a vacation experience.
2.	Motel	b.	Offers lodging, meals, and other services.
3.	Lodge	c.	Provides parking facility near the room.
4.	Resort	d.	Primarily offers rented accommodation for sleeping.

- (A) 1-b, 2-c, 3-d, 4-a
 (B) 1-a, 2-d, 3-c, 4-b
 (C) 1-c, 2-b, 3-a, 4-d
 (D) 1-d, 2-a, 3-b, 4-c

Ans :

- (A) 1-b, 2-c, 3-d, 4-a

The correct matches are: Hotel offers lodging and meals; Motel provides parking near the room; Lodge primarily offers a place to sleep; and Resort is known for leisure attractions. This combination correctly aligns each establishment with its definition.

- 47.** Match the Front Office staff in Column 1 with their primary responsibility in Column 2.

	Column 1		Column 2
1.	Front Office Manager	a.	Welcomes guests upon arrival.
2.	Receptionist	b.	Manages the front office and staff shifts.
3.	Bellboy	c.	Registers guests and assigns rooms.
4.	Doorman	d.	Shifts baggage of guests.

- (A) 1-d, 2-a, 3-b, 4-c
 (B) 1-c, 2-d, 3-a, 4-b
 (C) 1-b, 2-c, 3-d, 4-a
 (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (C) 1-b, 2-c, 3-d, 4-a

The correct pairings are: Front Office Manager manages the department; Receptionist registers guests; Bellboy shifts baggage; and Doorman welcomes guests. This option accurately reflects the roles and responsibilities within the front office.

- 48.** Match the Housekeeping section in Column 1 with its main function in Column 2.

	Column 1		Column 2
1.	Guestroom Brigade	a.	Maintains landscape and arranges flowers.
2.	Public Area Brigade	b.	Cleans guestrooms.
3.	Linen and Uniform Room	c.	Cleans foyer and lobby.
4.	Horticulture Team	d.	Coordinates with laundry for clean linen supply.

- (A) 1-c, 2-d, 3-a, 4-b
 (B) 1-b, 2-c, 3-d, 4-a
 (C) 1-d, 2-a, 3-b, 4-c
 (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (B) 1-b, 2-c, 3-d, 4-a

The correct associations are: Guestroom Brigade cleans guestrooms; Public Area Brigade cleans the foyer and lobby; Linen Room coordinates linen supply; and the Horticulture team handles landscaping and flowers.

- 49.** Match the kitchen-related role in Column 1 with its description in Column 2.

	Column 1		Column 2
1.	Executive Chef	a.	Supervisor for a specific section of the kitchen.
2.	Chef-de-partie	b.	Head of the kitchen, controls all operations.
3.	Kitchen Stewarding	c.	Responsible for cleanliness of kitchen and washing pots.
4.	Restaurant Manager	d.	Responsible for the overall functioning of the restaurant.

- (A) 1-d, 2-c, 3-b, 4-a
 (B) 1-a, 2-b, 3-d, 4-c
 (C) 1-c, 2-d, 3-a, 4-b
 (D) 1-b, 2-a, 3-c, 4-d

Ans :

- (D) 1-b, 2-a, 3-c, 4-d

This option correctly matches the roles: Executive Chef is the head of the kitchen; Chef-de-partie is a section supervisor; Kitchen Stewarding handles cleaning and pot washing; and the Restaurant Manager oversees the restaurant's operations.

(D) To plan the daily menu and control the food production costs.

Ans :

(C) To manage the storage, cleanliness, and issue of cutlery and crockery.

Kitchen Stewarding is responsible for the storage, maintenance, cleanliness, and issuance of all cutlery, crockery, and glassware used by the kitchen and restaurants. They also ensure the cleanliness of the kitchen and wash pots and pans.

41. Which of the following correctly pairs a restaurant staff role with their duty?

- (A) Restaurant Manager - Clears the tables after guests have finished.
- (B) Head Waiter - Leads a team of waiters and ensures service standards.
- (C) Assistant Waiter - Takes overall responsibility for the restaurant's functioning.
- (D) Steward - Manages the kitchen's inventory of pots and pans.

Ans :

(B) Head Waiter - Leads a team of waiters and ensures service standards.

The Head Waiter's role is to lead a team of waiters or stewards. They are responsible for supervising the service on the floor and ensuring that the standards of cleanliness, hygiene, and service are consistently maintained during operations.

42. The text describes departments like Finance, Engineering, and Human Resources as "support service departments." What does this imply?

- (A) They are the only departments that generate direct revenue for the hotel.
- (B) They are not essential for the hotel's operation and can be outsourced.
- (C) They provide essential services that enable the smooth functioning of the entire hotel.
- (D) They are primarily responsible for direct interaction and service to the guests.

Ans :

(C) They provide essential services that enable the smooth functioning of the entire hotel.

These departments are referred to as 'support' or 'back office' because they provide the essential background services required for the overall management and efficient functioning of the hotel. They support the front-line departments in their operations.

43. Which management function involves ensuring that plans and objectives adhere to the schedules and allocated budget?

- (A) Planning
- (B) Organizing
- (C) Staffing
- (D) Controlling

Ans :

(D) Controlling

The management function of controlling involves monitoring performance and ensuring that the organization's plans and objectives are being met according to the established schedules and within the allocated budget, making corrective actions as necessary.

44. Which demographic group forms the major part of the workforce in the hospitality industry, valued for their high energy and openness to new ideas?

- (A) Middle-aged people
- (B) Senior citizens
- (C) Youth
- (D) Retired professionals

Ans :

(C) Youth

Youth form the major part of the workforce in the hospitality industry. Hotels prefer them because they typically have high energy levels to work long hours, are better informed, open to new ideas and technologies, and have strong ambitions for success.

45. What is a key competency required for front office staff, contributing to a positive image of both the individual and the establishment?

- (A) Being well groomed with a smiling face.
- (B) Having advanced culinary skills.
- (C) Being skilled in engineering and maintenance.
- (D) Having a degree in financial accounting.

Ans :

(A) Being well groomed with a smiling face.

Essential competencies for staff, particularly in the front office, include being well-groomed, having good hygiene, good manners, and a smiling, cheerful attitude. These attributes project a positive image of both the staff member and the establishment.

46. Match the type of establishment in Column 1 with its correct description in Column 2.

- (A) The Floor Supervisor
- (B) The Room Attendant
- (C) The Houseman
- (D) The Public Area Supervisor

Ans :

- (B) The Room Attendant

Once a room is vacated, the Room Attendant is the staff member responsible for carrying out the actual, detailed cleaning of the guest room and bathroom to prepare it for the next occupant, as per their designated duties.

- 35.** Why is the selection of appropriate cleaning agents important for housekeeping?
- (A) To prevent damage to the surfaces being cleaned.
 - (B) To ensure the agents are the most expensive ones available.
 - (C) To use the same agent for every type of surface.
 - (D) To ensure the cleaning process is as fast as possible.

Ans :

- (A) To prevent damage to the surfaces being cleaned.

It is important to be cautious when using cleaning agents because some strong agents can cause damage to the surface being cleaned. Therefore, the choice of an appropriate cleaning agent is crucial to protect the material while effectively removing dirt.

- 36.** Which of the following is considered a heavy cleaning activity typically performed by a Houseman?
- (A) Arranging flowers in the lobby
 - (B) Folding clean linen
 - (C) Making the bed in a guest room
 - (D) Vacuuming carpets in corridors

Ans :

- (D) Vacuuming carpets in corridors

Housemen are responsible for performing heavy cleaning activities. Vacuuming large areas like corridors, mopping floors, and shifting furniture fall under this category, distinguishing their role from the lighter, detailed cleaning done by room attendants.

- 37.** What is the primary role of the Food and Beverages department in a hotel?
- (A) The cleaning and maintenance of guest rooms.
 - (B) The sale of food and beverages to guests.

- (C) The management of guest check-ins and billing.
- (D) The upkeep of the hotel's garden and landscape.

Ans :

- (B) The sale of food and beverages to guests.

The Food and Beverages department's main responsibility is the sale of food and beverages throughout the establishment. This includes operations in kitchens, restaurants, bars, banquets, and room service to cater to the culinary needs of guests.

- 38.** In a large hotel kitchen, which section is specifically responsible for dealing with raw meat?
- (A) Pantry
 - (B) Confectionery
 - (C) Butchery
 - (D) Hot range

Ans :

- (C) Butchery

In large hotel kitchens, specific sections handle different aspects of food preparation. The butchery is the independent section specifically designated to deal with the preparation and handling of raw meat before it is sent to other sections for cooking.

- 39.** Who is the head of the kitchen, responsible for planning, organizing, and controlling all kitchen operations?
- (A) Chef-de-partie
 - (B) Deputy Chef
 - (C) Kitchen Steward
 - (D) Executive Chef

Ans :

- (D) Executive Chef

The Executive Chef, also known as Chef-de-cuisine, is the head of the kitchen. This individual is responsible for the overall management of the kitchen, which includes planning menus, organizing staff, and controlling all operational aspects of food preparation.

- 40.** What is the main function of the Kitchen Stewarding department?
- (A) To prepare and cook all the food for the hotel's restaurants.
 - (B) To serve food and beverages directly to the guests in the dining areas.
 - (C) To manage the storage, cleanliness, and issue of cutlery and crockery.

- 50.** Match the stage of the Guest Cycle in Column 1 with the key activity in Column 2.

	Column 1		Column 2
1.	Pre-arrival	a.	Registering or checking-in.
2.	Arrival	b.	Providing various services to the guest.
3.	Occupancy	c.	Reserving a room.
4.	Departure	d.	Settling the final bill and checking-out.

- (A) 1-c, 2-a, 3-b, 4-d
 (B) 1-b, 2-d, 3-a, 4-c
 (C) 1-d, 2-c, 3-b, 4-a
 (D) 1-a, 2-b, 3-d, 4-c

Ans :

- (A) 1-c, 2-a, 3-b, 4-d

The activities correctly correspond to the stages: Pre-arrival involves reserving a room; Arrival is when check-in occurs; Occupancy is the period of the stay where services are provided; and Departure involves check-out and bill settlement.

- 51.** Assertion (A): The Front Office department coordinates with many other departments like Housekeeping, Accounts, and Restaurants.

Reason (R): The Front Office is solely responsible for all hotel operations and other departments report directly to it.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 (C) (A) is true but (R) is false.
 (D) (A) is false but (R) is true.

Ans :

- (C) (A) is true but (R) is false.

Assertion (A) is true; the Front Office must coordinate with various departments to ensure seamless guest service. However, Reason (R) is false. While the Front Office is a central hub, it does not have authority over all other departments; they work in coordination as part of an organizational structure.

- 52.** Assertion (A): The Kitchen Stewarding department is responsible for preparing meals in the hotel kitchen.

Reason (R): The primary role of Kitchen Stewarding is to maintain cleanliness in the kitchen and manage crockery and cutlery.

- (A) Both (A) and (R) are true and (R) is the

correct explanation of (A).

- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 (C) (A) is true but (R) is false.
 (D) (A) is false but (R) is true.

Ans :

- (D) (A) is false but (R) is true.

Assertion (A) is false; food preparation is the responsibility of the kitchen crew (chefs and cooks). Reason (R) is true, as the Kitchen Stewarding department's main functions are to maintain kitchen cleanliness and manage the inventory and cleanliness of items like cutlery, crockery, and glassware.

- 53.** Assertion (A): Hotels often place cards in rooms encouraging guests to reuse towels.

Reason (R): This practice is part of an eco-friendly initiative to save natural resources like water and detergent.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 (C) (A) is true but (R) is false.
 (D) (A) is false but (R) is true.

Ans :

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) describes a common practice in hotels. Reason (R) correctly explains that this is an eco-friendly practice aimed at environmental conservation by promoting the saving of natural resources like water and the detergents used for laundering towels.

- 54.** Assertion (A): The 'Lost and Found' section is part of the Front Office department.

Reason (R): This section is responsible for depositing and managing any misplaced luggage of guests.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 (C) (A) is true but (R) is false.
 (D) (A) is false but (R) is true.

Ans :

- (D) (A) is false but (R) is true.

Assertion (A) is false; the 'Lost and Found' section is a part of the Housekeeping department. Reason

Ans :

(B) Front Office Supervisor

The Front Office Supervisor is responsible for a specific shift. Their duties include meeting and greeting arrivals and ensuring a smooth rooming procedure during their assigned work hours.

- 79.** What is the key reason for a hotel restaurant to have a team of waiters led by a Head Waiter?
- (A) To maintain a high standard of service and hygiene.
 - (B) To ensure there are enough staff to clear tables quickly.
 - (C) To allow the Restaurant Manager to focus only on billing.
 - (D) To create a complex hierarchy for internal promotions.

Ans :

(A) To maintain a high standard of service and hygiene.

The Head Waiter leads the team to ensure that the established standards of cleanliness, hygiene, and service are consistently maintained. This supervision is crucial for delivering a quality dining experience and upholding the restaurant's reputation.

- 80.** The practice of being hospitable, which includes the friendly and generous reception of guests, is the definition of:
- (A) Tourism
 - (B) Accommodation
 - (C) Hospitality
 - (D) Service

Ans :

(C) Hospitality

Hospitality is specifically defined as the act or practice of being hospitable. This involves the friendly and generous reception, welcoming, and entertainment of guests, coupled with courteous service, which forms the foundation of the industry.

- 81.** When housekeeping services are provided on a commercial basis, why does the work become a more complex task?
- (A) Because the staff are less trained.
 - (B) Because the volume of activities is greater.
 - (C) Because commercial clients are less demanding.
 - (D) Because fewer types of cleaning are required.

Ans :

(B) Because the volume of activities is greater.

When housekeeping is done commercially, the task becomes gigantic and complex due to the greater volume of activities. This involves maintaining numerous rooms and public areas, which requires more extensive planning and organization compared to smaller-scale operations.

- 82.** Which section of the housekeeping department is responsible for coordinating with the laundry and supplying clean uniforms to all staff?
- (A) Public area brigade
 - (B) Guestroom brigade
 - (C) Housekeeping control desk
 - (D) Linen and uniform room

Ans :

(D) Linen and uniform room

The Linen and uniform room is the specific section responsible for coordinating with the laundry services. Its primary role is to provide clean linen for the entire establishment and to ensure all staff members are supplied with clean uniforms.

- 83.** What is the primary responsibility of the 'Room attendant' in a hotel's housekeeping department?
- (A) To perform heavy cleaning activities like mopping floors.
 - (B) To supervise the cleanliness of an entire floor.
 - (C) To do the actual cleaning of guest rooms and bathrooms.
 - (D) To coordinate information from the control desk.

Ans :

(C) To do the actual cleaning of guest rooms and bathrooms.

The role of the Room attendant is specifically to perform the actual, detailed cleaning of guest rooms and their attached bathrooms. This task is central to preparing rooms for guests and maintaining the hotel's standards of hygiene.

- 84.** The selection of specialized equipment, tools, and cleaning solutions is essential for housekeeping. Which of the following is NOT a commonly used piece of cleaning equipment mentioned?
- (A) Industrial food mixers
 - (B) Vacuum cleaners
 - (C) Various types of mops
 - (D) Containers and cleaning cloths

Ans :

(A) Industrial food mixers

- 60.** The management function of 'staffing' in a hotel context primarily involves which activity?
- (A) Creating the hotel's annual budget.
 - (B) Designing the layout of the hotel lobby.
 - (C) Recruiting, training, and managing employees.
 - (D) Developing marketing campaigns for the hotel.

Ans :

(C) Recruiting, training, and managing employees. 'Staffing' is a core management function that involves all aspects of human resource management. In a hotel, this would include the processes of recruiting suitable candidates for various roles, providing them with necessary training, and managing their performance and development.

- 61.** A commercial facility equipped with dining tables, chairs, and décor, where food and beverages are provided to customers, is known as a:
- (A) Kitchen
 - (B) Pantry
 - (C) Bar
 - (D) Restaurant

Ans :

(D) Restaurant

A restaurant is defined as a commercial facility that provides food and beverages to customers. It is equipped with the necessary furniture like dining tables and chairs, along with crockery, cutlery, and décor to create a suitable dining environment.

- 62.** All of the following are typically considered 'back office' or support departments EXCEPT:
- (A) Finance and Accounts
 - (B) Human Resources
 - (C) Engineering
 - (D) Front Office

Ans :

(D) Front Office

The Finance, Human Resources, and Engineering departments are considered 'back office' or support departments as they do not typically have direct, constant interaction with guests. The Front Office, however, is a primary 'front of house' department with constant guest contact.

- 63.** What does the term "Chef-de-parties" refer to in a kitchen hierarchy?
- (A) The head of the entire kitchen.
 - (B) Cooks who make common food items.

- (C) Supervisors for specific sections of the kitchen.
- (D) The deputy to the head chef.

Ans :

(C) Supervisors for specific sections of the kitchen. "Chef-de-parties" are the supervisors responsible for specific sections within the kitchen. For example, there might be a Saucier (sauté chef), a Garde Manger (pantry chef), or a Pâtissier (pastry chef), each leading their respective station.

- 64.** A guest calls the housekeeping department to report that they have left their personal tablet in their room after checking out. Which section of the housekeeping department would handle this situation?

- (A) Lost and found section
- (B) Guestroom brigade
- (C) Public area brigade
- (D) Housekeeping control desk

Ans :

(A) Lost and found section

The Lost and found section is the specific unit within the housekeeping department responsible for depositing and managing any luggage or personal items misplaced or left behind by guests, ensuring a secure process for their potential return.

- 65.** What is the primary purpose of maintaining a high standard of grooming, hygiene, and etiquette for staff in the Kitchen Stewarding department?
- (A) To ensure they can be promoted to chef positions quickly.
 - (B) To maintain the overall standards of sanitation and safety in food areas.
 - (C) To allow them to occasionally serve guests in the restaurant.
 - (D) To justify charging higher prices for the food and beverages.

Ans :

(B) To maintain the overall standards of sanitation and safety in food areas.

Staff in the Kitchen Stewarding department must have high standards of grooming, hygiene, and sanitation. This is crucial because they work in and around food preparation areas, and their personal cleanliness directly impacts the overall food safety and hygiene of the establishment.

- 66.** In a hotel restaurant, who is typically responsible for clearing the table after a guest has finished their meal?

- (A) The Restaurant Manager
- (B) The Head Waiter
- (C) The Waiter/Steward
- (D) The Assistant Waiter

Ans :

- (D) The Assistant Waiter

The team serving guests includes various roles. While the waiter or steward serves the food, it is the Assistant Waiter who is primarily responsible for tasks like clearing the table once the guests have completed their meal.

- 67.** Which of the following is a correct statement regarding career opportunities in hospitality?
- (A) The industry primarily hires middle-aged, experienced professionals.
 - (B) Job opportunities exist only at the top management level.
 - (C) The fundamentals of hospitality management apply only to hotels.
 - (D) Entrepreneurial opportunities exist in areas like housekeeping services.

Ans :

- (D) Entrepreneurial opportunities exist in areas like housekeeping services.

The text explicitly mentions that when housekeeping is done on a commercial or contractual basis, it provides an avenue for many people to start their own enterprise. The other statements are incorrect as the industry prefers youth, has opportunities at all levels, and its principles apply to other institutions like hospitals.

- 68.** What is the term for a person who travels and stays temporarily in another place?
- (A) Host
 - (B) Resident
 - (C) Tourist
 - (D) Employee

Ans :

- (C) Tourist

A tourist is defined as an individual who travels to and stays temporarily in a place other than their usual environment for purposes such as leisure, business, or pilgrimage. The hospitality industry primarily serves these individuals.

- 69.** A hotel wants to ensure its lobby and main entrance always look beautiful and welcoming with fresh plants and floral displays. Which housekeeping team would be responsible for this task?

- (A) Horticulture and flower arrangement team
- (B) Public area brigade
- (C) Guestroom brigade
- (D) Linen and uniform room

Ans :

- (A) Horticulture and flower arrangement team

The Horticulture and flower arrangement team is the specialized section within housekeeping responsible for maintaining the hotel's landscape and creating flower arrangements for various parts of the hotel, including public areas like the lobby, to enhance aesthetics.

- 70.** Besides hotels, hospitality services are also integral to the services provided at all of the following EXCEPT:
- (A) Conventions and conferences
 - (B) Cruise lines and theme parks
 - (C) Hospitals and guest houses
 - (D) Manufacturing factories

Ans :

- (D) Manufacturing factories

Hospitality services are integral to conventions, cruise lines, theme parks, hospitals, and guest houses. Manufacturing factories, while they may have a canteen, do not have hospitality as an integral part of their core service offering to the public.

- 71.** What is the primary difference in focus between a hospital laundry and a hotel laundry?
- (A) Hospital laundry focuses on aesthetics, while hotel laundry focuses on disinfection.
 - (B) Hospital laundry focuses on hygiene and disinfection, while hotel laundry focuses on aesthetics.
 - (C) Hospital laundry only washes woolen blankets, while hotel laundry washes cotton sheets.
 - (D) Hospital laundry does not do ironing, while hotel laundry only does ironing.

Ans :

- (B) Hospital laundry focuses on hygiene and disinfection, while hotel laundry focuses on aesthetics.

The hospital laundry's main concern is hygiene, cleanliness, and disinfection. In contrast, for the hotel sector, the aesthetics and final finish of articles, including perfect folding and pressing, are of utmost importance.

- 72.** The management of an organization carries out several functions. Which function involves dividing tasks and creating a structure to achieve goals?
- (A) Organising
 - (B) Planning
 - (C) Directing
 - (D) Evaluating

Ans :

(A) Organising

The management function of organising involves arranging resources and tasks to achieve the institution's goals. This includes creating a structure, defining roles, and establishing relationships between different departments and individuals to ensure efficient operation.

- 73.** An establishment that provides all essential amenities needed by guests and is often used for longer stays is referred to as:
- (A) A lodge
 - (B) A motel
 - (C) A furnished apartment
 - (D) A resort

Ans :

(C) A furnished apartment

Furnished apartments are a type of accommodation that provides all the essential amenities that guests might need, making them suitable for longer stays where guests may prefer more a self-sufficient, home-like environment.

- 74.** What is the ultimate goal of effective management in a hospitality organization?
- (A) To minimize the number of employees.
 - (B) To maximize the use of resources to achieve institutional goals.
 - (C) To ensure all departments work in complete isolation.
 - (D) To focus solely on short-term financial profit.

Ans :

(B) To maximize the use of resources to achieve institutional goals.

The smooth functioning of a hospitality organization requires the efficient management of all its resources—human, material, and financial—in light of the goals of the institution. This holistic approach ensures long-term success and guest satisfaction.

- 75.** Which of the following is NOT a personal competency mentioned as being ideal for front office staff?
- (A) Good communication skills
 - (B) Physical fitness
 - (C) Self-confidence
 - (D) Advanced knowledge of cookery

Ans :

(D) Advanced knowledge of cookery

The text lists cheerfulness, self-discipline, courtesy, physical fitness, good communication skills, and self-confidence as ideal competencies for front office staff. Advanced knowledge of cookery is a skill for kitchen staff, not the front office.

- 76.** The housekeeping department is responsible for the cleaning of all the following areas EXCEPT:
- (A) Kitchen preparation areas
 - (B) Guestrooms
 - (C) Corridors and staircases
 - (D) Foyer and lobby

Ans :

(A) Kitchen preparation areas

Housekeeping is responsible for cleaning public areas (foyer, lobby) and guest areas (rooms, corridors). The cleanliness of the kitchen itself is the responsibility of the Kitchen Stewarding department.

- 77.** A new hotel is being set up. The management needs to hire someone to oversee the teams that will clean the guest rooms, lobby, and other common areas. Which position should they advertise for?
- (A) Front Office Manager
 - (B) Executive Chef
 - (C) Executive Housekeeper
 - (D) Restaurant Manager

Ans :

(C) Executive Housekeeper

The Executive Housekeeper is the head of the housekeeping department and is responsible for managing all its functions, including overseeing the cleaning of all areas of the hotel, both guest rooms and public spaces, through their teams.

- 78.** What is the title of the supervisor for a specific shift in the Front Office?
- (A) Assistant Manager-Front Office
 - (B) Front Office Supervisor
 - (C) Lobby Manager
 - (D) Bell Captain

- 91.** In a large hotel, what is the role of the 'confectionery' section within the kitchen?
- (A) To deal with raw meat and poultry.
 - (B) To prepare soups and sauces.
 - (C) To prepare vegetables for cooking.
 - (D) To deal with bakery and sweet items.

Ans :

(D) To deal with bakery and sweet items.

A large hotel kitchen may have independent sections for different food preparations. The confectionery section is specifically responsible for bakery items and sweets, such as pastries, cakes, and desserts.

- 92.** Who is the head of the kitchen staff, also known as the 'Chef-de-cuisine'?
- (A) The Deputy Chef
 - (B) The Executive Chef
 - (C) The Chef-de-partie
 - (D) The Kitchen Steward

Ans :

(B) The Executive Chef

The Executive Chef (Chef-de-cuisine) is the head of the kitchen. This individual is responsible for planning, organizing, and controlling all the operations that take place within the kitchen.

- 93.** Which of the following statements about Kitchen Stewarding is incorrect?
- (A) It is responsible for the cleanliness of the kitchen.
 - (B) It is responsible for washing the pots and pans used.
 - (C) It is concerned with the storage of cutlery and crockery.
 - (D) It is responsible for cooking the main course dishes.

Ans :

(D) It is responsible for cooking the main course dishes.

The Kitchen Stewarding department's role involves cleanliness, washing pots, and managing cutlery/crockery. Cooking dishes is the responsibility of the kitchen crew, which includes chefs and cooks, not the stewarding staff.

- 94.** Who is responsible for the overall functioning of a restaurant, including supervising the service and staff?
- (A) The Head Waiter
 - (B) The Executive Chef
 - (C) The Restaurant Manager

(D) The Kitchen Steward

Ans :

(C) The Restaurant Manager

A Restaurant Manager is responsible for the overall functioning of the restaurant. This includes leading the team of supervisors and waiters to ensure that standards of cleanliness, hygiene, and service are consistently maintained.

- 95.** Why must restaurant staff such as waiters possess good manners and etiquette?
- (A) To ensure efficient and courteous service to guests.
 - (B) To show their superiority over the guests.
 - (C) To qualify for work in the kitchen department.
 - (D) To reduce the amount of cleaning required.

Ans :

(A) To ensure efficient and courteous service to guests.

Waiters and other service staff need to be smiling, courteous, and possess good manners and etiquette to provide a high standard of service. This ensures guests feel welcomed and well-cared for, which is essential for a positive dining experience.

- 96.** Which of the following represents the correct hierarchy in a restaurant's service team, from most senior to least senior?
- (A) Head Waiter, Restaurant Manager, Assistant Waiter
 - (B) Restaurant Manager, Head Waiter, Assistant Waiter
 - (C) Assistant Waiter, Head Waiter, Restaurant Manager
 - (D) Head Waiter, Assistant Waiter, Restaurant Manager

Ans :

(B) Restaurant Manager, Head Waiter, Assistant Waiter

The correct hierarchy starts with the Restaurant Manager, who has overall responsibility. The Head Waiter leads the service team under the manager, and the Assistant Waiter supports the waiters with tasks like clearing tables.

- 97.** Which pair correctly matches the department with its function?
- (A) Engineering - Handling guest payments.
 - (B) Sales and Marketing - Repairing hotel equipment.
 - (C) Human Resources - Recruiting and training staff.

Commonly used housekeeping equipment includes vacuum cleaners, brushes, brooms, mops, containers, and cleaning cloths. Industrial food mixers are equipment used in the kitchen for food preparation, not for cleaning purposes by the housekeeping department.

- 85.** Which of the following is an example of a cleaning agent that may be used by the housekeeping department?
- (A) Baking soda
 - (B) Cooking oil
 - (C) Flour
 - (D) Vinegar

Ans :

(D) Vinegar

Housekeeping departments use various cleaning agents, which include water, ammonia, vinegar, soaps, detergents, and polishes. Vinegar is a common agent used for its cleaning and disinfecting properties on various surfaces.

- 86.** Why must housekeeping staff be cautious while using strong cleaning agents?
- (A) To ensure the cleaning process takes longer.
 - (B) To avoid damaging the surface being cleaned.
 - (C) To make the cleaning agents last for a year.
 - (D) To mix all cleaning agents together for efficiency.

Ans :

(B) To avoid damaging the surface being cleaned. The text states that one should be very cautious while using cleaning agents because some strong agents may damage the surface while cleaning. Therefore, the choice of an appropriate agent is important to protect the material being cleaned.

- 87.** The linen room in a hotel is responsible for storing and maintaining stock of which of the following items?
- (A) Guest luggage and personal belongings.
 - (B) Food and beverage supplies for the restaurant.
 - (C) Bed linen, bath linen, and restaurant linen.
 - (D) Cleaning equipment and chemical solutions.

Ans :

(C) Bed linen, bath linen, and restaurant linen. The linen room stores and maintains an adequate stock of all linen used throughout the hotel. This includes bed linen (sheets, pillowcases), bath linen (towels), and linen for the restaurant(s) (tablecloths, napkins).

- 88.** A hotel wants to enhance the aesthetic appeal of its main lobby, restaurant, and meeting rooms. Which department is typically responsible for making the flower arrangements?
- (A) Housekeeping
 - (B) Front Office
 - (C) Food and Beverages
 - (D) Engineering

Ans :

(A) Housekeeping

The housekeeping department is responsible for enhancing the aesthetic appeal of interior spaces. This includes making flower arrangements in various areas of the premises, or alternatively, giving a contract to an external florist for this purpose.

- 89.** What is the purpose of placing cards in hotel rooms that urge guests to reuse towels?
- (A) To reduce the workload of the room attendants.
 - (B) To save on the initial cost of purchasing towels.
 - (C) To encourage guests to bring their own towels.
 - (D) To promote environmental conservation of resources.

Ans :

(D) To promote environmental conservation of resources.

This practice is part of a hotel's eco-friendly initiatives. The main purpose is to promote the saving of natural resources like water, electricity, and the detergent that would be used for laundering the towels daily.

- 90.** The Food and Beverages department is responsible for the sale of food and beverages through various service departments. Which of the following is NOT one of those departments?
- (A) Kitchens
 - (B) Restaurants
 - (C) Housekeeping
 - (D) Bars/coffee shops

Ans :

(C) Housekeeping

The service departments involved in the Food and Beverages department include kitchens, banquets, restaurants, room service, stewarding, and bars/coffee shops. Housekeeping is a separate department focused on cleanliness and accommodation.

Ans :

(D) Positions in housekeeping are available at various hierarchical levels.

The scope and career opportunities section lists “Positions in housekeeping departments at various hierarchical levels” as a viable career path. The other statements are incorrect; various qualifications exist, entrepreneurship is possible in areas like housekeeping supply, and front office roles can lead to management positions.

104. What does the term ‘V.I.P.’ in the context of a Front Office Manager’s duties refer to?

- (A) Very Important Person (guest)
- (B) Very Important Personnel (staff)
- (C) Vacant Inspected Property (room)
- (D) Verified Internal Payout (finance)

Ans :

(A) Very Important Person (guest)

In a hotel context, “V.I.P.” stands for Very Important Person. The Front Office Manager checks the day’s arrivals, paying special attention to any V.I.P.s to ensure they receive special attention and services during their stay.

105. The Assistant Housekeeper prepares duty schedules and checks the cleanliness and functioning of the workers. This role is primarily focused on which management function?

- (A) Planning
- (B) Supervising
- (C) Budgeting
- (D) Marketing

Ans :

(B) Supervising

The role of the Assistant Housekeeper, which involves preparing schedules and checking the work of others, is a direct application of the supervisory function. They ensure that tasks are performed correctly and that standards are maintained by the staff on their shift.

106. Assertion (A): The Desk Control Supervisor must coordinate with the front office about guest departures.

Reason (R): This coordination allows housekeeping to get vacated rooms cleaned and ready for the next guest promptly.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).

(C) (A) is true but (R) is false.

(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is true; coordination is essential. Reason (R) correctly explains why this coordination is necessary. Timely information from the front office about departures enables the housekeeping department to efficiently clean and prepare the rooms, minimizing downtime and maximizing availability.

107. Assertion (A): The staff in the kitchen and restaurant must maintain high standards of hygiene and sanitation.

Reason (R): Food safety and guest health are paramount in any food service establishment.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

Assertion (A) is a standard requirement for food service staff. Reason (R) provides the critical justification for this requirement. High standards of hygiene are not just for appearance but are essential to prevent foodborne illnesses and ensure the health and safety of guests.

108. A hotel is experiencing frequent complaints about the cleanliness of its main foyer and public restrooms. Which employee’s performance should the Executive Housekeeper primarily review?

- (A) The Room Attendant’s
- (B) The Floor Supervisor’s
- (C) The Public Area Supervisor’s
- (D) The Linen Room Supervisor’s

Ans :

(C) The Public Area Supervisor’s

The Public Area Supervisor is specifically responsible for maintaining the cleanliness of public areas, which include the main entrance, corridors, and other common facilities like public restrooms. Therefore, issues in these areas fall directly under their responsibility.

(D) Finance and Accounts - Promoting the hotel's services.

Ans :

(C) Human Resources - Recruiting and training staff.

The Human Resources department is a support service department responsible for all personnel-related functions, including recruiting new employees, providing training, and managing staff welfare. The other options incorrectly match the departments with their functions.

- 98.** What is the management function that involves planning, organising, co-ordinating, staffing, directing, controlling and evaluating the use of resources?
- (A) Hospitality Management
 - (B) Financial Accounting
 - (C) Marketing Strategy
 - (D) Guest Services

Ans :

(A) Hospitality Management

Hospitality management involves the application of core management functions—planning, organising, co-ordinating, staffing, directing, controlling, and evaluating. These functions are used to manage resources effectively to meet the institution's goals.

- 99.** In the hospitality industry, at which levels are job opportunities available?
- (A) Only at the operations staff level.
 - (B) Only at the top management level.
 - (C) Only for supervisors and junior management.
 - (D) At all levels from operations to top management.

Ans :

(D) At all levels from operations to top management.

The organizational structure of a hotel includes a hierarchy of top management, middle management, junior management, supervisors, and operations staff. The text states that there are job opportunities available at each of these levels.

- 100.** Why are youth often preferred in the hospitality workforce?
- (A) They demand lower salaries than older workers.
 - (B) They have high energy and are open to new ideas.

(C) They require less training and supervision.
(D) They are less ambitious about their careers.

Ans :

(B) They have high energy and are open to new ideas.

Hotels often prefer to hire youth because they possess high energy to work long hours, are generally better informed, are open to new ideas and technologies, and have ambition for success.

- 101.** A student wants to pursue a career as a Front Office Manager. Which competency would be most crucial for success in this role?
- (A) Excellent culinary skills.
 - (B) Advanced engineering knowledge.
 - (C) Good communication and self-discipline.
 - (D) Expertise in landscape gardening.

Ans :

(C) Good communication and self-discipline.

The ideal front office staff must have competencies like a cheerful attitude, self-discipline, courtesy, physical fitness, and good communication skills. These are essential for interacting with guests and managing the front desk operations effectively.

- 102.** Which of the following is an aspect of being well-groomed for hospitality staff?
- (A) Having a clean and neatly pressed uniform.
 - (B) Wearing multiple flashy accessories.
 - (C) Keeping hair long and untied for a casual look.
 - (D) Wearing strong perfume to make an impression.

Ans :

(A) Having a clean and neatly pressed uniform.

The text specifies that aspects of being well-groomed include wearing a clean and neatly pressed uniform, having well-groomed hair, and wearing minimum accessories. This projects a professional image for the staff and the establishment.

- 103.** Which of the following statements about career paths in hospitality is correct?
- (A) A degree is the only qualification accepted in the industry.
 - (B) Entrepreneurial opportunities are limited to restaurant ownership.
 - (C) Front office jobs are only suitable for people with no ambition.
 - (D) Positions in housekeeping are available at various hierarchical levels.

(R) is true, as its function is indeed to handle items and luggage misplaced by guests.

55. Consider the following statements regarding the hospitality industry:

1. People travel internationally for reasons such as medical tourism and leisure.
2. The hospitality industry has grown to provide “A Home Away From Home”.
3. Hospitality services are only offered by luxury, five-star hotels.

Which of the above statements is/are correct?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 only
- (D) 1, 2 and 3

Ans :

- (A) 1 and 2 only

Statements 1 and 2 are correct. People travel for various reasons, including medical tourism, and the industry aims to provide a “Home Away From Home”. Statement 3 is incorrect as hospitality services are offered by many types of establishments like motels, lodges, and resorts, not just luxury hotels.

56. Consider the following responsibilities of the Front Office:

1. Maintaining records of guest check-in and check-out details.
2. Coordinating the supply of clean linen to guest rooms.
3. Preparing and settling the bills of the guests.

Which of the above are functions of the Front Office?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1, 2 and 3

Ans :

- (C) 1 and 3 only

Statements 1 and 3 are core functions of the Front Office, which include maintaining guest records and handling billing. Statement 2, coordinating the supply of clean linen, is a primary responsibility of the Housekeeping department, specifically the linen room.

57. Which of the following pairs incorrectly matches the housekeeping role with its responsibility?

- (A) Executive Housekeeper - Managing the overall functioning of the department.

(B) Room Attendant - Performing the actual cleaning of guest rooms.

(C) Public Area Supervisor - Maintaining cleanliness of the main entrance and lobby.

(D) Florist/Gardner - Coordinating with the front office for guest departures.

Ans :

(D) Florist/Gardner - Coordinating with the front office for guest departures.

The Florist/Gardner is responsible for maintaining the garden and doing flower arrangements. Coordinating with the front office for guest departures is the responsibility of the Desk Control Supervisor. The other pairs are correctly matched.

58. A large corporate group is planning a week-long conference at a hotel, which will include lodging for attendees, multiple daily meals, and large meeting spaces. Which hotel department would be LEAST directly involved in the primary services for this event?

- (A) Food and Beverages
- (B) Front Office
- (C) Kitchen Stewarding
- (D) Sales and Marketing

Ans :

- (C) Kitchen Stewarding

The Front Office will handle accommodation, and Food & Beverages will manage meals. Sales and Marketing would have initially secured the booking. Kitchen Stewarding provides a crucial support role by cleaning and supplying crockery, but they are least directly involved with the guests and the primary services compared to the other departments.

59. What is the term for the record of a guest's stay, including their preferences and feedback, which is maintained by the hotel for future visits?

- (A) Guest Ledger
- (B) Guest History
- (C) Guest Itinerary
- (D) Guest Invoice

Ans :

- (B) Guest History

An up-to-date record of the guest's occupancy and other information, including feedback about their opinion of the services, is known as 'guest history'. This information is valuable for personalizing future stays and improving service.

- 109.** In addition to hotels, the fundamental principles of hospitality management are also applicable to which other types of institutions?
- (A) Software development companies.
 - (B) Hostels and large hospitals.
 - (C) Automotive repair shops.
 - (D) Agricultural research facilities.

Ans :

(B) Hostels and large hospitals.

The text explicitly states that the fundamentals of hospitality management are also applicable to institutions like hostels and large hospitals. Both of these provide accommodation and services, requiring similar management principles for guest/patient satisfaction.

- 110.** The Front Office staff is responsible for coordinating with all of the following departments EXCEPT:
- (A) Room service
 - (B) Housekeeping
 - (C) Transport
 - (D) Local government tax office

Ans :

(D) Local government tax office

The front office staff coordinate with internal departments like transport, accounts, room service, restaurants, engineering, and housekeeping to provide guest services. While they handle billing which includes taxes, direct coordination with a government tax office is not a routine guest service function.

- 111.** The “Guest Cycle” is a concept used to understand the flow of guest interactions. Why is this concept important for hotel management?
- (A) It helps to schedule staff holidays and leaves accurately.
 - (B) It ensures that the hotel always makes a maximum profit.
 - (C) It provides a framework for organizing services at each stage of the guest’s stay.
 - (D) It is a legal requirement for obtaining a hotel operating license.

Ans :

(C) It provides a framework for organizing services at each stage of the guest’s stay.

The Guest Cycle concept is important because it breaks down the guest’s experience into four distinct stages. This allows hotel management to plan and organize specific services and staff

interactions appropriately for each stage, from pre-arrival to departure, ensuring a smooth and positive experience.

- 112.** Consider the following statements about hospitality establishments:
1. A hotel is a commercial establishment offering lodging and meals.
 2. A motel provides parking facilities near the room.
 3. A lodge is known for its broad range of leisure and sports facilities.
 4. A resort primarily offers only sleeping accommodation.

Which of the above statements are correct?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

(A) 1 and 2 only

Statement 1 correctly defines a hotel. Statement 2 correctly describes a key feature of a motel. Statement 3 incorrectly describes a lodge; this is the definition of a resort. Statement 4 incorrectly describes a resort; this is the definition of a lodge.

- 113.** Consider the following housekeeping roles:
1. Executive Housekeeper: Manages the entire department.
 2. Floor Supervisor: Responsible for cleanliness of a specific floor.
 3. Room Attendant: Performs heavy cleaning like mopping and sweeping.
 4. Houseman: Does the actual cleaning of guest rooms and bathrooms.

Which of the above pairings of roles and responsibilities are correct?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

(A) 1 and 2 only

Statements 1 and 2 are correct pairings. Statements 3 and 4 are incorrect; the roles are reversed. The Room Attendant does the actual cleaning of rooms, and the Houseman performs the heavy cleaning activities.

- 114.** Consider the following statements regarding the Food & Beverage department:

1. The Executive Chef is the head of the kitchen.
2. The butchery section deals with bakery and confectionery.
3. Kitchen Stewarding is responsible for washing pots and pans.
4. The Assistant Waiter is responsible for the overall functioning of the restaurant.

Which of the above statements are correct?

- (A) 1 and 3 only
- (B) 2 and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

- (A) 1 and 3 only

Statement 1 is correct. Statement 3 is correct. Statement 2 is incorrect; the butchery deals with raw meat, while the confectionery section deals with bakery. Statement 4 is incorrect; the Restaurant Manager is responsible for the overall functioning.

- 115.** Consider the following competencies for hospitality staff:

1. Being well-groomed with a neat uniform.
2. Having good communication skills.
3. Displaying a cheerful and courteous attitude.
4. Possessing a deep knowledge of local politics.

Which of the competencies are essential for front office staff?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 1, 2, and 3 only
- (D) 2, 3, and 4 only

Ans :

- (C) 1, 2, and 3 only

Being well-groomed, having good communication skills, and displaying a cheerful attitude are all essential competencies for front office staff mentioned in the text. Knowledge of local politics is not listed as a required competency for this role.

- 116.** Consider the following hotel departments:

1. Front Office
2. Housekeeping
3. Food and Beverage
4. Human Resources

Which of these are considered primary, guest-facing (front of house) departments?

- (A) 1 and 2 only
- (B) 3 and 4 only
- (C) 2, 3, and 4 only

- (D) 1, 2, and 3 only

Ans :

- (D) 1, 2, and 3 only

Front Office, Housekeeping (through room attendants and public area visibility), and Food and Beverage (restaurants, bars) are all primary departments with direct guest interaction. Human Resources is a 'back office' or support department.

- 117.** What is the term used for the act/practice of being hospitable, which includes providing services with warmth and courteousness?

- (A) Accommodation
- (B) Hospitality
- (C) Tourism
- (D) Reception

Ans :

- (B) Hospitality

Hospitality is defined as the act or practice of being hospitable, which includes the friendly, generous reception and entertainment of guests, as well as providing services with warmth and courteousness.

- 118.** Which accommodation type is specifically known for its leisure attractions, sports facilities, and providing a total vacation experience?

- (A) Hotel
- (B) Lodge
- (C) Motel
- (D) Resort

Ans :

- (D) Resort

A resort is defined as an establishment known for its leisure attractions. It offers a broad range of amenities, sports facilities, and leisure activities to ensure a complete vacation experience for its guests.

- 119.** The actual registration or 'check-in' of a guest happens during which stage of the Guest Cycle?

- (A) Arrival Stage
- (B) Pre-arrival Stage
- (C) Occupancy Stage
- (D) Departure Stage

Ans :

- (A) Arrival Stage

The Arrival Stage is the point in the Guest Cycle when the guest actually arrives at the hotel. The key activity during this stage is the registration or 'check-in' process.

- 120.** A hotel's decision to use 100% organic cotton bed sheets and chemical-free laundry cycles is an example of what kind of practice?
- (A) Cost-cutting
 - (B) Marketing gimmick
 - (C) Eco-friendly
 - (D) Staff training

Ans :

(C) Eco-friendly

These practices, such as using organic materials and non-toxic, biodegradable agents, are examples of environmental conservation and eco-friendly practices adopted by hotels to reduce their environmental impact.

- 121.** During a busy dinner service, a waiter needs more clean plates immediately. Which department would they coordinate with to get the required items?
- (A) Housekeeping
 - (B) Front Office
 - (C) Engineering
 - (D) Kitchen Stewarding

Ans :

(D) Kitchen Stewarding

The Kitchen Stewarding department is responsible for the storage, maintenance, cleanliness, and issue of crockery (plates) and cutlery to the restaurant. Therefore, the waiter would coordinate with them to get more clean plates.

- 122.** The organizational structure of a hotel typically includes a hierarchy. At which level would a 'supervisor' be placed?
- (A) Top management
 - (B) Middle management
 - (C) Junior management
 - (D) Between junior management and operations staff

Ans :

(D) Between junior management and operations staff

The text describes the hierarchy as top management, middle management, junior management, supervisors, and operations staff. This places supervisors in the position between the junior management and the hands-on operations staff.

- 123.** What is the primary role of a 'Doorman' in a hotel's front office team?
- (A) To carry the guest's luggage to the room.

- (B) To welcome guests upon arrival and escort them to the desk.
- (C) To handle the guest's final payment and check-out.
- (D) To answer incoming phone calls for the hotel.

Ans :

(B) To welcome guests upon arrival and escort them to the desk.

The Doorman's function is to be the first point of physical welcome for a guest. They welcome guests as they arrive at the hotel's entrance and escort them to the registration desk, creating a positive first impression.

- 124.** What is the main objective of having separate, specialized sections like butchery, bakery, and pantry in a large hotel kitchen?
- (A) To ensure efficiency and expertise in food preparation.
 - (B) To increase the complexity of kitchen operations.
 - (C) To provide separate jobs for more employees.
 - (D) To follow a traditional, but outdated, kitchen design.

Ans :

(A) To ensure efficiency and expertise in food preparation.

Large kitchens are divided into independent sections to streamline the food preparation process. This specialization allows for greater efficiency, quality control, and the development of expertise among the staff in specific areas of cookery.

- 125.** Which of the following statements about the Housekeeping department is true?
- (A) Its sole function is to clean guest rooms.
 - (B) It is also responsible for pest control.
 - (C) It reports directly to the Food and Beverage manager.
 - (D) It does not interact with any other hotel departments.

Ans :

(B) It is also responsible for pest control.

Besides cleaning, the Housekeeping department's functions include coordination with other departments, and pest control is also listed as a responsibility of this department. The other statements are false.

- 126.** A guest has a special dietary requirement and needs a specific meal prepared. The restaurant waiter takes the order. Which department must the waiter coordinate with to fulfill this request?
- (A) The Front Office
 - (B) The Kitchen
 - (C) The Housekeeping Department
 - (D) The Engineering Department

Ans :

(B) The Kitchen

The restaurant personnel, including waiters, coordinate closely with the kitchen for the supply of all food orders to guests. A special dietary request would require direct communication with the kitchen staff to ensure it is prepared correctly.

- 127.** Which of the following is NOT a management function listed in the text?
- (A) Planning
 - (B) Staffing
 - (C) Marketing
 - (D) Controlling

Ans :

(C) Marketing

The management functions discussed are planning, organizing, co-ordinating, staffing, directing, controlling, and evaluating. While Sales and Marketing is a support department, 'Marketing' itself is not listed as one of the core management functions in this context.

- 128.** What is the significance of the phrase "A Home Away From Home" for the hospitality industry?
- (A) It indicates the industry's goal of providing comfort and familiarity.
 - (B) It signifies that hotels should be built to look like houses.
 - (C) It means that hotel guests should do their own cooking and cleaning.
 - (D) It is a legal slogan that all hotels must display at their entrance.

Ans :

(A) It indicates the industry's goal of providing comfort and familiarity.

This phrase encapsulates the core mission of the hospitality industry, which is to provide tourists with comforts and facilities that are similar or close enough to what they are accustomed to at home, ensuring a comfortable and secure stay.

- 129.** The 'Lobby Manager' is responsible for organizing, supervising, and controlling which group of staff?

- (A) The kitchen crew
- (B) The housekeeping room attendants
- (C) The front office cashiers
- (D) All uniformed services

Ans :

(D) All uniformed services

The Lobby Manager's role is to organize, supervise, and control all the uniformed services that operate in the lobby area. This typically includes staff like doormen and bellboys.

- 130.** The process of ensuring a healthy environment by maintaining high standards of cleanliness and hygiene in a hotel is the primary responsibility of which department?
- (A) Housekeeping
 - (B) Front Office
 - (C) Security
 - (D) Accounts

Ans :

(A) Housekeeping

The Housekeeping department is primarily responsible for providing a healthy environment by ensuring cleanliness and maintaining high standards of hygiene throughout the entire establishment.

- 131.** All of the following are listed as entrepreneurial opportunities in hospitality EXCEPT:
- (A) Housekeeping services on contract.
 - (B) Supply of flower arrangements.
 - (C) Theme-based event specialization.
 - (D) Manufacturing hotel cleaning equipment.

Ans :

(D) Manufacturing hotel cleaning equipment.

The text lists entrepreneurial opportunities like housekeeping, flower supply, and theme-based events. While related, the large-scale manufacturing of equipment is an industrial activity, not a service-based entrepreneurial venture typically associated with hospitality management graduates.

- 132.** A hotel is being renovated, and the owner wants to ensure the new guest rooms have a modern and aesthetically pleasing design. Which individual on the housekeeping team would likely be consulted?
- (A) Head Houseman
 - (B) Linen Supervisor
 - (C) Interior Decorator
 - (D) Floor Supervisor

Ans :

(C) Interior Decorator

The organizational chart for a housekeeping department can include an Interior Decorator. This specialist would be responsible for the aesthetic aspects of the hotel's interiors, including the design and decor of guest rooms during a renovation.

- 133.** Which hotel employee is responsible for checking the occupancy of rooms during their shift?
- (A) The Doorman
 - (B) The Front Office Supervisor
 - (C) The Bellboy
 - (D) The Telephone Operator

Ans :

(B) The Front Office Supervisor

The Front Office Supervisor, who is responsible for a shift, has the duty of checking the occupancy status of the rooms to ensure records are accurate and to manage room assignments efficiently.

- 134.** What is the primary purpose of the 'control desk' within the housekeeping department?
- (A) To serve as a central point for communication and coordination.
 - (B) To control the budget and expenses of the department.
 - (C) To control access to the hotel's main entrance.
 - (D) To control the quality of food served in the restaurant.

Ans :

(A) To serve as a central point for communication and coordination.

The housekeeping control desk serves as the nerve center for the department. Its main purpose is to coordinate and communicate with other departments (like the front office) and to pass on information to housekeeping staff working throughout the hotel.

- 135.** Which of the following cleaning activities is performed on a 'daily' basis in a hotel?
- (A) Deep cleaning of carpets
 - (B) Washing of curtains
 - (C) Polishing of all silverware
 - (D) Cleaning of guestrooms

Ans :

(D) Cleaning of guestrooms

While some cleaning tasks are done weekly or seasonally, the cleaning of guestrooms is a fundamental daily activity in any hotel to ensure

hygiene and prepare rooms for new or staying guests.

- 136.** A guest in a hotel restaurant is highly impressed with the service and asks for the person in charge to pay a compliment. Who would be the most appropriate person to receive this feedback?
- (A) The Executive Chef
 - (B) The Restaurant Manager
 - (C) The Head Houseman
 - (D) The Front Office Cashier

Ans :

(B) The Restaurant Manager

The Restaurant Manager is responsible for the overall functioning of the restaurant, including the quality of service. Therefore, they are the most appropriate person to receive direct feedback, whether positive or negative, from guests about their dining experience.

- 137.** Why is it important for the Front Office to maintain an accurate 'guest history'?
- (A) To create personalized experiences and encourage loyalty.
 - (B) For reporting guest details to the local police department.
 - (C) To charge guests for damages after they have departed.
 - (D) To sell guest data to third-party marketing companies.

Ans :

(A) To create personalized experiences and encourage loyalty.

Maintaining guest history, which includes preferences and feedback, is crucial for encouraging repeat business. It allows the hotel to offer a more personalized service during future stays, making the guest feel valued and fostering 'customer loyalty'.

- 138.** In a hotel's support services, which department is responsible for the maintenance and repair of the building and its equipment?
- (A) Human Resources
 - (B) Sales and Marketing
 - (C) Finance and Accounts
 - (D) Engineering

Ans :

(D) Engineering

The Engineering department is the support service department responsible for the maintenance and proper functioning of the hotel's physical plant.

(D) Evaluating

Ans :

(B) Organising

The management function of organising involves creating a structure for the enterprise. This includes defining roles, responsibilities, and the hierarchy of authority, which results in the different levels of management and staff within the hotel.

- 152.** Assertion (A): A 'lodge' typically offers a wide range of amenities, sports facilities, and leisure activities.

Reason (R): The primary purpose of a lodge is to provide a complete vacation experience.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) Both (A) and (R) are false.

Ans :

(D) Both (A) and (R) are false.

Both the Assertion and the Reason are false. They describe a 'resort'. A lodge is an establishment that primarily offers rented accommodation for sleeping and may not offer food or other services.

- 153.** Which department acts as the central communication point for housekeeping, passing information to staff across the hotel?

- (A) The Housekeeping Control Desk
(B) The Linen Room
(C) The Front Office
(D) The Public Area Brigade

Ans :

(A) The Housekeeping Control Desk

The Housekeeping Control Desk functions as the communication hub for the department, passing on information to housekeeping staff who are working in various parts of the hotel.

- 154.** The person responsible for the storage, maintenance, and cleanliness of cutlery, crockery, and glassware is the:

- (A) Executive Chef
(B) Restaurant Manager
(C) Kitchen Steward
(D) Head Waiter

Ans :

(C) Kitchen Steward

Kitchen Stewarding is the department concerned with the storage, maintenance, cleanliness, and issue of these items to the restaurant and kitchen. An executive kitchen steward would oversee this function.

- 155.** What is a key reason that multi-language skills are considered an asset for front office staff?

- (A) It allows them to cook international cuisines.
(B) It helps in communicating with a diverse range of guests.
(C) It is a requirement for becoming a hotel engineer.
(D) It helps in negotiating lower prices for hotel supplies.

Ans :

(B) It helps in communicating with a diverse range of guests.

With globalization, hotels receive guests from all over the world. Having staff with multiple language skills in the front office enhances communication, makes international guests feel more welcome, and improves the overall service quality.

- 156.** The management of a hotel is reviewing its operations to ensure that all activities are aligned with its goals and are being performed efficiently. This review process is an example of which management function?

- (A) Evaluating
(B) Staffing
(C) Planning
(D) Directing

Ans :

(A) Evaluating

Evaluating is the management function that involves assessing the outcomes of operations against the set goals and objectives. This review process helps management understand performance and make informed decisions for future improvements.

- 157.** A hotel is located in a region famous for its beautiful natural landscapes. To attract more guests, it offers guided hiking tours, nature walks, and wildlife photography workshops. This establishment would best be classified as a:

- (A) Motel
(B) Lodge
(C) Resort
(D) Furnished Apartment

Ans :

- 145.** The friendly and generous welcoming and entertainment of guests is central to the concept of:
- (A) Financial Management
 - (B) Engineering Services
 - (C) Hospitality
 - (D) Staffing

Ans :

(C) Hospitality

The very definition of hospitality is the act of being hospitable, which includes the friendly and generous reception and entertainment of guests with warmth and courtesy.

- 146.** What is the ultimate outcome of providing high-quality service and achieving guest satisfaction during the 'Occupancy' stage?
- (A) Obtaining and retaining 'customer loyalty'.
 - (B) Minimizing the hotel's operational costs.
 - (C) Speeding up the check-in process for new guests.
 - (D) Reducing the need for a housekeeping department.

Ans :

(A) Obtaining and retaining 'customer loyalty'.

The main focus during the occupancy stage is guest satisfaction. The ultimate goal is to encourage the guest to patronize the establishment again, thereby obtaining and retaining their 'customer loyalty' for future business.

- 147.** The responsibility for ensuring the accurate and speedy rooming procedure for all guest arrivals falls to which staff member?
- (A) The Front Office Cashier
 - (B) The Telephone Operator
 - (C) The Front Office Supervisor
 - (D) The Doorman

Ans :

(C) The Front Office Supervisor

The Front Office Supervisor, who is in charge of a shift, is responsible for meeting and greeting all arrivals and ensuring that the rooming procedure is both accurate and speedy, contributing to a positive check-in experience.

- 148.** All of the following are responsibilities of the Executive Housekeeper EXCEPT:
- (A) Managing the functioning of the housekeeping department.
 - (B) Judicious use of manpower, materials, and money.

(C) Checking schedules and cleanliness within the department.

(D) Personally greeting every guest who arrives at the hotel.

Ans :

(D) Personally greeting every guest who arrives at the hotel.

The Executive Housekeeper is responsible for managing the department, its resources, and its schedules. Personally greeting every arriving guest is a function of the front office staff, such as the supervisor or doorman, not the head of housekeeping.

- 149.** Which of the following is NOT listed as a type of common cleaning tool used in housekeeping?
- (A) Brooms
 - (B) Mops
 - (C) Hammers
 - (D) Brushes

Ans :

(C) Hammers

The text lists commonly used equipment as vacuum cleaners, various types of brushes, brooms, and mops, along with containers and cleaning cloths. A hammer is a construction or maintenance tool, not a cleaning tool.

- 150.** An entrepreneur wants to start a business supplying a niche product to hotels. Based on the career opportunities mentioned, which of the following would be a viable venture?
- (A) Manufacturing hotel furniture.
 - (B) Providing specialized theme-based event services.
 - (C) Building new hotel properties.
 - (D) Operating a national hotel chain.

Ans :

(B) Providing specialized theme-based event services.

The text lists "Specialised in theme-based events within the organisation" as a career opportunity. This suggests that an entrepreneur could offer such specialized services to hotels, which fits the description of a niche supply business.

- 151.** The hierarchical structure in a hotel, with top management, supervisors, and operations staff, is a result of which management function?
- (A) Planning
 - (B) Organising
 - (C) Controlling

aesthetics of the entire establishment, including guest rooms, are properly maintained.

- 162.** The resort, which is known for its leisure attractions and offers a broad range of amenities and sports facilities, is a specific type of hospitality establishment. What is it called?

(A) A Motel
(B) A Lodge
(C) A Resort
(D) A Furnished Apartment

Ans :

(C) A Resort

A resort is a type of establishment known for its leisure attractions. It is designed to provide a total vacation experience by offering a wide range of amenities, sports facilities, and recreational activities to its guests.

- 163.** The stage of the guest cycle where the family has checked in and is using the various services provided by the resort is known as the:

(A) Pre-arrival stage
(B) Arrival stage
(C) Departure stage
(D) Occupancy stage

Ans :

(D) The Occupancy stage

The Occupancy stage is the part of the guest cycle that begins after the guest has checked in. This stage consists of providing various services as per the guest's requirements and ensuring their security and satisfaction.

- 164.** The resort's restaurant, kitchen, and bars are all part of which major department?

(A) The Food and Beverages Department
(B) The Front Office Department
(C) The Housekeeping Department
(D) The Finance and Accounts Department

Ans :

(A) The Food and Beverages Department

The Food and Beverages department is responsible for the sale of all food and beverages within a hospitality establishment. This includes the management of kitchens, restaurants, banquets, room service, and bars.

- 165.** The friendly and generous reception and entertainment of guests, along with providing services with warmth and courteousness, is the definition of:

(A) Management
(B) Hospitality
(C) Tourism
(D) Marketing

Ans :

(B) Hospitality

Hospitality is defined as the relationship between a guest and a host. It is the act of being hospitable, which includes the friendly and generous reception of guests and providing them with services with warmth and courtesy.

Direction : Read the following case study and answer the following questions.

Mrs. Iyer is the Executive Housekeeper at a large, 500-room hotel. Her department is crucial for maintaining the hotel's reputation for cleanliness and comfort. Her daily responsibilities are vast. She starts her day by checking the duty schedule she has prepared for her team, which includes floor supervisors, room attendants, and housemen. She coordinates with the front office to get a list of room check-outs, so her team can prioritize cleaning those rooms for new arrivals. She also oversees the hotel's linen room, ensuring a constant supply of clean linen for all rooms and restaurants. Her role extends to maintaining the cleanliness of all public areas, such as the lobby and banquet halls, and managing the in-house florist for flower arrangements. She ensures that her staff is well-trained, well-groomed, and uses the correct cleaning equipment and agents for different surfaces. Her ultimate goal is to manage her department's resources—manpower, materials, and time—judiciously to provide a flawless and hygienic environment for all guests.

- 166.** A person who is responsible for managing the entire functioning of the housekeeping department by judiciously using all available resources is the:

(A) Room Attendant
(B) Floor Supervisor
(C) Executive Housekeeper
(D) Front Office Manager

Ans :

(C) Executive Housekeeper

The Executive Housekeeper is responsible for managing the overall functioning of the

(C) Resort

This establishment is known for its leisure attractions and offers a range of recreational activities related to its location. This fits the definition of a resort, which aims to provide a total vacation experience.

158. Which of the following statements about the Front Office department is incorrect?

- (A) It is the first point of contact for an arriving guest.
- (B) It plays a central role in building the hotel's image.
- (C) It coordinates with other departments like housekeeping.
- (D) It is responsible for the preparation of food in the kitchen.

Ans :

(D) It is responsible for the preparation of food in the kitchen.

The Front Office has many crucial roles, including guest interaction, image building, and departmental coordination. However, the preparation of food is the responsibility of the Food and Beverage department, specifically the kitchen staff.

159. Which of the following is a key component of the 'Occupancy' stage in the Guest Cycle?

- (A) Quoting room rates to a potential guest.
- (B) The guest registering at the front desk.
- (C) Coordination of various guest services.
- (D) The guest settling their final bill.

Ans :

(C) Coordination of various guest services.

The Occupancy stage consists of the entire duration of the guest's stay. A key component of this stage is providing various services as per the guest's requirements and ensuring the coordination of these services to maximize satisfaction.

160. The existence of support service departments like Finance and Human Resources illustrates that a hotel operates as a:

- (A) Simple, single-function entity.
- (B) Complex organization with specialized functions.
- (C) Non-profit charitable institution.
- (D) Government-run public utility.

Ans :

(B) A complex organization with specialized functions.

A hotel has various departments with complex relationships among them. The presence of specialized 'back office' support departments alongside guest-facing departments shows that it is a complex organization requiring efficient management of many different functions.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

A family is on vacation and checks into the "Sea Breeze Resort". Their experience is managed by various departments working in coordination. It begins with the 'Arrival' stage, where the doorman greets them warmly and the front office agent efficiently handles their registration. A bellboy then assists them with their luggage to the room. Once settled, they enter the 'Occupancy' stage. The housekeeping department ensures their room is clean, hygienic, and aesthetically pleasing, with fresh linen and towels supplied daily. For meals, they visit the resort's multi-cuisine restaurant, which is managed by the Food and Beverages department. The restaurant manager ensures they receive courteous service, and the kitchen, headed by an executive chef, prepares high-quality food. The family also uses the resort's other amenities, like the swimming pool and activity center. This entire experience, from the first welcome to the daily services, is a result of the seamless functioning of different departments like the front office, housekeeping, and food and beverages, all aimed at providing a comfortable "home away from home".

161. Which department is primarily responsible for ensuring the guest rooms are clean, hygienic, and aesthetically maintained?

- (A) The Front Office Department
- (B) The Housekeeping Department
- (C) The Food and Beverages Department
- (D) The Sales and Marketing Department

Ans :

(B) The Housekeeping Department

The housekeeping department is primarily responsible for providing a healthy environment by ensuring cleanliness and maintaining high standards of hygiene. They also ensure that the

This includes the building itself, electrical systems, plumbing, HVAC, and all other equipment.

- 139.** What is the primary personal attribute that hospitality staff, especially in the front office, must possess to project a good image?
- (A) A serious and formal demeanor
 - (B) A smiling face and cheerful attitude
 - (C) An introverted and quiet personality
 - (D) A highly competitive nature

Ans :

(B) A smiling face and cheerful attitude
The text repeatedly emphasizes that a smiling face and a cheerful attitude are essential competencies for hospitality staff. This projects a welcoming image and contributes significantly to guest satisfaction and the overall perception of the establishment.

- 140.** The management function concerned with guiding, leading, and motivating employees to perform their tasks effectively is known as:
- (A) Organising
 - (B) Staffing
 - (C) Directing
 - (D) Evaluating

Ans :

(C) Directing
Directing is the management function that involves guiding and overseeing the performance of workers. It includes leadership, motivation, and communication to ensure that employees are working effectively towards the organization's goals.

- 141.** The increasing trend of 'medical tourism' contributes to the growth of the hospitality industry because:
- (A) People traveling for healthcare need places to stay.
 - (B) Hospitals are now being converted into luxury hotels.
 - (C) Doctors are now required to work in hotel management.
 - (D) Hotels are offering advanced surgical procedures.

Ans :

(A) People traveling for healthcare need places to stay.
Medical tourism involves people traveling to other places, often internationally, to seek healthcare. These individuals, and often their families,

require accommodation during their treatment and recovery, thus driving demand for hospitality services.

- 142.** What is the main responsibility of the 'public area brigade' within the housekeeping department?
- (A) To clean and maintain all the guest rooms.
 - (B) To maintain the cleanliness of the hotel's exterior and garden.
 - (C) To wash and manage all the hotel's linen and uniforms.
 - (D) To maintain the cleanliness of the foyer, lobby, and other common areas.

Ans :

(D) To maintain the cleanliness of the foyer, lobby, and other common areas.
The public area brigade is the section of housekeeping specifically tasked with maintaining the cleanliness of the hotel's public areas, such as the foyer, lobby, front office area, and other common spaces accessible to all guests.

- 143.** A hotel guest requests a taxi to the airport for an early morning flight. Which department would typically handle this request?
- (A) Housekeeping
 - (B) Food and Beverage
 - (C) Front Office
 - (D) Human Resources

Ans :

(C) Front Office
The Front Office staff are responsible for assisting guests with various services, including providing information and coordinating external services. Arranging transport, such as a taxi, for a guest is a standard function of the front office or concierge desk.

- 144.** In a large hotel kitchen, the 'soups section' is a part of which broader category of food preparation?
- (A) Pantry
 - (B) Confectionery
 - (C) Butchery
 - (D) Hot range

Ans :

(D) Hot range
The 'hot range' is the area of the kitchen where cooking with heat takes place. A specialized soups section would be a part of this broader 'hot' kitchen area, responsible for preparing all hot soups for service.

department. This involves the judicious use of manpower, materials, money, time, and other resources to ensure the department runs efficiently and effectively.

- 167.** Which of the following is a primary function of the housekeeping department?
- (A) Registering guests and assigning them rooms.
 - (B) Preparing and serving food in the restaurant.
 - (C) Preparing and settling the final bills for guests.
 - (D) Cleaning of public areas and guestrooms, and upkeep of laundry.

Ans :

(D) Cleaning of public areas and guestrooms, and upkeep of laundry.

The prime function of the housekeeping department is to maintain cleanliness and hygiene. This includes the cleaning of guestrooms and public areas, as well as the supply and upkeep of laundry and uniforms for the entire establishment.

- 168.** The housekeeping staff member who is responsible for the actual cleaning of guest rooms and bathrooms is the:
- (A) Room Attendant
 - (B) Desk Control Supervisor
 - (C) Public Area Supervisor
 - (D) Houseman

Ans :

(A) Room Attendant

Within the housekeeping department, the room attendant is the staff member who performs the actual cleaning of the guest rooms and bathrooms, ensuring they are prepared and maintained to the hotel's standards for each guest.

- 169.** Why is it essential for the housekeeping department to coordinate with the front office?
- (A) To get information on guest departures so that vacated rooms can be cleaned promptly.
 - (B) To help the front office staff prepare the guests' final bills.
 - (C) To assist the kitchen in preparing meals for the restaurant.
 - (D) To design the marketing campaigns for the hotel.

Ans :

(A) To get information on guest departures so that vacated rooms can be cleaned promptly.

The housekeeping department must coordinate closely with the front office. The front office

provides information about guest departures, which allows the housekeeping team to get the vacated rooms cleaned and ready for the next arrival.

- 170.** The section within the housekeeping department that is responsible for providing clean linen to the entire establishment and uniforms to all staff is the:
- (A) Guestroom Brigade
 - (B) Public Area Brigade
 - (C) Linen and Uniform Room
 - (D) Horticulture Section

Ans :

(C) Linen and Uniform Room

The linen and uniform room is a key section of the housekeeping department. It coordinates with the laundry and is responsible for providing clean linen to all parts of the hotel and clean uniforms to all staff members.

Direction : Read the following case study and answer the following questions.

A business traveler, Mr. Khan, goes through the entire "Guest Cycle" during his stay at a hotel. His journey begins a week before his trip, in the 'Pre-arrival' stage, when he calls the hotel's reservation department to book a room. On the day of his travel, he arrives at the hotel. This 'Arrival' stage involves him being greeted, registering at the front desk, and being assigned his room key. For the next three days, he is in the 'Occupancy' stage, where he uses the hotel's services, including room service for meals, the business center for meetings, and the laundry service for his clothes. The hotel staff ensures his needs are met and his stay is comfortable. On the final day, he enters the 'Departure' stage. He calls the front office to prepare his bill, checks out at the front office desk, settles his payment with the cashier, and leaves the hotel. The hotel maintains a record of his stay and preferences, known as a 'guest history', to provide better service on his future visits.

- 171.** What are the four stages of the "Guest Cycle" in the correct order?
- (A) Arrival, Occupancy, Departure, Pre-arrival.
 - (B) Pre-arrival, Arrival, Occupancy, Departure.
 - (C) Occupancy, Departure, Pre-arrival, Arrival.
 - (D) Departure, Pre-arrival, Arrival, Occupancy.

Ans :

(B) Pre-arrival, Arrival, Occupancy, Departure.

The “Guest Cycle” consists of four distinct stages that occur in a specific order. It begins with the Pre-arrival stage, followed by the Arrival stage, then the Occupancy stage, and finally concludes with the Departure stage.

- 172.** The activity of booking a room, which happens before the guest physically arrives at the hotel, is part of which stage?

(A) Pre-arrival stage
(B) Arrival stage
(C) Occupancy stage
(D) Departure stage

Ans :

(A) Pre-arrival stage

The guest cycle starts even before the guest steps into the hotel. The Pre-arrival stage includes activities like inquiring about rates and reserving a room, which are handled by the reservation department.

- 173.** The final stage of the guest cycle, where the guest checks out and settles their bill, is known as the:

(A) Arrival stage
(B) Occupancy stage
(C) Pre-arrival stage
(D) Departure stage

Ans :

(D) Departure stage

Departure is the final stage of the guest cycle. This is when the guest is ready to leave or “check-out” of the accommodation, which involves settling their final bill with the front office cashier.

- 174.** During which stage is ensuring guest satisfaction the main focus to encourage repeat visits?

(A) Pre-arrival stage
(B) Arrival stage
(C) Occupancy stage
(D) Departure stage

Ans :

(C) The Occupancy stage

During the Occupancy stage, guest satisfaction is the main focus. The goal is to provide excellent service to encourage the guest to patronize the establishment again, thereby obtaining and retaining ‘customer loyalty’.

- 175.** The department that is largely responsible for managing all four stages of the guest cycle is the:

(A) Front Office Department
(B) Housekeeping Department

(C) Food and Beverages Department
(D) Engineering Department

Ans :

(A) The Front Office Department

The guest cycle falls largely under the domain of the Front Office. This department handles reservations (Pre-arrival), registration (Arrival), coordination of guest services (Occupancy), and check-out (Departure), making it central to the entire guest experience.

Direction : Read the following case study and answer the following questions.

A large hotel is hosting a wedding banquet for 300 guests. The success of the event depends heavily on the efficient functioning of the Food and Beverages department. The Executive Chef and his kitchen team are responsible for preparing a wide variety of dishes as per the menu. In a separate but coordinated area, the Kitchen Stewarding department is working to ensure that there is a clean and ready supply of all the necessary cutlery, crockery, and glassware for the event. The Restaurant Manager is leading a team of waiters and assistant waiters who are responsible for the actual service of food and beverages to the guests in the banquet hall. They must be courteous, efficient, and have a thorough knowledge of how to serve the food. The entire operation requires seamless coordination between the kitchen (production), the service staff (service), and the stewarding department (support) to ensure the guests have a high-quality dining experience.

- 176.** The department concerned with the storage, maintenance, cleanliness, and issue of cutlery, crockery, and glassware is the:

(A) Kitchen
(B) Restaurant
(C) Front Office
(D) Kitchen Stewarding

Ans :

(D) Kitchen Stewarding

The Kitchen Stewarding department is responsible for the storage, maintenance, and cleanliness of all cutlery, crockery, and glassware. It is also responsible for washing the pots and pans used in the kitchen.

- 177.** Who is the head of the kitchen, responsible for planning, organizing, and controlling all kitchen operations?

- (A) The Restaurant Manager
- (B) The Executive Chef (Chef-de-cuisine)
- (C) The Kitchen Steward
- (D) The Waiter

Ans :

(B) The Executive Chef (Chef-de-cuisine)
The Executive Chef, also known as the Chef-de-cuisine, is the head of the kitchen. They are responsible for managing all aspects of the kitchen's operations, including planning menus and controlling food preparation.

- 178.** The staff member who leads a team of waiters and is responsible for the overall functioning of a restaurant is the:
- (A) Restaurant Manager
 - (B) Executive Chef
 - (C) Front Office Manager
 - (D) Executive Housekeeper

Ans :

(A) Restaurant Manager
The Restaurant Manager is responsible for the overall functioning of a restaurant. This includes leading the service team of waiters and supervisors and ensuring that high standards of cleanliness, hygiene, and service are maintained.

- 179.** What are the three main components of the Food and Beverages department's operations?
- (A) Production (Kitchen), Service (Restaurant), and Support (Stewarding).
 - (B) Check-in, Check-out, and Room Service.
 - (C) Cleaning, Laundry, and Flower Arrangement.
 - (D) Marketing, Sales, and Finance.

Ans :

(A) Production (Kitchen), Service (Restaurant), and Support (Stewarding).
The Food and Beverages department involves several relevant service areas. These can be broadly categorized as the kitchen for food production, the restaurant for service, and the stewarding department which provides essential support.

- 180.** What are the essential competencies required for staff working in the Food and Beverages service department?
- (A) Only knowledge of cooking techniques.
 - (B) Only physical strength for lifting heavy items.
 - (C) High standards of grooming, hygiene, good manners, and etiquette.
 - (D) Expertise in financial accounting and auditing.

Ans :

(C) High standards of grooming, hygiene, good manners, and etiquette.

Staff working in this department must maintain high standards of grooming, hygiene, and sanitation. They must also possess good manners, basic etiquette, and a courteous demeanor to interact effectively with guests.

Direction : Read the following case study and answer the following questions.

A tourist, arriving late at night, checks into a hotel. He is greeted by the Night Auditor, who is part of the front office team. The Night Auditor handles his check-in smoothly. The next morning, the tourist needs to make an urgent international call and gets assistance from the hotel's Telephone Operator. Later, he wants to store his valuables and is helped by the front office staff to use the safety deposit box. He then asks the receptionist for information about local sightseeing spots. Throughout his stay, he observes that all the front office staff, from the doorman to the cashier, are impeccably groomed, wearing clean and neatly pressed uniforms. They are always smiling, courteous, and communicate effectively. This high standard of personal presentation and professional conduct projects a very positive image of the hotel. He realizes that for the front office team, who are the primary point of contact for guests, these personal competencies are just as important as their technical skills in managing hotel operations.

- 181.** Which department's staff are expected to have the highest standards of grooming, hygiene, and communication skills, as they are the first point of contact for guests?
- (A) The Front Office Department
 - (B) The Engineering Department
 - (C) The Finance Department
 - (D) The Kitchen Department

Ans :

(A) The Front Office Department
The front office staff must be seen at their best at all times, as they project the image of the establishment. Essential competencies include being well-groomed, having good hygiene, and possessing excellent communication skills.

- 182.** The staff member responsible for providing information and communicating with in-house guests and visitors over the phone is the:

- 201.** Which staff member is specifically responsible for supervising the bellboys and all baggage movement?
- (A) The Front Office Manager
 - (B) The Receptionist
 - (C) The Bell Captain
 - (D) The Front Office Cashier

Ans :

- (C) The Bell Captain

The Bell Captain is a supervisory role in the front office. Their duties include organizing and controlling all uniformed services, particularly supervising the bellboys and managing all baggage movement during guest check-ins and check-outs.

- 202.** The task of reserving, registering, and assigning rooms to guests is the primary function of the:
- (A) Front Office Manager
 - (B) Receptionist (Front Office Agent)
 - (C) Telephone Operator
 - (D) Doorman

Ans :

- (B) The Receptionist (Front Office Agent)

The Receptionist, also known as the Front Office Agent, is responsible for several key tasks. These include reserving rooms, registering guests upon arrival, assigning them rooms, and providing necessary information during their stay.

- 203.** Who is the first member of the hotel staff to greet a guest upon their arrival at the hotel entrance?
- (A) The General Manager
 - (B) The Bellboy
 - (C) The Front Office Cashier
 - (D) The Doorman

Ans :

- (D) The Doorman

The Doorman is positioned at the entrance of the hotel and is responsible for welcoming guests upon their arrival. They are often the very first point of personal contact a guest has with the hotel staff.

- 204.** The person responsible for managing all the front office activities, scheduling staff shifts, and coordinating with other departments is the:
- (A) Front Office Manager
 - (B) Assistant Manager - Front Office
 - (C) Front Office Supervisor
 - (D) Lobby Manager

Ans :

- (A) The Front Office Manager

The Front Office Manager is responsible for managing the entire front office and lobby activities. Their duties include scheduling staff shifts, coordinating with other departments, and overseeing the smooth functioning of all front office operations.

- 205.** The distinct roles within the front office demonstrate what kind of organizational principle?

- (A) A lack of any clear structure or hierarchy.
- (B) A clear division of labor and responsibilities.
- (C) A system where every employee performs the same task.
- (D) A department with no need for teamwork or coordination.

Ans :

- (B) A clear division of labor and responsibilities.

The organizational chart of a front office shows a clear division of labor. Each position has specific functions and duties, which helps in the efficient and systematic handling of the department's diverse responsibilities.

Direction : Read the following case study and answer the following questions.

An aspiring hotelier is learning about the different management functions required to run a hospitality organization efficiently. She studies the five key functions: planning, organizing, staffing, directing, and controlling. She understands that 'planning' involves setting the hotel's goals and deciding on the best course of action to achieve them. 'Organizing' is about arranging the necessary resources, such as manpower and materials, and creating a structure of authority and responsibility. 'Staffing' involves the recruitment, selection, and training of the right people for the right jobs. 'Directing' is the process of guiding and motivating the employees to perform their tasks effectively. Finally, 'controlling' is the function of monitoring performance, comparing it with the set standards, and taking corrective action if needed. She realizes that a successful hotel manager must be proficient in all these functions to ensure the smooth operation of the organization and the achievement of its goals.

- 206.** The management function that involves setting goals and deciding on the course of action to achieve them is:

- (A) Organizing
- (B) Staffing

the public areas of the hotel. This includes the main entrance, lobby, offices, banquet halls, and restaurants.

- 187.** Who performs the heavy cleaning activities in the hotel, such as vacuuming, mopping, and shifting furniture?

(A) The Room Attendant
(B) The Housemen
(C) The Floor Supervisor
(D) The Florist/Gardner

Ans :

(B) The Housemen

The Housemen are the staff members within the housekeeping department who are responsible for performing the heavy cleaning activities. This includes tasks like vacuuming carpets, mopping floors, and shifting furniture as needed.

- 188.** In the housekeeping department's hierarchy, who is responsible for the cleanliness of guest rooms, corridors, and staircases on a specific floor?

(A) The Executive Housekeeper
(B) The Assistant Housekeeper
(C) The Linen Room Supervisor
(D) The Floor Supervisor

Ans :

(D) The Floor Supervisor

In a large hotel, there is typically one supervisor for each floor. This Floor Supervisor is responsible for ensuring the cleanliness and maintenance of the guest rooms, corridors, staircases, and floor pantries on their designated floor.

- 189.** The organizational structure and hierarchy of a hotel's housekeeping department may vary depending on what?

(A) The size of the hotel and the number of rooms.
(B) The number of restaurants the hotel has.
(C) The location of the hotel's front office.
(D) The type of food served in the kitchen.

Ans :

(A) The size of the hotel and the number of rooms. The organizational structure and staff hierarchy of a housekeeping department can vary from one hotel to another. The size of the hotel and the volume of work are major factors that determine the structure and number of staff.

- 190.** The person responsible for maintaining the garden and doing flower arrangements in various parts of the hotel is the:

(A) Interior Decorator
(B) Head Houseman
(C) Florist/Gardner
(D) Public Area Supervisor

Ans :

(C) The Florist/Gardner

The Florist/Gardner is the specialized staff member in the housekeeping department who is responsible for maintaining the hotel's landscape and garden. They also create the flower arrangements for various areas within the hotel.

Direction : Read the following case study and answer the following questions.

A family is on a road trip across the country. For their overnight stays, they look for establishments that are conveniently located near the highway and provide a safe place to park their car. They often choose to stay at motels. These establishments provide them with a comfortable room for lodging and, most importantly, have a parking facility right next to the room, often with the room door opening out onto the parking lot. This makes it very easy for them to load and unload their luggage from the car. While some motels offer basic food services, the family knows that these establishments are primarily designed for travelers on the move and may not have the extensive range of amenities, like multiple restaurants or recreational facilities, that one would find in a large hotel or a resort. This specific type of establishment perfectly suits their need for convenient and accessible accommodation during their journey.

- 191.** An establishment that provides services like a hotel but also offers a parking facility near the room, often with the door opening onto the parking lot, is called a:

(A) Motel
(B) Hotel
(C) Lodge
(D) Resort

Ans :

(A) A Motel

A motel provides services similar to a hotel. Its distinguishing feature is that it also provides a parking facility near the guest room, and often the room door opens out directly onto the parking lot.

CHAPTER 12

CONSUMER EDUCATION AND PROTECTION

SUMMARY

1. INTRODUCTION

Every person is a consumer, purchasing a variety of goods and services to satisfy their needs and desires. However, consumers often face problems such as receiving poor quality goods or being charged unfair prices. Consumer education is therefore essential to empower individuals to be alert and efficient consumers, ensuring they receive maximum satisfaction for their spending.

2. SIGNIFICANCE OF CONSUMER EDUCATION AND PROTECTION

With industrialization and globalization, the market is flooded with an increasing number of products, making it difficult for consumers to make informed choices. Consumers face numerous challenges, including deceptive marketing, exploitation, and misleading advertisements. In this environment, it has become critical for consumers to be careful, alert, and well-informed. The level of a country's development is often indicated by its level of consumer awareness and protection.

3. BASIC CONCEPTS

A **Consumer** is defined as the final buyer of goods and services for the satisfaction of personal needs. Other key terms include **consumer product** (any article produced for sale to a consumer), **consumer behaviour** (the decision-making process for purchases), and **consumer forum** (an organization where consumers can discuss products and seek protection).

3.1 Major Problems Faced by Consumers

Consumers often encounter several issues in the marketplace:

- **Substandard/Poor Quality Goods:** Difficulty in identifying poor quality products among numerous manufacturers.
- **Adulteration:** The intentional or unintentional addition or removal of substances from a product, which alters its quality and can be harmful to health.
- **High Prices:** Retailers may overcharge uninformed consumers.
- **Lack of Information:** Many consumers are unaware of their rights, responsibilities, and the laws designed to protect them.
- **Inadequate or Erroneous Information:** This includes deceptive labels, uninformative advertisements, and misleading packaging.
- **Incorrect Weights and Measures:** Retailers may alter scales or use deceptive measures, causing consumers to receive less than what they paid for.
- **Spurious/Duplicate Products:** Consumers can be confused and cheated by imitation products that mimic well-known brands but are of poor quality.
- **Deceptive Sales Promotion Schemes:** Enticing offers like “exchange offers” or lucky draws are not always genuine and can mislead consumers.
- **Poor Services:** Consumers also face grievances with services from public utilities (water, electricity), banks, and poor after-sales support.

3.2 Eco-friendly Production and Green Consumption

There is a growing emphasis on sustainability, with green marketing providing consumers with products that are more aligned with nature, produce less waste, and conserve resources.

Ans :

(B) An environmental conservation and eco-friendly practice.

In many modern hotels, the staff is trained for environmental conservation. This includes adopting eco-friendly practices like using organic linen and non-toxic, biodegradable detergents to reduce the hotel's impact on the environment.

- 197.** What is the primary purpose of placing cards in rooms urging guests to reuse their towels?
- (A) To save natural resources like water and reduce the use of detergent.
 - (B) To discourage guests from using the towels provided by the hotel.
 - (C) To find out which guests are willing to follow instructions.
 - (D) To reduce the workload of the room attendants.

Ans :

(A) To save natural resources like water and reduce the use of detergent.

Many hotels place cards in rooms urging guests to reuse towels. The purpose of this practice is to promote the saving of natural resources like water and also to reduce the amount of detergent used for laundering.

- 198.** Using energy-efficient light bulbs in all guest rooms helps the hotel to:
- (A) Increase its electricity bill.
 - (B) Provide brighter lighting than conventional bulbs.
 - (C) Make the rooms look more colorful.
 - (D) Save electricity and reduce its energy consumption.

Ans :

(D) Save electricity and reduce its energy consumption.

A simple eco-friendly practice that hotels can adopt is the use of energy-efficient light bulbs in all their rooms. This can significantly help in saving electricity and reducing the hotel's overall energy consumption.

- 199.** Which department is primarily responsible for implementing these eco-friendly practices related to linen, cleaning, and room amenities?
- (A) The Front Office Department
 - (B) The Food and Beverages Department
 - (C) The Housekeeping Department
 - (D) The Sales and Marketing Department

Ans :

(C) The Housekeeping Department

The housekeeping department is responsible for the cleaning of rooms, laundering of linen, and managing room amenities. Therefore, implementing eco-friendly practices in these areas falls directly under the purview of this department.

- 200.** The adoption of such “green” practices can be beneficial for the hotel's business because:
- (A) It appeals to a growing number of environmentally conscious travelers.
 - (B) It significantly increases the hotel's operational costs.
 - (C) It has no impact on the hotel's public image or brand reputation.
 - (D) It is a mandatory legal requirement enforced by the government.

Ans :

(A) It appeals to a growing number of environmentally conscious travelers.

Besides being good for the environment, adopting green practices can be a smart business move. It can enhance the hotel's image and appeal to the increasing number of travelers who are concerned about environmental issues.

Direction : Read the following case study and answer the following questions.

The manager of a hotel's front office is conducting a training session for new recruits. He emphasizes that the front office is the “nerve center” of the hotel and that their performance is critical to guest satisfaction. He outlines the distinct roles within his team. The Receptionist, or Front Office Agent, is responsible for reserving, registering, and assigning rooms to guests. The Front Office Cashier handles the guests' accounts, maintaining their bills and receiving payments at check-out. The Telephone Operator manages all incoming and outgoing calls and provides information. The Bell Captain supervises the bellboys, who are responsible for handling guest luggage during check-in and check-out. Finally, the Doorman is the first point of contact, welcoming guests as they arrive. The manager stresses that while each role is distinct, seamless teamwork and coordination among all these staff members are essential for the smooth functioning of the front office and for creating a positive guest experience.

- (A) Bell Captain
- (B) Front Office Cashier
- (C) Telephone Operator
- (D) Doorman

Ans :

(C) The Telephone Operator

The Telephone Operator or Information Assistant is the staff member in the front office who is responsible for providing information and handling communications with guests and visitors, primarily through the hotel's telephone system.

- 183.** The a cheerful attitude, self-discipline, courtesy, and physical fitness are all examples of what?
- (A) Essential technical skills for operating hotel software.
 - (B) Essential competencies required to work in the hospitality industry.
 - (C) Requirements for working in the hotel's finance department.
 - (D) Skills needed only for the hotel's security staff.

Ans :

(B) Essential competencies required to work in the hospitality industry.

The staff in the hospitality industry, especially in the front office, need to have certain essential competencies. These include a cheerful attitude, self-discipline, courtesy, physical fitness, and good communication skills to project a positive image.

- 184.** The front office staff member responsible for maintaining guests' bills and receiving payments during check-out is the:
- (A) Receptionist (Front Office Agent)
 - (B) Lobby Manager
 - (C) Bellboy
 - (D) Front Office Cashier

Ans :

(D) The Front Office Cashier

The Front Office Cashier has the specific responsibility of maintaining the bills for each guest. They are also responsible for receiving payments from the guests when they are ready to check out from the hotel.

- 185.** The hotel staff's impeccable personal presentation, including a clean and neatly pressed uniform and minimum accessories, projects a good image of what?

- (A) Not only of themselves but also of the establishment.
- (B) Only of themselves as individuals.
- (C) Only of the hotel's laundry department.
- (D) Only of the country's fashion industry.

Ans :

(B) Not only of themselves but also of the establishment.

The front office staff must always be at their best because their appearance and conduct project a good image not only of themselves as professionals but also of the entire hotel or establishment they represent.

Direction : Read the following case study and answer the following questions.

The management of a newly opened hotel is setting up its housekeeping department. They understand that to run the department efficiently, they need a well-defined organizational structure with clear roles and responsibilities. They appoint an Executive Housekeeper to head the department. Reporting to her is an Assistant Housekeeper who manages shifts. The department is then divided into several sections. A Floor Supervisor is appointed for each floor, responsible for the cleanliness of guest rooms and corridors. Room Attendants work under the supervisor to do the actual cleaning. A separate Public Area Supervisor is made responsible for maintaining the lobby, restaurants, and other common areas, with a team of Housemen to do the heavy cleaning. They also hire a specialized Florist/Gardner for landscape maintenance and flower arrangements. A Linen Room Supervisor is tasked with managing all the hotel's linen and uniforms. This hierarchical structure ensures that all housekeeping functions are carried out systematically and to a high standard.

- 186.** The staff member responsible for the cleanliness of public areas like the main entrance, corridors, and restaurants is the:

- (A) Floor Supervisor
- (B) Room Attendant
- (C) Public Area Supervisor
- (D) Desk Control Supervisor

Ans :

(C) Public Area Supervisor

The Public Area Supervisor is specifically responsible for maintaining the cleanliness of all

- (C) Planning
- (D) Controlling

Ans :

- (C) Planning

Planning is the fundamental management function that involves deciding in advance what needs to be done. This includes setting the goals for the institution and determining the best course of action to achieve them.

- 207.** The process of recruiting, selecting, and training employees for various roles in the hotel is part of which management function?

- (A) Staffing
- (B) Planning
- (C) Organizing
- (D) Evaluating

Ans :

- (A) Staffing

Staffing is the management function concerned with finding the right people for the right jobs within the organization. This includes the processes of recruitment, selection, placement, and training of employees.

- 208.** When a manager monitors the hotel's performance, compares it with the established standards, and takes corrective action, they are performing which function?

- (A) Planning
- (B) Organizing
- (C) Directing
- (D) Controlling

Ans :

- (D) Controlling

Controlling is the management function that involves evaluating performance to ensure that the plans and objectives are being met. It includes monitoring results, comparing them with standards, and taking corrective measures when necessary.

- 209.** Arranging the necessary resources and creating a structure of authority and responsibility within the hotel is the function of:

- (A) Planning
- (B) Organizing
- (C) Directing
- (D) Evaluating

Ans :

- (B) Organizing

The function of organizing involves arranging and allocating resources, both human and material, to carry out the planned activities. This includes creating a structure of authority and responsibility within the organization.

- 210.** Guiding and motivating employees to perform their tasks effectively towards the achievement of the hotel's goals is known as:

- (A) Staffing
- (B) Controlling
- (C) Directing
- (D) Planning

Ans :

- (C) Directing

Directing is the management function that involves guiding, leading, and motivating the employees. An effective manager directs their team in a manner that encourages them to perform their best to accomplish the organizational goals.

- 192.** What is the primary target audience for motels?
- (A) Guests seeking a luxury vacation experience with many amenities.
 - (B) Travelers on road trips who need convenient overnight accommodation.
 - (C) People seeking long-term furnished accommodation for several months.
 - (D) Business travelers who need extensive conference and meeting facilities.

Ans :

(B) A travelers on road trips who need convenient overnight accommodation.

Motels are designed to cater primarily to motorists. Their convenient location near highways and the easy access from the parking lot to the room make them a popular choice for travelers who are on the road.

- 193.** What is a key difference between a full-service hotel and a lodge?
- (A) A hotel is smaller than a lodge.
 - (B) A hotel provides only food, while a lodge provides only rooms.
 - (C) A lodge always has more recreational facilities than a hotel.
 - (D) A lodge offers rented accommodation for sleeping and may not offer food and other services, unlike a hotel.

Ans :

(D) A lodge offers rented accommodation for sleeping and may not offer food and other services, unlike a hotel.

A lodge is a type of establishment that primarily offers rented accommodation, especially for sleeping. Unlike a hotel, it may not offer other services like food, which is a key distinguishing factor.

- 194.** The hospitality industry has grown to provide guests with what kind of experience?
- (A) A “Home Away From Home” experience.
 - (B) An experience that is completely different from their home environment.
 - (C) An experience focused only on business and work.
 - (D) An experience that is uncomfortable and unsafe.

Ans :

(A) A “Home Away From Home” experience.
The hospitality industry aims to provide tourists with comforts and facilities that are similar or

close enough to what they are accustomed to at home. The goal is to create a comfortable and welcoming “Home Away From Home”.

- 195.** The rise in the number of establishments like hotels, motels, and resorts is driven by an increase in what activity?
- (A) The number of people working from home.
 - (B) The production of agricultural goods.
 - (C) People traveling for reasons like business, tourism, and health care.
 - (D) The number of students enrolling in online courses.

Ans :

(C) People traveling for reasons like business, tourism, and health care.

The growth of the hospitality industry is directly linked to the increase in travel. People travel for many reasons, including business, official purposes, pilgrimages, leisure, and medical tourism, all of which creates a demand for accommodation.

Direction : Read the following case study and answer the following questions.

A hotel has decided to implement several eco-friendly practices in its housekeeping department as part of its commitment to environmental conservation. The Executive Housekeeper leads this initiative. The hotel switches to using 100% organic cotton bed sheets, which are produced without harmful pesticides. For laundering, they adopt a new process that uses non-toxic, water-based, and biodegradable detergents. They also install energy-efficient light bulbs in all guest rooms to reduce electricity consumption. To conserve water and reduce the laundry load, they place small cards in each room. These cards politely urge guests to consider reusing their towels for more than one day, explaining that this simple action helps save significant amounts of water and detergent. This “green” approach not only helps the hotel reduce its environmental footprint but also appeals to a growing number of eco-conscious travelers, enhancing the hotel’s public image.

- 196.** The hotel’s initiative to use organic cotton sheets and biodegradable detergents is an example of:
- (A) A cost-cutting measure that reduces quality.
 - (B) An environmental conservation and eco-friendly practice.
 - (C) A marketing gimmick with no real impact.
 - (D) A standard practice followed by all hotels for decades.

3.3 Consumer Rights under the Consumer Protection Act

The **Consumer Protection Act (CPA) of 1986**, now replaced by the CPA 2019, is a significant piece of legislation designed to protect consumers from fraudulent trade practices and provide simple, speedy, and inexpensive redressal for their grievances. The Act establishes six fundamental consumer rights:

- **Right to Safety:** To be protected against products and services that are hazardous to health or life.
- **Right to be Informed:** To have information about the quality, quantity, purity, and price of goods and services.
- **Right to Choose:** To have access to a variety of products at competitive prices.
- **Right to be Heard:** To have consumer interests receive due consideration in appropriate forums.
- **Right to Seek Redressal:** To get fair settlement for genuine grievances and compensation for faulty goods.
- **Right to Consumer Education:** To acquire the knowledge and skills needed to be an informed consumer.

3.4 Standardisation Marks for Consumer Protection

Standardization marks help consumers ensure the quality and purity of products. Key marks include:

- **ISI Mark:** From the Bureau of Indian Standards (BIS) for various products, including some foods and electrical goods.
- **AGMARK:** For agricultural products, ensuring reliability.
- **FPO (Fruit Product Order):** Sets minimum quality standards for fruit and vegetable products.
- **Woolmark:** Certifies that a garment is made of pure wool.
- **Silk Mark:** A quality assurance label for 100% natural silk.
- **Hallmark:** Certifies the purity of precious metals like gold and silver.
- **Ecomark:** An earthen pot logo indicating an environment-friendly product.
- **FSSAI:** The Food Safety and Standards Authority of India sets science-based standards for food articles.

3.5 Consumer Responsibilities

With rights come responsibilities. Consumers have a duty to:

- Stay updated on consumer protection laws.
- Be honest in all their dealings.
- Conduct market surveys to compare brands and prices before purchasing.
- Read all information on labels and in brochures.
- Purchase products with standardization marks for quality assurance.
- Keep receipts and other relevant documents as proof of purchase.
- Be aware of consumer organizations and the benefits they offer.

4. SKILLS REQUIRED FOR CAREER IN CONSUMER STUDIES FIELD

A career in this field requires a combination of technical knowledge and soft skills. Professionals must have a thorough understanding of consumer protection laws, quality standards, and adulteration detection methods. Additionally, they need good communication and interpersonal skills, an empathetic attitude, creativity for developing awareness programs, and strong writing skills for educational materials. Educational qualifications can be obtained through degree programs in Home Science, Resource Management, or Business Administration.

5. SCOPE

Training in consumer education and protection opens up a variety of career paths:

- Working in government organizations like the Bureau of Indian Standards or the Ministry of Consumer Affairs.
- Joining voluntary consumer organizations to work on product testing, consumer awareness, or publications.
- Working in the consumer division of corporate houses, managing complaints and customer relationships.
- Working with market research organizations.
- Starting an independent consumer organization or consultancy.
- Working as a content developer for consumer awareness campaigns in media.

- (A) To promote the export of Indian food products.
- (B) To set prices for all packaged food items in India.
- (C) To provide cooking classes to the general public.
- (D) To regulate the manufacture and sale of food for human consumption.

Ans :

(D) To regulate the manufacture and sale of food for human consumption.

FSSAI's role is to lay down science-based standards for food articles and to regulate their manufacture, storage, distribution, and sale to ensure their safety for human consumption.

- 51.** Match the standardisation mark in Column I with the corresponding product category in Column II.

	Column I		Column II
1.	ISI Mark	a.	Pure wool garments
2.	AGMARK	b.	Processed fruit products
3.	FPO	c.	Electrical goods
4.	Wool-mark	d.	Agricultural produce

- (A) 1-c, 2-d, 3-b, 4-a
- (B) 1-d, 2-c, 3-a, 4-b
- (C) 1-b, 2-a, 3-d, 4-c
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-c, 2-d, 3-b, 4-a

Based on the text, ISI Mark is for products like electrical goods, AGMARK for agricultural produce, FPO for processed fruit products, and Wool-mark for pure wool garments.

- 52.** Which type of organization is highlighted for playing a crucial role in consumer education and protection due to their non-partisan interests?
- (A) Large multinational corporations
 - (B) Government-owned manufacturing units
 - (C) Non-governmental organisations (NGOs)
 - (D) Retailer and wholesaler associations

Ans :

- (C) Non-governmental organisations (NGOs)

The text states that Non-governmental organisations (NGOs)/voluntary organisations play an important role in consumer education and protection because of their non-partisan interests.

- 53.** Which of the following activities are undertaken by non-governmental consumer organisations?
- I. Comparative testing of products.
 - II. Disseminating information about new legislative provisions.
 - III. Handling consumer grievances and complaints.
 - IV. Enforcing mandatory fines on manufacturers.

- (A) I and II only
- (B) I, II and III only
- (C) II, III and IV only
- (D) I, II, III and IV

Ans :

- (B) I, II and III only

The text lists comparative product testing, disseminating information, legal advice, and handling grievances as functions of consumer NGOs. Enforcing mandatory fines is a government/judiciary function.

- 54.** Which consumer organisation based in Delhi is known for publishing 'Consumer Voice'?
- (A) VOICE
 - (B) CERC
 - (C) Consumers Union
 - (D) Australian Consumers Association

Ans :

- (A) VOICE

The text explicitly mentions that VOICE, a Delhi-based consumer organisation, is the publisher of the magazine 'Consumer Voice'.

- 55.** What is presented as a fundamental responsibility for every consumer?
- (A) To buy the most expensive product available.
 - (B) To regularly update their knowledge of consumer laws.
 - (C) To trust every advertisement without question.
 - (D) To avoid complaining about faulty products.

Ans :

- (B) To regularly update their knowledge of consumer laws.

The first consumer responsibility listed is that consumers should be responsible for regularly updating their knowledge of the various laws and legislative provisions made by the government for their protection.

- 56.** Which of the following actions is highlighted as a key responsibility for a consumer to undertake before making a purchase?

A 'consumer product' is defined as any article that is produced or distributed for sale to a consumer for personal, family, institutional, or business use, covering a wide range of purposes.

7. What does the term 'consumer behaviour' describe?

- (A) The process through which a buyer makes purchase decisions.
- (B) The process by which manufacturers set product prices.
- (C) The legal framework that protects consumer rights.
- (D) The methods used by retailers to display their products.

Ans :

(A) The process through which a buyer makes purchase decisions.

The text defines consumer behaviour as the specific process through which a buyer makes decisions about what goods or services to purchase to satisfy their needs and wants.

8. What is the primary function of a 'consumer forum'?

- (A) To set the maximum retail price for all consumer goods.
- (B) To manufacture and sell government-approved products.
- (C) To provide direct financial loans to consumers for purchases.
- (D) To serve as an advocacy group protecting consumer interests.

Ans :

(D) To serve as an advocacy group protecting consumer interests.

A consumer forum is described as an organization where consumers can discuss products and services. Some forums act as advocacy groups that work to protect consumers and help them address problems.

9. What is the meaning of the term 'consumer footfalls'?

- (A) The total value of goods purchased by consumers.
- (B) The number of complaints filed by consumers.
- (C) The number of customers who visit a store or a mall.
- (D) The average distance a consumer travels to shop.

Ans :

(C) The number of customers who visit a store or a mall.

'Consumer footfalls' is a term used to mean the number of customers or consumers who visit a specific retail space, such as a store or a mall, indicating the volume of potential buyers.

10. Consider the following consumer expectations:

- I. Receiving genuine goods and services.
- II. Paying a reasonable price for products.
- III. Being charged based on correct weights and measures.

Which of the above are listed as expectations a consumer has when making a purchase?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II, and III

Ans :

(D) I, II, and III

The diagram in the text explicitly lists that consumers expect genuine goods, reasonable prices, and correct weights and measures, among other things, when they purchase products or services.

11. What is a key reason consumers find it difficult to identify poor quality products?

- (A) All products are made by a single manufacturer.
- (B) Manufacturers use different materials, and quality varies.
- (C) All consumers are knowledgeable about quality standards.
- (D) Government standards eliminate all poor quality goods.

Ans :

(B) Manufacturers use different materials, and quality varies.

The text points out that because various manufacturers can make the same product using different materials, the quality can vary significantly, making it difficult for an average consumer to judge.

12. When is a substance considered to be adulterated?

- (A) When its price is increased by the retailer.
- (B) When its packaging is changed to be more attractive.
- (C) When its composition or quality is altered by addition or removal.
- (D) When it is sold under a different brand name.

MULTIPLE CHOICE QUESTION

1. Every human being is considered a natural consumer primarily because they do what?
- (A) Produce a variety of goods and services
 - (B) Engage in the marketing of products
 - (C) Purchase goods and services to satisfy needs
 - (D) Regulate the quality of market products

Ans :

(C) Purchase goods and services to satisfy needs
The text establishes that all of us are consumers because we purchase a variety of goods and services to satisfy our personal needs and desires, making consumption a fundamental human activity.

2. What has been a primary consequence of India's economic changes, such as industrialisation and globalisation, for its citizens?
- (A) A decrease in the variety of available products
 - (B) An improved standard of living and increased buying power
 - (C) A reduction in the need for consumer education
 - (D) Stagnation in the growth of the consumer market

Ans :

(B) An improved standard of living and increased buying power
According to the text, economic changes like industrialization and globalization have led to an improved standard of living for the people, which is accompanied by an increase in their purchasing power.

3. Which statement accurately describes the relationship between manufacturers and consumers in the modern market?
- (A) Manufacturers can take consumers for granted without consequence.
 - (B) Consumer opinion is irrelevant to a company's reputation and profits.
 - (C) Manufacturers must respect and satisfy consumers for their own success.
 - (D) Consumers have no right to redressal if a product is faulty.

Ans :

(C) Manufacturers must respect and satisfy consumers for their own success.
The text clearly states that manufacturers have realized the importance of respecting and satisfying

the consumer, as the company's reputation and profits are determined by consumer opinion.

4. What is the main challenge for consumers in a 'global village' with global markets?
- (A) The availability of products is severely limited.
 - (B) There is no need to understand the economic system.
 - (C) Government protection makes consumer alertness unnecessary.
 - (D) They must become a progressive force to ensure their welfare.

Ans :

(D) They must become a progressive force to ensure their welfare.
The text explains that the move towards a 'global economy' requires consumers to emerge as a progressive force to ensure their own welfare, necessitating a global outlook and understanding.

5. How are 'consumers' defined in the context of the chapter?
- (A) The final buyers of goods and services for personal use.
 - (B) Individuals who produce and distribute goods for sale.
 - (C) The marketing professionals who advertise new products.
 - (D) Government agencies that regulate market practices.

Ans :

(A) The final buyers of goods and services for personal use.
The chapter defines consumers as the final buyers of goods and services, who purchase them for the satisfaction of their personal needs and wants, ranging from natural products to market services.

6. Which of the following best defines a 'consumer product'?
- (A) An item used only during the manufacturing process.
 - (B) An article produced or distributed for sale to a consumer.
 - (C) A service provided exclusively by government agencies.
 - (D) A raw material before it has been processed for sale.

Ans :

(B) An article produced or distributed for sale to a consumer.

(C) Altering weights and scales or using them incorrectly

The text highlights that consumers can be cheated by incorrect weights and measures because retailers either alter the weights and scales or use correct measures incorrectly, resulting in the consumer receiving less quantity.

- 19.** How do spurious and duplicate products typically deceive consumers?
- (A) By imitating the packaging and name of well-known brands.
 - (B) By being of a much higher quality than the original.
 - (C) By having a completely different name and packaging.
 - (D) By being sold only through authorized government stores.

Ans :

(A) By imitating the packaging and name of well-known brands.

The chapter explains that consumers are confused and cheated by spurious products that are duplicates of well-known brands, often using similar packaging, color schemes, and sounding brand names to mislead buyers.

- 20.** A mobile phone company launches a new model with a “free screen protector” offer, but many customers find the offer is not genuine or comes with hidden costs. This is an example of which consumer problem?
- (A) Substandard quality goods
 - (B) Misleading sales promotion schemes
 - (C) Spurious or duplicate products
 - (D) Incorrect weights and measures

Ans :

(B) Misleading sales promotion schemes

This situation illustrates the problem of sales promotion schemes that are not always genuine and deceive the consumer. Companies use enticing offers to sway consumers, who then fall prey to them.

- 21.** In addition to the consumption of physical products, in which other area do consumers frequently face problems and grievances?
- (A) The production process of goods
 - (B) The use of a wide variety of services
 - (C) The export of goods to other countries
 - (D) The internal management of companies

Ans :

(B) The use of a wide variety of services

The text explicitly states that consumers face problems not only with products but also when they use a wide variety of services, such as those from public utilities, banks, and insurance companies.

- 22.** What is the fundamental goal of ‘green marketing’?
- (A) To provide consumers with products that are less in tune with nature.
 - (B) To increase the use of raw materials and create more waste.
 - (C) To focus exclusively on marketing to urban consumers.
 - (D) To offer products that are more environment friendly.

Ans :

(D) To offer products that are more environment friendly.

The concept of green marketing is related to providing consumers with products that are more in tune with nature, create less waste, use fewer raw materials, and save other resources, promoting sustainability.

- 23.** Which Act is credited as the landmark legislation that formally established six key consumer rights in India?
- (A) The Consumer Protection Act, 1986
 - (B) The Indian Contract Act, 1872
 - (C) The Sale of Goods Act, 1930
 - (D) The Essential Commodities Act, 1955

Ans :

(A) The Consumer Protection Act, 1986

The text identifies the Consumer Protection Act (CPA) of 1986 as the landmark legislation through which the Government of India accepted, established, and enshrined the six fundamental consumer rights.

- 24.** Which of the following statements best describes the primary function of the Consumer Protection Act (CPA)?
- (A) To control the production levels of all manufacturers.
 - (B) To set prices for all goods and services in the market.
 - (C) To protect consumers from fraudulent trade practices.
 - (D) To provide financial assistance to businesses.

Ans :

(C) To protect consumers from fraudulent trade practices.

The text states that the main function of the CPA is to protect consumers from fraudulent trade practices prevalent in the marketplace and to provide redressal for their grievances.

- 25.** The Consumer Protection Act is fundamentally based on which principle?
- (A) Caveat emptor (let the buyer beware)
 - (B) The principle of self-help
 - (C) The principle of government control
 - (D) Laissez-faire (let the market decide)

Ans :

(B) The principle of self-help

The chapter explicitly states that the Consumer Protection Act is based on the principle of self-help, empowering consumers to protect themselves against exploitation and unfair dealings in the marketplace.

- 26.** What are the two main implications of the Consumer Protection Act for a consumer?
- (A) The right to set prices and the right to inspect factories.
 - (B) The obligation to buy only Indian products and services.
 - (C) The obligation to file a complaint for every purchase.
 - (D) The right to complain and the right to claim compensation.

Ans :

(D) The right to complain and the right to claim compensation.

The Act's two key implications are that it gives the consumer the right to complain to an authority for speedy redressal and the right to claim compensation for loss or injury due to negligence.

- 27.** What is mentioned as a key highlight of the new Consumer Protection Act (CPA), 2019, which replaced the 1986 Act?
- (A) Removal of all penalties for misleading advertisements.
 - (B) Loosening of rules for e-commerce providers.
 - (C) Introduction of a central regulator and strict penalties.
 - (D) Limiting consumer rights to only physical goods.

Ans :

(C) Introduction of a central regulator and strict penalties.

The text highlights that the CPA 2019 introduced a central regulator, imposed strict penalties for misleading advertisements, and provided guidelines for e-commerce, thereby tightening the existing rules.

- 28.** What protection is afforded to a consumer under the 'Right to Safety'?
- (A) Protection against products hazardous to health or life.
 - (B) Protection against high prices of goods and services.
 - (C) Protection against a lack of choices in the market.
 - (D) Protection against misleading advertisements on television.

Ans :

(A) Protection against products hazardous to health or life.

The 'Right to Safety' refers to the right to be protected against products, production processes, and services that are hazardous and can cause harm to the health or life of the consumer.

- 29.** If a consumer purchases a pressure cooker that has a defective safety valve and it bursts, causing injury, the manufacturer has violated the consumer's:
- (A) Right to Choose
 - (B) Right to be Heard
 - (C) Right to Consumer Education
 - (D) Right to Safety

Ans :

(D) Right to Safety

This scenario is a direct violation of the 'Right to Safety,' which protects consumers against products that are hazardous to their life and health. A defective pressure cooker poses a direct safety risk.

- 30.** What information is a consumer entitled to under the 'Right to be Informed'?
- (A) Information about the manufacturer's profit margins.
 - (B) Information about the personal details of the seller.
 - (C) Information about the quality, quantity, and price of goods.
 - (D) Information about the salaries of the company's employees.

Ans :

(C) Information about the quality, quantity, and price of goods.

The 'Right to be Informed' means the right to be given facts about the quality, quantity, potency, purity, standard, and price of goods and services to protect against unfair trade practices.

- 31.** A retailer sells a packaged juice without mentioning its price or expiry date on the label. This action is a clear violation of which consumer right?
- (A) Right to Safety
 - (B) Right to Choose
 - (C) Right to be Heard
 - (D) Right to be Informed

Ans :

(D) Right to be Informed

Failing to provide crucial information like price and expiry date on a product's label directly infringes upon the consumer's 'Right to be Informed' about the goods they are purchasing.

- 32.** The 'Right to Choose' primarily implies that a consumer has the right to:
- (A) Access products of varying quality at competitive prices.
 - (B) Get any product for free if they complain about it.
 - (C) Dictate the production methods of a company.
 - (D) Choose only from a single brand offered by a seller.

Ans :

(A) Access products of varying quality at competitive prices.

The 'Right to Choose' ensures that every buyer has access to a variety of products of different qualities, quantities, prices, and designs at competitive prices, allowing them to select what best fits their needs.

- 33.** An internet service provider insists that a customer must buy a specific, overpriced router from them to get a connection, leaving no other option. This violates the consumer's:
- (A) Right to Redressal
 - (B) Right to Choose
 - (C) Right to Safety
 - (D) Right to Consumer Education

Ans :

(B) Right to Choose

Forcing a consumer to buy a specific product as a precondition for a service limits their freedom to select from competitive options, which is a direct violation of the 'Right to Choose'.

- 34.** What is the core principle of the 'Right to be Heard'?
- (A) The consumer's opinion must always be accepted as final.
 - (B) The consumer's interests will receive due consideration at appropriate forums.
 - (C) The consumer has the right to interrupt any business meeting.
 - (D) The consumer should be heard only in a court of law.

Ans :

(B) The consumer's interests will receive due consideration at appropriate forums.

The 'Right to be Heard' means that the interests of consumers will be given due consideration at appropriate forums, and it also includes the right to be represented in bodies working for consumer welfare.

- 35.** Which entities are expected to provide forums for consumers to exercise their 'Right to be Heard'?
- (A) Only international corporations
 - (B) Only small retail shop owners
 - (C) Both the state and voluntary agencies
 - (D) Only the manufacturers of goods

Ans :

(C) Both the state and voluntary agencies

The text specifies that to enable consumers to exercise their 'Right to be Heard', both the state (government) and voluntary agencies (NGOs) are expected to provide the necessary forums.

- 36.** The 'Right to Seek Redressal' gives a consumer the power to do what?
- (A) Seek redressal against unfair trade practices or exploitation.
 - (B) Set the punishment for a seller without any trial.
 - (C) Demand a refund for a product they simply did not like.
 - (D) Physically confiscate goods from a dishonest seller.

Ans :

(A) Seek redressal against unfair trade practices or exploitation.

This right allows every consumer to seek redressal against unfair trade practices or any form of

Ans :

(C) When its composition or quality is altered by addition or removal.

Adulteration is defined as the process where substances are either added to or removed from a product, which consequently alters its composition, nature, or quality, often making it inferior or harmful.

13. According to the text, which of the following factors does NOT influence the prices of products?
- (A) The consumer's personal income level
 - (B) The government's policy and market location
 - (C) The costs of promotion and advertising
 - (D) The method of distribution and delivery system

Ans :

(A) The consumer's personal income level

The text lists government policy, availability, quality, delivery system, market location, promotion costs, purchase method, and consumer's desire for convenience as factors influencing price, but not the consumer's personal income.

14. Which of the following statements about product pricing is presented as incorrect in the chapter?
- (A) A higher price always indicates a higher quality product.
 - (B) Prices for the same quality goods can vary between sellers.
 - (C) Some suppliers may overcharge uninformed customers.
 - (D) Production costs and overhead expenses influence prices.

Ans :

(A) A higher price always indicates a higher quality product.

The text explicitly states that some consumers tend to relate price to quality, "though it is not necessary," indicating that a high price does not always guarantee high quality.

15. What is identified as a significant problem with the information provided on most product labels?
- (A) They provide too much technical information.
 - (B) They are always factually correct and complete.
 - (C) They fail to give complete essential information.
 - (D) They are printed in languages nobody understands.

Ans :

(C) They fail to give complete essential information.

The text states that most labels fail to give complete essential information and often use terminologies that a common consumer is unable to understand, making them inadequate.

16. Why are advertisements often considered an inadequate source of consumer information?
- (A) They are too long and detailed for the average consumer.
 - (B) They are legally required to provide all product details.
 - (C) They focus only on the negative aspects of a product.
 - (D) They are not informative and focus on persuasion over facts.

Ans :

(D) They are not informative and focus on persuasion over facts.

The chapter explains that advertisements are generally not informative and are limited in their ability to answer essential questions about a product's qualities, care, or after-sales service.

17. A company launches a new bottle for its existing shampoo and advertises it as a "new look" to attract customers, even though the shampoo formula is unchanged. This marketing strategy is an example of which consumer problem?
- (A) Using packaging as a potent marketing tool
 - (B) Adulteration
 - (C) Incorrect weights and measures
 - (D) Lack of after-sales service

Ans :

(A) Using packaging as a potent marketing tool

This scenario exemplifies the problem of using packaging as a marketing tool. The text notes that manufacturers repackage existing products into attractive packs to entice consumers, even when the product quality remains the same.

18. What is a common method used by some retailers to deceive consumers regarding the quantity of a product?
- (A) Using government-certified weights and scales
 - (B) Providing extra quantity for the same price
 - (C) Altering weights and scales or using them incorrectly
 - (D) Clearly stating the net weight on the package

Ans :

- 43.** Which of the following pairs of a standardisation mark and the product it certifies is correctly matched?
- (A) ISI mark - Precious metal jewellery
 - (B) FPO mark - Electrical appliances
 - (C) Wool-mark - Pure silk fabrics
 - (C) AGMARK - Agricultural products

Ans :

(A) AGMARK - Agricultural products
The text specifies that the AGMARK seal pertains to agricultural products, ensuring their reliability. The other pairs are mismatched with their respective product categories as described in the chapter.

- 44.** What assurance does the AGMARK seal provide to a consumer buying an agricultural product?
- (A) The product is imported.
 - (B) The product is the cheapest available.
 - (C) The product is reliable.
 - (D) The product is tax-exempt.

Ans :

(C) The product is reliable.
The text clearly states that a consumer should look for the AGMARK seal before purchasing any agricultural product as it “ensures product reliability,” indicating a standard of quality.

- 45.** The Fruit Product Order (FPO) mark primarily establishes minimum standards for which category of products?
- (A) Dairy products and milk
 - (B) Meat and poultry products
 - (C) Cereal and soya products
 - (D) Fruit and vegetable products

Ans :

(D) Fruit and vegetable products
The FPO mark is specifically for fruit and vegetable products, laying down statutory minimum standards for their quality and the facilities where they are processed.

- 46.** What does the presence of the Wool-mark on a garment signify to the consumer?
- (A) The garment is made of a blend of wool and cotton.
 - (B) The garment is made of pure wool and not other fibers.
 - (C) The garment is suitable only for winter wear.
 - (D) The garment has been imported from Australia.

Ans :

(B) The garment is made of pure wool and not other fibers.
The Wool-mark is the standard mark for quality from the International Wool Secretariat, indicating that the wool used in the garment is pure and not mixed with other fibers.

- 47.** What specific assurance does the “Silk Mark” label provide to a consumer?

- (A) The silk is 100% natural silk.
- (B) The silk is artificially made.
- (C) The silk is a blended fabric.
- (D) The silk is of a specific color.

Ans :

(A) The silk is 100% natural silk.
The text defines the Silk Mark as a quality assurance label that ensures the product is made of ‘100% natural silk’, serving as a brand for the promotion of pure silk.

- 48.** What does the “Hallmark” on a gold or silver article certify?

- (A) The design of the article is unique.
- (B) The article was made by a specific artisan.
- (C) The metal conforms to a standard of purity.
- (D) The article is exempt from all taxes.

Ans :

(C) The metal conforms to a standard of purity.
The Hallmark indicates that the precious metal article has been tested at an official Hallmarking Centre and certified to conform to national or international standards of fineness/purity.

- 49.** What does the Ecomark logo, an earthen pot, signify about a product?

- (A) The product is fragile and should be handled with care.
- (B) The product is environment friendly and biodegradable.
- (C) The product is handmade by rural artisans.
- (D) The product is meant only for storing water.

Ans :

(B) The product is environment friendly and biodegradable.
The Ecomark scheme’s logo, an earthen pot, signifies that the labeled product is environment friendly, does not produce hazardous waste, and is biodegradable or can be recycled.

- 50.** What is the primary function of the Food Safety and Standards Authority of India (FSSAI)?

unscrupulous exploitation, including the right to a fair settlement of genuine grievances.

- 37.** Your new laptop malfunctions within the warranty period. The company refuses to honour the warranty. Which right empowers you to take action and demand a repair, replacement, or refund?

(A) Right to Safety
(B) Right to be Informed
(C) Right to Seek Redressal
(D) Right to Choose

Ans :

(C) Right to Seek Redressal

The 'Right to Seek Redressal' is the right that specifically covers situations like this, as it includes the right to receive compensation for faulty goods and services, which would include honouring a warranty.

- 38.** What is the primary objective of the 'Right to Consumer Education'?

(A) To ensure every consumer gets a postgraduate degree.
(B) To make manufacturers educate their own employees.
(C) To provide free textbooks to all shoppers in a market.
(D) To enable a person to acquire the skill to be an informed consumer.

Ans :

(D) To enable a person to acquire the skill to be an informed consumer.

This right refers to every person's right to acquire the necessary knowledge and skills to be an informed consumer, which empowers them to make wise purchasing decisions and protect their interests.

- 39.** How does the 'Right to Consumer Education' ultimately empower consumers?

(A) It provides them with financial aid to buy expensive products.
(B) It enables them to solve problems themselves through knowledge.
(C) It gives them the authority to close down any business.
(D) It guarantees them a job in the consumer protection field.

Ans :

(B) It enables them to solve problems themselves through knowledge.

The text implies that this right empowers consumers by educating them enough to be able to solve problems themselves, making them self-reliant and less vulnerable to exploitation in the marketplace.

- 40.** Assertion (A): It is advisable for consumers to purchase products that carry a standardisation mark.

Reason (R): Standardisation marks serve as an assurance of the product's quality and/or purity.

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The text explicitly states that consumers must purchase products with standardisation marks to ensure quality/purity. Therefore, the mark's assurance of quality is the direct reason for the advice.

- 41.** What was the previous name of the Bureau of Indian Standards (BIS)?

(A) Indian Quality Institution (IQI)
(B) National Standards Bureau (NSB)
(C) Indian Standards Institution (ISI)
(D) Directorate of Indian Standards (DIS)

Ans :

(C) Indian Standards Institution (ISI)

The chapter clearly mentions that the Bureau of Indian Standards (BIS) was earlier called the Indian Standards Institution (ISI), whose mark is still widely recognized.

- 42.** The BIS standards are mentioned to cover all the following product categories EXCEPT:

(A) Electrical goods
(B) Soaps and detergents
(C) Processed foods
(D) Real estate properties

Ans :

(D) Real estate properties

The text lists food items, electrical goods, soaps, detergents, paints, and paper as being covered by BIS standards, but there is no mention of real estate or properties.

- (A) Immediately buy the first product they see.
- (B) Avoid reading the label to save time.
- (C) Conduct a market survey to compare brands and prices.
- (D) Bargain aggressively regardless of the listed price.

Ans :

(C) Conduct a market survey to compare brands and prices.

The text emphasizes that before purchasing, consumers should conduct a market survey to explore different brands, features, and prices available in various shops to help them make a wise choice.

- 57.** Why is it a crucial responsibility for consumers to keep receipts and other purchase documents?
- (A) To use them for tax evasion purposes.
 - (B) To show off their purchasing power to others.
 - (C) To help the shopkeeper with their accounting.
 - (D) To serve as proof of purchase for filing complaints.

Ans :

(D) To serve as proof of purchase for filing complaints.

Keeping receipts and relevant documents is important because they may be needed as proof of purchase, which is essential for filing a complaint if a product turns out to be defective or malfunctioning.

- 58.** When a consumer is buying a credit card service, what is their primary responsibility regarding the agreement?
- (A) To sign the document without reading it to speed up the process.
 - (B) To read and understand all terms, conditions, and charges.
 - (C) To assume all terms are standard and not ask any questions.
 - (D) To negotiate for a lower interest rate than offered to anyone else.

Ans :

(B) To read and understand all terms, conditions, and charges.

The text states that for services like credit cards, the consumer should read and understand all terms and conditions, liabilities, and service charges, and get clarifications on any unclear points.

- 59.** Besides knowledge about protection mechanisms, what other category of skills is essential for a career in the consumer studies field?
- (A) Soft skills like communication
 - (B) Advanced mathematical skills
 - (C) Athletic and physical skills
 - (D) Manual and technical repair skills

Ans :

(A) Soft skills like communication

The text clearly states that to be successful in the field, one needs knowledge about consumer protection mechanisms and also soft skills like good communication, interpersonal skills, and an empathetic attitude.

- 60.** For which specific task is having good writing skills particularly important for a professional in the consumer studies field?
- (A) For calculating the financial profits of a company.
 - (B) For repairing defective electronic consumer goods.
 - (C) For developing educational material and reporting tests.
 - (D) For physically inspecting manufacturing facilities.

Ans :

(C) For developing educational material and reporting tests.

The text highlights that writing skills are needed for developing educational material for consumer education and for reporting the results of consumer tests conducted on various products.

- 61.** A professional in the consumer studies field must have thorough knowledge about which of the following product-related aspects?
- (A) The secret manufacturing formulas of all products.
 - (B) The personal lives of company CEOs.
 - (C) The logistics of international shipping routes.
 - (D) Quality standards and detection of adulterants.

Ans :

(D) Quality standards and detection of adulterants.

The text specifies that a person entering this field must have thorough knowledge about quality standards of various products, adulteration, and the detection of adulterants to be effective.

Ans :

(B) Right to Safety - Ensures protection against hazardous goods.

The 'Right to Safety' is correctly defined as the right to be protected against products, processes, and services that are hazardous to health or life. The other pairs have incorrect descriptions.

109. What is the primary role of standardisation marks like ISI, AGMARK, and FPO for the consumer?

- (A) They serve as a mechanism of consumer protection.
- (B) They indicate that the product is a luxury item.
- (C) They are a form of advertisement for the brand.
- (D) They show that the product is exempt from taxation.

Ans :

(A) They serve as a mechanism of consumer protection.

The text introduces standardisation marks as "Another mechanism of consumer protection." By assuring quality and purity, these marks protect consumers from substandard or unsafe products.

110. Match the consumer problem in Column I with the relevant example in Column II.

	Column I		Column II
1.	Adulteration	a.	A "50% Off" sign on an already inflated price.
2.	Spurious Product	b.	Selling a lookalike phone with a famous brand's logo.
3.	Misleading Promotion	c.	Mixing papaya seeds in black pepper.
4.	Poor Service	d.	A technician failing to repair a product under warranty.

- (A) 1-b, 2-d, 3-a, 4-c
- (B) 1-d, 2-a, 3-c, 4-b
- (C) 1-c, 2-b, 3-a, 4-d
- (D) 1-a, 2-c, 3-d, 4-b

Ans :

(C) 1-c, 2-b, 3-a, 4-d

Mixing papaya seeds in pepper is adulteration. A lookalike phone is a spurious product. An inflated discount is a misleading promotion. Failure to repair under warranty is poor service.

111. Which consumer right is based on the idea that a person should acquire knowledge and skills to make wise decisions while purchasing?

- (A) Right to be Heard
- (B) Right to Consumer Education
- (C) Right to Seek Redressal
- (D) Right to Safety

Ans :

(B) Right to Consumer Education

The 'Right to Consumer Education' is explicitly defined as the right to acquire the knowledge and skill to be an informed consumer, enabling wise decision-making during purchases.

112. Which of the following statements about consumer rights is incorrect?

- (A) The Consumer Protection Act, 1986, enshrined six consumer rights.
- (B) The Right to be Informed includes knowing the price of goods.
- (C) The Right to Safety protects against hazardous products.
- (D) The Right to Choose means consumers can take goods for free.

Ans :

(D) The Right to Choose means consumers can take goods for free.

The 'Right to Choose' means having access to a variety of goods at competitive prices. It does not grant the right to take products for free; this is a misinterpretation of the right.

113. Which of the following are responsibilities of a consumer?

- I. To pay for all purchases honestly.
 - II. To read the label before buying.
 - III. To keep the receipt as proof of purchase.
 - IV. To buy products with standardisation marks.
- (A) I and III only
 - (B) II, III and IV only
 - (C) I, II and IV only
 - (D) I, II, III and IV

Ans :

(D) I, II, III and IV

The text lists all four actions—being honest, reading labels, keeping receipts, and looking for standardisation marks—as key responsibilities that a consumer should undertake.

(D) Broadcasting entertainment programs for consumers

Ans :

(C) Offering consumer counselling and redressal help

A career avenue described is working in the National Consumer Helpline, which involves consumer counselling and helping people get redressal for their complaints.

69. What is the primary role of a freelance consultant specializing in consumer redressal guidance?

(A) To represent manufacturers in consumer courts.

(B) To sell products on behalf of companies.

(C) To set the quality standards for consumer goods.

(D) To guide consumers through courts and other redressal mechanisms.

Ans :

(D) To guide consumers through courts and other redressal mechanisms.

The text suggests one can function as a freelance consultant for redressal guidance through consumer courts and other alternative redressal mechanisms, implying a role in guiding and assisting consumers.

70. A consumer studies professional who creates content for “Jago Grahak Jago” advertisements in newspapers and on TV would likely be working with which government department?

(A) Department of Audio-visual Publicity

(B) Department of Agriculture

(C) Department of Health and Family Welfare

(D) Department of Space

Ans :

(A) Department of Audio-visual Publicity

The text mentions working with the Department of Audio-visual Publicity as a content developer for advertisements dealing with consumer awareness and education in both print and electronic media.

71. Assertion (A): The Consumer Protection Act, 1986, is regarded as a landmark piece of legislation for consumers in India.

Reason (R): The Act’s provisions are applicable only to goods and do not cover any type of service.

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).

(C) (A) is true but (R) is false.

(D) (A) is false but (R) is true.

Ans :

(C) (A) is true but (R) is false.

Assertion (A) is true as the Act is called a landmark legislation. However, Reason (R) is false because the text explicitly states the Act “applies to all goods and services”.

72. Match the Consumer Right in Column I with its correct description in Column II.

	Column I		Column II
1.	Right to Safety	a.	To have access to products at competitive prices.
2.	Right to Choose	b.	To be protected against hazardous goods.
3.	Right to be Heard	c.	To acquire knowledge to be an informed consumer.
4.	Right to Consumer Education	d.	For interests to receive due consideration.

(A) 1-b, 2-a, 3-d, 4-c

(B) 1-d, 2-c, 3-a, 4-b

(C) 1-c, 2-d, 3-b, 4-a

(D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-b, 2-a, 3-d, 4-c

The descriptions correctly match the rights: Safety with protection from hazardous goods, Choose with access to competitive products, Heard with due consideration for interests, and Consumer Education with acquiring knowledge.

73. Which of the following pairs of a consumer organisation and its publication is incorrectly matched based on the text?

(A) VOICE (Delhi) - ‘Consumer Voice’

(B) CERC (Ahmedabad) - ‘Insight’

(C) Consumers Union (US) - ‘Choice’

(D) Consumer Association (UK) - ‘Which’

Ans :

(C) Consumers Union (US) - ‘Choice’

The text states that the Consumers Union in the US brings out ‘Consumer Reports’, and the Australian Consumers Association brings out ‘Choice’. Therefore, the pair Consumers Union (US) and ‘Choice’ is incorrect.

- 62.** Which of the following is NOT mentioned in the text as a typical undergraduate degree path for a career in consumer studies?
- (A) B.Sc. Home Science
 - (B) Bachelor of Business Administration (B.B.A.)
 - (C) Bachelor of Engineering (B.E.)
 - (D) B.Sc. Family Resource Management

Ans :

(C) Bachelor of Engineering (B.E.)

The text lists B.Sc. Home Science, B.Sc. Family Resource Management, B.B.A., and B.B.S. as relevant degree courses. A Bachelor of Engineering is not mentioned in this specific context.

- 63.** In which of the following government organisations could a consumer studies graduate potentially work in a managerial or technical position?
- (A) The Indian Space Research Organisation (ISRO)
 - (B) The Bureau of Indian Standards (BIS)
 - (C) The Archaeological Survey of India (ASI)
 - (D) The Indian Council of Medical Research (ICMR)

Ans :

(B) The Bureau of Indian Standards (BIS)

The text explicitly lists the Bureau of Indian Standards (BIS) as a government organization where one could work in various decision-making, managerial, and technical positions with a background in consumer studies.

- 64.** What is identified as a key role a professional can play when employed by a voluntary consumer organisation?
- (A) Setting mandatory government policies
 - (B) Investing the organisation's funds in the stock market
 - (C) Product testing and creating consumer awareness
 - (D) Issuing manufacturing licenses to companies

Ans :

(C) Product testing and creating consumer awareness

The scope of work in a voluntary consumer organisation is described to include activities like product testing, creating consumer awareness, consumer education, empowerment, and publishing magazines.

- 65.** Within a large company, which division is typically responsible for handling consumer complaints and managing customer relationships?

- (A) The Finance and Accounts division
- (B) The Human Resources division
- (C) The Production and Engineering division
- (D) The Consumer division or Customer Relationship Management

Ans :

(D) The Consumer division or Customer Relationship Management

A career option listed is working in the Consumer division of corporate houses, which deals with consumer complaints and suggestions, or in the customer relationship management and facilitation division.

- 66.** A graduate with a consumer studies degree is hired to conduct surveys and analyze data on why a new biscuit brand is not popular among children. In which type of organization is this person most likely working?
- (A) A market research organisation
 - (B) A government tax department
 - (C) A hospital or healthcare facility
 - (D) A construction and infrastructure company

Ans :

(A) A market research organisation

This task aligns perfectly with the career option of working with market research organisations in areas of consumer behaviour, product reach, and consumer acceptance of new products.

- 67.** What entrepreneurial opportunity is suggested for an individual trained in consumer education and protection?
- (A) Starting their own manufacturing company
 - (B) Starting their own consumer organisation
 - (C) Opening a retail store for luxury goods
 - (D) Creating a new financial banking system

Ans :

(B) Starting their own consumer organisation

The text explicitly mentions that a potential career path is to "Start your own consumer organisation dealing with the issues discussed in the chapter," presenting a direct entrepreneurial opportunity.

- 68.** What is the primary function of the National Consumer Helpline as mentioned as a career option?
- (A) Providing direct loans to consumers
 - (B) Selling standardized products online
 - (C) Offering consumer counselling and redressal help

(B) 1-b, 2-c, 3-a, 4-d

Hallmark certifies purity of precious metals. Silk Mark assures 100% natural silk. Ecomark signifies an environment-friendly product. FSSAI ensures food safety for consumption.

- 80.** Assertion (A): Attractive packaging can often lead consumers to make impulsive buying decisions.
Reason (R): Manufacturers utilize packaging as a powerful and effective marketing tool.

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The text states that attractive packages persuade consumers to make impulsive purchases. It also states that packaging is being used as a potent marketing tool. The use of packaging as a marketing tool is the reason it leads to impulsive buying.

- 81.** How can the relationship between consumer rights and consumer responsibilities be best described?
(A) Exercising rights is possible without any responsibilities.
(B) Rights and responsibilities are unrelated concepts.
(C) They are two sides of the same coin and go hand in hand.
(D) Responsibilities are more important than having any rights.

Ans :

(C) They are two sides of the same coin and go hand in hand.

The chapter emphasizes that rights and responsibilities go hand in hand. To be able to effectively exercise one's rights as a consumer, it is necessary to be aware of and fulfill one's duties and responsibilities.

- 82.** A consumer knowingly buys a cheap, counterfeit watch and then files a complaint that it is not a genuine brand. This action violates which primary consumer responsibility?
(A) The responsibility to be honest in all dealings.
(B) The responsibility to read the product label carefully.

(C) The responsibility to conduct a market survey first.

(D) The responsibility to keep the receipt of purchase.

Ans :

(A) The responsibility to be honest in all dealings. This act is a violation of the responsibility to be honest. The consumer is attempting to misuse the protection mechanism for a situation where they were a willing participant in purchasing a counterfeit item.

- 83.** What is the suggested primary action a consumer should take before making a purchase to ensure they make a wise choice?
(A) Buy the most advertised product.
(B) Ask for a discount on the product.
(C) Do a market survey of available items.
(D) Purchase from the nearest available shop.

Ans :

(C) Do a market survey of available items.

The text lists conducting a market survey as a key consumer responsibility. This involves finding out about different brands, features, and prices in various shops to make an informed and wise decision.

- 84.** Which statement accurately reflects a consumer's responsibility when making a purchase?
(A) The consumer should ignore the label to save time.
(B) The consumer should only buy products without standard marks.
(C) The consumer should discard receipts immediately after purchase.
(D) The consumer should feel free to choose as per their needs.

Ans :

(D) The consumer should feel free to choose as per their needs.

The text lists that consumers "should feel free to choose from the variety available as per their needs and requirements" as one of their key responsibilities, empowering them to make personal choices.

- 85.** All of the following are listed as consumer responsibilities EXCEPT:
(A) To be honest in all their dealings and pay for purchases.
(B) To read all the information given on the label or brochure.

Ans :

(D) Hallmark - Processed food products

The Hallmark is a certification for the purity of precious metals like gold and silver. It is not associated with processed food products. FSSAI and FPO are the marks for food items.

97. What is the ultimate goal of consumer education?
- (A) To encourage consumers to spend more money.
 - (B) To make consumers dependent on government help.
 - (C) To empower consumers to make wise and informed decisions.
 - (D) To limit the number of products available in the market.

Ans :

(C) To empower consumers to make wise and informed decisions.

The core purpose of consumer education, as described, is to equip individuals with the knowledge and skills needed to be informed consumers, enabling them to make wise choices and protect their interests.

98. Consider the following statements regarding the Consumer Protection Act (CPA), 2019:
- I. It replaced the older CPA, 1986.
 - II. It introduced guidelines for e-commerce.
 - III. It relaxed the penalties for misleading advertisements.
- Which of the statements is/are correct?
- (A) I only
 - (B) I and II only
 - (C) II and III only
 - (D) I, II, and III

Ans :

(B) I and II only

The text confirms that the CPA 2019 replaced the 1986 act and introduced guidelines for e-commerce. However, it imposed “strict penalties” for misleading ads, so statement III is incorrect.

99. You are tasked with creating a leaflet for a consumer awareness campaign. According to the project guidelines, which element is considered the most important part for first catching the reader’s eye?
- (A) The detailed text body.
 - (B) The list of references.
 - (C) The contact information.

(D) The leaflet heading.

Ans :

(D) The leaflet heading.

The project guidelines in the appendix state that the “leaflet heading is normally the most important part of the leaflet because it is the part that first catches the eye” and must be brief and forceful.

100. Why is it important for voluntary consumer organisations to be ‘non-partisan’?
- (A) To ensure their work is objective and not influenced by business or politics.
 - (B) To ensure they can charge high fees for their services.
 - (C) To make sure they only support products from one specific company.
 - (D) To allow them to ignore complaints from certain groups of people.

Ans :

(A) To ensure their work is objective and not influenced by business or politics.

Being non-partisan means not taking sides or being biased. This is crucial for a consumer organisation to maintain credibility and ensure its testing, reporting, and advocacy are objective and genuinely in the consumer’s interest.

101. Which of the six consumer rights specifically addresses the need for a fair settlement of genuine grievances?
- (A) Right to Safety
 - (B) Right to Choose
 - (C) Right to Seek Redressal
 - (D) Right to be Informed

Ans :

(C) Right to Seek Redressal

The ‘Right to Seek Redressal’ is defined as including the right to a fair settlement of genuine grievances and the right to receive compensation for faulty goods and services.

102. Which statement accurately describes the problem of ‘spurious products’?
- (A) They are high-quality original products sold at a discount.
 - (B) They are imitations of well-known brands, often of poor quality.
 - (C) They are products that have exceeded their expiry date.
 - (D) They are goods manufactured exclusively for export markets.

- 91.** A student develops a short video explaining the meaning of the 'Hallmark' on jewellery and shares it in the local community. This activity aligns with which career area in consumer studies?
- (A) Financial management
(B) Consumer education and awareness
(C) Product manufacturing
(D) Legal advocacy in court

Ans :

(B) Consumer education and awareness
This activity directly involves creating educational material to make consumers more informed, which is a core function of consumer education and awareness, a key career area mentioned in the text.

- 92.** The text suggests that with additional training and experience, a consumer studies professional can pursue careers related to:
- (A) Professional sports and coaching
(B) Culinary arts and restaurant management
(C) Insurance and financial portfolio management
(D) Fashion design and garment production

Ans :

(C) Insurance and financial portfolio management
The chapter concludes the scope section by stating that with further training and experience, one can move into careers related to insurance, shares, and financial portfolio management.

- 93.** Based on the career options discussed, what is the most likely role of a 'consumer activist'?
- (A) To work silently within a corporate house.
(B) To publicly advocate for consumer rights and file cases.
(C) To focus only on testing products in a laboratory.
(D) To manage financial investments for consumers.

Ans :

(B) To publicly advocate for consumer rights and file cases.

A consumer activist is someone who actively and publicly campaigns for consumer rights. The text mentions they can plead cases in Consumer Protection Courts, which implies a public advocacy role.

- 94.** Assertion (A): It is a consumer's responsibility to deal honestly and pay for all purchases made. Reason (R): Dishonest consumer practices can negatively impact the market and other honest buyers.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The responsibility to be honest (A) is crucial because dishonesty (like theft or fraudulent returns) imposes costs on businesses, which are often passed on to all consumers through higher prices (R).

- 95.** Match the career area in Column I with the most appropriate work description in Column II.

	Column I		Column II
1.	Market Research Organisation	a.	Helping people with their complaints over the phone.
2.	Corporate Consumer Division	b.	Analysing consumer acceptance of new products.
3.	National Consumer Helpline	c.	Creating awareness content for their magazine.
4.	Voluntary Consumer Organisation	d.	Handling consumer suggestions within a company.

- (A) 1-d, 2-c, 3-b, 4-a
(B) 1-c, 2-a, 3-d, 4-b
(C) 1-b, 2-d, 3-a, 4-c
(D) 1-a, 2-b, 3-c, 4-d

Ans :

(C) 1-b, 2-d, 3-a, 4-c

Market Research involves analyzing consumer acceptance. A Corporate Division handles internal suggestions. A Helpline assists over the phone. A Voluntary Organisation publishes awareness content.

- 96.** Which of the following pairs of a standardisation mark and its primary product domain is incorrectly matched?
- (A) ISI Mark - Industrial and consumer goods
(B) AGMARK - Agricultural produce
(C) FPO Mark - Fruit and vegetable products
(D) Hallmark - Processed food products

- 74.** Which of the following are listed in the chapter as responsibilities of a consumer?
- To be honest in all their dealings.
 - To feel free to choose from the variety available.
 - To buy products with standardisation marks.
- (A) I and II only
(B) II and III only
(C) I and III only
(D) I, II, and III

Ans :

(D) I, II, and III

The chapter lists being honest in dealings, feeling free to choose from variety, and buying products with standardisation marks as key consumer responsibilities.

- 75.** The chapter discusses all of the following as major problems faced by consumers EXCEPT:
- Adulteration of products
 - Lack of consumer information
 - High prices and incorrect measures
 - Over-availability of after-sales service

Ans :

(D) Over-availability of after-sales service

The text discusses adulteration, lack of information, high prices, and incorrect measures as problems. It mentions “poor after sales services,” not an over-availability.

- 76.** An advertisement for a holiday package shows beautiful pictures but hides the extra charges and taxes in very small, unreadable print. This practice is an example of what kind of consumer problem?
- Spurious products
 - Inadequate or erroneous information
 - Incorrect weights and measures
 - Substandard quality goods

Ans :

(B) Inadequate or erroneous information

This scenario is a classic example of providing inadequate or erroneous information. The advertisements are described as not being informative and can be misleading, which aligns with this problem.

- 77.** What is the primary reason for the increased importance of consumer education in the age of globalisation?
- Products have become simpler and easier to understand.

- The number of available products and sellers has decreased.
- Consumers face a larger, more complex market with more choices.
- All foreign companies provide superior quality goods.

Ans :

(C) Consumers face a larger, more complex market with more choices.

Globalisation has led to a large array of products from both national and multinational companies, making it more difficult to choose the right product and making the consumer more vulnerable to exploitation.

- 78.** Which two government bodies are specifically mentioned as looking after consumer interests through standardisation and marketing inspection?

- Ministry of Finance and Ministry of Defence
- Bureau of Indian Standards (BIS) and Directorate of Marketing and Inspection (DMI)
- Reserve Bank of India (RBI) and Securities and Exchange Board of India (SEBI)
- Ministry of Health and Ministry of Education

Ans :

(B) Bureau of Indian Standards (BIS) and Directorate of Marketing and Inspection (DMI)

The chapter names the Bureau of Indian Standards (BIS) and the Directorate of Marketing and Inspection (DMI) as statutory and semi-government bodies looking after consumer interests in this capacity.

- 79.** Match the standardisation mark in Column I with the primary assurance it provides in Column II.

	Column I		Column II
1.	Hallmark	a.	Environment friendly product
2.	Silk Mark	b.	Purity of precious metals
3.	Ecomark	c.	100% natural silk
4.	FSSAI	d.	Safety of food for human consumption

- 1-d, 2-a, 3-c, 4-b
- 1-b, 2-c, 3-a, 4-d
- 1-c, 2-b, 3-d, 4-a
- 1-a, 2-d, 3-b, 4-c

Ans :

Ans :

(B) They are imitations of well-known brands, often of poor quality.

The text defines spurious/duplicate products as imitations of well-known brands that confuse and cheat consumers, and are often of poor quality and may be unsafe to use.

- 103.** What is the primary danger of adulteration in food products, beyond the financial exploitation of the consumer?
- (A) It can improve the taste of the food product.
 - (B) It makes the product more expensive to manufacture.
 - (C) It usually increases the nutritional value of the product.
 - (D) It can cause harm to the health and safety of the consumer.

Ans :

(D) It can cause harm to the health and safety of the consumer.

The chapter highlights that adulteration is a serious problem not just because it's exploitative, but because it can be harmful to the consumer's health and safety, making it a critical issue.

- 104.** Assertion (A): The 'Right to Choose' is compromised when a seller insists on a tie-in sale. Reason (R): A tie-in sale restricts the consumer's ability to select products and services freely at competitive prices.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 - (C) (A) is true but (R) is false.
 - (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

A tie-in sale forces a consumer to buy an unwanted product to get a desired one. This directly restricts their freedom to choose from various options at competitive prices, which is the essence of the 'Right to Choose'.

- 105.** Which international standard mark is used to indicate the quality of pure wool or woolen garments?
- (A) Silk Mark
 - (B) Wool-mark
 - (C) Ecomark

(D) AGMARK

Ans :

(B) Wool-mark

The chapter identifies the Wool-mark as the standard mark of quality from the International Wool Secretariat, specifically for pure wool and woolen garments.

- 106.** A career in consumer studies could lead to working in all the following types of organisations EXCEPT:
- (A) Government bodies like the Directorate of Marketing and Inspection.
 - (B) Voluntary consumer organisations that publish magazines.
 - (C) Corporate houses in their customer relationship division.
 - (D) Political parties to manage their election campaigns.

Ans :

(D) Political parties to manage their election campaigns.

The text lists career options in government, NGOs, and corporate consumer divisions. It does not mention working for political campaigns, which is outside the scope of consumer protection.

- 107.** A consumer finds that a 1 kg packet of flour actually contains only 900 grams. This malpractice by the seller is a direct example of which consumer problem?
- (A) Substandard quality goods
 - (B) Misleading advertisements
 - (C) Incorrect weights and measures
 - (D) Adulteration of the product

Ans :

(C) Incorrect weights and measures

This scenario is a clear instance of the problem of incorrect weights and measures, where the consumer pays for a certain quantity but receives less due to deceptive practices by the seller.

- 108.** Which of the following pairs is correctly matched?
- (A) Right to be Heard - Guarantees a full refund for any product.
 - (B) Right to Safety - Ensures protection against hazardous goods.
 - (C) Right to Choose - Guarantees the lowest possible price.
 - (D) Right to be Informed - Provides free legal advice to all consumers.

- (C) To exclusively purchase the most expensive brand available.
- (D) To buy products with standardisation marks to be assured of quality.

Ans :

(C) To exclusively purchase the most expensive brand available.

The text outlines responsibilities like being honest, reading labels, and looking for standard marks. It does not state that a consumer has a responsibility to buy the most expensive item.

- 86.** To be successful in the field of consumer studies, what skills are required in addition to deep knowledge of the subject?
- (A) Good communication and interpersonal skills
 - (B) Advanced programming and coding skills
 - (C) Physical strength and athletic ability
 - (D) Architectural and engineering design skills

Ans :

(A) Good communication and interpersonal skills
The chapter explicitly states that a professional in this field needs soft skills like good communication, interpersonal skills, an empathetic attitude, and being a good listener, in addition to technical knowledge.

- 87.** Why is an 'empathetic and understanding attitude' considered a valuable skill for a consumer protection professional?
- (A) It helps in designing more attractive product packaging.
 - (B) It allows them to better understand and address consumer grievances.
 - (C) It is required for performing chemical tests on products.
 - (D) It helps in calculating the financial losses of a company.

Ans :

(B) It allows them to better understand and address consumer grievances.

An empathetic attitude is crucial for understanding the frustration and problems faced by consumers. This understanding allows the professional to handle grievances more effectively and provide better support and guidance.

- 88.** Besides consumer protection laws and rights, what other specific technical knowledge is essential for a professional in this field?
- (A) Knowledge of foreign languages and international politics.

- (B) Knowledge of advanced theoretical physics and chemistry.
- (C) Knowledge of ancient history and archaeological methods.
- (D) Knowledge of quality standards and adulterant detection.

Ans :

(D) Knowledge of quality standards and adulterant detection.

The text clearly mentions that a professional must have thorough knowledge about the quality standards of various products and the methods for the detection of adulterants to be effective in their role.

- 89.** Which of the following career options is mentioned as being part of the customer-facing division of a corporate house?
- (A) Managing the company's legal battles.
 - (B) Designing new products for the company.
 - (C) Handling consumer complaints and suggestions.
 - (D) Overseeing the manufacturing processes.

Ans :

(C) Handling consumer complaints and suggestions.

The chapter lists working in the "Consumer division of corporate houses which deal with consumer complaints and suggestions" as a viable career path for someone with a background in consumer studies.

- 90.** What is the primary objective of a professional engaged in 'product testing' for a voluntary consumer organisation?
- (A) To compare products and inform consumers objectively.
 - (B) To provide marketing material for the manufacturer.
 - (C) To find flaws in products to file lawsuits.
 - (D) To set the retail price for the tested products.

Ans :

(A) To compare products and inform consumers objectively.

Voluntary consumer organizations engage in comparative testing of products to provide unbiased information to consumers, helping them make informed choices and creating awareness about product quality and safety.

- 114.** An organisation is working to get consumer grievances published in newspapers and is providing legal advice for filing cases. This organisation is most likely a:
- (A) Government manufacturing unit
 - (B) For-profit multinational corporation
 - (C) Voluntary consumer organisation (NGO)
 - (D) Financial banking institution

Ans :

(C) Voluntary consumer organisation (NGO)
The activities described—media advocacy, legal advice, and handling grievances—are characteristic functions of voluntary consumer organisations (NGOs) as detailed in the chapter.

- 115.** What is the significance of the Consumer Protection Act applying to both “goods and services”?
- (A) It means consumers can only complain about goods.
 - (B) It broadens consumer protection beyond physical products.
 - (C) It means services are not covered under the act.
 - (D) It limits the act’s applicability to a few select items.

Ans :

(B) It broadens consumer protection beyond physical products.
By covering both goods and services, the Act’s protection extends to areas like banking, insurance, transport, electricity, etc., not just tangible products, making its scope much wider and more comprehensive.

- 116.** Assertion (A): The ‘Ecomark’ scheme is operated by the Bureau of Indian Standards (BIS).
Reason (R): The scheme’s logo, an earthen pot, signifies that the product is environment friendly.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 - (C) (A) is true but (R) is false.
 - (D) (A) is false but (R) is true.

Ans :

(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
Both statements are factually correct as per the text. However, the meaning of the logo (R) does

not explain why the BIS operates the scheme (A). They are two separate facts about the Ecomark.

- 117.** Which consumer right ensures that consumers’ interests receive due consideration in forums working for their welfare?
- (A) Right to be Heard
 - (B) Right to Choose
 - (C) Right to Safety
 - (D) Right to Redressal

Ans :

(A) Right to be Heard
The ‘Right to be Heard’ is specifically defined as the right ensuring that consumers’ interests will be given due consideration at appropriate forums, including representation in those forums.

- 118.** The text mentions various problems consumers face. Which of the following is NOT listed as one of these problems?
- (A) High prices charged by some sellers.
 - (B) Adulteration in food and other items.
 - (C) Spurious and duplicate products in the market.
 - (D) An excessive number of quality-testing laboratories.

Ans :

(D) An excessive number of quality-testing laboratories.
High prices, adulteration, and spurious products are explicitly listed as major consumer problems. An excess of quality-testing labs would be a benefit, not a problem for consumers.

- 119.** A person with a degree in consumer studies is hired to train school teachers on how to run “consumer clubs” effectively. This job role is best described as a:
- (A) Product designer
 - (B) Financial analyst
 - (C) Consultant for educational outreach
 - (D) Laboratory technician

Ans :

(C) Consultant for educational outreach
This scenario directly aligns with the career option mentioned in the text: “Work as consultants to consumer clubs being run by schools and colleges such as managing and planning their educative and outreach activities.”

- 120.** Which statement about standardisation marks is correct according to the chapter?

(C) Their tendency to be swayed by misleading information.

This is a classic example of a misleading advertisement that makes an unsubstantiated claim to entice consumers. It falls under the problem of inadequate or erroneous information provided by manufacturers.

156. Which of the following statements about consumer responsibilities is incorrect?

- (A) A consumer should feel free to choose from available options.
- (B) A consumer must always buy the product recommended by the seller.
- (C) A consumer should try to get the bill for every important purchase.
- (D) A consumer should be aware of organisations working for their welfare.

Ans :

(B) A consumer must always buy the product recommended by the seller.

A consumer's responsibility is to make their own informed choice. Blindly following a seller's recommendation without independent judgment is contrary to the idea of being an alert and wise consumer.

157. Which term refers to any article produced or distributed for sale to a consumer for personal, family, home, or institutional use?

- (A) Consumer behaviour
- (B) Consumer forum
- (C) Consumer footfall
- (D) Consumer product

Ans :

(D) Consumer product

This is the precise definition of a 'consumer product' as given in the 'Basic Concepts' section of the chapter. It covers a wide range of goods sold to an end user.

158. What is the main benefit for a consumer when there are many companies competing in the market?

- (A) Products become more expensive.
- (B) There are fewer products to choose from.
- (C) They can look for better products with competitive pricing.
- (D) The quality of all products decreases significantly.

Ans :

(C) They can look for better products with competitive pricing.

The text states that on the positive side, competition means the "Indian consumer has much to choose from and can look for better products with competitive pricing."

159. Which of the following are examples of "soft skills" required for a career in consumer studies?

- I. Being a good listener.
 - II. Having an empathetic attitude.
 - III. Possessing good interpersonal skills.
- (A) I and II only
 - (B) III only
 - (C) I and III only
 - (D) I, II, and III

Ans :

(D) I, II, and III

The text explicitly lists "good communication and interpersonal skills, empathetic and understanding attitude, being a good listener" as essential soft skills for professionals in this field.

160. A journalist writes an article exposing a company that sells duplicate, poor-quality medicines under a popular brand name. This journalist is working in the field of:

- (A) Consumer affairs journalism
- (B) Financial journalism
- (C) Sports journalism
- (D) Entertainment journalism

Ans :

(A) Consumer affairs journalism

This work directly relates to protecting consumers from harmful and fraudulent products, which is a core theme of consumer affairs. The text mentions taking up journalism related to consumer affairs as a career option.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

Ravi buys a new, expensive mobile phone from an authorized retailer. The advertisement for the phone had promised a "24-hour battery life" and a "shatterproof screen." However, after just two weeks of normal use, Ravi finds that the battery barely lasts for eight hours, and the

it does not give them the authority to dictate a company's pricing strategy.

- 126.** A consumer purchasing an electrical appliance like a mixer-grinder should ideally look for which of the following?

I. The ISI mark for quality assurance.
 II. A clear and understandable instruction manual.
 III. The receipt or bill as proof of purchase.

- (A) I and II only
 (B) I and III only
 (C) II and III only
 (D) I, II, and III

Ans :

- (D) I, II, and III

A wise consumer would look for the ISI mark (Right to Safety), read the manual (Right to be Informed/Consumer Education), and keep the receipt (Consumer Responsibility/Right to Redressal). All three are important.

- 127.** The process through which a buyer makes decisions about what to purchase is known as:

- (A) Consumer forum
 (B) Consumer product
 (C) Consumer redressal
 (D) Consumer behaviour

Ans :

- (D) Consumer behaviour

The chapter defines 'consumer behaviour' specifically as the process through which the buyer makes decisions about purchasing goods and services to satisfy their needs.

- 128.** The existence of consumer problems like adulteration and misleading ads highlights the need for:

- (A) Fewer products in the market
 (B) Consumer education and protection
 (C) Higher prices for all goods
 (D) Less government intervention

Ans :

- (B) Consumer education and protection

The entire premise of the chapter is that because consumers face numerous problems, consumer education (to be aware) and protection (legal mechanisms) have become critically important.

- 129.** Match the term in Column I with its correct definition in Column II.

	Column I		Column II
1.	Consumer Forum	a.	The number of customers visiting a retail space.
2.	Consumer Footfalls	b.	The process of making a purchase decision.
3.	Consumer Behaviour	c.	An article produced for sale to an end user.
4.	Consumer Product	d.	An advocacy group for protecting consumer interests.

- (A) 1-d, 2-a, 3-b, 4-c

- (B) 1-c, 2-d, 3-a, 4-b

- (C) 1-b, 2-c, 3-d, 4-a

- (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-d, 2-a, 3-b, 4-c

These definitions are explicitly provided in the 'Basic Concepts' section. A consumer forum is an advocacy group, footfalls refer to customer visits, behaviour is the decision process, and a product is an article for sale.

- 130.** A person takes up a job in a company's 'Customer Facilitation Division', where their primary role is to create customer databases and deal with them on a personal basis. This career aligns with which aspect of consumer studies?

- (A) Product testing and analysis
 (B) Customer relationship management
 (C) Legal advocacy and activism
 (D) Financial portfolio management

Ans :

- (B) Customer relationship management

The job described—creating databases and dealing personally with customers—is the essence of customer relationship management, which is listed as a career option for consumer studies graduates.

- 131.** What is the primary purpose of the 'subheading' in a leaflet, according to the project guidelines?

- (A) To state the main theme in a forceful way.
 (B) To provide a detailed conclusion to the leaflet.
 (C) To introduce paragraphs and bridge gaps in the text.
 (D) To list the names of the leaflet's creators.

Ans :

- (C) To introduce paragraphs and bridge gaps in the text.

The practical guide explains that subheadings are used to introduce separate paragraphs and to bridge the gap between the main heading and the body of the text, providing structure.

- 132.** The Consumer Protection Act, 1986, is intended to provide all of the following to consumers EXCEPT:

(A) Simple redressal
(B) Speedy redressal
(C) Inexpensive redressal
(D) Guaranteed financial profit

Ans :

(D) Guaranteed financial profit

The Act aims to provide “simple, speedy and inexpensive redressal” for grievances. It does not guarantee that the consumer will make a financial profit from the process, only that they can get fair settlement or compensation.

- 133.** Which statement best describes the impact of globalisation on Indian consumers?

(A) It has reduced the number of products available for purchase.
(B) It has made choosing the right product much simpler and easier.
(C) It has given the consumer more choices but also more challenges.
(D) It has eliminated all forms of consumer exploitation from the market.

Ans :

(C) It has given the consumer more choices but also more challenges.

The text highlights that while globalisation and the entry of foreign companies give consumers more choice, it also makes choosing the right product more difficult, presenting new challenges.

- 134.** When a consumer journalist investigates and reports on the harmful chemicals found in a popular cosmetic product, they are directly supporting which consumer right?

(A) Right to Choose
(B) Right to Safety
(C) Right to be Heard
(D) Right to Redressal

Ans :

(B) Right to Safety

By exposing a product that is hazardous to health, the journalist’s work directly supports the consumer’s ‘Right to Safety,’ which is the right to be protected from such harmful goods.

- 135.** As a consumer, you have the responsibility to read the terms and conditions before signing up for a service. This responsibility is most critical for exercising which right later, if a dispute arises?

(A) Right to Safety
(B) Right to Choose
(C) Right to Seek Redressal
(D) Right to Consumer Education

Ans :

(C) Right to Seek Redressal

If a consumer needs to seek redressal, the terms of the contract they agreed to will be crucial. Being uninformed about the terms weakens their case, showing a link between the responsibility to be informed and the right to redressal.

- 136.** Which body has to be approached to get a Hallmark certification for precious metals?

(A) An official Assaying and Hallmarking Centre
(B) The Directorate of Marketing and Inspection
(C) The Food Safety and Standards Authority of India
(D) The local municipal corporation office

Ans :

(A) An official Assaying and Hallmarking Centre

The text specifies that for a Hallmark, the precious metal articles must be “evaluated and tested at an official Assaying and Hallmarking Centre” which then certifies their purity.

- 137.** Assertion (A): The Consumer Protection Act, 2019, is more equipped to handle modern market challenges than the 1986 Act.

Reason (R): The 2019 Act includes specific guidelines for e-commerce and electronic service providers, which were not prevalent in 1986.

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
(C) (A) is true but (R) is false.
(D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The inclusion of rules for e-commerce is a key reason why the 2019 Act is better suited for today’s market, as online shopping has become a major part of consumer activity, a factor not addressed in the 1986 Act.

- 138.** Which of the following are potential career paths for a graduate in consumer studies?
- I. Working in a market research organisation.
 - II. Working for a voluntary consumer organisation.
 - III. Starting one's own consumer advocacy group.
 - IV. Working in the consumer division of a corporate house.
- (A) I and IV only
(B) II, III and IV only
(C) I, II and III only
(D) I, II, III and IV

Ans :

(D) I, II, III and IV

The 'Scope' section of the chapter explicitly lists all four of these options—working in market research, for NGOs, starting an own organisation, and working in corporate consumer divisions—as viable careers.

- 139.** Which of the following statements about consumer problems is incorrect?
- (A) Adulteration can be both intentional and unintentional.
 - (B) High prices can be a result of high advertising costs.
 - (C) Labels on products always provide complete and factual information.
 - (D) Sales promotion schemes like lucky draws can be deceptive.

Ans :

(C) Labels on products always provide complete and factual information.

The text explicitly states as a consumer problem that "Labels of most products are not factually correct, some are deceptive and misleading" and "fail to give complete essential information."

- 140.** The act of a consumer filing a complaint in a consumer court for a defective product is a direct exercise of which two rights?
- (A) Right to Safety and Right to Choose
 - (B) Right to be Heard and Right to Seek Redressal
 - (C) Right to be Informed and Right to Education
 - (D) Right to Choose and Right to be Heard

Ans :

(B) Right to be Heard and Right to Seek Redressal
Filing a complaint in a court is exercising the 'Right to be Heard' in an appropriate forum.

The objective of filing the complaint is to get a solution, which is exercising the 'Right to Seek Redressal'.

- 141.** A student is analyzing the nutritional information and ingredients list on a packet of biscuits. This activity is a practical application of which consumer responsibility?
- (A) The responsibility to read all information on the label.
 - (B) The responsibility to be honest in dealings.
 - (C) The responsibility to pay for all purchases.
 - (D) The responsibility to buy from different shops.

Ans :

(A) The responsibility to read all information on the label.

This action directly corresponds to the consumer responsibility mentioned in the text: "While making a purchase, s/he should read all the information given on the label/ brochure."

- 142.** Which two additional consumer rights were mentioned besides the four basic rights of safety, information, choice, and being heard?
- (A) Right to Bargain and Right to Discount
 - (B) Right to Free Products and Right to Free Services
 - (C) Right to Privacy and Right to Information
 - (D) Right to Redressal and Right to Consumer Education

Ans :

(D) Right to Redressal and Right to Consumer Education

The text first introduces the four basic rights and then states, "Two additional rights are- right to redressal and right to education," completing the list of six rights.

- 143.** Which of the following pairs is correctly matched?
- (A) FSSAI - Certifies purity of gold jewellery.
 - (B) Ecomark - Certifies product is environment friendly.
 - (C) Silk Mark - Certifies product is made of pure wool.
 - (D) AGMARK - Certifies all electronic goods for safety.

Ans :

(B) Ecomark - Certifies product is environment friendly.

The text correctly identifies the Ecomark with its earthen pot logo as the certification for

the principle of self-help and protects consumers against all kinds of exploitation.

Direction : Read the following case study and answer the following questions.

A group of Class 12 students is doing a project on food quality and safety. They visit a supermarket to examine the labels of various packaged food products. On a bottle of fruit jam, they find the 'FPO' mark. On a packet of ghee, they see the 'Agmark' seal. They notice that a popular brand of biscuits has the 'FSSAI' logo and license number printed on it. On a packet of instant noodles, they find the 'ISI' mark. The students learn that these are standardisation marks, which act as a certification of quality. The teacher explains that the ISI mark from the Bureau of Indian Standards (BIS) assures quality for various processed foods, while Agmark is for agricultural products. The FPO mark sets standards for fruit and vegetable products. The FSSAI logo indicates that the food business operator is licensed and complies with the national food safety regulations. This exercise helps the students understand the importance of looking for these marks to ensure they are purchasing products that meet specified quality and safety standards.

- 166.** The 'Agmark' seal found on the packet of ghee is a certification mark primarily for which type of products?
- (A) Electrical goods and appliances.
 - (B) Precious metals like gold and silver.
 - (C) Eco-friendly and biodegradable products.
 - (D) Agricultural and food products.

Ans :

(D) Agricultural and food products.

The Agmark seal is a certification mark promulgated by the Government of India. Consumers should look for this mark before purchasing any agricultural product, as it ensures the product's reliability and conformity to set standards.

- 167.** The 'ISI' mark on the packet of noodles is a certification mark of which national standards body?
- (A) The Food Safety and Standards Authority of India (FSSAI).
 - (B) The Directorate of Marketing and Inspection.
 - (C) The Bureau of Indian Standards (BIS).
 - (D) The Ministry of Agriculture.

Ans :

(C) The Bureau of Indian Standards (BIS).

The ISI mark is the certification mark of the Bureau of Indian Standards (BIS), formerly known as the Indian Standards Institution (ISI). It is found on various products that meet the relevant Indian standards.

- 168.** What is the primary purpose of these standardisation marks for a consumer?
- (A) To provide an assurance of the quality and/or purity of the product.
 - (B) To increase the price of the product.
 - (C) To make the packaging look more attractive.
 - (D) To indicate that the product is imported from another country.

Ans :

(A) To provide an assurance of the quality and/or purity of the product.

Standardisation is a prime requisite for attaining quality. Consumers must purchase products with standardisation marks as they provide an assurance that the product meets the specified standards for quality, safety, and purity.

- 169.** The 'FPO' mark on the jam bottle specifically relates to which category of products?
- (A) Woolen garments.
 - (B) Fruit and vegetable products.
 - (C) Dairy products.
 - (D) Spices and condiments.

Ans :

(B) Fruit and vegetable products.

The Fruit Product Order (FPO) mark lays down the statutory minimum standards in respect of the quality of various fruit and vegetable products, such as jams, juices, and pickles, and their processing facilities.

- 170.** The 'FSSAI' logo on a food product signifies that:
- (A) The product has been tested and approved by an international organization.
 - (B) The product is guaranteed to be 100% organic.
 - (C) The food business operator is licensed and complies with the food safety laws of India.
 - (D) The product is meant only for export and not for sale in India.

Ans :

(C) The food business operator is licensed and complies with the food safety laws of India.

and voluntary organisations provide advocacy, education, and support.

- 150.** When a consumer sees an ISI mark on an LPG cylinder, what does it primarily assure them of?
- (A) The cylinder is filled with the maximum possible gas.
 - (B) The cylinder is the cheapest one available for purchase.
 - (C) The cylinder has met mandatory safety and quality standards.
 - (D) The cylinder will be delivered to their home for free.

Ans :

(C) The cylinder has met mandatory safety and quality standards.

The ISI mark is a certification of quality and standards. For a product like an LPG cylinder, which is under mandatory certification, this mark assures the consumer that it meets crucial safety requirements.

- 151.** Which statement accurately describes the role of the Indian government in consumer protection?
- (A) The government has established laws and bodies to protect consumers.
 - (B) The government has no role in consumer protection.
 - (C) The government only protects the interests of manufacturers.
 - (D) The government's role is limited to setting product prices.

Ans :

(A) The government has established laws and bodies to protect consumers.

The text clearly outlines the government's significant role, from enacting the Consumer Protection Act to setting up bodies like BIS and DMI and establishing protection councils.

- 152.** Which of the following is an example of a service for which a consumer might face grievances and seek redressal?
- (A) The quality of apples purchased from a vendor.
 - (B) A faulty bill issued by an electricity company.
 - (C) The color of a shirt not matching the online picture.
 - (D) The design of a newly purchased piece of furniture.

Ans :

(B) A faulty bill issued by an electricity company.

The text explicitly mentions that consumers face grievances with services provided by public utilities like electricity, making a faulty bill a clear example of a service-related issue.

- 153.** The rise of "green consumption" indicates a growing consumer awareness about what?
- (A) The need for lower prices on all products.
 - (B) The importance of buying imported luxury goods.
 - (C) The benefits of using more plastic packaging.
 - (D) The environmental impact of their purchasing decisions.

Ans :

(D) The environmental impact of their purchasing decisions.

Green consumption is related to sustainability and choosing products that are in tune with nature, use fewer resources, and create less waste, reflecting an awareness of environmental issues.

- 154.** Assertion (A): Consumers have a right to seek redressal for their grievances.
Reason (R): The Consumer Protection Act intends to provide simple, speedy, and inexpensive redressal to consumers.
- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
 - (C) (A) is true but (R) is false.
 - (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The right to seek redressal (A) is made effective and meaningful because the CPA provides a mechanism for that redressal which is designed to be simple, speedy, and inexpensive (R).

- 155.** A company's advertisement claims their health drink can make a child taller in one month, which is not scientifically proven. This advertisement primarily exploits which vulnerability of consumers?
- (A) Their lack of knowledge about pricing.
 - (B) Their inability to read the language of the ad.
 - (C) Their tendency to be swayed by misleading information.
 - (D) Their preference for products with simple packaging.

Ans :

environment-friendly products. All other pairs are mismatched with their respective functions.

- 144.** Why is it important for a consumer studies professional to have a “willingness to help fellow consumers and the public at large”?
- (A) Because the core of the profession is service and advocacy.
 - (B) Because the field is primarily about self-profit.
 - (C) Because it is a legal requirement for the job.
 - (D) Because it helps in getting promotions faster.

Ans :

(A) Because the core of the profession is service and advocacy.

The field of consumer protection and education is inherently service-oriented. Its purpose is to advocate for, educate, and empower consumers, which requires a genuine desire to help others.

- 145.** A consumer buys a jam with an FPO mark. What assurance does this mark provide regarding the product?
- (A) The jam is sugar-free and organic.
 - (B) The jam meets minimum standards of quality for fruit products.
 - (C) The jam is the cheapest brand available in the market.
 - (D) The jam has an indefinite shelf life and will never spoil.

Ans :

(B) The jam meets minimum standards of quality for fruit products.

The FPO mark lays down statutory minimum standards for the quality of various fruit and vegetable products, including jams, and the facilities where they are processed.

- 146.** The ‘Scope’ section lists several career avenues in consumer studies. Which of the following is NOT mentioned as a potential career?
- (A) Working as an analyst in consumer testing laboratories.
 - (B) Taking up journalism related to consumer affairs.
 - (C) Becoming a professional chef in a five-star hotel.
 - (D) Working as a freelance consultant for redressal guidance.

Ans :

(C) Becoming a professional chef in a five-star hotel.

The text lists careers in testing labs, journalism, and consultancy related to consumer affairs. Becoming a chef is a career in the hospitality or culinary field, not consumer studies.

- 147.** What principle should guide the text in a leaflet designed for consumer education?
- (A) It should be as complex and academic as possible.
 - (B) It should use technical jargon to impress the reader.
 - (C) It should present multiple unrelated themes to show variety.
 - (D) It should be simple, to the point, and focus on one theme.

Ans :

(D) It should be simple, to the point, and focus on one theme.

The practical guidelines emphasize that the text in a leaflet should be simple, direct, and focus on a single theme to avoid confusing the target audience.

- 148.** What is the fundamental difference between intentional and unintentional adulteration?
- (A) The type of substance added to the product.
 - (B) The effect on the consumer’s health.
 - (C) The purpose and motive behind the act.
 - (D) The price of the final adulterated product.

Ans :

(C) The purpose and motive behind the act.

The key difference lies in intent. Intentional adulteration is a deliberate act of fraud for profit, whereas unintentional adulteration might occur accidentally due to negligence or contamination during processing or storage.

- 149.** According to the text, which of the following are mechanisms for consumer protection?
- I. The Consumer Protection Act.
 - II. Standardisation marks on products.
 - III. Voluntary consumer organisations.
- (A) I only
 - (B) I and II only
 - (C) II and III only
 - (D) I, II, and III

Ans :

(D) I, II, and III

The chapter discusses all three as key mechanisms. The CPA provides the legal framework, standardisation marks provide quality assurance,

screen cracks after a minor accidental drop. He approaches the retailer, who directs him to the manufacturer's service center. The service center refuses to repair or replace the phone, claiming the issues are due to improper usage, despite the product being under warranty. Feeling cheated, Ravi remembers his consumer rights. He realizes that he was a victim of misleading advertisement and was sold a substandard product. He decides to exercise his 'Right to Seek Redressal'. He gathers his purchase receipt, the warranty card, and a copy of the advertisement. With this proof, he files a formal complaint in the appropriate consumer disputes redressal forum, seeking a full refund or a replacement phone. His actions show the importance of being an aware consumer who knows the legal channels available for protection.

- 161.** Which consumer right empowers Ravi to file a complaint against the company for the faulty product and misleading claims?
- (A) The Right to Choose
 - (B) The Right to be Heard
 - (C) The Right to Seek Redressal
 - (D) The Right to Consumer Education

Ans :

(C) The Right to Seek Redressal

The Right to Seek Redressal provides consumers the right to a fair settlement of their genuine grievances. This includes seeking compensation for faulty goods or services that do not meet the promised standards or quality.

- 162.** The advertisement's promise of a "shatterproof screen" which turned out to be false is an example of what common consumer problem?
- (A) Incorrect weights and measures.
 - (B) Adulteration of a food product.
 - (C) Spurious or duplicate products.
 - (D) Inadequate or erroneous information given by the manufacturer.

Ans :

(D) Inadequate or erroneous information given by the manufacturer.

One of the major problems consumers face is receiving inadequate or erroneous information. This includes advertisements that are not informative or are deceptive and misleading, making false claims about the qualities or uses of a product.

- 163.** What is the landmark legislation in India that provides a framework for protecting consumers from fraudulent trade practices and provides for redressal of their grievances?
- (A) The Food Safety and Standards Act.
 - (B) The Consumer Protection Act.
 - (C) The Essential Commodities Act.
 - (D) The Indian Contract Act.

Ans :

(B) The Consumer Protection Act.

The Consumer Protection Act is a landmark legislation in the interest of the consumer. Its main function is to protect consumers from fraudulent trade practices and to provide a simple, speedy, and inexpensive redressal for their grievances.

- 164.** By keeping his receipt and warranty card, Ravi was fulfilling which important consumer responsibility?
- (A) The responsibility to be honest in all dealings.
 - (B) The responsibility to buy only products with standardisation marks.
 - (C) The responsibility to always choose the cheapest product.
 - (D) The responsibility to keep all relevant documents of purchase.

Ans :

(D) The responsibility to keep all relevant documents of purchase.

An important consumer responsibility is to keep receipts and other relevant documents of purchase. These documents may be needed as proof of purchase when filing a complaint in case of a problem with the product or service.

- 165.** The consumer dispute redressal forums established under the Consumer Protection Act are intended to provide what kind of solution?
- (A) A simple, speedy, and inexpensive redressal to consumers.
 - (B) A slow, complicated, and expensive legal process.
 - (C) A process that only favors the manufacturer.
 - (D) A system that provides only warnings but no compensation.

Ans :

(A) A simple, speedy, and inexpensive redressal to consumers.

The Consumer Protection Act intends to provide a simple, speedy, and inexpensive redressal to consumers for their grievances. It is based on

- (A) The ISI mark is exclusively for food products.
- (B) The FPO mark is mandatory for precious jewellery.
- (C) The AGMARK seal ensures the reliability of agricultural products.
- (D) The Wool-mark is a certification for pure cotton fabrics.

Ans :

(C) The AGMARK seal ensures the reliability of agricultural products.
The text clearly states that a consumer should look for the AGMARK seal on agricultural products as it “ensures product reliability.” The other statements incorrectly match the marks with their product categories.

- 121.** The establishment of the Food Safety and Standards Authority of India (FSSAI) reflects which broader trend in consumer protection?
- (A) A shift towards science-based standards for food safety.
 - (B) A focus on regulating only imported food items.
 - (C) A decrease in the government’s role in food regulation.
 - (D) A move to make all food products tax-free for consumers.

Ans :

(A) A shift towards science-based standards for food safety.
The text states that the FSSAI was established to lay down “science based standards for articles of food,” indicating a modern, scientific approach to ensuring food safety for consumers.

- 122.** According to the text, which Ahmedabad-based consumer organisation brings out the publication ‘Insight’?
- (A) VOICE
 - (B) CERC
 - (C) Consumers Union
 - (D) Consumer Association

Ans :

(B) CERC
The chapter explicitly identifies CERC (Consumer Education and Research Centre) as the Ahmedabad-based consumer organisation that publishes the magazine ‘Insight’.

- 123.** Assertion (A): Writing skills are crucial for professionals in the field of consumer studies.
Reason (R): They need to develop educational material and report on comparative product tests.

- (A) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true but (R) is not the correct explanation of (A).
- (C) (A) is true but (R) is false.
- (D) (A) is false but (R) is true.

Ans :

(A) Both (A) and (R) are true and (R) is the correct explanation of (A).

The assertion that writing skills are important is directly explained by the reason given: these professionals are responsible for creating educational content and writing reports on product testing, both of which require strong writing abilities.

- 124.** When preparing a leaflet on “Consumer Rights,” the text should be simple, to the point, and present only one theme. What is the reason for this guideline?
- (A) To make the leaflet more expensive to print.
 - (B) To confuse the target audience with complex ideas.
 - (C) To ensure the message is clear and not confusing.
 - (D) To meet the legal requirements for all publications.

Ans :

(C) To ensure the message is clear and not confusing.

The practical guidelines in the appendix explain that presenting one theme keeps the message clear, as a leaflet with “two or more unrelated or vaguely related themes confuses the target audience.”

- 125.** Which of the following pairs of a consumer right and its implication is incorrectly matched?
- (A) Right to Safety - Protection from a faulty electric appliance.
 - (B) Right to be Informed - Access to the ingredients list on a food pack.
 - (C) Right to Choose - Freedom to select from different telecom providers.
 - (D) Right to Redressal - The power to set product prices for a company.

Ans :

(D) Right to Redressal - The power to set product prices for a company.

The ‘Right to Redressal’ allows a consumer to seek compensation or settlement for a grievance;

The FSSAI logo indicates that the manufacturer or seller is licensed under the Food Safety and Standards Act, 2006. It signifies compliance with the science-based standards set to ensure food is safe for human consumption.

Direction : Read the following case study and answer the following questions.

A voluntary consumer organization, “Consumer Voice,” decides to conduct a comparative test on different brands of honey available in the market. They are concerned about widespread reports of adulteration, where honey is mixed with cheaper sugar syrups. The organization purchases multiple samples of various brands from different stores and sends them to an accredited laboratory for testing. The lab tests check for purity, moisture content, and the presence of any added sugars. Once the results are available, “Consumer Voice” publishes a detailed report in its monthly magazine and on its website. The report names the brands that passed the purity tests and those that were found to be adulterated. This information empowers consumers to make informed choices and avoid substandard products. The organization also uses these findings to advocate with the government for stricter enforcement of quality standards for honey, demonstrating the crucial role NGOs play in consumer education and protection.

- 171.** The practice of mixing honey with cheaper sugar syrups is an example of:
- (A) Food adulteration
 - (B) Food fortification
 - (C) Food preservation
 - (D) Food enrichment

Ans :

- (A) Food adulteration

Adulteration is a serious consumer problem where the quality of a product is intentionally lowered. This can involve adding a cheaper or inferior substance, like sugar syrup in honey, which exploits the consumer and can be harmful.

- 172.** What is the primary role of a voluntary consumer organization like “Consumer Voice” in this scenario?
- (A) To manufacture and sell their own brand of honey.
 - (B) To act as a government regulatory body that can penalize companies.
 - (C) To create consumer awareness, conduct product testing, and disseminate information.

- (D) To provide financial loans to honey manufacturers.

Ans :

(C) To create consumer awareness, conduct product testing, and disseminate information. Non-governmental consumer organizations play an important role in consumer education and protection. Their activities include comparative testing of products, creating awareness about harmful products, and disseminating information through publications.

- 173.** The information published by the consumer organization helps consumers to exercise which of their rights more effectively?
- (A) The Right to be Heard
 - (B) The Right to Choose
 - (C) The Right to Safety
 - (D) The Right to be Informed

Ans :

- (D) The Right to be Informed

The Right to be Informed means the right to be informed about the quality, quantity, and purity of goods. The comparative test report provides consumers with this critical information, enabling them to make an informed choice.

- 174.** By advocating with the government for stricter standards, the organization is helping consumers exercise their collective:
- (A) Right to Choose
 - (B) Right to be Heard
 - (C) Right to Safety
 - (D) Right to Consumer Education

Ans :

- (B) The Right to be Heard

The Right to be Heard means that consumers' interests will receive due consideration at appropriate forums. Consumer organizations act as advocacy groups, representing consumers and ensuring their voices are heard by policymakers and government bodies.

- 175.** The work of such non-governmental organizations is crucial because they are:
- (A) Driven by profit motives.
 - (B) Partisan and always favor the manufacturers.
 - (C) Non-partisan and work in the interest of the consumer.
 - (D) Not allowed to publish any information they find.

- (A) Manufacturer
- (B) Wholesaler
- (C) Retailer
- (D) Consumer

Ans :

- (D) Consumer

A consumer is defined as the final buyer of goods and services. They purchase these items for the satisfaction of their personal needs and wants, making them the primary component of a socio-economic system.

Direction : Read the following case study and answer the following questions.

A school organizes a workshop on “Being a Responsible Consumer.” The workshop facilitator explains that while the law provides consumers with many rights, these rights can only be exercised effectively if consumers are also aware of their responsibilities. She outlines several key responsibilities. First, she stresses the importance of being an informed consumer by actively seeking out information and updating one’s knowledge. Second, she highlights the responsibility to be honest and pay for all purchases. Third, she demonstrates the importance of reading labels on packaged foods to check for ingredients, expiry dates, and standardisation marks. She also advises the students to always insist on getting a proper receipt for their purchases, as it is crucial proof for any future claims. The workshop’s goal is to empower the students to become not just aware of their rights, but also proactive and conscientious in their own behavior as consumers.

- 186.** The workshop’s core message is that consumer rights and consumer responsibilities are:
- (A) Completely unrelated to each other.
 - (B) Mutually exclusive; you can only have one or the other.
 - (C) Interconnected and go hand in hand.
 - (D) Only important for manufacturers, not for consumers.

Ans :

- (C) Interconnected and go hand in hand.

The concepts of rights and responsibilities are closely linked. To be able to exercise one’s rights effectively as a consumer, it is necessary to be aware of and fulfill one’s duties and responsibilities.

- 187.** The responsibility to read all the information given on a product’s label helps the consumer to exercise their:
- (A) Right to be Heard.
 - (B) Right to be Informed.
 - (C) Right to Seek Redressal.
 - (D) Right to Choose.

Ans :

- (B) The Right to be Informed.

By taking the responsibility to read labels, a consumer actively seeks out information about the product. This enables them to exercise their ‘Right to be Informed’ and make a wise choice based on facts.

- 188.** Why is it a consumer’s responsibility to insist on a receipt?
- (A) Because it is a way to bargain for a lower price.
 - (B) Because receipts can be used as discount coupons for future purchases.
 - (C) Because it is a form of optional feedback for the seller.
 - (D) Because it serves as proof of purchase, which is needed for filing complaints.

Ans :

- (D) Because it serves as proof of purchase, which is needed for filing complaints.

Consumers should always keep receipts and other relevant documents. A receipt is the primary proof of purchase and may be required to file a complaint in case of any problem with the product or service.

- 189.** To be assured of quality, a responsible consumer should look for what on a product?
- (A) Standardisation marks like ISI or Agmark.
 - (B) The most attractive packaging.
 - (C) The highest price tag.
 - (D) The name of a famous celebrity endorser.

Ans :

- (A) Standardisation marks like ISI or Agmark.
- An important consumer responsibility is to be quality conscious. To be assured of quality, a consumer should look for and purchase products that carry recognized standardisation marks, as these indicate conformity to standards.

- 190.** The responsibility to be honest in all dealings and pay for all purchases is an example of what kind of responsibility?

professional help.

Ans :

(C) Keep the receipt and warranty card as proof of purchase.

A key consumer responsibility is to keep all relevant documents of purchase, such as receipts and warranty cards. These documents are essential proof when filing a complaint or seeking redressal for a faulty product or service.

Direction : Read the following case study and answer the following questions.

Mr. and Mrs. Verma are looking to buy a new car. They visit several showrooms and find that the market is highly competitive, with numerous brands offering cars in their desired segment. Each brand has multiple models with different features, engine capacities, and price points. This wide variety allows the Vermas to compare the cars based on safety features, fuel efficiency, after-sales service, and price. They are able to test drive different models and make a choice that best fits their needs and budget, without being forced to buy a particular brand. This scenario is in stark contrast to the situation a few decades ago when there were only two or three car manufacturers in the country, and consumers had very limited options. The current market situation allows the Vermas to fully exercise a key consumer right, which ensures that they have access to a variety of goods at competitive prices.

- 181.** The ability of the Vermas to select a car from a variety of models at competitive prices is an application of which consumer right?
- (A) The Right to Safety
 - (B) The Right to be Informed
 - (C) The Right to Seek Redressal
 - (D) The Right to Choose

Ans :

(D) The Right to Choose

The Right to Choose implies that every buyer has the right to have access to products of varying quality, quantities, and prices. This right is best exercised in a competitive market with a wide variety of goods.

- 182.** What is a key enabler for consumers to be able to exercise their 'Right to Choose' effectively?
- (A) A monopoly market with only one seller.
 - (B) A competitive market with a variety of goods and services.

(C) A market where all products are identical in quality and price.

(D) A market where information about products is not available.

Ans :

(B) A competitive market with a variety of goods and services.

The Right to Choose can be exercised effectively only when there is a competitive market. The availability of a range of goods and services from different manufacturers allows consumers to make a selection that best suits their needs.

- 183.** As a responsible consumer, what should the Vermas do before making their final purchase decision?
- (A) Conduct a market survey to compare brands, features, and prices.
 - (B) Choose the first car they see without any comparison.
 - (C) Buy the most expensive car available to ensure quality.
 - (D) Rely solely on the advice of the salesperson in one showroom.

Ans :

(A) Conduct a market survey to compare brands, features, and prices.

A key consumer responsibility is to do a market survey before making a purchase. Comparing different brands, features, and prices available in the market helps a consumer to make a wise and informed choice.

- 184.** The increase in the number of products and brands available in the Indian market is largely a result of:
- (A) A decrease in industrial production.
 - (B) A move away from a market-based economy.
 - (C) Industrialisation and globalisation.
 - (D) A decline in the purchasing power of consumers.

Ans :

(C) Industrialisation and globalisation.

Economic changes like industrialisation and globalisation have transformed the Indian market. The entry of foreign companies and increased domestic production have led to a wide variety of products being available to the consumer.

- 185.** The person who is the final buyer of goods or services for the satisfaction of their personal needs and wants is defined as a:

public. They also act as vigilance groups, reporting malpractices to the authorities to ensure that consumer protection laws are enforced effectively.

205. This form of cheating is exploitative because the consumer:

- (A) Gets a better quality product than expected.
- (B) Ends up getting less quantity than what they pay for.
- (C) Is forced to buy a product they do not need.
- (D) Receives a product that is past its expiry date.

Ans :

(B) Ends up getting less quantity than what they pay for.

Incorrect weights and measures exploit consumers of their money. The consumer pays for a certain quantity of a product but receives less, effectively being overcharged for the goods they purchase.

Direction : Read the following case study and answer the following questions.

A consumer looking to buy a designer handbag finds two options. The first is an original handbag from a famous luxury brand, sold in its authorized showroom. It is expensive but made from high-quality materials and has a flawless finish. The second option is a handbag being sold on a street corner. It looks almost identical to the original, with a similar design, color scheme, and even a similar-sounding brand name logo. However, it is sold at a fraction of the price. Upon closer inspection, the consumer notices that the material is of poor quality, and the stitching is uneven. This second handbag is a spurious or imitation product, designed to deceive the consumer by looking like the well-known brand. While the low price might be tempting, such products are often of poor quality, may not be durable, and their sale is an unfair trade practice that infringes on the original brand's rights.

206. The second handbag, which is a cheap copy of a well-known brand, is an example of what kind of product?

- (A) A genuine, high-quality product.
- (B) A product with a standardisation mark.
- (C) A spurious or imitation product.
- (D) An eco-friendly product.

Ans :

(C) A spurious or imitation product.

A major problem consumers face is being confused and cheated by spurious and substandard products. These are often duplicates of well-known brands, with similar packaging and brand names, but are of poor quality.

207. What is the primary intention behind creating such imitation products?

- (A) To provide consumers with a product of superior quality.
- (B) To promote the original brand and increase its sales.
- (C) To comply with all legal and ethical standards of business.
- (D) To deceive the consumer by trading on the reputation of a well-known brand.

Ans :

(D) To deceive the consumer by trading on the reputation of a well-known brand.

Spurious products are created to deceive consumers. They use similar packaging, colors, and names to imitate well-known brands, taking unfair advantage of the original brand's reputation to sell their own inferior goods.

208. What is a key risk for a consumer who purchases a spurious product?

- (A) The product may be of poor quality and could even be unsafe or injurious to use.
- (B) The product is likely to be of better quality than the original.
- (C) The product will come with a better warranty and after-sales service.
- (D) The product is guaranteed to be authentic and durable.

Ans :

(A) The product may be of poor quality and could even be unsafe or injurious to use.

Spurious or imitation products are often of very poor quality. Besides not being durable, they can sometimes be unsafe or injurious to use, posing a risk to the consumer's health and safety.

209. As a responsible consumer, how can one avoid being cheated by such products?

- (A) By always buying the product with the lowest price, regardless of the seller.
- (B) By purchasing from authorized retailers and being aware of the original brand's features.
- (C) By avoiding all branded products completely.
- (D) By not paying attention to the quality or finish of the product.

- (A) A legal responsibility enforced by law.
- (B) An ethical responsibility.
- (C) A financial responsibility towards the government.
- (D) A responsibility only towards oneself.

Ans :

- (B) An ethical responsibility.

Being honest in all their dealings and paying for their purchases is a fundamental ethical responsibility of a consumer. This helps in maintaining a fair and trustworthy marketplace for everyone.

Direction : Read the following case study and answer the following questions.

A company launches a new brand of herbal tea with a massive advertising campaign. The advertisement features a famous actor who claims that drinking the tea “guarantees weight loss of 10 kgs in 10 days” and “cures diabetes completely.” The advertisement provides no scientific evidence to support these claims. Attracted by the promises, many people purchase the product. However, they soon find that the tea has no such effects. A consumer rights NGO takes up the case, arguing that the advertisement is misleading and makes false claims that can be harmful to consumers, especially those with diabetes who might stop their regular medication. Under the new Consumer Protection Act, which has provisions for strict penalties against misleading advertisements, the Central Consumer Protection Authority (CCPA) investigates the matter. The company is found guilty and is heavily penalized for its deceptive marketing practices. The actor is also held liable for endorsing the false claims.

- 191.** The advertisement for the herbal tea is an example of which major consumer problem?
- (A) Adulteration
 - (B) Spurious products
 - (C) Misleading advertisements
 - (D) Incorrect weights and measures

Ans :

- (C) A misleading advertisements

A common problem consumers face is being exposed to misleading advertisements. These ads are often not informative and are limited in their ability to answer essential questions, sometimes making deceptive claims about a product's qualities.

- 192.** The new Consumer Protection Act (CPA) 2019 has introduced what key measure to tackle such problems?
- (A) A ban on all forms of advertising.
 - (B) The introduction of a central regulator and strict penalties for misleading advertisements.
 - (C) A requirement that all products must be sold without any packaging.
 - (D) A system where consumers cannot file any complaints against companies.

Ans :

- (B) The introduction of a central regulator and strict penalties for misleading advertisements.

The CPA 2019 has replaced the older act and introduced several new measures. These include the establishment of a central regulator and provisions for imposing strict penalties on manufacturers and endorsers for misleading advertisements.

- 193.** The false claims in the advertisement violate the consumer's:
- (A) Right to be Heard
 - (B) Right to Choose
 - (C) Right to Seek Redressal
 - (D) Right to be Informed

Ans :

- (D) The Right to be Informed

The Right to be Informed is the right to be protected against unfair trade practices and to receive accurate information about a product's quality and uses. Misleading advertisements directly violate this fundamental right.

- 194.** Why are such misleading advertisements considered particularly harmful?
- (A) Because they can persuade consumers to make impulsive purchases and can be injurious to health.
 - (B) Because they are not entertaining to watch.
 - (C) Because they increase the cost of the product for the manufacturer.
 - (D) Because they are only shown late at night on television.

Ans :

- (A) Because they can persuade consumers to make impulsive purchases and can be injurious to health.

Such advertisements are harmful because they deceive consumers into buying products based on false promises. They can also be dangerous, for

Ans :

(C) Non-partisan and work in the interest of the consumer.

Voluntary consumer organizations are important in consumer education and protection due to their non-partisan interests. They work independently to protect and promote the welfare of consumers without being influenced by manufacturers or government.

Direction : Read the following case study and answer the following questions.

A college student, Priya, buys a new laptop from a well-known brand's showroom. The laptop comes with a one-year warranty. After six months, the laptop's screen starts flickering, and it frequently shuts down without warning. Priya takes it to the authorized service center. The staff there inform her that the motherboard is faulty and needs to be replaced, but they claim that this defect is not covered under the warranty and she will have to pay a large amount for the repair. Priya is sure that this is a manufacturing defect. She exercises her 'Right to be Informed' by carefully reading the warranty terms again, which do not exclude motherboard issues. She then exercises her 'Right to be Heard' by sending a formal complaint via email to the company's head office. When the company fails to respond satisfactorily, she decides to use her 'Right to Seek Redressal' by approaching a consumer forum. Her knowledge of her consumer rights gives her the confidence to challenge the company's unfair practice.

176. Which right empowers Priya to demand complete information about the terms and conditions of the warranty?

- (A) The Right to be Informed
- (B) The Right to Safety
- (C) The Right to Choose
- (D) The Right to Consumer Education

Ans :

(A) The Right to be Informed

The Right to be Informed gives consumers the right to have complete information about the quality, quantity, price, and terms of goods and services. This helps protect them against unfair trade practices and hidden conditions.

177. The legal provision that allows Priya to file a case in a consumer forum for a faulty product is primarily derived from:

- (A) The Indian Contract Act
- (B) The Consumer Protection Act
- (C) The Sale of Goods Act
- (D) The Environment Protection Act

Ans :

(B) The Consumer Protection Act

The Consumer Protection Act is the landmark legislation that provides a simple and speedy redressal mechanism for consumers. It establishes consumer forums where individuals like Priya can file complaints against defective goods or deficient services.

178. The laptop, which has a manufacturing defect that could potentially cause a short circuit, poses a threat to Priya's:

- (A) Right to Choose
- (B) Right to be Heard
- (C) Right to Safety
- (D) Right to Consumer Education

Ans :

(C) The Right to Safety

The Right to Safety refers to the right to be protected against products, production processes, and services that are hazardous to health or life. A faulty electronic device with a potential for short-circuiting poses such a hazard.

179. When Priya sends a formal complaint to the company's head office to ensure her grievance is considered, she is exercising her:

- (A) Right to Safety
- (B) Right to Choose
- (C) Right to Seek Redressal
- (D) Right to be Heard

Ans :

(D) The Right to be Heard

The Right to be Heard means that consumers' interests will receive due consideration at appropriate forums. This includes the right to be represented and have their complaints heard by both companies and consumer welfare bodies.

180. To be a responsible consumer in this situation, it was crucial for Priya to:

- (A) Discard the laptop and buy a new one immediately.
- (B) Accept the service center's decision without questioning it.
- (C) Keep the receipt and warranty card as proof of purchase.
- (D) Try to repair the laptop herself without

information prevents the consumer from making a truly informed decision, which is a violation of this right.

- 200.** This case highlights the importance of which consumer right, which refers to the right to acquire the knowledge and skill to be an informed consumer?

(A) The Right to Consumer Education
(B) The Right to Seek Redressal
(C) The Right to Safety
(D) The Right to be Heard

Ans :

(A) The Right to Consumer Education
The Right to Consumer Education refers to every person's right to acquire the knowledge and skills needed to be an informed consumer. This right helps consumers protect themselves from deceptive marketing practices and make wise purchasing decisions.

Direction : Read the following case study and answer the following questions.

In a small town, people frequently complain about being cheated by shopkeepers who use faulty weights and scales. A consumer rights activist decides to address this problem. She finds that many of the weighing scales used in the local market have not been verified and sealed by the legal metrology department, and some have been tampered with to show a higher weight. This means consumers are consistently getting a lesser quantity of goods than what they are paying for. The activist starts an awareness campaign. She educates consumers to always check for the verification stamp on the weighing scales and to be vigilant about how the goods are weighed. She also reports the issue to the authorities, who then conduct a raid and seize the incorrect weights and measures. This action helps to protect the consumers in the town from this common form of exploitation and ensures they receive the correct quantity of goods for their money.

- 201.** The use of faulty or unverified weighing scales by shopkeepers is an example of which consumer problem?

(A) Adulteration
(B) Substandard quality goods
(C) Incorrect weights and measures
(D) Misleading advertisements

Ans :

(C) Incorrect weights and measures

A common way consumers are cheated is through incorrect weights and measures. This can happen when retailers alter their weights and scales or use correct measures incorrectly, resulting in the consumer getting less quantity.

- 202.** What should a responsible consumer look for on a weighing scale to ensure it is genuine?

(A) The brand name of the scale.
(B) A seal or verification stamp from the concerned authority.
(C) The date on which the scale was manufactured.
(D) A bright and attractive color.

Ans :

(B) A seal or verification stamp from the concerned authority.

A consumer should always check for the seal or verification stamp on weights and measures. A scale without this stamp is not considered genuine and may have been tampered with to exploit the consumer.

- 203.** This problem violates the consumer's right to what?

(A) The right to be protected against unfair trade practices.
(B) The right to consumer education.
(C) The right to safety from hazardous goods.
(D) The right to be heard in a consumer forum.

Ans :

(A) The right to be protected against unfair trade practices.

Using faulty weights is an unfair trade practice. The Consumer Protection Act protects consumers against such exploitation, ensuring they get what they pay for and are not cheated by unscrupulous sellers.

- 204.** The activist's work in educating the public and reporting the issue to the authorities is an example of:

(A) A corporate sales promotion campaign.
(B) A government-run manufacturing initiative.
(C) A market research survey for a new product.
(D) A consumer advocacy and awareness initiative.

Ans :

(D) A consumer advocacy and awareness initiative.

Consumer organizations and activists play a crucial role in creating awareness among the

instance, if a person with a serious illness stops their medication based on a false claim.

- 195.** The consumer organization that took up this case is an example of an advocacy group that works to:
- (A) Protect the interests of manufacturers.
 - (B) Promote the sale of all advertised products.
 - (C) Ensure that advertisements are as creative as possible, regardless of the truth.
 - (D) Protect consumers and help them address problems.

Ans :

(D) A protect consumers and help them address problems.

Consumer forums or organizations often work as advocacy groups. Their primary aim is to seek to protect consumers from various market-related problems and to help them in addressing their grievances effectively.

Direction : Read the following case study and answer the following questions.

An elderly man, Mr. Singh, receives a scratch card in his newspaper from a company selling water purifiers. The card states that he has won a “free” dinner set. To claim his prize, a salesperson visits his home. The salesperson then pressures him into buying an overpriced and unnecessary water purifier, telling him that the purchase is mandatory to receive the “free” gift. The salesperson uses complex technical jargon and creates a sense of urgency, not giving Mr. Singh enough time to think or consult his family. Mr. Singh ends up buying the purifier. Later, he discovers that the “free” dinner set was of very poor quality and that the purifier he was sold was much more expensive than similar models in the market. He realizes he has been a victim of a deceptive sales promotion scheme. This incident highlights how such schemes can entice and deceive consumers, especially the vulnerable, by using misleading offers and high-pressure sales tactics.

- 196.** The company’s offer of a “free” gift with a mandatory purchase is an example of what type of consumer problem?
- (A) Adulteration
 - (B) A deceptive sales promotion scheme.
 - (C) A spurious or duplicate product.
 - (D) Incorrect weights and measures.

Ans :

(B) A deceptive sales promotion scheme.

Companies often use various sales promotion schemes to attract customers. However, these are not always genuine and can be used to deceive the consumer through misleading offers, as seen in this case.

- 197.** Such sales promotion gimmicks primarily appeal to consumers’ tendency to make:
- (A) Impulsive purchases.
 - (B) Well-researched and informed decisions.
 - (C) Purchases based only on quality.
 - (D) Decisions after consulting with multiple experts.

Ans :

(A) Impulsive purchases.

Enticing sales promotion gimmicks are designed to persuade consumers to make impulsive purchases. Consumers can get swayed by these offers and fall prey to them without carefully evaluating the product or the terms.

- 198.** What is a key consumer responsibility that could have helped Mr. Singh in this situation?
- (A) To always accept any offer that claims to be “free.”
 - (B) To make a quick decision without asking any questions.
 - (C) To avoid reading any of the terms and conditions of the offer.
 - (D) To feel free to choose and not be pressured, and to do a market survey.

Ans :

(D) To feel free to choose and not be pressured, and to do a market survey.

Consumers should feel free to choose from the variety available as per their needs and not be swayed by high-pressure tactics. A market survey to compare prices would have revealed that the purifier was overpriced.

- 199.** The salesperson’s use of complex jargon that Mr. Singh could not understand is a violation of the consumer’s:
- (A) Right to be Heard
 - (B) Right to Choose
 - (C) Right to be Informed
 - (D) Right to Safety

Ans :

(C) The Right to be Informed

Labels and sales information often use terminologies that a common consumer is unable to understand. This lack of clear and simple

Ans :

(B) By purchasing from authorized retailers and being aware of the original brand's features.

To avoid spurious products, consumers should be vigilant. It is advisable to buy from reputable and authorized sellers and to be familiar with the quality and features of the original brand to be able to spot a fake.

210. The practice of selling imitation goods is considered an unfair trade practice because:

(A) It benefits both the consumer and the original brand.

(B) It is a fair and ethical form of competition.

(C) It is encouraged by consumer protection laws.

(D) It misleads the consumer and infringes on the intellectual property of the original brand.

Ans :

(D) It misleads the consumer and infringes on the intellectual property of the original brand.

Selling imitation products is an unfair trade practice. It deceives the consumer into believing they are buying a genuine product and also violates the trademarks and intellectual property rights of the original manufacturer.

CHAPTER 13

DEVELOPMENT COMMUNICATION AND JOURNALISM

SUMMARY

1. INTRODUCTION

Communication is a vital part of social and professional life, and the media plays a powerful role in investigating and questioning societal issues . Development Journalism is a social activity that communicates the feelings of a community back to itself, rooted in the people's right to opinion and expression . As an essential component of any democratic system, the press is considered the fourth pillar of democracy, enabling the public participation that is its foundation .

2. SIGNIFICANCE

Development communication is significant because it acts as a catalyst for social development by creating awareness about available technologies and mobilizing people to use them for societal betterment . It serves as a crucial link between government agencies, NGOs, and the public . This field sensitizes students and professionals to development processes and equips them with the practical skills to report on issues related to creating an equitable and impartial society .

3. BASIC CONCEPTS

- **Development** is defined as positive and permanent changes in the socio-economic and cultural lives of the majority of people, achieved without exploitation or violence . It involves tackling mass illiteracy, population issues, malnutrition, poor health, and hunger .
- **Development Journalism** is a modern concept that emerged post-colonialism. It shifts the focus from reporting on conflicts and disasters to highlighting success stories of people

adopting new technologies and contributing to society .

- **Development Communication**, a term coined by Nora Quebral in 1972, is the systematic application of communication principles to facilitate positive social change in disadvantaged societies . It is a two-way process that aims to give information, educate the community, and build a dialogue between the public and development agencies .

3.1 Examples of Development Communication Initiatives in India

- **Red Ribbon Express (RRE):** This was a nationwide campaign on a specially designed train to generate awareness about HIV/AIDS . The train traveled across India, using educational materials, interactive displays, and folk performances to spread information on prevention and reduce stigma, reaching thousands of villages .
- **Project Village Chhatera:** Started in 1969 by The Hindustan Times, this project focused on a small village in Northwest Delhi, with reporters writing sensitive and detailed stories about the lives, aspirations, and problems of the villagers . This media coverage acted as a catalyst, bringing attention from local leaders and resulting in the development of infrastructure like roads, bridges, and banks in the area .

3.2 Methods Used in Development Communication

- **Campaigns:** These are well-organized, intensive activities that use a combination of communication methods like meetings, tours, and media articles to create public awareness about a specific theme over a set period .

- **Radio and Television:** As popular and accessible mass media, radio and television are powerful tools for development, especially for reaching audiences with low literacy levels . **Community Radio**, run and managed by local people, has been particularly successful in giving a voice to communities and supporting local development programs .
- **Print Media:** Newspapers and periodicals can serve as a medium for continuous education, although rural and development-focused reporting often remains a low priority .
- **Information and Communication Technologies (ICTs):** This umbrella term includes computers, digital broadcast, and mobile phones, which have become transformative tools for economic and social development . Initiatives like the **Sustainable Access in Rural India (SARI)** project and the work of the **Self Employed Women's Association (SEWA)** demonstrate how ICTs can empower communities by providing access to education, e-governance services, and improved communication .

4. KNOWLEDGE AND SKILLS REQUIRED FOR A CAREER IN THIS FIELD

A career in development communication and journalism requires a blend of cognitive, creative, and technical skills .

- **Technical Skills:** Proficiency in camera techniques, video production, editing, and operating equipment for broadcast journalism is essential .
- **Journalistic and Presentation Skills:** A strong interest in current affairs, hands-on media experience, and excellent communication abilities are crucial .
- **Interpersonal Skills:** The ability to work with diverse groups, listen with sensitivity, and understand people's perspectives is imperative for a development communication specialist .
- **Language and Computer Skills:** Command of at least one language (speaking, reading, and writing) and basic computer literacy are fundamental for success in this field .

5. SCOPE AND CAREER AVENUES IN DEVELOPMENT COMMUNICATION

This field uses a variety of media to address issues ranging from information dissemination and

behavior change to social marketing and media advocacy . It offers a wide range of career paths in the social sector, including roles in media houses, government organizations, and NGOs .

Career options include:

- Development Journalist for print, TV, radio, and community media .
- Researcher in organizations studying issues like gender, environment, and health .
- Trainer for grassroots functionaries and policy makers .
- Freelancer and consultant for various organizations .

MULTIPLE CHOICE QUESTION

1. What is the primary role of Communication and Extension in a country's development efforts?
 - (A) To provide financial aid to rural populations directly.
 - (B) To create awareness, sensitise, educate, and empower the masses.
 - (C) To focus exclusively on urban infrastructure and development.
 - (D) To enforce government policies without public participation.

Ans :

- (B) To create awareness, sensitise, educate, and empower the masses.

The discipline of Communication and Extension is used to disseminate information and knowledge, thereby creating awareness and empowering people to participate in their own development, which is crucial for the nation's progress.

2. What global framework was set by world leaders in 2015 to guide development efforts?
 - (A) The Millennium Development Goals (MDGs).
 - (B) The Global Development Initiative (GDI).
 - (C) The Sustainable Development Goals (SDGs).
 - (D) The International Development Charter (IDC).

Ans :

- (C) The Sustainable Development Goals (SDGs).
- In 2015, world leaders established seventeen broad, time-bound development goals known as the Sustainable Development Goals (SDGs) to guide global and local development efforts towards a common end.

15. A development project aims to introduce a new farming technique in a village. According to Development Communication principles, what should be the first step?
- (A) Distribute pamphlets with technical instructions.
 - (B) Broadcast radio ads about the new technique.
 - (C) Build a dialogue with farmers to understand their needs.
 - (D) Implement the technique and show the results later.

Ans :

(C) Build a dialogue with farmers to understand their needs.

Development communication is a social process designed to seek a common understanding among all participants. Therefore, building a dialogue to understand the farmers' perspectives and needs is the crucial first step.

16. The campaign 'Jago Grahak Jago' is an example of a development communication initiative for what purpose?
- (A) Promoting environmental conservation.
 - (B) Encouraging safe childbirth practices.
 - (C) Eradicating tuberculosis.
 - (D) Promoting consumer awareness.

Ans :

(D) Promoting consumer awareness.

The 'Jago Grahak Jago' campaign is cited as an example of a mass media campaign used for development communication, specifically for the promotion of consumer awareness.

17. What was the Red Ribbon Express (RRE)?
- (A) A nationwide campaign for HIV/AIDS awareness.
 - (B) A luxury train promoting tourism in India.
 - (C) A mobile library for rural school children.
 - (D) A special service for transporting medical supplies.

Ans :

(A) A nationwide campaign for HIV/AIDS awareness.

The Red Ribbon Express (RRE) was a large-scale, nationwide communication campaign using a specially designed train to travel across India and generate awareness about HIV/AIDS.

18. Which statement accurately describes a feature of the Red Ribbon Express coaches?

- (A) They were primarily used for transporting medical staff.
- (B) They were equipped with educational materials and interactive touch screens.
- (C) They contained only hospital beds for treating patients.
- (D) They were designed as luxury passenger compartments.

Ans :

(B) They were equipped with educational materials and interactive touch screens.

The seven coaches of the RRE were specially equipped with educational materials on HIV/AIDS, interactive touch screens, 3-D models, a projector, and facilities for counselling and treatment.

19. Consider the following statements about the objectives of the Red Ribbon Express (RRE) campaign:

1. To spread information regarding primary prevention services for HIV/AIDS.
2. To enhance people's knowledge about preventive measures and healthy lifestyles.
3. To provide long-term treatment for all individuals diagnosed with AIDS on the train.

Which of the above statements are correct?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1, 2, and 3

Ans :

(A) 1 and 2 only

The RRE's objectives were to spread information on prevention, reduce stigma, and enhance knowledge about healthy habits. It provided counselling and basic treatment but not long-term care for all diagnosed individuals.

20. Which organizations collaborated to implement the Red Ribbon Express project?

- (A) Ministry of Health and WHO only.
- (B) NACO, NYKS, UNICEF, UNAIDS, and Indian Railways.
- (C) Indian Medical Association and State Governments.
- (D) A consortium of private hospitals and pharmaceutical companies.

Ans :

(B) NACO, NYKS, UNICEF, UNAIDS, and Indian Railways.

of people on a permanent basis, achieved without exploitation or violence.

9. What was the focus of reporting in India prior to independence?
- (A) Success stories of farmers and local innovators.
 - (B) Struggles, fights, assassinations, and disasters.
 - (C) Government development schemes and policies.
 - (D) Cultural festivals and community events.

Ans :

(B) Struggles, fights, assassinations, and disasters. Before independence, reporting in the colonial era focused on issues like struggles, fights, assassinations, and disasters, often reflecting the perspective of the colonial rulers.

10. What is the primary focus of modern development journalism?
- (A) Reporting exclusively on political conflicts.
 - (B) Criticizing all government development efforts.
 - (C) Covering international celebrity news and events.
 - (D) Highlighting success stories of people adopting new technologies.

Ans :

(D) Highlighting success stories of people adopting new technologies.

Modern development journalism has shifted its focus to include success stories of individuals and communities who have adopted new technologies and methods to improve society, describing people at work in new projects.

11. How is "Development Communication" defined in the text?
- (A) The practice of systematically applying communication for social change.
 - (B) The use of communication for corporate advertising.
 - (C) The study of historical communication methods.
 - (D) The process of government-to-public information broadcast.

Ans :

(A) The practice of systematically applying communication for social change.

Development Communication is the practice of systematically applying communication processes, strategies, and principles to act as a catalyst for positive social change and development.

12. Who first coined the term "Development Communication" in 1972?
- (A) Wilbur Schramm
 - (B) Everett Rogers
 - (C) Daniel Lerner
 - (D) Nora Quebral

Ans :

(D) Nora Quebral

The term "Development Communication" was first coined in 1972 by Nora Quebral, who defined it as the art and science of human communication used for planned development.

13. Which of the following is an essential feature of Development Communication?
- (A) It is a one-way process from experts to the public.
 - (B) It is oriented to socio-economic development and happiness.
 - (C) It relies exclusively on traditional media channels.
 - (D) It primarily targets elite, urban populations.

Ans :

(B) It is oriented to socio-economic development and happiness.

A key feature of Development Communication is its orientation towards the socio-economic development and overall happiness of the people and the community at large, aiming to inform and educate.

14. What is the underlying assumption of the two-way process in Development Communication?
- (A) That development agencies have all the solutions.
 - (B) That people facing problems can find solutions.
 - (C) That motivation is not a key element for change.
 - (D) That mass media alone can solve all problems.

Ans :

(B) That people facing problems can find solutions.

The two-way communication process in development assumes that people who face problems have an innate ability to find solutions, though they may require assistance in seeking resources, thereby building a dialogue.

- 3.** What does advocacy primarily involve in the context of development communication?
- (A) Supporting a cause and lobbying for policy changes.
 - (B) Providing legal representation in courts for development issues.
 - (C) Funding development projects in disadvantaged areas.
 - (D) Conducting academic research on development theories.

Ans :

(A) Supporting a cause and lobbying for policy changes.

In development, advocacy is not about legal representation but about supporting a cause, such as girls' education or environmental protection, by lobbying governments and building alliances to inform and influence policy.

- 4.** Which of the following is NOT listed as a major goal of extension programmes in India?
- (A) Poverty alleviation and enhancing food security.
 - (B) Improvement of health and sanitation.
 - (C) Environmental conservation and gender equity.
 - (D) Promotion of international tourism.

Ans :

(D) Promotion of international tourism.

Extension programmes in India focus on critical development challenges like poverty, food security, health, sanitation, education, environmental conservation, and gender equity, not primarily on promoting international tourism.

- 5.** What is the core purpose of Social and Behaviour Change Communication (SBCC) strategies?
- (A) To market commercial products to rural consumers.
 - (B) To provide direct financial support to communities.
 - (C) To enable behaviour change for adopting healthy practices.
 - (D) To document traditional cultural practices for preservation.

Ans :

(C) To enable behaviour change for adopting healthy practices.

SBCC strategies are devised to enable behaviour change among people, encouraging them to adopt

healthy and beneficial practices, thereby meeting the challenges of development programmes.

- 6.** What power does mass media wield in society, according to the text?
- (A) The power to investigate and question happenings.
 - (B) The power to enforce laws and regulations.
 - (C) The power to directly fund development projects.
 - (D) The power to control political outcomes directly.

Ans :

(A) The power to investigate and question happenings.

Mass media has the significant power to investigate and question what is happening in society, where, and why, playing a crucial role in journalism and public discourse.

- 7.** Why is the Press often called the "fourth pillar of democracy"?
- (A) Because it is the oldest form of mass communication.
 - (B) Because it is owned and operated by the government.
 - (C) Because people's participation is the foundation of democracy.
 - (D) Because it generates the highest revenue among all media.

Ans :

(C) Because people's participation is the foundation of democracy.

The Press is considered the fourth pillar of democracy because it plays a vital role in a democratic system where people's participation is fundamental, and media keeps the public informed and engaged.

- 8.** What is the definition of "Development" provided in the chapter?
- (A) Rapid industrial growth in urban centers.
 - (B) Increased foreign investment in the country.
 - (C) The expansion of government infrastructure.
 - (D) Positive changes in socio-economic and cultural lives.

Ans :

(D) Positive changes in socio-economic and cultural lives.

Development is defined as positive changes in the socio-economic and cultural lives of the majority

The RRE project was a collaborative effort implemented by the National AIDS Control Organisation (NACO), Nehru Yuva Kendra Sangathan (NYKS), and international agencies like UNICEF and UNAIDS, in cooperation with Indian Railways.

- 21.** What is a “campaign” in the context of development communication?
- (A) A single advertisement broadcast on television.
 - (B) A long-term research project on a social issue.
 - (C) A political rally held before an election.
 - (D) A combination of methods and materials about a theme.

Ans :

(D) A combination of methods and materials about a theme.

A campaign is defined as a well-organized and intensive activity that combines various communication methods and materials (like meetings, leaflets, exhibitions) focused on a specific theme for a set period.

- 22.** The Swachh Bharat Mission, which aimed to eliminate open defecation through mass scale behaviour change and toilet construction, is an example of what?
- (A) A nationwide campaign/Janandolan.
 - (B) A Public Service Announcement.
 - (C) A Community Radio initiative.
 - (D) A Participatory Video project.

Ans :

(A) A nationwide campaign/Janandolan.

The Swachh Bharat Mission is provided as a prime example of a nationwide campaign, or ‘Janandolan’, that was implemented to achieve a specific development goal—universal sanitation coverage.

- 23.** What is a key advantage of a well-organized campaign?
- (A) It is the least expensive communication method.
 - (B) It requires minimal planning and organization.
 - (C) It creates a conducive environment for adopting practices.
 - (D) It guarantees immediate and permanent behavior change.

Ans :

(C) It creates a conducive environment for adopting practices.

A major benefit of a campaign is that it creates public awareness and a conducive environment that stimulates action and encourages people to adopt the new practices being promoted.

- 24.** What is a significant advantage of broadcast journalism over print media for development purposes?
- (A) It is less regulated by the government.
 - (B) It can reach people with poor literacy levels.
 - (C) It provides more in-depth analysis of issues.
 - (D) It is a permanent record of information.

Ans :

(B) It can reach people with poor literacy levels. Broadcast journalism, including radio and television, has a distinct advantage over print media because it can effectively reach a wider audience, particularly those who are illiterate or have low literacy skills.

- 25.** Why is radio considered the most accessible mass medium?
- (A) It is a mobile medium that can move with the listener.
 - (B) It offers the highest quality video content.
 - (C) It is controlled by local communities everywhere.
 - (D) It requires an expensive subscription service.

Ans :

(A) It is a mobile medium that can move with the listener.

Radio’s accessibility stems from its mobility; it can be listened to almost anywhere, whether the listener is at work, at home, or traveling, making it a constant companion.

- 26.** What is a Public Service Announcement (PSA)?
- (A) A full-length documentary on a social issue.
 - (B) A daily news broadcast on a radio station.
 - (C) An interactive talk show with celebrity guests.
 - (D) A brief 10-60 second message between programs.

Ans :

(D) A brief 10-60 second message between programs.

A Public Service Announcement (PSA) is a brief message, typically 10 to 60 seconds long, broadcast between regular programs. It often takes the form of a jingle to convey a message for the public good.

- 27.** A short, catchy jingle on the radio reminding listeners to “say no to tobacco” is an example of what?
- (A) A radio documentary.
 - (B) A news report.
 - (C) A Public Service Announcement.
 - (D) A radio drama series.

Ans :

(C) A Public Service Announcement.

This is a classic example of a PSA, which is a short advertisement promoting an idea or message for public good, such as health advice, using a catchy format like a jingle.

- 28.** How have newer radio formats overcome the limitation of not receiving feedback?
- (A) By broadcasting only pre-recorded content.
 - (B) By using interactive formats and local radio stations.
 - (C) By removing all advertisements from their broadcasts.
 - (D) By focusing solely on national news broadcasts.

Ans :

(B) By using interactive formats and local radio stations.

The earlier limitation of one-way communication in radio has been overcome through the introduction of interactive formats, call-in shows, and the establishment of local and community radio stations that encourage audience participation.

- 29.** What is a “Community Radio” station?
- (A) A national radio network run by the government.
 - (B) An international radio station broadcasting in multiple languages.
 - (C) A commercial radio station focused on pop music.
 - (D) A local radio station run and managed by local people.

Ans :

(D) A local radio station run and managed by local people.

Community Radio (CR) is a concept of a ‘local radio station’ that is run and managed by local people. Its content is for local use, often in the local dialect, and it supports local development programmes.

- 30.** What is a key prerequisite for a successful community radio initiative?

- (A) Broadcasting only international news and music.
- (B) Securing high-profile celebrity endorsements.
- (C) Having the most powerful broadcasting equipment.
- (D) Participatory content development and rapport with the community.

Ans :

(D) Participatory content development and rapport with the community.

For a community radio initiative to be successful, it is essential to involve the community in developing content and to build a strong rapport, ensuring the station is a true voice for the people.

- 31.** Which of the following is NOT a characteristic of Community Radio?
- (A) It is run and managed by local people.
 - (B) Its content is for local use, often in a local dialect.
 - (C) It primarily focuses on broadcasting national-level political debates.
 - (D) It encourages participation from the local community.

Ans :

(C) It primarily focuses on broadcasting national-level political debates.

Community Radio’s purpose is to serve the local community with relevant, local content in their own dialect. It does not primarily focus on national-level political debates, which are the domain of national broadcasters.

- 32.** What was the purpose of the EDUSAT satellite launched by India in 2004?
- (A) To serve the educational sector with distance education.
 - (B) To provide high-speed internet to urban areas.
 - (C) To improve military communication systems.
 - (D) To monitor weather patterns across the country.

Ans :

(A) To serve the educational sector with distance education.

EDUSAT was India’s first satellite built exclusively to serve the educational sector. It was designed to meet the demand for an interactive satellite-based distance education system in India.

- 33.** A television series that combines an engaging story with messages about women's empowerment and health is an example of what concept?
- (A) A reality show.
 - (B) A news bulletin.
 - (C) A sports broadcast.
 - (D) Edutainment.

Ans :

(D) Edutainment.

Programmes like 'Kyunki Jeena isi Ka Nam hai' and 'Main Kuch Bhi Kar Sakti Hun' are examples of harnessing education and entertainment together for the common good, a concept known as edutainment.

- 34.** What is a common criticism of news appearing in national and regional daily newspapers?
- (A) They focus too much on rural development issues.
 - (B) Their approach is predominantly urban-centric.
 - (C) They give equal space to all social issues.
 - (D) They avoid reporting on any political matters.

Ans :

(B) Their approach is predominantly urban-centric.

The text states that the bulk of news in national and regional dailies is urban in its approach, with reports on agriculture, rural problems, and other development concerns remaining low in priority.

- 35.** What was "Project Village Chhatera," initiated by The Hindustan Times in 1969?
- (A) A regular fortnightly column describing life in the village.
 - (B) A project to build a new school in the village.
 - (C) A campaign to promote tourism in the village.
 - (D) A financial aid program for the village farmers.

Ans :

(A) A regular fortnightly column describing life in the village.

Project Village Chhatera was an initiative where The Hindustan Times newspaper started a regular fortnightly column that featured detailed stories and photographs about the lives, issues, and aspirations of the people in Chhatera village.

- 36.** Assertion (A): The 'Project Village Chhatera' proved to be a catalyst in bringing various services and benefits to the village.
Reason (R): The sensitive and detailed reporting

in a major newspaper drew the attention of local leaders and authorities to the village's problems.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion that the project was a catalyst is true. The reason, that the media coverage brought attention from leaders and authorities, is also true and directly explains why the project was successful in bringing services and infrastructure to the village.

- 37.** For a development journalist, what is described as a valuable research tool?
- (A) Attending press conferences only.
 - (B) Relying solely on government reports.
 - (C) The internet and basic computer literacy.
 - (D) Conducting interviews via postal mail.

Ans :

(C) The internet and basic computer literacy.

The text explicitly states that for development journalists, the internet is a valuable research tool, and a basic level of computer literacy is essential to work satisfactorily in the modern media landscape.

- 38.** What does the umbrella term "Information and Communication Technologies (ICTs)" include?
- (A) Only traditional print media like newspapers.
 - (B) Only radio and television broadcasting equipment.
 - (C) Only interpersonal communication methods.
 - (D) Computer hardware, software, and telecommunications technologies.

Ans :

(D) Computer hardware, software, and telecommunications technologies.

ICTs is a broad, umbrella term that includes computer hardware and software, digital broadcast technologies, and various telecommunications technologies used for processing and communicating information.

- 39.** What is a key way mobile phones have contributed to development?
- (A) By replacing all other forms of communication.

- 51.** What does “people-centric” mean in the context of development communication?
- (A) Focusing only on population statistics and data.
 - (B) Centering the work around the needs of political leaders.
 - (C) Using people as subjects for academic research only.
 - (D) Prioritizing the perspectives and needs of the people.

Ans :

(D) Prioritizing the perspectives and needs of the people.

Being ‘people-centric’ requires the professional to understand people’s viewpoints on issues that affect their lives and to involve them in finding solutions that are appropriate for their context.

- 52.** Which computer application skills are mentioned as desirable for success in development communication?
- (A) Advanced video game design and programming.
 - (B) Microsoft Office (Word, Excel, PowerPoint).
 - (C) Complex database management systems.
 - (D) Cybersecurity and ethical hacking tools.

Ans :

(B) Microsoft Office (Word, Excel, PowerPoint).

The text specifically mentions that basic computer skills in using Microsoft Office applications, including Word, Excel, and PowerPoint, are desirable for success in the field.

- 53.** Development communication employs a variety of techniques. Which of the following is one of them?
- (A) Social marketing.
 - (B) Corporate advertising.
 - (C) Political campaigning.
 - (D) Product merchandising.

Ans :

(A) Social marketing.

The text lists several techniques used in development communication, including information dissemination, behavior change, social marketing, and media advocacy, all aimed at social and developmental goals.

- 54.** Which of the following is a potential career path for a development communication specialist?
- (A) Stock market analyst.
 - (B) Corporate lawyer.
 - (C) Development Journalist.

(D) Commercial airline pilot.

Ans :

(C) Development Journalist.

The text provides a list of career options, including working as a Development Journalist in various media like print, TV, and radio, which is a direct application of the skills learned.

- 55.** A student skilled in research and passionate about environmental issues could pursue which career in the development sector?
- (A) A radio jockey on a music channel.
 - (B) A research scholar in an organization studying environmental issues.
 - (C) A trainer for corporate sales teams.
 - (D) A freelance photographer for fashion magazines.

Ans :

(B) A research scholar in an organization studying environmental issues.

The text lists “Research scholar in research organisations” as a career option, specifying that one can study issues in areas like environment, gender, health, and livelihood, which fits the student’s profile perfectly.

- 56.** Match the communication method (Column I) with its description (Column II).

	Column I		Column II
1.	Campaign	a.	A brief 10-60 second message between programs, often a jingle.
2.	PSA	b.	A local radio station run and managed by local people.
3.	Community Radio	c.	An intensive activity using different methods about a theme for a set time.
4.	ICT	d.	An umbrella term including computer hardware and telecommunications.

- (A) 1-c, 2-a, 3-b, 4-d
- (B) 1-d, 2-c, 3-a, 4-b
- (C) 1-a, 2-b, 3-d, 4-c
- (D) 1-b, 2-d, 3-c, 4-a

Ans :

(A) 1-c, 2-a, 3-b, 4-d

A campaign is an intensive, multi-method activity. A PSA is a brief message. Community Radio is a

45. Which type of skills are required to be able to comprehend an issue in the field of development communication?
- (A) Technical skills
 - (B) Creative skills
 - (C) Cognitive skills
 - (D) Language skills

Ans :

(C) Cognitive skills

The text states that cognitive skills are the first requirement mentioned for a career in this field, as they are necessary to be able to comprehend and understand the issues being addressed.

46. A student wants to become a development filmmaker. Besides content development, what specific skills would they need to acquire?
- (A) Knowledge of accounting and financial management.
 - (B) Skills in public speaking and debate.
 - (C) Training in classical music and dance.
 - (D) Camera techniques and video production skills.

Ans :

(D) Camera techniques and video production skills.

For a career as a development filmmaker, the text specifies the need for technical skills in camera techniques and video production, in addition to content development and implementation.

47. Which of the following is NOT listed as a skill required for a DCJ professional?
- (A) Learning laws and regulations about what they can do.
 - (B) Developing interviewing techniques.
 - (C) Mastering complex financial investment strategies.
 - (D) Learning basic radio production skills using software.

Ans :

(C) Mastering complex financial investment strategies.

While DCJ professionals need a wide range of technical, presentation, and legal knowledge, the text does not mention mastering complex financial investment strategies as a required skill for this field.

48. Why is the ability to work with diverse groups considered imperative for a development communication student?

- (A) To be people-centric and understand different viewpoints.
- (B) To be able to sell commercial products to different communities.
- (C) To work exclusively with international organizations.
- (D) To get higher pay scales and promotions quickly.

Ans :

(A) To be people-centric and understand different viewpoints.

The ability to work with diverse groups is crucial because a development communication professional needs to be people-centric, understanding the viewpoints of different people on issues affecting their lives to find workable solutions.

49. Assertion (A): For a career in DCJ, passion for adventure and travel are added advantages.
Reason (R): Traveling to remote parts of the country helps in gathering unique and interesting stories for development journalism.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is directly stated in the text. The reason provides the logical explanation for why travel is advantageous—it enables the journalist to access and gather unique stories from remote areas.

50. What is the guiding principle of social work that a development communication specialist should follow?
- (A) “The expert knows best.”
 - (B) “Helping people help themselves.”
 - (C) “Development at any cost.”
 - (D) “Information is for the elite.”

Ans :

(B) “Helping people help themselves.”

The text explicitly states that the guiding principle for a development communication specialist has to be ‘helping people help themselves,’ emphasizing empowerment and self-reliance rather than dependency.

- (B) By enabling the expansion of markets and social business.
- (C) By functioning only as entertainment devices.
- (D) By being accessible only to the wealthiest individuals.

Ans :

(B) By enabling the expansion of markets and social business.

The text highlights that mobile phone use has significantly facilitated the expansion of markets, social businesses, and public services, enabling a wide range of economic services like banking, marketing, and employment.

- 40.** What was the focus of the Sustainable Access in Rural India (SARI) project in Tamil Nadu?
- (A) Building roads and bridges in rural areas.
 - (B) Providing free mobile phones to all villagers.
 - (C) Setting up tele-centre kiosks offering various e-services.
 - (D) Establishing a community radio station for farmers.

Ans :

(C) Setting up tele-centre kiosks offering various e-services.

The SARI project is cited as an example of using ICTs for development by setting up around 80 tele-centre kiosks that offered services like computer education, e-mail, and e-government services.

- 41.** What is the primary aim of the Self Employed Women's Association (SEWA)?
- (A) To achieve full employment and self-reliance for women workers.
 - (B) To provide formal sector jobs to educated women.
 - (C) To run for-profit businesses in urban centers.
 - (D) To offer micro-loans to male entrepreneurs.

Ans :

(A) To achieve full employment and self-reliance for women workers.

SEWA's main goal is to achieve full employment and self-reliance for poor women working in the informal sector by focusing on work, income, food, and social security aspects like health and shelter.

- 42.** Assertion (A): SEWA embarked on a journey to include ICTs within its work.
Reason (R): SEWA understood that poor access to information contributes to poverty and wanted to use ICTs as a tool for empowering its grassroots members.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is a factual statement from the text. The reason accurately explains SEWA's motivation for adopting ICTs – they recognized the link between information access and poverty and saw technology as an empowerment tool.

- 43.** What have the Community Learning Centres (CLCs) set up by SEWA in rural areas focused on?
- (A) Providing primary school education to children.
 - (B) Offering traditional handicraft training.
 - (C) Political training for women candidates.
 - (D) IT training to build the capacity of its members.

Ans :

(D) IT training to build the capacity of its members.

The Community Learning Centres (CLCs) established by SEWA specifically focus on providing IT training to build the capacity of their members, including technical fields like electrical, mechanical, and IT engineering.

- 44.** Besides savings in time and cost, what is a major benefit for SEWA members from using ICTs?
- (A) It allows them to avoid all forms of physical work.
 - (B) It enables quick communication and problem-solving across districts.
 - (C) It provides them with free entertainment and movies.
 - (D) It replaces the need for the women's union.

Ans :

(B) It enables quick communication and problem-solving across districts.

The text explicitly mentions that in addition to saving time and cost, the use of ICTs enables SEWA members to achieve quick and easy communication and solve problems across different districts.

local station run by the community. ICT is an umbrella term for information and communication technologies.

- 57.** Arrange the following events in chronological order of their inception or launch.
1. Launch of Swachh Bharat Mission
 2. Launch of EDUSAT satellite
 3. Coining of the term “Development Communication”
 4. Start of “Project Village Chhatera”
- (A) 4, 3, 2, 1
(B) 3, 4, 1, 2
(C) 4, 2, 3, 1
(D) 3, 1, 4, 2

Ans :

- (A) 4, 3, 2, 1

Project Village Chhatera started in 1969. The term “Development Communication” was coined in 1972. EDUSAT was launched in 2004. Swachh Bharat Mission was launched in 2014.

- 58.** All of the following are essential features of Development Communication EXCEPT:
- (A) It is oriented to socio-economic development.
(B) It aims at giving information and educating.
(C) It is based on audience characteristics.
(D) It is primarily a one-way process of communication.

Ans :

- (D) It is primarily a one-way process of communication.

Development communication is explicitly described as a two-way process of communication between information providers and the community, not a one-way flow of information.

- 59.** What is the main objective of journalism in a democratic society?
- (A) To provide entertainment to the public.
(B) To support the government in all its actions.
(C) To enable people’s participation by keeping them informed.
(D) To maximize profit for media corporations.

Ans :

- (C) To enable people’s participation by keeping them informed.

The text states that people’s participation is the foundation of democracy and that the Press plays a vital role by informing the public, thereby enabling their participation and upholding democratic principles.

- 60.** Development journalism primarily seeks to describe what?
- (A) The lives of celebrities and politicians.
(B) The outcomes of major sporting events.
(C) The process of international diplomacy.
(D) The people at work in new development projects.

Ans :

- (D) The people at work in new development projects.

Development journalism is defined as seeking to describe the people at work in new projects and processes, highlighting the human element and successes in development efforts.

- 61.** A local NGO wants to start a radio station to address agricultural issues for farmers in their own dialect. What type of station should they apply for a license for?
- (A) A National Broadcast Station.
(B) A Commercial FM Station.
(C) A Community Radio Station.
(D) An International Shortwave Station.

Ans :

- (C) A Community Radio Station.

This scenario perfectly describes the purpose of a Community Radio station, which is local, managed by the community, uses the local dialect, and supports development programs relevant to the audience.

- 62.** Which of the following pairs of a development project and its focus is correctly matched?
- (A) Project Village Chhatera - Print Journalism for Rural Issues
(B) Red Ribbon Express - Environmental Conservation
(C) Swachh Bharat Mission - HIV/AIDS Awareness
(D) SEWA’s ICT Initiative - Urban Infrastructure Development

Ans :

- (A) Project Village Chhatera - Print Journalism for Rural Issues

Project Village Chhatera was an initiative by a newspaper to report on the lives and issues of a specific village, making it an example of print journalism focused on rural development. The other pairs are incorrectly matched.

- 63.** How many coaches did the Red Ribbon Express (RRE) train comprise?

- (A) Four coaches
- (B) Five coaches
- (C) Seven coaches
- (D) Ten coaches

Ans :

- (C) Seven coaches

The text explicitly states that the Red Ribbon Express comprised seven coaches, each specially equipped for the awareness campaign.

64. Why is motivation considered a key element in Development Communication?

- (A) It ensures funding for the project from international agencies.
- (B) It encourages people to actively participate and adopt new ideas.
- (C) It helps journalists write more entertaining stories.
- (D) It is a requirement for getting government approval.

Ans :

- (B) It encourages people to actively participate and adopt new ideas.

Motivation is viewed as the key element because it drives the process of change. It encourages people to engage with the information, participate in the dialogue, and take action to adopt new practices.

65. Assertion (A): The field of broadcast journalism has a distinct advantage in reaching illiterate populations.

Reason (R): Radio and television do not require literacy skills to be understood, unlike print media.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is a stated fact in the chapter. The reason logically explains why broadcast media is advantageous for this group, as listening and viewing do not depend on the ability to read.

66. Consider the following statements regarding skills for a career in DCJ:

1. Cognitive skills are needed to comprehend issues.

2. Technical skills like video production are important for filmmakers.
3. Excellent interpersonal skills are demanded by the work culture.
4. Advanced knowledge of theoretical physics is a prerequisite.

Which of the statements are correct?

- (A) 1, 2, and 3
- (B) 1, 3, and 4
- (C) 2, 3, and 4
- (D) 1, 2, and 4

Ans :

- (A) 1, 2, and 3

The text mentions cognitive skills, technical skills like video production, and interpersonal skills as requirements. Knowledge of theoretical physics is not mentioned and is irrelevant to the field.

67. Which of the following pairs of a development program and its primary medium is INCORRECTLY matched?

- (A) Red Ribbon Express - A specially designed train.
- (B) Swachh Bharat Mission - Nationwide campaign/Janandolan.
- (C) Project Village Chhatera - Community Radio.
- (D) SEWA's Initiative - Information and Communication Technologies (ICTs).

Ans :

- (C) Project Village Chhatera - Community Radio. Project Village Chhatera was an initiative of The Hindustan Times, a newspaper. Therefore, its primary medium was print media, not community radio. The other pairs are correctly matched.

68. What is the scope of study in Development Communication?

- (A) Focusing only on the history of mass media.
- (B) Studying only the technical aspects of broadcasting.
- (C) Analyzing the financial performance of media companies.
- (D) Helping build communication capabilities of people in development.

Ans :

- (D) Helping build communication capabilities of people in development.

The scope of study includes undertaking projects that help build up the communication capabilities and resources of people involved in the development process, thereby empowering them.

- 69.** How does Development Communication link different entities in society?
- (A) By linking government agencies, NGOs, and people.
 - (B) By creating competition between them.
 - (C) By isolating communities from outside influence.
 - (D) By creating barriers to information flow.

Ans :

- (A) By linking government agencies, NGOs, and people.

One of the key roles of development communication is to act as a bridge, linking government agencies, non-governmental organizations (NGOs), and the people to facilitate collaboration and information sharing for development.

- 70.** Which of the following is NOT a method used in Development Communication mentioned in the chapter?
- (A) Campaign
 - (B) Radio and Television
 - (C) Print Media
 - (D) Corporate Lobbying

Ans :

- (D) Corporate Lobbying

While advocacy and lobbying are mentioned in the introduction, the specific methods detailed for development communication are campaigns, radio/TV, print media, and ICTs. Corporate lobbying for commercial interests is not discussed as a method.

- 71.** What is the term for a development communication specialist who works independently for various organizations?
- (A) Trainer
 - (B) Researcher
 - (C) Freelancer
 - (D) Radio Jockey

Ans :

- (C) Freelancer

The text lists career options, including working as a “Freelancer and consultant for organisations,” which describes an independent professional offering their services to different clients.

- 72.** Which statement best describes the nature of journalism today?
- (A) It is becoming obsolete due to social media.
 - (B) It is an inseparable part of any democratic system.

- (C) It is focused only on positive news stories.
- (D) It is completely free from any external influences.

Ans :

- (B) It is an inseparable part of any democratic system.

The text clearly states that journalism is taken as an inseparable part of any democratic system, playing a vital role in informing the public and facilitating participation.

- 73.** What is the significance of participatory content development for community radio?
- (A) It ensures the content is relevant to the listeners.
 - (B) It reduces the cost of broadcasting.
 - (C) It attracts national advertisers to the station.
 - (D) It fulfills a government legal requirement.

Ans :

- (A) It ensures the content is relevant to the listeners.

Involving the community in creating content (participatory content development) is crucial because it ensures that the programs are relevant to their lives, needs, and interests, making the radio a true “voice of the people.”

- 74.** During its journey, the Red Ribbon Express used performing artists to conduct what kind of activities in villages?
- (A) Medical check-up camps.
 - (B) Information Education Communication (IEC) activities.
 - (C) Voter registration drives.
 - (D) Agricultural training workshops.

Ans :

- (B) Information Education Communication (IEC) activities.

The performing artists on the RRE conducted Information Education Communication (IEC) activities, which included street plays, folk songs, stories, and group counselling sessions to spread awareness.

- 75.** Assertion (A): There is a dearth of DCJ professionals who write with passion and sensitivity for the rural poor.
Reason (R): Most national newspapers prioritize urban-centric news over rural development concerns.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 (C) (A) is true, but (R) is false.
 (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is directly stated in the text. The reason, which highlights the urban bias of major newspapers, provides a logical context for why there is a shortage of journalists focusing on rural issues.

- 76.** Match the organization/project (Column I) with its associated state or feature (Column II).

	Column I		Column II
1.	SARI Project	a.	Gujarat
2.	SEWA	b.	Rajasthan
3.	Community Radio Example	c.	Fortnightly newspaper column
4.	Project Village Chhatera	d.	Tamil Nadu

- (A) 1-d, 2-a, 3-b, 4-c
 (B) 1-a, 2-d, 3-c, 4-b
 (C) 1-c, 2-b, 3-a, 4-d
 (D) 1-b, 2-c, 3-d, 4-a

Ans :

(A) 1-d, 2-a, 3-b, 4-c

The SARI project was in Tamil Nadu. SEWA is based in Gujarat. Vanasthali Vidyapeeth in Rajasthan is an example of a community radio. Project Village Chhatera was a newspaper column.

- 77.** To address malnutrition in a remote community, a health organization uses a combination of posters, community meetings, and a series of radio dramas over three months. This approach is best described as a:
 (A) Public Service Announcement
 (B) Campaign
 (C) Tele-centre project
 (D) Print journalism initiative

Ans :

(B) Campaign

This approach fits the definition of a campaign perfectly: it uses a combination of different communication methods and materials, focuses on

a specific theme (malnutrition), and is conducted over a defined period.

- 78.** What fundamental right of people makes journalism a reality?
 (A) The right to property.
 (B) The right to equality.
 (C) The right to opinion and expression.
 (D) The right to freedom of religion.

Ans :

(C) The right to opinion and expression.

The text states that the right to opinion and expression would not be a reality without the various forms of media, linking the existence and importance of journalism directly to this fundamental right.

- 79.** Which of the following accurately describes the role of a trainer in the field of development communication?
 (A) They conduct research on development issues.
 (B) They train grassroots level and field functionaries.
 (C) They write articles for national newspapers.
 (D) They manage the finances of development projects.

Ans :

(B) They train grassroots level and field functionaries.

One of the career options listed for a development communication specialist is to be a trainer, specifically to train grassroots level functionaries, field workers, policy makers, and corporate officers.

- 80.** The “art and science of human communication” used for facilitating the development of a disadvantaged society in a planned manner refers to:
 (A) Corporate Communication
 (B) Political Journalism
 (C) Public Relations
 (D) Development Communication

Ans :

(D) Development Communication

This phrase is part of the comprehensive definition of Development Communication provided in the text, first articulated by Nora Quebral, emphasizing its planned and purposeful nature for social good.

- 81.** What is the primary purpose of a Public Service Announcement (PSA) on the radio?
- (A) To provide information or suggestions for public good.
 - (B) To advertise a new commercial product.
 - (C) To broadcast a long-form interview with an expert.
 - (D) To announce the schedule for upcoming programs.

Ans :

- (A) To provide information or suggestions for public good.

PSAs are brief messages that serve as advertisements for an idea or a message for the public good, such as promoting traffic safety or health habits, rather than for commercial purposes.

- 82.** According to the text, what is the typical duration of a Public Service Announcement (PSA)?
- (A) 1-2 minutes
 - (B) 10-60 seconds
 - (C) 5-10 minutes
 - (D) Exactly 3 minutes

Ans :

- (B) 10-60 seconds

A Public Service Announcement (PSA) is described as a brief message, typically lasting between 10 to 60 seconds, that is aired between regular programs to convey a message for the public interest.

- 83.** A radio program allows listeners to call in and share their experiences on a local issue. This is an example of what kind of radio format?
- (A) One-way broadcast format.
 - (B) Pre-recorded documentary format.
 - (C) News bulletin format.
 - (D) Interactive format.

Ans :

- (D) Interactive format.

The limitation of older radio formats has been overcome by newer interactive formats, which allow for audience participation, such as call-in shows, making the medium more engaging and two-way.

- 84.** Who is eligible to seek a license to set up a local community radio station?
- (A) Only national government agencies.
 - (B) Only large multinational corporations.
 - (C) NGOs and educational institutions.

- (D) Only individual political leaders.

Ans :

- (C) NGOs and educational institutions.

The text states that Non-Governmental Organisations (NGOs) and educational institutions can seek a license to establish a local community radio station to broadcast information on developmental aspects.

- 85.** What is the primary role of a community radio station in development?
- (A) To broadcast international music and news.
 - (B) To act as a voice for the people and a catalyst for development.
 - (C) To generate maximum profit through advertisements.
 - (D) To compete with national television channels for ratings.

Ans :

- (B) To act as a voice for the people and a catalyst for development.

Community radio serves as the voice of the local people, acting as a catalyst for their development by providing a platform to express views, share talents, and access relevant information.

- 86.** Which of the following is a correct example of a community radio initiative mentioned in the text?
- (A) BBC World Service.
 - (B) All India Radio National Channel.
 - (C) Delhi University (DU) FM.
 - (D) Radio Mirchi commercial station.

Ans :

- (C) Delhi University (DU) FM.

The text provides specific examples of successful community radio attempts, including the station operated by Delhi University (DU) FM, which serves the community in North Delhi.

- 87.** The television program 'Main Kuch Bhi Kar Sakti Hun' is presented as an example of what?
- (A) Harnessing education and entertainment together.
 - (B) A program with little educational value.
 - (C) A program that only private channels can produce.
 - (D) A reality show focused on celebrity life.

Ans :

- (A) Harnessing education and entertainment together.

This program, along with 'Kyunki Jeena isi Ka Nam hai', is cited as an example that shows the scope of combining education and entertainment for the common good, also known as edutainment.

- 88.** What is a primary challenge facing development journalism in print media?
- (A) There are too many newspapers covering rural issues.
 - (B) Print media is more expensive than television for consumers.
 - (C) Readers are not interested in development news at all.
 - (D) Reports on development concerns often have low priority.

Ans :

(D) Reports on development concerns often have low priority.

A key challenge identified is that in national and regional dailies, reports on agriculture, rural problems, and other development concerns generally remain low in priority compared to urban-centric news.

- 89.** Assertion (A): The print coverage of 'Project Village Chhatera' brought tangible benefits like machines and roads to the area.
Reason (R): The project focused on interviewing national politicians about their policies for the village.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(C) (A) is true, but (R) is false.

The assertion that the project brought benefits is true. However, the reason is false; the project's success came from detailed, sensitive reporting on the lives and problems of the villagers themselves, not from interviewing national politicians.

- 90.** Why is an understanding of ICTs important for development communication today?
- (A) Because ICTs have replaced all traditional forms of media.
 - (B) Because ICTs are proving to be economically and socially transformative.
 - (C) Because ICTs are only useful for entertainment purposes.

(D) Because only wealthy nations can afford to use ICTs.

Ans :

(B) Because ICTs are proving to be economically and socially transformative.

The text emphasizes the importance of ICTs because they are proving to be transformative in economic, social, and political spheres, enabling new markets, services, and empowerment opportunities.

- 91.** What is a tele-centre, as described in the context of development?
- (A) A call center for commercial customer service.
 - (B) A television production studio in a major city.
 - (C) A government office for telecommunication policy.
 - (D) A community-based kiosk providing access to ICT services.

Ans :

(D) A community-based kiosk providing access to ICT services.

A tele-centre is described as a direct approach to using ICTs for development, where kiosks are set up in communities to offer a range of services like computer education, internet access, and e-government services.

- 92.** A development project in a rural area uses mobile phones to provide farmers with daily market prices and weather updates. This is a practical application of what?
- (A) Traditional folk media.
 - (B) Print journalism.
 - (C) Information and Communication Technologies (ICTs).
 - (D) Public Service Announcements.

Ans :

(C) Information and Communication Technologies (ICTs).

This is a clear example of using ICTs, specifically mobile phones, to provide valuable information that can improve livelihoods, which is a key aspect of development communication.

- 93.** In SEWA's vision, what was the intended role of ICTs?
- (A) To replace the need for the women's union.
 - (B) To be a tool for empowering its grassroots members.
 - (C) To generate profit by selling computer

hardware.

(D) To provide entertainment for its members.

Ans :

(B) To be a tool for empowering its grassroots members.

SEWA's vision was to make ICTs a tool for empowering its ever-increasing number of grassroots members, having understood the link between poor information access and poverty.

94. SEWA's Community Learning Centres (CLCs) build capacity in all of the following areas EXCEPT:

(A) Use of computers and radio.

(B) IT and electrical engineering.

(C) Use of fax machines and mobile phones.

(D) Traditional dance and music.

Ans :

(D) Traditional dance and music.

The CLCs focus on building technical capacity in the use of various ICTs and related engineering fields. Traditional arts are not mentioned as part of their IT training curriculum.

95. Which type of skill is essential for a DCJ professional to project issues in a way that attracts attention and makes an impact?

(A) Creative skills

(B) Cognitive skills

(C) Technical skills

(D) Computer skills

Ans :

(A) Creative skills

The text explicitly states that creative skills are required to project issues and concepts in a creative way, which is necessary to attract audience attention and make a lasting impact.

96. A development journalist needs to operate a camera and edit video footage for a story. Which category of skills is most directly being used?

(A) Language skills

(B) Cognitive skills

(C) Interpersonal skills

(D) Technical skills

Ans :

(D) Technical skills

Operating equipment like cameras and using software for video editing fall under the category of technical skills, which are crucial for media production roles in development communication.

97. Which of the following is a key component of being a successful development communication specialist?

(A) Avoiding travel to remote areas.

(B) Being a good listener to write with sensitivity.

(C) Focusing only on one's own viewpoint.

(D) Working in isolation from other groups.

Ans :

(B) Being a good listener to write with sensitivity. The text emphasizes that if a person is keen on being a development communication specialist, they should also be a good listener to be able to write with sensitivity and understand people's perspectives.

98. Assertion (A): Basic computer skills in using Microsoft Office are desirable for a career in development communication.

Reason (R): These skills are essential for writing technical reports, creating presentations, and managing data, which are common tasks in the field.

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

(C) (A) is true, but (R) is false.

(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is a fact mentioned in the text. The reason provides the logical justification for why these specific software skills are useful and necessary for the tasks involved in the profession.

99. The use of media advocacy, social marketing, and participatory development communication all fall under the scope of what field?

(A) Corporate Public Relations

(B) Financial Journalism

(C) Development Communication

(D) Entertainment Law

Ans :

(C) Development Communication

The text lists these techniques—media advocacy, social marketing, and participatory development communication—as part of the varied methods employed within the broad scope of the Development Communication field.

- 100.** In which sector can a development communication specialist find career opportunities?
- (A) Only in government departments.
 - (B) Only in private media houses.
 - (C) Only in non-governmental organisations.
 - (D) In media houses, government, and NGOs.

Ans :

(D) In media houses, government, and NGOs.
The text clearly states that a development communication specialist can find career paths in the social sector, which includes media houses, government organizations, and non-government organizations.

- 101.** What is Development Journalism?
- (A) A branch of journalism focusing only on economic data.
 - (B) A social activity that communicates community feelings to the community.
 - (C) Journalism that exclusively covers celebrity news.
 - (D) Reporting that criticizes all aspects of development.

Ans :

(B) A social activity that communicates community feelings to the community.
Development Journalism is defined as a social activity where the journalist, through various media, communicates the feelings, stories, and progress of a community back to that community.

- 102.** Which of the following are considered essential features of Development Communication?
1. It aims to educate the community.
 2. It combines mass media and interpersonal channels.
 3. It is a one-way communication process.
- (A) 1 and 2 only
 - (B) 2 and 3 only
 - (C) 1 and 3 only
 - (D) 1, 2 and 3

Ans :

(A) 1 and 2 only
Development Communication aims to educate, and it combines suitable mass media and interpersonal channels for greater impact. However, it is explicitly described as a two-way process, not a one-way one.

- 103.** Which of the following is NOT a primary objective of the Red Ribbon Express (RRE)?
- (A) To spread information about HIV prevention.

- (B) To reduce stigma against people with AIDS.
- (C) To enhance knowledge about healthy habits.
- (D) To distribute free laptops to rural youth.

Ans :

(D) To distribute free laptops to rural youth.
The objectives of the RRE were focused on HIV/AIDS awareness, prevention, and reducing stigma. Distributing laptops was not part of its mission.

- 104.** A journalist spends weeks in a village documenting how a new water purification system has changed the lives of its residents, focusing on personal stories of improved health. This type of reporting is best described as:
- (A) Political Journalism
 - (B) Sports Journalism
 - (C) Development Journalism
 - (D) Entertainment Journalism

Ans :

(C) Development Journalism
This scenario exemplifies Development Journalism, which focuses on success stories, processes of change, and the human impact of development projects rather than on politics, sports, or entertainment.

- 105.** The success of a Community Radio station is highly dependent on:
- (A) The number of international songs it plays.
 - (B) The participation and engagement of the local community.
 - (C) The amount of profit it generates from advertising.
 - (D) The physical size of its broadcasting studio.

Ans :

(B) The participation and engagement of the local community.
Community Radio is designed to be a medium for the people, by the people. Its success therefore hinges on the active participation and engagement of the local community in its content and management.

- 106.** Project Village Chhatera was an initiative by which newspaper?
- (A) The Times of India
 - (B) The Hindu
 - (C) The Hindustan Times
 - (D) The Indian Express

Ans :

(C) The Hindustan Times

The text explicitly states that The Hindustan Times started the regular fortnightly column known as 'Project Village Chhatera' in 1969.

- 107.** The term for the process of using communication as a catalyst for social development in a planned manner is:
- (A) Development Communication
 - (B) Corporate Branding
 - (C) Public Relations
 - (D) Market Research

Ans :

(A) Development Communication
This is the core definition of Development Communication, which uses communication systematically and as a catalyst to facilitate planned social development and positive change.

- 108.** Assertion (A): Passion for adventure and travel are considered advantages for a development journalist.
Reason (R): Such a passion is primarily for personal leisure and has no bearing on professional work.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is false, but (R) is true.
 - (D) (A) is true, but (R) is false.

Ans :

(D) (A) is true, but (R) is false.
The assertion that travel is an advantage is true. The reason is false because the text links this passion directly to the professional work of gathering unique and interesting stories from remote areas.

- 109.** A development communication specialist can take up all the following career paths EXCEPT:
- (A) Development Journalist in TV or Radio.
 - (B) Trainer for grassroots level functionaries.
 - (C) Research scholar in a development organization.
 - (D) Corporate tax auditor for multinational firms.

Ans :

(D) Corporate tax auditor for multinational firms.
The career paths listed for a DCJ specialist are in the social and development sector, including journalism, training, and research. A corporate tax auditor is a role in the finance/accounting field, not development communication.

- 110.** The Sustainable Development Goals (SDGs) provide a framework for the international community to work towards what common end?
- (A) Ensuring human development reaches everyone.
 - (B) Promoting a single global culture.
 - (C) Establishing a single world government.
 - (D) Maximizing economic growth above all else.

Ans :

(A) Ensuring human development reaches everyone.

The text states that the SDGs provide a framework for the international community to work together towards the common end of ensuring that human development reaches everyone, everywhere.

- 111.** What distinguishes Development Communication from general mass communication?
- (A) Its use of technology.
 - (B) Its purpose-driven nature for social change.
 - (C) Its target audience is always urban.
 - (D) Its funding comes only from private sources.

Ans :

(B) Its purpose-driven nature for social change.
The defining characteristic of Development Communication is its explicit, planned, and systematic application to bring about positive social change and development, which is not always the primary goal of general mass communication.

- 112.** What was a key component found inside the coaches of the Red Ribbon Express?
- (A) A mobile kitchen for serving food.
 - (B) Sleeping berths for public transport.
 - (C) Counselling cabins and doctors' cabins.
 - (D) A marketplace for selling local crafts.

Ans :

(C) Counselling cabins and doctors' cabins.
The RRE coaches were equipped with facilities to provide services, specifically including counselling cabins and two doctors' cabins for providing counselling and treatment related to HIV/AIDS.

- 113.** Which of the following statements about the Swachh Bharat Mission is true?
- (A) It was primarily an infrastructure development project.
 - (B) It was launched in the year 2000.
 - (C) It focused exclusively on urban areas.
 - (D) It aimed at eliminating open defecation through behaviour change.

Ans :

(D) It aimed at eliminating open defecation through behaviour change.

The Swachh Bharat Mission was a nationwide campaign that aimed to eliminate open defecation in rural areas through mass-scale behaviour change, alongside the construction of toilets.

- 114.** A student with strong writing skills and an interest in social issues wants to work in development. Which career path would be most suitable?

(A) A TV news anchor covering politics.
(B) A development journalist for a newspaper.
(C) A technical operator at a radio station.
(D) A graphic designer for an advertising agency.

Ans :

(B) A development journalist for a newspaper.
This career path directly utilizes strong writing skills to cover social and development issues, aligning perfectly with the student's profile and the description of a development journalist's work.

- 115.** Match the skill (Column I) with its description (Column II).

	Column I		Column II
1.	Cognitive Skill	a.	Operating a camera and editing software.
2.	Creative Skill	b.	Understanding people's viewpoints and finding solutions.
3.	Technical Skill	c.	Comprehending the details of a complex issue.
4.	People-centric Skill	d.	Projecting an issue in a way that attracts attention.

(A) 1-c, 2-d, 3-a, 4-b
(B) 1-b, 2-a, 3-d, 4-c
(C) 1-d, 2-c, 3-b, 4-a
(D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-c, 2-d, 3-a, 4-b
Cognitive skills involve comprehension. Creative skills are for attracting attention. Technical skills involve operating equipment. People-centric skills involve understanding viewpoints.

- 116.** Why is a two-way communication process essential in development projects?

(A) It seeks a common understanding among all participants.
(B) It allows development agencies to impose their ideas.
(C) It is the fastest method of disseminating information.
(D) It eliminates the need for any mass media.

Ans :

(A) It seeks a common understanding among all participants.

The two-way process is crucial because it is designed to seek a common understanding or consensus among all participants, leading to concerted and more effective action for development.

- 117.** What is the term for utilizing the power of communication as a catalyst for social development?

(A) Development Journalism
(B) Development Communication
(C) Social Media Marketing
(D) Public Relations

Ans :

(B) Development Communication
This phrase is used as a core definition of Development Communication, highlighting its role as a catalyst for social change and development.

- 118.** Which of the following is NOT a typical activity of a development journalist?

(A) Interviewing people for stories.
(B) Attending press conferences.
(C) Making phone calls to create story leads.
(D) Directing and producing feature films.

Ans :

(D) Directing and producing feature films.
While a development filmmaker is a career, the typical day-to-day activities of a development journalist involve research, interviews, and creating story leads, not full-scale feature film production.

- 119.** An organization uses puppetry and folk songs to spread messages about sanitation in a village. This method combines development communication with:

(A) Digital Technology
(B) Traditional Media
(C) Print Media
(D) Satellite Broadcasting

Ans :

(B) Traditional Media

Puppetry and folk songs are forms of traditional media. Using them for a development purpose is an effective strategy that combines established cultural forms with development communication goals.

120. Which of the following statements about Development Communication and Journalism are true?

1. They sensitise students to the process of development.
2. They are characterized by conceptual flexibility.
3. They have become indispensable parts of our lives today.
4. They focus exclusively on theoretical concepts with no practical skills.

(A) 1, 2, and 4

(B) 1, 3, and 4

(C) 1, 2, and 3

(D) 2, 3, and 4

Ans :

(C) 1, 2, and 3

The text states that DCJ sensitises students, is characterized by conceptual flexibility, and has become indispensable. It explicitly aims to equip students with practical skills, making statement 4 false.

121. The “parikrama” style journey of the Red Ribbon Express refers to its:

- (A) Route that circumambulated or covered almost all states of India.
- (B) Route that followed a specific religious pilgrimage path.
- (C) Speed, which was slower than regular express trains.
- (D) Non-stop journey from one end of the country to the other.

Ans :

(A) Route that circumambulated or covered almost all states of India.

The RRE is described as following a ‘parikrama’ style, which implies a comprehensive tour or circumambulation, as it halted at 180 stations and covered almost all the states of India on its journey.

122. The Self Employed Women’s Association (SEWA) is a union of poor women working in which sector?

(A) The formal sector

(B) The government sector

(C) The corporate sector

(D) The informal sector

Ans :

(D) The informal sector

The text clearly identifies SEWA as a union of several thousand poor women who are working in the informal sector in India.

123. What is a key skill required to effectively use the internet as a research tool for development journalism?

(A) The ability to write computer code.

(B) A basic level of computer literacy.

(C) A degree in information technology.

(D) The skill to design websites from scratch.

Ans :

(B) A basic level of computer literacy.

To use the internet as a valuable research tool, the text specifies that a basic level of computer literacy is what a development journalist needs to work satisfactorily.

124. A career as a ‘trainer’ in development communication would primarily involve:

(A) Writing research papers for academic journals.

(B) Anchoring news programs on a national TV channel.

(C) Creating advertisements for commercial products.

(D) Training grassroots functionaries and other stakeholders.

Ans :

(D) Training grassroots functionaries and other stakeholders.

One of the specified career options is to be a trainer, whose role is to train various groups, including grassroots level and field functionaries, policy makers, and others involved in development work.

125. Assertion (A): Community Radio is considered a powerful medium for local development.

Reason (R): It uses the local dialect and allows community participation, making it highly relevant to its listeners.

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

(C) (A) is true, but (R) is false.

(D) (A) is false, but (R) is true.

- (C) (A) is true, but (R) is false.
(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is one of the essential features of development communication. The reason provides the underlying logic for this feature, as empowerment through information and education is a core tenet of development.

- 152.** The Red Ribbon Express traversed over how many kilometers a year?
(A) 1,000 km
(B) 5,000 km
(C) 9,000 km
(D) 15,000 km

Ans :

(C) 9,000 km

The text specifies that the specially designed train traversed over 9,000 km a year as part of its nationwide campaign.

- 153.** What is a key advantage of using a campaign for development communication?
(A) It requires very little financial investment.
(B) It can create a conducive environment for adopting new practices.
(C) It guarantees immediate results with no follow-up needed.
(D) It is effective even with a single, one-time message.

Ans :

(B) It can create a conducive environment for adopting new practices.

A significant benefit of a campaign is that its intensive and multi-faceted nature helps create a supportive public atmosphere that stimulates action and encourages the adoption of new practices.

- 154.** A local government wants to improve health habits in a community. Which of the following would be a Development Communication approach?
(A) Imposing fines for unhealthy behaviour.
(B) Building a new hospital without community consultation.
(C) Launching a campaign with radio jingles and community workshops.
(D) Publishing a complex medical journal for doctors.

Ans :

(C) Launching a campaign with radio jingles and community workshops.

This approach aligns with Development Communication principles by using a mix of accessible media (radio jingles) and participatory methods (workshops) to educate and motivate the community towards behaviour change.

- 155.** Which statement about the skills required for a DCJ career is INCORRECT?
(A) Questioning ability helps to look into finer details.
(B) Language and computer skills are very essential.
(C) Creative skills are required to make an impact.
(D) An ability to work in isolation is highly valued.

Ans :

(D) An ability to work in isolation is highly valued.

The text emphasizes the need for interpersonal skills and the ability to work with diverse groups. Working in isolation would be counterproductive to the collaborative nature of the field.

- 156.** The concept of 'local radio station' where local people have an important role is called:
(A) Community Radio
(B) National Public Radio
(C) Commercial FM
(D) Satellite Radio

Ans :

(A) Community Radio

The text introduces the concept of a 'local radio station' called Community Radio (CR), where the local people play an important role in its management and content creation.

- 157.** An umbrella term that includes computer hardware, software, digital broadcast, and telecommunications is:
(A) Print Media
(B) Traditional Media
(C) Information and Communication Technologies (ICTs)
(D) Interpersonal Communication

Ans :

(C) Information and Communication Technologies (ICTs)

- (B) The combination of education and entertainment for a purpose.
- (C) Entertainment shows that have no educational content.
- (D) A government policy for funding entertainment channels.

Ans :

(B) The combination of education and entertainment for a purpose.

Edutainment refers to the strategy of harnessing entertainment value and combining it with educational content to make learning more engaging and effective, especially for the common good.

- 133.** Assertion (A): The introduction of Community Radio has made the medium more participatory. Reason (R): Community radio is run and managed by local people and encourages them to express their views.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is true, but (R) is false.
 - (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion is true; community radio has made the medium more participatory. The reason correctly explains why: it is managed by and gives a voice to the local people, allowing them to participate.

- 134.** The scope of Development Communication includes all of the following EXCEPT:
- (A) Behaviour change and social marketing.
 - (B) Communication for social change.
 - (C) Information dissemination and education.
 - (D) Maximizing corporate profits through advertising.

Ans :

(D) Maximizing corporate profits through advertising.

The scope of Development Communication is focused on social goals like education, behavior change, and social marketing for development, not on maximizing corporate profits, which is the domain of commercial advertising.

- 135.** Which statement accurately reflects the status of rural news in most national dailies?
- (A) Rural news is given the highest priority.
 - (B) There is an abundance of newspapers focusing on rural themes.
 - (C) The approach is largely urban, with rural issues being low priority.
 - (D) All newspapers have dedicated daily sections for rural news.

Ans :

(C) The approach is largely urban, with rural issues being low priority.

The text states that the bulk of news in national and regional dailies is urban in its approach, and reports on development concerns in rural areas remain low in priority.

- 136.** A student who is good at public speaking and interested in current affairs could be a successful:
- (A) Video editor
 - (B) Radio jockey or anchor
 - (C) Research analyst
 - (D) Graphic designer

Ans :

(B) Radio jockey or anchor

A career as a radio jockey or anchor directly uses skills in public speaking and requires an interest in current affairs to engage an audience, making it a suitable path for such a student.

- 137.** The project 'Sustainable Access in Rural India (SARI)' was implemented in which Indian state?
- (A) Tamil Nadu
 - (B) Gujarat
 - (C) Rajasthan
 - (D) Uttar Pradesh

Ans :

(A) Tamil Nadu

The text provides the SARI project as an example of an ICT initiative and specifies that it was located in the state of Tamil Nadu.

- 138.** The ability to understand and articulate feelings of a community through various media is a core aspect of:
- (A) Development Journalism
 - (B) Corporate Communication
 - (C) Financial Analysis
 - (D) Legal Practice

Ans :

(A) Development Journalism

Ans :

(C) Because it is an audio medium and does not require literacy to be understood.

Broadcast journalism, especially radio, has a distinct advantage over print media as it can reach more people. It is particularly effective for populations with poor literacy levels as listening does not require the ability to read.

- 163.** The interactive phone-in segment of “Himalayan Echoes” is an important feature of development communication because it:

- (A) Creates a two-way process of communication and dialogue between people and development agencies.
- (B) Ensures that communication is only a one-way process from the station to the people.
- (C) Proves that local people are not interested in participating in discussions.
- (D) Is designed to entertain listeners without providing any useful information.

Ans :

(A) Creates a two-way process of communication and dialogue between people and development agencies.

Development communication is a two-way process. The interactive format of community radio overcomes the earlier limitations of one-way broadcast, allowing it to become a people’s medium and encouraging dialogue between people and development agencies.

- 164.** One of the essential features of development communication demonstrated by this community radio is that it is:

- (A) Oriented towards the entertainment needs of an urban elite audience.
- (B) Based on the audience characteristics and their environment.
- (C) Designed to be a top-down model where experts provide all the solutions.
- (D) Focused on global news and events rather than local issues.

Ans :

(B) Based on the audience characteristics and their environment.

A key feature of development communication is that it is based on the audience’s characteristics and their environment. The community radio

station’s success comes from creating content that is relevant and useful to the local context.

- 165.** For the local youth running the station, what skills are most important?

- (A) Only advanced knowledge of global politics.
- (B) Only a passion for international music.
- (C) The ability to write long academic research papers.
- (D) Interpersonal skills to interact with the community and technical skills to operate the equipment.

Ans :

(D) Interpersonal skills to interact with the community and technical skills to operate the equipment.

To run a community radio, one needs a combination of skills. Technical skills are required to operate the equipment, while people-centric interpersonal skills are crucial to build rapport and create content that resonates with the community.

Direction : Read the following case study and answer the following questions.

To combat the problem of malnutrition among children, the government launches a massive nationwide campaign called “Swasth Bachpan.” The campaign is a well-organized, intensive activity planned for a specific period of time. It uses a combination of different communication methods and materials to reach a wide audience. On television, short, emotional films and public service announcements featuring a famous cricketer are broadcasted. On the radio, catchy jingles about nutritious food are played frequently. In newspapers, articles written by nutrition experts are published. At the local level, health workers use posters and leaflets to educate mothers during meetings. The campaign aims to create a high level of public awareness about the importance of a balanced diet and to stimulate action among families to adopt healthier eating practices. The multi-media approach ensures that the message is received by people through different channels, reinforcing its impact and creating a conducive environment for behavior change.

- 166.** A well-organized, intensive activity that uses a combination of different communication methods about a specific theme for a predefined period is known as a:

- (A) Research Project
- (B) Press Conference

(D) Political propaganda

Ans :

(C) Development Communication

This passion aligns perfectly with the core principles of Development Communication, which is a people-centric, two-way process that aims to help people help themselves and find their own solutions.

146. Which statement best describes the role of advocacy in development?

- (A) It is solely about providing legal aid in court.
- (B) It involves supporting a cause and lobbying for change.
- (C) It is a method of funding large infrastructure projects.
- (D) It is a new term for commercial advertising.

Ans :

(B) It involves supporting a cause and lobbying for change.

The introduction to the unit defines advocacy in the development context as supporting a cause (like girls' education) and involves activities like lobbying governments and building alliances to inform supporters and create change.

147. The success of a development communication initiative often depends on its ability to:

- (A) Be people-centric and understand local context.
- (B) Generate a large financial profit.
- (C) Use the most expensive technology available.
- (D) Be implemented quickly without community input.

Ans :

(A) Be people-centric and understand local context.

A recurring theme is the importance of being people-centric, understanding audience characteristics, and building dialogue, which are crucial for the success and sustainability of development communication efforts.

148. What is the term for the set of seventeen broad, time-bound goals set by world leaders in 2015?

- (A) The Development Mandates
- (B) The Global Goals
- (C) The Century Objectives
- (D) The Sustainable Development Goals (SDGs)

Ans :

(D) The Sustainable Development Goals (SDGs)

The introduction clearly identifies these as the seventeen Sustainable Development Goals (SDGs), which provide a framework for global development efforts.

149. The practice of systematically applying communication principles to bring about positive social change is called:

- (A) Development Communication
- (B) Corporate Communication
- (C) Political Campaigning
- (D) Brand Management

Ans :

(A) Development Communication

This is the precise definition of Development Communication provided in the text, highlighting its systematic and purposeful application for social good.

150. Match the career (Column I) with the primary skill/activity involved (Column II).

	Column I		Column II
1.	Development Journalist	a.	Training grassroots level functionaries.
2.	Research Scholar	b.	Writing stories for print or broadcast media.
3.	Trainer	c.	Working independently for various organizations.
4.	Freelancer	d.	Studying issues like gender and environment.

- (A) 1-d, 2-c, 3-b, 4-a
- (B) 1-b, 2-d, 3-a, 4-c
- (C) 1-c, 2-a, 3-d, 4-b
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

(B) 1-b, 2-d, 3-a, 4-c

A journalist writes stories. A research scholar studies issues. A trainer trains functionaries. A freelancer works independently for different clients.

151. Assertion (A): Development communication aims to give information and educate the community.

Reason (R): An informed and educated community is better equipped to participate in its own development.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

- 171.** The “Project Village Chhatera” is a classic example of the power of which medium in development?
- (A) Radio
 - (B) Television
 - (C) Print Media (Newspapers)
 - (D) Information and Communication Technologies (ICTs)

Ans :

(C) Print Media (Newspapers)

The “Project Village Chhatera” was an experiment started by The Hindustan Times newspaper. It is considered a success story that demonstrates the significant impact that print media can have on rural development when it focuses on local issues.

- 172.** How did the newspaper’s coverage act as a “catalyst” for development in Chhatera?
- (A) By bringing the village’s problems to the attention of local leaders and authorities, who then took action.
 - (B) By providing direct financial aid to the villagers.
 - (C) By criticizing the villagers for their lack of development.
 - (D) By publishing fictional stories about the village to entertain urban readers.

Ans :

(A) By bringing the village’s problems to the attention of local leaders and authorities, who then took action.

The project proved to be a catalyst in bringing various services and benefits to the village. The media attention made local leaders and officials aware of the problems, prompting them to provide solutions like roads and electricity.

- 173.** What is a common criticism of most national and regional newspapers regarding their coverage of rural issues?
- (A) They provide too much coverage of rural problems.
 - (B) Their approach is overly focused on rural and agricultural themes.
 - (C) They are written in local dialects that urban readers cannot understand.
 - (D) Reports on agriculture and rural areas often remain low in priority.

Ans :

(D) Reports on agriculture and rural areas often remain low in priority.

A challenge in print media is that the bulk of news appearing in national and regional dailies is urban in its approach. Reports on agriculture, rural problems, and other development concerns often remain a low priority.

- 174.** The reporters in this project wrote with sensitivity about the lives and aspirations of the people. This demonstrates what important skill for a development journalist?
- (A) A people-centric approach and the ability to write with empathy.
 - (B) The ability to write only about sensational and negative news.
 - (C) A focus on statistics and data without any human element.
 - (D) The skill of writing very short, brief articles with no detail.

Ans :

(A) A people-centric approach and the ability to write with empathy.

A good development journalist needs to be people-centric to understand people’s viewpoints on issues affecting their lives. Writing with sensitivity and passion for the rural poor is a crucial skill for this profession.

- 175.** The success of this project highlights that development journalism should focus on:
- (A) Only international politics and conflicts.
 - (B) The process of development and the people involved in it.
 - (C) The lives of celebrities and film stars.
 - (D) Only the negative aspects and failures of development projects.

Ans :

(B) The process of development and the people involved in it.

Development journalism seeks to describe the people at work in new projects and processes. It focuses on success stories and the human side of development, which can inspire and inform both the public and policymakers.

Direction : Read the following case study and answer the following questions.

The Self Employed Women’s Association (SEWA), a union of women working in the informal sector, recognized that a lack of access to information was a major barrier to the empowerment of its members. To address this, SEWA embarked on a mission to integrate Information and Communication

This is the explicit definition of Information and Communication Technologies (ICTs) provided in the text, highlighting its broad and inclusive nature.

- 158.** In addition to HIV/AIDS, the educational materials on the Red Ribbon Express also covered:
- (A) Financial literacy
 - (B) HIV-TB co-infection
 - (C) Agricultural techniques
 - (D) Adult education programs

Ans :

(B) HIV-TB co-infection

The text states that the seven coaches of the RRE were equipped with educational material on HIV/AIDS and also provided services in the context of HIV-TB co-infection.

- 159.** The ultimate goal of Development Communication is to facilitate:
- (A) Increased sales for multinational corporations.
 - (B) The election of specific political candidates.
 - (C) The preservation of the status quo in society.
 - (D) Equity and the achievement of individual potential.

Ans :

(D) Equity and the achievement of individual potential.

Development Communication is used for facilitating the development of a disadvantaged society in a planned manner to ensure equity and the achievement of individual potential, which is a core part of its definition.

- 160.** A student wants to pursue a career that involves studying the impact of development projects on communities and then writing about them for a wider audience. This career path combines which two fields?
- (A) Research and Development Journalism
 - (B) Training and Public Relations
 - (C) Anchoring and Corporate Communication
 - (D) Filmmaking and Advertising

Ans :

(A) Research and Development Journalism

This career path directly combines the activities of a research scholar (studying impact) and a development journalist (writing for a wider audience), both of which are listed as career avenues in the text.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

An NGO launches a new community radio station in a remote, hilly district where literacy levels are low and mainstream media has limited reach. The station, named "Himalayan Echoes," is run and managed by local youth who have been trained in basic broadcasting techniques. The content is created for the local community, in their own dialect. Programs focus on topics relevant to their lives, such as information on sustainable agricultural practices, daily weather updates, maternal and child health advice from the local health center, and preservation of local folk music and traditions. The radio station also features a phone-in segment where villagers can share their problems, ask questions to experts, and participate in discussions. This interactive format has made "Himalayan Echoes" a powerful medium for development, giving a voice to the people and acting as a catalyst for finding local solutions to local problems. The initiative is a prime example of using a people-centric communication medium for social change.

- 161.** A small radio station that is run and managed by local people, with content created for local use in the local dialect, is known as a:
- (A) National Radio Broadcaster
 - (B) Commercial FM Station
 - (C) Satellite Radio Service
 - (D) Community Radio (CR)

Ans :

(D) Community Radio (CR)

Community Radio is a concept where a local radio station is set up, run, and managed by the local people. The content is for local use, in the local dialect, and it encourages community participation.

- 162.** Why is radio considered an effective medium for development in areas with low literacy levels?
- (A) Because it is more expensive and exclusive than television.
 - (B) Because it is a visual medium that requires reading skills.
 - (C) Because it is an audio medium and does not require literacy to be understood.
 - (D) Because it only broadcasts programs in English.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion that community radio is a powerful medium is well-supported in the text. The reason, which points to its use of local dialect and participatory nature, correctly explains why it is so effective and powerful at the local level.

- 126.** The primary goal of Development Journalism is to:

- (A) Increase the circulation of newspapers.
- (B) Report on development processes and their impact.
- (C) Promote the political agenda of the government.
- (D) Cover the lifestyle of the urban elite.

Ans :

(B) Report on development processes and their impact.

Development Journalism focuses on reporting the processes of development, including success stories and challenges, thereby describing the impact of these efforts on society.

- 127.** Which of the following pairs is correctly matched?

- (A) Cognitive Skill - Operating a video camera
- (B) Creative Skill - Comprehending an issue
- (C) Technical Skill - Attracting audience attention
- (D) Interpersonal Skill - Working with diverse groups

Ans :

(D) Interpersonal Skill - Working with diverse groups

The ability to work with diverse groups is an interpersonal skill. The other pairs are mismatched: operating a camera is technical, comprehending an issue is cognitive, and attracting attention is creative.

- 128.** An organization wants to create awareness about water conservation. It decides to use a series of short, memorable jingles on the radio, posters in public places, and street plays. This strategy is an example of a:

- (A) Community radio program
- (B) Research project
- (C) Campaign
- (D) Tele-centre initiative

Ans :

(C) Campaign

This multi-pronged approach, using various media (radio, posters, street plays) around a single theme (water conservation) for a specific purpose, is the definition of a campaign.

- 129.** In which year was the term “Development Communication” first coined by Nora Quebral?

- (A) 1972
- (B) 1969
- (C) 1984
- (D) 2004

Ans :

(A) 1972

The text specifies that the term “Development Communication” was first coined in the year 1972 by Nora Quebral.

- 130.** What is the main difference between Development Journalism and traditional journalism?

- (A) Development Journalism is always critical of the government.
- (B) Development Journalism focuses on processes rather than just events.
- (C) Traditional journalism is only found in newspapers.
- (D) Traditional journalism does not require any research.

Ans :

(B) Development Journalism focuses on processes rather than just events.

Development Journalism goes beyond reporting on singular events (like disasters or fights) to describe the processes of development, projects, and their ongoing impact on people’s lives.

- 131.** The organization responsible for implementing the Red Ribbon Express project along with NACO and international agencies was:

- (A) The Ministry of Education.
- (B) The Indian Space Research Organisation.
- (C) The Nehru Yuva Kendra Sangathan (NYKS).
- (D) The National Council of Educational Research and Training (NCERT).

Ans :

(C) The Nehru Yuva Kendra Sangathan (NYKS). The project was implemented by a collaboration of NACO, Nehru Yuva Kendra Sangathan (NYKS), international agencies, and Indian Railways.

- 132.** What does the term “edutainment” signify?

- (A) Educational programs that are very long and boring.

- (C) Campaign
- (D) Daily News Bulletin

Ans :

- (C) Campaign

A campaign is defined as a well-organized and intensive activity. It typically uses a combination of communication methods and materials, such as meetings, tours, and media articles, focused on a specific theme for a set period.

- 167.** What is the primary purpose of using a multi-media approach in a campaign like “Swasth Bachpan”?
- (A) To ensure the message reaches a wide and diverse audience through various channels, reinforcing its impact.
 - (B) To make the campaign more expensive and difficult to manage.
 - (C) To test which media channel is the least effective.
 - (D) To limit the campaign’s reach to only one segment of the population.

Ans :

- (A) To ensure the message reaches a wide and diverse audience through various channels, reinforcing its impact.

Development communication often combines suitable mass media and interpersonal channels. Using a mix of media in a campaign helps to create greater public awareness and provides specific messages to a diverse audience, enhancing the overall impact.

- 168.** The short, catchy jingles about nutrition played on the radio are an example of a:
- (A) Documentary Film
 - (B) Public Service Announcement (PSA)
 - (C) Detailed News Report
 - (D) Live Interview

Ans :

- (B) A Public Service Announcement (PSA)

A Public Service Announcement (PSA) is a brief 10-60 second message, often in the form of a jingle, that is broadcast between programs. PSAs are used to provide information or suggestions for action for the public good.

- 169.** The “Swasth Bachpan” campaign aims to inform and educate the community about nutrition. This aligns with a key feature of:
- (A) Corporate Advertising
 - (B) Political Propaganda

- (C) Entertainment Media
- (D) Development Communication

Ans :

- (D) Development Communication

A core feature of development communication is that it aims to give information and educate the community. Campaigns like this are designed to facilitate development by providing people with the knowledge they need to improve their lives.

- 170.** The ultimate goal of this campaign is to stimulate action and create a conducive environment for the adoption of healthy practices. This is known as:
- (A) Behavior Change Communication.
 - (B) Market Research.
 - (C) Product Placement.
 - (D) Audience Measurement.

Ans :

- (A) Behavior Change Communication.

Development communication efforts often aim to enable behavior change among people to adopt healthy practices. By creating awareness and stimulating action, the campaign seeks to change dietary behaviors for the long-term well-being of children.

Direction : Read the following case study and answer the following questions.

A journalism student, Anirudh, is studying the history of development journalism in India. He comes across the “Project Village Chhatera,” an experiment conducted by The Hindustan Times newspaper in 1969. The project focused its attention on a small village near Delhi. Instead of just reporting on major national events, a team of reporters started a regular fortnightly column that described the daily lives, aspirations, and problems of the people in Chhatera. They wrote with sensitivity about the village chaupal, the lack of electricity and water, and the local festivities. This sustained media attention acted as a catalyst for change. The problems of the village were brought to the notice of local leaders and government authorities. As a result, the village saw significant development, including the arrival of machines, roads, and banks. This project serves as a powerful example of how the print media, when used effectively, can play a vital role in highlighting grassroots issues and bringing about development.

Development Journalism is described as a social activity where the journalist communicates the feelings of the community to the community, making this a central part of its function.

139. Which of the following pairs is INCORRECTLY matched?

- (A) Development Communication - Catalyst for social change
- (B) Community Radio - Voice of the people
- (C) ICTs - Tools for empowerment
- (D) Project Village Chhatera - Television documentary series

Ans :

(D) Project Village Chhatera - Television documentary series

Project Village Chhatera was a fortnightly column in The Hindustan Times newspaper; it was a print media initiative, not a television documentary series.

140. Assertion (A): The Red Ribbon Express campaign held programmes and activities in thousands of villages.

Reason (R): During halts, performing artists from the train divided into groups and went to different villages to conduct IEC activities.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

The assertion that the campaign reached thousands of villages is true. The reason correctly explains the methodology used to achieve this wide outreach, with teams spreading out from the train at each stop.

141. The mission launched on 2nd October 2014 to achieve universal sanitation coverage was called:

- (A) National Health Mission
- (B) Sarva Shiksha Abhiyan
- (C) Swachh Bharat Mission
- (D) Make in India

Ans :

(C) Swachh Bharat Mission

The text clearly states that the Prime Minister of India launched the Swachh Bharat Mission on 2nd

October 2014 to accelerate efforts for universal sanitation coverage.

142. Why does development communication combine mass media and interpersonal communication channels?

- (A) To reduce the overall cost of the program.
- (B) To achieve a greater and more lasting impact.
- (C) To comply with government regulations.
- (D) To focus only on the educated population.

Ans :

(B) To achieve a greater and more lasting impact. One of the essential features of Development Communication is that it combines suitable mass media and interpersonal communication channels to create a greater and more synergistic impact on the audience.

143. A development journalist who covers stories for different newspapers and is not a permanent employee of any single one is known as a:

- (A) Staff writer
- (B) Editor
- (C) Publisher
- (D) Freelancer

Ans :

(D) Freelancer

A freelancer is an independent professional who works on a contract basis for various organizations rather than being a permanent employee of one, a career path mentioned for DCJ specialists.

144. What did SEWA's Community Learning Centres (CLCs) primarily focus on providing?

- (A) IT training
- (B) Childcare services
- (C) Healthcare facilities
- (D) Legal aid

Ans :

(A) IT training

The text specifies that the Community Learning Centres (CLCs) set up by SEWA in rural areas focus on IT training to build the capacity of its members.

145. A student is passionate about social justice and wants to work with communities to help them find their own solutions to local problems. This aligns best with the principles of:

- (A) Corporate advertising
- (B) Entertainment media
- (C) Development Communication

Technologies (ICTs) into its work. They set up Community Learning Centres (CLCs) in rural areas, which focused on building the IT capacity of their members. These centers provided training in using computers, radio, video, and mobile phones. For example, by using mobile phones, the members could now achieve quick and easy communication across districts, which saved them significant time and cost when coordinating their work. This use of ICTs was not just about technology; it was a tool for empowering grassroots women, helping them to access information, solve problems, and achieve SEWA's overall goal of full employment and self-reliance for its members.

- 176.** The use of computers, mobile phones, and radio to empower the members of SEWA is an application of what?
- (A) Traditional folk media.
 - (B) Print media only.
 - (C) Information and Communication Technologies (ICTs).
 - (D) Only interpersonal communication.

Ans :

(C) Information and Communication Technologies (ICTs).

ICTs is an umbrella term that includes technologies like computers, radio, video, and mobile phones. SEWA successfully used these technologies as a tool for empowering its grassroots members by improving their access to information and communication.

- 177.** How did the use of mobile phones directly benefit the members of SEWA?
- (A) It made communication slower and more expensive.
 - (B) It enabled quick and easy communication across districts, saving time and cost.
 - (C) It isolated the members from each other.
 - (D) It was used only for entertainment purposes.

Ans :

(B) It enabled quick and easy communication across districts, saving time and cost.

Besides saving time and cost, the use of ICTs like mobile phones enabled the members of SEWA to achieve quick and easy communication. This helped them in problem-solving and coordinating their activities across different districts.

- 178.** What was the primary vision behind SEWA's integration of ICTs into its work?

- (A) To make technology a tool for empowering its grassroots members.
- (B) To replace all its members with automated machines.
- (C) To sell expensive electronic gadgets to the rural poor.
- (D) To meet a government mandate that all NGOs must use computers.

Ans :

(A) To make technology a tool for empowering its grassroots members.

Having understood the effect of poor access to information on poverty, SEWA's vision was to make ICTs a tool for empowering its ever-increasing numbers of grassroots members, helping them achieve self-reliance.

- 179.** ICTs have been described as being economically, socially, and politically "transformative." What does this mean?
- (A) That they have the power to bring about significant positive changes in society.
 - (B) That they have had very little impact on society.
 - (C) That they only benefit the wealthy and powerful.
 - (D) That they are only used for maintaining the existing social order.

Ans :

(A) That they have the power to bring about significant positive changes in society.

ICTs are proving to be transformative because they have the power to bring about fundamental changes in economic, social, and political spheres. They can expand markets, enable social business, and facilitate public services.

- 180.** The establishment of tele-centres or Community Learning Centres (CLCs) in rural areas is a direct approach to using ICTs for what purpose?
- (A) To increase the digital divide between urban and rural areas.
 - (B) To provide entertainment options for urban youth.
 - (C) To sell computer hardware and software at a high profit.
 - (D) To better the lives of the poor by providing access to services and education.

Ans :

(D) To better the lives of the poor by providing access to services and education.

- **Press Relations:** Maintaining cordial relations with the media by providing well-timed press releases and avoiding biases.
- **Advertising:** Deciding on the budget and media to be used for advertising to inform, persuade, or influence consumers.
- **Publications:** Creating brochures, pamphlets, and in-house magazines that reflect a true and attractive image of the organization.
- **Other Media Coordination:** Using other media like films, exhibitions, and hoardings, and maintaining good relations with radio and television.
- **PR with Constituents:** Liaising with the local community, financial analysts, shareholders, and all internal employees to stay informed.

3.6 Seven Principles of Public Relations

Arthur W. Page's principles of PR management include:

- **Tell the truth:** Provide an accurate picture of the company's character and practices.
- **Prove it with action:** Public perception is shaped more by what an organization does than what it says.
- **Listen to the customer:** Understand public needs and keep decision-makers informed about public reaction.
- **Manage for tomorrow:** Anticipate public reaction and eliminate practices that cause difficulties.
- **Conduct public relations as if the whole company depends on it:** PR is a management function integral to corporate strategy.
- **Realize that a company's true character is expressed by its people:** Every employee is involved in public relations.
- **Remain calm, patient, and good-humored:** Cool heads communicate best, especially during a crisis.

3.7 Internal and External Communication

- **Internal Communication:** This takes place between the employer and employees within an organization and is vital for employee morale, transparency, and effective management. It can be transmitted through written media (memos, house journals) or oral communication.
- **External Communication:** This occurs between the organization and the outside world, including government bodies, customers, and the general public. It is crucial for creating

- a positive image, brand preservation, and maintaining public relations.
- When composing messages, the **7 Cs of communication** should be followed: Conciseness, Concreteness, Clarity, Completeness, Courtesy, Correctness, and Consideration.

4. KNOWLEDGE AND SKILLS REQUIRED

To be an effective communicator, one must develop several skills:

- **Listening Skills:** An active process of hearing, understanding, and responding.
- **Interpersonal Skills:** The ability to interact effectively with others, which increases productivity and reduces conflict.
- **Negotiation Skills:** The process of convincing another party to reach a mutually agreeable deal.
- **Presentation Skills:** Used to communicate ideas and information to a group, involving content, structure, and packaging.
- **Rapport Establishment:** Building trust and harmony in a relationship through both conscious and unconscious communication.
- **Other Essential Skills:** These include effective decision-making, telephone etiquette, basic writing skills, public speaking, accent neutralization, time management, and stress management.

5. SCOPE

Corporate organizations require PR to manage communication with all internal and external stakeholders, including employees, media, government, customers, and the general public. The field is constantly evolving with innovative uses of media and technology.

MULTIPLE CHOICE QUESTION

1. What is the primary role of communication within business establishments as described in the chapter?
 - (A) It is solely for entertainment and leisure.
 - (B) It is as fundamental as food, clothing, and shelter.
 - (C) It is a secondary tool for occasional use.
 - (D) It is only important for marketing departments.

films. A development communication specialist can take up a variety of career paths, including that of a development journalist or filmmaker in various media houses.

Direction : Read the following case study and answer the following questions.

The Red Ribbon Express (RRE) was a unique, nationwide communication campaign on a specially designed train, aimed at generating awareness about HIV/AIDS in rural India. The train, equipped with educational materials, interactive touch screens, and a platform for folk performances, traversed thousands of kilometers, halting at numerous stations. At each halt, trained performers and orators would go into the surrounding villages to conduct Information, Education, and Communication (IEC) activities. They used street plays, folk songs, and group counseling sessions to spread information about the disease, its prevention, and to reduce the stigma and discrimination associated with it. Locally mobilized youth groups also joined the teams from the train. This massive campaign was implemented by the National AIDS Control Organisation (NACO) in collaboration with partners like the Nehru Yuva Kendra Sangathan (NYKS) and Indian Railways. It was a powerful example of using a multi-media, participatory approach to take a critical health message to the grassroots level.

- 186.** The Red Ribbon Express is an example of what type of development communication initiative?
- A small-scale community radio program.
 - A print media project focused on a single village.
 - A large-scale, nationwide communication campaign.
 - A project based solely on Information and Communication Technologies (ICTs).

Ans :

(C) A large-scale, nationwide communication campaign.
The Red Ribbon Express was a nationwide communication campaign for generating awareness about HIV/AIDS. It was a well-organized, intensive activity that used a variety of methods to reach a large population across the country.

- 187.** What was a primary objective of the Red Ribbon Express campaign?

- To promote rail travel in India.
- To entertain villagers with free folk performances.
- To provide free medical treatment for all types of diseases.
- To spread information about HIV/AIDS and reduce the stigma associated with it.

Ans :

(D) To spread information about HIV/AIDS and to reduce the stigma associated with it.
The aims of the RRE campaign included spreading information regarding primary prevention services for HIV/AIDS and developing an understanding of the disease to reduce the stigma and discrimination faced by people living with it.

- 188.** The use of street plays and folk songs is an example of combining mass media with what other channel of communication?
- Interpersonal and traditional communication channels.
 - Only digital and social media channels.
 - Only print media channels like newspapers.
 - Only top-down communication from government officials.

Ans :

(A) Interpersonal and traditional communication channels.
Development communication often combines suitable mass media with interpersonal and traditional communication channels. Using folk media like street plays and songs makes the message more relatable and impactful for a local audience.

- 189.** The collaboration between NACO, NYKS, and Indian Railways shows that large development campaigns often require:
- The involvement of only one single organization.
 - Coordination between various government departments, NGOs, and other stakeholders.
 - The participation of only international agencies.
 - A complete lack of planning and organization.

Ans :

(B) Coordination between various government departments, NGOs, and other stakeholders.
Large-scale projects are often run by government departments with the help of other agencies. The

A direct approach to using ICTs for improving the lives of the poor is through the setting up of telecentres. These centers offer a range of services like basic computer education, e-government services, and web Browse.

Direction : Read the following case study and answer the following questions.

A group of development communication students is tasked with creating a short documentary film on the issue of water conservation in a village. To create a powerful and effective film, they need a combination of skills. First, they need cognitive skills to research and comprehend the complex issue of water scarcity in that region. Next, they need creative skills to develop a compelling story that will attract the viewers' attention and make an impact. For the actual production, they require technical skills. They need to know camera techniques to shoot high-quality footage, and then they need video editing skills to assemble the footage, add sound, and create a final product. Finally, to ensure the film is authentic and people-centric, they need strong interpersonal skills to interact with the villagers, conduct interviews with sensitivity, and understand their perspectives. This project demonstrates that a career in development communication is multi-faceted, requiring a blend of intellectual, creative, technical, and social skills.

- 181.** The ability of the students to research and understand the complex issue of water scarcity is an example of which type of skill?
- (A) Technical skills
 - (B) Creative skills
 - (C) Cognitive skills
 - (D) Language skills

Ans :

(C) Cognitive skills

Cognitive skills are required to be able to comprehend an issue. This involves the ability to research, analyze, and understand complex problems, which is the first step in creating any effective communication material on a development topic.

- 182.** Knowing how to operate a camera and edit video footage are examples of which type of skill required for a development filmmaker?
- (A) Cognitive skills
 - (B) Creative skills
 - (C) Interpersonal skills
 - (D) Technical skills

Ans :

(D) Technical skills

Technical skills are essential for media production. For a development filmmaker, this includes knowing camera techniques, video production, and editing, which are necessary to create a professional-quality film.

- 183.** Why are strong interpersonal skills crucial for these students when interacting with the villagers?
- (A) To be able to operate the camera and editing software correctly.
 - (B) To be people-centric and understand the villagers' viewpoints on the issue.
 - (C) To be able to write a detailed technical report on their findings.
 - (D) To ensure that the final film is not interesting to the viewers.

Ans :

(B) To be people-centric and understand the villagers' viewpoints on the issue.

A development communication professional needs to be people-centric. Excellent interpersonal skills are required to interact professionally and with sensitivity, which helps in understanding people's viewpoints on issues affecting their lives and finding workable solutions.

- 184.** The ability to develop a compelling story that will attract attention and make an impact is a:
- (A) Creative skill
 - (B) Technical skill
 - (C) Cognitive skill
 - (D) Computer skill

Ans :

(A) Creative skill

Creative skills are required to project issues and concepts in a way that captures the audience's attention and makes a lasting impact. This includes storytelling, visual design, and finding innovative ways to communicate a message.

- 185.** The students' project of creating a documentary film is a career path that falls under the scope of:
- (A) Print Journalism
 - (B) Public Relations
 - (C) Corporate Communication
 - (D) Development Communication

Ans :

(D) Development Communication

Development communication employs a variety of media and techniques, including documentary

- (A) Wilbur Schramm
- (B) Everett Rogers
- (C) Nora Quebral
- (D) Marshall McLuhan

Ans :

- (C) Nora Quebral

The term “Development Communication” was first introduced in 1972 by Nora Quebral. She defined it as the art and science of human communication applied to the speedy transformation of a country and its people.

- 195.** While both fields use similar media channels, what is the key difference in their approach to the audience?
- (A) Development communication sees the audience as active participants, while corporate communication sees them as passive consumers.
 - (B) Corporate communication involves a two-way dialogue, while development communication is always one-way.
 - (C) Development communication is only for urban audiences, while corporate communication is for rural audiences.
 - (D) There is no difference in their approach to the audience.

Ans :

(A) Development communication sees the audience as active participants, while corporate communication sees them as passive consumers. Development communication is a social process that seeks a common understanding and dialogue among all participants. It views people as active agents of change, in contrast to a commercial model that often views them as passive consumers.

Direction : Read the following case study and answer the following questions.

In a country grappling with high rates of illiteracy and malnutrition, a government official argues that simply making services available is not enough. He emphasizes the need for a strong development communication strategy. He explains that development means positive and permanent changes in the lives of the majority of people, which requires their active participation. He proposes a plan that uses communication as a catalyst. The plan involves creating awareness about new agricultural technologies to improve food security, linking people with government health programs

through mobile alerts, and using community radio to mobilize people for local development projects. He states that the goal of this communication strategy is not just to inform but to facilitate a two-way dialogue, viewing people who face problems as having the innate ability to find solutions with some assistance. This approach aims to systematically apply communication principles to tackle the nation’s development challenges.

- 196.** How is ‘development’ defined in this context?

- (A) As temporary economic growth that benefits only a small section of society.
- (B) As positive changes in the socio-economic and cultural lives of the majority of people on a permanent basis.
- (C) As the process of building more cities and industries, regardless of the social impact.
- (D) As the preservation of the existing social and economic conditions without any change.

Ans :

- (B) As positive changes in the socio-economic and cultural lives of the majority of people on a permanent basis.

Development is defined as positive changes in the socio-economic and cultural lives of the majority of people. These changes should be permanent and achieved without exploitation or violence, aiming for equity and fulfillment of potential.

- 197.** What is the role of communication in this development plan?

- (A) To act as a barrier between the government and the people.
- (B) To be used only for entertainment and commercial advertising.
- (C) To act as a catalyst for social development by creating awareness and mobilizing people.
- (D) To control information and prevent people from participating in development.

Ans :

- (C) To act as a catalyst for social development by creating awareness and mobilizing people.

Development communication utilizes the power of communication as a catalyst for social development. It can create awareness about available technologies and mobilize people to use them for the betterment of society.

- 198.** The official’s belief that people have the innate ability to find solutions reflects that development communication views motivation as a:

Ans :

(B) It focuses on the processes of development and stories of people at work in new projects. Unlike traditional reporting that often focuses on negative events, development journalism highlights success stories and the processes of change. It seeks to describe people at work in new projects and the impact of development activities.

208. Development communication and journalism are considered important fields of study because they:

- (A) Sensitize students to the process of development and train them to write about social issues.
- (B) Train students only for careers in the corporate sector.
- (C) Focus exclusively on the history of ancient civilizations.
- (D) Provide skills that are not useful in any modern profession.

Ans :

(A) Sensitize students to the process of development and train them to write about social issues.

These are important fields of study because they sensitize students to the process of development. They also train them to write and speak about issues related to building an equitable and impartial society.

209. The practice of development journalism is a social activity because the journalist communicates:

- (A) Their personal opinions to a small group of friends.
- (B) Only government propaganda to the public.
- (C) Only information that is entertaining but not useful.
- (D) Feelings of the community to the community itself.

Ans :

(D) Feelings of the community to the community itself.

Development journalism is considered a social activity. Through various media, the journalist acts as a channel to communicate the feelings, aspirations, and challenges of the community back to the community and to the wider society.

210. The role of the press as a “fourth pillar of democracy” is crucial because:

- (A) People’s participation is the foundation of democracy, and the press informs the people.

(B) It is a branch of the government and follows its orders.

(C) It only provides entertainment to the public.

(D) It has no role to play in a democratic system.

Ans :

(A) People’s participation is the foundation of democracy, and the press informs the people.

The Press is often called the fourth pillar of democracy. This is because people’s participation is the foundation of a democratic system, and the press plays a vital role in keeping the public informed.

This involves understanding people's viewpoints on issues affecting their lives and finding solutions that will work for them, which requires good listening skills.

203. Proficiency in using Microsoft Office applications and social media for research falls under which essential skill category for a modern journalist?

- (A) Language and computer skills.
- (B) Physical fitness skills.
- (C) Artistic and musical skills.
- (D) Only interpersonal skills.

Ans :

- (A) Language and computer skills.

In today's world, language and computer skills are very essential for a journalist. This includes basic computer skills in using office applications and the internet for research and communication, which are desirable for success.

204. A development communication specialist can find employment in which of the following sectors?

- (A) Only in large, for-profit multinational corporations.
- (B) Only in the fashion and entertainment industry.
- (C) Only in academic research institutions as a scientist.
- (D) In media houses, government departments, and non-governmental organisations (NGOs).

Ans :

- (D) In media houses, government departments, and non-governmental organisations (NGOs).

A development communication specialist can take up a variety of career paths. This includes working in the social sector, with media houses, and for government and non-governmental organizations involved in development projects.

205. The ability to conduct interviews with sensitivity is crucial for a development journalist because:

- (A) It enables them to gather authentic stories and build trust with the community.
- (B) It helps to intimidate the people being interviewed.
- (C) It is not an important skill for a journalist.
- (D) It makes the final news report less interesting.

Ans :

- (A) It enables them to gather authentic stories and build trust with the community.

Developing good interviewing techniques is important. The ability to interact professionally

and with empathy helps a journalist to build rapport, gather authentic information, and tell stories that accurately reflect the community's perspective.

Direction : Read the following case study and answer the following questions.

In the post-independence era, Indian journalism underwent a significant shift. Before independence, reporting was often focused on the freedom struggle, fights, and disasters. However, after 1947, the newly liberated country was undergoing a lot of expansion in development activities, such as the building of dams, factories, and agricultural universities. Journalists and newsmen had to take notice of these new activities. This led to the emergence of a new form of journalism that focused not just on political events, but on the processes of socio-economic change. This new "development journalism" began to report on the success stories of people adopting new farming methods, the challenges and progress of new industrial projects, and the impact of these changes on the lives of ordinary people. This form of journalism recognized its role in a developing society as not just a critic, but also as a partner in the process of nation-building.

206. The shift in focus of Indian journalism after independence from the freedom struggle to development activities led to the emergence of:

- (A) Celebrity Journalism
- (B) Sports Journalism
- (C) Development Journalism
- (D) Financial Journalism

Ans :

- (C) Development Journalism

Development Journalism is a relatively newer concept that came into existence after the colonial era ended. In newly liberated countries like India, journalists had to take notice of the expansion in development activities.

207. How is development journalism different from traditional reporting?

- (A) It only reports on sensational news like disasters and wars.
- (B) It focuses on the processes of development and stories of people at work in new projects.
- (C) It is only concerned with the lives of political leaders.
- (D) It avoids reporting on any positive or success stories.

- (A) Key element.
- (B) Minor and unimportant factor.
- (C) Barrier to development.
- (D) Tool for controlling people.

Ans :

- (A) Key element.

A key assumption in development communication is that people facing problems have the innate ability to find solutions. Therefore, it views motivation as the key element, aiming to build dialogue and encourage concerted action.

199. How does development communication help in tackling problems like malnutrition and poor health?

- (A) By directly providing food and medicine to every individual.
- (B) By ignoring these problems and focusing only on economic growth.
- (C) By building more hospitals without any focus on awareness.
- (D) By informing and educating the community about preventive measures and healthy habits.

Ans :

(D) By informing and educating the community about preventive measures and healthy habits. Development in many parts of the world requires intensive efforts to tackle problems like malnutrition and poor health. Communication plays a crucial role by providing information and education that enables people to adopt healthier practices.

200. The process of systematically applying the principles of communication to bring about positive social change is the definition of:

- (A) Development Communication
- (B) Public Relations
- (C) Corporate Journalism
- (D) Media Management

Ans :

- (A) Development Communication

This is the core definition of the field. Development communication is the practice of systematically applying the processes, strategies, and principles of communication to bring about positive and sustainable social change.

Direction : Read the following case study and answer the following questions.

An aspiring development journalist, Rina, is preparing for her career. She knows that to be effective, she needs more than just a passion for social issues. She enrolls in a course that helps her build a diverse set of skills. She learns technical skills like how to operate a video camera and use editing software. She hones her creative writing skills to be able to tell compelling human-interest stories. She practices her interviewing techniques to be able to talk to people from different backgrounds with sensitivity. Recognizing the importance of ICTs, she becomes proficient in using computers and social media for research and dissemination. Most importantly, she focuses on developing a people-centric approach, learning to listen to communities and understand their perspectives before reporting on them. She understands that her future role will be to use these combined skills to bridge the gap between development agencies and the people they aim to serve.

201. For a career in development communication, a combination of which two types of skills is required?

- (A) Only journalistic skills or only presentation skills.
- (B) Both journalistic and presentation skills.
- (C) Only skills in financial management.
- (D) Only skills in data analysis.

Ans :

- (B) Both journalistic and presentation skills.

A career in Development Communication and Journalism requires a combination of both journalistic skills for gathering and writing stories, and presentation skills for delivering them effectively through various media to make an impact.

202. Rina's focus on learning to listen to communities and understand their perspectives is part of developing a:

- (A) Technology-centric approach.
- (B) Profit-centric approach.
- (C) People-centric approach.
- (D) A purely theoretical approach.

Ans :

- (C) A people-centric approach.

A key requirement for a development communication student is to be people-centric.

CHAPTER 14

CORPORATE COMMUNICATION AND PUBLIC RELATIONS

SUMMARY

1. INTRODUCTION

In today's information-driven society, communication is as essential as basic needs like food and shelter. Corporate communication has evolved into an important management tool that involves managing and orchestrating all internal and external communications to create a favorable public image.

2. SIGNIFICANCE

The success of any organization heavily depends on its perception by the public, competitors, and employees. The primary goal of corporate communication is to control how the organization is viewed by its stakeholders. This involves managing the flow of information through press releases, newsletters, and other modes, especially during a crisis, to shape public opinion and maintain a positive image. Public Relations (PR) is a critical activity used to achieve specific objectives such as creating a positive image, handling crises, motivating employees, and advertising products through various strategies like press conferences and events.

3. BASIC CONCEPTS

3.1 Corporate Communication

Corporate communication establishes effective communication channels with employees, consumers, investors, and other stakeholders, both locally and globally. Studies show that effective communication is crucial for improving productivity and job satisfaction within a company.

3.2 Public Relations

Public Relations (PR) is the deliberate, planned, and sustained effort to establish and maintain mutual understanding between an organization and its public. It is an attempt to seek support for an activity, cause, product, or service through information, persuasion, and contact. PR professionals must adhere to a strict code of ethics to avoid being labeled as manipulators.

3.3 Functions of Corporate Communication

Corporate communication builds a healthy organizational environment by managing information flow to various audiences. Its functions include creating and maintaining the brand's reputation, projecting a positive corporate image, building relationships with stakeholders, and handling crisis control.

3.4 Functions of PR

PR departments and agencies perform several common functions:

- **Policy Development:** Recommending a corporate public relations policy.
- **Statements and Press Releases:** Preparing corporate statements, speeches, and press releases to project a positive image.
- **Publicity:** Announcing company activities and products to the media and planning promotional campaigns.
- **Maintaining Relations:** Liaising with government units, maintaining good community relations, and communicating with shareholders and investors.
- **Publications:** Preparing and publishing materials like in-house magazines.

3.5 Major Areas of PR Activity

success of the RRE was due to the coordination between various participants and stakeholders, including government bodies and youth organizations.

190. The communication efforts of the RRE were primarily aimed at what purpose?

- (A) Selling commercial products to the rural population.
- (B) Political campaigning for the upcoming elections.
- (C) Facilitating social development and public health awareness.
- (D) Conducting a census of the rural population.

Ans :

(C) Facilitating social development and public health awareness.

Development communication is defined as utilizing the power of communication as a catalyst for social development. The RRE campaign used communication systematically to bring about positive social change in the area of public health.

Direction : Read the following case study and answer the following questions.

A development journalist is writing an article comparing the communication strategies of two different organizations. The first is a large multinational corporation that sells soft drinks. Their communication is focused on advertising, brand building, and public relations to enhance their corporate image and increase sales. This is known as corporate communication. The second organization is an NGO that works on environmental conservation. Their communication strategy is focused on informing the public about the dangers of plastic pollution, educating communities on waste segregation, and mobilizing people to participate in clean-up drives. This is known as development communication. The journalist's article highlights the key difference between the two: while corporate communication is primarily aimed at benefiting the organization, development communication is oriented towards the socio-economic development and happiness of the people and the community at large.

191. The NGO's communication strategy, which aims to educate and mobilize people for environmental conservation, is an example of:

- (A) Corporate Communication
- (B) Development Communication
- (C) Financial Communication

(D) Marketing Communication

Ans :

(B) Development Communication

Development communication is the practice of systematically applying communication principles to bring about positive social change. The NGO's work is a clear example of using communication as a catalyst for social and environmental development.

192. What is the primary orientation of development communication?

- (A) It is oriented to socio-economic development and the happiness of the people and community.
- (B) It is oriented to maximizing the profits of a private company.
- (C) It is oriented to promoting a political party or candidate.
- (D) It is oriented to providing entertainment without any educational value.

Ans :

(A) It is oriented to socio-economic development and the happiness of the people and community.

An essential feature of development communication is its orientation towards socio-economic development and the well-being of the people and the community at large. Its goal is positive social change, not commercial profit.

193. In contrast, what is the primary goal of corporate communication?

- (A) To solve the problems of mass illiteracy and malnutrition.
- (B) To provide a platform for local artists to showcase their talent.
- (C) To challenge and question the policies of the government.
- (D) To create a favorable public perception of the organization to enhance its success.

Ans :

(D) To create a favorable public perception of the organization to enhance its success.

The primary objective of corporate communication is to establish and manage the perception of an organization in the eyes of its stakeholders. This is done to protect its reputation and contribute to its commercial success.

194. The term "Development Communication" was first coined in 1972 by which communication scholar?

Ans :

(B) It is as fundamental as food, clothing, and shelter.

The text states that in today's information-driven society, communication is acknowledged as being as important as basic human needs like food, clothing, and shelter, highlighting its essential role in all aspects of life, including business.

2. What is the primary objective of corporate communication?
- (A) To maximize the company's annual profits.
 - (B) To create and manage internal employee conflicts.
 - (C) To establish a favorable perception of the organization.
 - (D) To report negative news to the general public.

Ans :

(C) To establish a favorable perception of the organization.

The primary objective of corporate communication is to manage how the organization is perceived by all its stakeholders. It aims to build a positive and respectable image, which is crucial for its ultimate success and position.

3. How does the public's perception influence an organization's success?
- (A) It has no impact on the organization's success.
 - (B) It solely determines the company's stock price.
 - (C) It only affects the morale of the employees.
 - (D) It defines the organization's respectability and position.

Ans :

(D) It defines the organization's respectability and position.

The chapter emphasizes that the perception of the public, competitors, and employees is a major variable for success. This perception defines the organization's respectability, its position in the market, and ultimately contributes to its success.

4. During a company crisis, what is the most critical factor that will define the public's reaction?
- (A) The public's understanding of the crisis and its handling.
 - (B) The actual details and facts of the crisis.
 - (C) The financial losses incurred by the company.
 - (D) The legal actions taken against the company.

Ans :

(A) The public's understanding of the crisis and its handling.

Regardless of what actually happened, the public and employees' understanding of the crisis and how the company managed it will shape their reaction. This underscores the importance of communication in managing perceptions during critical events.

5. Which term describes the set of activities involved in managing all internal and external communications to create a favorable image?
- (A) Human Resource Management
 - (B) Financial Accounting
 - (C) Corporate Communication
 - (D) Supply Chain Logistics

Ans :

(C) Corporate Communication

Corporate communication is explicitly defined as the set of activities involved in managing and orchestrating all internal and external communications. These activities are designed to create favorable starting points with stakeholders.

6. Why is Public Relations (PR) considered an important function for an organization?
- (A) It helps in creating a positive image and motivating employees.
 - (B) It primarily focuses on increasing sales figures.
 - (C) It is only necessary for non-profit organizations.
 - (D) It exclusively deals with legal issues and compliance.

Ans :

(A) It helps in creating a positive image and motivating employees.

PR is a vital function for any organization as it can be used for various objectives, including creating a positive company image, handling crises, motivating employees, and creating curiosity and information about products or events.

7. Which of the following statements about corporate communication is correct?
- (A) It is solely based on information given out by the CEO.
 - (B) It is concerned with people, processes, activities, and media.
 - (C) It only deals with communication to external stakeholders.
 - (D) It has a minimal role in influencing the company's fortune.

Ans :

(C) Internal Communication

Internal Communication is explicitly defined as the communication that takes place between and among the employer and employees within a single organization. It is essential for organizational cohesion and morale.

43. What is the primary benefit of effective internal communication?

- (A) It increases conflicts among employees.
- (B) It promotes transparency and enhances morale.
- (C) It is only useful for top management.
- (D) It makes the organization less efficient.

Ans :

(B) It promotes transparency and enhances morale.

Effective internal communication is a vital tool for binding an organization together. It enhances employee morale, promotes transparency in processes and decisions, and prevents the slow destruction that can arise from poor communication.

44. Which of the following represents a downward flow of internal communication?

- (A) Employees providing feedback to management.
- (B) Communication between managers of different departments.
- (C) An employee communicating with a manager from another team.
- (D) Top management communicating policies to lower levels.

Ans :

(D) Top management communicating policies to lower levels.

Downward communication flows from the top of the organizational hierarchy to the lower levels. An example is when top management communicates broad policies and objectives to the rest of the employees.

45. Which of the following is NOT a medium for written internal communication?

- (A) House journals and posters
- (B) A face-to-face meeting
- (C) Handbooks and manuals
- (D) Letters and memos

Ans :

(B) A face-to-face meeting

A face-to-face meeting is a form of oral or verbal communication. Written media for internal communication include physical or digital documents like journals, posters, handbooks, manuals, letters, and memos.

46. What is External Communication?

- (A) Communication between an organization and the outside world.
- (B) Communication that occurs only within a single department.
- (C) Informal gossip and rumors among employees.
- (D) Communication that is always conducted face-to-face.

Ans :

(A) Communication between an organization and the outside world.

External Communication is defined as communication that takes place between the members of an organization and the outside world, including entities like customers, media, government, and the general public.

47. What is a major function of external communication for a company?

- (A) To create internal policies and procedures.
- (B) To handle employee grievances and disputes.
- (C) To create a positive image and brand preservation.
- (D) To manage the internal payroll system.

Ans :

(C) To create a positive image and brand preservation.

External communication is crucial for functions that involve the public, such as creating a positive corporate image, preserving the brand's integrity, and maintaining good public relations, which are all enabled by this type of communication.

48. Which statement accurately describes the use of media in external communication?

- (A) Only verbal media can be used for external communication.
- (B) Only written media can be used for external communication.
- (C) Technology and digital media are not used.
- (D) Both written and verbal media can be used.

Ans :

(D) Both written and verbal media can be used. The chapter states that for external communication, both written media (like letters, reports, posters) and verbal media can be used to

- (A) To prevent them from interacting with the media.
- (C) To limit their communication with company employees.
- (C) To stop them from working with government agencies.
- (D) To ensure they do not commercialize sensitive information.

Ans :

(D) To ensure they do not commercialize sensitive information.

PR professionals often have access to confidential information. A code of ethics is crucial to prevent them from succumbing to the temptation to commercialize this information, which could damage the organization's integrity and trust.

- 14.** What negative labels must PR professionals avoid by adhering to a code of conduct?
- (A) Innovators or creators
 - (B) Fixers or manipulators
 - (C) Leaders or managers
 - (D) Analysts or researchers

Ans :

(B) Fixers or manipulators

The chapter explicitly states that PR professionals must adhere to a code of ethics and conduct to avoid being labeled as "fixers or manipulators," which would undermine their credibility and the profession's integrity.

- 15.** Which of the following is a key outcome of effective corporate communication?
- (A) Increased competition in the market.
 - (B) A weaker corporate identity.
 - (C) A strong corporate culture and philosophy.
 - (D) Reduced interaction with stakeholders.

Ans :

(C) A strong corporate culture, and corporate philosophy.

Effective corporate communication helps in building a strong corporate culture, a cohesive corporate identity, and a clear corporate philosophy, which are essential for a healthy and unified organizational environment.

- 16.** The term "corporate citizenship" as an outcome of corporate communication implies:
- (A) The legal status of a corporation as a citizen.
 - (B) The company's focus on maximizing shareholder profit only.
 - (C) The process of employees becoming citizens

of the host country.

- (D) A genuine sense of social responsibility and ethical behavior.

Ans :

(D) A genuine sense of social responsibility and ethical behavior.

A genuine sense of corporate citizenship means the organization acts as a responsible member of society, considering its impact on the community and environment, which is fostered through effective corporate communication.

- 17.** What is a primary function of corporate communication regarding an organization's brand?
- (A) To create and maintain the brand and its reputation.
 - (B) To sell the organization's brand to a competitor.
 - (C) To hide the organization's brand from the public.
 - (D) To minimize the importance of the brand.

Ans :

(A) To create and maintain the brand and its reputation.

A key function of corporate communication is to create and maintain the organization's brand and look after its reputation. This involves projecting the company's brand both internally and externally.

- 18.** Why has "reputation management" become a priority for most organizations?
- (A) Due to decreased competition and media presence.
 - (B) Due to increasing competition and media explosion.
 - (C) Due to government mandates for all companies.
 - (D) Due to a decline in the importance of public image.

Ans :

(B) Due to increasing competition and media explosion.

The chapter highlights that increasing competition, the accessibility of information, and the media explosion have made reputation management a top priority. Organizations must professionally manage their image to thrive in this environment.

- 19.** Who typically handles reputation management in a professional manner within an organization?

- (A) The legal department
- (B) The finance department
- (C) Corporate communicators
- (D) The IT department

Ans :

- (C) Corporate communicators

The task of reputation management is handled professionally by corporate communicators. They use their skills to manage the organization's image amidst increasing competition and media scrutiny.

- 20.** Which of the following is NOT listed as a function of corporate communication?
- (A) Managing employee payroll and benefits.
 - (B) Dealing with crisis control.
 - (C) Enabling sophisticated approaches to global communications.
 - (D) Informing the public about new products.

Ans :

(A) Managing employee payroll and benefits.
While corporate communication fosters a positive work environment, it is not directly responsible for administrative HR tasks like payroll and benefits. Its functions are focused on communication, reputation, and relationship management.

- 21.** What is the first function of a corporate PR department listed in the chapter?
- (A) To develop and recommend a corporate public relations policy.
 - (B) To organize company-wide social events for employees.
 - (C) To conduct market research for new product development.
 - (D) To design the company's official logo and branding.

Ans :

(A) To develop and recommend a corporate public relations policy.

The first function described for a corporate PR department is to develop and recommend a comprehensive public relations policy, which is then shared with top management and other departments to guide communication efforts.

- 22.** Why is it important for PR personnel to prepare statements and speeches for executives?
- (A) To ensure executives use complex and technical language.
 - (B) To prevent executives from communicating with the media.

- (C) To handle all financial reporting for the company.
- (D) To articulate and project a positive image of the company.

Ans :

- (D) To articulate and project a positive image of the company.

By preparing statements and speeches, PR personnel can carefully craft messages that articulate the company's position and project a positive image of its products, policies, or overall brand identity to the public and media.

- 23.** When a PR department plans a promotional campaign using media, what is its primary goal?
- (A) To generate negative press for competitors.
 - (B) To publicize company activities and products.
 - (C) To reduce the company's advertising budget.
 - (D) To communicate exclusively with government officials.

Ans :

(B) To publicize company activities and products.
A vital function of PR is publicity. This involves planning promotional campaigns and issuing announcements to the media and community to generate awareness and positive attention for the company's activities and products.

- 24.** What does maintaining good relations with the community as a 'good neighbour' involve for a company?
- (A) Ignoring local environmental protection standards.
 - (B) Avoiding the hiring of local residents for employment.
 - (C) Participating in locality development programs.
 - (D) Refusing to communicate with local government units.

Ans :

- (C) Participating in locality development programs.

Being a 'good neighbour' requires a company to engage positively with its community. This includes complying with environmental standards, providing local employment, and participating in programs that contribute to the development of the locality.

- 25.** Which of the following is a responsibility of a PR agency regarding shareholders?

- (A) Preparing annual reports and planning stockholder meetings.
- (B) Discouraging communication between the company and investors.
- (C) Providing shareholders with confidential competitor data.
- (D) Managing the personal finances of individual shareholders.

Ans :

(A) Preparing annual reports and planning stockholder meetings.

A key part of maintaining relations with investors is communication. This can involve the PR agency preparing official documents like annual reports and organizing meetings for stockholders to keep them informed and engaged.

- 26.** What is the basis of the relationship between the press and PR professionals?
- (A) They are completely independent of each other.
 - (B) They are in constant competition with each other.
 - (C) The press has complete control over PR professionals.
 - (D) They are mutually dependent on each other.

Ans :

(D) They are mutually dependent on each other. The text states that the press and PR are dependent on each other for their “bread and butter.” Journalists need newsworthy content to report, and PR professionals need the press for publicity, creating a give-and-take relationship.

- 27.** Which of the following is NOT a recommended practice for maintaining good press relations?
- (A) Providing well-timed and well-written press releases.
 - (B) Showing bias and giving undue favors to certain papers.
 - (C) Allowing easy accessibility for journalists.
 - (D) Forbearing criticism from the press.

Ans :

(B) Showing bias and giving undue favors to certain papers.

To maintain healthy press relations, PR professionals should avoid biases and treating some media outlets more favorably than others. Fairness and impartiality are key to building broad and credible media relationships.

- 28.** What is the primary purpose of advertising as a PR tool?
- (A) To disseminate information and influence people.
 - (B) To force consumers to purchase a product.
 - (C) To create secretive messages for a select audience.
 - (D) To replace all other forms of communication.

Ans :

(A) To disseminate information and influence people.

Advertising serves the purpose of disseminating information about a product or service and persuading or influencing the target audience to consume it, thereby supporting the organization’s marketing and PR objectives.

- 29.** Who is typically responsible for deciding the budget and media for advertising within a PR context?
- (A) The Chief Financial Officer (CFO)
 - (B) The head of the legal department
 - (C) An external advertising agency exclusively
 - (D) The Public Relations (PR) person

Ans :

(D) The Public Relations (PR) person

The chapter indicates that it is usually the PR person who is responsible for deciding the advertising budget and selecting the appropriate media channels to use for a campaign, integrating it into the broader PR strategy.

- 30.** When preparing publications like brochures and pamphlets, what should a PR department prioritize?
- (A) Complexity, ambiguity, and high cost.
 - (B) A negative image of the organization.
 - (C) Simplicity, clarity, and attractiveness.
 - (D) Using only technical and formal language.

Ans :

(C) Simplicity, clarity, and attractiveness.

The text advises that when preparing publications, PR professionals should remember to prioritize simplicity, clarity, cost-effectiveness, attractiveness, and ensuring the material reflects a true and positive image of the organization.

- 31.** Consider the following media used in PR:

1. Films and exhibitions
2. Hoardings and puppetry
3. Public speaking and telephone calls

Which of these fall under the range of operations

- (A) Correctness
- (B) Concreteness
- (C) Clarity
- (D) Consideration

Ans :

- (D) Consideration

Consideration means preparing every message with the recipient in mind. This involves putting yourself in their place and focusing on their viewpoint, needs, and interests, which is often expressed as the “you” attitude.

- 55.** What are the three parts of the active process of listening?
- (A) Hearing, understanding, and responding
 - (B) Speaking, writing, and reading
 - (C) Hearing, ignoring, and interrupting
 - (D) Thinking, feeling, and acting

Ans :

- (A) Hearing, understanding, and responding

The chapter defines listening as an active process composed of three distinct parts: hearing (the physical reception of sound), understanding (processing the meaning), and responding (showing you have heard and understood).

- 56.** In the listening process, which stage involves the brain processing words to derive meaning?
- (A) Hearing
 - (B) Responding
 - (C) Understanding
 - (D) Transmitting

Ans :

- (C) Understanding

Understanding is the cognitive stage of listening where the brain processes the words that are heard and interprets their meaning within the context of the conversation. It is where the information is actually communicated.

- 57.** Why is responding an important part of the listening process in a conversation?
- (A) It proves that you disagree with the speaker.
 - (B) It allows you to interrupt the speaker immediately.
 - (C) It is a way to change the topic of conversation.
 - (D) It shows that you have heard and understood the speaker.

Ans :

- (D) It shows that you have heard and understood the speaker.

Responding serves as feedback to the speaker. It demonstrates that you were actively listening, heard what was said, and understood the intent behind their words, which is crucial for effective two-way communication.

- 58.** What do “Interpersonal Skills” refer to?

- (A) A person’s ability to operate technical machinery.
- (B) A person’s ability to interact through social communication.
- (C) A person’s ability to perform financial calculations.
- (D) A person’s ability to write complex computer code.

Ans :

- (B) A person’s ability to interact through social communication.

Interpersonal skills are defined as the measure of a person’s ability to operate within business organizations through social communication and interactions. They are the skills used to interact effectively with other people.

- 59.** How do positive interpersonal skills contribute to productivity in an organization?
- (A) By reducing conflicts among employees.
 - (B) By increasing the number of conflicts.
 - (C) By making communication more formal.
 - (D) By limiting interactions between team members.

Ans :

- (A) By reducing conflicts among employees.

Having positive interpersonal skills increases productivity primarily because it helps in reducing conflicts. When people can communicate and interact harmoniously, it leads to a more cooperative and efficient work environment.

- 60.** People with good interpersonal skills can generally control what in difficult situations?
- (A) The actions and words of other people.
 - (B) The company’s overall financial performance.
 - (C) The feelings that emerge and can respond appropriately.
 - (D) The outcome of every negotiation without fail.

Ans :

- (C) The feelings that emerge and can respond appropriately.

The text states that people with good interpersonal skills can generally control their own emotional

- 37.** Which statement aligns with the principle “Conduct public relations as if the whole company depends on it”?
- (A) PR is a minor function with little impact on strategy.
- (B) Corporate relations is a management function.
- (C) PR decisions should be made without considering public impact.
- (D) The PR professional is only a technician, not a policymaker.

Ans :

(B) Corporate relations is a management function. This principle positions corporate relations as a core management function. It asserts that no corporate strategy should be implemented without considering its impact on the public, and it views the PR professional as a key policymaker.

- 38.** According to Arthur Page, a company’s true character is expressed by whom?
- (A) Its people, including all employees.
- (B) Its CEO and top executives only.
- (C) Its advertising and marketing campaigns.
- (D) Its legal and financial reports.

Ans :

(A) Its people, including all employees. This principle states that a company’s true character is expressed by its people. The words and deeds of every employee, active or retired, shape the strongest public opinions about the company.

- 39.** The principle “Remain calm, patient and good-humored” is particularly important during which situation?
- (A) When the company is experiencing record profits.
- (B) During a period of no media attention.
- (C) During routine, day-to-day operations.
- (D) When a crisis arises.

Ans :

(D) When a crisis arises. While a calm demeanor is always beneficial, this principle is especially crucial during a crisis. The text notes that when a crisis occurs, “cool heads communicate best,” emphasizing the need for a reasoned approach under pressure.

- 40.** Assertion (A): The PR person should project the culture of the organisation while disseminating information.
Reason (R): Journalists need news to remain in business, and PR needs publicity.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

Assertion (A) is true; projecting the organizational culture is a key part of authentic communication. Reason (R) is also a true statement describing the interdependent relationship between PR and the press. However, (R) explains the mutual need, not why projecting culture is important.

- 41.** Match the PR function in Column I with its corresponding activity in Column II.

	Column I		Column II
1.	Publicity	a.	Maintaining liaisons with government units
2.	Publications	b.	Issuing announcements of company activities to media
3.	Maintaining Relations	c.	Preparing and publishing in-house magazines
4.	Press Relations	d.	Providing well-written and well-timed press releases

- (A) 1-b, 2-c, 3-a, 4-d
 (B) 1-a, 2-b, 3-d, 4-c
 (C) 1-d, 2-a, 3-c, 4-b
 (D) 1-c, 2-d, 3-b, 4-a

Ans :

(A) 1-b, 2-c, 3-a, 4-d

The correct matches are: Publicity involves issuing announcements to the media. Publications involve preparing materials like in-house magazines. Maintaining relations includes liaising with government. Press relations involves providing press releases.

- 42.** Which type of communication takes place between and among the employer and employees of an organisation?
- (A) External Communication
- (B) Inter-organizational Communication
- (C) Internal Communication
- (D) Mass Communication

Ans :

(B) It is concerned with people, processes, activities, and media.

The text states that corporate communication is concerned with people, organisational processes, activities, and media. It is a broad function that involves various specialists and generalists within the organization.

8. What does the term “Public Relations” (PR) essentially mean?
- (A) The process of selling products directly to the public.
 - (B) The legal framework governing public companies.
 - (C) The act of managing public infrastructure projects.
 - (D) A planned effort to maintain understanding with the public.

Ans :

(D) A planned effort to maintain understanding with the public.

One of the provided definitions describes Public Relations as a “deliberate, planned and sustained effort to establish and maintain mutual understanding between an organisation and the public,” highlighting its strategic and relational nature.

9. According to a 1990 study mentioned in the chapter, what did over 88% of industrial engineers believe leads to reduced productivity?
- (A) Lack of advanced technology in the workplace.
 - (B) Insufficient employee benefits and compensation.
 - (C) Lack of communication and cooperation.
 - (D) Excessive government regulations on businesses.

Ans :

(C) Lack of communication and cooperation.

The 1990 study cited reveals that over 88% of industrial engineers strongly agreed that a lack of communication and cooperation among different components of a business results in reduced productivity, emphasizing the critical role of effective communication.

10. In a study by A. Foster Higgins and Company, what percentage of CEOs believe that communicating with employees positively affects job satisfaction?
- (A) 22 percent
 - (B) 79 percent

(C) 88 percent

(D) 97 percent

Ans :

(D) 97 percent

The study found that 97 percent of surveyed CEOs believe that communication with employees has a positive impact on job satisfaction. This shows a high level of recognition among top executives about the importance of internal communication.

11. How is Public Relations (PR) described in the context of being an art and a science?
- (A) It combines the emotionality of art and the system of science.
 - (B) It is purely an artistic endeavor with no scientific basis.
 - (C) It is a rigid science with no room for creative expression.
 - (D) It relies only on data and analytics, not on creativity.

Ans :

(A) It combines the emotionality of art and the system of science.

The text describes Public Relations as both an art and a science, possessing the beauty and emotionality characteristic of art, alongside the systematic approach that is characteristic of science.

12. Which of the following is NOT a primary goal of Public Relations?
- (A) To establish a bond of relationships with the public.
 - (B) To directly manage the company’s financial investments.
 - (C) To maintain mutual understanding with an organization’s public.
 - (D) To seek support for a product, service, or institution.

Ans :

(B) To directly manage the company’s financial investments.

While PR indirectly influences financial success through reputation management, its primary goals are centered on building relationships, fostering mutual understanding, and gaining support for the organization’s activities, not on direct financial management.

13. Why is a code of ethics considered crucial for PR professionals?

transmit messages to outside parties, providing flexibility in communication methods.

49. Evaluate the following statements regarding the 7 Cs of communication:

1. Conciseness helps in catching the reader's attention.
2. Clarity ensures the message gives an explicit and undiversified meaning.
3. Courtesy involves emphasizing a 'me' and 'we' attitude in the message.
4. Correctness means the message should be free from grammatical errors.

Which of the statements are correct?

- (A) 1, 2, and 4
(B) 1, 2, and 3
(C) 2, 3, and 4
(D) 1, 3, and 4

Ans :

- (A) 1, 2, and 4

Statements 1, 2, and 4 are correct descriptions of conciseness, clarity, and correctness. Statement 3 is incorrect; consideration (not courtesy) emphasizes a 'you' attitude, rather than an 'I' or 'we' attitude.

50. Match the 'C' of communication in Column I with its correct description in Column II.

	Column I		Column II
1.	Completeness	a.	The message should be concrete and not vague.
2.	Concreteness	b.	The sender should use a polite and respectful tone.
3.	Consideration	c.	The message should contain all necessary information.
4.	Courtesy	d.	The message should focus on the 'you' attitude.

- (A) 1-c, 2-a, 3-d, 4-b
(B) 1-d, 2-c, 3-b, 4-a
(C) 1-a, 2-b, 3-c, 4-d
(D) 1-b, 2-d, 3-a, 4-c

Ans :

- (A) 1-c, 2-a, 3-d, 4-b

Completeness means providing sufficient information. Concreteness means the message is specific. Consideration involves a 'you' attitude. Courtesy refers to a polite tone.

51. Which of the '7 Cs' suggests that a message should be brief to easily capture the reader's attention?
(A) Clarity
(B) Completeness
(C) Conciseness
(D) Correctness

Ans :

- (C) Conciseness

The principle of Conciseness states that a message should be brief and to the point. This makes it easier for the reader to pay attention to and understand the core message without getting lost in unnecessary details.

52. Why is 'Concreteness' important in a message?
(A) It makes the message longer and more detailed.
(B) It ensures the message conveys clear and specific meaning.
(C) It allows the sender to use vague and general terms.
(D) It focuses only on the sender's feelings and opinions.

Ans :

- (B) It ensures the message conveys clear and specific meaning.

A concrete message is specific, definite, and vivid rather than vague and general. This ensures that the meaning is clear and not open to misinterpretation, making the communication more effective.

53. A message that provides all the necessary information for the audience to understand and react appropriately adheres to which principle?
(A) Clarity
(B) Completeness
(C) Courtesy
(D) Conciseness

Ans :

- (B) Completeness

The principle of Completeness dictates that the message must provide all the necessary information for the audience. A complete message answers potential questions and gives the reader everything they need to be informed and take action.

This book has been published by NODIA Learning.

54. Emphasizing the "you" attitude instead of the "I" or "we" attitude in communication aligns with which of the 7 Cs?

of a PR department?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1, 2, and 3

Ans :

- (D) 1, 2, and 3

A PR department utilizes a wide array of media. This includes audio-visual media like films and exhibitions, traditional media like puppetry, outdoor media like hoardings, and direct communication methods like public speaking and courteous telephone conversations.

- 32.** What does the term “Internal PR” refer to?
- (A) Maintaining relations with all employees and executives.
 - (B) Maintaining relations only with the press and media.
 - (C) Public relations activities conducted outside the country.
 - (D) Communicating exclusively with government agencies.

Ans :

- (A) Maintaining relations with all employees and executives.

Internal PR activities are focused within the organization. They involve maintaining good relations with all employees, including executives and other senior personnel, to ensure smooth information flow and a positive internal environment.

- 33.** According to Arthur W. Page’s principles, what does “Tell the truth” imply for a company?
- (A) Only share information that is legally required.
 - (B) Provide an accurate picture of the company’s character.
 - (C) Hide negative information from the public at all costs.
 - (D) Communicate only through official press releases.

Ans :

- (B) Provide an accurate picture of the company’s character.

The principle “Tell the truth” means being transparent with the public about what is happening. It involves providing an accurate and honest picture of the company’s character, ideals, and practices to build trust.

- 34.** What determines 90 percent of the public perception of an organization, according to Arthur Page?
- (A) What the company says about itself.
 - (B) The company’s advertising budget.
 - (C) What the company does (its actions).
 - (D) The size of the company’s PR team.

Ans :

- (C) What the company does (its actions).

Arthur Page’s principle “Prove it with action” emphasizes that public perception is determined 90 percent by what an organization does and only 10 percent by what it says, highlighting the importance of actions over words.

- 35.** The principle “Listen to the customer” suggests that PR professionals should:
- (A) Ignore public reaction to company products.
 - (B) Only listen to positive feedback from customers.
 - (C) Prevent employees from knowing public opinions.
 - (D) Keep decision-makers informed about public reaction.

Ans :

- (D) Keep decision-makers informed about public reaction.

This principle requires PR professionals to understand public wants and needs. A key part of this is keeping top decision-makers and employees informed about public reactions to products and policies, enabling the company to adapt and improve.

- 36.** What does the principle “Manage for tomorrow” primarily focus on?
- (A) Reacting to public criticism after it happens.
 - (B) Focusing only on short-term quarterly profits.
 - (C) Anticipating public reaction to eliminate problems.
 - (D) Maintaining the status quo without any changes.

Ans :

- (C) Anticipating public reaction to eliminate problems.

“Manage for tomorrow” is a proactive principle. It involves anticipating future public reactions and eliminating practices that could create difficulties, thereby generating goodwill and preventing potential crises before they arise.

responses in difficult situations. They can respond appropriately instead of being overwhelmed by emotion.

61. What is “Negotiation”?

- (A) A process where one party dominates the other completely.
- (B) A process where both parties try to convince the other.
- (C) A situation where both parties have fully acceptable points.
- (D) A method of avoiding communication between two parties.

Ans :

(B) A process where both parties try to convince the other.
Negotiation is described as a process where both parties have some unacceptable points regarding an issue and each party tries to convince the other to reach a mutually acceptable agreement.

62. What is the key to a successful negotiation where both sides feel satisfied?

- (A) Trading concessions against each other.
- (B) One side winning all the concessions.
- (C) Avoiding any form of compromise.
- (D) Focusing only on one single issue.

Ans :

(A) Trading concessions against each other.
A good negotiation allows both sides to feel they have gained something. This is achieved by the negotiators trading concessions against each other, where giving up something of lesser value gains something of greater value.

63. Which of the following is NOT one of the four elements of a good presentation?

- (A) Content
- (B) Structure
- (C) Human element
- (D) Complexity

Ans :

(D) Complexity
A good presentation is characterized by four elements: content (the information), structure (logical flow), packaging (treatment of content), and the human element (the person delivering it). Complexity is not listed as a desirable element.

64. In a presentation, what does the “structure” refer to?

- (A) The amount of information presented.
- (B) The personality of the speaker.
- (C) A logical beginning, middle, and end.
- (D) The use of advanced presentation software.

Ans :

(C) A logical beginning, middle, and end.
The structure of a presentation refers to its logical flow. It should have a clear beginning (introduction), middle (body), and end (conclusion), and be sequenced in a way that the audience can easily follow and understand.

65. What is “Rapport” in the context of communication?

- (A) The process of giving direct orders.
- (B) The establishment of trust and harmony.
- (C) A formal disagreement between two parties.
- (D) The use of purely digital communication.

Ans :

(B) The establishment of trust and harmony.
Rapport is defined as the establishment of trust and harmony in a relationship. It is a key element in gaining the support and cooperation of other people through effective communication.

66. What percentage of communication is transmitted by body language and the way you speak (analogue communication)?

- (A) 7%
- (B) 50%
- (C) 75%
- (D) 93%

Ans :

(D) 93%
The chapter states that around 93% of communication is analogue, transmitted through body language and tone of voice. In contrast, only 7% of the message is carried by the actual words (digital communication).

67. Why is effective decision-making a challenge for managers in corporate houses?

- (A) They must balance efficiency, profit, and stakeholder satisfaction.
- (B) They only need to consider the company’s profit.
- (C) Decisions are always simple with clear outcomes.
- (D) They do not have access to enough information.

Ans :

- (A) Rapport Establishment
- (B) Decision Making
- (C) Time Management
- (D) Public Speaking

Ans :

- (A) Rapport Establishment

Rapport, defined as the establishment of trust and harmony in a relationship, is explicitly mentioned as the “key element in the art of obtaining the support and co-operation of other people.”

- 104.** The principle “Prove it with action” implies that an organization’s reputation is most powerfully shaped by:
- (A) Its marketing slogans.
 - (B) Its financial reports.
 - (C) Its CEO’s speeches.
 - (D) Its deeds and practices.

Ans :

- (D) Its deeds and practices.

This principle highlights that what a company does—its actions, behaviors, and practices—is far more influential in shaping public perception and reputation than what it merely says in its communications.

- 105.** Which of the following is a correct statement regarding internal communication?
- (A) It flows only from the bottom to the top of an organization.
 - (B) It can be formal or informal and flow in multiple directions.
 - (C) It is solely used for communicating with customers.
 - (D) It is considered a non-essential part of management.

Ans :

- (B) It can be formal or informal and flow in multiple directions.

Internal communication is complex and dynamic. It can be both formal (official memos) and informal (casual conversations) and flows in various directions—vertically (up and down), horizontally, and diagonally across the organization.

- 106.** The 7 Cs of communication are guidelines for composing effective messages. Which of the following is NOT one of the 7 Cs?
- (A) Clarity
 - (B) Courtesy
 - (C) Creativity
 - (D) Correctness

Ans :

- (C) Creativity

While creativity is valuable in communication, it is not one of the formal “7 Cs” listed in the chapter. The list includes Conciseness, Concreteness, Clarity, Completeness, Courtesy, Correctness, and Consideration.

- 107.** The ability to operate within a business through social communication and interactions is known as:
- (A) Technical Skill
 - (B) Financial Skill
 - (C) Analytical Skill
 - (D) Interpersonal Skill

Ans :

- (D) Interpersonal Skill

This is the definition provided for interpersonal skills. It emphasizes a person’s proficiency in interacting with others in a professional context, which is crucial for collaboration and reducing workplace friction.

- 108.** When a manager uses PowerPoint with a logical flow to inform a group, which skill is being demonstrated?
- (A) Negotiation skill
 - (B) Time management skill
 - (C) Presentation skill
 - (D) Accent neutralization skill

Ans :

- (C) Presentation skill

Using visual aids like PowerPoint, ensuring a logical structure, and communicating ideas and information to a group are all hallmarks of effective presentation skills.

- 109.** Why is it important to manage for “tomorrow” in public relations?
- (A) To react to past events more effectively.
 - (B) To anticipate public reaction and prevent future problems.
 - (C) To focus only on immediate, short-term gains.
 - (D) To ensure that all communication remains unchanged.

Ans :

- (B) To anticipate public reaction and prevent future problems.

This proactive principle emphasizes the need to look ahead, anticipate how the public might react to company actions, and address potential issues

- 74.** When do stress symptoms begin to manifest themselves?
- (A) When we feel life's demands exceed our ability to deal with them.
 - (B) When life's demands are less than our ability to cope.
 - (C) When we are on vacation and completely relaxed.
 - (D) When we successfully complete a difficult task.

Ans :

(A) When we feel life's demands exceed our ability to deal with them.

Stress symptoms start to appear when we perceive that the demands of life are exceeding our ability to cope. It is this imbalance between demands and perceived coping ability that leads to negative stress effects.

- 75.** What is the ultimate goal of stress management?
- (A) To eliminate all challenges and pressures from life.
 - (B) To focus solely on work and professional goals.
 - (C) To avoid all social relationships and interactions.
 - (D) To achieve a balanced life with time for work and relaxation.

Ans :

(D) To achieve a balanced life with time for work and relaxation.

The ultimate goal of stress management is to achieve a balanced life. This includes having time for work, relationships, relaxation, and fun, along with the resilience to handle pressure and meet challenges effectively.

- 76.** Which statement about PR work is accurate?
- (A) PR persons only need to focus on composing messages.
 - (B) The language used does not need to consider the target group.
 - (C) PR persons must consider the characteristics of the target audience.
 - (D) Interpersonal skills are not important for PR persons.

Ans :

(C) PR persons must consider the characteristics of the target audience.

In PR work, it is crucial to consider the characteristics of the target audience. This

includes using appropriate language and tailoring the message and media to effectively reach and resonate with that specific group.

- 77.** What does the umbrella term "Information and Communication Technologies" (ICT) cover?
- (A) Only pre-digital technologies like paper-based writing.
 - (B) Only telecommunication networks and equipment.
 - (C) Only computer hardware and software systems.
 - (D) All technical means for processing and communicating information.

Ans :

(D) All technical means for processing and communicating information.

ICT is a broad, umbrella term that encompasses all technical means used for processing and communicating information. This includes digital technologies, communication methods, media, and storage and processing techniques.

- 78.** The term ICT has gained popularity due to the union of which two technology fields?
- (A) Automotive technology and aerospace technology.
 - (B) Information technology (IT) and telecom technology.
 - (C) Biotechnology and nanotechnology.
 - (D) Agricultural technology and construction technology.

Ans :

(B) Information technology (IT) and telecom technology.

The chapter notes that the term ICT gained popularity partly due to the convergence or union of information technology (IT) and telecommunications technology, reflecting the integration of computing and connectivity.

- 79.** What is a key role for a PR officer in relation to external entities?
- (A) To extend communication with stockholders, media, and government.
 - (B) To limit all communication with the general public.
 - (C) To handle internal employee training exclusively.
 - (D) To focus only on communication with customers.

Ans :

(D) Information and Communication Technologies

Ans :

(D) Information and Communication Technologies
ICT is an umbrella term that stands for Information and Communication Technologies. It covers all technical means used for processing, storing, and communicating information, particularly in the digital realm.

93. How has technology revolutionized the scope of communication?

- (A) By limiting access to information and knowledge.
- (B) By making communication slower and less efficient.
- (C) By opening doors to a variety of global information.
- (D) By making communication more expensive for everyone.

Ans :

(C) By opening doors to a variety of global information.

Technology, particularly ICT, has revolutionized communication by making a vast amount of information, knowledge, and news from all over the world instantly accessible, breaking down geographical and time barriers.

94. Which of the following pairs correctly links a communication skill with its description?

- (A) Listening Skill - The physical act of hearing sounds only.
- (B) Negotiation Skill - A process where one party enforces their will.
- (C) Presentation Skill - Contains only the packaging of information.
- (D) Interpersonal Skill - The ability to interact through social communication.

Ans :

(D) Interpersonal Skill - The ability to interact through social communication.

This pair is correct. Interpersonal skills are the skills one uses to interact effectively with other people through social communication. The other options provide incorrect or incomplete descriptions of the respective skills.

95. Assertion (A): Effective time management can lead to less stress for an individual.

Reason (R): Stress symptoms manifest when life's demands exceed our ability to deal with them.

(A) Both (A) and (R) are true, and (R) is the

correct explanation of (A).

(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

(C) (A) is true, but (R) is false.

(D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

Assertion (A) is true; being in control of one's time reduces feelings of being overwhelmed. Reason (R) correctly identifies the cause of stress. Better time management enhances one's ability to deal with demands, thus preventing them from exceeding coping capacity and thereby reducing stress.

96. Which of the following is NOT a core principle of Public Relations as outlined by Arthur W. Page?

- (A) Tell the truth.
- (B) Listen to the customer.
- (C) Prioritize profit above all else.
- (D) Manage for tomorrow.

Ans :

(C) Prioritize profit above all else.

Arthur W. Page's principles focus on ethical and proactive relationship building, such as telling the truth, listening, and long-term planning. Prioritizing profit above these ethical considerations is not one of his principles.

97. Match the type of communication skill in Column I with the professional scenario in Column II.

	Column I		Column II
1.	Negotiation	a.	A manager gives a quarterly update to the entire department.
2.	Presentation	b.	Two companies merge and have to agree on new terms.
3.	Listening	c.	An employee pays close attention to a client's feedback.
4.	Interpersonal	d.	A team leader effectively resolves a conflict between members.

(A) 1-d, 2-c, 3-a, 4-b

(B) 1-b, 2-a, 3-c, 4-d

(C) 1-c, 2-d, 3-b, 4-a

(D) 1-a, 2-b, 3-d, 4-c

process of finding a mutually acceptable solution through compromise and trading concessions.

- 86.** What is a key benefit of establishing rapport in communication?
- (A) It creates a feeling of distrust and disharmony.
 - (B) It helps in obtaining the support and co-operation of others.
 - (C) It ensures that communication is always formal.
 - (D) It limits communication to only verbal messages.

Ans :

(B) It helps in obtaining the support and co-operation of others.

Establishing rapport, which is the creation of trust and harmony, is the key element in obtaining the support and co-operation of other people. It makes interactions smoother and more productive.

- 87.** According to the text, what percentage of a message is carried by words (digital communication)?
- (A) 93%
 - (B) 50%
 - (C) 25%
 - (D) 7%

Ans :

(D) 7%

The text explicitly states that only 7% of a message is carried by the words themselves (digital communication), while the vast majority (93%) is conveyed through non-verbal cues like body language and tone of voice.

- 88.** A manager needs to spend the department's budget on either new equipment or employee training. The process of weighing these options and choosing the best course of action demonstrates which skill?
- (A) Effective decision-making
 - (B) Listening skill
 - (C) Accent neutralization
 - (D) Time management

Ans :

(A) Effective decision-making

This scenario requires the manager to assess factors, anticipate outcomes, and make a choice in the best interest of the department. This entire process is a clear example of effective decision-making.

- 89.** Why are public speaking skills important for a corporate communicator?
- (A) To avoid all forms of direct communication.
 - (B) To effectively convey messages to groups.
 - (C) To write emails and internal memos.
 - (D) To analyze financial data accurately.

Ans :

(B) To effectively convey messages to groups.

Public speaking is a crucial skill for corporate communicators as it enables them to deliver presentations, speeches, and announcements effectively to both internal and external audiences, thereby shaping perceptions and disseminating information.

- 90.** What is the primary purpose of developing time management skills?
- (A) To add more hours to the day.
 - (B) To avoid all responsibilities and goals.
 - (C) To increase efficiency and productivity.
 - (D) To work constantly without any breaks.

Ans :

(C) To increase efficiency and productivity.

Time management is about using time more effectively to achieve goals. It leads to the development of processes and tools that increase both personal and organizational efficiency and productivity, ultimately improving quality of life.

- 91.** Which of the following statements about stress is correct?
- (A) Stress can sometimes motivate and encourage us.
 - (B) Stress is always a negative and harmful experience.
 - (C) Stress management means avoiding all difficult tasks.
 - (D) Stress only has mental effects, not physical ones.

Ans :

(A) Stress can sometimes motivate and encourage us.

The chapter points out that stress is not always negative. In some cases, it can be a motivating force, encouraging us to complete difficult tasks and feel a sense of pride and achievement. This is often referred to as 'eustress'.

- 92.** What does the acronym ICT stand for?
- (A) Internal Communication Technology
 - (B) Information and Corporate Training
 - (C) Integrated Computer Terminology

(A) To extend communication with stockholders, media, and government.

A PR officer's scope includes extending communication to various external entities such as stockholders, the media, press, NGOs, government bodies, customers, and the general public to manage relationships and the organization's image.

- 80.** What is the most crucial requirement in the PR profession to avoid being labelled as a 'fixer' or 'manipulator'?

(A) Having access to confidential information.
(B) Adhering to a code of ethics and conduct.
(C) The ability to commercialize information.
(D) Focusing solely on the interests of clients.

Ans :

(B) Adhering to a code of ethics and conduct.
To maintain professional integrity and public trust, it is essential for PR professionals to adhere to a strict code of ethics and conduct. This ensures they serve interests responsibly and are not seen as manipulative.

- 81.** Which skill equips a communicator to compose and transmit messages successfully and can be self-taught?

(A) Negotiation skills
(B) Presentation skills
(C) Listening skills
(D) Technical skills

Ans :

(C) Listening skills
The text suggests that while many skills require formal training, listening skills can be self-taught. Effective listening is fundamental to understanding others and is a cornerstone of being a successful communicator, enabling one to compose and transmit messages effectively.

- 82.** Which skills can be learned by observing successful and effective people?

(A) Interpersonal and negotiation skills
(B) Listening skills and technical skills
(C) Accent neutralisation and writing skills
(D) Time management and stress management

Ans :

(A) Interpersonal and negotiation skills
The chapter indicates that interpersonal skills, negotiation skills, and rapport establishment can be learned by observing how effective people interact and handle situations. This suggests that

observation and modeling are powerful learning tools for these specific social competencies.

- 83.** A training program focused on accent neutralization aims to help individuals achieve what?

(A) To learn a new language from scratch.
(B) To make their speech clearer for listeners.
(C) To speak with a stronger regional accent.
(D) To stop using non-verbal communication.

Ans :

(B) To make their speech clearer for listeners.
Accent neutralization training focuses on modifying pronunciation to ensure that speech is easily understood by a diverse audience. The goal is clarity and effective communication, not eliminating or adopting a specific accent.

- 84.** What does the 'human element' in a presentation refer to?

(A) The use of advanced technology and software.
(B) The amount of data and statistics included.
(C) The physical environment where the presentation occurs.
(D) The fact that a person is attached to the presentation.

Ans :

(D) The fact that a person is attached to the presentation.

The human element emphasizes that a good presentation is memorable because of the person delivering it. The speaker's personality, connection with the audience, and ability to convey the message personally are crucial components.

- 85.** Which of the following statements about negotiation is incorrect?

(A) It is a process where each party tries to convince the other.
(B) Good negotiation can result in both sides being happy with the deal.
(C) It is a process where one party must always lose completely.
(D) It involves trading concessions to reach an agreement.

Ans :

(C) It is a process where one party must always lose completely.

This statement is incorrect. Good negotiation aims for a win-win outcome where both parties feel satisfied. It is not a zero-sum game; rather, it's a

Ans :

(B) 1-b, 2-a, 3-c, 4-d

The correct matches are: Negotiation is used when companies merge (b). Presentation skills are used for a quarterly update (a). Listening is key to understanding client feedback (c). Interpersonal skills help in resolving team conflict (d).

98. Analyze the following statements about corporate communication:

1. It is a vital tool for enhancing employee morale.
2. External communication promotes goodwill with the public.
3. The 7 Cs of communication include Complexity and Confusion.
4. Reputation management is a low priority for most organizations.

Which combination of statements is correct?

- (A) 1 and 2
- (B) 2 and 4
- (C) 1 and 3
- (D) 3 and 4

Ans :

(A) 1 and 2

Statements 1 and 2 are correct. Corporate communication is vital for morale, and external communication builds goodwill. Statement 3 is incorrect; the 7 Cs include Clarity and Correctness, not Complexity and Confusion. Statement 4 is also incorrect; reputation management is a high priority.

99. What is the primary role of a Public Relations (PR) department regarding company publications?

- (A) To proofread publications from other departments.
- (B) To design the layout for external magazines only.
- (C) To prepare and publish materials like in-house magazines.
- (D) To restrict the distribution of all company publications.

Ans :

(C) To prepare and publish materials like in-house magazines.

The PR department is responsible for bringing out a variety of publications, such as brochures, pamphlets, and in-house magazines, to communicate with both internal and external stakeholders.

100. In PR, maintaining relations with financial analysts, bankers, and shareholders falls under which major area of activity?

- (A) Press Relations
- (B) Advertising
- (C) Publications
- (D) PR with Constituents

Ans :

(D) PR with Constituents

This activity involves building and maintaining relationships with key stakeholders or “constituents” who have a financial interest or influence in the organization, which is a specific and crucial area of PR work.

101. What does “articulate and project a positive image of the company” mean in the context of PR?

- (A) To use complex language that is hard to understand.
- (B) To clearly express and communicate a favorable view of the company.
- (C) To create a physical projection of the company’s logo.
- (D) To report only the negative aspects of the company.

Ans :

(B) To clearly express and communicate a favorable view of the company.

In PR, this phrase means to skillfully use communication to present the company, its products, or policies in a positive and favorable light to the public and other stakeholders.

102. A PR professional who ensures the company complies with environmental standards and hires locally is focusing on what?

- (A) Shareholder relations
- (B) Press relations
- (C) Community relations
- (D) Employee relations

Ans :

(C) Community relations

These actions—complying with environmental standards, providing local jobs, and participating in local development—are all key components of maintaining good relations with the local community and acting as a “good neighbour.”

103. Which communication skill is described as the key element in obtaining the support and co-operation of other people?

Ans :

(D) External Communication

Customers, dealers, and the general public are all parties outside the organization. Therefore, communication with them falls under the category of external communication.

- 116.** An employee writing a formal memo to their supervisor is an example of which type and direction of communication?

(A) External, downward communication
(B) Internal, upward communication
(C) External, horizontal communication
(D) Internal, downward communication

Ans :

(B) Internal, upward communication

The communication is internal because it is between two members of the same organization. It is upward because it is flowing from a subordinate (employee) to a superior (supervisor). A memo is a formal written medium.

- 117.** The process of trading concessions in a negotiation is done to:

(A) Reach a mutually acceptable agreement.
(B) Ensure one party loses everything.
(C) Avoid discussing the main issues.
(D) Make the negotiation process longer.

Ans :

(A) Reach a mutually acceptable agreement.

Trading concessions is the central mechanism of negotiation. Each party gives up something to gain something else, moving from their initial positions toward a middle ground that is acceptable to both.

- 118.** Which skill requires formal training for using software and hardware effectively?

(A) Listening skills
(B) Interpersonal skills
(C) Rapport establishment skills
(D) Presentation skills

Ans :

(D) Presentation skills

The text states that presentation skills often involve the use of software and hardware (like PowerPoint), which typically requires formal training to master effectively, unlike some other skills that can be learned through observation.

- 119.** Which of Arthur W. Page's principles emphasizes that every employee is involved with public relations?

(A) Tell the truth.
(B) Manage for tomorrow.
(C) A company's true character is expressed by its people.
(D) Listen to the customer.

Ans :

(C) A company's true character is expressed by its people.

This principle directly states that a company's character is expressed by its people and that every employee's words and deeds shape public opinion. Therefore, every employee is an ambassador involved in public relations.

- 120.** Which of the following is NOT a function of a corporate PR department?

(A) Developing corporate PR policy.
(B) Preparing speeches for executives.
(C) Handling inquiries from the press.
(D) Conducting the company's financial audits.

Ans :

(D) Conducting the company's financial audits.

Financial auditing is a specialized function of the accounting or finance department and is separate from the roles and responsibilities of a Public Relations department, which focuses on communication and reputation.

- 121.** What does the term "stakeholders" refer to in corporate communication?

(A) Only the shareholders of the company.
(B) Any individual or group with an interest in the organization.
(C) Only the employees working within the organization.
(D) Only the customers who buy the company's products.

Ans :

(B) Any individual or group with an interest in the organization.

Stakeholders is a broad term that includes all parties that have an interest or "stake" in the organization, such as employees, customers, investors, suppliers, government, and the community.

- 122.** A company launches a new eco-friendly product. The PR team issues a press release highlighting

before they become crises, thereby generating goodwill.

- 110.** What is the ultimate goal of stress management?
- (A) To achieve a balanced life.
 - (B) To eliminate all sources of pressure.
 - (C) To increase one's workload.
 - (D) To avoid social interaction.

Ans :

(A) To achieve a balanced life.

The text states the ultimate goal is a balanced life, with time for work, relationships, relaxation, and fun, plus the resilience to handle pressure. It's about managing stress, not eliminating all of life's challenges.

- 111.** Match the 'C' of communication in Column I with its appropriate key phrase in Column II.

	Column I		Column II
1.	Clarity	a.	Be polite and respectful.
2.	Conciseness	b.	Be specific, not vague.
3.	Courtesy	c.	Be brief and to the point.
4.	Concreteness	d.	Be explicit and easy to understand.

- (A) 1-d, 2-c, 3-a, 4-b
- (B) 1-b, 2-a, 3-d, 4-c
- (C) 1-a, 2-d, 3-c, 4-b
- (D) 1-c, 2-b, 3-a, 4-d

Ans :

(A) 1-d, 2-c, 3-a, 4-b

The correct pairings are: Clarity means being explicit and easy to understand. Conciseness means being brief. Courtesy involves politeness. Concreteness requires being specific.

- 112.** Consider the following aspects of corporate communication:
- 1. It is a set of activities for managing internal and external communications.
 - 2. It primarily aims to create an unfavorable perception of the organization.
 - 3. It helps in building a strong corporate culture and identity.

Which of the statements are correct?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1, 2, and 3

Ans :

(C) 1 and 3 only

Statements 1 and 3 accurately describe the definition and positive outcomes of corporate communication. Statement 2 is incorrect; the goal is to create a favorable, not unfavorable, perception.

- 113.** Assertion (A): The significance of corporate communication is 'controlling how the world sees you'.

Reason (R): A major variable for the success of any organisation is the perception of the public.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

(A) Both (A) and (R) are true, and (R) is the correct explanation of (A).

Assertion (A) states the core purpose of corporate communication. Reason (R) provides the underlying justification for why this control of perception is so significant—because public perception is a major determinant of success. Thus, (R) correctly explains (A).

- 114.** Which of the following pairs incorrectly links a PR function with its activity?

- (A) Publicity - Issuing announcements of company activities.
- (B) Press Relations - Avoiding all criticism from the press.
- (C) Publications - Preparing in-house magazines.
- (D) Maintaining Relations - Liaising with government units.

Ans :

(B) Press Relations - Avoiding all criticism from the press.

Good press relations involve forbearance of press criticism, not avoiding it entirely. A healthy relationship with the media includes being able to handle and respond to criticism constructively. The other pairs are correct.

- 115.** A company's communication with its customers, dealers, and the general public is classified as:

- (A) Internal Communication
- (B) Diagonal Communication
- (C) Informal Communication
- (D) External Communication

(A) They must balance efficiency, profit, and stakeholder satisfaction.

Managers face the challenge of effective decision-making because they must balance multiple, often competing, interests. These include the company's efficiency, its profitability, and the satisfaction of various stakeholders like employees, customers, and owners.

- 68.** Which statement about telephone etiquette is true?
- (A) It has no impact on the company's image.
 - (B) It is only important for personal calls.
 - (C) It is an outdated skill in the age of email.
 - (D) It creates a good impression and puts others at ease.

Ans :

(D) It creates a good impression and puts others at ease.

Good telephone etiquette is important in a professional setting because it helps create a positive impression of both the individual and the organization. It also helps in making the person on the other end of the call feel comfortable and respected.

- 69.** What is the goal of "Accent Neutralization"?
- (A) To make one's accent stronger and more regional.
 - (B) To adopt a specific foreign accent perfectly.
 - (C) To pronounce words so the listener can easily understand.
 - (D) To stop speaking a language altogether.

Ans :

(C) To pronounce words so the listener can easily understand.

Accent neutralization is not about eliminating an accent but about modifying pronunciation so that speech is clear and easily understood by a wide range of listeners, regardless of their own accent or dialect.

- 70.** Which of the following is NOT a reason for practicing accent neutralization?
- (A) To make conversations difficult for listeners.
 - (B) To improve the professional image of your company.
 - (C) To be more confident and effective professionally.
 - (D) To increase personal and professional opportunities.

Ans :

(A) To make conversations difficult for listeners. The purpose of accent neutralization is to enhance understanding and communication. Making conversations difficult is the opposite of its goal. The benefits include improved professional image, confidence, and greater opportunities.

- 71.** What is "Time Management"?
- (A) A method to create more hours in the day.
 - (B) A set of principles and skills to get more value out of time.
 - (C) The act of avoiding all work-related tasks.
 - (D) A system that only applies to personal life, not work.

Ans :

(B) A set of principles and skills to get more value out of time.

Time management is defined as a set of principles, practices, skills, tools, and systems that work together to help a person get more value out of their time, with the ultimate goal of improving their quality of life.

- 72.** What is a key outcome of effective time management in an organization?
- (A) Increased stress levels for all employees.
 - (B) A decrease in overall efficiency and productivity.
 - (C) Complete elimination of the need for managers.
 - (D) An increase in efficiency and productivity.

Ans :

(D) An increase in efficiency and productivity. Effective time management leads to the development of processes and tools that increase both individual and organizational efficiency and productivity. It also results in less stress and a more fulfilled workforce.

- 73.** What is stress, as defined in the chapter?
- (A) A state of complete relaxation and calmness.
 - (B) A situation that only affects a person physically.
 - (C) A situation that causes pressure or strain.
 - (D) A positive feeling that everyone seeks.

Ans :

(C) A situation that causes pressure or strain. Stress is defined as a situation that causes pressure or strain. It is our physical, mental, and emotional response to the various demands, changes, and events we encounter in our lives.

its sustainable features. This action primarily aligns with which PR function?

- (A) Publicity
- (B) Crisis management
- (C) Internal relations
- (D) Financial reporting

Ans :

- (A) Publicity

Issuing a press release to announce a new product and highlight its positive features is a classic example of publicity. The goal is to generate positive media coverage and public awareness.

- 123.** Which PR principle suggests that a company should anticipate difficulties and generate goodwill?

- (A) Tell the truth.
- (B) Prove it with action.
- (C) Listen to the customer.
- (D) Manage for tomorrow.

Ans :

- (D) Manage for tomorrow.

The principle “Manage for tomorrow” advises companies to be proactive by anticipating public reactions, eliminating practices that could cause problems, and actively working to generate goodwill for the future.

- 124.** The flow of information between managers at the same level but in different departments is called:

- (A) Upward communication
- (B) Downward communication
- (C) Horizontal communication
- (D) External communication

Ans :

- (C) Horizontal communication

Horizontal (or lateral) communication occurs between individuals or groups at the same level in the organizational hierarchy. Communication between managers of different departments is a prime example.

- 125.** In the 7 Cs, “Correctness” refers to ensuring the message is free from grammatical errors and what else?

- (A) Emotional appeals
- (B) Factual accuracy
- (C) Personal opinions
- (D) Complex vocabulary

Ans :

- (B) Factual accuracy

Correctness encompasses more than just grammar. It means the message must be accurate in all its details, including facts, figures, and information presented, to be credible and effective.

- 126.** Which pair correctly links the type of communication with its audience?

- (A) Internal Communication - General Public
- (B) External Communication - Employees
- (C) External Communication - Competitors
- (D) Internal Communication - Board of Directors

Ans :

- (D) Internal Communication - Board of Directors

The Board of Directors is part of the internal structure of the organization, so communication with them is internal. The general public and competitors are external audiences. While employees are internal, pairing them with “External Communication” is incorrect.

- 127.** Assertion (A): Public Relations has the beauty of art and the system of science.

Reason (R): PR techniques and strategies are identical for every organization and situation.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
- (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (C) (A) is true, but (R) is false.
- (D) (A) is false, but (R) is true.

Ans :

- (C) (A) is true, but (R) is false.

Assertion (A) is true; PR is described as a blend of art and science. However, Reason (R) is false. The chapter explicitly states that PR techniques, strategies, and practices vary from organization to organization.

- 128.** What is a vital tool for binding an organisation and promoting transparency?

- (A) Internal communication
- (B) Strict hierarchical structures
- (C) Limited access to information
- (D) External consultants

Ans :

- (A) Internal communication

The chapter describes internal communication as a “vital tool for binding an organisation, enhancing employee morale, promoting transparency and reducing slow destruction,” highlighting its critical role in organizational health.

(A) An official statement issued to members of the news media.

A press release is a primary tool of public relations. It is an official, written communication directed at members of the news media for the purpose of announcing something newsworthy.

- 141.** A company facing negative rumors online decides to post a factual clarification on its social media channels. This is an example of using corporate communication for:

(A) Financial investment
(B) Reputation management
(C) Employee recruitment
(D) Product development

Ans :

(B) Reputation management

By actively responding to negative rumors with factual information, the company is using communication channels to control the narrative, correct misinformation, and protect its public image, which is the essence of reputation management.

- 142.** Which of the following is an example of a written medium for external communication?

(A) A phone call to a customer.
(B) A face-to-face meeting with an investor.
(C) An annual report shared with shareholders.
(D) A speech given at a press conference.

Ans :

(C) An annual report shared with shareholders.

An annual report is a formal, written document intended for an external audience (shareholders, investors, public). The other options are examples of verbal or oral communication.

- 143.** The skill of being a good listener, empathetic, and creative in developing awareness programs is crucial for a career in:

(A) Financial Accounting
(B) Software Engineering
(C) Corporate Law
(D) Consumer Studies

Ans :

(D) Consumer Studies

The chapter on Consumer Studies (lehe205) mentions these soft skills are necessary for success in that field. Note: This question links to a concept from another chapter in the unit, testing broader understanding.

- 144.** Which of the following statements about communication skills is incorrect?

(A) Listening is an active process involving hearing, understanding, and response.
(B) Negotiation is a process that must always result in one side winning.
(C) Interpersonal skills can help reduce conflicts and increase productivity.
(D) Presentation skills are used for communicating ideas to a group.

Ans :

(B) Negotiation is a process that must always result in one side winning.

This is incorrect. Effective negotiation aims for a win-win outcome where both parties find the agreement acceptable and beneficial, rather than a zero-sum game where one side must win at the other's expense.

- 145.** The direction of communication from a subordinate to a manager is known as:

(A) Upward communication
(B) Downward communication
(C) Diagonal communication
(D) Horizontal communication

Ans :

(A) Upward communication

Upward communication flows from lower levels of the organizational hierarchy to higher levels, such as when an employee provides feedback, reports, or ideas to their supervisor or manager.

- 146.** The principle "Listen to the customer" is a key part of the philosophy of which PR practitioner?

(A) Edward Bernays
(B) Ivy Lee
(C) Arthur W. Page
(D) Harold Burson

Ans :

(C) Arthur W. Page

The chapter explicitly attributes the seven principles of public relations, including "Listen to the customer," to Arthur W. Page, a pioneering figure in corporate public relations.

- 147.** The primary difference between internal and external communication lies in the:

(A) Medium used
(B) Message content
(C) Level of formality
(D) Target audience

Ans :

(C) Improving communication with employees. The cited studies strongly link communication with job satisfaction (97% of CEOs agree) and productivity (88% of engineers agree lack of it reduces productivity). Therefore, improving communication is the most direct and supported action.

136. Evaluate the following statements regarding PR principles:

1. Public perception is determined 10% by what a company does and 90% by what it says.
2. Corporate relations is a management function, and the PR professional is a policymaker.
3. A company's true character is expressed primarily by its official advertisements.
4. It is crucial to anticipate public reaction and eliminate practices that create difficulties.

Which combination of statements is correct?

- (A) 1 and 3
(B) 2 and 4
(C) 1 and 2
(D) 3 and 4

Ans :

- (B) 2 and 4

Statement 2 ("Conduct PR as if...") and Statement 4 ("Manage for tomorrow") are correct principles from Arthur Page. Statement 1 has the percentages reversed. Statement 3 is incorrect; character is expressed by its people, not ads.

137. Match the communication skill in Column I with its primary benefit in Column II.

	Column I		Column II
1.	Time Management	a.	Creates a good impression and puts others at ease.
2.	Stress Management	b.	Leads to increased efficiency and less stress.
3.	Telephone Etiquette	c.	Helps in building trust and harmony in relationships.
4.	Rapport Establishment	d.	Leads to a balanced life and resilience under pressure.

- (A) 1-b, 2-d, 3-a, 4-c
(B) 1-c, 2-a, 3-d, 4-b
(C) 1-d, 2-c, 3-b, 4-a

- (D) 1-a, 2-b, 3-c, 4-d

Ans :

- (A) 1-b, 2-d, 3-a, 4-c

Time management increases efficiency and reduces stress (b). Stress management leads to a balanced life (d). Telephone etiquette creates a good impression (a). Rapport establishment builds trust and harmony (c).

138. Assertion (A): In today's global society, external communication helps in marketing.

Reason (R): External communication is only directed towards government departments and agencies.

- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(C) (A) is false, but (R) is true.
(D) (A) is true, but (R) is false.

Ans :

- (D) (A) is true, but (R) is false.

Assertion (A) is true; communicating with external audiences like customers and the public is essential for marketing. Reason (R) is false; external communication is also directed towards customers, media, investors, and the general public, not just the government.

139. The "bottom line" mentioned in the A. Foster Higgins study refers to a company's:

- (A) Final policy decision
(B) Net profit or loss
(C) Lowest-ranking employee
(D) Physical foundation

Ans :

- (B) Net profit or loss

In a business context, the "bottom line" is a colloquial term for a company's net income or profit. The study found that 79% of CEOs believe communication benefits the company's profitability.

140. What is a press release?

- (A) An official statement issued to members of the news media.
(B) A private memo sent between executives.
(C) A transcript of all internal company meetings.
(D) A legal document filed with the government.

Ans :

- (B) Concrete
- (C) Courteous
- (D) Incomplete

Ans :

- (B) Concrete

A concrete message is one that is specific and not vague. By providing all the necessary details and meanings in a short form, Priya is making her message concrete and easy to understand and act upon.

- 174.** The “7 Cs of Communication” are guidelines for which part of the communication process?
- (A) For composing and transmitting a message effectively.
 - (B) Only for receiving and interpreting a message.
 - (C) Only for storing the message after it has been sent.
 - (D) Only for the technology used to send the message.

Ans :

- (A) For composing and transmitting a message effectively.

The 7 Cs of communication—conciseness, concreteness, clarity, completeness, courtesy, correctness, and consideration—are a set of principles that should be kept in mind while composing a message to ensure it is effective.

- 175.** By using a “we” attitude instead of an “I” attitude, Priya is practicing which of the 7 Cs?
- (A) Clarity
 - (B) Correctness
 - (C) Conciseness
 - (D) Consideration

Ans :

- (D) Consideration

The principle of consideration means that the message should emphasize a “you” or “we” attitude rather than an “I” or “me” attitude. This shows respect for the reader and helps in building a positive rapport.

Direction : Read the following case study and answer the following questions.

A large pharmaceutical company is facing a public backlash after a media report claimed that one of its new drugs has severe side effects that were not disclosed during its launch. This crisis threatens to damage the company’s reputation, which has been built over decades. The company’s

corporate communication department immediately takes charge. Their main goal is to manage the public perception and rebuild trust. They follow the “Tell the truth” principle by acknowledging the issue publicly rather than denying it. They then “Prove it with action” by immediately halting the drug’s distribution and launching a thorough investigation. They actively “Listen to the customer” by setting up a helpline for patients and doctors. They anticipate future problems and “Manage for tomorrow” by promising to revise their drug trial and disclosure protocols. The company’s CEO, guided by the communication team, addresses the public calmly and patiently, expressing the company’s commitment to patient safety. This strategic handling of the crisis is a classic application of Arthur W. Page’s principles of public relations.

- 176.** The PR strategy of acknowledging the issue rather than denying it is an application of which principle?
- (A) Manage for tomorrow.
 - (B) Listen to the customer.
 - (C) Tell the truth.
 - (D) Remain calm, patient, and good-humored.

Ans :

- (C) Tell the truth.

One of Arthur W. Page’s seven principles of public relations is to “Tell the truth.” This involves letting the public know what is happening and providing an accurate picture of the company’s character, ideals, and practices.

- 177.** Halting the drug’s distribution and launching an investigation is an example of which principle?
- (A) Tell the truth.
 - (B) Prove it with action.
 - (C) Listen to the customer.
 - (D) Manage for tomorrow.

Ans :

- (B) Prove it with action.

This principle states that public perception is determined 90 percent by what an organization does and 10 percent by what it says. By taking decisive action, the company is demonstrating its commitment to resolving the issue.

- 178.** Setting up a helpline for patients and doctors demonstrates the company’s effort to:
- (A) Tell the truth.
 - (B) Prove it with action.

Ans :

(D) Target audience

The fundamental distinction between internal and external communication is the audience. Internal communication is directed at people within the organization, while external communication is directed at those outside the organization.

- 148.** A PR agency is hired to organize a party and a press conference before a major movie premiere. The primary objective is to:
- (A) Create curiosity and inform about the event.
 - (B) Handle a crisis related to the movie's production.
 - (C) Motivate the employees of the movie studio.
 - (D) Directly sell tickets to the general public.

Ans :

(A) To create curiosity and inform about the event.

Organizing pre-event activities like parties and press conferences is a common PR tactic used to build anticipation, generate media coverage, and inform the public and press about an upcoming event, like a movie premiere.

- 149.** According to the text, a PR person must have good relations with all employees in order to:
- (A) Supervise their daily tasks.
 - (B) Get all the information and stay informed.
 - (C) Conduct their performance appraisals.
 - (D) Approve their vacation requests.

Ans :

(B) Get all the information and stay informed.

The text states that internal PR is important so the "PR man gets all the information, keeps himself informed of all happenings in the organisation." This information is vital for effective external communication.

- 150.** What is the role of Information and Communication Technologies (ICT) in modern corporate communication?
- (A) They have made communication slower and less reliable.
 - (B) They are an umbrella term for all non-digital communication.
 - (C) They have revolutionized communication by providing new tools.
 - (D) They are used only for internal communication.

Ans :

(C) They have revolutionized communication by providing new tools.

ICT has had a revolutionary impact, providing a vast array of digital tools and platforms (email, social media, video conferencing etc.) that have transformed how organizations communicate both internally and externally.

- 151.** Assertion (A): A company's true character is expressed by the words and deeds of its employees. Reason (R): A company's advertising campaigns are the sole determinant of its public perception.
- (A) Both (A) and (R) are true, and (R) is the correct explanation of (A).
 - (B) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
 - (C) (A) is false, but (R) is true.
 - (D) (A) is true, but (R) is false.

Ans :

(D) (A) is true, but (R) is false.

Assertion (A) is a key principle from Arthur Page and is true. Reason (R) is false; while advertising plays a role, public perception is shaped more powerfully (90%) by a company's actions and its people, not solely by ads.

- 152.** Match the communication barrier in Column I with the 'C' of communication that overcomes it in Column II.

	Column I		Column II
1.	Vague or general message	a.	Correctness
2.	Message with grammatical errors	b.	Conciseness
3.	Message that is too long	c.	Completeness
4.	Message lacking key details	d.	Concreteness

- (A) 1-d, 2-a, 3-b, 4-c
- (B) 1-b, 2-c, 3-d, 4-a
- (C) 1-c, 2-d, 3-a, 4-b
- (D) 1-a, 2-b, 3-c, 4-d

Ans :

(A) 1-d, 2-a, 3-b, 4-c

A vague message is overcome by Concreteness. Grammatical errors are fixed by ensuring Correctness. A long message is improved by Conciseness. A message lacking details is fixed by ensuring Completeness.

- 153.** Which of the following is an accurate description of the relationship between PR and advertising?
- (A) They are completely unrelated fields.

- 129.** The ability to remain calm and good-humored, especially during a crisis, is a principle that emphasizes the importance of:
- (A) Aggressive communication
 - (B) Emotional detachment
 - (C) Spontaneous and unplanned responses
 - (D) Rational and consistent communication

Ans :

(D) Rational and consistent communication
This principle advises that “cool heads communicate best.” It underscores the need for a consistent, reasoned, and calm approach to communication, which is most effective for building trust and managing difficult situations.

- 130.** A planned, deliberate, and sustained effort to establish mutual understanding between an organization and its public is a definition of:
- (A) Public Relations
 - (B) Marketing
 - (C) Advertising
 - (D) Sales

Ans :

(A) Public Relations
This is one of the formal definitions of Public Relations provided in the chapter. It highlights the strategic, long-term, and relationship-focused nature of the PR function.

- 131.** Which statement best describes the scope of corporate communication?
- (A) It is limited to communication between employer and employees.
 - (B) It covers all communication between the organization and all its stakeholders.
 - (C) It is only concerned with communicating with the media and press.
 - (D) It focuses exclusively on innovation in technology.

Ans :

(B) It covers all communication between the organization and all its stakeholders.
The scope of corporate communication is broad, encompassing all communication between the organization and its various internal and external stakeholders, including employees, media, government, customers, and the public.

- 132.** Which of the following is NOT a career avenue mentioned for someone with skills in corporate communication?
- (A) Working in financial investment banking.

- (B) Working as a PR officer.
- (C) Managing internal communications for a company.
- (D) Handling press relations for an NGO.

Ans :

(A) Working in financial investment banking.
While PR deals with investor relations, a career in investment banking itself is a separate field requiring specialized financial qualifications. The other options are direct applications of corporate communication and PR skills.

- 133.** Why is it important for PR professionals to have good relations with various media like radio and television?
- (A) To control the content of all news programs.
 - (B) To utilize them as channels for publicity and information.
 - (C) To get free advertising slots for all products.
 - (D) To prevent them from reporting on the company.

Ans :

(B) To utilize them as channels for publicity and information.
Media like radio and television are powerful channels for reaching a wide audience. PR professionals build relationships with them to disseminate information, publicize events, and manage the organization’s image effectively.

- 134.** The use of films, exhibitions, and hoardings falls under which area of PR activity?
- (A) Press Relations
 - (B) Publications
 - (C) Investor Relations
 - (D) Other Media coordination

Ans :

(D) Other Media coordination
The chapter categorizes the use of audio-visual media like films, exhibitions, and outdoor media like hoardings under the function of coordinating with “other media” beyond traditional print press and publications.

- 135.** A CEO wants to improve job satisfaction and productivity. Based on the studies mentioned, what should be a top priority?
- (A) Reducing the number of employees.
 - (B) Increasing the number of meetings.
 - (C) Improving communication with employees.
 - (D) Implementing stricter work-from-home policies.

all.

Ans :

(B) Telling the truth and remaining calm and good-humored.

By providing accurate information, the manager is “telling the truth.” By handling the inquiry calmly and with empathy during a crisis (product recall), the manager is demonstrating the principle of “remaining calm, patient and good-humored.”

- 160.** Ultimately, corporate communication and public relations work together to achieve what for an organization?

(A) To manage and sustain a positive reputation.
(B) To increase short-term sales figures.
(C) To handle all legal compliance issues.
(D) To develop and design new products.

Ans :

(A) To manage and sustain a positive reputation. The overarching goal that unites all the functions of corporate communication and PR is the management and sustenance of a positive reputation. This reputation is built on trust, transparency, and strong relationships with all stakeholders.

CASE BASED QUESTION

Direction : Read the following case study and answer the following questions.

A technology company, “Innovate Corp,” is launching a revolutionary new smartphone. To generate excitement and media coverage, their Public Relations (PR) department organizes a major launch event. Weeks before the event, the PR team sends out press releases to journalists, providing them with key details about the phone’s features. They maintain cordial relations with the press, ensuring top tech journalists and bloggers are invited to the launch. During the press conference, the company’s CEO gives a speech, prepared in part by the PR team, that articulates a positive image of the company and its innovative product. After the launch, the PR team handles all inquiries from the press and the public. They also launch an advertising campaign across different media channels, the budget and strategy for which were decided by the PR head. This entire planned

and sustained effort to create a positive public image and disseminate information about the new product is a classic example of the functions of a PR department.

- 161.** The PR department’s activities, such as sending press releases and organizing a press conference, are part of which major PR function?

(A) Publicity and maintaining relations with the media.
(B) Maintaining internal employee relations only.
(C) Preparing the company’s annual financial reports.
(D) Managing the production line in the factory.

Ans :

(A) Publicity and maintaining relations with the media.

A vital function of a PR department is publicity. This includes issuing announcements of company activities and products to the media, handling press inquiries, and planning promotional campaigns to project a positive image.

- 162.** The PR team’s effort to build a positive image for the company and its product is a “deliberate, planned, and sustained effort” to achieve what?

(A) To increase the company’s production costs.
(B) To keep all information about the new product a secret from the public.
(C) To reduce the number of employees in the company.
(D) To establish and maintain mutual understanding between the organization and the public.

Ans :

(D) To establish and maintain mutual understanding between the organization and the public.

Public Relations is defined as a deliberate, planned, and sustained effort. The goal of this effort is to establish and maintain a mutual understanding and a positive relationship between an organization and its various publics.

- 163.** The decision on which media channels to use for advertising the new phone is a function that falls under the purview of the:

(A) Human Resources department.
(B) Finance department.
(C) Public Relations department.
(D) Legal department.

Ans :

(C) Public Relations department.

Advertising is a key area of PR activity. A product does not sell on its own merit; it needs to be advertised. It is often the PR person who decides the budget and the media to be used.

- 164.** The CEO's speech, which was prepared by the PR team to project a positive image, is an example of which PR function?

- (A) Preparation of corporate statements and speeches.
- (B) Managing shareholder meetings.
- (C) Complying with environmental protection standards.
- (D) Publishing in-house magazines for employees.

Ans :

- (A) Preparation of corporate statements and speeches.

One of the common functions of PR personnel is the preparation of corporate statements. This can include writing speeches for executives and press releases that articulate and project a positive image of the company or its products.

- 165.** The relationship between journalists and PR professionals can be described as interdependent because:

- (A) They are always in competition with each other.
- (B) Journalists need news to remain in business, and PR professionals need publicity for their organizations.
- (C) Journalists work for PR agencies.
- (D) PR professionals are responsible for writing all news articles.

Ans :

- (B) Journalists need news to remain in business, and PR professionals need publicity for their organizations.

There is a give-and-take relationship between the press and PR professionals. Journalists need a constant supply of news to do their job, and PR professionals need media publicity to promote their organizations, creating a mutual dependency.

Direction : Read the following case study and answer the following questions.

A large manufacturing company, "Stellar Industries," was facing low employee morale and reduced productivity. An internal survey revealed that employees felt disconnected from the company's goals and that communication from

top management was poor. To address this, the corporate communication team launched a new internal communication strategy. They started a monthly in-house magazine, "Stellar Connect," which highlighted employee achievements and shared updates from different departments. They also initiated quarterly "town hall" meetings where the CEO would directly address the employees and answer their questions. Additionally, they revamped the company's intranet, making important information like policies and announcements easily accessible. This strategy was designed to ensure that information flowed effectively in all directions—downward from management, upward from employees, and horizontally between departments. The goal was to build a strong corporate culture and make every employee feel like a valued part of the organization.

- 166.** The communication that takes place between and among the employer and employees of an organization is known as:

- (A) External Communication
- (B) Public Relations
- (C) Internal Communication
- (D) Mass Communication

Ans :

- (C) Internal Communication

Internal communication is the communication that takes place between and among the employer and employees within an organization. It is a vital tool for binding an organization and enhancing employee morale and productivity.

- 167.** The CEO addressing the employees in a town hall meeting is an example of what kind of information flow?

- (A) Downward communication.
- (B) Upward communication.
- (C) Horizontal communication.
- (D) External communication.

Ans :

- (A) Downward communication.

In internal communication, information flows in different directions. When broad policies, objectives, and messages flow from the top management to the lower-level employees, it is known as downward communication.

- 168.** What is the primary purpose of an effective internal communication strategy?

- (A) To communicate only with customers and the

government.

- (B) To reduce the number of employees in the company.
- (C) To increase conflicts and misunderstandings among different departments.
- (D) To enhance employee morale, promote transparency, and bind the organization together.

Ans :

(D) To enhance employee morale, promote transparency, and bind the organization together. Effective internal communication is a vital tool for a healthy organization. It helps to enhance employee morale, promote transparency, reduce slow destruction or decay within the company, and foster a strong corporate culture.

- 169.** The in-house magazine, “Stellar Connect,” is an example of which type of media used for internal communication?
- (A) Oral or verbal media.
 - (B) Written media.
 - (C) Audiovisual media.
 - (D) External media.

Ans :

(B) Written media.

Both written and oral media can be used for internal communication. Written media consists of various tools, including instructions, letters, memos, and in-house magazines or journals, which are used to disseminate information.

- 170.** The lack of communication and cooperation among different components of a business can lead to what negative outcome?
- (A) Increased productivity.
 - (B) Improved employee job satisfaction.
 - (C) Reduced productivity.
 - (D) Stronger corporate culture.

Ans :

(C) Reduced productivity.

Ineffective communication is often the root cause of many internal problems. Studies have shown that a lack of communication and cooperation among different parts of a business can lead to significantly reduced productivity.

Direction : Read the following case study and answer the following questions.

A manager, Priya, needs to send an email to her team about an urgent change in a project's

deadline. She knows that how she writes the email is crucial to ensure everyone understands the message and feels motivated rather than stressed. She decides to apply the “7 Cs of Communication.” First, she keeps the message concise and to the point. She makes it concrete by providing the exact new deadline and the key tasks that need to be prioritized. She ensures clarity by using simple language and avoiding jargon. To ensure completeness, she includes a link to the updated project plan and asks the team to confirm they have read the message. Her tone is courteous, acknowledging the extra effort this will require. She checks the email for correctness, ensuring there are no grammatical errors. Finally, she shows consideration by framing the message with a “we are in this together” attitude rather than a demanding “I need this done” tone.

- 171.** When Priya ensures that the message has a polite tone and gives some compliments to the team, she is applying which of the 7 Cs?
- (A) Conciseness
 - (B) Correctness
 - (C) Courtesy
 - (D) Concreteness

Ans :

(C) Courtesy

Courtesy is an important feature of effective communication. The sender should use a courteous tone and give compliments or show appreciation for the reader, which helps in maintaining positive relationships.

- 172.** The principle that a message should be checked for grammatical errors and factual accuracy is known as:
- (A) Clarity
 - (B) Completeness
 - (C) Consideration
 - (D) Correctness

Ans :

(D) Correctness

The principle of correctness states that the message being conveyed must be checked for factual accuracy and should be free from any grammatical errors. This ensures the message is professional and credible.

- 173.** Providing the exact new deadline and key tasks makes Priya's message:
- (A) Concise

- (B) Advertising is a tool that can be used within a PR strategy.
- (C) PR is a sub-field of advertising.
- (D) PR focuses on paid media, while advertising focuses on earned media.

Ans :

(B) Advertising is a tool that can be used within a PR strategy.

The chapter discusses advertising as one of the major areas of PR activity. A PR person may decide the budget and media for advertising, indicating that advertising is a tactic used to achieve broader PR objectives.

- 154.** “Analogue communication” primarily refers to:
- (A) The specific words used in a message.
 - (B) Communication via digital devices like computers.
 - (C) Body language and tone of voice.
 - (D) Written communication in a letter or email.

Ans :

(C) Body language and tone of voice.

The text defines analogue communication as the non-verbal aspects of a message, such as body language and the way one speaks (tone, pitch, pace), which convey a significant portion (93%) of the meaning.

- 155.** The primary goal of creating an in-house magazine is to facilitate:
- (A) External communication with competitors.
 - (B) Communication with government regulators.
 - (C) Communication with international media.
 - (D) Internal communication among employees.

Ans :

(D) Internal communication among employees.

An in-house magazine is a classic tool for internal communication. It is used to share company news, employee achievements, and policy updates, fostering a sense of community and keeping employees informed.

- 156.** Analyse the following skills required for a PR professional:
1. Listening skills are entirely taught in formal training programs.
 2. Negotiation involves trading concessions to reach a mutual agreement.
 3. Rapport is the establishment of trust and harmony in a relationship.
 4. Time management is a skill that cannot be learned or improved.

Which combination of statements is correct?

- (A) 1 and 4
- (B) 2 and 3
- (C) 1 and 2
- (D) 3 and 4

Ans :

(B) 2 and 3

Statements 2 and 3 provide correct definitions for negotiation and rapport. Statement 1 is incorrect, as listening can be self-taught. Statement 4 is incorrect, as time management is a skill that can be developed and improved.

- 157.** Which media consists of house journals, posters, bulletins, and handbooks?
- (A) Written media
 - (B) Oral media
 - (C) Visual media
 - (D) Audiovisual media

Ans :

(A) Written media

The chapter lists these items—house journals, posters, bulletins, and handbooks—as examples of written media that can be used for internal communication within an organization.

- 158.** A deliberate, planned and sustained effort to establish and maintain mutual understanding between an organisation and the public, is a definition of what?
- (A) Corporate law
 - (B) Human resources
 - (C) Public relations
 - (D) Market research

Ans :

(C) Public relations

This is a classic and comprehensive definition of Public Relations cited in the text, emphasizing its strategic, long-term, and relationship-building nature.

- 159.** A manager who calmly handles a press inquiry during a product recall, providing accurate information and showing empathy, is demonstrating which PR principles?
- (A) Managing for tomorrow and proving it with action.
 - (B) Telling the truth and remaining calm and good-humored.
 - (C) Listening to the customer and managing for tomorrow.
 - (D) Telling the truth and prioritizing profit above

- (C) Manage for tomorrow.
- (D) Listen to the customer.

Ans :

- (D) Listen to the customer.

This principle emphasizes the importance of understanding what the public wants and needs. By creating a channel for feedback and concerns, the company is actively listening to its customers and other stakeholders to serve them better.

- 179.** These principles highlight that corporate relations is primarily a:
- (A) Management function that should be part of all strategic decisions.
 - (B) Low-level operational function.
 - (C) Function that is only important during a crisis.
 - (D) Function that is separate from the company's main operations.

Ans :

- (A) A management function that should be part of all strategic decisions.

A key principle is that corporate relations is a management function. No corporate strategy should be implemented without considering its impact on the public, making the PR professional a key policymaker.

- 180.** The CEO's calm and reasoned communication during the crisis is an application of which principle?
- (A) Tell the truth.
 - (B) Listen to the customer.
 - (C) Prove it with action.
 - (D) Remain calm, patient, and good-humored.

Ans :

- (D) Remain calm, patient, and good-humored.

This principle advises that when a crisis arises, it is important to remember that cool heads communicate best. Laying the groundwork for PR miracles requires consistent, patient, and reasoned attention to information and contacts.

Direction : Read the following case study and answer the following questions.

Two managers, Rahul and Sameer, are trying to resolve a disagreement over resource allocation for a project. Rahul wants a larger budget for his team, while Sameer believes the resources should be distributed equally between their teams. They enter a negotiation. Rahul comes prepared with

data showing how a larger budget for his team will lead to a higher overall return for the project. Sameer presents his case for equitable distribution to maintain team morale. Instead of arguing, they practice good negotiation skills. They listen to each other's perspectives and identify their core interests. Rahul agrees to a slightly smaller budget if Sameer's team takes on one of his less critical tasks. Sameer agrees, as this will give his team more experience. By trading concessions and focusing on a mutually beneficial outcome, they reach a deal that both are happy with. This process demonstrates how effective negotiation can resolve conflicts and lead to a positive outcome for all parties involved.

- 181.** The process through which Rahul and Sameer try to convince each other and resolve their disagreement is known as:

- (A) A presentation
- (B) A negotiation
- (C) A directive
- (D) A public speech

Ans :

- (B) A negotiation

Negotiation is a process in which two parties, who have unacceptable points regarding an issue, try to convince each other to reach a mutually acceptable agreement. It is a key skill for resolving conflicts.

- 182.** A key aspect of a successful negotiation, as demonstrated by the managers, is:

- (A) One party forcing their demands on the other.
- (B) Both parties refusing to listen to each other's point of view.
- (C) Both parties being willing to trade concessions to reach a happy outcome.
- (D) Avoiding the disagreement altogether.

Ans :

- (C) Both parties being willing to trade concessions to reach a happy outcome.

Good negotiation is not about winning at all costs. It often involves both sides trading concessions against each other to ensure that both parties can come out of the deal feeling happy with the outcome.

- 183.** What is a crucial first step for a good negotiator before entering the negotiation process?

- (A) To be fully prepared with data and consider all possible variables.

- (B) To have no clear objective or goal in mind.
- (C) To decide to not compromise on any single point.
- (D) To focus only on their own needs without considering the other party's interests.

Ans :

(A) To be fully prepared with data and consider all possible variables.

A good negotiator should be fully prepared before meeting the other party. This includes considering all the possible variables and estimating what each will cost, which allows for more effective trading of concessions.

- 184.** The ability to negotiate effectively is an example of which type of skill required for a professional?
- (A) Technical Skill
 - (B) Writing Skill
 - (C) Listening Skill
 - (D) Interpersonal Skill

Ans :

(D) Interpersonal Skill

Interpersonal skills refer to a person's ability to operate within business organizations through social communication and interactions. Negotiation is a critical interpersonal skill used to resolve conflicts and interact with other people effectively.

- 185.** The positive outcome of this negotiation will likely lead to what in the organization?
- (A) Increased conflict between Rahul and Sameer.
 - (B) Reduced productivity in both teams.
 - (C) Increased productivity since conflicts are reduced and a clear plan is in place.
 - (D) The project being canceled by senior management.

Ans :

(C) Increased productivity since conflicts are reduced and a clear plan is in place.

Having positive interpersonal skills, including negotiation, increases productivity in an organization. This is because conflicts are reduced, leading to a more collaborative and efficient work environment.

Direction : Read the following case study and answer the following questions.

An NGO that works for the welfare of street children wants to create awareness and raise funds for a new shelter home. Their public relations team

decides on a multi-pronged media strategy. First, for publications, they create an emotional and informative brochure with stories of the children they have helped, which they distribute at public places and corporate offices. Second, they produce a short, powerful documentary film showcasing the daily challenges faced by these children. This film is screened at various community events and shared online. Third, they organize an exhibition of photographs taken by the children themselves, which is covered by the local press. Finally, they use social media to run a campaign with the hashtag #ASafeHome, sharing updates and appeals for donations. This coordinated use of different media helps the NGO to disseminate information effectively, build a positive public image, and successfully achieve its fundraising goals.

- 186.** The NGO's coordinated use of brochures, films, and exhibitions is an example of PR activity in which area?
- (A) Only Press Relations
 - (B) Only Advertising
 - (C) Only Internal PR
 - (D) Publications and Other Media Coordination

Ans :

(D) Publications and Other Media Coordination

A PR department is often responsible for creating publications like brochures and folders. It also coordinates the use of other media, such as films and exhibitions, to disseminate information and build a positive image.

- 187.** What is a key point to remember while preparing publications like brochures for a PR campaign?
- (A) They should be as long and detailed as possible.
 - (B) They should be simple, clear, attractive, and project a true image of the organization.
 - (C) They should focus only on statistics and data, without any human element.
 - (D) They should be designed to be very expensive to produce.

Ans :

(B) They should be simple, clear, attractive, and project a true image of the organization.

When preparing publications, PR professionals should remember several points. The material should be simple, clear, and attractive, and it must convey a true and positive image of the organization to the target audience.

- 188.** The use of a short documentary film and a photo exhibition falls under which area of PR activity?
- (A) Press Relations
 - (B) Advertising
 - (C) Publications
 - (D) Other Media Coordination

Ans :

- (D) Other Media Coordination

The range of operations of a PR department includes the use of other audio-visual media. This can include producing films and organizing exhibitions to communicate with the public and promote the organization's cause.

- 189.** The primary goal of the NGO's multi-media PR campaign is to:
- (A) Disseminate information, create a positive image, and persuade people to support their cause.
 - (B) Make a financial profit for the organization's leaders.
 - (C) Compete with other NGOs for media attention.
 - (D) Provide entertainment to the public without any specific call to action.

Ans :

- (A) Disseminate information, create a positive image, and persuade people to support their cause.

The purpose of using media in PR is to disseminate information and persuade or influence people. The NGO is using various media to inform the public about their work and persuade them to donate to the new shelter.

- 190.** The coverage of the photo exhibition by the local press is a successful outcome of which PR activity?
- (A) Advertising
 - (B) Press Relations
 - (C) Publications
 - (D) Internal PR

Ans :

- (B) Press Relations

Maintaining cordial relations with the press is a major area of PR activity. By ensuring the press is informed and engaged, a PR team can secure positive media coverage for their events, as seen with the exhibition.

Direction : Read the following case study and answer the following questions.

A company's corporate communication department is preparing for the Annual General Meeting (AGM) with its stockholders. A key task is the preparation of the annual report. This document needs to be more than just a collection of financial data; it must communicate the company's performance, vision, and future plans in a clear and positive manner. The communication team works closely with the finance department to present the financial information accurately. They also write sections that highlight the company's achievements over the year, its commitment to corporate social responsibility, and its strategy for growth. The goal is to maintain a strong relationship with the shareholders and other investors, keeping them informed and confident in the company's management. This communication is a vital part of external communication, as it helps in maintaining and sustaining a positive corporate image among a very important group of stakeholders.

- 191.** The communication between a company and its shareholders and investors is an example of:
- (A) Internal Communication
 - (B) External Communication
 - (C) Informal Communication
 - (D) Diagonal Communication

Ans :

- (B) External Communication

External communication takes place between the members of an organization and the outside world. This includes communication with crucial stakeholders like shareholders, investors, customers, and the government to promote goodwill.

- 192.** A key function of the Public Relations department with regard to shareholders is to:
- (A) Prepare annual reports and plan stockholder meetings.
 - (B) Manage the company's daily production schedule.
 - (C) Provide technical support for the company's products.
 - (D) Recruit new employees for the finance department.

Ans :

- (A) Prepare annual reports and plan stockholder meetings.

Maintaining good relations with shareholders and other investors is an important PR function. This

can include preparing publications like annual or quarterly reports and planning meetings for the stockholders.

- 193.** Why is it crucial for a company to maintain a good relationship with its financial analysts, bankers, and investors?
- (A) Because they are the company's main customers.
 - (B) Because they have no influence on the company's financial health.
 - (C) Because they are responsible for the company's daily operations.
 - (D) Because their confidence is vital for the company's financial stability and access to capital.

Ans :

(D) Because their confidence is vital for the company's financial stability and access to capital. A PR person must have a good liaison with financial analysts, bankers, and major investors. Maintaining their trust and confidence is crucial for the company's financial health, reputation, and ability to raise funds.

- 194.** The communication with stockholders and other outside bodies is primarily handled by which department?
- (A) The Production Department
 - (B) The Research and Development Department
 - (C) The Corporate Communication Department
 - (D) The Internal Audit Department

Ans :

(C) The Corporate Communication Department
A key function of corporate communication is to ensure a liaison between the organization and outside bodies. This involves disseminating information to a variety of people, including employees, stockholders, media, and customers.

- 195.** The annual report, which is a formal document with text and financial data, is what type of media?
- (A) Written Media
 - (B) Oral Media
 - (C) Audiovisual Media
 - (D) Spoken Media

Ans :

(A) Written Media
External communication can use both written and verbal media. Written media consists of tools like letters, memos, posters, and formal documents

like annual reports, which are used to convey information to outside stakeholders.

Direction : Read the following case study and answer the following questions.

A manager, Ms. Sen, is in a meeting with a client. The client is explaining a problem they are facing with a recent product delivery. Instead of interrupting or thinking about her response, Ms. Sen practices active listening. First, she focuses on 'hearing' the words the client is saying. Second, as she listens, her brain works to 'understand' the meaning behind the words in the context of the situation, processing the information being communicated. Finally, after the client has finished speaking, she 'responds'. Her response shows that she has heard and understood the problem. She summarizes the issue to confirm her understanding and then offers a potential solution. This three-part process of active listening—hearing, understanding, and responding—helps her to build rapport with the client, properly diagnose the problem, and find an effective resolution, demonstrating a critical professional skill.

- 196.** The active process involving the three parts of hearing, understanding, and response is known as:
- (A) Speaking
 - (B) Listening
 - (C) Writing
 - (D) Reading

Ans :

(B) Listening

Listening is an active process, not a passive one. It is composed of three distinct parts: hearing (the physical aspect), understanding (processing the meaning), and responding (showing that you have understood).

- 197.** What is the first and most basic part of the listening process?
- (A) Responding
 - (B) Understanding
 - (C) Hearing
 - (D) Negotiating

Ans :

(C) Hearing

Hearing is the physical aspect of the listening process, where your body receives and interprets sounds. While it is critical to listening, it is only the first of the three essential parts.

- 203.** Creating a strong corporate culture, a unified corporate identity, and a consistent corporate philosophy are all key functions of:
- (A) The Corporate Communication department.
 - (B) The legal department.
 - (C) The research and development department.
 - (D) The information technology department.

Ans :

(A) The Corporate Communication department.
Corporate communication is important as it helps to create a strong corporate culture, corporate identity, and corporate philosophy. This ensures that the organization presents a consistent and positive image to all its stakeholders.

- 204.** One of the most important functions of corporate communication, especially in today's competitive environment, is:
- (A) Reputation management.
 - (B) Production management.
 - (C) Inventory management.
 - (D) Facility management.

Ans :

(A) Reputation management.
With increasing competition and media explosion, reputation management has become a priority for most organizations. This is a key function handled in a professional manner by corporate communicators to protect the company's image.

- 205.** The work of the corporate communication department is concerned with which of the following?
- (A) Only media and technology.
 - (B) Only people and organizational processes.
 - (C) Only the company's activities and products.
 - (D) People, organizational processes, activities, and media.

Ans :

(D) People, organizational processes, activities, and media.
Corporate communication is a broad function that is concerned with people (both internal and external), organizational processes, the company's activities, and the various media used to communicate with all stakeholders.

Direction : Read the following case study and answer the following questions.

A recent graduate, Rohan, is starting his first job in a fast-paced corporate environment. He

quickly realizes that managing his time effectively is crucial for his success and well-being. He often feels overwhelmed by the number of tasks and deadlines. To cope with this, he decides to learn time management skills. He starts by creating a daily to-do list, prioritizing tasks based on their urgency and importance. He learns to break down large projects into smaller, more manageable steps. He also practices avoiding procrastination and sets specific time blocks for focused work, minimizing distractions like social media. By applying these techniques, Rohan finds that he is not only able to complete his work more efficiently but also has less stress and more time for his personal life. He understands that time management is not about working more, but about working smarter, and that it is a critical skill for improving productivity and maintaining a healthy work-life balance.

- 206.** The set of principles, practices, and skills that help a person get more value out of their time with the aim of improving the quality of life is known as:

- (A) Time Management
- (B) Stress Management
- (C) Financial Management
- (D) Negotiation Skills

Ans :

(A) Time Management
Time management is defined as a set of principles, practices, skills, tools, and systems. These work together to help you get more value out of your time, with the ultimate goal of improving the quality of your life.

- 207.** What is a key benefit of effective time management for an individual?
- (A) Increased stress and anxiety.
 - (B) Reduced productivity and efficiency.
 - (C) Less stress and improved work-life balance.
 - (D) More time spent on unimportant tasks.

Ans :

(C) Less stress and improved work-life balance.
A major advantage of good time management is that it leads to less stress. By being in control of your schedule and tasks, you can reduce feelings of being overwhelmed and create a better balance between work and personal life.

- 208.** Rohan's practice of creating a prioritized to-do list is a basic tool for which time management principle?

- (A) Increasing efficiency and productivity.
- (B) Managing stress and emotions.
- (C) Improving communication skills.
- (D) Building rapport with colleagues.

Ans :

(A) Increasing efficiency and productivity.
Time management leads to the development of processes and tools that increase efficiency and productivity. A prioritized to-do list is a fundamental tool that helps a person focus on the most important tasks first.

- 209.** The physical, mental, and emotional response to the various demands and changes in our life is known as:
- (A) Time
 - (B) Skill
 - (C) Communication
 - (D) Stress

Ans :

(D) Stress
Stress is defined as our physical, mental, and emotional response to the various demands, changes, and events in our life. It is a natural response to pressure or strain.

- 210.** The ultimate goal of both time management and stress management is to:
- (A) Ensure a person works 24 hours a day without any breaks.
 - (B) Achieve a balanced life with time for work, relationships, and relaxation.
 - (C) Eliminate all challenges and difficulties from one's life.
 - (D) Focus solely on work and neglect all other aspects of life.

Ans :

(B) Achieve a balanced life with time for work, relationships, and relaxation.
The ultimate goal of managing stress and time is to achieve a balanced life. This includes having time for work, relationships, relaxation, and fun, plus the flexibility to handle pressure and meet challenges effectively.

UNIT I • WORK, LIVELIHOOD & CAREER

Chapter 1 • Core concepts, meaningful work, careers, traditional occupations and work choices

Learning objectives

- Explain meaningful work, livelihood, careers and entrepreneurship.
- Understand standard of living and quality of life.
- Know the importance of social responsibility and volunteerism.
- Explain attitudes/approaches that contribute to quality of work life and successful careers.
- Understand work issues involving traditional occupations and special groups: women, children and elderly.
- Describe characteristics of a healthy work environment.

Work & meaningful work

- Work helps people fit into the world, create relationships, use talents/skills, learn, grow and develop identity and belonging.
- Work is undertaken for purpose or necessity; the type of work is influenced by education, health, age, opportunities, globalisation, location, financial returns and family background.
- Work can provide income, family support, leisure and recreation, identity, self-esteem and contributions to organisations and society.
- Work is not only about money: family work and volunteering may be unpaid but still contribute to self, family, employers, society, nation and world.
- **Meaningful work:** useful to others/society, responsible and enjoyable; uses skills/judgement, creativity or problem-solving and ideally provides positive relationships and recognition/rewards.
- When meaningful work succeeds, it can support growth, confidence, self-worth and development of potential.

Choosing a career

- Explore your own aptitudes, talent, personal preferences, needs and aspirations.
- Explore available options and combine personal strengths with personal benefit and social contribution.
- An appropriate choice can bring success and satisfaction.
- Career choice should consider keen interest, desire, enjoyment, abilities and the possibility of sustaining enthusiasm.
- Career development is lifelong: keep learning, update knowledge, build/enhance competencies and make transitions when needed.

How can work be perceived?

- **Job & livelihood:** work mainly as income to achieve desired outcomes and support family.
- **Career:** work as progressive professional advancement in position, status, pay and responsibility; satisfaction comes from advancement and achievement.
- **Calling:** satisfaction comes from the work itself and an inner/higher sense of direction.
- **Work may also be:** duty/obligation, security of income, expression of talents and self, spiritual practice, vehicle for creation, source of joy/fulfilment, status/power/control, mental/physical workout, and a means of self-development/self-actualisation.
- Career-fit questions: Are my talents/interests suitable? Is work stimulating? Will I feel useful? Am I contributing to society? Is the workplace ethos/environment suitable?

Work • job • livelihood • career

- **Work:** activities with intended outcomes; not limited to paid employment and may include entrepreneurship, consulting, volunteerism, contract work and social work.
- **Livelihood:** means/occupation used to meet basic needs and sustain a lifestyle; includes occupation and career-path choices.
- **Job:** involvement in work mainly for its own sake/income.
- **Career:** a longer path driven by growth, development and achievement; dynamic and unique to each person.
- **Career:** a life-management concept balancing work, learning and personal roles.

Quick example & review

- **Three men and the boulder:** one sees rock-breaking as a job; one as livelihood to feed family; one as a step toward becoming a sculptor and shaping a career.
- **Review:** different ways of perceiving work; job vs career; meaning of meaningful work.
- **Holistic idea:** whatever one chooses should nourish body and mind and benefit self as well as others.

UNIT I • WORK, AGE, GENDER & QUALITY OF WORK LIFE

Traditional occupations, gender and work, women's empowerment, attitudes, life skills and healthy workplaces

Traditional occupations of India

- India has a diverse and ancient cultural heritage; agriculture has historically been a major occupation, with fishing also important because of the long coastline.
- Traditional rural crafts include wood craft, pottery, metal craft, jewellery, embroidery, weaving, dyeing/printing, shell craft, sculpture, terracotta, sholapitha, dhurries, rugs, carpets, clay/iron work and others.
- Weaving is a cottage industry; states have region-specific woven fabrics, embroidery and traditional costumes.
- Traditional knowledge and skills were often passed within families and communities; crafts later entered wider/global markets and could generate livelihoods and foreign exchange.
- Traditional foods and spice mixes also support livelihoods, from street vendors to specialty restaurants and hotels.

Women & work • rights & initiatives

- Issues noted: reduced labour-market opportunities for skilled work, stress/health effects, workplace safety and security, gender discrimination, maternity benefits and child-care support.
- Constitutional provisions described: equality, equal opportunity in state employment, prohibition of discrimination, humane working conditions and protection from exploitation; special provisions for women and children.
- **Article 16(1):** equality of opportunity in state employment/appointments.
- Acts mentioned: Factories Act 1948; Plantation Labour Act 1951; Mines Act 1952; Employees State Insurance Act; Maternity Benefit Act 1961.
- **Factories Act Section 48:** source states crèches where more than 30 women are employed, for children below six.
- Equal Remuneration Act, women's cells, National Plan of Action and Planning Commission groups/committees are described.

Preservation & challenges

- Traditional arts may lose ground to mass-produced goods, creating low incomes for artisans.
- Constraints mentioned: illiteracy, socio-economic backwardness, slow land reforms, inadequate/inefficient finance and marketing, forest/resource depletion and environmental degradation.
- Suggested interventions: design innovation, preservation/refinement, eco-friendly raw materials, packaging, training facilities, conservation of traditional knowledge and protection of intellectual property rights.
- Activities: visit local artisans, prepare a resource file on local arts/crafts/cuisines, and organise an exhibition.

KGBV • women entrepreneurs • empowerment

- **KGBV:** initiated under Sarva Shiksha Abhiyaan; now subsumed under Samagra Shiksha; residential schooling for never-enrolled/dropout girls from rural, remote and disadvantaged sections; extended to Class XII; Bridge Course; entry level Class VI; linked with RTE implementation.
- **Kiran Mazumdar-Shaw:** source presents her as a woman entrepreneur, biotechnologist and Biocon India leader; began as a trainee brewer, formed Biocon India Ltd. in 1978; awards listed include ET Business Woman of the Year, Leading Exporter, Technology Pioneer, Best Woman Entrepreneur, Padmashri (1989) and Padma Bhushan (2005).
- **Lijjat Papad:** organisation by/for women; started in 1959 with 7 members; registered in 1966; recognised as a village industry; source lists products, about 45,000 members and stated turnover/export details.

Work, age & gender

- Age and sex of workforce members influence personal/professional life at individual and societal levels.
- Children, women and elderly need attention when work is unsuitable to their physiological or psychological state.
- **Sex** is described in the text as biological categorisation; **gender** as social identity; social/cultural practices shape expected roles.
- Gender roles are socially constructed and evolve as 'continuity with change'.
- Women participate in agriculture, animal husbandry, construction, domestic work and many other sectors; household work also contributes to family resources and should be valued.
- Women's paid work can improve family resources but may create a 'double burden' when household and caregiving responsibilities remain.

Attitudes & Quality of Work Life

- Attitude includes how a person perceives work, handles demands and tasks; satisfaction is influenced by attitude and realistic comparison of responsibilities, qualifications, output and pay.
- **QWL:** includes job/career satisfaction, pay, relationships, absence of stress, participation in decisions, work/home balance and well-being.
- Healthy work environment: attend to employee needs, positive climate, motivation, fairness, technical competence, safety, interesting/challenging jobs, person-task match, delegation, team spirit, training/feedback/support, empowerment and self-development.
- Holistic work-life balance includes health, family, friends and free time—not only pay.

UNIT I • LIFE SKILLS, WORKPLACE SKILLS & ENTREPRENEURSHIP

Life skills → healthy work life → dignity & ethics → ergonomics → entrepreneurship → key terms

Life skills for livelihood

- **Definition:** abilities for adaptive and positive behaviour that help people deal effectively with everyday demands and challenges.
- **WHO framing in the source:** thinking, coping and social skills that improve interaction with people/environment and resilience.
- **10 core sets:** self-awareness; empathy; communication; interpersonal relationships; decision making; problem solving; creative thinking; critical thinking; coping with emotions; coping with stress.
- **Source model:** knowledge + attitudes + values → life skills → psychosocial competence & behaviour → positive health → prevention of negative behaviour.
- Life skills support personal/social change, health, development and constructive functioning; the text notes they are developed through experiential learning, not only classroom teaching.

Work ethics & dignity of labour

- Paid or unpaid work—including home, caregiving and volunteering—is presented as fundamental: every person deserves respect regardless of work, position or financial status.
- **Dignity of labour:** taking pride in whatever work one does.
- Examples in the source include Abraham Lincoln and Mahatma Gandhi; Gandhi is described as doing sweeping, scavenging and cleaning in his ashram and cleaning his own toilet.
- **Values:** beliefs/preferences about what is desirable or good; six important values listed are service, social justice, dignity and worth of all persons, importance of human relationships and integrity.
- **Ethics:** formal rules/standards governing conduct of a person or profession; workplace values and ethics can reduce waste and improve morale, confidence and productivity.

Improving one's work life

- Develop healthy habits: wholesome diet, appropriate exercise and enough sleep.
- Be empathetic and compassionate; maintain positive relationships with peers, subordinates and supervisors.
- Recognise interdependence; communicate well and use interpersonal skills.
- Maintain loyalty, commitment and professional ethics; work in partnerships and teams.
- Be responsive rather than reactive; examine situations calmly and take corrective action when needed.
- Be flexible, adaptable and solution-oriented; be a good citizen and build a healthy community.
- Recognise others' contributions, collaborate responsibly and learn from everyday challenges.
- Core workplace abilities are acquired and honed through development and experience.

Ergonomics

- **Meaning:** study of humans at work and the relationship among people, job requirements, methods, tools/equipment and environment; from Greek 'ergon' (work) + 'nomics' (natural laws); also called Human Factors Engineering.
- **Goal:** adapt the work environment to the worker; create safe, acceptable and productive conditions.
- **Consider:** worker capacity (physiological/psychological), task demands (nature, complexity, force, duration, posture) and environment (noise, humidity, vibration, light, temperature).
- **Four pillars:** anthropometry, biomechanics, physiology and industrial psychology.
- **Applications:** workstation/workplace, task/work-method, equipment, facilities and environment design.
- **Benefits:** fewer injuries/accidents/errors, higher productivity/effectiveness/job satisfaction, fewer absences, improved morale and less rework.

Essential soft skills at workplace

- **Working productively:** effective habits, knowledge, skills, experience, enthusiasm and belonging.
- **Learning effectively:** reading, writing, computing, information acquisition, learning tools and continuous updating.
- **Communicating clearly:** appropriate writing, speaking and listening.
- **Working cooperatively:** complete tasks, solve problems, resolve conflicts, provide information and support.
- **Critical & creative thinking:** analytical thinking, evaluation, innovation and creativity.
- **Other:** concentration, alertness, presence of mind, tact, empathy, training/delegation, forethought, vision and multitasking.

Entrepreneurship

- **Definition:** creating a new/innovative enterprise, product or service; changing production/design through innovation, invention or new/modified technology.
- **Entrepreneur:** converts a novel idea into reality, assembles resources/finance and may create or revitalise organisations.
- **Characteristics:** hard work; planning/implementation; management of finance, materials, people and time; calculated risk; multitasking; learning; problem-solving; realism; coping with setbacks; networking; negotiation; strategy/prioritisation; flexibility; crisis handling; communication; innovation; creativity; goal orientation.
- **Social entrepreneurship:** uses entrepreneurship for social good, especially underserved/disadvantaged groups; success is assessed more by social benefit/impact than profit.
- **Activity 13:** discuss unemployment in groups of 6–8: effects on standard of living/state of mind, desire to work, whether unemployment is a national problem, causes, government action and additional solutions.

KEY TERMS

Work • meaningful work • careers • livelihood • rest & recreation • standard of living • social responsibility • ethics • volunteerism • traditional occupations • age & gender • child labour • attitudes & approaches to work • life skills • work & dignity • quality of work life • job satisfaction • creativity & innovation • work environment • occupational health • entrepreneurship

CHAPTER 2 • CLINICAL NUTRITION & DIETETICS

Unit II • concepts, significance, nutrition care and therapeutic diets

Learning objectives

- Understand significance and scope of clinical nutrition and dietetics.
- Describe the role/function of dietitian, clinical nutritionist and medical nutrition therapist.
- Explain knowledge and skills required for a career in this field.

Developments & emerging areas

- New nutritional assessment methods, techniques and supplements are being developed.
- Research examines nutrients in gene expression, metabolic regulation and disease prevention/treatment.
- Antioxidants named include beta-carotene, selenium, vitamin E and vitamin C, particularly from food.
- Phytochemicals/bioactive compounds are non-nutrient food constituents with physiological/biological activity.
- Food/pharmaceutical advances and research have contributed to the growth of clinical nutrition.

What is nutrition?

- Science of food, nutrients and other substances, including digestion, absorption and utilisation.
- Also concerns social, psychological and economic aspects of food/eating.
- Optimum nutrition supports immunity, infection protection, recovery and chronic-disease management.
- Inadequate intake can impair immune defence, wound healing, medication utilisation and organ functions.
- Clinical nutrition is specialised nutrition during illness; the chapter also uses Medical Nutrition Therapy.

Functional foods & nutraceuticals

- FSSAI definition in the chapter covers foods for special dietary uses/functional foods/nutraceuticals/health supplements specially formulated for particular dietary requirements.
- May contain botanicals; vitamins/minerals/proteins/amino acids/enzymes within stated limits; animal-origin substances; or dietary substances that supplement intake.
- Medical foods are specially manufactured for specific needs and, as stated, are regulated and used with a doctor's prescription for specific dietary management.
- Phytochemicals/bioactive compounds influence health despite not being nutrients.

Why clinical nutrition matters

- Illness can cause nutrient imbalances; health and nutrition are intimately linked.
- Focuses on nutritional management of patients with established disease.
- Disease may affect eating/swallowing, digestion, absorption, metabolism or excretion.
- Professional care is individualised and holistic, with the patient as the primary focus.
- Growing needs include older persons and people with obesity, heart disease, hypertension, diabetes and other conditions.

Role of dietitian / MNT

- Provides dietary advice and translates technical nutrition information into practical guidelines.
- Works across the life cycle—from pregnancy/infancy through childhood and old age.
- Nutrition therapy is used for diarrhoea, vomiting, food allergies, anaemia, fever, typhoid, TB, ulcers, hyperacidity/heartburn, epilepsy, GI problems, AIDS, hypertension, cancer, osteoporosis, obesity, burns, diabetes and kidney/liver/pancreatic disorders.
- Pre- and post-operative nutritional support may also be required.

CLINICAL NUTRITION • CARE PROCESS & DIET MODIFICATION

Diet therapy objectives, assessment, types of diets, feeding routes and chronic-disease prevention

Objectives of diet therapy

- Promote recovery with a diet suited to patient needs and food habits.
- Modify existing diets to ameliorate/control disease.
- Correct nutritional deficiencies.
- Prevent short- and long-term complications in chronic diseases.
- Educate and counsel patients about adherence.

Types of diets

- **Standard/normal/regular:** all food groups and healthy needs; hospital regular diet is generally lower in fried fatty foods, sweets, spices and condiments.
- **Modified:** adjusted for medical needs—consistency/texture, energy, nutrients, meal frequency/intervals or feeding route.
- Examples: higher protein after surgery; lower protein in kidney failure; fibre/fat/sodium/fluid changes; restriction of specific constituents such as oxalate-rich spinach.

Nutritional care process

1. Assess nutritional status.
 2. Diagnose nutritional problems.
 3. Plan/prioritise nutrition interventions.
 4. Monitor/evaluate outcomes and change the plan when needed.
- Consider nutritional stress, psychological stress, illness effects on food acceptance and acceptability of modified diets.
 - Applied to healthy clients, pregnant women, elderly people, outpatients and hospitalised patients in varied settings.

Consistency changes

- **Liquid/full-fluid:** fluid at room temperature, generally fibre-free; useful when chewing/swallowing is difficult. Examples: coconut water, juice, soup, milk, buttermilk, milkshake.
- **Clear liquid:** thinner clear soups/juices without pulp, very light tea; used just after surgery; complete nutrition may be difficult.
- **Soft:** semi-solid, lightly seasoned, low in fibrous/gas-forming foods; e.g. khichdi, sago kheer.
- **Mechanical soft:** soft/mashed/pureed foods for elderly people with chewing problems.
- Therapeutic soft diet: simple, easy-to-digest food without harsh fibre, high fat or spicy foods when digestive rest is advised.

Prevention of chronic diseases • lifestyle link

- Good nutrition + healthy lifestyle can control or delay chronic-disease onset.
- The chapter notes processed foods may be high in additives, fat and/or sugar, highly refined and low in fibre/beneficial constituents.
- For urban Indians, the text notes increased fat/refined sugar and reduced fibre, vitamins and minerals; non-vegetarian populations also had increased animal-protein intake.
- Diet/lifestyle changes are associated in the chapter with obesity, colon cancer, diabetes, cardiovascular disease and hypertension; high sodium, lower potassium-rich foods, low calcium, inactivity and stress are also discussed for hypertension risk.
- Clinical nutritionists can provide diet counselling and guidance in schools, colleges and other groups.

Nutritional assessment

- Detailed health, diet, personal and medication history.
- Anthropometric measurements.
- Relate laboratory/physical measurements to history and physician diagnosis.
- Interpret information to identify current deficiencies and future risk.
- Physicians remain responsible for medical needs; dietitians use diagnosis + assessment to prescribe and implement dietary care.

Feeding routes

- **Oral:** preferred route when safe chewing/swallowing is possible.
- **Tube feeding:** nutritionally complete feeds delivered through a tube; the chapter describes nasal-to-stomach feeding when the GI tract functions and digestion/absorption are possible.
- **Intravenous:** special nutrient solutions delivered through a vein by drip when enteral feeding is unsuitable.
- Alternative routes may be needed for unconscious patients or those with swallowing/oesophageal problems.

CAREER • SKILLS • SCOPE • PRACTICAL

Preparing for Clinical Nutrition and Dietetics + career avenues + Chapter 2 revision sheet

Knowledge & skills

- Knowledge of physiological changes in disease, RDAs/nutrient requirements, dietary modifications, traditional and ethnic cuisines.
- Skills in nutritional assessment, individual diet planning, recommending/administering diets, counselling, cultural adaptation and handling food taboos/fads/myths.
- Knowledge of nutrition, food science/composition, clinical nutrition/dietetics or Medical Nutrition Therapy.
- Biological/physical sciences: chemistry, biology, physiology, biochemistry.
- Food safety, microbiology, food quality/assurance, food laws/regulations and physics for equipment.
- Food-service management, quantity production, bookkeeping/accounts, records and personnel management.
- Psychology, sociology, education and counselling.
- Clinical nutritionists may additionally need epidemiology, population surveys and laboratory/experimental research.

Review • must know

- **Clinical Nutrition:** nutrition during illness / nutritional management of patients with disease.
- **Dietetics:** application of nutrition knowledge to plan/manage diets.
- **Therapeutic diet:** diet modified for medical/nutritional needs.
- **Dietitian/MNT:** assesses nutrition, develops care plans, prescribes/implements diet within the medical team and counsels patients.
- Key terms: dietetics • clinical nutrition • dietary modification • therapeutic diets • dietitian • nutrition counselling.
- Review questions: significance/scope; types of modification; diet + chronic-disease prevention; dietitian's role in team care; career preparation; illness effects on nutritional status.

Preparing for the career

- Pass 10+2 followed by B.Sc. Home Science or B.Sc. with specialisation in Nutrition/Food Technology.
- Dietitian pathway in the text: at least Postgraduate Diploma in Dietetics with internship to qualify as a Registered Dietitian.
- Relevant B.Sc. backgrounds: Home Science, Life Sciences, Biochemistry, Microbiology or Biotechnology.
- M.Sc. Food Science & Nutrition or Dietetics helps specialise and is preferred in many employment settings.
- Teaching/research pathways include universities, colleges and research institutions; the chapter notes National/State Eligibility Tests conducted by UGC for teaching posts and advises Ph.D. for academics/research.
- Registered-Dietitian credentialing and regulatory requirements vary by country.

Practical 1 • soft diet

- Theme: modification of a normal diet to a soft diet for an elderly person.
- Interview an adult under 60 and record one day's food/liquid intake; assess balance; modify for an elderly person; reassess; interact about acceptability.
- Cases: >70 years/no teeth; no teeth + swallowing difficulty; dentures about 60–65 years; no molar teeth.
- Share plan and record comments/suggestions; teacher facilitates discussion.
- Purpose: understand diet modification, balanced nutrition and the importance of age, sex and health status.

Scope & career avenues

- Dietitian, diet counsellor, clinical nutritionist, teacher, researcher and corporate consultant.
- Food-industry R&D/production of medical foods, nutraceuticals, tube feeds, nutritional-support formulations and functional foods.
- Public-health policy and preventive/promotive nutrition programmes.
- Hospitals/clinics, wellness centres, gyms, slimming clinics, universities/colleges, medical research establishments, nutrition laboratories and therapeutic-food/supplement companies.
- Hospital food-service manager/provider, freelance diet consultant, own enterprise, catering, speciality-food entrepreneurship, nutrition marketing and technical writing.

24-hour diet + balance guide

- Record time, meal, menu item, ingredients, amount in household measures and remarks/additions.
- Guide: cereals & millets ~10 servings; pulses/legumes 2–3; green leafy vegetables ½–1 katori cooked; other vegetables 2 katoris cooked including salads; roots/tubers ½–1 katori; fruits 2–3 servings; milk/milk products 1 glass/1 katori; visible fats/oils 6 tsp maximum desirable; sugar/jaggery 4 tsp maximum desirable.
- At least one fruit should be a vitamin-C source.

■ **ONE-LINE REVISION:** Clinical nutrition • dietetics • Medical Nutrition Therapy • nutrition assessment • diet therapy • therapeutic diets • regular/modified/liquid/clear-liquid/soft/mechanical-soft diets • tube/IV feeding • chronic disease prevention • dietitian • counselling • nutraceuticals • phytochemicals • functional foods • career scope • nutritional care process

CHAPTER 3 • PUBLIC NUTRITION & HEALTH

Unit II • significance, public-health nutrition, malnutrition and nutritional problems in India

Learning objectives

- Understand the significance and scope of public nutrition.
- Know nutritional problems of public-health significance.
- Become acquainted with government programmes tackling important nutritional problems.
- Describe the role and functions of a public health nutritionist.
- Explain knowledge and skills required for a career in public health nutrition.

What is public health nutrition?

- Public health means collective action by society to protect and promote the health of whole populations.
- Public health nutrition promotes good health by preventing nutrition-related illnesses/problems in populations and through government policies and programmes.
- Professionals use large-scale, organised and multidisciplinary approaches because population problems require group action.
- It is multidisciplinary and draws on biological, social, behavioural and managerial sciences.
- Unlike clinical nutrition/dietetics, the focus is the community/public, especially vulnerable groups.

Why is it significant?

- The chapter describes undernutrition and overnutrition as major public-health concerns.
- Low birth weight: babies weighing below 2500 g (2.5 kg); the chapter links it with adverse effects during growth and possible child mortality.
- Growth retardation and mild/moderate undernutrition are described among preschool children, especially from socio-economically disadvantaged families.
- Micronutrient deficiencies are called hidden hunger; nutrients of concern include iron, zinc, vitamins A, C and D, iodine, folic acid and B12.
- Malnutrition can affect physical growth, mental/cognitive development, productivity and quality of life.

Double burden of malnutrition

- India faces undernutrition while overnutrition is also increasing.
- More sedentary lifestyles and reduced physical activity contribute to the problem.
- Processed/fast foods and foods high in energy, sugar, fat and salt are increasingly common, while whole grains, pulses, vegetables and fruits have reduced in the diet described by the chapter.
- These changes can contribute to overweight/obesity and non-communicable diseases such as hypertension, heart disease and diabetes.
- Thus the chapter describes a 'double burden': coexistence of undernutrition and overnutrition.

Factors related to undernutrition

- **Basic causes:** quantity/quality of resources; political, cultural, religious, economic and social systems; environmental/technological and human resources.
- **Underlying household/family causes:** insufficient access to food; poor maternal/child-care practices; poor water, sanitation and hygiene; inadequate health services; inappropriate knowledge/discrimination; low education.
- **Immediate individual causes:** inadequate/faulty dietary intake and disease/infections.
- **Outcomes:** malnutrition, disability and death.
- The diagram on page 50 visually connects these levels from basic causes → underlying causes → immediate causes → outcomes.

Common nutritional problems

- **Protein-Energy Malnutrition (PEM):** inadequate food intake relative to energy/protein requirements; children are at greatest risk, though adults can also be affected.
- **Underweight:** body weight less than adequate for age.
- **Stunting:** height less than adequate for age.
- **Wasting:** weight not adequate relative to height.
- **Marasmus:** severe undernutrition due to deficiency of food and energy.
- **Kwashiorkor:** severe undernutrition described in the chapter as caused by protein deficiency.

PUBLIC NUTRITION • MICRONUTRIENTS & INTERVENTIONS

Iron, vitamin A and iodine deficiencies + food-based and nutrient-based strategies

Micronutrient deficiencies

- Hidden hunger refers to micronutrient deficiency.
- Major public-health concerns named: iron, vitamin A, iodine and zinc.
- Growing concern is also noted for vitamin B12, folic acid, calcium, vitamin D and riboflavin deficiencies.
- Micronutrient problems can coexist with inadequate energy/protein intake.

Iodine deficiency disorders (IDD)

- Iodine is required for normal mental and physical growth and development.
- The chapter describes IDD as an ecological phenomenon, largely due to iodine deficiency in soil.
- States listed as affected include the Himalayan belt from Jammu and Kashmir to Arunachal Pradesh, and Andhra Pradesh, Karnataka, Kerala, Maharashtra and Madhya Pradesh.
- IDD covers a spectrum of disabling conditions from fetal life through adulthood due to inadequate dietary iodine.
- Iodine deficiency reduces thyroid hormone synthesis; goitre is a common adult manifestation and cretinism is described in children.
- During pregnancy, deficiency can have serious fetal effects according to the chapter.

Diet/food-based strategies

- Preventive and comprehensive strategies using food to overcome nutritional deficiencies.
- Increase availability and consumption of micronutrient-rich foods.
- Advantages stated: sustainable, long-term benefits, cost-effective, adaptable to cultural/dietary traditions and no overdose/toxicity risk of the type associated with medicinal supplementation.
- Examples: dietary diversification/modification, home gardening/horticulture, nutrition and health education and food fortification.

Iron-deficiency anaemia (IDA)

- Described as the most common nutritional disorder in the world.
- Vulnerable groups: women of child-bearing age, adolescent girls, pregnant women and school-age children.
- Occurs when haemoglobin production is considerably reduced, resulting in low blood haemoglobin.
- Symptoms/manifestations include fatigue, lethargy, breathlessness on slight exertion, pallor/paleness of conjunctiva, tongue, nail beds and soft palate.
- In children, attention span, memory and concentration can be adversely affected.

POSHAN Abhiyaan & direct interventions

- POSHAN Abhiyaan (PM's Overarching Scheme for Holistic Nutrition) was launched in Jhunjhunu, Rajasthan, in March 2018.
- The chapter says it targeted stunting, undernutrition, anaemia among young children/women/adolescent girls and low birth weight, with monitoring/review of related schemes.
- Direct short-term interventions include ICDS for vulnerable children 0–6 years and pregnant/lactating mothers.
- Food fortification is cited, including salt fortified with iodine.
- Low-cost nutritious foods using indigenous/local raw materials and control of micronutrient deficiencies through supplementation are also listed.

Nutrient-based / medicinal approach

- Nutrient supplements are given to vulnerable groups who are at risk of deficiency or already deficient.
- Described as a short-term strategy, particularly for vitamin A, iron and folic acid in India.
- Supplementation programmes can be expensive and may face coverage problems.
- Different nutrients have different target groups.
- The chapter states the long-term goal should be to shift away from supplementation toward food-based approaches.

Vitamin A deficiency (VAD)

- Vitamin A is needed for healthy epithelium, normal vision, growth and immunity.
- Deficiency can cause night blindness and may progress to complete blindness without corrective measures.
- It lowers resistance to infection and can adversely affect growth.
- The chapter describes a vicious cycle: vitamin A deficiency → increased susceptibility to infection → increased losses of vitamin A → further deficiency.
- Vitamin A deficiency is described as the most common cause of childhood blindness.

Indirect policy instruments

- Ensure food security by improving food availability.
- Improve dietary patterns through availability of nutritious foods.
- Poverty alleviation through employment-generation schemes and the public distribution system.
- Land reforms; improved health and family welfare; prevention of food adulteration.
- Use of media; basic nutrition knowledge; monitoring nutrition programmes.
- Improving status of women, education/literacy and community participation.

Intervention comparison

- **Nutrient supplementation:** timely and sustainable; more costly and narrower coverage.
- **Fortification:** universal prevention; highly cost-effective, wide coverage and sustainable; requires research/food-industry participation.
- **Dietary diversification:** universal prevention; cost-effective, wide coverage, sustainable, supplies multiple micronutrients and improves food security; requires behavioural/economic/agricultural changes.
- Table 3.1 on page 56 summarises these advantages and challenges.

PROGRAMMES • HEALTHCARE • CAREER • PRACTICAL

Nutrition programmes in India, public nutritionist scope, career avenues and Chapter 3 revision

Nutrition programmes listed

- **ICDS:** outreach programme for early childhood care/development, covering pregnant and nursing mothers, infants and young children up to 6 years.
- **Nutrient-deficiency control:** National Prophylaxis Programme for Prevention of Blindness due to Vitamin A deficiency; National Nutritional Anaemia Prophylaxis Programme; National Iodine Deficiency Disorder Control Programme.
- **Food supplementation:** Mid-Day Meal Programme.
- **Food security:** Public Distribution System, Antodaya Anna Yojana, Annapurna Scheme and National Food for Work Programme.
- **Employment schemes:** self-employment and wage-employment/social safety-net programmes.

Scope of public/community nutrition

- Hospital outreach programmes for prevention, promotion and education.
- Integrated Child Development Services at different levels according to qualifications/expertise.
- Government roles as consultants, advisors or policy-making committee members.
- Development programmes of government, voluntary organisations, NGOs and international organisations such as UNICEF, USAID, GAIN, Nutrition International, TATA Trust and IFPRI, as listed in the chapter.
- Large-scale feeding programmes for young children, school children, adolescents, pregnant/lactating mothers, elderly and challenged individuals.
- School health programmes as nutritionists/school health counsellors; corporate CSR programmes on food and nutrition security.
- Teaching, research, entrepreneurship and development of communication/educational materials.

Practical 1 • supplementary foods

- **Theme:** Development and Preparation of Supplementary Foods for Nutrition Programmes.
- Tasks: obtain prices of commonly consumed locally available foods; plan low-cost recipes for preschoolers attending an Anganwadi; prepare selected recipes; evaluate them.
- Purpose: gain insight into planning, costing and preparation of supplementary foods within a given budget.

Healthcare levels in India

- Health care is described as more than medical care—it includes services to promote, maintain, monitor or restore health.
- **Primary:** first contact for individual/family/community; services through Primary Health Centres (PHCs).
- **Secondary:** more complex problems through district hospitals and community health centres; CHCs function as the first referral level.
- **Tertiary:** highest level for complex problems not dealt with at first two levels; examples include medical college hospitals, regional/specialised hospitals and AIIMS.

Career avenues

- Community nutritionist in PSM departments of hospitals.
- Government nutrition programmes such as ICDS and Food and Nutrition Board.
- Voluntary organisations at regional, national and international levels.
- Consultancy.
- Nutritionist/counsellor for schools, industries and similar settings.
- Teaching and academics.
- Research.

Practical groups

- Divide students into 4 groups; each plans 2 recipes for 5 servings and calculates cost using the price list.
- **Group A:** energy + protein.
- **Group B:** iron.
- **Group C:** vitamin A or beta carotene.
- **Group D:** calcium.
- Students are not required to calculate nutritive values. The teacher sets a cost limit, stated in the chapter as not more than ₹5 per serving.

Role of public nutritionist

- Nutrition is an important determinant of health; public/community nutritionists participate in health promotion and prevention strategies.
- Key areas: nutritional science, life-cycle needs, nutritional assessment, nutritional care, food science, educational methods, mass media/communication and programme management.
- Roles include identifying problems and their magnitude, understanding causes, planning strategies/actions, implementing them and evaluating impact.
- The profession is suited to large-scale community and population-level work.

Activities in the chapter

- **Activity 1:** visit Anganwadis/ICDS centres, interact with supervisor/sevika, observe activities/food distribution and prepare a PowerPoint.
- **Activity 2:** interactive session with medical officer/health in-charge of PSM department, PHC or Municipal Corporation on undernutrition and possible causes.
- **Activity 3:** exhibition on nutritional problems in India, causes, vulnerable groups and simple preventive measures.
- **Activity 4:** visit WHO, UNICEF, Poshan Abhiyaan, Ministry of Health and Family Welfare and Ministry of Women and Child Development websites to learn about programmes/activities.

Evaluation checklist

- Identify locally available food sources for the assigned nutrient.
- Teacher checks the plans and selects one suitable recipe for preparation.
- Evaluate the product for serving size, cost, suitability for preschoolers, appearance, taste and acceptability by children.
- Record observations/comments and suggestions for improvement.
- Key terms: nutritional status • undernutrition • malnutrition • public health • public nutrition • nutrition programmes • community health.

■ **ONE-LINE REVISION:** Public nutrition • double burden of malnutrition • PEM • underweight • stunting • wasting • marasmus • kwashiorkor • hidden hunger • IDA • vitamin A deficiency • IDD • POSHAN Abhiyaan • ICDS • fortification • dietary diversification • supplementation • food security • PHC • public nutritionist • community nutrition • career avenues

CHAPTER 4 • FOOD PROCESSING & TECHNOLOGY

Unit II • significance, food science, processing, preservation and food classification

Learning objectives

- Understand food processing and technology: history, development and present status.
- Explain significance and basic concepts of food processing and technology.
- Know the skills required to become a professional food technologist.
- Know career opportunities and educational qualifications for specific careers.
- Understand scope for self-employment as small, medium or large-scale entrepreneurs.

Basic concepts: Food Science

- Food Science applies basic sciences such as chemistry, physics, culinary arts, agronomics and microbiology.
- It covers technical aspects from harvesting/slaughtering through processing, storage, cooking and consumption.
- Food scientists study food composition, changes during processing/storage, spoilage and principles underlying food processing.
- It helps explain the physico-chemical nature and properties of food.

Why do we process food?

- Food processing has been practised since ancient times—for example, drying grains after harvest to increase shelf life.
- Early processing aimed to improve digestibility and palatability and ensure continuous food supply.
- Traditional Indian preserved foods include pickles, murabbas and papads.
- Modern consumers demand foods with safety, nutrition, shelf life, convenience and desirable taste/texture/consistency.
- Examples of processed foods include biscuits, bread, pickles, papads, ready-to-eat curries, meal items and snacks.

Food Processing vs Food Technology

- **Food Processing:** methods and techniques used to transform raw ingredients into finished and semi-finished products.
- Good-quality plant/animal raw materials are converted into attractive, marketable and often long shelf-life foods.
- **Food Technology:** application of scientific, socio-economic and legal knowledge to production.
- It uses Food Science and Food Engineering to support selection, storage, preservation, processing, packaging and distribution of safe, nutritious, desirable and affordable foods.
- Sustainability is also highlighted: reducing waste and using food resources efficiently.

Significance in India

- India's move from agro-deficit to agro-surplus increased the need for storage and processing of agricultural and horticultural produce.
- The textbook describes the Indian food industry as a major producer of processed foods and notes its contribution to GDP.
- Food fortification helps address nutrient deficiencies—for example iodised salt, folic acid in flour and vitamins A/D in milk and oils/fats.
- Changing lifestyles and concerns about heart disease, diabetes and wellness have encouraged changes in nutrient composition of processed foods.
- Demand is also growing for foods with longer shelf life while retaining natural flavour/appearance.

Food manufacturing

- Food manufacturing is the mass production of food products using principles of food technology.
- It meets diverse needs of a growing population and is described in the textbook as one of the largest manufacturing industries.
- Food manufacturing depends on processing systems, quality control, safety, packaging, storage and distribution.

PRESERVATION • SPOILAGE • PROCESSING METHODS

Development of food technology, deterioration, perishability, spoilage control and processed-food categories

Development timeline

- **1810:** Nicolas Appert's development of the canning process was a decisive event in preservation.
- **1864:** Louis Pasteur researched wine spoilage and developed pasteurisation to destroy disease-producing organisms in milk.
- Food technology was initially used to serve military needs.
- World wars, space exploration and growing consumer demand contributed to development in the 20th century.
- Instant soup mixes and ready-to-cook meals developed alongside changing lifestyles and food preferences.
- In the 21st century, food technologists face changing health, nutrition, safety and convenience needs.

Classes based on perishability

- **Perishable:** spoil quickly within 1–2 days. Examples: milk, curds, fish and meat.
- **Semi-perishable:** can last about 1–2 weeks. Examples: fruits and vegetables; onions and potatoes may last 2–4 weeks.
- **Non-perishable:** generally last about one year. Examples: rice, wheat, pulses/dals and oilseeds.

Processed-food categories 1–4

- **Minimally processed:** cleaning, trimming, shelling, cutting, slicing and refrigeration while retaining fresh-food quality.
- **Preserved foods:** preservation changes the character of the product relatively little; examples include frozen/dehydrated vegetables and canned fruits/vegetables.
- **Manufactured foods:** original characteristics are lost; preservation may use salt, sugar, oil or chemical preservatives. Examples: pickles, jams, marmalades, squashes, papads and wadis.
- **Formulated foods:** ingredients are mixed and processed into relatively shelf-stable products such as bread, biscuits, ice cream, cakes and kulfi.

Importance of processing & preservation

- Processing transforms bulky, perishable and sometimes inedible materials into useful, concentrated, shelf-stable and palatable foods/beverages.
- It can increase storability, portability, palatability and convenience and reduce preparation time.
- Food-processing professionals need knowledge of raw materials, preservation principles, processing factors, packaging, water/waste management, good manufacturing practices and sanitation.
- Preservation is needed to keep food edible and safe.

Basic principles to prevent spoilage

1. Apply heat.
 2. Remove water/moisture.
 3. Lower temperature during storage.
 4. Reduce pH.
 5. Control availability of oxygen.
- These principles aim to reduce/eliminate microbial activity and other factors affecting spoilage.

Processed-food categories 5–7

- **Food derivatives:** food components obtained through purification, e.g. sugar from sugarcane or oil from oilseeds; oil may be further processed into vanaspati by hydrogenation.
- **Functional foods:** foods that can have a beneficial effect on human health, e.g. probiotics.
- **Medical foods:** used in dietary management of diseases, e.g. low-sodium salt and lactose-free milk for lactose intolerance.

Causes of food deterioration

- Food may deteriorate physically, chemically or biologically.
- Results can include spoilage, off-flavours, texture changes, discoloration and loss of nutritional value.
- Factors include pests/insects, unsuitable processing/storage temperatures, light/radiation, oxygen and moisture.
- Microbial contamination may involve bacteria, fungi and moulds; chemicals such as pesticides can also contaminate food.
- Naturally occurring enzymes can accelerate chemical reactions and affect quality.

Microbial growth • quick facts

- Main spoilage microorganisms listed: bacteria, fungi, yeasts and moulds.
- Growth is influenced by nutrient availability, moisture, pH, oxygen and inhibiting substances.
- Enzyme activity also depends on pH and temperature.
- The textbook identifies protein-rich foods such as meat, fish, poultry, eggs and dairy as high-risk foods for bacterial growth.
- The 'Danger Zone' shown in the chapter is 5–60°C.

Activity 1

- List foods preserved at home in your region/community.
- Identify the preservation method and preservatives used.
- Identify processed foods made using artificial sweeteners that are available in your area.

SKILLS • CAREERS • SELF-EMPLOYMENT • PRACTICAL

Professional preparation, industry scope, career avenues and Practical 1

Skills: food as a material

- Know seasonal availability of foodstuffs.
- Understand nature and properties of food.
- Know nutritional content and its analysis.
- Understand food costs.
- Know influence of pesticides, time, moisture, temperature and additives.
- Assess quality of raw foods/ingredients.
- Understand food hygiene and safety.
- Use Information Technology for contemporary food production.

Skills: product development

- Large-scale food preparation/cooking skills.
- Know product specifications and how to test them.
- Observe and measure quality control against specifications.
- Use sensory evaluation—testing and tasting produced foods.
- Understand industrial practices, manufacturing systems and their control.
- Handle labelling and packaging of marketable products.
- Know Hazard Analysis and Critical Control Point (HACCP).

Skills: recipe development

- Expertise in cooking.
- Know nature and properties of food.
- Use ingredients and measure/weigh accurately.
- Design, analyse and adapt a basic recipe.
- Food handling skills.
- Produce food following hygiene and safety norms.
- Handle tools/equipment accurately.
- Innovate product design according to consumer perceptions.
- Use IT for contemporary production.

Preparing for a career

- Food industry work includes processing/manufacture, R&D, food safety, quality monitoring, quality control, costing and regulatory affairs.
- Specialisations may include beverages, dairy, meat/poultry, seafood, fats/oils, stabilisers/preservatives/colours, food grains and additives.
- Core knowledge: food science/chemistry, microbiology, processing, safety/quality assurance, GMP and nutrition.
- Other skills: analysis of raw/cooked foods, ingredients, product development, sensory evaluation, packaging/labelling, IT, cooking and recipe adaptation.

Education after 10+2

- Short-term certificate, craft and diploma courses are available at institutes/colleges and are suitable for self-employment or placement in small-scale preservation/processing and catering units.
- The textbook mentions CFTRI, Mysore, as an institute offering such opportunities.
- Bachelor's, Master's and research qualifications provide broader grounding for large-scale industry, research, training and entrepreneurship.
- NIFTEM at Sonapat is mentioned for postgraduate specialisation in Food Processing and Technology.

Career avenues

- Production manager • project implementation • marketing & sales.
- Sensory evaluation • quality assurance.
- Research & development • product development.
- Project financing • project appraisal.
- Teaching & research • entrepreneurship development.
- Consultancy • technical marketing of products.

Scope & self-employment

- Food technologists work across food industries, quality control, hotels, hospitals, packaging/labelling, dairy, confectionery, fish/meat processing, fruits/vegetables, grains/cereals/millet/rice/flour mills and more.
- Functions include purchase/storage, processing/manufacture, quality monitoring, safety assessment and R&D.
- Self-employment can range from technology-oriented, investment-intensive ventures to low-investment units such as salted peanuts, drinking-water pouches, dehydrated products and pickles.
- The textbook notes government support through finance, training, infrastructure and marketing facilities, including encouragement for women entrepreneurs.

Practical 1 • processed food

- **Theme:** Design, Prepare and Evaluate a Processed Food Product.
- Identify a product with long shelf life, prepare it, evaluate acceptability and prepare a label.
- Examples: pickles, jams, squash, murabba and papad.
- Prepare about 500 g and consider locally available fruits/vegetables or useful peels/seeds where appropriate.
- List ingredients, preservatives, utensils, equipment and heat source; write criteria, recipe and method; choose packaging.

Practical evaluation & label

- Prepare hygienically and calculate costs for materials, energy, labour, storage and packaging.
- Evaluate texture, taste, colour and quality and record observations.
- Label should include: product name/picture; manufacturer name/address; ingredients in descending proportion; net weight/volume; instructions for use; storage instructions; Use By/Best Before date.
- These label requirements are given on the final textbook page of the chapter.

■ **ONE-LINE REVISION:** Food Science • Food Processing • Food Technology • Food Manufacturing • Food Preservation • Food Spoilage • perishability • pasteurisation • canning • fortification • HACCP • functional foods • medical foods • product development • quality assurance • self-employment

CHAPTER 5 • FOOD QUALITY & FOOD SAFETY

Unit II • food safety, quality, hazards, food-borne illness, contamination and adulteration

Learning objectives

- Explain the importance of issues related to food safety and quality.
- Understand how food-borne illnesses occur.
- Know national and international food standards and their role in ensuring quality and safety.
- Understand the importance of food safety management systems.
- Know career avenues/options in this area.

Why food safety matters

- Food is a major determinant of health, nutritional status and productivity; it must be wholesome and safe.
- Unsafe food can cause food-borne diseases and can also affect trade, tourism, earnings, employment and economic growth.
- Food safety is important at home and critical in large-scale production, processing and freshly prepared food service.
- Processed, packaged and functional foods have increased the need for systematic safety assessment.

Why food-safety challenges are growing

- More eating outside the home means bulk preparation, many handlers and longer storage before service.
- Packaged/processed foods require safety assessment.
- Complex transport and long gaps between processing and consumption increase the need for risk assessment and safety management.
- Microbial adaptation, antibiotic resistance, altered susceptibility and international travel contribute to food-borne disease concerns.
- Pollution, pesticides, additives, preservatives, colours and flavouring agents make analysis of nutrients and contaminants important.

Food safety • toxicity • hazard

- **Food safety:** assurance that food is acceptable for human consumption according to its intended use.
- **Toxicity:** capacity of a substance to produce harm or injury under any conditions.
- **Hazard:** relative probability that harm/injury will result when a substance is not used in the prescribed manner and quantity.
- Hazards may be **physical, chemical or biological** and can cause adverse effects on consumer health.

Physical hazards

- Physical material not normally found in food that can cause illness or injury.
- Examples shown in the chapter: hair, stones, stems/seeds, bone fragments, feathers, jewellery, buttons, nails, nuts/bolts, bids/cigarettes, matchsticks and strings/jute fibres.
- These hazards are visible foreign materials and can enter food during handling, preparation or processing.

Chemical hazards

- Chemicals or deleterious substances intentionally or unintentionally added to food.
- Examples: pesticide residues, cleaning chemicals, veterinary residues, toxic metals, polychlorinated biphenyls, excessive/non-permissible additives, preservatives and food colours.
- Chemical hazard control requires attention to both intended ingredients and unwanted residues/contaminants.

FOOD-BORNE ILLNESS • QUALITY • STANDARDS

Biological hazards, infection vs intoxication, contamination/adulteration and national/international food standards

Biological hazards

- Living organisms associated with food can cause disease.
- Visible biological hazards shown: flies, worms, weevils, caterpillars and cockroaches.
- Invisible/microbiological hazards: bacteria, viruses, yeasts, moulds and protozoa.
- Food-borne pathogens can cause two microbial food-borne diseases: **infections** and **poisoning/intoxication**.

Contamination vs adulteration

- **Contamination:** presence of harmful/objectionable foreign substances such as chemicals, microorganisms or dilutants before, during or after processing/storage.
- **Adulteration:** lowering food quality by adding inferior material or extracting a valuable ingredient; may include intentional substitution/addition as well as biological/chemical contamination.
- **Adulterants:** substances used for making food products unsafe for human consumption.

Four levels of food standards

- **Company standards:** prepared by a company for its own use; normally copies of national standards.
- **National standards:** issued by the national standards body; the chapter identifies FSSAI.
- **Regional standards:** developed by regional groups with similar geography/climate through standardisation bodies.
- **International standards:** published by ISO and Codex Alimentarius Commission (CAC).

Food infection • Salmonella example

- Food infection results from ingestion of live pathogenic organisms that multiply in the body.
- **Salmonella** may be associated with raw milk and eggs; inadequate cooking can allow survival.
- Cross-contamination can occur when a board used for raw meat/poultry is used for ready-to-eat food without cleaning.
- Poor hand hygiene by food handlers can spread infection.
- Symptoms described: diarrhoea, fever and abdominal cramps.

Food quality

- Food quality refers to attributes that influence a product's value to consumers.
- Negative attributes include spoilage, contamination, adulteration and safety hazards.
- Positive attributes include colour, flavour and texture.
- Quality is holistic: nutritional traits, sensory properties (colour, texture, shape, appearance, taste, flavour, odour), social considerations and safety.
- **Safety is a preliminary attribute and precursor of quality.**

India: FSSAI & food law

- ISI mark of BIS and Agmark are described as voluntary grading/marketing certification schemes.
- The Food Safety and Standards Act (FSSA), 2006 consolidated food-safety legislation.
- FSSAI lays down science-based standards and regulates manufacture, storage, distribution, sale and import to ensure safe and wholesome food.
- Functions include regulations/guidelines, risk assessment, laboratory accreditation, scientific advice, data collection, information networks, training and public awareness.

Food intoxication

- Some bacteria produce harmful toxins that may remain in food even after the pathogen is killed.
- Toxins can form when food has not been kept hot enough or cold enough.
- Toxins cannot necessarily be detected by smell, appearance or taste—food that looks good is not necessarily safe.
- *Staphylococcus aureus* is given as an example; diarrhoea is listed as a symptom.

Good practices for food service

- Quality of raw materials and water.
- Cleanliness of premises, personnel, equipment, preparation/storage/serving areas.
- Storage at appropriate temperature.
- Food hygiene.
- Good service practices.
- The chapter's Activity 1 asks students to observe fresh fruits, vegetables and a food preparation during one week and record appearance, texture, colour and odour changes.

International organisations

- **Codex Alimentarius Commission (CAC):** develops international standards; its Codex Alimentarius ('Food Code') contains standards, codes of practice, guidelines and recommendations.
- **ISO:** worldwide federation of national standards bodies; ISO 9000 is an international reference for quality requirements and quality management.
- **WTO:** established in 1995; facilitates trade, administers trade agreements and settles disputes.

FOOD CONTROL • HACCP • CAREERS • PRACTICALS

Inspection and analytical capability, GMP/GHP/HACCP, scope, career avenues and adulteration practicals

Food control system

- Strong food-control systems support adoption and implementation of food standards.
- **Food inspection:** verifies conformity of products to standards and checks production, handling, processing, storage and distribution.
- **Analytical capability:** accredited laboratories and trained personnel perform physical, chemical and microbiological analysis.
- Testing may detect contaminants, environmental chemicals, biotoxins, pathogenic bacteria, food-borne viruses and parasites.

HACCP

- **Hazard Analysis Critical Control Point** is an approach that provides assurance about food safety.
- Raw materials and each step in a process are examined for potential contribution to pathogenic microorganisms or other hazards.
- It involves identifying hazards, assessing chances of occurrence at each stage and defining control measures across the food chain—from procurement through manufacture, distribution and use.
- It is a **preventive** approach.

Career avenues

- Quality-control laboratories: analyst or managerial roles.
- Public/private food-testing laboratories and food-inspection roles.
- HACCP specialist and food auditor.
- Quality certification/ISO-related work.
- Teaching and academics.
- Research and scientific writing.
- Voluntary organisations and related food-safety roles.

GMP • Good Manufacturing Practices

- GMP is part of quality assurance.
- It encourages proactive steps so manufacturers/processors produce safe products.
- It helps minimise/eliminate contamination and false labelling.
- It protects consumers and supports compliance and performance by manufacturers/producers.

Why implement HACCP?

- End-product inspection can be time-consuming and expensive and may identify problems only after they occur.
- HACCP enables hazards to be detected at processing/manufacturing stages so action can be taken where the problem occurs.
- It can help producers, processors, distributors and exporters use resources efficiently for food safety.
- The chapter states that FSSAI 2006 places primary responsibility for safe food with producers and suppliers through HACCP, GMP and GHP.
- It supports consistently good-quality products.

Practical 1 • Food adulteration

- **Theme:** Test of Food Adulteration.
- Collect raw/cooked food materials from local shops, examine for adulterants and record observations.
- Groups: A—rice, wheat, pulses, spices/tea leaves; B—snacks such as pakodas, idlis and samosas; C—assorted Indian sweets.
- Use separate worksheets for each vendor and food; compare and comment on quality.
- The worksheet records hazards such as hair, stones, stems/seeds, matchsticks, stapler pins, bidis/cigarettes, camphor balls, worms/insect parts, mercury balls and infested grains.

GHP • Good Handling Practices

- GHP takes a comprehensive farm-to-store/consumer approach.
- It identifies potential sources of risk and procedures to minimise contamination.
- It ensures that people who handle food follow good hygiene practices.

Scope & skills

- Professionals need knowledge of Food Chemistry, Food Processing and Preservation, Food Analysis and Quality Control.
- Useful additional areas: Food Microbiology, Food Laws and Sensory Evaluation.
- Opportunities exist in regulatory/public-health agencies, Agmark/BIS, quality-control laboratories, large food industries and flight kitchens.
- Self-employment avenues include analytical food laboratories, food-safety consultancy and Food Safety & Sanitation Education.

Practical 2 • qualitative tests

- Tests include detection of sesame oil in ghee, excessive stalks in tea, light berries in black pepper, metanil yellow in turmeric, starch in milk/ice cream and adulteration tests for other foods.
- Examples from the chapter: pink colour in the ghee test indicates sesame oil; pink-to-magenta in turmeric indicates metanil yellow; blue colour with iodine indicates starch.
- These are textbook practical procedures; laboratory chemicals should be handled only under appropriate teacher/lab supervision.

■ ONE-LINE REVISION: Food Safety • Food Quality • Hazard • Toxicity • Physical/Chemical/Biological Hazards • Infection • Intoxication • Contamination • Adulteration • FSSAI • CAC • ISO • WTO • GMP • GHP • HACCP

CHAPTER 6 • EARLY CHILDHOOD CARE & EDUCATION

Unit III • Human Development and Family Studies • ECCE, early learning, care arrangements and development

Learning objectives

- Understand the basic principles of Early Childhood Care and Education (ECCE) as they apply to Indian society.
- Understand the importance of early care and learning experiences for children.
- Understand how children play and learn.
- Explain the knowledge and skills required for a career in ECCE.

Learning environment

- Once children can walk, run, manipulate objects and speak, they actively explore their environment.
- Vocabulary in the mother tongue develops rapidly; children become curious about sand, water, flowers, birds, machines and other materials.
- A good environment should be safe, secure, loving and rich in people and play materials.
- Children need a caring adult such as a parent, grandparent, sibling or preschool teacher.
- Overly formal, demanding learning can reduce curiosity and increase anxiety.

Why early childhood matters

- Early childhood is an important area of Human Development because children learn from a very early age.
- Infants develop attachment with family members and begin recognising familiar people.
- By around 8–12 months, a child may show fear of unfamiliar people, reflecting recognition of familiar faces.
- Young children rapidly develop movement, precision, body control and bladder/bowel control.
- Early experiences influence learning, relationships and preparation for later schooling.

Preschool & play-way method

- A good preschool can provide valuable learning experiences and exposure to people, environments and materials outside the home.
- The child-centred approach and play-way method make learning enjoyable.
- Children learn quickly through interaction with peers.
- Preschool can be especially helpful for children living in difficult circumstances or needing additional learning support.
- Preschool complements, rather than replaces, a good learning environment at home.

Care beyond the home

- Children are often cared for within families during the first few years.
- When a mother works outside the home, substitute care may be needed.
- Care can be provided by family members, a neighbourhood crèche, a caregiver's home or an institution.
- Institutional child care can also support families and help older school-going children who might otherwise have to care for younger siblings.

Objectives of ECCE • NCF 2005

- **Holistic development:** enable the child to realise his/her potential.
- **Preparation for school.**
- **Support services:** provide support for women and children.
- ECCE benefits children in different circumstances and supports families and communities in caring for and developing the next generation.

BASIC CONCEPTS • GUIDING PRINCIPLES • CAREGIVER ROLE

Age groups, crèches/day care, Montessori and ICDS, cultural context, play and experiential learning

Basic concepts

- **Early childhood:** birth to 8 years; commonly divided into birth–3 years and 3–8 years.
- **Infancy:** birth to one year (some experts extend infancy to two years). The infant is highly dependent on adults.
- **Substitute caregiver:** family member or hired person who provides care when the primary caregiver is unavailable.
- **Crèche:** institutional setting designed for infants and young children in the absence of home care.
- **Day care:** care of preschool children and may include infants and preschoolers.

NCF guiding principles of ECCE

- Play as the basis for learning.
- Art as the basis of education.
- Recognition of special features of children's thinking.
- Primacy of experience rather than expertise — experiential learning.
- Experience of familiarity and challenge in everyday routines.
- Mix of formal and informal interactions.

Vygotsky's emphasis

- Lev Vygotsky highlighted the need young children have for a concerned, caring and knowledgeable adult.
- The preschool educator should understand the child's capabilities rather than simply provide information about the world.
- Activities should be neither too easy nor too difficult; otherwise children may lose interest or motivation.

Toddler • Preschool • Montessori

- **Toddler:** a child between about two and three years; the term refers to the characteristic jumpy walk.
- **Preschool child:** ready to experience environments beyond the family.
- Preschool/nursery teachers require specialised preparation.
- **Montessori schools:** based on principles of early childhood education associated with Maria Montessori.

More guiding principles

- Blend textual and cultural sources.
- Use local materials, arts and knowledge.
- Developmentally appropriate practices, flexibility and plurality.
- Health, well-being and healthy habits.
- These principles support learning through children's experiences, culture, play and everyday interactions.

Activity 2 • childhood story

- Recall a story from childhood that you enjoyed.
- Write who told you the story, what you liked about it, and which character you liked best and why.
- The classroom activity encourages sharing memories and learning about other families, cultures and communities.

India • Anganwadi & ICDS

- The Government of India addresses the needs of this age group through preschool education offered through **anganwadis** under the **Integrated Child Development Services (ICDS)**.
- Anganwadis operate in both urban and rural areas.
- ECCE institutions should understand the child's cultural context and work with, rather than against, the family.

Role of the adult

- Teachers/helpers working with very young children need training in safety, feeding, toilet habits, language development, social-emotional needs and learning.
- For preschool children, the focus shifts toward interesting and stimulating opportunities, natural phenomena and physical, language, social-emotional and other learning experiences.
- Adults should provide guidance while respecting children's capabilities and individual differences.

Key idea

- **Child-centred + play-based + experiential + culturally responsive** learning is central to the chapter's description of ECCE.
- Young children learn naturally; preschool experiences enhance exposure to people, environments and materials and help prepare children for formal schooling.

CAREER IN ECCE • SCOPE • PRACTICALS

Professional skills, training routes, employment areas, services and practical activities

Skills of an ECCE professional

- Interest in children and their development.
- Knowledge of the needs and capabilities of young children.
- Capacity and motivation for interacting with children.
- Skills for creative and interesting activities across areas of development.
- Enthusiasm for story-telling, exploration, nature and social interaction.
- Willingness to answer children's queries.
- Capacity to understand individual differences.
- Energy and readiness for physical activity for considerably long periods.

Scope of ECCE

- Teacher in a nursery school.
- Caregiver in a crèche.
- Member of a team working on programmes for young children.
- Government and NGO roles planning/promoting campaigns or services.
- Entrepreneur running a child-care/education programme.
- Programme coordinator or teacher trainer.
- Postgraduate study, doctoral research and senior professional activities.

Practical 1 • Activities for preschool children

- Visit a playground/open area and collect clean, safe, locally available low-cost/no-cost materials.
- Groups prepare an activity using colour, texture, number, shape, type of material or size.
- Example: sort leaves by size and shape and discuss the plants/trees they came from.
- Other possibilities include scenery, matching flowers, plant names, role play and discussion of animals that eat foliage.

Preparation for a career

- Study child development and basic principles of care.
- An undergraduate degree may include child/human development and/or child psychology.
- One-year diploma or Open University educational courses are options for entering the field soon after schooling.
- Nursery Teacher Training is another training route mentioned in the chapter.
- An effective specialist should be open and interactive with children and aware of community and culture.

Common services

- Crèches.
- Day care centres.
- Nursery schools.
- NGOs.
- ICDS.
- Training institutes.
- These services provide different forms of care, education, support and professional opportunities for young children.

Practical 2 • Teaching aid / puzzle

- Use indigenous and locally available material to prepare teaching aids.
- Make a puzzle using used cardboard boxes or old notebook covers.
- Draw two identical pictures, paint them brightly, attach one to the base, cut the other into four pieces and use the pieces as the puzzle.
- Pictures may include animals or locally available food articles such as mango or banana.

Additional professional abilities

- Administrative and management skills for record keeping, accounting and report writing.
- Effective communication and interaction with parents.
- Arts skills such as story-telling, dance, music and voice modulation.
- Ability to organise playful indoor and outdoor activities.
- Adaptability and flexibility because young children have shorter attention spans and needs can change quickly.

Careers listed in the chapter

- Nursery school teacher.
- Caregiver in day care centres and crèches.
- Team member for programmes for young children.
- Professional planning/promoting government or NGO campaigns/services.
- Entrepreneur in camps, edu-picnics, activity clubs and preschool education centres.
- Higher studies: postgraduate diploma/degree and later doctoral research.

Practical 3 • Puppets & masks

- Use stiff paper, newspaper, cloth, thread, leaves and flowers for colouring.
- Make a mask shaped like a sun, flower or animal and make a small puppet with cloth arms, legs and hair.
- Use puppets/masks for storytelling or role-play.
- Analyse what children can learn through the activity.
- The chapter notes that masks and puppets can promote language and socio-emotional development.

■ ONE-LINE REVISION: ECCE • Early Childhood (Birth–8 years) • Infancy • Crèche • Day Care • Preschool • Child-centred approach • Play-way • Experiential learning • ICDS/Anganwadi • NCF principles • ECCE skills • Careers • Practical play materials

CHAPTER 7 • MANAGEMENT OF SUPPORT SERVICES

Institutions & programmes for children, youth and elderly • Significance • Vulnerability • Key initiatives

Learning objectives

- Explain why services, institutions and programmes are needed for children, youth and elderly.
- Describe the aspects involved in management of institutions and programmes.
- Discuss the knowledge base and skills needed to manage and run institutions and programmes.
- Become aware of career opportunities available in this field.

Why support services are needed

- Family is the basic unit of society and normally meets members' needs.
- A family cannot always provide all specialised services needed for optimal growth and development.
- Schools, hospitals, universities, recreation centres and training centres provide specialised/support services.
- Some families lack resources or cannot access services; some children, youth and elderly are separated from families.
- Government and society therefore have a responsibility to support people in difficult circumstances.

Vulnerable groups

- Children, youth and elderly are described as vulnerable groups because they are more likely to be affected by adverse circumstances.
- A person becomes vulnerable when important needs are not met in daily life.
- Programmes may target a specific need or use a holistic approach addressing several needs together.
- The chapter links holistic intervention with meeting the individual's needs together for greater impact.

Why children are vulnerable

- Childhood is a period of rapid development in all domains; development in one area influences others.
- Children need food, shelter, health care, love, nurturance and stimulation in a holistic manner.
- Adverse experiences can have lasting effects on development.
- Children in difficult circumstances may lack food, health, care and nurturance, limiting their potential.
- Some children are especially vulnerable when exposed to homelessness, abuse, exploitation, trafficking, conflict or lack of family care.

Juvenile Justice • key idea

- The chapter discusses the Juvenile Justice (Care and Protection of Children) Act, 2000.
- It addresses children 'in conflict with law' and children 'in need of care and protection'.
- The framework emphasises care, protection, treatment, development needs, child-friendly adjudication and rehabilitation.
- Children needing care/protection include abandoned, street, runaway, missing, abused, exploited, trafficked and other specially vulnerable children.

Major child initiatives

- **ICDS:** integrated health, nutrition, stimulation and early learning/education for children below six years.
- **SOS Children's Villages:** family-based long-term care for orphaned/abandoned children.
- **Government Children's Homes:** care for children aged 3–18 years in state custody.
- Three types: Observation Homes, Special Homes, and Juvenile/Children's Homes.

ICDS • remember

- Services include preschool education for ages 3–6.
- Supplementary feeding for children below six and diet support for pregnant/nursing mothers.
- Growth monitoring and basic healthcare such as immunisation and vitamin A supplements.
- Services are delivered through anganwadi childcare centres.

Adoption

- Adoption beyond the family has been institutionalised and legalised.
- Government provides policy/support; NGOs help provide delivery systems.
- **CARA** (Central Adoption Resource Authority) was constituted to provide guidelines and safeguard children's welfare and rights.

Children's Homes

- **Observation Homes:** temporary stay during investigation and tracing of family.
- **Special Homes:** custodial care for juveniles found guilty of violating law.
- **Juvenile/Children's Homes:** for children whose families cannot be traced, are unfit/dead, or unwilling to take them back; government provides room, board, education and vocational training, often with NGOs.

YOUTH & ELDERLY • PROGRAMMES AND SUPPORT

Youth vulnerability, national programmes, elderly needs, ageing concerns and service models

Why youth are vulnerable

- National Youth Policy, 2014 defines youth as persons aged 15–29 years; 13–19 years are adolescents.
- Biological changes affect well-being and identity while young people prepare for adult roles such as livelihood and marriage.
- Peer pressure and pressure to excel can create stress and turmoil.
- Lack of positive support may contribute to maladaptive coping such as substance abuse.
- Sexual and reproductive health risks and limited ability to make informed choices are also concerns.

Youth programmes • NSS

- **National Service Scheme (NSS):** involves college students in social service and national development.
- Activities include roads/buildings repair, village ponds/tanks, environmental improvement, hygiene/sanitation, family welfare, child-care, immunisation, vocational training and relief/rehabilitation.
- Purpose: contribute to community development and support economically/socially weaker sections.

Why elderly are vulnerable

- In India, the chapter treats Senior Citizens as persons aged 60 years and above.
- Health becomes a major concern due to reduced physiological reserves and defence mechanisms.
- Ageing may involve low vision/blindness, deafness, reduced mobility and difficulty in self-care.
- Some elderly experience loneliness, isolation and financial dependence.
- Nuclear families, limited time/space and changing family structures can reduce support.

Especially vulnerable youth

- Rural and tribal youth.
- Out-of-school youth.
- Adolescents, particularly female adolescents.
- Youth with disabilities.
- Young people in difficult circumstances such as victims of trafficking, orphans and street children.

National Service Volunteer Scheme

- Provides opportunities to students who have completed their first degree to work full-time for a short period, mainly through Nehru Yuva Kendras.
- Activities include adult education, youth clubs, work camps, youth leadership, vocational training, rural sports and games.
- Also supports non-student rural youth through literacy, numeracy, functional capability and development opportunities.

Elderly: positive perspective

- The chapter notes that old age is not only about problems and difficulties.
- Many older people continue to live fulfilling lives and remain respected and active.
- Their experience and residual capacities can be used as a human resource for society.
- Government adopted the **National Policy for Older Persons in 1999**.

What youth need

- Appropriate education and training.
- Gainful employment and opportunities for personal development.
- Suitable shelter and a clean environment.
- Quality basic health services and social defence/protection from exploitation.
- Participation in decision-making on youth and socio-economic/cultural issues.
- Access to sports, physical education, adventure and recreation.

Other youth programmes

- **Promotion of Adventure:** mountaineering, trekking, hiking, exploration, canoeing, sailing, swimming, cycling and related activities.
- **Scouts & Guides:** character, loyalty, thoughtfulness, physical/mental development and social service.
- **Commonwealth Youth Programme:** youth participation in development and cooperation among Commonwealth countries.
- **National Integration:** visits, camps and seminars across culturally different regions.

Special features mentioned

- Majority of elderly people were reported as living in rural areas, creating service-delivery challenges.
- Feminisation of the elderly population.
- Increase in the number of 'older-old' persons above 80 years.
- A significant proportion was reported below the poverty line.
- These features create additional considerations for service planning.

ELDERLY SERVICES • CAREER PREPARATION • REVISION

Programmes, management skills, education routes, career avenues, key terms and practicals

Programmes for elderly

- Basic-needs programmes: food, shelter and health care for destitute elderly.
- Intergenerational relationship programmes.
- Active and productive ageing programmes.
- Institutional and non-institutional care/services.
- Research, advocacy and awareness programmes.
- Old age homes; respite and continuous care homes.

Specialised elderly services

- Multi-Service Centres: daycare, education, entertainment, healthcare and companionship.
- Mobile Medicare Units for rural/isolated areas.
- Day-care for Alzheimer's/dementia patients.
- Helplines and counselling centres.
- Mental health care, disability care, hearing aids and physiotherapy.
- Caregiver training and awareness/sensitisation programmes.

National Old Age Pension Scheme

- **NOAPS** is described for destitute older persons without regular means of subsistence from themselves or family.
- The chapter states beneficiaries should be above 65 years and provide proof of age and destitute status.
- State governments may add to the amount from their own resources.

Preparing for a career

- You may manage activities in an existing institution/programme or establish a new organisation/programme.
- The career requires broad knowledge plus multiple skills of a planner, manager, evaluator and possibly entrepreneur.
- Understand needs, characteristics and modes of caregiving of the target group.
- Build knowledge of children, youth and elderly through Home Science/Family and Community Sciences, Social Work or related social sciences.
- Further learning may be through regular, Open and Distance learning.

People skills

- **Community:** involve people for whom the programme is intended; participatory planning, management and implementation are key.
- **Private sector:** interact with financial institutions, companies and organisations supporting programmes.
- **Government officials:** understand funding and legal requirements.
- **People within the organisation:** maintain harmonious, cordial interpersonal relationships.

Administrative skills

- Basic understanding of finances, recruitment, renting space, equipment, records and stocks.
- When establishing a new organisation: decide location, target beneficiaries, services, finances and staffing.
- Handle registration formalities and programme implementation.
- Improve activities using periodic evaluation and feedback.
- Have a clear vision of what the organisation should achieve for the target group.

Education & scope

- Undergraduate degree in Home Science/Family and Community Sciences, Social Work or another social science is suggested.
- Open/Distance learning can complement regular study.
- Examples mentioned: Certificate Programme in NGO Management and Diploma in Youth Development Work.
- Career avenues include setting up an institution, managing an established programme, working at any functional level, or researching/assessing/evaluating programmes.

Key terms

- Children • Youth • Elderly • Vulnerable
- Difficult and challenging circumstances
- People skills
- Administrative skills
- **Exam focus:** know why each group is vulnerable, their needs, major programmes and the skills needed to manage support services.

Practicals

- **Practical 1:** 5–6 students create and enact a 15-minute joint-family role play on care and welfare of the elderly.
- **Practical 2:** make a small illustrated booklet of four-line poems on environment, birds, animals, water or nature using 4–5 cards.
- Practical 1 analyses the elderly's role in family/society and well-being; Practical 2 promotes young children's language development through play material.

■ ONE-LINE REVISION: Family + specialised community services → vulnerable children/youth/elderly → protection & welfare programmes → management requires people + administrative skills → careers in institutions, programmes, research and evaluation.

CHAPTER 8 • DESIGN FOR FABRIC AND APPAREL

Concept of design • Elements • Colour • Texture • Line • Shape/Form • Patterns

Learning objectives

- Discuss the concepts of design.
- Recognise the elements that constitute design.
- Explain the application of design principles for fabric and apparel.
- Understand how a student can prepare for a career in the field.

Elements of design

- Elements are the tools of art.
- **Colour** — visual identity, mood, season, culture and occasion.
- **Texture** — visual and tactile quality.
- **Line** — direction, movement and outline.
- **Shape/Form** — 2-D or 3-D structure.
- **Pattern** — grouping/arrangement of shapes.

Value & intensity

- **Value:** lightness/darkness of a hue. White has maximum value; black the least.
- **Tint:** hue approaching white.
- **Shade:** hue approaching black.
- **Chroma/Intensity:** brightness or purity of colour; dullness can result from blending with another colour, especially its opposite.

What is design?

- Design is not mere decoration.
- It is planning and creation of an article for a specific purpose.
- A well-designed object integrates aesthetic appeal with utility.
- Design can be understood as harmony in form and as the human power to conceive, plan and realise useful products.
- A good design considers materials, price, colour and service.

Principles of design

- The rules governing how design elements are mixed appropriately.
- **Proportion • Balance • Emphasis • Rhythm • Harmony**
- Successful combination of principles helps produce an appealing product.

Colour in fabric

- Colour may be added at fibre, yarn or fabric stage.
- Yarn dyeing can produce stripes, checks, plaids, chambray, brocade, Jacquard and Ikat.
- Fabric dyeing is common for solid colours and techniques such as tie-dye and batik.
- Painting, printing, embroidery and appliqué can also add colour/design at fabric stage.

Two aspects of design

- **Structural design:** depends on form rather than superimposed ornamentation. In fabrics it involves fibre/yarn processing and construction; in dress it refers to basic cut or silhouette.
- **Applied design:** is superimposed on the basic structure, such as dyeing, printing, embroidery, fancy needlework, trims and fasteners.

Colour • key idea

- Colour results from reflected visible light.
- VIBGYOR = Violet, Indigo, Blue, Green, Yellow, Orange, Red.
- Colour is described through **Hue, Value and Intensity/Chroma**.
- Primary: red, yellow, blue.
- Secondary: orange, green, violet.
- Tertiary/intermediate: a primary mixed with an adjacent secondary.

Pantone shade system

- Colour names can vary by region.
- Pantone Shade Cards give hues, tints and shades internationally recognised code numbers.
- They help in fashion forecasting and specifying textile orders, including international orders.

COLOUR HARMONY • TEXTURE • LINE • SHAPE

Colour schemes and the visual effects created by texture, lines and shapes

Related colour schemes

- **Monochromatic:** one hue varied in value and/or intensity.
- **Achromatic:** neutrals such as black and white.
- **Accented neutral:** one hue with a neutral/achromatic colour.
- **Analogous:** two or three hues lying side by side on the colour wheel.

Contrasting colour schemes

- **Complementary:** two hues directly opposite on the colour wheel.
- **Double complementary:** two pairs of complements, generally neighbouring pairs.
- **Split complementary:** a hue, its complement and a neighbour (or two neighbours of its complement).
- **Analogous complementary:** analogous colours with a complement selected for dominance.
- **Triadic:** three hues equidistant on the colour wheel.

Texture

- Texture is the sensory impression of sight and touch.
- It may be described by how it looks: shiny, dull, opaque, dense, transparent, translucent or glossy.
- How it behaves: limp, stiff, sticking out, clinging or flowing.
- How it feels: soft, crisp, harsh, smooth, rough, coarse or grainy.

What determines textile texture?

- Fibre content: type, length, fineness and surface characteristics.
- Yarn processing/type: processing method, twist, fineness and yarn type.
- Fabric construction: weaving, knitting, felting, braiding, lace-making etc.
- Finishes: starching/sizing/gumming, ironing, calendaring, tentering, napping and fulling.
- Surface ornamentation: tufting, flock printing, embroidery and stitched effects.

Line

- Line connects two points or forms an outline.
- It defines shape/silhouette, indicates movement and direction.
- **Vertical:** up/down movement; stresses height; severe/dignified/reserved effect.
- **Horizontal:** side-to-side movement; illusion of width; stable/placid effect.
- **Oblique/diagonal:** changes apparent width/height; active, startling or dramatic effect.

Curved lines

- Curves may be slight/restrained or strongly rounded/circular.
- Long flowing curves appear graceful and rhythmic.
- Large rounded curves can exaggerate size and add drama.
- Tiny puffy curves appear youthful and gay.
- Straight lines communicate force/strength/rigidity; curved lines are described in the chapter as soft/graceful.

Shapes / forms

- Shapes are made by connecting lines.
- **Natural:** copy nature or common man-made objects.
- **Stylised:** simplified/modified natural shapes; may distort or exaggerate parts.
- **Geometric:** mathematically formed or similar in appearance.
- **Abstract:** free-form; does not resemble a specific object.

Shape in fabric & apparel

- In fabric, shape/form relates to fall or drape, motifs, ornamentation and repeat/placement.
- In apparel, it represents silhouette, cut and final detailing.
- **Pattern:** formed when shapes are grouped together; arrangements can be natural, stylised, geometric or abstract.

Design activity

- **Activity 1:** collect fabric samples, printed paper, dress illustrations or room interiors and analyse colour harmonies by specifying hue, value and intensity.
- **Activity 2:** collect textile samples showing different textures; describe them and analyse the factors responsible.

PRINCIPLES OF DESIGN • COMPOSITION • CAREER

Proportion • Balance • Emphasis • Rhythm • Harmony • Composition • Career preparation

Proportion

- Concerns the relation of one part of an object to another.
- The chapter refers to the golden mean, with ratios such as 3:5:8 and 5:8:13.
- Applied to colour, texture, shape/form and garment sections.
- Equal horizontal divisions can make a person appear shorter/wider; unequal divisions can create a slimmer effect.
- Motif/print size and placement should relate to the wearer's figure.

Rhythm

- Repeating lines, colours or other design elements/details so the eye flows through the garment.
- **Repetition:** repeated embroidery, lace, buttons, piping or colour.
- **Gradation:** gradual increase/decrease in size of motifs, lines, buttons, colours or textures.
- **Radiation:** organised eye movement from a central point, e.g. gathers at waist/yoke/cuffs.
- **Parallelism:** parallel elements such as tucks, knife pleats or colour bands.

Preparing for a career

- Fabric and apparel design has expanded into broad areas because fabric and apparel are used beyond traditional clothing/household applications.
- A fabric designer needs knowledge of fibre characteristics, advantages, limitations and processing.
- Knowledge of dyeing properties and colour-application stages is important.
- Understanding design principles is essential.

Balance

- Equalling the distribution of weight from the central point of a garment.
- Must be balanced vertically and horizontally.
- Three forms: **formal, informal and radial**.
- Formal balance is based on symmetry and gives stability, dignity and formality, though it may become monotonous.
- Design elements such as line, form, colour and texture contribute to balance.

Harmony

- Harmony/unity occurs when all design elements come together pleasingly.
- Harmony by shape means areas of a garment reflect compatible shapes.
- Harmony by texture means the textures of different garment pieces work together.
- The chapter gives salwar-kurta-dupatta as an example where mismatched textures can interrupt harmony.

Education & scope

- Institutes offer long- and short-term courses leading to certificate, diploma, associate or bachelor's degrees.
- Design is a vibrant, varied and dynamic creative sector.
- Textile/fabric designers need awareness of changing trends and styles and the ability to create fresh/current designs.

Emphasis

- The focal point or area that first attracts the viewer's eye.
- Can be created through colour, design lines, detailing or accessories.
- Contrasting colours, unusual shapes, lines and textures can create emphasis.
- Details around the face can be especially effective as a focal point.

Composition

- An artwork/concept developed by arranging design elements and applying design principles in a given space.
- The creator can select two or three principles suited to the final artwork.
- It may be **2-dimensional** or **3-dimensional**.

Work opportunities

- Textile designers may work in industry, research and textile companies, fashion houses, design agencies or as freelancers.
- Apparel-fashion textile designs may have quicker turnaround than furnishing designs.
- The chapter presents fabric/apparel design as a career and entrepreneurial field.

PRACTICALS • EXAM REVISION

Tie & dye • Batik • Block printing • Key terms • Review questions

Practical 1 • Tie & Dye

- **Theme:** Preparation of articles using applied textile design technique (Tie and Dye).
- Resist dyeing uses thread, fabric pieces, clay or wax; tying with thread is a common method.
- Bandhani/bandhej creates dot patterns; laheria creates diagonal stripes. Gujarat and Rajasthan are noted in the chapter for these fabrics.
- Techniques: knotting, marbling, binding, tritik/sewing and folding.
- After tying, dye small white cotton samples using a simple dyeing method.

Practical 2 • Batik

- **Theme:** Preparation of articles using applied textile design technique (Batik).
- Batik is resist printing in which wax is applied to fabric before dyeing.
- Wax confines colour to unwaxed areas; cracks in wax can allow colour to enter and create the characteristic batik effect.
- Fabric must be free from dirt/grease and stretched on a frame.

Key terms

- Design • Structural design • Applied design
- Elements of design • Colour • Texture • Line
- Form/Shape • Pattern
- Principles of design • Harmony • Proportion • Rhythm • Balance • Emphasis
- Hue • Value • Intensity • Spectrum • VIBGYOR

Tie & dye techniques

- **Knotting:** produces shaded circular patterns; fine fabric gives best results.
- **Marbling:** gather into a ball or twist/coil and tie for irregular cloud-like effects.
- **Binding:** tightly bind parts in dots, bands, lines, criss-cross or spiral; can create laheria and bandhej effects.
- **Tritik/sewing:** tacking stitches are pulled tight to create dotted bands.
- **Folding:** pleats/squares/triangles are held by binding/clips; creates symmetrical stripes, bands or squares.

Batik • process

- Two wax types described: lighter paraffin wax and darker, more adhesive beeswax; proportions can be varied for crack effects.
- Wax application methods: painting, outlining, dry brushing and scratching.
- Dye below 35°C using ice/batik colours.
- Multiple colours can be created through repeated wax application/removal and dyeing.
- Wax is removed after drying by freezing/crushing, hot pressing between absorbent paper and final boiling/soaping.

Review questions

1. What do you understand by the term 'design'?
2. What factors affect the texture of a fabric during manufacture?
3. How does colour application at different stages affect fabric design?
4. What are the different types of lines and shapes? How do they create different effects and moods?
5. How do you achieve rhythm and harmony in dress?

Tie & dye purpose

- Learn the concept and processes of tie and dye.
- Develop eye-hand coordination.
- Understand curves and shades in patterns.
- Before tying, wash the cloth in hot soapy water so dye is absorbed evenly.

Practical 3 • Block printing

- Block printing is an old method of applying designs to fabric.
- A separate block is used for each colour; raised design areas receive the dye paste while background is carved away.
- Blocks are mainly wood; metal may reinforce parts.
- Blocks can have single motifs, borders or all-over patterns.
- Print on firmly secured fabric over a padded/protected table; for multicolour blocks, outline is printed in the darkest colour first, then lighter filling blocks.

■ One-page revision

- **Design = utility + aesthetics.**
- **Elements:** colour, texture, line, shape/form, pattern.
- **Principles:** proportion, balance, emphasis, rhythm, harmony.
- **Colour:** hue + value + intensity; primary → secondary → tertiary.
- **Career:** fibre/dyeing knowledge + design principles + trend awareness.
- **Practicals:** tie & dye → batik → block printing.

CHAPTER 9 • FASHION DESIGN AND MERCHANDISING

Fashion fundamentals • Fashion cycle • Merchandising • Target market • Retailing

Learning objectives

- Explain the significance of fashion design and merchandising in the garment industry.
- Describe the fundamentals of fashion.
- Explain the knowledge and skills required to be in the fashion business.
- Discuss how a student can prepare for a career in the fashion industry.

Significance

- Fashion design and merchandising help understand how the fashion business works.
- It includes processes involving raw materials, apparel, accessories and retail stores.
- It also involves textiles—fabrics and the fibres used to make them.
- Fashion merchandising helps determine what, why and when a style becomes fashion and its suitability for a retail operation.
- In simple terms: **planning, buying and selling.**

Basic concepts

- Fashion is a large business involving design, manufacturing, distribution, marketing, retailing, advertising, communication, publishing and consulting.
- Understanding the nature of fashion and factors affecting it is essential for understanding fashion design.
- The chapter traces fashion from historical trading and custom-made clothing to ready-to-wear and modern merchandising.

Fashion terminology

- **Fashion:** style or styles most popular at a given time.
- **Style:** a particular look or characteristic in apparel/accessories; a style may go in and out of fashion, but the specific style remains.
- **Fad:** short-lived fashion that can come and go in one season and lacks lasting consumer attention.
- **Classic:** a style that remains accepted for an extended period, usually because of simplicity.

Fashion development

- Ancient/medieval styles could remain practically unchanged for long periods.
- During the Renaissance, exposure to different cultures, customs and costumes accelerated fashion change.
- New fabrics and ideas increased demand for new styles.
- Fashion history helps designers make decisions for present and future fashions; past ideas are often reinterpreted.

France — centre of fashion

- France's dominance over international fashion began in the early 18th century.
- Louis XIV's court became a trendsetter and Paris became a European fashion capital.
- Couture = art of dressmaking.
- Couturier = male designer; couturière = female designer.
- Industrial Revolution brought technological advances such as the spinning jenny and power looms.

Industrial & social changes

- Rapid trade and industry helped create a middle class able to spend on better clothing.
- The sewing machine transformed handcraft into an industry.
- In 1859, Isaac Singer developed the foot treadle, freeing both hands to guide fabric.
- Affordable fashion spread through fairs, bazaars, general stores and growing retail stores.

Denim & separates

- In 1849, fabric intended for tents and wagon covers was used by Levi Strauss to make durable trousers with tool pockets; these became denims.
- Women began wearing separate skirts and blouses in the 1880s, helping the development of ready-to-wear clothing and mix-and-match wardrobes.

Prêt-à-porter

- Ready-to-wear clothing became a major alternative to couture.
- The chapter describes prêt-à-porter as factory-made clothing sold finished in standardised sizes, unlike bespoke/made-to-measure haute couture.
- Yves Saint Laurent is credited in the chapter as the first French haute couturier to produce a full prêt-à-porter line.

FASHION EVOLUTION • THE FASHION CYCLE

Introduction → rise → acceptance/peak → decline → rejection

Fashion cycle

- Fashion moves in a cycle; the way fashion changes is described as the fashion cycle.
- The cycle is represented by a bell-shaped curve of time and sales.
- The chapter's stages are introduction, increase in popularity, peak of popularity, decline in popularity and rejection/obsolescence.

3 • Peak of popularity

- When fashion reaches its highest popularity, demand can become strong.
- Many manufacturers may copy or adapt the style at different price levels.

Fashion merchandising

- Fashion merchandising is the planning required to have the **right merchandise, right time, right place, right price and right sales promotion**.
- A fashion merchandiser facilitates conversion of inspiration into design and uses technology to plan production, promotion and distribution.
- The goal described is to meet consumer needs and demands while planning effectively.

1 • Introduction

- Designers interpret research and creative ideas into apparel and offer new styles to the public.
- Designs are created by changing elements such as line, colour, shape, fabric and details and their relationships.

4 • Decline in popularity

- After many copies are mass-produced, fashion-conscious consumers may tire of the style and look for something new.
- Declining styles may be placed on sale racks in retail stores.

Manufacturing role

- A merchandiser contributes to selecting fabrics.
- Knowledge of fabric history and socio-cultural context helps translate a designer's vision into reality.
- The merchandiser considers clothing construction, price and target market while determining how an item can be manufactured.

2 • Increase in popularity

- As a new fashion is purchased, worn and seen by more people, it may rise in popularity.
- Growing consumer acceptance is reflected through increased sales.

5 • Rejection / obsolescence

- Some consumers turn to new looks.
- This begins another fashion cycle.
- Thus, fashion continually changes through cycles of acceptance and rejection.

Buying • Promoting • Selling

- **Buying:** select fashion items with awareness of target market and trend forecasting.
- **Promoting:** use fashion shows, visual merchandising and other promotional methods to attract buyers and identify target markets.
- **Selling:** sell to stores/consumers, advise on production and display; retail merchandisers buy and present fashion items in stores.

LEVELS OF MERCHANDISING • TARGET MARKET

Retail organisation • Buying agency • Export house • Market segmentation • Consumer demand

1 • Retail organisation merchandising

- Specialised management function within fashion retail.
- Moves fashion from designers' showrooms to retail sales floors and consumers.
- Internal planning ensures adequate merchandise is available and sold at acceptable prices for a profitable operation.

2 • Buying agency merchandising

- Provides goods-buying consultancy and acts as a procurement office for buyers.
- Helps exporters save cost and time.
- Buying agent identifies vendors, negotiates costs, checks in-process quality and performs pre-shipment quality inspection.

3 • Export house merchandising

- Two types: **buyer merchandiser** and **production merchandiser**.
- Buyer merchandiser links buyer and manufacturer and handles sourcing, sampling and communication.
- Production merchandiser links production with buyer merchandisers and ensures production follows schedule and buyer requirements.

Target market

- Category of consumers targeted for selling a product.
- Understanding the target market helps sales focus on consumers most likely to purchase.
- It also helps in allocating marketing/sales expenditure.

Market segmentation

- Dividing a larger market into subsets of consumers with common needs/applications for goods and services.
- **Demographic:** population, age, sex, occupation, education, income.
- **Geographic:** cities, states, regions; climate can affect clothing choices.
- **Psychographic:** lifestyle, activities, interests, leisure pursuits, needs and wants.
- **Behavioural:** opinions/usage of products and services.

Consumer demand

- A merchandiser needs to interpret consumer demand.
- This requires understanding customers' buying motivations.
- Market segmentation helps identify groups with common needs and behaviours.

Merchandising rights

- **Right Merchandise:** shelves contain what customers want.
- **Right Place:** merchandise is accessible in the right location.
- **Right Time:** seasonal merchandise is available when needed.
- **Right Quantity:** balance sales volume and inventory.
- **Right Price:** enough for store profit while meeting competition/customer expectations.
- **Right Promotion:** balance investment and customer appeal.

Fashion retail organisations

- **Small single-unit store:** neighbourhood, owner/family operated store.
- **Department store:** separate departments such as clothing, sporting goods, automotive, health/beauty and electronics; some also sell food.
- **Chain store:** outlets sharing a brand and central management, usually with standardised business methods.

Major retail divisions

- **Merchandising:** buying, merchandise planning/control, selling, fashion coordination.
- **Sales & promotion:** advertising, visual merchandising, special events, publicity, PR.
- **Finance & control:** credit, accounts payable, inventory control.
- **Operations:** facilities, merchandise protection, personnel, customer service, receiving/marketing.
- **Personnel/branch division:** may be separate in very large operations.

CAREER • SCOPE • PRACTICAL • EXAM REVISION

Forecasting • Analysis • Communication • Education • Career options • Croquis

Preparing for a career

- The chapter identifies three primary skills for fashion designers, merchandisers and marketers.
- **Forecasting ability:** understand past/current/future trends and how marketing contributes to them; stay ahead of trends.
- **Analytical ability:** analyse economic conditions, company economics, consumer budgets and factors affecting profitability.
- **Communication ability:** negotiate prices, sell fashion choices and write advertising copy, press releases and letters.

Career options

- **Visual Merchandise Designer:** window displays, merchandise arrangement, props/accents, clothing placement, mannequin styling and marketing campaigns.
- **Fashion Designer:** creates clothing/apparel designs; may work with established designers or manage own label.
- **Set Designer:** designs for movies, television, theatre, trade shows and museums.
- **Interior Designer:** combines form and function to improve beauty, safety and functionality of spaces.

Sketching • exact steps

1. Draw a central line measuring 10 heads; one head = 1 inch.
2. Divide it into 10 parts.
3. Eye line — $\frac{1}{2}$ head.
4. Shoulder line — $1\frac{1}{2}$ heads.
5. Bust line — just below 2.
6. Waist line — just below 3.
7. Hip plane — $3\frac{1}{4}$ heads.
8. End of torso — a little above $4\frac{1}{2}$ heads.
9. Knees — $6\frac{1}{2}$ heads.
10. Ankles — above or at 9.
11. Join levels to develop the form; 12. use croquis for design ideas; 13. practise at least 5 croquis with different head measurements.

Education

- Fashion designers typically need an associate or bachelor's degree in fashion design; some combine it with business, marketing or fashion merchandising.
- Programmes may offer certificates, diplomas, associate's or bachelor's degrees.
- The chapter states certificate/diploma programmes can usually take 6 months–1 year.
- It describes fashion merchandising-related master's programmes as 2-year programmes and bachelor's programmes as 4-year programmes.

Practical 1 • Female fashion figure

- **Theme:** Developing a female fashion figure.
- **Task:** learn sketching of a fashion figure and proportions.
- **Purpose:** understand body-part proportions and create a form for communicating apparel design ideas.
- **Croquis:** outline/rough sketch; constructed using the head as the unit of measurement.
- Fashion figure is $8\frac{1}{2}$ –10 heads full size according to the chapter.

Key terms

- Fashion • Style • Fad • Classic • Couture
- Mass production • Fashion Cycle • Fashion Merchandising
- Target market • Buying houses/agencies • Export houses
- Market segmentation • Retail organisations

Scope

- Fashion professionals may specialise in areas such as interior designing, merchandise displays, clothing/apparel and theatre sets.
- Fresh ideas are important because market and fashion trends continually change.
- The chapter notes that about one-third of professional fashion designers are self-employed.

Croquis proportions

- Shoulders are widest; waist is smallest; hips are between the two.
- Horizontal guidelines: shoulderline, bustline, waistline, hip plane, end of torso.
- Vertical guidelines: centre front, armhole, princess.
- Requirements: sketch file and pencils.

Review questions

1. Outline the major developments in fashion.
2. Identify and explain the various stages of fashion cycle.
3. What is fashion merchandising?
4. Describe various levels of merchandising.
5. Explain target market and customer motivations in interpreting consumer demand.
6. Enumerate knowledge and skills needed by fashion designer and merchandiser.
7. What advice would you give someone pursuing fashion designing and merchandising?

CHAPTER 10 • CARE AND MAINTENANCE OF FABRICS IN INSTITUTIONS

Fabric care • Laundry equipment • Washing • Drying • Ironing & pressing

Learning objectives

- Discuss the significance of care and maintenance of fabrics and textile products.
- Describe the concept of care and maintenance of fabrics in hospitals and hotels.
- Explain the process and various equipment required and their usage.
- Discuss how a student can prepare for a career in this field.

Laundry = science + art

- Clean, fresh, hygienic clothes and spotless, crisp household linen are outcomes of successful laundering or dry-cleaning.
- **Science:** based on scientific principles and techniques.
- **Art:** application requires skills to produce aesthetically pleasing results.

Why fabric care matters

- Fabrics are used for apparel, household purposes and also for industrial purposes, institutional interiors, heat/sound insulation, bandages and masks.
- Specific fabrics are selected for specific usage and functionality.
- Care helps retain the required characteristics for the expected life of the material and prolong serviceability.

What affects fabric care?

- Fibre content
- Type of yarn
- Fabric construction techniques
- Finishes given to fabrics
- Purpose for which the fabric is used

Two aspects of care & maintenance

- **1. Physical care:** keeping the material free of physical damage and rectifying damage that may occur during use.
- **2. Appearance care:** retaining or refreshing appearance by removing stains and dirt and retaining textural and visual characteristics.

Main equipment groups

- **A. Washing equipment**
- **B. Drying equipment**
- **C. Ironing/pressing equipment**
- At household level, washing may be manual using buckets, basins, bowls, scrubbing boards and brushes; basic washing machines may also be used.

WASHING EQUIPMENT • WASHING MACHINES

Top loading • Front loading • Two tub • Automatic, semi-automatic and manual operation

Machine models

- **Top loading:** garments are put into the machine from the top.
- **Front loading:** garments are put in from the front side.
- **Two-tub machine:** shown in the chapter alongside top- and front-loading models.

Automatic washer operations

1. Filling up water.
2. Water-level control — automatic or manual.
3. Regulation of water temperature using button, dial or panel.
4. Washing — fabric is kept moving in washing solution so dirt can be carried away.
5. Rinsing.
6. Water extraction.

Rinsing

- Rinsing is an important phase of the wash cycle.
- If rinsing is not thorough, clothes may look grey and dull and may have a harsh texture.

Fully automatic

- Has a single time setting/control arrangement for each use.
- Controls water filling, water temperature, wash cycle and number of rinses.
- No further operator intervention is required.

Washing methods

- **Agitation:** used in top-loading machines; blades rotate or oscillate, creating a current that forces water into fabric.
- **Pulsation:** used in top-loading machines; a vertical pulsator moves very rapidly.
- **Tumbling:** used in front-loading machines; perforated horizontal cylinder revolves and carries clothes up before dropping them into wash water.

Water extraction

- Water is extracted after washing and after each rinse.
- **Spinning:** above 300 rpm; centrifugal force throws water out and it is pumped to the drain.
- **Bottom-drain:** machine drains through perforated tub bottom, then spins to remove remaining water.
- **Combination:** bottom draining occurs during spin; described as providing the best extraction.

Semi-automatic & manual

- **Semi-automatic:** requires operator intervention at frequent intervals; rinse water must be filled and drained with each cycle; generally two-tub machines.
- **Manually operated:** 50% or more of the work is done manually by the operator.

Agitator materials & speed

- Depending on machine size and fabric type, agitators may be plastic, aluminium or bakelite.
- They should not be affected by detergents, bleaches or softeners.
- Agitation speed can be varied according to fabric type.

Important speed fact

- Spin speed can vary from **333–1100 rpm**.
- Near-dry spinning is avoided because it may create wrinkles difficult to remove.
- Optimum speed given in the chapter: approximately **600–620 rpm**.

DRYING • IRONING • HOT PRESSING

Commercial/institutional drying systems and household ironing equipment

Drying equipment

- Besides open-air drying, driers are used at commercial and institutional levels.
- The chapter describes two air-circulation systems.

Ironing

- Ironing smoothen wrinkles created through use or washing.
- Irons have a smooth metal surface that can be heated.
- Most electric irons have an inbuilt thermostat to adjust temperature for the fabric.
- Some irons can produce steam during use.

Dryer system A

- Relatively low-temperature air is circulated at high velocity.
- Room air enters below the front panel, passes over the heat source, moves through clothes and leaves through an exhaust.
- Room temperature and humidity stay normal.

Hot pressing

- Pressing helps create/restore creases such as those in sleeves, trouser legs and pleated skirts.
- The iron's weight may range from 1.5–3.5 kg.
- Lightweight irons are preferred at household level; heavier articles such as curtains and bed covers may require heavier irons.

Dryer system B

- High-temperature air is circulated slowly.
- Air passes over the heat source, is drawn through perforations at the top, moves downward through clothes and exits through exhaust.
- Because air movement is slow, exhausted air has high relative humidity.

Charcoal iron

- Although most irons are electrically heated, charcoal irons are still seen in India.
- A charcoal iron is a metal box with a lid in which live coal pieces are placed to heat the iron.

COMMERCIAL LAUNDRIES • INSTITUTIONS

Household services • Dhobis • Laundry sections • Record keeping • Hospitals & hotels

Household & professional services

- Household laundry handles clothing and small daily-use articles.
- Larger household linen and special articles may be sent to commercial laundries.
- Individual professionals, often called **dhobis**, may collect materials for washing/ironing/finishing.
- They serve households and institutions such as student hostels, small hotels and restaurants.
- Special marked washing places are called **dhobighats**.

Commercial laundry equipment

- Commercial laundries use larger equipment in greater numbers.
- Washing machines may handle **100 kg or more** per cycle, compared with about **5–10 kg** in domestic machines.
- Other equipment includes hydro-extractors, driers, flat-bed ironing/pressing equipment, roller ironing and calendaring machines, folding/packaging tables and trolleys.

Commercial laundries

- Individual workers' services developed into laundries or dry-cleaning shops.
- Customers may be individuals or institutions.
- Large laundries may have multiple centres and may transport material to/from customers.
- Services can include washing, extraction, drying, pressing and ironing.

Record system

- When an article is received, it is checked.
- Damage and special care requirements are recorded.
- Customer receives an invoice showing kind and number of articles and delivery date.
- Code tags matching the invoice help identify each customer's items.

Specialised sections

- Hospital/institutional work and personal work may have separate sections.
- Dry-cleaning may be separate.
- Fibre-specific sections may handle woollens, silks and synthetics.
- Special articles may include blankets and carpets.
- Some laundries also offer dyeing and special finishes such as zari polishing.
- Inspection, sorting, mending, repairing and stain-removal pretreatment are also organised.

Institutions

- Large institutions needing a constant supply of clean linen, working clothes or uniforms—such as hospitals, prisons and hotels—usually have laundry departments.
- Organised collection, laundering and timely delivery are essential to operations.
- Hotels and hospitals are highlighted as institutions with in-house laundry and maintenance setups.

HOSPITALS vs HOTELS • LAUNDRY REQUIREMENTS

Hygiene & disinfection in hospitals • Aesthetics & finish in hospitality

Hospital laundry

- Main purpose: hygiene, cleanliness and disinfection.
- Some hospitals use disposables where infection is a threat; these are destroyed by burning.
- Most articles are cotton and dyed in colours specific to hospital/department with excellent wash-fastness.
- Blankets are woollen.
- Daily laundry emphasises cleanliness of cotton materials.

Hospital laundry process — 10 steps

1. Collection from Emergency, main OT, OPD, specialised centres and wards.
2. Transportation from linen bank or directly to laundry plant.
3. Unloading dirty linen and sorting.
4. Washing in large washing machines.
5. Hydro-extraction.
6. Drying.
7. Pressing, ironing, folding and stacking.
8. Mending and segregation of condemned articles.
9. Packing.
10. Distribution.

Hospital finishing

- Stubborn stains may not be treated.
- Finishing such as starching and whitening may not be included.
- Ironing and pressing may not be done to perfection.
- Repair/mending and condemnation of unusable material may or may not be part of the required service.

Hospital washing & extraction

- Large hospital washing machines have a capacity of about **100 kg per load**.
- Hydro-extractors work through centrifugal motion and remove about **60–70% moisture**.
- After drying, linen is pressed, ironed, folded and stacked before packing/distribution.

Hotel & restaurant laundry

- Hospitality places greater importance on **aesthetics and final finish**.
- Articles may contain different fibres.
- Starching, ironing, pressing and correct/perfect folding are emphasised.
- Guest personal laundry may also be handled.
- Smaller hotels may link with outside commercial laundries.

Hospital scale

- Large hotels may have up to 400–500 rooms.
- Larger hospitals may care for 1,800–2,000 beds or more.
- Sheets in OT, maternity and labour rooms may require 5 or more changes per day.
- Minimum linen stock: **six sets per bed**.
- A set normally includes bed sheet, draw sheet and pillow slip.
- Blankets are not changed daily unless soiled.

HOSPITAL LINEN • RECORDS • CAREER PREPARATION

What is laundered • Receipt system • Technical knowledge • Training

Hospital articles laundered

- Patient dress: gowns, kurta, pyjamas etc.
- Doctors' dress: coats, gowns, kurta and pyjama; generally a different colour from patients' dress and may be tericot.
- Other materials: table cloths and curtains.
- Blankets are generally not changed daily unless soiled.

Hospital record system

- As in commercial laundries, hospitals maintain records for collection and disbursement of material to each department.
- The chapter shows a **Receipt for Washable Linen** with receipt number, sender, date, time, item number, clothing name, quantity and remarks.

Receipt examples

- Bed sheet • Draw sheet (white/green)
- Patient's kurta & pajama
- Doctor's kurta, pajama & gown
- Towel split • Towel hand • Face mask
- Baby frocks • Blanket • Pillow cover
- Slings • Apron • Dirty linen bag

Preparing for a career

- The field of Care and Maintenance of Fabrics is a **technical field**.
- Knowledge of material: fibre content, yarn, fabric production technique, colour and finishes, especially their effect on care requirements.
- Knowledge of processes involved.
- Knowledge of chemicals and other reagents used and their effect on fabric.
- Working knowledge of machinery requirements and functioning.

Courses & practical training

- Laundry Management courses are generally short-term programmes.
- They may offer coaching, job-placement assistance, business-startup assistance and practical training with stipend in hi-tech laundry.
- Opportunities mentioned include airways, ships, railways, hotels and hi-tech hospitals.
- Because equipment and requirements differ by setup, practical training or internship is required.

Useful qualifications

- Qualifications in **Textile Science, Textile Chemistry, and Fabric and Apparel** would be extremely useful.
- These may be offered as specialisations within graduate-level Home Science programmes by institutions across the country.

SCOPE • KEY TERMS • EXAM REVISION

Entrepreneurship • Employment areas • Chapter review questions

Scope

- People specialising in Textiles and Clothing or Fabric and Apparel can enter entrepreneurial activities.
- Such services provide support for end users, especially in metropolitan areas where women are working outside the home.
- Nursing homes, small hospitals and day-care centres may need these services regularly.

Where can one work?

- Hi-tech laundries of railways
- Airways
- Shipping lines
- Hotels
- Hospitals
- Institutions and organisations with in-house fabric/textile care programmes

Key terms

- Laundry
- Washing
- Ironing
- Dry-cleaning
- Disinfection
- Washing machines
- Hydro-extractors
- Calendaring
- Tunnel washing systems

Review Q1–Q2

1. What are the two aspects of care and maintenance of fabrics?
2. What are the factors which affect the process of cleaning of fabrics?

Review Q3–Q4

3. How are the different sections organised in a commercial or institutional laundry?
4. What are the differences in processing laundry work in commercial laundries and hospital laundries?

Remember these comparisons

- **Hospital:** hygiene, cleanliness, disinfection.
- **Hotel:** aesthetics, final finish, starching, ironing, pressing and folding.
- **Commercial laundry:** specialised sections + record/invoice system.
- **Career:** material + process + chemicals + machinery knowledge.

Quick facts

- 333–1100 rpm: spin-speed range mentioned.
- 600–620 rpm: optimum spin speed given.
- 100 kg/load: large hospital/commercial machine capacity described.
- 60–70%: moisture removed by hospital hydro-extractor.
- Six sets per bed: minimum linen stock stated.

Practical 1 • Stain removal

- **Theme:** Care and maintenance of fabric products — Stain Removal.
- **Task:** remove ball pen, blood, coffee, tea, lipstick, curry, grease and ink stains.
- **Purpose:** identify the stain and apply the right treatment before washing.
- Use two 4" × 4" white cotton samples for each stain: treat one and keep one as the control.

Practical method

- The source directs the learner to refer to Chapter 17 of the Class XI HEFS textbook for care and maintenance of fabrics.
- After conducting the practical, stick the control and treated samples in the file.
- The source provides a stain-treatment table by stain, condition and fibre group: cotton/linen, silk/wool and synthetics.

PRACTICAL 1 • STAIN REMOVAL

Source table: treatment differs by stain, condition and fibre group

Blood

- **Fresh — Cotton & linen:** soak in cold water, then wash in dilute ammonia.
- **Fresh — Silk & wool:** sponge with cold water.
- **Fresh — Synthetics:** wash in cold water.
- **Old — Cotton & linen:** steep in cold water and salt until removed (1 oz to 2 pints).
- **Old — Silk & wool:** same as cotton; apply starch paste, dry and brush.

Grease

- **Fresh — Cotton & linen:** wash with hot water and soap.
- **Fresh — Silk & wool:** washable: same as cotton; unwashable: spread French chalk, brush after an hour.
- **Fresh — Synthetics:** same as silk and wool.
- **Old — Cotton & linen:** grease solvent such as petrol or methylated spirit, then wash with hot water and soap.
- **Old — Silk & wool / synthetics:** same as cotton.

Ball pen ink

- **Cotton & linen:** steep in methylated spirit, then wash with soap and water.
- **Silk & wool:** same as cotton.
- **Synthetics:** same as cotton.

Ink — fresh

- **Cotton & linen:** rub with cut tomato and salt, wash; or soak immediately in sour milk/curd for ½ hour; or apply salt and lime juice for ½ hour, then wash.
- **Silk & wool:** treat with sour milk or curd as for cotton.
- **Synthetics:** same as silk and wool.

Curry stain

- **Fresh — Cotton & linen:** wash with soap and water; bleach in sunlight and air.
- **Silk & wool:** same as cotton.
- **Synthetics:** same as cotton.
- **Old — Cotton & linen:** same as fresh, then bleach with javelle water.
- **Old — Silk & wool:** potassium permanganate and ammonia alternately.
- **Old — Synthetics:** bleach with sodium perborate.

Ink — old

- **Cotton & linen:** try fresh-stain methods with prolonged treatment; steep in dilute oxalic acid; rinse thoroughly with dilute borax.
- **Silk & wool:** same as cotton, plus rinse in dilute ammonia solution.
- **Synthetics:** same as silk and wool.

PRACTICAL 1 • LIPSTICK, TEA & COFFEE

Continuation of the source stain-removal table

Lipstick — fresh

- **Cotton & linen:** steep in methylated spirit and wash with soap and water.
- **Silk & wool:** same as cotton.
- **Synthetics:** same as cotton.

Lipstick — old

- **Cotton & linen:** moisten/soften with glycerine; leave briefly; rinse and wash with soap and water.
- **Silk & wool:** same as cotton.
- **Synthetics:** steep in kerosene or turpentine; wash with soap and warm water.

Tea & coffee — fresh

- **Cotton & linen:** pour boiling water through.
- **Silk & wool:** steep in warm water, then dilute borax solution ($\frac{1}{2}$ tsp to 2 cups water).
- **Synthetics:** steep in warm sodium perborate solution (1 tsp/pint).

Tea & coffee — old

- **Cotton & linen:** spread borax over and pour boiling water through; then steep in glycerine until removed.
- **Silk & wool:** steep in borax solution; treat with dilute hydrogen peroxide.
- The source table shown on page 203 contains the detailed treatments.

Practical record

- After conducting the practical, stick both the **control** and **treated** samples in your file.
- Remember: the source's procedures are organised by **stain + condition + fibre group**.

Exam focus

- Define the two aspects of fabric care.
- Differentiate washing methods: agitation, pulsation, tumbling.
- Explain water extraction methods.
- Compare hospital and hotel laundry.
- List the career requirements.
- Know the stain-removal practical and its purpose.

Source visual reference: the stain-removal table spans the practical pages 201–203; page 203 also gives the final note to preserve control and treated samples.

ONE-PAGE REVISION SHEET

Chapter 10 at a glance — high-yield definitions, processes and comparisons

Fabric care

- **Physical:** prevent/rectify damage.
- **Appearance:** remove stains/dirt and retain texture/visual characteristics.
- Care depends on fibre, yarn, construction, finishes and purpose.

Commercial laundry

- Specialised sections: washing, extraction, drying, pressing/ironing; may include dry-cleaning, fibre-specific, special articles, dyeing/finishes, inspection and pretreatment.
- Large machines may handle 100 kg+ per cycle.
- Records, invoices and code tags identify customers' articles.

10-step hospital process

- Collection → transportation → unloading/sorting → washing → hydro-extraction → drying → pressing/ironing/folding/stacking → mending/condemnation → packing → distribution.

Washing machine

- Models: top loading, front loading, two-tub.
- Operation types: fully automatic, semi-automatic, manually operated.
- Methods: agitation, pulsation, tumbling.
- Cycle: filling → water-level/temp control → washing → rinsing → extraction.

Hospital vs hotel

- **Hospital:** hygiene, cleanliness, disinfection; cotton dominates; infection-control disposables may be used.
- **Hotel:** aesthetics and final finish; starching, ironing, pressing and folding are emphasised; guest laundry may be handled.

Numbers to remember

- 333–1100 rpm: spin range.
- 600–620 rpm: optimum speed.
- 100 kg/load: large machine capacity.
- 60–70% moisture: hydro-extraction.
- 6 sets/bed: minimum stock.

Drying & pressing

- Two dryer circulation systems: low-temp/high-velocity and high-temp/slow circulation.
- Ironing removes wrinkles.
- Pressing creates creases.
- Electric irons commonly have thermostats; steam may be available.

Career

- Technical field.
- Need knowledge of material, processes, chemicals/reagents and machinery.
- Short-term Laundry Management courses and practical training/internship are mentioned.
- Scope: entrepreneurship and hi-tech laundries in railways, airways, shipping, hotels and hospitals.

Final exam checklist

- ✓ Two aspects of care
- ✓ Factors affecting cleaning
- ✓ Washing machine classifications
- ✓ Washing methods
- ✓ Extraction methods
- ✓ Commercial laundry organisation
- ✓ Hospital process
- ✓ Hospital vs hotel
- ✓ Career preparation & scope
- ✓ Stain-removal practical

CHAPTER 11 • HOSPITALITY MANAGEMENT

Hospitality industry • Guest cycle • Front office • Housekeeping • Food & beverage • Careers

Learning objectives

- Explain the importance of hospitality management.
- Explain the functioning of food and beverage departments of the hospitality industry.
- Describe the functioning of housekeeping department.
- Discuss the functioning of front office in hospitality industry.
- Know the various career opportunities available in this field.

Hospitality — meaning

- Hospitality is the relationship between the guest and the host.
- It includes friendly and generous reception/welcoming, entertainment and services delivered with warmth and courtesy.
- It provides accommodation, food, entertainment and other facilities to make the stay comfortable.

Why hospitality matters

- Guests expect to be greeted and served properly.
- Indian culture regards guests as God-like, expressed through “Athithi Devo Bhava”.
- Modern trade and commerce have created a need for paid hospitality services.
- The industry aims to make guests feel comfortable, safe and cared for.

Types of establishments

- **Hotel:** commercial establishment offering lodging, meals and other guest services.
- **Motel:** hotel-like services with parking near the room or a room door opening onto the parking lot.
- **Lodge:** rented accommodation mainly for sleeping; may not provide food or other services.

A Home Away From Home

- Globalisation has increased travel for business, marketing, official work, study, pilgrimages, medical tourism, leisure, visiting relatives and shopping.
- Tourists need comfortable, safe and hygienic accommodation.
- The hospitality industry provides a “Home Away From Home” and is described in the source as one of the fastest growing industries.

More establishments

- **Resort:** leisure attraction with amenities, sports and leisure activities.
- **Furnished apartment:** provides essential amenities needed by guests.
- **Furnished camp:** provides hospitality for hiking/adventure sports.
- Hospitality also supports conventions, conferences, weddings, parties, theme parks, cruise lines, amusement parks, guest houses, hospitals and hostels.

HOSPITALITY INDUSTRY • DEPARTMENTS & SECTORS

The source's Fig. 17.1 identifies five broad sectors

Five sectors

- Accommodation or Front Office
- Food & beverage service
- Tourism
- Meetings & Events
- Entertainment & recreation

Why departments matter

- Organisations providing hospitality generally have management departments.
- Fundamental principles of hospitality management apply across different establishments.
- Different sectors/departments divide tasks so the organisation can function smoothly and efficiently.

Hospitality beyond hotels

- Hospitality services are integral to weddings, parties, conferences, conventions, theme parks, cruise lines, amusement parks, guest houses, hospitals and hostels.
- The same basic management principles can be applied across these settings.

Guest Cycle — overview

- The Guest Cycle starts even before the guest physically enters a hotel.
- It consists of four stages:
 - 1. Pre-arrival
 - 2. Arrival
 - 3. Occupancy
 - 4. Departure

1. Pre-arrival

- Activities include quoting rates for a guest.
- Room reservation is made through a central reservation system or reservation department.

2. Arrival

- The guest physically arrives.
- The guest registers or checks in.
- This is a key contact point between the guest and the hotel.

3. Occupancy

- Services are provided according to the guest's requirements.
- Guest security is ensured.
- Different guest services are coordinated.
- Guest satisfaction is the main focus, with the aim of obtaining and retaining customer loyalty.

4. Departure

- Guest prepares to leave or checks out.
- An up-to-date room occupancy record is kept.
- Other information about the guest is maintained as guest history, including feedback about services.

Easy memory

- **P-A-O-D**
- Pre-arrival → Arrival → Occupancy → Departure
- Think: **Reserve** → **Receive** → **Serve** → **Check-out**.

FRONT OFFICE DEPARTMENT

The focal point of the hotel and a major part of the guest cycle

Why Front Office is important

- The guest first comes in contact with hospitality staff at the front office.
- Interaction between guest and staff is critical for building a good relationship and the image of the organisation.
- The source describes front office as the **focal point of any hotel**.

Core services

- Welcoming, meeting and greeting guests.
- Organising room reservations and checking room availability.
- Registering guests and allocating rooms.
- Maintaining check-in/check-out records.
- Porter services and issuing room keys.

More services

- Passing messages to customers.
- Coordinating with other guest services.
- Providing in-house and external information.
- Preparing and settling bills.
- Collecting guest feedback.

Coordination with other departments

- Transport
- Accounts
- Billing
- Room service
- Restaurants
- Engineering
- Stores
- Sales
- Housekeeping

Front Office organisation

- **Front Office Manager**
 - Front Office Receptionist (Agent)
 - Front Office Cashier
 - Bell Captain → Bell Boys
 - Telephone Operator

Image & revenue

- The manner in which front-office services are offered contributes to the image of the institution.
- The source connects front-office service with the revenue generated by the establishment.

Front Office Manager

- Manages front office, lobby and transport activities.
- Schedules shifts/staff rotations and duties.
- Checks daily arrivals and VIPs.
- Coordinates with housekeeping and other departments.

Supervisor & Cashier

- **Supervisor:** responsible for a shift; meets/greets arrivals, ensures accurate and speedy rooming, checks occupancy.
- **Cashier:** maintains guest bills and receives payments at checkout.

Telephone / Information

- Provides information and communicates with in-house guests and visitors.
- **Assistant Manager:** organises and supervises front office in manager's absence.

FRONT OFFICE PERSONNEL • DUTIES

Designation-wise responsibilities from Table 17.1

Reception & Lobby

- **Lobby Manager:** organises, supervises and controls uniformed services.
- **Receptionist / Front Office Agent:** reserves, registers and assigns rooms and provides information during the stay.
- **Doorman:** welcomes guests on arrival and escorts them to the registration desk.

Housekeeping — purpose

- Provides a healthy environment.
- Ensures cleanliness and high standards of hygiene.
- Maintains the aesthetics of the entire establishment.
- Room décor, room facilities, safety, cleanliness and hygiene are especially important in hotels.

Bell services

- **Bell Captain:** organises, supervises and controls uniformed services; supervises bell boys and baggage movement during check-in/check-out.
- **Bellboy:** shifts guest baggage within and outside the room.

Housekeeping functions

- Cleaning public areas and guestrooms.
- Supply, upkeep of laundry and exchange of linen and uniforms.
- Internal flower arrangement.
- Maintenance of external landscape/garden.
- Coordination and communication with other departments through the control desk.
- Pest control.

Management support

- **Assistant Manager — Front Office:** supervises in the absence of the manager and ensures smooth functioning.
- **Telephone Operator / Information Assistant:** information and communication with guests/visitors.

Entrepreneurship

- Many organisations hire housekeeping services on contract.
- Commercial housekeeping consultancy has a larger volume of activities and challenges.
- Planning, organisation, trained staff and specialised skills are required.

HOUSEKEEPING DEPARTMENT • SECTIONS

Seven sections and their core functions

1–3

- **1. Housekeeping control desk:** passes information to housekeeping staff working throughout the hotel.
- **2. Housekeeping management:** plans, organises and controls all housekeeping activities.
- **3. Guestroom brigade:** maintains and cleans guestrooms.

Housekeeping hierarchy

- Executive Housekeeper
 - ■ Assistant Housekeeper
 - ■ Housekeeping Control Desk
 - ■ Floor Supervisor → Room Attendant → Housemen
 - ■ Public Area Supervisor → Head Housemen → Housemen
 - ■ Florist/Gardener
 - ■ Linen/Uniform Supervisor → Helper
 - Interior Decorator

Control desk & floor

- **Desk control supervisor:** coordinates with front office about guest departures, gets vacated rooms cleaned and hands over cleaned rooms; desk should be staffed 24 hours.
- **Floor supervisor:** maintains guest rooms, corridors, staircases and floor pantries.

4–5

- **4. Public area brigade:** maintains foyer, lobby, front office and other common areas.
- **5. Linen & uniform room:** coordinates with laundry; provides clean linen to the establishment and uniforms to staff.

Executive Housekeeper

- Manages functioning of the department through judicious use of manpower, materials, money, time and other resources.
- Checks schedules, cleanliness and overall functioning.

Room & public areas

- **Room attendant:** cleans guest rooms and bathrooms.
- **Housemen:** heavy cleaning such as vacuuming, mopping, sweeping and shifting furniture.
- **Public Area Supervisor:** maintains main entrance, corridors, offices, banquet halls, restaurants etc.

6–7

- **6. Horticulture & flower arrangement team:** maintains hotel landscape and arranges flowers.
- **7. Lost & found:** deposits misplaced luggage of guests.

Assistant Housekeeper

- In a large hotel there may be one for each duty shift.
- Prepares duty schedules.
- Checks cleanliness and functioning of workers.

Specialist roles

- **Florist/Gardener:** maintains garden and flower arrangements.
- **Linen/Uniform Supervisor:** supply, acquisition, storage, issue and cleanliness of linen and uniforms.

CLEANING MANAGEMENT & EQUIPMENT

Planning • schedules • surfaces • tools • cleaning agents

Planning cleaning

- Cleaning requires a well-organised approach.
- Staff should have practical housekeeping operational skills and correct cleaning procedures.
- Work should be supervised by qualified personnel to ensure quality services.
- Cleaning activities may be daily, weekly, monthly or seasonal.

Surfaces/materials

- Wood, granite, marble, ceramic tiles, stones, linoleum, plastic, vinyl, fibre glass, metals, leather, cane, rubber, cloth, paints and wall papers.

Common equipment

- Vacuum cleaners
- Brushes
- Brooms
- Mops
- Containers
- Cleaning cloths
- Trolleys for carrying multiple equipment

Cleaning agents

- Water
- Ammonia
- Vinegar
- Soaps and detergents
- Washing soda
- Abrasives
- Polishes
- Acids and other liquids

Safety point

- Choice of cleaning agent is important.
- Some strong agents may damage surfaces while cleaning.
- Use the appropriate cleaning agent for the material/surface.

Activity 1 — Group work

- **Group 1:** observe daily, weekly, monthly and seasonal cleaning in a hotel and record steps, materials and tools.
- **Group 2:** find methods for cleaning wood, granite and marble.
- **Group 3:** survey brooms, brushes and mops; record types, cost, diagram and uses.
- **Group 4:** survey cleaning agents; record brand, cost, properties, label information, uses and precautions.

LINEN & UNIFORM ROOM • FLOWER ARRANGEMENT • ECO-FRIENDLY PRACTICES

Housekeeping's support functions

Linen & uniform room

- An integral part of housekeeping.
- Laundry may be done in-house if facilities are available; otherwise it can be outsourced.
- Stores and maintains adequate stock of bed linen, bath linen, restaurant linen and staff uniforms.

Environmental conservation

- Hotels may train staff in environmental conservation and eco-friendly practices.
- Examples in the source include 100% organic cotton bed sheets.
- Chemical-free laundry cycles.
- Non-toxic, water-based, hypoallergenic and biodegradable agents.

Flowers

- Flowers enhance the aesthetic appeal of interior spaces.
- Hotels may contract florists to supply arrangements regularly.
- Alternatively, housekeeping may prepare arrangements for different areas.

Saving resources

- Cards in rooms may encourage towel reuse.
- Reuse helps save water, electricity and detergent used for laundering.
- Energy-efficient light bulbs can help save electricity.

Activity 2

- Visit a hotel and observe flower arrangements at places such as restaurant, banquet hall, reception, meeting-room centre table and conference dais.
- Note the size and placement of each arrangement.

Remember

- Housekeeping is not only room cleaning.
- It connects cleanliness, hygiene, aesthetics, linen/uniform management, flowers, pest control and coordination with other departments.

FOOD & BEVERAGES DEPARTMENT

Kitchen • Stewarding • Restaurant service

Food & Beverages department

- Responsible for the sale of food and beverages.
- Relevant service departments include kitchens, banquets, restaurants, room service, stewarding and bars/coffee shops.

Kitchen

- Place where food is prepared.
- Large hotels may have separate sections for butchery, bakery and confectionery, vegetable preparation, soups, pantry, hot range and more.
- Smaller hotels may combine sections.

Kitchen hierarchy

- **Executive Chef / Chef-de-cuisine:** head of kitchen; plans, organises and controls kitchen operations.
- **Deputy Chef:** next in the hierarchy.
- **Chef-de-parties:** supervisors for some kitchen sections.
- **Cooks:** prepare common food items.

Restaurant coordination

- Restaurant personnel coordinate closely with the kitchen for supplying food orders to guests.
- A restaurant is a commercial facility providing food and beverages.

Restaurant setup

- Dining tables and chairs.
- Crockery and cutlery.
- Linen and décor.
- Furniture and facilities vary according to the establishment's objectives, concept and standards.

Restaurant staff

- **Restaurant Manager:** overall functioning.
- **Senior Restaurant Supervisor & Head Waiter:** lead waiters/stewards.
- **Waiters/stewards:** serve food.
- **Assistant waiter:** clears tables.

Service standards

- Restaurant staff maintain cleanliness, hygiene and service standards.
- They should be courteous, have good manners and etiquette, and know how food should be served.

Kitchen stewarding

- Stores, maintains, cleans and issues cutlery, crockery and glassware to restaurant and kitchen.
- Maintains kitchen cleanliness and washes pots and pans.

Kitchen stewarding staff

- May include executive kitchen steward, kitchen steward, dishwasher, pot washer and utility workers.
- High standards of grooming, hygiene, sanitation, manners and basic etiquette are expected.

SUPPORT DEPARTMENTS • MANAGEMENT FUNCTIONS • CAREERS

How the hotel organisation works as a whole

Support / back-office departments

- Finance and Accounts
- Engineering
- Human Resources
- Sales and Marketing
- These departments support overall management and efficient functioning.

Management functions

- Planning
- Organising
- Co-ordinating
- Staffing
- Directing
- Controlling
- Evaluating

Why management matters

- A hotel has many departments with complex relationships.
- Smooth functioning requires efficient management of people, materials and other resources.
- Management functions use resources in light of institutional goals.

Hotel hierarchy

- Top management
- Middle management
- Junior management
- Supervisors
- Operations staff
- Job opportunities exist at each of these levels.

Essential competencies

- Well groomed
- Good hygiene
- Orderliness
- Good manners and etiquette
- Cheerful attitude
- Self-discipline
- Courtesy
- Physical fitness
- Good communication
- Self-confidence
- Multiple language skills

Professional appearance

- Clean and neatly pressed uniform.
- Minimum accessories.
- Well-groomed hair.
- Clean, properly manicured nails.
- Front-office staff are expected to maintain a polished appearance as part of the establishment's image.

Courses

- Catering and hospitality management courses are available from certificate to degree level.
- Hotel Management is described as a popular career choice.
- Undergraduate and postgraduate options are mentioned.
- Diploma and certificate courses are also available.

Career opportunities

- Positions in housekeeping at various hierarchical levels.
- Entrepreneurial opportunities in housekeeping.
- Front office and reception/control desk positions.
- Entrepreneurial opportunities for flower arrangements.
- Specialisation in theme-based events within an organisation.

Scope

- The source describes hospitality as a fast-growing field.
- It states that the fundamentals of hospitality management are applicable to hostels and large hospitals as well as hotels.
- Hospitality management skills can therefore be used across multiple service settings.

ONE-PAGE REVISION SHEET • CHAPTER 11

High-yield definitions, processes, duties and exam checklist

Hospitality

- Relationship between guest and host.
- Warm, courteous welcome + accommodation + food + entertainment + other facilities.
- Goal: comfortable stay and service.

Housekeeping

- Maintains cleanliness, hygiene and aesthetics.
- Functions: guestrooms/public areas, linen/uniforms, flowers/landscape, coordination and pest control.
- Sections: control desk, management, guestroom brigade, public area brigade, linen/uniform room, horticulture/flowers, lost & found.

Most important comparisons

- **Front Office:** guest contact, reservation, registration, room allocation, bills.
- **Housekeeping:** cleanliness, hygiene, aesthetics, linen, uniforms, flowers.
- **F&B:** food/beverage preparation, service, kitchen, restaurant and stewarding.
- **Back office:** support functions.

Guest Cycle

- **1. Pre-arrival:** rates + reservation.
- **2. Arrival:** registration/check-in.
- **3. Occupancy:** services + security + coordination + satisfaction.
- **4. Departure:** check-out + occupancy record + guest history/feedback.

Food & Beverage

- Kitchen + banquets + restaurants + room service + stewarding + bars/coffee shops.
- Executive chef leads kitchen operations.
- Stewarding handles crockery, cutlery, glassware, pots/pans and kitchen cleanliness.
- Restaurant team serves guests and maintains hygiene/service.

Exam checklist

- ✓ Define hospitality.
- ✓ Explain importance of hospitality management.
- ✓ Explain four guest-cycle stages.
- ✓ State Front Office importance.
- ✓ Give duties of three front-office personnel.
- ✓ Give duties of three housekeeping personnel.
- ✓ Explain restaurant and kitchen.
- ✓ Explain management functions.
- ✓ State career opportunities.

Front Office

- Focal point of the hotel.
- Welcomes, registers, assigns rooms, handles records, keys, messages, information and bills.
- Coordinates with transport, accounts, billing, room service, restaurants, engineering, stores, sales and housekeeping.

Support & management

- Support: Finance & Accounts, Engineering, HR, Sales & Marketing.
- Management: planning, organising, co-ordinating, staffing, directing, controlling, evaluating.

True / False practice

- (a) Smile is the most enduring competency required of Front Office personnel.
- (b) A suite has two rooms: living-cum-dining + bedroom.
- (c) Housekeeping provides food to customers.
- (d) Kitchen stewarding prepares food.
- (e) Controlling ensures plans/objectives stay to schedules and allocated budget.
- **Use the textbook review section to verify each answer.**

Source note: Based on the uploaded NCERT Human Ecology and Family Sciences – Part 2, Unit V, Chapter 11 “Hospitality Management”, Reprint 2026–27, pages 207–221. The source visuals include Fig. 17.1 Hospitality Industry sectors, Fig. 17.2 Guest Cycle, Fig. 17.3 Front Office organisation, Fig. 17.6 Housekeeping organisation, and the review-question page.

CHAPTER 12 • CONSUMER EDUCATION & PROTECTION

Consumer awareness • Consumer problems • Rights • Responsibilities • Standards • Careers

Learning objectives

- Understand the importance and role of Consumer Education and Protection.
- Explain the basic concepts related to Consumer Education and Protection.
- Analyse the knowledge and skills needed for a career in this field.
- Understand the scope and career options.

Consumer — definition

- Consumers are the final buyers of goods and services for satisfaction of personal needs and wants.
- They are a primary component of the socio-economic system.
- Consumer spending contributes to the flow of money in the market and the development of the economy.

Why consumer education matters

- Every human is a natural consumer because we purchase goods and services to satisfy needs and desires.
- Consumers may face poor quality, short quantity, misleading advertisements, high prices or poor services.
- Consumer education teaches a person to become an efficient and alert consumer.
- An informed consumer can compare products, understand choices and use protection mechanisms.

Basic terms

- **Consumer product:** article produced/distributed for sale for personal, family, institutional or business use.
- **Consumer behaviour:** process through which the buyer makes purchasing decisions.
- **Consumer forum:** place/organisation where consumers discuss products/services and may seek protection or advocacy.
- **Consumer footfalls:** number of consumers visiting a store, mall or other space.

Global market context

- Industrialisation and globalisation have increased buying power and the variety of products available.
- Foreign companies and imported products provide more choice, but also make product selection more complex.
- Consumers need to understand new technology, features, price and quality to make informed decisions.

Wise consumer

- Compare price and quality.
- Understand technology and product features.
- Be alert about malpractices and misleading advertisements.
- Know rights, responsibilities and available protection mechanisms.
- Keep evidence of purchases and make informed decisions.

CONSUMER EXPECTATIONS & CONSUMER PROBLEMS

Fig. 20.1 and the nine major problems described in the chapter

Consumers expect

- Reasonable price
- Appropriate / adequate information
- Correct weights and measures
- Genuine goods, articles and services
- Quality products
- Purity of products
- Ethics in sales and promotion

Why problems arise

- Manufacturers/service providers may not fulfil all expectations.
- Some consumers are unaware of protection measures.
- Consumers may face shoddy products, high prices, adulteration or faulty weights and measures.
- Low consumer awareness can make exploitation easier.

Development indicator

- The chapter states that the level of consumer awareness and protection is an indicator of a country's development and progress.
- Consumer education helps people understand their rights, choices and the economic system.

1. Substandard / poor quality goods

- Different manufacturers may make the same product using different materials.
- Imported, multinational and local products may differ in quality.
- Consumers may find poor quality difficult to identify, especially when they are unaware of quality standards.

2. Adulteration

- May be intentional or unintentional.
- Substances are added to or removed from a product.
- This changes composition, nature or quality.
- It can exploit consumers and harm health and safety.

3. High prices

- Consumers expect fair prices.
- Prices are influenced by government policy, availability, quality, delivery, market location, distribution, promotion and purchase method.
- Some suppliers may overcharge when consumers are poorly informed.

4. Lack of consumer information

- Consumers may not know their rights and responsibilities.
- They may be unaware of legislative provisions designed to protect them.

5. Inadequate / erroneous information

- Labels may be incomplete, deceptive or misleading.
- Advertisements may not answer important questions about quality, use, care or after-sales service.
- Lack of buying guides makes comparison difficult.
- Attractive packaging can encourage impulsive purchases.

6. Incorrect weights & measures

- Consumers may receive less quantity than they pay for.
- Scales or weights may be altered or used incorrectly.
- Weights and measures without a seal or verification stamp are described as not genuine.

CONSUMER PROBLEMS • PART 2

Spurious products • Sales promotion • Service grievances • Green consumption

7. Spurious / duplicate / imitation products

- Consumers may be confused or cheated by duplicates of known brands.
- Imitations can use similar packaging, colours and brand names.
- Such products may be poor quality and may be unsafe to use.

8. Sales promotion schemes

- Examples include exchange offers, bonuses and lucky draws.
- The chapter warns that such promotional schemes are not always genuine.
- Consumers can be influenced by attractive promotional offers and may fall prey to them.

9. Problems with services

- Consumer grievances also occur with services.
- Examples include public utilities, water, electricity, banks, insurance and financial institutions.
- Poor after-sales service or failure to deliver what was promised can create grievances.

Eco-friendly production

- Green marketing provides products more in tune with nature.
- It aims to create less waste, use fewer raw materials and save other resources.
- Sustainability is linked to the production and consumption system.

Consumer empowerment

- Consumer Education and Protection equip consumers to protect themselves from adverse market forces.
- They help consumers understand legislation and policy matters affecting their rights and choices.
- Awareness is especially important when marketing strategies are clever or deceptive.

Activity 1

- Interview five people in your locality.
- Find out consumer problems they faced.
- Record what actions they took to solve those problems.
- Prepare a list and discuss it in class.

CONSUMER RIGHTS

Six rights described in the chapter

1. Right to Safety

- Protection against hazardous effects that may harm the health or life of a consumer.
- Includes protection from products, production processes and services hazardous to health or life.

2. Right to be Informed

- Right to information about quality, quantity, potency, purity, standard and price of goods and services.
- Protects consumers against unfair trade practices.

3. Right to Choose

- Right to access products of varying quality, quantity, price, size and design.
- Consumers should be able to choose according to their needs and wants at competitive prices.

4. Right to be Heard

- Consumer interests should receive due consideration at appropriate forums.
- Includes the right to representation in forums working for consumer welfare.
- State and voluntary agencies are expected to provide such forums.

5. Right to Seek Redressal

- Right to seek redressal against unfair trade practices and unscrupulous exploitation.
- Includes fair settlement of genuine grievances.
- Includes the right to compensation for faulty goods and services.

6. Right to Consumer Education

- Right to acquire knowledge and skills to become an informed consumer.
- Helps consumers make wise decisions while purchasing goods and hiring services.
- Education should help consumers understand and solve problems.

Six rights — memory

- **S • I • C • H • R • E**
- Safety → Information → Choice → Heard → Redressal → Education

Consumer Protection Act

- The chapter discusses the Consumer Protection Act (CPA) 1986 and notes that the CPA 2019 replaced the three-decade-old 1986 Act.
- The chapter highlights measures such as a central regulator, stricter penalties for misleading advertisements and guidelines for e-commerce/electronic service providers.

Purpose of consumer protection

- Protect consumers from fraudulent trade practices.
- Provide redressal for grievances.
- Enable consumers to complain to an authority and seek redressal.
- The chapter states that consumers may claim compensation for loss or injury caused by negligence, subject to the Act.

STANDARDISATION MARKS

Quality, purity, safety and environmental information

ISI Mark / BIS

- ISI is described as the certification mark of the Bureau of Indian Standards (BIS), earlier called Indian Standards Institution.
- Licences are issued to manufacturers whose goods meet relevant standards.
- Standards cover many food and non-food products such as electrical goods, soaps, detergents, paints and paper.

Hallmark

- Indicates that precious metals such as platinum, silver and gold articles have been evaluated and tested at an official Assaying and Hallmarking Centre.
- Certifies conformity with national/international standards of fineness/purity.

Other protection bodies

- Bureau of Indian Standards (BIS)
- Directorate of Marketing and Inspection (DMI)
- Protection Councils at central and state levels
- NGOs / voluntary consumer organisations

AGMARK & FPO

- AGMARK and Fruit Products Order (FPO) standards are described as promulgated by the Government of India.
- AGMARK specifically pertains to agricultural products.
- FPO lays statutory minimum standards for quality of fruit and vegetable products and processing facilities.

Ecomark

- BIS operates the Ecomark scheme for household consumer products such as soaps, detergents, paper, packaging material and plastic products.
- The logo is an earthen pot.
- It signifies an environment-friendly product that does not produce hazardous waste and is biodegradable/recyclable, as described in the chapter.

What consumer organisations do

- Comparative product testing
- Consumer awareness and education
- Publications, buying guides and research
- Legal advice and advocacy
- Handling grievances and complaints
- Vigilance and public meetings

Wool-mark & Silk Mark

- **Wool-mark:** quality mark for wool/woollen garments; indicates pure wool according to the chapter.
- **Silk Mark:** quality assurance label for pure silk; the chapter describes it as ensuring 100% natural silk.

FSSAI

- Food Safety and Standards Authority of India (FSSAI) was established under the Food Safety and Standards Act, 2006.
- It lays down science-based standards for food and regulates manufacture, storage, distribution and sale to ensure food availability for human consumption.

Examples named in chapter

- **VOICE:** Delhi-based consumer organisation; brings out "Consumer Voice".
- **CERC:** Ahmedabad-based consumer organisation; brings out "Insight".
- The chapter also names consumer organisations/publications in the US, UK and Australia.

CONSUMER RESPONSIBILITIES

Rights and responsibilities go hand in hand

1–3

- 1. Regularly update knowledge of laws and legislative provisions.
- 2. Be honest in dealings and pay for purchases.
- 3. Conduct a market survey, compare brands/features and compare prices before buying.

4–6

- 4. Choose freely from available varieties according to needs.
- 5. Read all information on labels/brochures.
- 6. Buy products with standardisation marks to be assured of quality.

7–9

- 7. Keep receipts and relevant purchase documents as proof.
- 8. Read and understand terms, liabilities and service charges for services such as insurance, credit cards and bank deposits; clarify unclear points.
- 9. Increase awareness of national/international consumer organisations and understand the benefits of membership.

Smart purchase checklist

- ✓ Compare brands and prices.
- ✓ Check label information.
- ✓ Check standardisation marks.
- ✓ Check weights and measures.
- ✓ Keep the receipt.
- ✓ Understand terms and conditions.
- ✓ Know where to complain if a genuine problem occurs.

Activity 2

- **Group A:** talk to three local people about their knowledge of consumer rights.
- **Group B:** talk to three local people about awareness of consumer responsibilities.
- Discuss findings and suggest ways to increase awareness.

Standard marks activity

- Collect labels/packages of ten daily-use commodities such as spices, biscuits, bulbs, sugar, sauce and jam.
- Identify which standardisation marks appear.
- Discuss findings in class.

SKILLS FOR A CAREER IN CONSUMER STUDIES

Knowledge + communication + empathy + consumer testing

Core knowledge

- Consumer protection mechanisms and redressal agencies.
- Quality standards of different products.
- Adulteration and detection of adulterants.
- Consumer protection laws.
- Consumer rights and responsibilities.

Soft skills

- Good communication and interpersonal skills.
- Empathetic and understanding attitude.
- Good listening skills.
- Creativity for awareness programmes, advertisements and talks.
- Strong writing skills.

Professional contribution

- Develop educational material for consumer education.
- Report consumer tests of products.
- Help fellow consumers and the public.
- Communicate information clearly to different target groups.

Education pathways

- The chapter says courses in Consumer Affairs/Consumer Protection are available at undergraduate and postgraduate levels.
- Possible degree courses include B.Sc./B.A. Home Science, B.Sc. Family Resource Management, Home Management, Resource Management, B.B.A. and B.B.S.
- The subject may be called Consumer Studies, Consumer Education, Consumer Behaviour or Consumer in the Market.

Postgraduate options named

- PG Diploma in Consumer Education
- PG Diploma in Management of Voluntary Organisations
- PG Diploma in Consumer Services
- M.Sc. Home Science
- M.Sc. Resource Management and Design Application
- Family Resource Management
- MBA with specialisation in marketing

Activity 6 / 7

- Visit state university and major Indian university websites.
- List undergraduate, diploma and certificate programmes.
- Find postgraduate diplomas/degrees and eligibility.
- Make notes and discuss in class.

CAREER SCOPE IN CONSUMER EDUCATION & PROTECTION

Career areas explicitly listed in the chapter

Government & consumer organisations

- Work in government organisations such as BIS, Directorate of Marketing and Inspection, and Ministry of Consumer Affairs.
- Roles may be decision-making, managerial or technical.
- Work in voluntary consumer organisations in product testing, awareness, education, empowerment and publications.

Media & testing

- Work with audio-visual publicity departments as content developer for consumer awareness/education advertisements.
- Work as an analyst in consumer testing laboratories for comparative evaluation of products.
- Those with excellent writing skills can pursue journalism related to consumer affairs.

Career map

- **Study → Skills → Experience → Specialisation**
- Consumer education / testing / awareness / research / counselling / corporate consumer relations / media / legal advocacy.

Corporate & market research

- Consumer divisions of corporate houses can handle complaints, suggestions, customer relationship management and customer facilitation.
- Market research organisations work in consumer behaviour, product reach, acceptance of new products, feedback and suggestions.

Legal & advocacy

- Consumer activists may, with legal training, plead cases in Consumer Protection Courts.
- Consumer organisations can undertake advocacy, awareness and grievance handling.

Remember

- The chapter links consumer studies to both public-service and private-sector work.
- Writing, communication, testing, research, counselling and awareness are recurring skill areas.

Independent work

- Start a consumer organisation.
- Work in National Consumer Helpline for consumer counselling and redressal assistance.
- Consult consumer clubs in schools/colleges.
- Teach consumer studies or work as a freelance redressal-guidance consultant.

Related financial careers

- With additional training, work at junior level assisting individuals in financial management.
- With further training and experience, careers may extend to insurance, shares and financial portfolio management.

Key terms

- Consumer
- Consumer Rights
- Consumer Protection Act
- Consumer Rights and Responsibility
- Standardisation Marks

PRACTICAL • LEAFLET / PAMPHLET FOR CONSUMER AWARENESS

Chapter practical: planning, writing and presenting a simple awareness leaflet

Theme & tasks

- **Theme:** Develop leaflet/pamphlet for Consumer Education and Protection.
- Collect relevant information.
- Compile the topic in limited space.
- Use simple language understood by the target group.
- Write a crisp introduction, body and conclusion/application.

How to conduct

- Divide class into five groups.
- Each group works on one topic.
- Collect information with introduction, body and conclusion.
- Get the write-up approved by the teacher.
- Place content in leaflet/pamphlet form with school and group names.
- Present to classmates.
- Print/photocopy for awareness camps.

Additional activities

- **Activity 4:** collect a newspaper article about a Consumer Protection Act case and discuss it.
- **Activity 5:** collect labels/packages of ten commodities and identify standardisation marks.
- **Activity 6:** research undergraduate/diploma/certificate programmes.
- **Activity 7:** research postgraduate programmes and eligibility.

Purpose

- Understand how to prepare a leaflet/pamphlet for an awareness camp.
- Collect information and express it simply using headings, subheadings and salient features.
- Create awareness on Consumer Education.

Leaflet design

- **Heading:** brief and attention-catching.
- **Subheading:** adds explanation or introduces separate paragraphs.
- **Text:** simple, direct and focused on one theme.
- **Pictures:** should complement the text and communicate the same idea.

Exam tip

- For a leaflet answer, remember:
Heading → Subheading → Simple text → Relevant picture → One clear theme.

Five group topics

- Consumer Protection
- Consumer Rights
- Consumer Responsibilities
- Standardisation Marks
- Consumer Redressal

Formats

- A leaflet can be a single sheet printed on both sides and folded.
- **Bi-fold:** four panels.
- **Tri-fold:** six panels.
- The chapter stresses simple, clear communication for the target audience.

Source visual

- The chapter's practical section explains how heading, subheading, text and pictures should work together.
- The practical pages are 235–237 of the uploaded chapter.

ONE-PAGE REVISION SHEET • CHAPTER 12

Definitions • 6 rights • 9 responsibilities • standards • careers

Consumer

- Final buyer of goods/services for personal needs and wants.
- **Consumer product:** item for personal, family, institutional or business use.
- **Consumer behaviour:** purchasing decision process.
- **Consumer forum:** place/organisation for discussion, advocacy and protection.
- **Consumer footfalls:** number of customers visiting a space.

9 major consumer problems

- 1. Substandard goods
- 2. Adulteration
- 3. High prices
- 4. Lack of information
- 5. Inadequate/erroneous information
- 6. Incorrect weights & measures
- 7. Spurious/duplicate products
- 8. Enticing sales promotion
- 9. Problems with services

Review questions — know these

- Explain: Consumer, Consumer rights, Consumer responsibilities, Consumer Protection Act, Consumer problems.
- List any 3 consumer rights.
- List any 3 consumer responsibilities.
- List any 5 consumer problems.
- List any 3 standardisation marks.
- Discuss basics of consumer education and protection.

Six consumer rights

- 1. Safety
- 2. Information
- 3. Choice
- 4. Heard
- 5. Redressal
- 6. Consumer Education

Standardisation marks

- **ISI/BIS:** standards certification.
- **AGMARK:** agricultural products.
- **FPO:** fruit/vegetable product standards.
- **Wool-mark:** wool.
- **Silk Mark:** pure silk.
- **Hallmark:** precious-metal purity/fineness.
- **Ecomark:** environment-friendly consumer products.
- **FSSAI:** food safety and standards.

True / False practice

- (a) ISI mark is given by BIS.
- (b) Agmark is meant for agricultural products.
- (c) Right to safety is not a consumer right.
- (d) VOICE is the name of a consumer organisation.

Nine responsibilities

- Update legal knowledge • be honest/pay • market survey • choose freely • read labels • check standard marks • keep receipts • understand service terms • know consumer organisations.

Career scope

- BIS / DMI / Ministry of Consumer Affairs
- Consumer organisations
- Corporate consumer divisions
- Market research
- National Consumer Helpline
- Consumer clubs / teaching / consultancy
- Media and content development
- Testing laboratories
- Consumer activism / legal work
- Consumer journalism
- Financial management, insurance, shares and portfolio management with additional training

Quick memory code

- **RIGHTS:** S-I-C-H-R-E
- **Safety • Information • Choice • Heard • Redressal • Education**
- **BUY SMART:** Compare → Read → Check mark → Keep receipt → Know rights.

Source note: These notes are based on the uploaded NCERT Human Ecology and Family Sciences – Part 2, Unit V, Chapter 12 "Consumer Education and Protection", Reprint 2026–27, pages 222–240. The notes preserve the chapter's terminology and sequence, including Fig. 20.1 (consumer expectations), Fig. 20.3–20.7 (standardisation marks), the six consumer rights, nine responsibilities, practical activities and review questions.

CHAPTER 13 • DEVELOPMENT COMMUNICATION & JOURNALISM

Communication • Development journalism • Development communication • Media • ICTs • Careers

Learning objectives

- Understand the importance of development communication and journalism for social change and development.
- Identify skills required for a career in communication and journalism.
- Comprehend the scope of the discipline and available career options.

Significance of communication

- Creates awareness about available technologies.
- Mobilises people to use technologies for social betterment.
- Links Government agencies, NGOs and people.
- Trains students and media professionals to communicate development issues toward an equitable and impartial society.

Why this field matters

- Communication is an integral part of social and professional life.
- Media inform people about health, environment, consumption, poverty and other issues.
- Development Journalism communicates community concerns to the community through various media.
- Journalism is linked in the chapter with people's right to opinion and expression.

Development — meaning

- Development is defined in the chapter as positive changes in the socio-economic and cultural lives of the majority of people on a permanent basis without exploitation or violence.
- Development efforts address issues such as illiteracy, population, malnutrition, poor health, hunger and pollution.

Journalism & democracy

- Journalism is described as an inseparable part of a democratic system.
- The Press plays a vital role in democratic society.
- People's participation is presented as a foundation of democracy.
- The Press is commonly described in the chapter as the 'fourth pillar of democracy'.

Development Journalism

- A relatively newer concept that emerged after the colonial era.
- It focuses on development activities and success stories of people adopting technologies, trying new methods and helping society.
- It describes people working in new projects and processes.

DEVELOPMENT COMMUNICATION

Definition • origin • features • two-way process

Definition

- Development Communication uses the power of communication as a catalyst for social development.
- It systematically applies communication processes, strategies and principles to bring positive social change.
- The term 'Development Communication' was first coined in 1972 by Nora Quebral.
- The chapter describes it as the art and science of human communication used to facilitate planned development of disadvantaged society with equity.

Development goals & extension

- Extension programmes address poverty alleviation, food security, health and sanitation, non-formal education, environmental conservation and gender equity.
- Extension educators transfer information and technologies and build skills/capacities of stakeholders.

Essential features

- Oriented to socio-economic development and people's/community happiness.
- Aims to inform and educate the community.
- Combines suitable mass media and interpersonal communication channels for greater impact.
- Based on audience characteristics and their environment.

SDGs context

- The chapter notes that world leaders set 17 broad, time-bound Sustainable Development Goals in 2015.
- SDGs provide a framework for international cooperation, adapted by countries to local development needs.

Two-way process

- Communication occurs between those who have information and those who are ignorant.
- People facing problems are viewed as having an innate ability to find solutions, though they may need help/resources.
- Motivation is a key element.
- Dialogue between people and development agencies helps build common understanding and concerted action.

Advocacy

- Advocacy means being an advocate for a cause in the chapter's usage.
- Examples include preventing early marriage, improving educational opportunities in rural/tribal areas and preventing deforestation.
- It can involve lobbying governments/multilateral bodies, building alliances and networks, and informing supporters.

DEVELOPMENT COMMUNICATION IN ACTION

Red Ribbon Express • campaigns • mass-media methods

Red Ribbon Express (RRE)

- Nationwide communication campaign for HIV/AIDS awareness.
- A specially designed train traversed over 9,000 km a year, covering 180 districts/halt stations and programmes in 43,200 villages.
- It had seven coaches with educational material, interactive touch screens, 3-D models, LCD projector, folk-performance platform, counselling cabins and doctors' cabins.

Campaign — definition

- A campaign combines different communication methods/materials around a theme for a predefined period.
- May use meetings, tours, newspaper articles, leaflets, exhibitions and dramatics.
- It is organised and intensive, creates awareness, gives a specific message and can stimulate action.

How RRE worked

- Started from Kanyakumari and followed a 'parikrama' style.
- At stations, performers/orators went to villages for IEC activities.
- Methods included street plays, folk songs, stories and group counselling.
- Locally mobilised youth groups joined the team.

Example: Swachh Bharat Mission

- The chapter uses Swachh Bharat Mission, launched on 2 October 2014, as an example of a nationwide campaign/Janandolan.
- It aimed to eliminate open defecation in rural areas during 2014–2019 through behaviour change, toilet construction and monitoring mechanisms.

RRE implementation & aims

- Implemented by NACO, NYKS and international agencies such as UNICEF and UNAIDS, in cooperation with Indian Railways.
- Aimed to spread information on primary prevention services.
- Develop understanding to reduce stigma/discrimination.
- Improve knowledge about preventive measures, health habits and lifestyle.

Activity 1

- List any two issues for which campaigns have been initiated.
- Briefly describe methods and materials used.
- Note whether you participated and in what capacity.

RADIO, TELEVISION & COMMUNITY RADIO

Broadcast media as tools for development communication

Radio & television

- Radio and television are described as popular, relatively cheap and convenient mass media for development purposes.
- Broadcast journalism can reach many people, including people with poor literacy.
- Radio is described as especially accessible and mobile.

Radio programme formats

- News
- Interviews
- Discussions
- Documentaries
- Drama
- Quiz
- Human-interest stories

Public Service Announcement (PSA)

- Brief 10–60 second message between programmes, generally in the form of jingles.
- Provides information or suggestions for action for public good.
- Examples mentioned include obeying traffic rules and saying no to tobacco.
- Catchy slogans and repeated broadcasts can make PSAs effective.

Community Radio

- Newer interactive/local format that helps overcome the earlier limitation of limited feedback.
- Local people have an important role.
- Can be set up with small investment and training of local people, with limited-area broadcasting.
- Run and managed by local people, with local-dialect content for local use.

What community radio does

- Supports local development programmes.
- Gives people opportunities to participate, express views and display talents.
- Can provide information on government policies, entitlements, programmes, schemes and services.
- Encourages youth toward careers in Development Communication Journalism.

Prerequisites

- Participatory content development and appraisal.
- Rapport formation with the community.
- Community participation is encouraged.
- NGOs and educational institutions can seek licences for local community radio according to the chapter.

Examples named

- Vanasthali Vidyapeeth, Rajasthan
- SEWA, Gujarat
- Delhi University (DU) FM in North Delhi

Activity 2

- Plan and list programmes you would broadcast for listeners from a campus radio of your school or colony.

Quick comparison

- **Radio:** audio, mobile, low-cost access.
- **TV:** audio + visual, multiple channels and participation.
- **Community Radio:** local participation, local content and local dialect.

TELEVISION, PRINT MEDIA & DEVELOPMENT STORIES

Education • local reporting • Project Village Chhatera

Television

- Offers programmes through international, national and local channels.
- Some programmes allow participation through talk shows, reality shows and competitions.
- The chapter gives educational examples and notes the potential of combining education and entertainment for common good.

Print media

- The chapter notes that much national/regional daily news has an urban approach.
- Reports on agriculture, rural problems and development concerns may receive less priority.
- Rural/local newspapers are few, but the press remains a medium of continuous education.

EDUSAT

- India launched Education Satellite (EDUSAT) in September 2004.
- It was the first Indian satellite built exclusively to serve the educational sector.
- It was used for an interactive satellite-based distance education system.

Project Village Chhatera

- Started in 1969 in Chhatera, Northwest Delhi.
- Hindustan Times ran a regular fortnightly column describing village life.
- Reporters covered the village chaupal, aspirations, livelihoods, festivities and problems such as electricity, water supply and deficient rainfall.
- Coverage helped bring services and benefits to the area.

Activity 3

- Prepare an exhaustive list of programmes/jingles on national and local channels that generate awareness on health, sanitation, food, literacy, environment, pollution, energy conservation or donations.
- Plan and conduct a quiz.

Development journalist

- The chapter highlights a need for professionals who write with sensitivity about rural poor and development.
- Work may include interviews, press conferences, calls/emails to create story leads and internet research.
- Basic computer literacy is described as necessary for satisfactory work.

ICTs & DIGITAL DEVELOPMENT

Information, Communication Technologies • SARI • SEWA

ICTs — meaning

- ICTs is an umbrella term including computer hardware/software, digital broadcast and telecommunications technologies.
- ICTs are used for informing people.
- Mobile phones have facilitated markets, social business and public services.

Economic & social uses

- Banking and financial transactions
- Marketing and distribution
- Employment
- Public services
- Social business
- Information access

Tele-centres

- Direct ICT approach aimed at improving lives of poor people.
- India has had several tele-centre projects.
- Tele-centres can provide computer education, email, web browsing and e-government services.

SARI project

- Sustainable Access in Rural India (SARI) project in Tamil Nadu.
- About 80 tele-centre kiosks were set up.
- Services included basic computer education, email, web browsing and e-government services such as certificates.

SEWA & ICTs

- SEWA is a union of thousands of poor women working in India's informal sector.
- It aims at full employment and self-reliance, addressing work plus income, food and social security.
- SEWA incorporated ICTs to empower grassroots members.

SEWA technology programmes

- Computer
- Radio
- Television
- Video
- Telephone
- Fax
- Mobile phones
- Satellite communication
- Community Learning Centres were established in rural areas for IT training and capacity building.

Impact described

- ICTs can save time and cost.
- SEWA members can communicate and solve problems quickly across districts.
- Community Learning Centres also support training in electrical, mechanical and IT engineering.

Activity 4

- Identify a newsletter or small newspaper circulating in your area.
- Find details about circulation, contributors and editorial board.

Activity 5

- Write or express your opinion about an issue concerning people living in your colony, village or locality.

SKILLS REQUIRED FOR A CAREER

Cognitive • creative • technical • journalistic • people skills

Cognitive & creative skills

- Cognitive skills to comprehend an issue.
- Creative skills to project issues and concepts creatively to attract attention and make an impact.
- Media designing, production and technical instrument handling are useful for media-house and advertising-agency work.

Technical skills

- Development filmmakers need camera techniques and video production skills.
- Content development and implementation.
- Editing skills are useful for marketing management.
- Correct operation of equipment is necessary to optimise presentations.

Production & presentation

- Know relevant laws and regulations.
- Develop presentation techniques for smooth and engaging programmes.
- Interviewing techniques.
- Computer operation for stations.
- Basic radio production software skills.
- Ability to write a creative brief.

Journalistic skills

- Combination of journalistic and presentation skills.
- Interest in current affairs and local conditions.
- Hands-on experience in radio.
- Ability to communicate.
- Knowledge of music.
- Questioning ability to explore finer details.

People & leadership

- Ability to work with diverse groups.
- People-centred approach.
- Understand people's viewpoints and issues affecting their lives.
- Know principles of social work.
- Leadership skills.
- Good listening and sensitivity in writing.

Language & computer

- Language skills: speaking, writing and reading.
- Ability to write technical reports and documents.
- Basic Microsoft Office skills including Word, Excel and PowerPoint are described as desirable.

Other useful qualities

- Passion for adventure and travel can help in gathering unique stories from remote areas.
- Excellent interpersonal skills for professional interaction with staff, partners and consultants.

Practical experience

- A DCJ student can gain experience by writing a radio spot and having it recorded and scheduled for airplay.
- Real-world practice strengthens communication and production skills.

Memory line

- Understand → Create → Produce → Present → Question → Listen → Lead

SCOPE & CAREER AVENUES

Where Development Communication can lead

Scope of the field

- Information dissemination and education.
- Behaviour change.
- Social marketing.
- Media advocacy.
- Communication for social change.
- Participatory development communication.
- Training, advisory and action projects that build communication capabilities and resources.

Research scholar

- Research on gender and development.
- Environment.
- Consumption behaviour.
- Health.
- Agriculture.
- Livelihood issues.

Career map

- **Media → Government → NGO → Research → Training → Consultancy**
- Roles can combine communication, journalism, technology, research, advocacy and community engagement.

Work settings

- Media houses
- Government departments
- Non-government organisations
- National/international development agencies
- Research organisations
- Corporate houses
- Community media
- Independent consultancy

Trainer

- Train grassroots-level and field functionaries.
- Train policy makers.
- Train officers of corporate houses.
- Support communication capacity building.

Key terms

- Development communication
- Mass communication
- Campaign
- Community radio
- Print media
- Information, Communication Technologies (ICTs)
- Questioning

Development Journalist

- Print
- TV
- Radio
- Community media
- Traditional media
- Radio jockeying
- Anchoring

Freelancer / Consultant

- Work independently for organisations.
- Undertake communication and development assignments.
- The chapter concludes that the field offers a wide range of careers and is expected to diversify.

Review focus

- Definition + role of Development Communication.
- Essential features.
- Campaign and slogan design.
- Community radio vs All India Radio.
- Visibility of development news in newspapers.
- ICTs as vehicles of development.

PRACTICAL • RADIO PUBLIC SERVICE ANNOUNCEMENT

Study, analyse and score a radio PSA

Theme & task

- **Theme:** Study of Radio Public Service Announcement (PSA).
- **Task:** Listen to and record a radio PSA for content, relevance, impact and technique.
- **Purpose:** understand how radio mass media creates awareness through PSAs.

Procedure

- Divide the class into four groups.
- Listen to the recorded PSA.
- Analyse it using the given parameters.
- Score the quality of the PSA.

Record these details

- Topic / Message
- Date and Time
- Duration
- Techniques used (e.g. dialogue with humour / jingle)
- Channel
- Target Group
- Medium of Instruction
- Objectives

Scoring parameters

- Suitability of day/date/time
- Engage the listener
- Create interest
- Promote awareness
- Motivate audience

Production quality

- Selection of voice-over
- Clarity of message
- Clarity of sound recording
- Appropriateness of sound effects
- Source/originator of PSA

Score

- Excellent = 3
- Good = 2
- Average = 1
- Poor = 0
- **Total Score = ____ / 30**

Discussion

- Discuss the contribution made by radio in creating awareness about social issues.
- The practical gives Swachh Bharat Abhiyan for sanitation through PSAs as an example.

Exam connection

- Know the definition and purpose of PSA.
- Remember its brief format and public-good purpose.
- Know the parameters used to analyse a PSA.

Chapter visual

- The source's practical page contains a two-part analysis table: PSA details followed by quality parameters and a total score out of 30.

ONE-PAGE REVISION SHEET • CHAPTER 13

Definitions • features • media • ICTs • skills • careers

Development Communication

- Systematic application of communication processes, strategies and principles for positive social change.
- Coined in 1972 by Nora Quebral.
- Two-way process based on audience/environment, information, education, motivation, dialogue and concerted action.

Media methods

- **Campaign:** organised intensive combination of methods/materials for a theme and period.
- **Radio:** accessible/mobile; news, interviews, discussions, documentaries, drama, quizzes and PSAs.
- **Community Radio:** local participation, local content/dialect, development focus.
- **TV:** multiple channels and educational/participatory formats.
- **Print:** continuous education and development reporting.
- **ICTs:** hardware, software, digital broadcast and telecom technologies.

Career avenues

- Development journalist
- Research scholar
- Trainer
- Freelancer / consultant
- Media houses
- Government / NGOs
- Development agencies
- Community media
- Corporate communication

Essential features

- Socio-economic development orientation.
- Information + education.
- Mass media + interpersonal communication.
- Audience/environment based.
- Dialogue and participation.

Examples to remember

- **RRE:** nationwide HIV/AIDS communication campaign.
- **Swachh Bharat Mission:** chapter's campaign example.
- **Project Village Chhatera:** development-focused newspaper coverage.
- **SARI:** rural tele-centres in Tamil Nadu.
- **SEWA:** ICTs for grassroots women's empowerment.
- **EDUSAT:** educational satellite launched in 2004.

Review questions

1. What is Development Communication and its role?
2. Essential features?
3. What is a campaign? Design a slogan.
4. Community radio vs All India Radio?
5. Discuss visibility of environment/development news.
6. Comment on ICTs as vehicles of development.

Development Journalism

- Focuses on development activities, success stories and people working in new projects/processes.
- Journalists investigate, communicate community concerns and can use print, TV, radio, community media and digital tools.

Career skills

- Cognitive + creative skills.
- Camera/video/editing.
- Presentation + interviewing.
- Questioning + current affairs.
- People-centred work + leadership.
- Listening + interpersonal skills.
- Language + technical writing.
- Computer / MS Office skills.

Quick memory

- **DCJ = Development + Communication + Journalism**
- People → Information → Dialogue → Awareness → Behaviour/Social Change
- **Media + ICTs + Community participation = development communication toolkit**

Source note: Based on the uploaded NCERT Human Ecology and Family Sciences – Part 2, Unit VI, Chapter 13 “Development Communication and Journalism”, Reprint 2026–27, pages 244–255. The notes follow the source's terminology, examples, activities, career skills and review questions. The chapter's RRE figures and PSA analysis table were also reflected in the notes structure.

CHAPTER 14 • CORPORATE COMMUNICATION & PUBLIC RELATIONS

Meaning • Significance • Corporate Communication • PR • Functions • Skills • Scope

Learning objectives

- Understand the meaning, significance and scope of Corporate Communication and Public Relations (PR).
- Comprehend functions and skills required for corporate communication and public relations.
- Understand areas and principles of PR activities.

Significance

- Public perception is a major variable in organisational success.
- Perception among the public, competitors and employees affects respectability, position and success.
- The chapter describes the primary objective as establishing perception among stakeholders.
- In a crisis, public and employee understanding of what happened and how it was handled influences their reaction.

Introduction

- Every idea, fact or opinion remains static until communicated and understood.
- In an information-driven society, communication is presented as important as food, clothing and shelter.
- Corporate communication relates communication to organisations and business establishments.
- It has evolved as an important management tool.

PR in organisations

- PR is an important function/activity and should be entrusted to effective, experienced executives.
- PR programmes can have different objectives, strategies and plans.
- Examples: positive image, crisis handling, employee motivation, product curiosity, product advertising and advance event information.
- Approaches include press conferences, press releases, parties and get-togethers.

Corporate Communication — meaning

- A set of activities involved in managing and orchestrating internal and external communications.
- Corporate communication is concerned with people, organisational processes, activities and media.
- It provides information through specialists and generalists in an organisation.

Communication + PR + media

- Public Relations, advertising and media are inter-related and may share characteristics and activities.
- Corporate communication creates avenues of communication with employees, consumers, investors and others.
- Good communication supports organisational relationships locally and globally.

PUBLIC RELATIONS • NATURE, SCOPE & ETHICS

PR as art + science • definitions • code of ethics

Public Relations

- PR is described as both an art and a science: emotionality/beauty of art plus the system of science.
- It may mean different things to different people.
- The chapter notes its use in government, public and private sectors and other institutions.
- PR techniques, strategies and practices vary across organisations.

Corporate communication primarily creates

- Positive and favourable public perception.
- Effective and efficient avenues of communication.
- Strong corporate culture, corporate identity and corporate philosophy.
- Genuine sense of corporate citizenship.

Definitions in the chapter

- Establishing a bond of relationships and contacts between two groups of public.
- A deliberate, planned and sustained effort to establish and maintain mutual understanding between an organisation and the public.
- An attempt through information, persuasion, adjustment and contacts to seek support for an activity, cause, movement, institution, product or service.

Why communication matters

- A study cited in the chapter reports that more than 88% of industrial engineers strongly agreed that lack of communication and cooperation reduced productivity.
- A cited CEO survey reported that 97% believed communication with employees positively affected job satisfaction, while 79% thought it benefited the bottom line.

PR ethics

- Code of ethics is a crucial requirement in the profession.
- PR professionals may have access to information or knowledge about future events.
- Pressure or temptation to commercialise such information must be avoided.
- Professionals should follow a code of ethics and conduct and avoid being labelled as fixers or manipulators.

Memory line

- **Corporate Communication = Internal + External + People + Processes + Media**
- **PR = Planned relationships + Information + Mutual understanding**

FUNCTIONS OF CORPORATE COMMUNICATION

Organisation • reputation • brand • stakeholders • crisis

Core functions

- Build a healthy organisational environment.
- Disseminate information to employees, stockholders, media and customers.
- Create and maintain the brand.
- Look after organisational reputation.
- Project the company's brand within and beyond the organisation.

Functions of PR — 1

- **Public Relations Policy:** develop and recommend corporate PR policy and share it with top management/departments.
- **Statements & Press Releases:** prepare corporate statements, executive speeches and press releases; articulate and project the company's/product's positive image.

Stakeholder relationships

- Maintain liaison between organisation and outside bodies.
- Project a positive corporate image.
- Build strong relationships with stockholders.
- Inform public about new products and achievements.
- Maintain a positive corporate image through smooth and affirmative stakeholder relationships.

Functions of PR — 2

- **Publicity:** announce company activities/products to media and community; plan promotional campaigns; handle inquiries.
- **Maintaining Relations:** liaison with government, community, shareholders and investors; support good-neighbour relations and locality development.

Modern challenges

- Increasing competition.
- Greater accessibility of information.
- Media explosion.
- Reputation management has become a priority.
- Functions also include crisis control, global communications and use of complex communication tools and technologies.

Functions of PR — 3

- **Publications:** prepare and publish in-house magazines and related material.
- PR departments/agencies may also support reports and stockholder planning meetings.

MAJOR AREAS OF PR ACTIVITY

Press • Advertising • Publications • Media • Constituents

1. Press Relations

- Maintain cordial relations with press at all levels, from editor to reporter.
- Provide well-written and well-timed press releases.
- Help correspondents write articles and remain accessible.
- Show forbearance toward press criticism and avoid bias/undue favours.
- Project organisational culture while disseminating product/service information.

4. Other media coordination

- Audio-visual media, films, exhibitions, hoardings, puppetry and folk songs.
- Good public speaking and courteous telephone communication can add to positive image.
- Maintain relations with publicity media such as radio and television.

2. Advertising

- Advertising may disseminate information, persuade or influence consumption.
- Media include newspaper, radio, TV and others.
- The PR person may decide the advertising budget and which media to use.

5. PR with constituents

- Liaison with local community, financial analysts, bankers, leading institutions, shareholders and potential investors.
- Internal PR includes relations with all employees, including executives and senior personnel.
- PR staff must stay informed about organisational happenings.

3. Publications

- PR department may produce brochures, folders, pamphlets, circular letters, in-house magazines and similar materials.
- Remember simplicity, clarity, cost, truthful organisational image and attractiveness.

Press + PR relationship

- Journalists need news; PR needs publicity.
- The chapter describes this as a give-and-take/interdependence.
- PR should provide useful information without bias or undue favour.

SEVEN PRINCIPLES OF PUBLIC RELATIONS

Arthur W. Page principles

1. Tell the truth

- Let the public know what is happening.
- Provide an accurate picture of the company's character, ideals and practices.

4. Manage for tomorrow

- Anticipate public reaction.
- Eliminate practices that create difficulties.
- Generate goodwill.

7. Remain calm, patient & good-humoured

- Build public relations through consistent and reasoned attention to information and contacts.
- In a crisis, the chapter emphasises calm communication.

2. Prove it with action

- Public perception is described in the chapter as determined largely by what the organisation does, rather than only what it says.
- Actions should support the organisation's communication.

5. Conduct PR as if the whole company depends on it

- Corporate relations are a management function.
- No corporate strategy should be implemented without considering its impact on the public.
- PR professionals can act as policymakers across corporate communication activities.

Seven-word memory chain

- Truth → Action → Listen → Tomorrow → Whole company → People → Calm

3. Listen to the customer

- Understand what the public wants and needs.
- Keep decision makers and employees informed about public reaction to products, policies and practices.

6. Realise the company's true character is expressed by its people

- Employee words and deeds shape strong opinions about a company.
- Every employee, active or retired, is involved in public relations.
- Corporate communications should support employees as honest, knowledgeable ambassadors.

Exam tip

- If asked to 'state the principles of PR', write all seven with one-line explanations rather than only listing names.

INTERNAL & EXTERNAL COMMUNICATION

Two major corporate communication flows + 7 Cs

Internal Communication

- Takes place between and among employer and employees.
- Vital for binding an organisation, enhancing morale, promoting transparency and reducing slow organisational destruction.
- Many internal problems are linked in the chapter to ineffective communication.

Directions & forms

- Flows can be vertical, horizontal and diagonal across the organisation.
- May be formal or informal.
- Supports planning, direction, coordination and motivation.
- Messages may be written, oral or verbal.

Written internal media

- Instructions and orders
- Letters and memos
- House journals
- Posters and bulletin boards
- Information racks
- Handbooks and manuals
- Activity reports

External Communication

- Occurs between members of an organisation and the outside world.
- Supports positive image, brand preservation and public relations.
- Helps marketing in a global society.
- Communication may be with government/departments, customers, dealers, inter-corporate bodies and general public.

External media

- Written: letters, memos, in-house magazines, posters, bulletins, annual reports.
- Verbal media can also be used.
- Two broad communication activities: **composing message** and **transmitting message**.

Internal vs External

- **Internal:** organisation ↔ employees.
- **External:** organisation ↔ outside world.
- **Shared goal:** clear, effective communication supporting organisational functioning and relationships.

THE 7 Cs OF COMMUNICATION

How to compose an effective message

1. Conciseness

- Keep the message concise so it is easy to catch the reader's attention.

2. Concreteness

- The message should convey its meaning clearly while remaining short in length.

3. Clarity

- Give appropriate and explicit meaning.
- Avoid wording that can diversify, confuse or mislead the reader.

4. Completeness

- The message should provide sufficient information for the reader to understand its complete meaning.

5. Courtesy

- Use a courteous tone.
- Emphasise compliments and benefits for readers where appropriate.

6. Correctness

- Check the message for correctness.
- It should be free from grammatical errors.

7. Consideration

- Show proper consideration in the message.
- Emphasise the receiver's attitude/needs rather than focusing on 'I' and 'we'.

7 Cs — quick recall

- Conciseness
- Concreteness
- Clarity
- Completeness
- Courtesy
- Correctness
- Consideration

Composition → Transmission

- First compose a message using the 7 Cs.
- Then select an appropriate medium and transmit it to the intended audience.

KNOWLEDGE & SKILLS REQUIRED — I

Listening • Interpersonal • Negotiation • Presentation

1. Listening Skills

- Listening is an active process involving **hearing** → **understanding** → **response**.
- Hearing is the physical reception and interpretation of sound.
- Understanding is the brain processing words and deriving meaning in context.
- Responding demonstrates that the message was heard and understood and may lead to action or a reply.

4. Presentation Skills

- Used to communicate ideas and information to a group.
- Allows immediate interaction and conveys the speaker's personality.
- A good presentation has **content, structure, packaging and human element**.
- Structure should have logical beginning, middle and end and be paced for audience understanding.
- Technology such as software/PPT can support packaging.

2. Interpersonal Skills

- Ability to operate within business organisations through social communication and interaction.
- Positive interpersonal skills can increase productivity by reducing conflicts.
- Help make informal communication easy and comfortable.
- Support appropriate responses in difficult situations.

Human element

- A good presentation is remembered because a person is attached to it.
- Analyse audience needs and select an appropriate approach.
- Personal gestures and thoughtful communication can improve the human connection.

3. Negotiation Skills

- Negotiation occurs when parties have unacceptable points regarding an issue/deal.
- Each side tries to convince the other and both must be prepared.
- Good negotiation considers possible variables, estimates costs and decides which concessions to offer.

Skill formula

- **Listen** → **Understand** → **Negotiate** → **Present**
- These skills support successful composing and transmitting of messages.

KNOWLEDGE & SKILLS REQUIRED — II

Rapport • Decision-making • Writing • Accent • Time • Stress

5. Rapport Establishment

- Rapport means establishing trust and harmony in a relationship.
- It is presented as a key element for obtaining support and cooperation.
- The chapter discusses analogue communication (body language and speech) and digital communication (words).
- Building rapport helps establish deeper trust and harmony with a wider range of people.

8. Accent Neutralisation

- People speak languages with different cultural accents.
- Accent neutralisation aims to pronounce words so the listener can understand what is being said.
- Possible benefits described include improved professional image, confidence, opportunities and listener understanding.

6. Effective Decision Making

- Every successful person needs decision-making ability.
- Consider human and material elements.
- Assess/prioritise factors, anticipate outcomes and decide in the best interest of concerned parties.
- Corporate managers balance efficiency, profit and satisfaction of stakeholders, employees and owners.

9. Time Management

- Time is a valuable resource for work, goals, relationships and enjoyment.
- Time management uses principles, practices, skills, tools and systems to get more value from time.
- It supports efficiency and productivity and can reduce stress.

7. Telephone + Writing + Public Speaking

- Telephone etiquette creates a good impression and puts the other person at ease.
- Basic writing includes emails and notes.
- Public speaking skills help in professional/business communication.
- Corporate communicators must apply these skills for success.

10. Stress Management

- Stress is a physical, mental and emotional response to demands, changes and events.
- Some stress may motivate and encourage task completion.
- Management involves taking charge of thoughts, emotions, schedule, environment and ways of dealing with problems.
- Goal: balanced life with work, relationships, relaxation and flexibility under pressure.

TECHNOLOGY, SCOPE & CAREER DIRECTION

ICT • organisational communication • modern PR

Use of Technology to Communicate

- Technology has expanded the scope of communication and access to information, knowledge and news.
- ICT is an umbrella term covering technical means for processing and communicating information.
- It is commonly used for digital technologies, communication/transmission techniques, equipment, media and storage/processing.
- The term gained popularity partly through the union of information technology and telecommunications technology.

Scope — technology & media

- Innovation in the use of media and technologies expands communication possibilities.
- Modern corporate communication combines people skills, media, written/verbal communication and ICT.

PR + target audience

- While composing and transmitting messages, PR professionals must consider characteristics of the target audience.
- Language should depend on the target group.
- Disposition and interpersonal skills are important in PR work.

Career skill bundle

- Listening
- Interpersonal communication
- Negotiation
- Presentation
- Rapport
- Decision making
- Telephone etiquette
- Writing
- Public speaking
- Accent neutralisation
- Time management
- Stress management

Scope — organisations

- Corporate offices and organisations need PR for communication between employers and employees.
- PR officers communicate with stockholders, media, press, NGOs, government, customers and the general public.
- PR plays a crucial role in dealing with outside agencies.

Big picture

- **Corporate Communication** manages organisational communication.
- **PR** builds and maintains relationships with publics.
- **Media & ICT** provide channels/tools.
- **Skills** make the communicator effective.

ONE-PAGE REVISION SHEET • CHAPTER 14

Definitions • functions • PR areas • principles • skills • scope

Core definitions

- **Corporate Communication:** managing and orchestrating internal and external communications.
- **PR:** planned effort to establish and maintain mutual understanding between an organisation and the public.
- **Internal Communication:** employer/employee communication.
- **External Communication:** organisation/outside-world communication.
- **ICT:** technical means for processing and communicating information.

Functions to remember

- PR policy
- Statements & press releases
- Publicity
- Maintaining relations
- Publications
- Brand/reputation management
- Crisis control
- Stakeholder liaison

Major PR areas

- Press relations
- Advertising
- Publications
- Other media coordination
- PR with constituents
- Internal PR

7 Principles

- Tell the truth
- Prove it with action
- Listen to the customer
- Manage for tomorrow
- Conduct PR as if the whole company depends on it
- Realise true character is expressed by people
- Remain calm, patient and good-humoured

7 Cs

- Conciseness
- Concreteness
- Clarity
- Completeness
- Courtesy
- Correctness
- Consideration

Exam comparisons

- **Internal vs External:** employees vs outside world.
- **Corporate Communication vs PR:** broader organisational communication vs relationship/public understanding function.
- **Composing vs Transmitting:** creating the message vs sending it through a suitable medium.

Review questions from the chapter

1. Significance of corporate communication today?
2. Functions of corporate communication?
3. Compare internal and external communication.
4. What factor revolutionised communication's scope?
5. Verbal/non-verbal skills with examples.
6. Meaning and significance of PR?

More review questions

7. Which two PR work areas are important? Why?
8. Principles of PR work?
9. Relationship between corporate communication, PR and Media?

Case-study assignment

- Prepare a PR agency case study covering:
 - Client-company situation
 - Objectives to resolve it
 - Target group orientation
 - Message selection
 - Media selection
 - Creativity and innovation
 - Resource assessment
 - Man-power review
 - Implementation and results

Source note: Prepared from the uploaded NCERT Human Ecology and Family Sciences – Part 2, Unit VI, Chapter 14, "Corporate Communication and Public Relations", Reprint 2026–27, pp. 256–269. The notes preserve the chapter's terminology, examples, seven PR principles, 7 Cs, skill list, scope and review/assignment structure. The chapter's source pages also include the cited communication studies and visual boxed material.
